The Virgin Islands are a group of islands at the eastern extremity of the Greater Antilles, divided between Great Britain and the U.S.A. Those of the group which are British number about 42, of which 11 are inhabited, and have a total area of about 59 square miles. The principal are Tortola, the largest (situate in 18° 27' N. lat. and 64° 40' W. long.), Virgin Gorda, Anegada and Jost Van Dykes. The population is approximately 7,350 (1960). Communication is by daily launch service to St. Thomas; also an external telephone service linking Tortola with St. Thomas and Puerto Rico by which messages may be sent to all parts of the world, and one linking Tortola with Antigua. An airfield on Beef Island is used by small planes. The principal exports are livestock, fish, charcoal, vegetables and fruit, for which the principal market is St. Thomas. Rum is distilled on a small scale.

Finance and Trade

EAST AFRICAN COMMON SERVICES ORGANIZATION, ETC.

EAST AFRICAN COMMON SERVICES ORGANIZATION

The East African Common Service Organization was established by an agreement between the Governments of Tanganyika, Kenya and Uganda, dated Dec. 9, 1961, replacing the East Africa High Commission, which had been in operation since Jan. 1, 1948. Its headquarters are at Nairobi.

The Common Services Organization administers certain inter-territorial services such as: The East African Directorate of Civil Aviation, the East African Income Tax Department, the East African Posts and Telecommunications Administration, the East African Railways and Harbours Administration, the East African Customs and Excise Department, the East African Meteorological Department, the East African Statistical Department (dealing with specific subjects only), the East African

Literature Bureau, the Royal East African Navy, the East African Department of Economic Co-ordination, the East African Office in London and various research organizations. Responsibility for the administration of these services rests with the Administrator, the Financial Secretary and the Postmaster General.

The East Africa Central Legislative Assembly was established by Order in Council in 1947. It is presided over by a Speaker and consists of seven *ex officio* members who are officers in the High Commissioner's service, six nominated members and twenty unofficial members. Of the nominated members, two each are appointed by the Governors of Kenya, Tanganyika and Uganda. Of the unofficial members, six are appointed from each of the three territories, three of these being appointed by the Governor and the other three elected by the Legislative Council; the remaining two unofficial members are Arabs, and are appointed by the High Commission.

The Common Services Organization has power to legislate, in respect of certain matters of common interest to the three territories, such as civil aviation, customs and excise, defence, income tax, inter-territorial research, Makerere College, posts and telegraphs, meteorological services, statistics, railways, harbours and inland water transport. It has also power to legislate with the advice and consent of the Legislative Councils of the three Territories on any matter concerned with the peace, order and good government of those territories.

FALKLAND ISLANDS

These, the only considerable group in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 52° 15'-53° S. lat. and 57° 40'-62° W. long. They consist of East Falkland (area 2,610 sq. miles), West Falkland (2,090 sq. miles) and upwards of 100 small islands in the aggregate, the total population at the census of 1962 being 2,172. Mount Osborne, the loftiest peak, rises 2,312 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764; this was subsequently sold to Spain, but the latter country recognized Great Britain's title to a part at least of the group in 1771. The settlement was destroyed by the Americans in 1831. In 1833 occupation was resumed by the British for the protection of the seal-fisheries, and the islands were permanently colonized as the most southerly organized colony of the British Empire. The climate is cool, the thermometer ranging in winter from 20° to 50°, and in summer from 46° to 70° Fahrenheit; it is notably windy. The islands are chiefly moorland. The population is almost totally British, and is principally engaged in sheep-farming, to which practically all the land in the colony is devoted, 617,061 sheep being carried in 1961. Wool, tallow, hides and sheepskins are exported. The only important settlement is Stanley, on the coast of East Falkland.

FINANCE AND TRADE

GOVERNMENT

The Governor is assisted by a Legislative Council of 11 members, with the Governor as Chairman, 2 *ex officio* (Colonial Secretary, Senior Medical Officer and Colonial Treasurer), 2 official and 2 non-official members (nominated by the Governor) and 4 representatives elected by the people.

Governor and Commander-in-Chief, His Excellency Sir Edwin Porter Arrowsmith, K.C.M.G. (1957)	(+ duty alic. £650)	£3,000
Colonial Secretary, R. H. D. Manders, O.B.E.....		2,000
Senior Medical Officer, R. S. Slessor, O.B.E.		1,950
Colonial Treasurer, L. C. Gleadell.....		1,680

CHIEF TOWN, Ψ Stanley. Estimated population 1,974.

DEPENDENCIES.—South Georgia, an island 800 miles east-south-east of the Falkland Group, with an area of 1,450 square miles. An Administrative Officer and other officials reside there. The South Sandwich Islands group, which is uninhabited and lies some 470 miles S.E. of South Georgia, is the only other dependency. There is a whaling industry in South Georgia. Two British companies operated during the 1961-62 season, 109,796

barrels of whale oil being exported. Sealing operations yielded 9,666 barrels of seal oil in 1962. A chain of meteorological stations is maintained in the Dependencies.

Trade of the Dependencies

	1960	1961
Total imports.....	£1,181,193	£1,071,801
Total exports.....	3,256,231	2,234,355
Imports from U.K....	221,189	169,252
Exports to U.K.....	2,393,772	1,657,640

Ψ Stanley, the capital of the Falkland Islands, is distant from England about 8,103 miles; transit by steamer *via* Montevideo. Telegrams by wireless U.K. direct. The journey from U.K. to Falkland Isles can be accomplished in 5 days travelling to Montevideo by air and thence by local steamer to the Falklands.

British Antarctic Territory

Those territories south of latitude 60° S. which were formerly part of the Falkland Islands Dependencies were constituted a separate Colony on March 3, 1962. The principal units of the new Colony are the South Shetlands, the South Orkneys and Graham's Land (a peninsula of the Antarctic Continent) and that part of the Antarctic Continent lying between 20° W. and 80° W. long. The climate is inhospitable and the territory is covered with snow and ice and almost destitute of plant life. A chain of meteorological scientific and survey stations is maintained in the territory.

High Commissioner, His Excellency Sir Edwin Porter Arrowsmith, K.C.M.G. (1962).

FIJI

This is a group of 322 islands (of which only 106 are inhabited) in the South Pacific Ocean, about 1,100 miles north of New Zealand. The gross area of the group, which extends 300 miles from east to west, and 300 north to south, between 15° 45'—21° 10' S. lat. and 176° E.—178° W. long. is 7,083 square miles. Many of the islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu, Vanna Levu, Taveuni and Kandavu. The climate is oceanic. Shade temperatures seldom rise above 93°F. or fall below 60° except in the mountains. On the windward sides of the larger islands rainfall is copious and vegetation luxuriant; on the leeward (or dry) sides the vegetation is sparse and scattered. The chief products are coconuts, sugar cane, gold, rice, bananas, pineapples, yams, and dalo or taro (colocasia).

The population (estimated 1961) was 413,872 (205,068 Indians, 172,455 Fijians, 8,958 part Europeans, 10,417 Europeans, 11,818 other Pacific races, 5,039 Chinese and 117 others).

FINANCE

Total imports.....	£F16,306,934	£F17,228,039
Total exports.....	15,515,682	13,126,662
Imports from U.K....	4,169,172	4,856,931
Exports to U.K.....	7,078,678	5,663,660

Fijian currency—£111 Fiji = £100 sterling.

The principal exports are sugar, coconut oil, gold, copra, bananas, biscuits, trocas shell and manganese ore. The chief imports are drapery, machinery, motor vehicles, petroleum products, timber, foodstuffs and electrical goods. The tourist industry is growing.

GOVERNMENT

The Governor is appointed by the Crown, and is assisted by an Executive Council. Laws are passed by a Legislative Council (of which the Governor is president) containing 16 official members, 5 European members (3 elected, 2 nominated), 5 Fijian members (nominated from a panel submitted by the Council of Chiefs), 5 Indian members (3 elected and 2 nominated), and a Speaker (H. M. Scott, C.B.E., D.F.C.).

The executive officer for the native administration is the Secretary for Fijian Affairs, who is responsible to the Governor and, in appropriate matters, to the Legislative Council. The controlling financial authority is the Fijian Affairs Board whose members are the Secretary for Fijian Affairs (Chairman), the five Fijian members of Legislative Council, a legal adviser, and a financial adviser. The Board has power to make regulations affecting the Fijians, but such regulations are subject to approval by the Legislative Council.

British Council Representative, Suva, J. T. Harrison.

CAPITAL. Ψ Suva, in the island of Viti Levu. Population (1958), 37,371.

Suva is 11,000 miles from London; transit from London, *via* Auckland, about 30 days; *via* Vancouver or San Francisco, about 30 days; *via* Panama, about 30 days; by air, *via* Canada, U.S.A., or Sydney, about 4 days. Fiji is on the main air route between North America and Australia and New Zealand. It is a base for South

Pacific regional air services, covering New Zealand, Western Samoa, New Caledonia, Tahiti, Cook and Norfolk Islands.

GAMBIA

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1583, the year of the Spanish Armada, Queen Elizabeth I. being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognized, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of a narrow strip of land, estimated at 4,003 sq. miles, lying on both sides of the River Gambia to a distance of about 350 miles, mainly between 13° 15'–13° 45' N. and 13° 45'–13° 65' W. The river is navigable to ocean-going vessels for 150 miles and to river steamers up to 300 miles from its mouth. The capital, Bathurst, is situated on the island of St. Mary at the mouth of the River and, together with a small adjoining district and some outlying areas, constitutes the "Colony". The remainder of Gambia constitutes the "Protectorate". The total population of the territory is about 300,000.

Communications.—Bathurst is 2,600 miles from London; the mail boat from Liverpool takes seven days. There is one direct air service weekly *via* Las Palmas and three weekly, changing at Dakar. Ocean-going vessels entering the ports in 1961 totalled 173 (tonnage 542,000). Civil aviation movements at the international aerodrome of Yundum near Bathurst numbered 1,458. Internal communication is by road and river. There are some 730 miles of motor road, including about 70 miles of bituminous surface road communicating between Bathurst and areas on the South Bank. There are five Government wireless stations and a V.H.F. telephone service linking Bathurst with outlying centres. In 1962 a broadcasting service was started.

Education.—There are 65 primary schools (48 Government and 17 Mission), 8 post-primary schools or departments, and 5 secondary schools, three of which are recognized for School Certificate Examination. The total school enrolment in 1961 was 10,745 pupils, including 3,300 girls. The technical trade school in Bathurst offers courses in carpentry and metal work. Yundum College provides training for teachers.

FINANCE

	1961 (Revised Estimate)	1962 (Budget)
Recurrent revenue . . .	£1,770,000	£1,602,000
Recurrent expenditure .	2,110,000	2,356,000
Development expenditure	740,000	972,000
Public debt	238,760	238,760

For 1962 the recurrent revenue is supplemented by grant-in-aid from the United Kingdom Treasury.

TRADE

	1960	1961
Total imports	£3,221,586	£4,572,466
Total exports	2,516,297	3,232,350
Imports from U.K.	1,296,598	1,839,500
Exports to U.K.	1,240,203	1,091,010

The chief export is decorticated ground-nuts, which account for over 90 per cent. of total exports, the main markets being Italy and United Kingdom. Other exports are palm kernels, dried fish and hides. Foodstuff imports include rice, sugar, flour and kola nuts. Manufactured goods of all kinds are imported, the chief being textiles and wearing apparel, vehicles, machinery, metal goods and petroleum products.

CHIEF TOWN, Ψ Bathurst. Population, 23,600.

GOVERNMENT

The Gambia has a representative Government with a Speaker, Deputy Speaker and 32 elected members: 7 from the Colony and 25 from the Protectorate. In addition, there are 4 Chiefs elected to the House of Representatives by the Chiefs in Assembly and 2 members nominated by the Governor, who are without votes. The Governor is President of the Executive Council, which is composed of the Premier and 8 Ministers drawn from the Legislature. The Attorney-General normally attends Council in an advisory capacity and is a member of the Legislature without a vote.

Governor and Commander-in-Chief, His Excellency Sir John Warburton Paul, K.C.M.G., O.B.E., M.C. (1962) £4,100
Deputy Governor, P. A. Gore, C.V.O.
Chief Justice, J. A. L. Wischam 2,280

MINISTERS

British Council Representative, Bathurst, E. B. Evans.

LONDON OFFICE

Gayferc House, Great Peter Street, S.W.1.

GIBRALTAR,

a rocky promontory, 3½ miles in length, ½ of a mile in breadth and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. The population at the census of Oct. 1961 was 24,502.

Ψ Gibraltar is a naval base of vital strategic importance to Great Britain. It was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and was ceded to Great Britain by the Treaty of Utrecht, 1713. Several attempts have been made to retake it, the most celebrated being the great siege in 1779–83, when General Elliot, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. It is a popular tourist centre. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit, perfumery, coffee, fuel oil, motor vehicles, radios,

cameras and cinematograph projectors, mechanical lighters, razor blades, watches and clocks.

The Department of Education runs 8 secondary schools and 16 primary and infant schools. There are also 3 private infant schools. Teacher training and University Scholarships have been provided, 3,999 pupils are at present in Government schools, and the Government expenditure on education in 1961 was £163,070.

HONG KONG

The Crown Colony of Hong Kong, consisting of a number of islands and of a portion of the mainland, on the south-eastern coast of China, is situated at the eastern side of the mouth of the Pearl River, between 22° 9' and 22° 37' N. lat. and 113° 52'–114° 30' E. long.

The capital city, Victoria, situated on the island of Hong Kong, is 91 miles S.E. of Canton and 40 miles E. of the Portuguese colony of Macao at the other side of the Pearl River. It lies along the

northern shore of the island and faces the mainland; the harbour (16 sq. miles water area) lies between the city and the mainland, on which is situated Kowloon with a population equalling that of Victoria. The total area of the Colony is 398½ sq. miles with a population which has varied considerably during recent years owing to unsettled conditions in China. In Dec. 1961 it was thought to be about 3,226,400.

The island of *Hong Kong* is about 11 miles long and from 2 to 5 miles broad, with a total area of 29 square miles; at the eastern entrance to the harbour it is only separated from the mainland by a narrow strait (Lei Yue Mun), 500–900 yards in width. It was first occupied by Great Britain in January, 1841, and formally ceded by the Treaty of Nanking in 1842; *Kowloon* was subsequently acquired by the Peking Convention of 1860; and the *New Territories*, consisting of a peninsula in the southern part of the Kwangtung province, together with adjacent islands, by a 99-year lease signed June 9, 1898.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is 1,805 feet high. The New Territories contain several peaks higher than this, the highest being Tai Mo Shan, 3,140 feet. The summer weather is continuously hot and humid and often cloudy and showery. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The mean monthly temperature ranges from 59°F. in February to 82°F. in July, the average for the year being 72°F. The temperature rarely exceeds 95°F. in summer or falls below 40°F. in winter. The average annual rainfall is 84.76 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Communications.—Hong Kong, one of the world's finest natural harbours, possesses excellent wharves and dry docks, capable of holding vessels up to 750 ft. in length. Shipping tonnage for the year ending March, 1962, was 37,644,259. A railway, 22 miles in length, owned by the Government, runs between Kowloon and the Chinese frontier. It forms a direct overland communication with Canton, Hankow and Shanghai, but since October, 1949, all through passenger traffic has been suspended.

Hong Kong Airport, Kai Tak, is on the north shore of Kowloon Bay, some 4 miles from the centre of Kowloon. Some 20 airlines operate scheduled services to the Colony in addition to numerous charter flights by other operators. The Colony, with its modern runway of 8,350 ft., is an important link on the main air routes of the Far East, with frequent services to Europe, America and neighbouring territories, China excepted. B.O.A.C. operates 11 services per week to London, 8 *via* Europe and 3 *via* U.S.A.

Education.—In March, 1962, there were 2,005 schools with 686,493 pupils. 45 per cent. of the pupils are financed wholly or in part by the Government. The University of Hong Kong has a full-time residential student strength of 1,448 (including 401 women) in Faculties of Arts, Science, Medicine, Engineering and Architecture. There are also an Institute of Oriental Studies and a Department of Extra-Mural Studies.

TRADE

Since the United Nations embargo on trade with China imposed severe limitations on Hong Kong's

traditional *entrepôt* economy, the pattern and direction of the Colony's trade have changed fundamentally. A different type of *entrepôt* trade has developed on a smaller scale, involving all countries in the Far East, with Hong Kong as an intermediary. However, re-exports now represent little more than 25 per cent. of total exports. This has been due to the rapid growth of domestic industry, mainly manufacturing for consumers, which now provides the bulk of goods for the export trade. The Colony's products include a wide range of cotton piecegoods, cotton yarn, rayon and silk brocades, clothing, household enamel and aluminium ware, plastic articles (including toys and artificial flowers), rattan and hardwood furniture, foodstuffs and beverages, jade, jewellery and ivory, and an extensive range of metal products.

Diversification of manufacture is a feature of recent industrial developments. New products include wool and wool fabrics. The marked improvement in both quality and output of items for which precision engineering is required, notably cameras, binoculars and transistor radios, has continued.

The adverse balance on visible trade is offset by a favourable balance on invisible account—remittances from overseas Chinese, exchange, shipping and insurance profits, and the spending of tourists, etc. In 1961 Hong Kong's principal customers for its domestic products, in order of value of trade, were U.S.A., the United Kingdom, Malaya, Indonesia, Japan and the Federal Republic of Germany. China continued to be the Colony's principal supplier, followed by Japan, the United Kingdom, U.S.A., Thailand and the Federal Republic of Germany.

IMPORTS AND EXPORTS

Total Exports (1961)	H.K. \$3,930,040,758

Exports to U.K.	45,287,888

GOVERNMENT

Hong Kong is administered as a Crown colony with a Governor, aided by an Executive Council, consisting of 6 official and 6 unofficial members, and a Legislative Council, which consists of nine official and eight unofficial members. There is also an Urban Council in which is vested, *inter alia*, power of making bye-laws in respect of certain matters of public health and sanitation.

JAMAICA

An island situated in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 43'—18° 32' North lat. and 76° 11'—78° 21' W. long., Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the *Treaty of Madrid*.

Area and Population.—It is the largest island of the Federation of the West Indies, being 146 miles in length and 51 in extreme breadth, containing an area of 4,411 square miles. The island is divided into 3 counties (Surrey, Middlesex and Cornwall) and 14 parishes. The preliminary figures of the census taken in April, 1960, showed a total population of 1,613,148.

The climate attracts many winter visitors, mainly from U.S.A. Value of the tourist trade in 1960 was estimated at £13,500,000. Visitors numbered 226,945.

Physical Features.—From the sea-level on all sides of Jamaica a series of ridges gradually ascends towards the central ranges, dividing the larger rivers, and attaining, in the culminating Blue Mountain Peak, in the eastern part of the island, an elevation of 7,402 feet. From these mountains at least 70 streams descend to the north and south shores, but none is navigable except the Black River, and that only for small craft.

Capital.—The seat of government is Ψ Kingston, the largest town and seaport (population, census 1960, 123,213). Other towns are Ψ Montego Bay (23,471) and Spanish Town (14,439).

GOVERNMENT

After more than three centuries of British rule, Jamaica became an independent state on August 6, 1962, and was recognized as a member of the British Commonwealth. The legislature consists of a *Senate* of 21 nominated members and a *House of Representatives* consisting of 45 members elected by universal adult suffrage. The number of members may vary up to 60. The Senate has no power to delay money bills for longer than one month or other bills for longer than seven months against the wishes of the House of Representatives.

Governor-General, His Excellency Sir Kenneth William Blackburne, G.C.M.G., G.B.E.

CABINET

(August 6, 1962)

Premier, Sir Alexander Bustamante.
Minister of Finance, D. Sangster.

Education, E. Allen.
Labour, L. Newland.
Trade and Industry, R. Lightbourne.
Health, Dr. H. Eldemire.
Development, E. Seaga.
Agriculture, J. Gyles.
Home Affairs, R. McNeill.
Without Portfolio, D. C. Tavares.

Speaker, House of Representatives, Burnett Coke.

COMMONWEALTH REPRESENTATION

Kingston

United Kingdom High Commissioner, His Excellency Sir Alexander Morley, K.C.M.G., C.B.E.
Deputy High Commissioner, C. E. Diggins.

London

Jamaican High Commissioner, His Excellency H. L. Lindo, C.M.G., 6-10 Bruton Street, W.1.

JUDICATURE

Chief Justice and Keeper of Records, Hon. Sir Colin MacGregor.

Senior Puisne Judge, Hon. A. R. Cools-Lartigue.
Puisne Judges, Hon. D. H. Semper; Hon. R. H. Small; Hon. H. G. H. Duffus; Hon. G. E. Wadlington; Hon. R. R. Phillips.

COMMUNICATIONS

There are several excellent harbours, and the island is intersected by good roads. There are 249 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages. The Palisadoes Airport at Kingston (now capable of handling the largest civil jet aircraft) is used by British West Indian Airways Ltd., British Overseas Airways Corporation, Pan-American Airways, K.L.M., Trans-Canada Air Lines, Avianca, RANSA and Aerovias Panama Airways, which provide air communications with Europe, North, Central and South America and the Caribbean Islands. The Montgo Bay Airport is also used by many airlines. A number of non-scheduled airlines operate through the island for non-traffic purposes in accordance with the provisions of International Air Services Transit Agreement.

PRODUCTION

Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world, and the coffee raised in certain districts of the Blue Mountains is of fine quality and fetches a high price. Sugar production in 1960 amounted to 424,270 tons processed from 4,385,000 tons of cane. There is an extensive trade in fruits, chiefly bananas, with the U.K. Citrus (and juices), cocoa and pimento are important export crops. Jamaica has developed a breed of dairy cattle known as the Jamaica Hope which is being exported to other tropical countries on an increasing scale. Good beef cattle are also raised. Jamaica is now the largest producer of bauxite in the world. The bauxite deposits are worked by one Canadian and two American companies; the Canadian company processes bauxite into alumina. Exports in 1960 amounted to: Alumina, 665,361 tons (£16,634,475); Bauxite, 4,147,555 tons (£10,887,332).

Gypsum is also mined, production for 1960 being 246,000 tons. Cement is manufactured locally, the output of the factory being 209,000 tons in 1960.

There is a textile mill and local factories also manufacture garments, knitted fabrics, shoes, paints, corrugated cardboard containers, small plastic articles, drugs, blankets, aluminium furniture and

hollowware, gin, corn meal, soap, condensed milk, beer, baseballs, typewriters, radio sets, brake linings and brake shoes and electric light fittings.

FINANCE

The financial settlement with the United Kingdom prior to independence included grants to Jamaica amounting to £1,000,000 (portion of Colonial Welfare and Development Funds) and an Exchequer loan of £1,250,000 towards the island's capital Budget for 1962-63.

	1960-61	1961-62*

Chief exports (1960): bauxite, £10,887,332; sugar, £13,591,537; rum, £1,280,976; bananas, £4,614,000; raw coffee, £266,400; pimento seeds, £913,120; alumina, £16,634,475; fruit juices, £1,143,774; prepared and preserved fruits, £823,284; prepared cocoa, £309,260.

British Council Representative in Kingston, C. Hentschel.

KENYA

The Colony and Protectorate of Kenya is bisected by the equator and extends approximately from latitude 4° N. to latitude 4° S. and from longitude 34° E. to 41° E. From the coast of the Indian Ocean in the east, the borders of Kenya are with Somaliland in the east and Ethiopia and Sudan in the north and north-west. To the west lie the Uganda Protectorate and Lake Victoria. On the south is Tanganyika Territory. The total area is 224,960 square miles (including 5,224 square miles of water). The total estimated population in mid 1961 was 7,287,000, including 66,000 Europeans, 178,000 Indo-Pakistanis and Goans, and 45,000 other non-Africans. The African population is estimated at 7,000,000.

The Territory is divided into 6 Provinces (Nyanza, Rift Valley, Central, Coast, Southern and Northern) and an Extra-Provincial District (Nairobi).

Kenya Protectorate consists of a strip extending 10 miles inland along the coast from the Tanganyika mandated territory frontier to Kipini and the Islands of the Lamu Archipelago. The Protectorate also includes the Witu Protectorate, a small tract of country at the mouth of the Tana River.

Production.—Agriculture provides about 85 per cent. of the national income; the principal exports in 1961 included: coffee, £10,624,891; tea, £4,004,198; sisal, £4,191,840; pyrethrum, £808,483; hides and skins £1,556,282; meat preparations (tinned), £1,350,360. The great variation in altitude and ecology provide conditions suitable for the production of a wide range of crops including coffee, tea, pyrethrum, sisal, coconuts, cotton, maize, wheat and fruit of all varieties. Legislation in 1961 abolished the Highlands Order in Council which reserved for European agriculture an area of 12,733 sq. miles, about 5.8 per cent. of the total land area of Kenya. Anyone is now able to purchase land in the Highlands. Settlement

schemes for Africans are being started in the Highlands on land of high potential which has been purchased from European farmers by the Settlement Board. European agriculture provided about 80 per cent. of the total exportable surplus of agricultural products for the Colony in 1961, in addition to considerable quantities of food for areas devastated by famine and flood. African tribal lands, which remain exclusively reserved for the use of the indigenous people, amount to some 191,214 sq. miles, about 87 per cent. of the land area. Of this area only 63.5 per cent. is of agricultural use, the rest being semi-desert and waterless country. Production from the African areas is now increasing rapidly. Forest reserves cover 6,137 sq. miles, and provide valuable timber for building, fuel, and an assortment of purposes.

Prospecting and mining are carried on in many parts of the Colony, the principal minerals at present produced being copper, carbon dioxide gas (natural), diatomite, gold, limestone, salt and soda-ash. The value of the production of main minerals in 1961 was as follows: refined gold, £153,481; soda-ash £1,584,938, cement £2,559,385, salt £183,492, diatomite £47,584, carbon dioxide gas (natural) £44,151, limestone £106,092.

Hydro-electric power has been developed, particularly on the Upper Tana River and electricity is now available in Nairobi from the Owen Falls Dam scheme in Uganda.

Since the war there has been a great increase in industrial activity and particularly in the number of secondary industries. Many of these are engaged in processing agricultural produce but there is now manufactured an increasing range of products from local and imported materials and there has been a very sharp increase in the manufacture of consumer goods. The market served is that of all the East African territories. Industrial areas have been developed in all the principal towns and light industrial areas are being developed in rural areas.

The main imports are manufactured goods, classified chiefly as materials, machinery and transport equipment, mineral fuels, lubricants and related materials, food and chemicals.

Communications.—There were 230 post offices in operation in Kenya at Dec. 31, 1961. It is estimated that 72,300,000 letters, postcards and printed papers were handled during 1961. The number of parcels handled was 599,087. The Post Office operates a Savings Bank on behalf of the Kenya Government. During 1961, withdrawals exceeded deposits by £618,789. The number of deposit accounts increased by 29,000 to 401,710 by the end of 1961. The total amount held on behalf of depositors in Kenya was approximately £6,507,000, 23,421 exchange lines and 44,137 telephones (including extensions) were in service at the end of 1961. There are 144 telegraph offices in Kenya. A teletprinter service, provided by means of private wires between the users' offices in the various towns, gives direct and exclusive communication. There were 99 such circuits in operation at the end of 1961. An International Telex Service was introduced in July 1960.

The East African Railways and Harbours are a self-contained and self-financing service of the East African Common Services Organization; the railway, which is metre gauge, has a total route mileage of open line of 3,490 miles, made up as follows: Kenya and Uganda Section—Main Line: Mombasa—Kampala—Kasere (1,036 miles); Principal Lines: Nakuru Junction—Kisumu (131), Tororo—Soroti (100), Voi—Kahe Junction (94); Minor and Branch Lines: Rongai—Solai (27), Kisumu—Butere

(43), Leseru—Kitale (41), Mbulamuti—Namasagali (19), Kampala—Port Bell (6), Gilgil—Thomson's Falls (48), Nairobi—Nanyuki (145). The Konza—Lake Magadi Line (91 miles) is worked but not owned by East African Railways and Harbours. Tanganyika Section—Main Line: Dar-es-Salaam—Kigoma (779 miles); Principal Line: Tabora—Mwanza (236); Branch Lines: Kaliuwa—Mpanda (131); Kilosa—Mikumi (44). The Tanga Line runs from Tanga to Arusha (273 miles). Southern Province Railway: Mtwara—Nachingwea—Masasi (154 miles). In addition the Administration operates a marine service on Lakes Victoria, Kioga, Albert and Tanganyika, and also on the River Nile with a route mileage of 4,194 miles. There are also 2,685 miles of road services connecting the Central and Tanga Lines and providing regular transport to the Southern Highlands, with subsidiary road services in Kenya and Uganda. East African Railways and Harbours control the five seaports of Mombasa, Tanga, Dar-es-Salaam, Lindi and Mtwara. Mombasa, Dar-es-Salaam and Mtwara have deep-water berths and Tanga and Lindi are lighterage ports.

Scheduled trunk airline services during 1961 were operated to or through Kenya, from Nairobi airport, by East African Airways Corporation, B.O.A.C., Air India, South African Airways, Air France, Central African Airways, Scandinavian Air System, British United Airways and Alitalia, while regional scheduled services were also run by East African Airways Corporation, Sabena, Ethiopian Air Lines, Aden Airways and Alitalia.

Roads policy and the administration of the Road Fund are under the control of the Road Authority. The Colony has approximately 26,000 miles of road including 3,750 miles of trunk roads, 6,500 miles of secondary roads. There is a total of 920 miles of bitumen-surfaced roads. During 1961, 84,540 vehicles were licensed, a decrease of 4,965 in comparison and the previous year.

Since 1949 the Customs Departments of Kenya, Uganda and Tanganyika have been amalgamated under the title of the East African Customs and Excise Department under the East Africa Common Services Organization.

GOVERNMENT

The Colony and Protectorate of Kenya is administered by a Governor, who is advised by a Council of Ministers. As a result of the London Conference in April 1962, a National Government was formed and the size of the Council of Ministers was increased to 16. The present Government is a Coalition Government in which both K.A.D.U. and K.A.N.U. Ministers are participating on equal terms. The Legislative Council consists of a Speaker, appointed by the Governor and 53 constituency elected members, in addition to 12 national members and 4 nominated members. The Council of State, designed to protect any community against harmful discriminatory legislation,

may consist of a Chairman with not more than 16 and not less than 10 members. At present a Chairman and 10 members have been appointed.

Nairobi, the Capital City and seat of Government is situated at latitude 2° S. and longitude 36° 8' E. at 5,500 feet above sea level, and has a population of about 297,000. It is 307 miles by road from Mombasa, the Colony's port. Mombasa possesses what is perhaps the finest harbour on the East Coast of Africa and is well served by shipping lines from Europe and Asia besides a frequent coastal service. Other centres are Eldoret, Kisumu, Lamu, Nakuru and Nyeri.

Nairobi: transit from London about 16 days by sea; by air, 1 day.

LEEWARD ISLANDS

(See WEST INDIES)

THE MALDIVIVE ISLANDS

The Maldive Islands are a chain of coral atolls, some 400 miles to the South West of Ceylon, stretching from just south of the equator for about 600 miles to the north. There are 12 clearly defined atolls, separated from each other by deep channels, through which the currents run strongly. The total number of islands is over 7,000, some being very small indeed; about 200 of them are inhabited. The islands are thickly covered with coconut palms, and coir and copra are exported. The principal industry is fishing, and considerable quantities of dried fish are exported to Ceylon, where it is in great demand. The population of the islands is about 90,000. The people are

Moslems, and the Maldivian language is akin to Elu or old Sinhalese. They are highly civilized and are great navigators and traders.

The Maldive Islands is a Sultanate, which is elective. The present Sultan, His Highness Al Amir Sir Mohamed Farid Didi, K.C.M.G., was installed on March 7, 1954. There is a Parliament (the Majlis) with representatives elected from all the atolls. The life of the Majlis is 5 years. The Government consists of the Prime Minister (Ibrahim Nasir) and the Cabinet, who are responsible to the Majlis.

The Islands are a Protected State, and their international relations are conducted by, or in accordance with the advice of, the British Government.

With the agreement of the Maldivian Government, an R.A.F. Staging Post has been constructed on Gan Island, in Addu Atoll, the most southerly atoll, lying just south of the equator.

The capital of the Islands is Malé (population about 10,000). Communications are by steam or sailing ship, and a small air-strip has been constructed on Hulule Island, about 1 mile from Malé.

British Representative, H. A. Arthington-Davy, M.B.E. (1960).

MALTA, G.C.

an island in the Mediterranean Sea, 60 miles from Sicily and about 180 from the African coast. about 17 miles in length and 9 in breadth, and having an area of 94.9 square miles. The colony includes also the adjoining island of Gozo (area 25.9 sq. miles); Comino and several islets. The estimated population in June, 1961 was 328,854.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in A.D. 58. In 870 it was taken by the Arabs, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Normandy. It passed successively under the rule of the Angevins and Aragonese, and followed the fortunes of their kingdoms. In 1530 it was handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grandmaster La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then, at their own wish, admitted into the British Empire, the act being confirmed by the Treaty of Paris in 1814.

Malta was again closely besieged in the last war and again withstood the attacks of all its enemies. From June, 1940, to the end of the war, 432 members of the garrison and 1,540 civilians were killed by enemy aircraft, and about 35,000 houses were destroyed or damaged.

The Parliament of the United Kingdom made a free grant of £10,000,000 for restoring war damage, and a further grant of £20,000,000 was subsequently made for the same purpose and for general construction and replanning.

The climate, although not tropical, is hot in summer. The islands are intensively cultivated. The chief export crops are potatoes and onions. Wheat, barley, clover and tomatoes are extensively grown on dry lands, while on irrigated land all the usual temperate climate and sub-tropical vegetables are grown. Tomatoes are grown on irrigated and

non-irrigated land. Agriculture and fishing are among the principal occupations of the inhabitants.

Mdina (Notabile), the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Old Seminary; its population has now dwindled to 836, but its suburb, Rabat, has 13,501 inhabitants. Notable has been entirely eclipsed in importance by the modern capital, Ψ Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet and N.A.T.O. Mediterranean Command.

Malta possesses a University (299 full-time students in 1962); 6 grammar schools (3,543 pupils); 114 primary schools (52,345 pupils); 5 technical schools (1,081 students); 3 secondary technical schools (1,659 pupils) and 89 private schools (18,797 pupils). Adult education classes, instituted in 1946, had an attendance of 845 in 1961. English and Maltese are the only languages taught in the Government primary schools. In religion the Maltese are Roman Catholics. The Maltese language is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phœnician tongues. There is a Maltese order of nobility, recognized by the Crown, consisting of 28 families.

English and Maltese are the official languages of administration and Maltese is the official language in all the Courts of Law and the language of general use in the Islands. The Court may order the use of the English language in any proceedings before it where any party or any accused person does not speak Maltese as the principal language to which he is accustomed; but when all parties or accused persons are English-speaking, the use of English is obligatory. Where the proceedings are in a language not known to the party or parties or to the accused they are translated. In 1934, Maltese was substituted for Italian as the principal language of the Courts of Law.

FINANCE

	1960-61	1961-62
Public revenue.	£11,952,814	£13,124,950
Ordinary expenditure.	12,360,615	12,923,725
Capital expenditure.	4,337,345	3,672,205

Only notes issued by the Commissioners of Currency are now legal tender. In addition, British coins, including silver, cupro-nickel and bronze coins, are legal tender.

TRADE WITH U.K.

	1960	1961
Imports from U.K.	£10,983,673	£11,667,578
Exports to U.K.	981,034	1,377,884

The principal imports for home consumption are foodstuffs—mainly wheat, meat and hullocks, milk and fruit—fodder, heverages and tobacco, fuels, chemicals, textiles and machinery (industrial, agricultural and transport). The chief domestic exports are scrap-metal, hides and skins, potatoes and onions, smoking requisites, gloves, bosiere, buttons, beer, mineral waters, canned fruits, edible oil, talow, fresh flowers and flower-cuttings.

CAPITAL, Ψ Valletta. Population (1961) 18,287.

MALTA'S NATIONAL DAY is September 8, commemorating the raising of the sieges of 1565 and 1940-43.

GOVERNMENT

After the war Malta was granted a measure of self-Government (subject to the reservation of certain powers to the Governor) under a Constitution introduced by Letters Patent dated September 5, 1947. On April 30, 1958, a state of emergency was declared and the direct administration of the Island was assumed by the Governor. On April 15, 1959, the state of emergency was brought to an end, and the 1947 Constitution was revoked and replaced by an interim Constitution established by the Malta (Constitution) Order in Council, 1959, and the Malta Royal Instructions, 1959.

Under this Constitution all legislative and administrative powers were vested in the Governor, acting, except in certain specified cases, in consultation with the Executive Council. The Executive Council was composed of 3 *ex officio* members (Chief Secretary, Legal Secretary, Financial Secretary), 3 other nominated official members, and 4 nominated unofficial members.

Following the report of a Constitutional Commission under the chairmanship of Sir Hilary Blood, a new Constitution for Malta was introduced by the Malta (Constitution) Order in Council, 1961, under which the Island is now known as "the State of Malta". The Constitution provides *inter alia* for the protection of fundamental rights and freedoms of the individual; the United Kingdom Government still retains responsibility for defence and external affairs; the Governor and Commander-in-Chief is required to consult with the Cabinet composed of a Prime Minister and 7 Maltese Ministers, in exercising all his powers, with certain exceptions; a United Kingdom Commissioner is appointed to represent the Government of the United Kingdom in Malta. There is also provision for the appointment of a Consultative Council composed of the Governor as Chairman, the Prime Minister, the United Kingdom Commissioner, not more than 3 members appointed by a Secretary of State and not more than 3 members appointed by the Prime Minister, providing for consultation on policy relating to defence and external affairs, and on any matters affecting the relations between the United Kingdom Government and the Government of Malta as may be referred to it by either Government.

Elections for the 50 seats in the Legislative Assembly, as opposed to 40 seats under the 1947 Constitution, were held in February 1962, and resulted as follows: Nationalist Party, 25 seats; Malta Labour Party, 16; Christian Workers Party, 4; Democratic Nationalist Party, 4; Progressive Constitutional Party, 1.

Governor and Commander-in-Chief, His Excellency Sir Maurice Dorman, G.C.M.G., G.C.V.O. (1962). £7,000

MAURITIUS

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17'–57° 46' E. long. and S. lat. 19° 58'–20° 33', and comprising with its dependencies an area of 805 square miles. The resident population at the census of 1952 was 501,415, made up of Indians, Europeans (mainly French), and persons of mixed descent. The total population, including dependencies, was estimated (Dec. 31, 1961) at 687,450.

Mauritius was discovered in 1511 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1638 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Isle de France, but did not settle it until 1721. Under the French it became a great centre of trade. In 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. A British garrison remained on the island until its withdrawal in June 1960. There is a Naval Volunteer Force, and a special internal security force was set up in 1960. The French language and French law have been preserved under British rule though the ancient name, Mauritius, was restored. There are 4 bi-lingual French-English daily papers and 5 Chinese daily papers.

Of the total cultivable area of about 226,000 acres, 210,000 are under sugar, about 600 under aloe (regular plantations), 300 under maize, 4,400 under tea, 900 under tobacco and the rest under other foodcrops and mixed farming. The sugar crop of 1961 was about 553,000 metric tons.

Situated just within the tropics but being a small land mass in a large ocean area, Mauritius has a climate more subtropical than tropical except at low altitudes. In summer, conditions are sometimes trying because of high humidities and light winds rather than because of the relatively high temperatures. The island lies in that region of the South Indian Ocean where tropical cyclones are most frequent. At times, as in 1892, 1931, 1945, 1960 and 1962 they are very severe and do much damage to crops and buildings.

Railways and Shipping.—There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes entirely through Port Louis. The shipping entered in 1961 amounted to 1,580,587 tons, and the shipping cleared to 1,579,572 tons. In 1961 there were 77½ miles of railway (4 ft. 8½ in. gauge), 76 post-offices and postal agencies, 48 telegraph offices and 15 telephone-exchange offices in the island, with 210 miles of telegraph, including block telegraph of the railway and 11,140 miles of underground and overhead (Government) telephone wires and 8,989 telephone installations.

Civil Aviation.—Air services are operated by: (1) B.O.A.C. to Nairobi, Khartoum, Rome and London; (2) Air France to Réunion, Madagascar, Dar-es-Salaam, Nairobi, Athens, Nice and Paris; (3) South African Airways to Johannesburg, Cocos Islands and Perth (West Australia); (4) QANTAS to Johannesburg, Cocos Islands, Perth and SYDNEY.

Education.—The inhabitants of European descent are mostly Roman Catholic. Educational facilities are available up to University entrance level. Primary education is provided in 295 schools, of which 120 are Government and 76 aided. Secondary education is given in 3 Government and 81 private schools. There are also 2 central schools, a technical institute and a teacher training college. Current expenditure on education in 1960-61 totalled Rs.19,658,525.

FINANCE

	1960-61	1961-62*
Public revenue . . .	Rs.146,725,843	Rs.158,603,800
Public expenditure . . .	153,350,479	157,759,560
	*Estimated.	

The Public Debt, at June 30, 1961, was Rs.135,609,390.

Currency—Rs. = Rupee = 1s. 6d.

TRADE

	1960	1961
Total imports	Rs.331,867,947	Rs.322,962,507
Total exports	177,777,655	291,490,818
Imports from U.K. . . .	£7,319,929	£6,576,600
Exports to U.K. . . .	11,582,993	10,850,175

The necessities of life have all to be imported from abroad. 83 per cent. of the island's trade was with Great Britain and other Commonwealth countries in 1961.

GOVERNMENT

The Government is vested in a Governor with an Executive and Legislative Council. The Mauritius (Constitution) Order in Council, 1958, provides for a Legislative Council consisting of the Speaker three *ex officio* members (the Chief Secretary, the Attorney-General and the Financial Secretary), forty elected members and 12 nominated non-official members.

The Colony is divided into 40 single member Constituencies and every person (male or female) has the right to vote who—(a) is a British subject of the age of 21 years or upwards; and (b) has resided in the Colony for a period of at least 6 months immediately before the date of registration or is domiciled in the Colony and is residing therein at that date; and (c) has resided in the constituency in which he claims to be registered as a voter for a period of at least 6 months immediately before the date of registration.

The Executive Council consists of the 3 *ex officio* members above mentioned and 10 members appointed by the Governor from elected or nominated members of the Legislative Council. The *ex officio* members and the appointed members are styled Ministers.

Governor and Commander-in-Chief, His Excellency Sir John Shaw Rennie, K.C.M.G., O.B.E. (1962)	Rs.80,000
Chief Minister and Minister of Finance, Dr. Hon. S. Ramgoolam	36,000

CAPITAL, ΨPort Louis. Population (1961), 92,400; other centres are Curepipe (38,300), Beau Bassin and Rose Hill (37,300), Vacoas and Phoenix (37,000), Quatre Bornes (23,150) and ΨMahebourg (12,250).	
British Council Representative, G. de G. Sells, D.S.O., D.F.C.	

DEPENDENCIES OF MAURITIUS

Rodrigues, 350 miles east-north-east of Mauritius, area, 40 square miles. Population (1961) 18,300. Cattle, beans, salt fish, sheep and goats are the principal exports. The island is under the administration of a Magistrate and Civil Commissioner from Mauritius, who takes his orders from the Governor of Mauritius. Magistrate, P. Lefebure.

Trade with Mauritius

	1960	1961
Total imports.....	Rs. 4,088,819	Rs. 3,508,587
Total exports.....	1,555,535	1,400,081

Other Dependencies.—Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coconut oil. The most important are the Oil Islands Group, the largest of which, Ψ*Diego Garcia* (pop. 1961, 600), lies on the direct route from the Red Sea to Australia, and possesses a good harbour; other islands are Six Islands, Peros Banhos, Agalega, St. Brandon, Solomon, and Trols Frères. The total area of the "Other Dependencies" is about 47½ square miles, with a population (1961) of 1,910.

Trade with Mauritius

	1960	1961
Imports.....	Rs. 723,955	Rs. 720,782
Exports.....	1,280,106	1,495,993

THE NEW HEBRIDES

The *New Hebrides Group*, in the South Pacific Ocean, situated between the 13th and 21st degrees of South latitude and the 166th and 170th degrees of East longitude, of an area of roughly 5,700 square miles, is administered by a British-French Condominium Government.

The principal islands are Espiritu Santo, Malekula, Epi, Ambrym, Efate or Sandwich, Erromanga, Tanna, Aneityum, Aoba, Maewo and Pentecost, The British Resident Commissioner, exercising

powers delegated to him by the High Commissioner for the Western Pacific, and the French Resident Commissioner, representing the High Commissioner for France in the Pacific Ocean, are the joint heads of the Administration. They each have small staffs of national officers who assist them in general administrative work and the running of social services (health and education) financed from national funds, part of which come from the Metropolitan Governments. In addition they jointly control the "mixed" public services (posts and telegraphs, public works, mines, meteorology, etc.) which are financed from funds raised in the Territory. The population (1960) was 60,374, of which 55,428 is the estimated number of native inhabitants. Principal products are copra, coffee, cocoa, kauri timber and sandalwood. Imports for 1960 totalled £2,384,205, of which £1,003,261 was the value of imports from Australia. Exports in 1960 were valued at £1,715,504, £1,109,938 being the value of exports to France. Joint revenue, 1960, £547,883; expenditure on joint services, £592,344.

Attached to the New Hebrides are the Banks (309 sq. miles, pop. 2,475) and Torres (40 sq. miles, pop. 164) Islands.

Seat of New Hebrides Administration—Ψ Vila, Efate, pop. about 1,900.

French High Commissioner, L. Pêchoux.

British Resident Commissioner (vacant).

French Resident Commissioner, M. Delauney.

PACIFIC ISLANDS

(Western Pacific High Commission)

High Commissioner, His Excellency Sir David Clive Crosbie Trench, K.C.M.G., M.C. (1961)..... (+ <i>allice</i> , £A1,315)	£A4,375
Chief Justice, G. G. Briggs.....	3,645
Chief Secretary, M. D. I. Gass, C.M.G.....	3,645
Financial Sec., A. M. Wilkie, C.M.G.....	3,295
Secretary for Protectorate Affairs, R. Davies, O.B.E.....	3,095
Senior Assistant Secs., T. Russell; L. M. Davies, O.B.E.....	2,730

The principal groups under the High Commissioner in, over, and for the Western Pacific Islands are (1) The Gilbert and Ellice Islands Colony; (2) The British Solomon Islands Protectorate; (3) The New Hebrides; (4) The Central and Southern Line Islands. The headquarters of the High Commissioner are at Honiara in the British Solomon Islands Protectorate.

The *Gilbert and Ellice Islands Colony*, which includes Ocean, Christmas, Fanning and Washington Islands, besides the Gilbert, Ellice and Phoenix Groups, was formerly a Protectorate, and was formally annexed to the Empire in November, 1915. The total land area of the Colony is about 360 sq. miles with a population (Census, 1947) of 36,000 (304 Europeans, 142 Chinese, 29,923 Micronesians and 5,066 Polynesians), estimated at 47,508 at the end of 1961. Expressed in Australian currency, the estimated revenue of the Colony in 1962 was £753,435; expenditure £752,567.

The Government maintains one boys' and one girls' boarding school and 27 primary schools. Village school primary education is mainly run by missionary societies, with financial assistance from the Government, and at the end of 1961 these schools were attended by 8,831 pupils. Missions have in recent years entered the field of secondary education, and supported 5 secondary schools at the end of 1961.

The *Gilbert Group*, situated between 4° N. and

3° S. latitude and 172° and 177° E. longitude, consists of 16 islands, Makin, Butaritari, Marakel, Abaiang, Tarawa (Headquarters of the Colony), Maiana, Abemama, Kuria, Aranuka, Nonouti, Tabiteuea, Beru, Nikunau, Onotoa, Tamana and Arorae. The area of the group is 114 sq. miles and the population (estimated 1961) 35,493. The *Ellice Group* of 9 islands (Nanumea, Nanumanga, Niutao, Nui, Vaitupu, Nukufetau, Funafuti, Nukulaele and Niulakita) lies between lat. 5° 30' and 11° SE. and long. 176° E. and 180° E. The area of the group is 9½ sq. miles and the population (estimated 1961) 5,114. *Ocean Island* (or Banaba), in lat. 0° 52' S. and long. 169° 35' E. was proclaimed British in 1900. The *Line Islands* between lat. 4° 40' and 2° N. and long. 160° 20' and 157° W. include Fanning, Washington and Christmas Islands. *Fanning* and *Washington Islands* were included in the Colony in 1916, *Christmas Island* in 1919. Christmas Island is the largest atoll in the Pacific. The boundaries of the Colony were extended (March 18, 1937) to include the *Phoenix Islands* (Birnie, Canton, Enderbury, Gardner, Hull, McKean, Phoenix and Sydney Islands), between 3° and 5° S. and 170° and 175° W. Enderbury and Canton Islands are for common use of Gt. Britain and U.S.A. for aviation and communications, under an agreement made on April 6, 1939. Canton Island is an international airport on the Trans-Pacific route between Fiji and Honolulu, although, with the development of long-range jet aircraft, it has lost much of its former importance.

In each island of the Gilbert and Ellice Groups (except Niulakita) and in two islands in the Phoenix Group there is a native Government under an appointed native magistrate whose court administers a code of native laws. The Colony is administered by the High Commissioner through a Resident Commissioner.

Resident Commissioner, Gilbert and Ellice Islands, Valdemar Jens Andersen, O.B.E., (1962)..... (+ allice, £175) £A3,645

The *British Solomon Islands Protectorate*, established in 1893, now includes all the islands in the Solomons Archipelago S. and S.E. of the large island of Bougainville. The main islands in the Protectorate are Choiseul, Santa Isabel, Shortland Group, Vella Lavella, Kolombangara, Ganongga, Glzo, the New Georgia Group, the Florida Group, Guadalcanal, the Russell Islands, Malaita and San Cristobal, and the outlying islands of Bellona, Rennell, Santa Cruz, Vanikoro, Tikopia, Swallow (or Reef Islands) and Duff Groups, the Stewart Islands and the Ontong Java Atoll. The Protectorate is situated between 5°-13° S. lat. and 155°-170° 20' E. long. It has a total land area of about 11,500 sq. miles. The latest census (1959) gave the population as 781 Europeans, 366 Chinese, 117,620 Melanesians, 4,625 Polynesians, 459 Micronesians and 225 others; total 124,076. Estimated revenue (1962) £A1,905,000 (including Colonial Development and Welfare Funds (£A337,000) and Grant-in-Aid from the United Kingdom (£A512,000)); estimated expenditure (1962) £A1,905,000; Imports (1961) £A2,045,663; domestic exports £A1,866,484. The main imports are foodstuffs, consumer goods and building materials. Principal exports are copra, timber and trochus shell. A small export of cocoa has recently begun. On October 18, 1960, the British Solomon Islands (Constitution) Order in Council, 1960, came into operation. An Executive Council and a Legislative Council were established for the Protectorate, replacing the former Advisory Council. The Legislative Council has an official majority with 11 ex officio and official members and 10 unofficials, all of whom are appointed by the High Commissioner.

The High Commissioner presides over both Councils.

The High Commissioner's Court for the Western Pacific was reconstituted by the Western Pacific (Courts) Order in Council 1961, which came into operation in April 1962, as the High Court of the Western Pacific with the powers and jurisdiction of a Superior Court of Record exercised by the Chief Justice and puisne judges.

SOUTH PACIFIC COMMISSION

The South Pacific Commission, an advisory and consultative body set up by the six Governments responsible for the administration of island territories in the South Pacific region, recommends to the member Governments means for promoting the well-being of the peoples of these territories. It is concerned with social, economic and health matters. *Headquarters, Nouméa, New Caledonia.*

The Commission was established by an Agreement between the Governments of Australia, France, the Netherlands, New Zealand, the United Kingdom and the United States of America, signed at Canberra in 1947 and ratified on July 29, 1948. Until November 7, 1951, the area of the Commission's activities comprised territories lying generally south of the Equator from and including Netherlands New Guinea in the west to the French Establishments in Oceania and Pitcairn in the east. On November 7, 1951, an additional Agreement was signed extending the scope of the Commission to include Guam and the Trust Territory of the Pacific Islands under United States administration. The Commission consists of twelve Commissioners, two from each Government, and normally holds one session each year. The first Session was held in May, 1948.

There are two auxiliary bodies, the Research Council and the South Pacific Conference. There is a Research Council meeting yearly, which may be either a meeting of the full Council, or of one or other of its three main sections, specializing in health, economic development and social development. Members of the Council are appointed by the Commission and are selected for their special knowledge of the questions with which the Commission is concerned, and the problems of the Territories in these fields. The chief function of the Research Council is to advise the Commission what investigations are necessary. Arrangements to carry out those which are approved are the responsibility of the Secretary-General and other principal officers. The South Pacific Conference, which meets at intervals not exceeding three years, consists of delegates from the territories who may be accompanied by advisers. The first Conference was held in Fiji in April, 1950, the second in New Caledonia in April, 1953, the third in Fiji in April-May, 1956, and the fourth in New Britain in April-May, 1959. The fifth South Pacific Conference was held in American Samoa in July, 1962.

Secretary-General, T. R. Smith.
Executive Officers, Dr. J. Barrau (Economic Development); Dr. R. Seddon (Social Development); Dr. G. Lolson (Health).

FEDERATION OF RHODESIA AND NYASALAND

AREA AND POPULATION

The Federation of Rhodesia and Nyasaland covers an area of 486,109 square miles (S. Rhodesia, 150,333; N. Rhodesia 290,410; and Nyasaland 45,366 square miles), including approximately 9,380 square miles of water.

Population.—The estimated total population of

the Federation (December, 1961) is 8,630,000 of all races (S. Rhodesia 3,200,000; N. Rhodesia 2,510,000; Nyasaland 2,920,000).

PHYSIOGRAPHY

Boundaries.—The Federation extends from latitude 22° 30' South to latitude 8° 15' South. On the South it is bordered by the Republic of South Africa, on the West by the Bechuanaland Protectorate, and Portuguese West Africa, on the North-West and North by the Congolese Republic, on the North by Tanganyika and on the East by Portuguese East Africa.

Relief.—Most of Rhodesia is at an altitude of between 3,000 and 5,000 feet above sea level, the highest land lying on the eastern border of Southern Rhodesia where some mountains rise above 8,000 feet above sea level (Mt. Inyangani 8,541 feet). In the large river valleys, the Zambezi, Sabi, Kafue and Luangwa, the level of the land falls below 2,000 feet.

In Nyasaland, the level of the littoral of Lake Nyasa and of parts of the Shire River Valley is 1,500 feet above sea level. Elsewhere the altitude varies between 2,000 and 8,000 feet with the crest of the Mlanje Mountain massif rising to 10,000 feet above sea level. Lake Nyasa itself, the greatest depth of which is about 2,500 feet, is a southward extension of the Great Rift Valley.

Rivers.—Portions of the Zambezi River, Lake Nyasa, Lake Bangweulu, the Luapula River and the Chambeshi River are navigable and are extensively used by waterborne transport. The Federation has, however, no great natural waterways, either to provide access to the sea or to connect major industrial centres, but there are a number of large rivers which could be brought into the service of agriculture for irrigation and of power supplies for hydro-electric schemes. The recently completed Kariba Dam, on the Zambezi, is 175 miles long and 2,000 sq. miles in area, provides hydro-electric power from the Copper Belt to Bulawayo. The principal rivers, in addition to the Zambezi, are—in Southern Rhodesia: the Sabi River and its tributaries (irrigation and power potentialities); the Hunyani River (already dammed at several points); and the Umfuli River (irrigation potentialities). In Northern Rhodesia: the Kafue River (power potentialities); the Mulungushi and Lunsemfwa Rivers (already supplying hydro-electric power to Broken Hill mine and town); and the Zambezi River at the Victoria Falls (supplying hydro-electric power to Livingstone). In Nyasaland: the Shire River (power and irrigation potentialities).

Climate.—Though the entire Federal area lies within the tropics most of it is at an altitude which gives climatic conditions favouring permanent European settlement. The main rainfall throughout the area is concentrated into a season extending from about November to March. Average rainfall (except for certain somewhat arid low-lying regions on the one hand and some high altitude areas of very heavy rainfall on the other) is 25 to 30 inches a year.

GOVERNMENT

The Federation of Rhodesia and Nyasaland came into being on September 4, 1953, when the first Governor-General assumed office. The Order-in-Council authorizing the setting up of the Federation was approved by Her Majesty the Queen on August 1, 1953. An interim Ministry was sworn in on September 7. The first elections to the Federal Assembly took place on December 15,

1953. In the first months of the Federation only the minimum administrative machine was created and the Federal Government assumed its functions from the territories by degrees. By July 1, 1954, the Federal Ministries had taken over most of their duties.

GOVERNOR-GENERAL AND STAFF

Governor-General, His Excellency the Earl of Dalhousie, G.B.E., M.C.; born Oct. 17, 1914; assumed office, October, 1957

(+£3,500 *allice*) £5,000

Official Secretary and Comptroller, Commander J. P.

P. Michell, M.V.O., O.B.E., R.N. (ret.).

Aides-de-Camp, Capt. J. H. G. Senior; Capt. E. M. Sobey.

THE FEDERAL MINISTRY

(November, 1956)

Prime Minister and Minister of External Affairs,

Rt. Hon. Sir Roy Welensky, K.C.M.G.

(+£1,000 *tax free allice*) £4,000

Minister of Law and of Home Affairs, Hon.

Air Adviser, Group Capt. H. G. Slade, A.F.C.

Economic Adviser, G. W. Brazendale, C.M.G.

LEGISLATURE

The Federal Assembly consists of 59 members and is composed as follows: forty-four elected members (Southern Rhodesia, 24; Northern Rhodesia, 14; Nyasaland, 6); eight African elected members (Southern Rhodesia, 4; Northern Rhodesia, 2; Nyasaland, 2); 4 specially elected African members (Northern Rhodesia, 2; Nyasaland, 2); and three European members charged with special responsibility for African interests, of whom one is elected in Southern Rhodesia and the other two appointed, one each by the Governors of Northern Rhodesia and Nyasaland.

The main matters on which the Federal Legislature has power to make laws are external affairs, defence, immigration, financial and economic affairs, inter-territorial roads, railways, European agriculture in the Rhodesias, posts and telegraphs, education except African primary and secondary education and Federal courts. In addition, there are a number of matters on which both the Federal and Territorial Legislatures have powers to make laws. They include the development of industries, electricity, scientific and industrial research, health, town planning, archives, census and statistics.

AFRICAN AFFAIRS BOARD

A Standing Committee of the Federal Assembly, known as the African Affairs Board, consists of the three European members representing African interests and one of the elected African members from each territory. The Board makes representations to the Federal Government on matters within the authority of the Federation in the interests of Africans; to assist a Territorial Government, at its request, in the study of matters affecting Africans, and to draw attention to any Federal legislation of a differentiating character and to ask that it should be reserved for the consideration of Her Majesty's pleasure.

Speaker of the Federal Assembly, Hon. T. I. F. Wilson, C.M.G.

Clerk of the House, E. Grant-Dalton.

FEDERAL SUPREME COURT

The Court, constituted under the Federal Constitution of 1953, came into being on July 1, 1955.

Chief Justice of the Federation, Hon. Sir John Clayton.

Federal Justice, Hon. Sir Vincent Quénet.

The Chief Justices of Southern Rhodesia, Northern Rhodesia and Nyasaland are *ex officio* members of the Court.

DEFENCE

The Army of Rhodesia and Nyasaland, with headquarters in Salisbury is comprised of regular and territorial forces. The regular forces include a battalion of the Rhodesia Light Infantry, a

battalion of The Rhodesian African Rifles, a battalion of the Northern Rhodesia Regiment and two battalions of the King's African Rifles, units of the Rhodesia and Nyasaland Corps of Engineers, the Rhodesia and Nyasaland Corps of Signals, the Rhodesia and Nyasaland Army Service Corps, the Rhodesia and Nyasaland Medical Corps and the Rhodesia and Nyasaland Army Pay Corps. The Territorial Force comprises three active force battalions and four reserve battalions of the Royal Rhodesia Regiment, with headquarters at Salisbury, Bulawayo and Kitwe. There are also three major training establishments. The Federation has its own regular air force, the Royal Rhodesian Air Force, which is equipped with Canberra and Vampire jet aircraft, as well as trainers, transport aircraft and helicopters.

EDUCATION

The Federal Government is responsible for all education other than that of Africans, that is for European, Asian and Coloured children. In July, 1960, the numbers of such children at school were as follows: Southern Rhodesia, 48,493 (178 schools); Northern Rhodesia, 17,381 (70 schools); Nyasaland, 4,700 (35 schools). In addition to the Government Schools, there are 60 State-aided private schools, attended by a further 11,642 children.

FINANCE

The ninth Federal Budget was presented on June 28, 1962. Loan vote estimates for 1962-63 totalled £7,936,337.

Revenue vote expenditure in 1962-63 is estimated at £70,936,579 against a total estimated revenue of £68,703,000.

	1961-62	1962-63 *
Revenue.....	£66,606,000	£68,703,000
Expenditure from revenue funds...	£70,488,213	£70,936,579
Expenditure from loan funds.....	£9,669,294	£7,519,337

*Estimated.

The public debt amounted to £324,000,000 at June 30, 1962.

Currency.—Federal currency is linked to British sterling and currency backing is held in London in balances, in British Treasury Bills and in Government securities issued in the United Kingdom. The Bank of Rhodesia and Nyasaland, which was established by an Act of the Federal Assembly in 1960, is responsible for the issue of the currency.

PRODUCTION, TRADE AND INDUSTRY

Agriculture.—European agriculture in Southern and Northern Rhodesia is the administrative responsibility of the Federal Government, the remainder of the agricultural industry of the Federal area being in the charge of the various Territorial Governments. Production of principal crops in 1961 was:

	Southern Rhodesia '000 lb.	Northern Rhodesia '000 lb.	Nyasaland '000 lb.	Total '000 lb.
Tobacco †	219,643	15,866	25,735	262,344
Cotton ...	2,529	47	25,926	28,502
Tea	2,379	—	31,518	33,897
Wattle Extract.	24,962	—	—	24,962

† All types except Turkish. Production of flue-cured tobacco, mainly in Southern Rhodesia,

totalled 236,778,000 lb. and of all fire-cured tobacco, mainly in Nyasaland, 15,628,000 lb.

NUMBERS OF LIVESTOCK, 1961

	Southern Rhodesia	Northern Rhodesia	Nyasaland	Total
Cattle ..	3,487,000	1,283,000	374,000	5,144,000
Sheep ..	362,000	38,000	82,000	482,000
Goats ...	451,000	148,000	529,000	1,128,000
Pigs	112,000	75,000	101,000	288,000

MINERAL PRODUCTION, 1961

	Quantity	Value
Copper	625,000 tons	£17,354,000
Gold	570,000 oz.	7,164,000
Asbestos	162,000 tons	8,747,000
Chrome	590,000 tons	3,364,000
Zinc	33,000 tons	2,205,000
Lead	17,000 tons	1,010,000
Cobalt	—	1,985,000
Manganese	59,000 tons	466,000

Manufactures.—Since 1955-56, the census of industrial production has been held on a federal basis, giving a gross output of £157,000,000 and a net output of £66,000,000 for the year 1960. Tobacco, textiles and garments, foodstuffs and metal products remain the most important groups, drawing largely for their materials on local sources.

EXTERNAL TRADE

In 1961, the eighth year for which statistics of external trade were available for the Federation as a single trading entity, total external trade was valued at £361,786,000.

With exports valued at £206,780,000 and imports at £155,006,000, there was a favourable balance of trade of £58,865,000 (including net gold sales of £7,091,000).

About 67 per cent. of the exports consisted of minerals—copper, gold, asbestos, lead, zinc, chrome being the most important. About 21 per cent. of all exports consisted of tobacco.

The remaining 12 per cent. was made up of a wide range of products, including manufactured articles of which textiles are the most important.

About 24 per cent. of imports in 1961 were metals and machinery, a high proportion being mining, electrical and agricultural machinery, railway materials and other durable producers' goods required for the growth of industry, agriculture and basic services such as communications and the provision of electric power.

The most important market for the Federation's products was the United Kingdom. Exports to the United Kingdom in 1961 were made up mainly of copper (£52,000,000), tobacco (£27,000,000), asbestos and tea. The most important supplier of the Federation's requirements in 1961 was the United Kingdom.

Total	1960	1961
Imports from U.K....	£47,977,097	£47,259,855
Exports to U.K.....	103,046,637	101,833,298

COMMUNICATIONS

Railways.—The two Rhodesias are served by the Rhodesia Railways which connect with the South African Railways at Mafeking. The main line forks at Bulawayo; the northern section runs *via* the Victoria Falls through Northern Rhodesia to the Copperbelt and on to the Congo Border where it connects with the Katanga system. The eastern section runs along the watershed of Southern Rhodesia to serve the main centres and ends at Umtali where it joins the Portuguese system to provide access to Beira. With branch lines, the

total mileage of the Rhodesia Railways is over 2,600 miles, including the line linking the Midlands of Southern Rhodesia with the port of Lourenço Marques in Portuguese East Africa, which was completed in 1955.

Nyasaland is served by a Railway system (the Trans-Zambezia Railway, the Central Africa Railway and the Nyasaland Railways) which connects Beira with Nyasaland. The total length of the system is nearly 500 miles.

Roads.—Main roads, which are in process of modernization, connect all the main centres of the Federation with one another and with adjacent territories, and secondary roads serve rural areas. The total route mileage of roads is about 62,000 miles (36,000 miles in Southern Rhodesia, 20,000 miles in Northern Rhodesia and nearly 6,000 miles in Nyasaland) of which some 11,600 miles are designated as main or principal roads (5,000 miles in Southern Rhodesia, 3,700 miles in Northern Rhodesia and 2,900 miles in Nyasaland, excluding roads within municipal areas). Major bridges, many of which were the gift of the Beit Trustees, span the larger rivers on main roads, the Beit Bridge over the Limpopo, the Ottobert Bridge at Chirundu over the Zambezi and the Birchenough Bridge over the Sabi River being noteworthy.

Air Services.—Civil aviation has made rapid progress in the Federal area since the war. The existing airline was reconstituted in partnership between the three territories as the Central African Airways Corporation, Flying Viscount, Dakota and Beaver aircraft, Central African Airways provide daily services between the major towns of the Federation as well as services to Nairobi, Johannesburg, Lourenço Marques, Durban, Ellsabethville and Beira. Beaver aircraft provide services between many of the smaller centres in Northern Rhodesia and Nyasaland. Links to overseas countries are provided by a number of the major world airlines which operate through the international airport at Salisbury. The travelling time between the Federation and London is 17 hours by B.O.A.C. Comet and 15½ hours by S.A.A. Boeing 707's.

CAPITAL

SALISBURY, the Federal capital, is also the principal city of Southern Rhodesia. It is built round the site where the Pioneer Column ended its march into Mashonaland in 1890. Situated in the north-east of Southern Rhodesia, it is on the main railway line which traverses the more closely settled areas of the Colony. Branch railway lines run north-east and north-west. It is the centre of the tobacco industry—the tobacco auction sales at Sallsbury are the largest in the world—and an industrial centre of considerable importance. Estimated population, including townships on the periphery of Sallsbury; Europeans, 89,000; Africans, 205,000; Aslans and Coloured, 5,900. Total: 299,900.

FLAG

Shield bearing emblems of the colonies, with dovetailing to show their unification, gold sun rising on blue sky, lion red on white, 13 black and white wavy bars—all on a Blue Ensign.

SOUTHERN RHODESIA

Southern Rhodesia, comprising Matabeleland, Mashonaland and Manicaland, is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, its political neighbours being Northern Rhodesia and Portuguese East Africa on the N.; the Transvaal and Bechuanaland on the S. and W.; and Portuguese East Africa on the E. The total area is 150,333 square miles. The estimated population, at Dec. 31, 1961, numbered

221,000 Europeans, 17,800 Asiatics and Coloureds and 2,960,000 Africans, giving a combined total of approximately 3,298,000. In 1961 the birth-rate was 24 per thousand and the death-rate 6.

The majority of the natives of Southern Rhodesia (members of the so-called Bantu race), are known as Mashona. In the Western portion of the Colony are the descendants of the Amandebele who conquered and settled down among the Mashona, and from whom the Province of Matabeleland derives its name.

Southern Rhodesia was administered by the British South Africa Company from the date of occupation (1890) to 1923, when responsible government was granted. On this latter date the Company relinquished all rights and interests in the land of Southern Rhodesia except in those estates which it was already developing on July 10, 1923. A Land and Agricultural Bank grants loans for farm development and acquisition of residential property on easy terms of repayment. Of the Colony's 97,184,000 acres, 21,020,000 have been allocated for Native Reserves, 8,052,000 for Native Purchase Areas and 12,878,000 for Special Native Areas.

FINANCE

	1960-61	1961-62
Revenue.....	£20,911,000	£24,210,000
Expenditure from revenue funds.....	23,274,000	24,621,000
Expenditure from loan funds.....	8,306,000	4,044,000

(A large proportion of the Public Debt has been taken over by the Federal Government.)

EDUCATION

Native education comes under the Minister for Native Education in the Southern Rhodesian Government. Expenditure in 1960-61 was £4,800,000. There are 3,326 schools enrolling 593,000 pupils with 15,000 teachers. Both Mission and Government training centres provide for lower and higher primary teachers' courses. Secondary schools provide a standard of education up to Cambridge School Certificate, while post primary schools include such subjects as building, carpentry, agriculture and home craft. In addition four special schools cater for the blind, the deaf and dumb. Eighty-five per cent. of pupils of school-going age are now to attend school.

GOVERNMENT

The Colony obtained self-government in 1923 and has a Parliament of 30 members and a Cabinet of 6 members. The Queen is represented by a Governor who presides over the Executive Council. The Southern Rhodesian Government is responsible for native affairs, bridges, irrigation, roads, power, local government, labour, housing and social welfare. All discriminatory legislation is reserved for the consent of the British Government.

Municipal self-government has been established in the city of Salisbury, the city of Bulawayo, and in the towns of Umtali, Gwelo, Gatooma, Que Que and Fort Victoria. Smaller areas are administered by Town Management Boards. Over the past ten years local self-government among the Africans has been encouraged and by the end of 1962 there were 57 Native Councils raising their own rates.

Governor, His Excellency Hon. Sir Humphrey Vicary Gibbs, K.C.M.G., O.B.E. (1959).

MINISTRY (Feb. 18, 1958)

Prime Minister, Hon. Sir Edgar Whitehead, K.C.M.G., O.B.E.

Minister of Labour, Social Welfare and Housing, Hon. A. E. Abrahamson.

Minister of the Treasury and of Mines, Hon. C. J. Hatty.

Minister of Roads, of Irrigation and of Lands, Hon. A. R. W. Stubbs.

Minister of Justice and Internal Affairs, Hon. R. Knight, O.C.

Minister of Local Government and of Native Education, Hon. R. M. Cleveland, O.B.E.

Minister of Native Affairs, Hon. H. J. Quinton.

Speaker, Legislative Assembly, Dr. the Hon. W. Alexander.

Secretary, Department of the Prime Minister and Cabinet Office, G. B. Clarke, I.S.O.

Secretary, Division of Justice and Internal Affairs, J. W. Pithey.

Director of Mines, W. Ralston, O.B.E.

Secretary for Native Affairs and Chief Native Commissioner, S. E. Morris, C.M.G.

Secretary to Treasury, C. E. M. Greenfield, C.M.G., M.B.E.

Secretary, Division of Labour, Social Welfare and Housing, C. L. Honey, C.B.E.

SALISBURY, the capital, is situated on the Mashonaland plateau, altitude 4,850 ft., population (estimated) 299,900, including 89,000 Europeans. BULAWAYO, the largest town in Matabeleland, altitude 4,450 ft., estimated population 195,600, including 50,000 Europeans. Other centres are Umtali, Gwelo, Gatooma, Que Que and Fort Victoria.

Salisbury is 5,600 miles from London (air route) transit 17 hours; by sea, *via* Cape Town, 17 days (approx.).

NORTHERN RHODESIA

The Protectorate of Northern Rhodesia lies on the plateau of Central Africa between the longitudes 22° E. and 33° 33' E. and between the latitudes 8° 15' S. and 18° S. Its area is 288,130 square miles, and its boundaries are 3,575 miles in length.

With the exception of the valleys of the Zambezi, the Luapula, the Kafue and the Luangwa Rivers the greater part of Northern Rhodesia has a flat to rolling topography, with elevations varying from 3,000 to 5,000 feet above sea level, but in the north-eastern districts the plateau rises to occasional altitudes of over 5,000 feet. In many localities the evenness of the plateau is broken by hills, sometimes occurring as chains which develop into areas of broken country. The highest group of hills is the Muchinga Mountains which form part of the Great Escarpment running down the western edge of the Luangwa River Valley, and of these, individual peaks rise to about 8,000 feet.

Although Northern Rhodesia lies within the tropics, and fairly centrally in the great land mass of the African continent, its elevation relieves it from the extremely high temperatures and humidity usually associated with tropical countries. The lower reaches of the Zambezi, Luangwa and Kafue rivers in deeper valleys do experience high humidity and trying extremes of heat, but these areas are remote and sparsely populated.

At June 30, 1960, the estimated population of Northern Rhodesia was 76,000 Europeans, 8,000 Asiatics, 2,000 mixed races and 2,340,000 Africans.

FINANCE

Revenue.....	£15,837,855	£18,239,705
Expenditure.....	16,179,899	18,637,854

* Estimated.

With the coming into being of the Federation of Rhodesia and Nyasaland, the Federal Government assumed, under the Constitution, powers to impose certain important taxes formerly enjoyed by the Northern Rhodesia Government and also took over responsibility for the administration of various departments and services.

GOVERNMENT

Government is carried on by a Governor appointed by the Crown, assisted by an Executive Council of four officials and six unofficial members, of whom two must be Africans. The Legislative Council consists of thirty members, of whom six are official, two are nominated by the Governor and the rest are elected. Of the elected members in the present Council, 14 are European and eight are Africans. The Governor's nominees consist of one African and one Asian, and the official members are all European. The Legislative Council is presided over by a Speaker who is an unofficial but not a member of the Council.

Governor of Northern Rhodesia, His Excellency Sir Evelyn Dennison Hone, K.C.M.G., C.V.O., O.B.E. (1958).

Other centres are Livingstone, Broken Hill, Fort Jameson, Mazabuka, Abercorn, Kasama, Mongu, Ndola, Luanshya, Mufupira, Chingola, Bancroft and Kitwe (the main copper mining town of the copper belt—European pop. 9,680).

Commissioner in London, J. P. Murray, C.M.G., 57 Haymarket, S.W.1.

NYASALAND PROTECTORATE

The Nyasaland Protectorate comprises Lake Nyasa and its western shore, with the high tableland separating it from the basin of the Luangwa River, the watershed forming the western frontier with Northern Rhodesia; south of the lake the Protectorate reaches almost to the Zambezi and is surrounded by Portuguese East Africa (Mozambique) the frontier lying on the west on the water-

shed of the Zambezi and Shire Rivers and to the east on the Ruo, a tributary of the Shire, and Lakes Chiuta and Chilwa. This boundary reaches the eastern shore of Lake Nyasa and extends up the mid-point of the lake for about half its length where it returns to the eastern and northern shores to form a frontier with Tanganyika.

Nyasaland has a total area of 45,747 sq. miles (land area, 36,481) with an estimated population at the end of 1961 of 2,921,100 (2,900,000 Africans, 8,800 Europeans and 12,300 Asians and other non-Africans).

The seat of Government is Zomba (estimated population 1961, 7,500), the other main centres being Blantyre/Limbe, the commercial and industrial centre and headquarters of the Southern Province; Lilongwe, headquarters of the Central Province; Mzuzu, headquarters of the Northern Province; Cholo, Manje, Fort Johnston and Mzimba. A single-track railway runs from the south end of the lake (itself served by one passenger and a number of cargo boats) through Blantyre/Limbe to the southern frontier, whence, crossing the Zambezi by a bridge 12,050 feet long, it reaches the coast at the Mozambique port of Beira, which handles the bulk of the Territory's imports and exports. A good-class earth road system covers the whole country and is already tar-macadamized from Manje through Blantyre/Limbe and Zomba to the Shire River 30 miles further north, and also from Lilongwe to the lake-shore at Salima, northern terminus of the railway.

FINANCE

* Financed by loans, grants under the Colonial Development and Welfare Acts, contributions from recurrent revenue, etc.

In 1953, the Government of the Federation of Rhodesia and Nyasaland assumed responsibility for the servicing of the public debt of the Protectorate, then amounting to £6,228,488. The Nyasaland Government is responsible for the servicing of the Public Debt raised since Oct. 23, 1953, totalling (at June 30, 1961) £7,021,232.

GOVERNMENT

The Government, under the new Constitution introduced in 1961, consists of the Governor and Executive and Legislative Councils. The Executive Council is presided over by the Governor and is advisory to him. It consists of 10 Ministers, 3 of whom are civil servants *ex officio* and 7 are elected members of the Legislative Council. The Legislative Council, elected in August, 1961, on a qualified franchise consisting of Higher and Lower Rolls, is presided over by a Speaker, appointed by the Governor, who is not a member of the Council. The Council consists of the 3 *ex officio* Ministers and 28 members, 8 elected by the Higher Roll (4,401 registered voters; 2,895 Europeans, 1,035 Asians and 471 Africans) and 20 by the Lower Roll (107,076 registered voters of whom 10,185 were women; all Africans except 597 Asians and 16 Europeans).

ST. HELENA

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in $15^{\circ} 55' S.$ lat. and $5^{\circ} 42' W.$ long. It is $10\frac{1}{2}$ miles long, $6\frac{1}{2}$ broad, and encloses an area of 47 square miles, with an estimated population at Dec. 31, 1961, of 4,648. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator, João de Nova, in 1502 (probably on St. Helena's Day) and remained unknown to other European nations until 1588. It was used as a port of call for vessels of all nations trading to the East until it was annexed by the Dutch in 1633. It was never occupied by them, however, and the English East India Company seized it in 1659. In 1834 it was ceded to the Crown. During the period 1815 to 1821 the island was lent to the British Government as a place of exile for the Emperor Napoleon Bonaparte who died in St. Helena on May 5, 1821. It was formerly an important station on the route to India, but its prosperity decreased after the construction of the Suez Canal. A phormium (flax fibre) and lacemaking industry has been established. Ψ St. James's Bay, on the north-west of the Island, possesses a good anchorage.

GOVERNMENT

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of up to 4 official and 3 unofficial members. The Governor is also assisted by an Advisory Council of up to 10 unofficial members chosen to represent, as far as possible, all unofficial sections of the community, the Governor alone making all ordinances.

CAPITAL, Ψ Jamestown, population (1956), 1,568.

ASCENSION

An isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 500 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated $7^{\circ} 55' 55'' S.$ lat. and $14^{\circ} 25' 55'' W.$ long. It is said to have been discovered by João de Nova, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is $7\frac{1}{2}$ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and, being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it; on Dec. 31, 1961, the population was 336. Ascension was administered by the Board of Admiralty until 1922, when by Royal Letters Patent it became a Dependency of St. Helena, and was transferred to the Colonial Office. Ψ Georgetown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited from January to May by the sea-turtle, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month.

Resident Magistrate, J. R. Bruce.

TRISTAN DA CUNHA

Is the chief of a group of islands of volcanic origin lying in lat. $37^{\circ} 6' S.$ and long. $12^{\circ} 2' W.$, discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. They have a total area of 45 square miles and in 1921 the inhabitants numbered 127, increased in 1959 to 292. The main island is about 1,800 miles W. of the Cape of Good Hope, 3,600 miles N.E. of Cape Horn, and about 1,320 miles S.S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 14, 1816, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn in 1817. William Glass, a corporal of artillery (died 1853), remaining at his own request, with his wife and two children. This party, with two ex-Navy men, Alexander Cotton and John Mooney, and three masons imported for the purpose of housing the garrison, formed a settlement. In 1827 five coloured women from St. Helena, and after wards, others from Cape Colony, joined the party.

In 1961 the population numbered 280 persons, the islands being administered by the Colonial

Office through a resident Administrator, with headquarters at the settlement of Edinburgh.

In October, 1961, a volcano, believed to have been extinct for thousands of years, erupted and mounds of earth were thrown up in some cases to a height of 35 feet. In view of the danger of further volcanic activity, the inhabitants were evacuated on Oct. 10 to Nightingale Island and taken by a Dutch liner to Cape Town. The British Government assumed responsibility for the transport and resettlement of the party which reached the United Kingdom on Nov. 23, 1961. The islanders were housed in permanent houses at Calshot, Hants, in January, 1962, and jobs were found for most of the able-bodied members of the party. In the spring of 1962 a geological expedition organized by the Royal Society made a seven-week survey of the island, reporting in April that there was a risk of further volcanic activity. In September, 1962, it was reported that a party of 12 islanders on a private visit of inspection had found the volcano still smoking.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl. Cultivation was started in 1937.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and $\frac{3}{4}$ mile wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Seals, innumerable penguins, and vast numbers of sea-fowl visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20' S. and 9° 44' W., lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and sea-elephants and has valuable guano deposits. There is no permanent population, but there is a meteorological station maintained on the island by the South African Government and manned by South Africans.

By Letters Patent dated January 12, 1938, the Islands of *Tristan da Cunha*, *Gough*, *Nightingale* and *Inaccessible* in the South Atlantic were made Dependencies of the Island of St. Helena.

SARAWAK

Sarawak is a British Colony on the north-west coast of the island of Borneo, with a seaboard of about 500 miles, an area of 48,250 square miles, and a population estimated in 1960 at 744,529, composed of various races, of whom the Sea Dyaks (Ibans), Malays, Chinese, Land Dyaks, Melanau, Kayans and Kenyahs are the most numerous. The government of Sarawak was granted in 1841 by the Sultan of Brunei to Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions were made in 1861, 1882, 1885, and 1890, when the Limbang River was obtained. The Lawas River was added in 1905. In 1864 Great Britain recognized Sarawak as an independent State, and under an agreement of 1888 the State was placed under British protection. In 1941 the centenary of Brooke rule was celebrated throughout the State.

Sarawak was ceded to Great Britain by the Rajah on July 1, 1946.

The territory of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of North Borneo. The southern boundary is, except for a few short stretches, formed by outstanding ridges of hills; the eastern boundary is a broken range of moun-

tains with peaks rising to over 5,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 100 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (23 miles).

The country produces rubber, oil, bauxite, timber, sago, rice, ilipe nuts, birds' nests, gold, pepper, rattans and jungle produce. There are also known coal deposits.

GOVERNMENT

By the Sarawak (Constitution) Order in Council, 1956, a new constitution was granted to Sarawak, which came into force on April 1, 1957. Under this the Council Negri, in which legislative powers and the control of finance are vested, has a majority of elected unofficial members. There are 24 elected members, 14 *ex officio* members, 4 nominated members and 1 standing member who was elected for life prior to cession. The new Supreme Council (i.e. Executive Council) has 3 *ex officio* and two nominated members and 5 members elected by the elected members of the Council Negri by secret ballot from among the elected, nominated or standing members of the Council Negri. The elected members of Council Negri are elected by divisional advisory councils (except for the Kuching Municipal and Sibul and Miri Urban District Councils which each elect one representative directly). The divisional advisory councils are elected by district councils and the Kuching Municipal Council.

SEYCHELLES

The Colony of Seychelles, in the Indian Ocean, consists of two distinct collections of islands—the Mahé group, 32 islands in all, granitic with high hills and mountains (highest point 2,971 feet) and the Out-lying Islands, the Coralline group, numbering 60 more and, for the most part, only a little above sea-level. Proclaimed as French territory in 1756, the Mahé group began to be settled as a dependency of Mauritius from 1770, was captured by a British ship in 1794 and was finally assigned to Great Britain in 1810. By Letters Patent of September, 1903, these islands, together with the Coralline group, were erected into a separate Colony. The total area of the Granitic group is 87 square miles, of which Mahé, the largest island and the seat of Government, claims 55. The next largest island is Praslin, home of the unique double coconut, Coco de Mer. Islands of the Coralline group lie at distances from Mahé varying between 60 to 612 miles and, exclusive of the Aldabra lagoon (50 sq. miles), have a total area of approximately 13 sq. miles. Aldabra is famous for the gigantic land tortoises. These islands have no permanent population and, where worked, are supplied by contract labour from the Granitic group. The population on May 4, 1960, was 41,425, of whom only 1,292 were residing in the Coralline group. Although only 4° S. of the Equator, the islands are healthy, the death and birth rates in 1961 were 13.4 and 41.3 per 1,000 respectively. There are 30 primary schools, 9 secondary schools and a teachers' training college.

The Governor is assisted by an Executive Council of 4 *ex officio* members and 4 unofficial members appointed by the Governor, and by a Legislative Council of 4 *ex officio*, 5 elected and 3 nominated members. One of the nominated members is an unofficial.

SINGAPORE

The State of Singapore consists of the island of Singapore and the adjacent islets with a total area of 224.5 sq. miles.

Singapore Island is situated off the southern extremity of the Malay Peninsula, to which it is joined by a causeway, carrying a road and a railway, across the Straits of Johore, which are about three-quarters of a mile in width; its length is 26 miles and its breadth 14 miles; its population at June 30, 1961 was estimated at 1,687,300, comprising 1,269,100 Chinese, 236,400 Malaysians, 141,500 Indians and Pakistanis, 40,300 others.

FINANCE

	1960	1961*
Revenue.....	\$300,348,735	\$384,000,000
Expenditure.....	238,408,500	385,400,000

*Provisional

The currency is linked to sterling and the rate of exchange is \$1.00 = 2s. 4d.

PRODUCTION AND TRADE

Singapore handles the major proportion of the imports and exports of the Federation of Malaya, and much of the external trade of her other neighbours passes through her. The chief exports are rubber, tin, timber, petroleum products, copra, canned pineapples, coconut oil and spices. A wide range of manufactured consumer and capital goods is imported for local consumption and re-exports. In 1961, imports totalled M\$3,967,800,000 and exports M\$3,309,700,000.

TRADE WITH U.K.

	1960	1961
Imports from U.K.....	£33,638,197	£37,442,608
Exports to U.K.....	21,914,334	19,150,256

GOVERNMENT

The Constitution Order-in-Council which gives Singapore full internal self-government and leaves the U.K. responsible only for defence and external affairs came into force on June 3, 1959. Singapore has a parliamentary form of government with a separate judiciary. There is a fully elected 51-member Legislative Assembly with a Speaker of the members' own selection. There is a Cabinet of 9 elected Ministers presided over by the Prime Minister. The Ministers are collectively responsible to the Assembly for policy, but have full executive authority over their respective Ministries. Each Ministry has a Parliamentary Secretary (an elected Assemblyman) and a Permanent Secretary (a civil servant) who exercises supervision under the direction of the Minister.

Head of State, The Yang di-Pertuan Negara, Inche Yusof bin Ishak (Dec. 3, 1959).

U.K. High Commissioner, The Earl of Selkirk, P.C., G.C.M.G., O.B.E., A.F.C.

Prime Minister, Lee Kuan Yew.

British Council Representative, D. Hardwick, M.B.E.

TONGA

The Tongan or Friendly Islands form a self-governing State under the protection of Great Britain, in accordance with the terms of the revised Treaty of Friendship signed at Nuku'alofa on Aug. 26, 1958. These islands are situated in the Southern Pacific some 300 miles to the E.S.E. of Fiji, with an area of 270 square miles, and population (1959) of 61,899. The largest island, Tongatapu, was discovered by Tasman in 1643. Most of the islands are of coral formation, but some are volcanic (Tofua, Kao and Niuafoou or "Tin Can" Island). The limits of the group are between 15° and 23° 30' S., and 173° and 177° W. Nuku'alofa, on the island of Tongatapu, is the seat of government. The present Queen Salote Tubou, G.C.V.O., G.B.E., succeeded her father the late King George Tubou II on April 12, 1918. The constitution provides for a Government consisting of the Sovereign, a privy council and cabinet, a legislative assembly and a judiciary. The legislative assembly has 21 members, with a Speaker, and includes the Ministers of the Crown, the two Governors of island groups, and the representatives of the Nobles and of the people (seven of each), who are elected triennially. In 1960, women were allowed to vote for the first time. Soil generally is fertile, the principal export is copra. Revenue 1961 £T728,374; expenditure £T811,092. There is no debt. Total imports (1961) £T1,424,201; total exports £T1,374,658. The total shipping cleared in 1961 was 176,101 tons. Tongan currency is on parity with Australian currency in relation to sterling.

British Commissioner and Consul, E. J. Coode
(1960) (and duty allowance £200) £2,100.

TRINIDAD AND TOBAGO

AREA AND POPULATION

Trinidad, the second largest and most southerly of the West Indian Islands, lies close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between 10° 2'—10° 50' N. lat. and 60° 55'—61° 56' W. long., and is about 50 miles in length by 37 in breadth, with an area of 1,864 square miles, and a population (Census of 1960) of 827,957 (including Tobago). The racial groups at the 1960 census were: African 43 per cent., East Indian 36 per cent., Mixed or Coloured 16 per cent., European 2 per cent., Chinese 1 per cent. The island was discovered by Columbus in 1498, was colonized in 1532 by the Spaniards, capitulated to the British under Abercromby in 1797, and was ceded to Britain under the Treaty of Amiens (March 25, 1802). Two mountain systems, the Northern and Southern Ranges, stretch across almost its entire width and a third, the Central Range, lies somewhat diagonally across its middle portion; otherwise the island is mostly flat. The highest peaks are in the Northern Range (Aripo 3,085 ft., E. Tucuche 3,072 ft.). The climate is tropical with temperatures ranging from 70° to 90° F. and a rainfall ranging from 100 inches in the north east to 50 inches in the west. There is a well-marked dry season from January to May and a wet season from June to December. The nights are invariably cool. The main tourist season is from December to April.

Tobago lies between 11° 8' and 11° 21' N. lat. and between 60° 30' and 60° 50' W. long., about 75 miles south-east of Grenada, 19 miles north-east of Trinidad, and 120 miles S.W. of Barbados. It was ceded to the British Crown in 1814 and amalgamated with Trinidad in 1838. The island is 26 miles long, and 7½ broad, and has an area of

116 square miles, with a population (Census of 1960) of 38,333. It is one of the healthiest of the West Indies and a popular tourist resort. The main town is Ψ Scarborough.

Other Islands.—Corozal Point and Iacos Point, the N.W. and S.W. extremities of Trinidad, enclose the Gulf of Paria, and west of Corozal Point lie several islands, of which Chacachacare, Huevos, Monos and Gaspar Grande are the most important. On Chacachacare is a leper settlement, the Medical Superintendent of which appeals for Sunday and weekly editions of British newspapers.

CAPITAL.—Ψ Port of Spain (pop. 93,954), one of the finest towns in the West Indies, with sewerage, electric lighting, omnibus and telephone services. Other towns of importance are Ψ San Fernando (pop. 39,830), about 33 miles south of the capital, and Arima (pop. 10,982).

GOVERNMENT

The Territory of Trinidad and Tobago became an independent state and a member of the British Commonwealth on August 31, 1962, under the Trinidad and Tobago Independence Act, 1962. There is a legislature consisting of a Senate and a House of Representatives with an elected Speaker. The Senate has 21 members nominated by the Governor-General, 12 appointed on the advice of the Premier, 2 on the advice of the Leader of the Opposition, and 7 to represent religious, economic or social interests, chosen after consultation with appropriate organizations.

Governor-General, His Excellency Sir Solomon Hochoy, K.C.M.G., O.B.E. (1962–July, 1963).

CABINET

(August 31, 1961)

Premier and Minister of External Affairs, Dr. Hon. E. Williams.

Minister of Home Affairs, Dr. Hon. P. V. J. Solomon.

Education and Culture, Senator D. Pierre.

Health and Housing, Hon. D. Granado.

Public Utilities, Hon. K. Mohammed.

Agriculture, Industry and Commerce, Hon. J. O'Halloran.

Local Government and Community Development, Hon. S. Mohammed.

Labour, Hon. R. E. Wallace.

Finance, Hon. A. N. R. Robinson.

Works, Hon. G. Montano.

Attorney-General, Senator G. A. Richards.

Without Portfolio, W. J. Alexander.

Speaker, House of Representatives, C. A. Thomasos.

JUDICATURE

Chief Justice, Hon. E. E. I. Clarke, C.M.G.

Puisne Judges, Hons. A. H. McShine; M. H. A.

Corbin; N. A. M. Peterkin; C. E. G. Phillips;

K. P. de la Bastide; I. E. Hyatali; E. A. Durity;

E. A. Rees.

COMMONWEALTH REPRESENTATION

Port-of-Spain

United Kingdom High Commissioner, His Excellency N. E. Costar, C.M.G.

Deputy High Commissioner, S. J. G. Fingland.

London

High Commissioner for Trinidad and Tobago, His Excellency Sir Lealie Constantine, M.B.E., 51 South Audley Street, W.1.

EDUCATION

The system of education is being reformed to co-ordinate more closely the interlocking levels—

primary, post-primary/secondary and higher. The system will provide for education of the pupils from 5 to 12 in primary schools—431 at present—and from 12 plus to 18 in a present total of 23 Government and assisted secondary schools—grammar, modern and technical—with a further 4 under construction. There are also about 25 recognized private secondary schools. Figures for 1960 of primary enrolment amount to 181,800, with an average attendance of 150,100. The Government Polytechnic Institute was established in 1959 and has an enrolment of about 1,000.

British Council Representative (Port-of-Spain), J. Makin, M.B.E.

TRANSPORT AND COMMUNICATIONS

There are 109 miles of public railway and the total mileage of main and local roads maintained during 1959 was 2,519. There are 105 post offices and postal agencies, 56 of which transact savings bank and money order business. There is an internal telegraph system and two local broadcasting stations.

Trinidad is well served by steamship lines and there are deep water wharf facilities at Port of Spain. Eleven international scheduled airlines operate to and through Trinidad (Piarco), which acts as a focal point for air traffic between the Americas. There were 11,961 movements of aircraft in 1961. A domestic air service between Trinidad and Tobago is operated by B.W.I.A. Flights in 1961 averaged three per day. Air transit to U.K., 36 hrs.; to U.S.A., 24 hrs.

PRODUCTION

Oil is the principal export. A remarkable phenomenon is the asphalt lake, 114 acres in extent, near the village of La Brea, from which in 1961 154,212 tons of natural asphalt were removed. The soil of Trinidad is rich and productive, the most important products being sugar, molasses, rum, cocoa, coconuts and coconut products, citrus and coffee. Agricultural exports totalled \$50,072,000 in 1961.

THE UGANDA PROTECTORATE

The territories now comprised within this Protectorate came under British influence in 1890. The present limits are approximately as follows:—On the north, the Sudan; on the east, the western boundary of Kenya Colony; on the south, Tanganyika Territory and Belgian Ruanda-Urundi; and on the west, the eastern boundary of the Belgian Congo. Within these boundaries lie Lake Victoria (part), Lake Edward (part), Lake George, Lake Albert (half), Lake Kyoga, Lake Sallsbury, and the course of the Nile from its exit from Lake Victoria to the Sudan frontier post at Nimule. Total area, 93,981 square miles, including 13,689 square miles of water.

For administrative purposes, the Protectorate is divided into 4 Provinces:—

(1) Buganda (East Mengo, West Mengo, Masaki and Muhende).

(2) Eastern (Teso, Busoga, Bugisu, Bukedi, Mhale Township).

(3) Western (Bunyoro, Toro, Ankole and Kigezi).

(4) Northern (Achoi, Lango, West Nile and Karamoja).

The estimated population of Uganda (1959) was 6,538,175, composed as follows: Africans 6,451,117; Asians 71,933; Europeans 10,866; Arabs, 1,946; other races 2,313. About 2,500,000 Africans, who occupy the Central and Southern parts of the Protectorate, speak Bantu languages of which the most important is Luganda (the language of the Baganda tribe, from whom the present name of the Protectorate was originally derived). Ki-Swahili in a dehased form is also spoken as a trading language and is used by the Police. The tribes occupying the North of the Protectorate are closely related to various tribes in the South of the Sudan. They speak a series of widely differing languages, now distinguished as belonging to the Sudanian, Nilotic and Nilohamitic clusters.

GOVERNMENT

The Uganda Protectorate attained internal self-government on March 1, 1962. The government of the country is now the responsibility of the majority party in the National Assembly headed by the Prime Minister who is assisted and advised by his Cabinet. Elections on a common roll were held in all parts of Uganda except Buganda Kingdom in April, 1962. In Buganda elections were carried out through the Great Lukiko of the Kingdom acting as an electoral college. There are also 9 specially elected members. Uganda was due to achieve self-government on October 9, 1962.

Office	Holder	Salary
Governor and Commander-in-Chief, His Excellency	Sir Walter Fleming Couetts, K.C.M.G., M.B.E. (1961) (and £2,500 duty allowance)	£6,000
Chief Justice	Sir Audley McKisack	3,400
Chief Secretary	G. B. Cartland, C.M.G.	3,500
Speaker, National Assembly	Sir John Griffin, Q.C.	1,500
Prime Minister	A. Milton Obote	3,400
Minister of State	G. B. K. Magezi	3,000
Minister of Justice	G. S. K. Ihingira	3,000
Minister of Finance	A. K. Sempa	3,000
Minister of Internal Affairs	W. W. K. Nadiope	3,000
Minister of Education	Dr. J. S. L. Zake	3,000
Minister of Economic Affairs	J. T. Simpson, C.B.E.	3,000

Minister of Animal Industry, Game and Fisheries	J. K. Babiha	3,000
Minister of Community Development	L. Kalule-Settala	3,000
Minister without Portfolio	B. K. Kirya	3,000
Attorney-General	G. Binasa, Q.C.	3,000
Chairman, Public Service Commission	Y. K. Lule	3,000

Development.—A five-year development plan involving the expenditure of approximately £34,000,000, was completed in 1960.

A dam at the Owen Falls on the Nile, near Jinja,

provides hydro-electric power for industrial development. An eighth generator was installed in 1959, bringing the generating capacity up to 120,000 kW. The potential generating capacity of the dam is 150,000 kW. Power is now available over a wide area.

Mineral resources are mainly concentrated in two widely separated areas. In the west on the slopes of the Ruwenzori Mountains are found limestone, copper, cobalt and salt whilst around Tororo in the east the Sukulu mineral complex includes limestone, magnetite, apatite (phosphate), and pyrochlore (nlobium).

In 1952, the Uganda Development Corporation Limited was established with a capital of £5,000,000 now increased to £8,000,000, of which £6,400,000 has been issued. Its object is to promote and assist the further expansion of the economy of the Protectorate by the establishment of enterprises with the co-operation of private capital wherever possible. The Corporation's Technical Development Division also undertakes research into technical aspects of industrial development and its services are available not only to its own associated and subsidiary companies but to industry generally. Developments which the Uganda Development Corporation has sponsored in participation with private enterprise include the mining and production of copper and cobalt from Kilembe, in the Ruwenzori Range, plans for the exploitation of the apatite and pyrochlore deposits at Tororo, and the manufacture of textiles at Jinja from locally grown cotton.

A subsidiary of the Corporation, the Uganda Cement Industry Limited, at Tororo, can produce sufficient cement to meet all Uganda's requirements with a surplus for export. The Corporation is also concerned through subsidiaries with fish marketing, building, hotel development, cattle ranching and tea growing.

Education.—Separate schools are provided for members of the African, Asian and European communities, though since 1957 an effort has been made to extend multi-racial schools. The majority of African schools are managed by voluntary agencies, especially by Mission Societies. Substantial grants are provided by Government towards teachers' salaries, boarding and equipment, and there are about 354,500 children in grant-aided primary schools and about 21,000 in post-primary institutions, including training colleges and technical schools. There are 20,180 in Government and grant-aided Asian schools. Over 1,200 European children attend Government and grant-aided schools in the Protectorate, but there are no secondary schools in Uganda for European children and the majority of them attend secondary schools in Kenya or the United Kingdom. Total expenditure by the Protectorate Government in 1959-60 was £5,008,903. Makerere College, the University College of East Africa, is an autonomous inter-territorial foundation. It was granted special relationship with London University in 1949, and London external degrees were awarded for the first time at the end of 1953.

Communications.—The main line of the East African Railways in Kenya and Uganda extends from Mombasa, *via* Nairobi, Tororo, Jinja and Kampala to Kasere near the Congolese Republic border. There are branches from Tororo to Soroti, from Mbulamuti to Namiasagali on Lake Kyoga, and from Kampala to Port Bell on Lake Victoria. The Railway Administration maintains a regular steamer service on Lake Kyoga between Namiasagali and Masindi Port; and on Lake Victoria between Port Bell, Entebbe, Kisumu and Tanganyika Ports. A service is maintained on Lake Albert and

the Nile between Butiaba and Nimule (connected by motor road with Juba in the Sudan) and between Butiaba and the Congolese Republic port of Kasenyi. A road transport service operates between Masindi Port and Butiaba, and a freight service is thus provided by the Railway Administration from Mombasa to the Sudan and the Congolese Republic. The Uganda Public Works Department maintains 2,964 miles of main roads, of which 520 miles are tarmac; the various African local governments between them maintain a further 8,300 miles of roads of variable standard. There is a joint East African Posts and Telecommunications Service which operates throughout Kenya, Uganda and Tanganyika. Entebbe has a first-class international airport, and is a principal stopping place on the main B.O.A.C. routes through East Africa. Other airlines operating regularly through Entebbe include Alitalia, Sabena, Central African Airways and E.A.A.C. and British United Airways. It is also a stopping point on many charter flights. There are landing grounds at Jinja, Tororo, Masindi, Gulu, Soroti, Arua, Lira, Mbarara, Moroto, Murchison Falls, Kisenyi (on Lake George) and Kasere. There are hotels at Entebbe, Kampala, Jinja, Tororo, Mbale, Kasere, Masindi, Fort Portal, Kabale, Mbarara, Gulu and Masaka.

Production.—Agricultural production is largely in the hands of Africans, the most important crops being cotton, coffee, tobacco, maize and groundnuts. Sugar, coffee and tea are the main crops on non-African estates. The potential mineral wealth is considerable, tin ore, wolfram and copper being won in the Western Province.

The Customs Services of Uganda, Kenya and Tanganyika are administered jointly by the Customs and Excise Department of the East Africa High Commission. The country's export trade is mainly in raw cotton, coffee, oil seed cake, tea, hides and skins and groundnuts. The chief imports are cotton and rayon fabrics, machinery and transport equipment, base metals and metal manufactures. The trade is chiefly with Great Britain, India, Japan and West Germany.

THE WEST INDIES

Trade Enquiry Office in London, Trade Commissioner for the British West Indies, British Guiana and British Honduras, 6-10 Bruton Street, W.1.

The West Indies are a number of islands and islets, some of them mere rocks, situated between 10° to 27° North and 50° 30' to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divided into three main groups: I. GREATER ANTILLES, which contain the largest islands, Cuba (44,000 sq. miles) and Hispaniola (Haiti and the Dominican Republic) (30,000 sq. miles), Jamaica and Puerto Rico; II. BAHAMAS, which are entirely British. III. LESSER ANTILLES, which are divided among the United Kingdom, France, Netherlands, the United States and Venezuela; the British colonies in the Lesser Antilles are Barbados, Leeward and Windward Islands and Trinidad and Tobago. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are independent, 12,300 British, 3,890 United States, 1,350 French, 430 Netherlands, and 90 Venezuelan.

The West India Islands that lie nearest the East have been called the *Windward Islands*; the others the *Leeward Islands*, on account of the winds blowing generally from the eastern point in those quarters.

CARIBBEAN ORGANIZATION

Established in September, 1961, by agreement between the Governments of France, the Netherlands, the United Kingdom and the United States, as the successor to the Caribbean Commission, the organization gives advice on social, cultural and economic matters of common interest to the Caribbean area, particularly agriculture, communications, education, fisheries, health, housing, industry, labour, music and the arts, social welfare and trade.

The members of the Organization are France for the Departments of French Guiana, Guadeloupe and Martinique; the Netherlands Antilles; Surinam; British Guiana; the British Virgin Islands; The West Indies; the Commonwealth of Puerto Rico; and the Virgin Islands of the U.S.

The Central Secretariat of the Organization is situated in San Juan, Puerto Rico.

The Federation of the West Indies, set up on January 3, 1958, under the British Caribbean (Federation) Act, 1956, of ten colonies with dependencies, came to an end in 1962. Jamaica became an independent state on August 6, 1962, and Trinidad and Tobago on August 31, 1962. (See separate articles.) The United Kingdom Government is empowered under the West Indies Act, 1962, to make provision for the administration of the remaining West Indian Colonies and for the establishment of common courts. Agreement was reached at a conference in London in May, 1962, on the formation of a new *West Indies Federation* of eight members—Barbados, the Leeward Islands (Antigua, St. Kitts-Nevis-Anguilla, Montserrat) and the Windward Islands (Dominica, Grenada, St. Lucia and St. Vincent), with the Federal Capital in Barbados.

ANTIGUA

Antigua lies in 17° 6' N. lat. and 61° 45' W. long., and is nearly 108 square miles in area with a coastline of about 70 miles. Antigua was first settled by the English in 1632, and was granted to Lord Willoughby by Charles II. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which one central sugar factory has been erected. Cotton is now planted on a large scale and the island also exports molasses, tomatoes and rum. The population, with Barbuda, is estimated at 57,000.

Net tonnage of merchant shipping entered and cleared in 1961, 2,572,670 tons.

GOVERNMENT

Barbados has always remained in the possession of Great Britain, by which it was settled in 1627. The Crown has a veto on legislation. The Legislature consists of the Governor, a Legislative Council of 14 members appointed by the Sovereign, and a House of Assembly of 24 members elected every five years by adult suffrage.

A ministerial system of Government was introduced in 1954 and a cabinet system in Jan. 1958. There are a Premier and five other Ministers, responsible for the executive functions of Government except defence and security, personnel, establishment and external affairs. Since the attainment of full internal self-government on Oct. 16, 1961, the Executive Council has been replaced by a Privy Council and the Judicial and Legal Service Commission and the Public Service Commission have full executive powers of appointment and discipline.

Governor, Sir John Montague Stow,

The CAPITAL and port is Ψ Bridgetown (estimated pop., 18,850). A new deep-water harbour with berths for 8 ships was opened in July, 1961.

THE CAYMAN ISLANDS

The Cayman Islands, between $79^{\circ} 44'$ and $81^{\circ} 26'$ W. and $19^{\circ} 15'$ and $19^{\circ} 46'$ N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 100 square miles.

Population (estimated Dec. 31, 1959), 8,803. The constitution provides for an Administrator, Legislative Assembly and an Executive Council. The Legislative Assembly consists of the Administrator, not less than two nor more than three nominated members, not less than two nor more than three official members and 12 elected members. The Executive Council consists of the Administrator and two official members appointed from among the official members of the Assembly, one nominated member appointed from among the nominated members of the Assembly and two elected members, elected by the non-official members of the Assembly from among the elected members of the Assembly. The normal life of the Assembly is three years. Supervisory powers over the government of the islands exercised by the Government of Jamaica came to an end in August, 1962.

The principal town is Ψ George Town, in Grand Cayman, population (1943) 1,462.

MONTSERRAT

is situated in $16^{\circ} 45'$ N. lat. and $61^{\circ} 15'$ W. long., 27 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of $32\frac{1}{2}$ square miles, population (1960 census), 12,000. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1783. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island is mountainous, the rest capable of cultivation. The chief exports are sea island cotton, tomatoes, carrots, onions, limes and lime products, bananas and livestock.

ST. KITTS-NEVIS-ANGUILLA

The islands of St. Kitts, Nevis, and Anguilla are united to form one Territory, and taken together they have a population (1960) of 57,472, and a total area of about 153 square miles. The climate is decidedly healthy for the tropics, the temperature being from 66° to 88°.

St. Kitts (population 1960, 38,624), the principal island, was the first possession of the British West Indies to be colonized (1623); it is situated in lat. 17° 18' N. and long. 62° 48' W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands; in the West Indies, a continuous line of green sugar estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,792 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital, Ψ Basseterre, is a port of registry.

Nevis (population 1960, 12,916) is separated from St. Kitts by a strait 3 miles wide and has an area of 50 sq. miles. Cotton is exported and coconuts are now processed for the oil-extraction plant. The raising of livestock and cultivation of vegetables are also important features of the island's economy. Its greatest elevation is 3,595 feet. The chief town, Ψ Charlestown, is a port of entry.

Anguilla (population 1960, 5,932) is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised.

Finance and Trade

	1959	1960

Government

The Administrator normally acts in accordance with the advice of the Executive Council in the exercise of the executive authority of the Territory. The Executive Council consists of a Chief Minister, three other ministers and one other member, a nominated member from the Legislature, and one *ex officio* member (the Attorney-General). The Legislative Council consists of two official members, three nominated members and eight elected members. Since January, 1960, four elected members in the Executive Council have held the portfolios of Chief Minister, Minister of Social Services, Agriculture and Labour and Communications and Works respectively.

TURKS AND CAICOS ISLANDS

These West India islands geographically form a sort of annexe of the Bahamas group, from which Government they were separated in 1848. From 1873 until 1962 they were annexed to Jamaica,

from which they are distant about 450 miles, reverting to U.K. administration on August 6, 1962, upon Jamaica's attainment of independence. They have an area of about 166 square miles, and a population (1960 census, preliminary figures) of 5,716, of which the principal island, Grand Turk, contains 2,139. Ψ Grand Turk is an important cable station. The islands are celebrated for producing some of the finest salt in the world. Other exports are sisal, crawfish and conches. A considerable number of men are employed overseas in the Bahamas. There is a U.S. Air Force base and a Naval facility at Grand Turk, and a government-owned airstrip at South Caicos, at present used mainly for emergency purposes.

Assistant Administrator, J. S. Evans,

(+ *overseas allice*, £150)

1,200

THE WINDWARD ISLANDS

The Windward Islands consist of the four colonies of Grenada, St. Vincent, St. Lucia and Dominica with their dependencies; the Grenadines being divided between Grenada and St. Vincent. The total area is 821 square miles, with a population estimated (1958) at 328,625. There is an Administrator in each of the four islands and an elected majority in each of the four Legislative Councils. The ministerial form of government was introduced in 1956.

GRENADA AND THE GRENADINES

Grenada is situated between the parallels of 12° 13'–11° 58' N. lat. and 61° 20'–61° 35' W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 133 square miles; estimated population (including some of the Grenadines), 88,608 (1960). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonized by the French, and was ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, sugar cane, cotton, coconuts, limes and fruit are grown. The imports chiefly comprise dry goods, wheat flour, dried fish, bread-stuffs, hardware, etc.

Ψ St. George's (population approximately 7,305), on the south-west coast, is the chief town, and possesses a good harbour.

Attorney-General, E. A. Heylinger.....	£1,250 to £1,500
--	------------------

The Grenadines are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. 6,431.

ST. LUCIA,

the second largest and the most picturesque of the Windward group, situated in 13° 54' N. lat. and 60° 50' W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 238 square miles with an estimated population (1960) of 86,200. About 56,000 acres are devoted to agriculture. It possesses perhaps the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are bananas, sugar, copra, coconuts, cocoa, edible oil, lime oil, fresh fruit and vegetables. Over 3,500,000 stems of bananas were exported in 1961. The chief imports are flour, machinery, cotton-piece goods, sacks and bags.

Castries, the capital (estimated population, 32,215) is recognized as being one of the finest ports in the West Indies on account of its reputation as a safe anchorage in the hurricane season. In 1961, 1,475 vessels with a total gross tonnage of 1,395,041 called at Castries.

Financial Secretary, Col. A. G. Tubb, C.B.E.	7,200

ST. VINCENT,

an island about 95 miles west of Barbados, situate in 13° 10' N. lat. and 60° 57' W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (1960) of 80,000. In 1846 a large number of Portuguese labourers, amounting to 7,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the three other islands of the group. In 1783 it was secured to Great Britain.

The chief products are bananas, arrowroot, cotton, copra, coconuts, rum, sugar, cassava, cocoa, ground provisions, and spices. Its chief imports are foodstuffs (including canned and pickled meat, salted and pickled fish, butter, rice and flour), cotton and woollen piece goods, hardware, lumber, iron and steel manufactures, cement and fertilizers.

There were 54 primary schools with 21,500 pupils in 1961, and 2 Government secondary schools with an attendance of 502. In addition, there are 2 grant-aided secondary schools with an attendance of 452.

CAPITAL, Kingstown. Population (1960), 16,141.

DOMINICA

Dominica, the loftiest of the Lesser Antilles, was transferred from the Leeward to the Windward Group on Jan. 7, 1940. It is situated between 15° 20'—15° 45' N. lat. and 61° 13'—61° 30' W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad comprising an area of 290 sq. miles, of which about 35,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°. The climate is healthy, and during the winter months very pleasant. The exports consist almost entirely of agricultural produce, principally bananas, lime oil, lime juice, oranges, bay oil, cocoa, copra and vanilla. Population (est. 1960, 59,124). The principal towns are Ψ Roseau, on the south-west coast, population (1960), 12,577 and Portsmouth, population (1960), 2,209.

Education.—There are 52 elementary schools, of which 49 are Government and 3 assisted. Of the 4 secondary schools, 3 receive a grant-in-aid and one is maintained by the Government.

Finance and Trade

	1959	1960
Revenue (incl. Grants).	£1,057,850	\$4,972,014
Expenditure (do.).....	1,176,488	6,661,200

Imports.....	2,069,969	10,022,000
Exports.....	1,385,971	6,230,000

Government

There is an Executive Council composed of one official and five unofficial members, and a Legislative Council consisting of one official, 2 nominated and 11 elected members. Four of the elected members of the Executive Council are styled Ministers and control departments representing the major part of the Government's activity.

Administrator, Col. A. Lovelace, C.M.G., M.B.E., M.C. (1960).

Chief Secretary, L. A. Roberts.

WESTERN SAMOA

Joint Heads of State, H.H. Malietoa Tanumafili II, C.B.E., and H.H. Tapua Tamasese Meaole, C.B.E.

Prime Minister, Hon. Flame Mata'afa Faumuina Mulinu'u II, C.B.E.

Formerly administered by New Zealand (latterly with internal self-government), Western Samoa became, on January 1, 1962, the first fully-independent Polynesian State. It is for the present being treated as a member country of the British Commonwealth, pending a final decision by the Government.

Western Samoa consists of the islands of Savai'i (703 sq. miles) and of Upolo, which with its adjacent islands, has an area of 430 sq. miles. All the islands are mountainous. Upolo, the most fertile, contains the harbours of ΨApla and ΨSaluafata. The islanders are Christians of different denominations. A census held on Sept. 25, 1961, showed a total population of 114,427, of whom 101,288 were Samoans and 11,813 part-Samoans.

The chief exports are copra, of which 12,922 tons were exported in 1961, valued at £672,899; bananas, 560,430 cases valued at £644,495; and cocoa, 4,101 tons (£597,592). Total trade in 1961 was valued at—Exports, £1,962,531; Imports, £2,536,188. Total revenue, 1961: £1,539,870; total expenditure, £1,763,077.

CAPITAL.—ΨApla (population 16,000).

FLAG.—Five white stars (different sizes) on an oblong of royal blue at top next staff, all on a red ground.

ZANZIBAR

(The Zanzibar Protectorate)

Sultan, H. H. Seyyid Sir Abdulla bin Khalifa, K.B.E., C.M.G., born Feb. 12, 1910; succeeded Oct. 17, 1960.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tunghi Bay and north to Warskeikk; but they are now confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Kiamboni (Dick's Head) and the islands of Lamu, Manda, Patta, and Siu.

Zanzibar has an area of 640 square miles with a population of 165,253 (1958 Census); Pemba (380 square miles) population, 133,858; total area, 1,020 square miles; total population, 299,111.

Production, etc.—The islands produce a large percentage of the world's supply of cloves and clove oil (cloves exported in 1961 were valued at £2,413,970 and clove bud and stem oil at £122,339). They also exported £210,829 of coconut oil, £403,326

of copra, and £91,185 of coconuts in 1961. Clove and coconut products constituted 96 per cent. of the Protectorate's total exports.

Education.—In 1961 there were 76 primary schools, of which 63 were government schools, 10 grant-aided and 3 private. There were 5 secondary schools, open to all pupils from all communities. There are government training colleges for men and women primary teachers. The total enrolment in all government and grant-aided primary and secondary schools in October, 1961, was 21,815. The total expenditure from local revenue in 1961 was £417,870.

Communications.—There are 341 miles of road suitable for motor traffic in Zanzibar and 107 miles in Pemba. Radio telephone communication is available from Zanzibar to the three mainland territories and to Pemba, though it is not yet possible to telephone from Pemba to the mainland. The town of ΨZanzibar, on the island of the same name, has a population of 45,284. It possesses a good anchorage, which provides facilities for shipping and trade generally.

A civil aerodrome is situated 5 miles south-east of the town, linked with Tanganyika and Kenya by charter and daily scheduled services. There is also a civil aerodrome in Pemba linking the island with Zanzibar, Kenya and Tanganyika by regular services with the East African Airways Corporation.

FINANCE

	1960	1961
Revenue.....	£2,573,318	£1,463,627
Expenditure.....	2,525,293	1,670,515

TRADE

The principal imports are rice, grain, groceries, sugar, tobacco, ivory, petroleum and piece-goods; the exports are cloves, copra, marine products, clove oil, coconut oil, oil cakes and coir fibre in addition to re-exports of previously imported ivory and piece-goods.

	1960	1961
Imports.....	£5,351,117	£6,318,091
Exports.....	5,726,859	5,226,932

	1960	1961
Imports from U.K....	£705,886	£788,600
Exports to U.K.....	334,062	300,389

GOVERNMENT

The government is administered by a British Resident. His Highness the Sultan presides over a Privy Council, and the British Resident presides over the Executive Council, on which there are 3 ex officio members, the Chief Minister, 4 Ministers and 1 assistant Minister. The Legislative Council, presided over by a Speaker, has 3 ex officio, 23 elected and 5 appointed members.

British Resident, Sir George Mooring,

K.C.M.G. (1959)
Chief Justice, Sir Gerald Mahon..... £3,750

Civil Secretary, Hon. P. A. P. Robertson,
C.M.G..... 3,625

Chief Minister, Hon. Muhammad Shamte
Hamadi, M.B.E.

Minister for Education and Welfare, Hon.
Ali Muhsin Ali.

Minister for Agriculture, Hon. Juma Aley
el-Abrawy.

Minister for Works, Communications and
Land, Hon. Ibuni Saleh.

Minister of Health, Hon. Ahmad Abdul
Rahman Baalawy.

Trade Enquiry Office in London, Grand Buildings,
Trafalgar Square, W.C.2.

Ireland

See also Northern Ireland, pp. 688-691; Republic of Ireland, pp. 798-800.

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,408 sq. miles and its geographical position between $51^{\circ} 26'$ and $55^{\circ} 21'$ N. latitude and from $5^{\circ} 25'$ to $10^{\circ} 30'$ W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Annagh Head), is 174 miles. On the N. coast of *Achill Island* (Co. Mayo) are the highest cliffs in the British Islands, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coast-line. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawel 2,240 ft.) of County Tyrone; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.); the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway; *Macgillicuddy's Reeks* (Carrantuohill 3,414 ft., the highest point in Ireland); and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Comeragh Mountains* (2,470 ft.) of County Waterford. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Harbour, and the *Suir*, *Barrow* and *Nore*, to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which *Lough Neagh* (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of *Allen*, *Boderg*, *Forbes*, *Ree* and *Derg*, and the *Erne* Chain of *Gowna*, *Oughtier*, *Lower Erne*, and *Erne*; *Melvin*, *Gill*, *Gara* and *Conn* in the north-west; and *Corrib* and *Mask* (joined by a hidden channel) in the west. In County Kerry, to the east of Macgillicuddy's Reeks, are the famous *Lakes of Killarney*. The climate of Ireland is more equable than that of Great Britain, the extreme range of temperature readings being from 2° F. to 90° F. (compared with -12° F. to 100° F. over Great Britain). The average annual rainfall varies from 27 inches at Dublin to more than 100 inches in the mountains of Connemara. The rainfall is also more uniform from year to year than in Great Britain.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island; a grave containing a polished stone axhead assigned to 2,500 B.C. was found at Linkardstown, Co. Carlow, in 1944, and the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goldels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

History.—According to Irish legends, the island of *Ierne* was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardri* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailch, Orlel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Coul (Fingal) to connect Antrim with Scotland (Staffa).

Hibernia was visited by Roman merchants but never by Roman legions, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as *Findgaill* (White Strangers) and the Danes as *Dubgaill* (Black Strangers), names which survive in "Fingal," "MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulaid's-tir, Laigin's-tir, Mumans-tir and Kunak's-tir). The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980), at which the Hy Neill

king Maelsechlainn II. defeated the Scandinavians of Duhllin and the Hebrides under their king Amlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Brians of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermot MacMurrough (Diarmait MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Rualdhról O'Connor (the high king of Ireland), and visited Henry II., the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermot enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermot's daughter. In 1172 (Oct. 18) Henry II. himself landed in Ireland. He received homage from the Irish kings and established his capital at Dublin. The invaders subsequently conquered most of the island and a feudal government was created. In the 14th and 15th centuries, the Irish recovered most of their lands, while many Anglo-Irish lords became virtually independent, royal authority being confined to the "Pale," a small district round Dublin. Though under Henry VII., Sir Edward Poyning's, as Lord Deputy had passed at the *Parliament of Drogheda* (1494) the act later known as *Poyning's Law*, subordinating the Irish Legislature to the Crown, the Earls of Kildare retained effective power until, in 1534, Henry VIII. began the reconquest of Ireland. Parliament in 1541 recognized him as King of Ireland and by 1603 English authority was supreme.

Christianity.—Christianity did not become general until the advent of St. Patrick. St. Patrick was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organize the Christian religion throughout the island.

Republic of Ireland

Area and Population.—The Republic has a land area of 26,600 sq. miles, divided into the four Provinces of LEINSTER (Carlow, Dublin, Kildare, Kilkenny, Laoighis, Longford, Louth, Meath, Offaly, Westmeath, Wexford and Wicklow); MUNSTER (Clare, Cork, Kerry, Limerick, Tipperary and Waterford); CONNACHT (Galway, Leitrim, Mayo, Roscommon and Sligo); and part of ULSTER (Cavan, Donegal and Monaghan). Total population of the Republic at the Census held on April 9, 1961 (preliminary figures) was 2,814,703 (males 1,415,100; females 1,399,603), a density of 106 persons per sq. mile. Provisional figures showed 59,826 births, 15,140 marriages and 34,548 deaths in the year 1961.

THE PRESIDENT

Uachtarán na hÉireann (President), Éamon de Valera, born 1882, assumed office June 25, 1959.

MEMBERS OF THE GOVERNMENT

GOVERNMENT

The Constitution.—The Constitution approved by a plebiscite on July 1, 1937, came into operation on December 29, 1937.

The Constitution declares that Ireland is a sovereign independent democratic State and affirms the right of the Irish Nation to choose its own form of Government, to determine its relations with other nations, and to develop its life, political, economic and cultural, in accordance with its own genius and traditions. The national territory is declared to be the whole island of Ireland, its islands and the territorial seas. Pending the re-integration of the national territory, and without prejudice to the right of the Parliament and the Government established by the Constitution to exercise jurisdiction over the whole of the national territory, the laws enacted by that Parliament shall have the like area and extent of application as those of the Irish Free State, which did not include the six counties of Northern Ireland. The national flag is the tricolour of green, white and orange. The Irish language, being the national language, is the first official language. The English language is recognized as a second official language.

The President.—The President—*Uachtarán na hÉireann*—is elected by direct vote of the people for a period of seven years. A former or retiring President is eligible for a second term. The President summons and dissolves Dáil Éireann on the advice of the *Taoiseach* (Head of the Government). He signs and promulgates laws. The supreme command of the Defence Forces is vested in him, its exercise being regulated by law. He has the power of pardon. The President, in the exercise and performance of certain of his constitutional powers and functions, is aided and advised by a Council of State.

The Legislature.—The Parliament—*Oireachtas*—consists of the President and two Houses: a House of Representatives—*Dáil Éireann*—and a Senate—*Seanad Éireann*.

Dáil Éireann is composed of 144 members elected by adult suffrage on a basis of proportional representation.

Seanad Éireann is composed of 60 members, of whom 11 are nominated by the *Taoiseach* and 49 are elected; three by the National University of Ireland, three by the University of Dublin, and 43 from panels of candidates, established on a vocational basis.

The Executive.—The executive authority is exercised by the Government subject to the Constitution. The Government is responsible to Dáil Éireann, meets and acts as a collective authority, and is collectively responsible for the Departments of State administered by the Ministers.

The *Taoiseach* is appointed by the President on the nomination of Dáil Éireann. The other members of the Government are appointed by the President on the nomination of the *Taoiseach* with the previous approval of Dáil Éireann. The *Taoiseach* appoints a member of the Government to be the *Tánaiste* who acts for all purposes in the place of the *Taoiseach* in the event of the death, permanent incapacitation, or temporary absence of the *Taoiseach*. The *Taoiseach*, the *Tánaiste* and the Minister for Finance must be members of Dáil Éireann. The other members of the Government must be members of Dáil Éireann or Seanad Éireann, but not more than two may be members of Seanad Éireann.

THE LEGISLATURE

The Legislature (*Oireachtas*) consists of the President and two Houses—a House of Representatives (*Dáil Éireann*) and a Senate (*Seanad Éireann*). Dáil Éireann is composed of 144 Members, elected on the system of Proportional Representation by means of the single transferable vote. All citizens who have reached the age of 21 years and are not disqualified by law have the right to vote. The same Dáil does not continue for a longer period than seven years, but a shorter period of five years has been fixed by existing legislation. The present (17th) Dáil was elected on October 4, 1961, and met on October 11, 1961.

Party Strength (Dáil Éireann)

	1960	1961	1962
Fianna Fáil	78	75	70
Fine Gael	40	41	47

*** Members of Dáil Éireann are paid an allowance of £1,000 per annum (and members of Seanad Éireann £750) and are allowed free travelling facilities between Dublin and their constituencies.

Parliamentary Secretaries.

Parliamentary Secretary to the Taoiseach and to the Minister of Defence, Seosamh ó Braonáin (Joseph Brennan).

Do. to the Minister for Finance, Donnchad ó Máille (Donogh Brandon O'Malley).

Do. to the Minister for Lands, Brian óLuineacháin (Brian Joseph Lenihan).

Attorney-General, Aindrias Ó Caoimh, S.C.

Secretary to the Government, Nioclís Ó Nualláin ph.D. (Nicholas G. Nolan).

Assistant Secretary to the Government, Tadhg Ó Cearbhaill (Tadhg O'Carroll).

United Kingdom Ambassador to the Republic of Ireland

H. E. Sir Jan MacLennan, K.C.M.G., 39 Merrion Square, Dublin.

Counsellor, G. E. Crombie, C.M.G.

First Secretary, A. H. Reed.

Military Attache, Brig. R. N. Thicknesse.

Trade Commissioner, G. L. Pearson, M.C.

Diplomatic Representatives Abroad

The Holy See: T. V. Commins (Ambassador).

Argentina: M. L. Skentelberg (Minister).

Australia: S. Kennan (Chargé d'Affaires).

Austria: W. Warnock (Minister).

Belgium and Luxembourg: F. Biggar (Ambassador).

Canada: W. P. Fay (Ambassador).

Finland: J. A. Belton (Minister).

France: D. R. McDonald (Ambassador).

Federal Republic of Germany: B. Gallagher (Ambassador).

Great Britain: H. J. McCann (Ambassador), 17 Grosvenor Place, London, S.W. 1.

Italy: J. F. Shields (Ambassador).

Netherlands: J. W. Lennon (Ambassador).

Federation of Nigeria: E. L. Kennedy (Ambassador).

Norway: J. A. Belton (Minister).

Portugal: Count G. O'Kelly (Chargé d'Affaires).

Spain: T. J. Horan (Ambassador).

Sweden: J. A. Belton (Ambassador).

Switzerland: W. Warnock (Ambassador).

U.S.A.: T. J. Kiernan (Ambassador).

THE JUDICIARY

The Judiciary consists of Courts of First Instance and a Court of Final Appeal called the Supreme Court—*Cúirt Uachtarach*. The Courts of First Instance include a High Court—*Ard-Chúirt*—invested with full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction, with a right of appeal as determined by law. The High Court alone has original jurisdiction to entertain the question of the validity of any law having regard to the provisions of the Constitution. The Supreme Court has appellate jurisdiction from all decisions of the High Court, subject to exceptions and regulations prescribed by law. No law may, however, be enacted excepting the question of the validity of any law from the appellate jurisdiction of the Supreme Court.

Chief Justice, Hon. Cearbhaill Ó Dálaigh (Daly) £4,850

President of the High Court, Hon. Cahrl Davitt 3,700

Judges, Supreme Court, Hon. Cecil Lavery; Hon. T. C. Kingsmill Moore; Hon. Kevin Haugh each 3,700

Judges, High Court, Hon. F. G. O. Budd; Hon. R. McLoughlin; Hon. Thomas Teevan; Hon. George Murnaghan; Hon. Brian Walsh; Hon. Seán Kenny; Hon. Barra O'Brien (*ex officio*) each £3,250
Master of High Court, John O. Leary, S.C.,

DEFENCE

Under the direction of the President, and subject to the provisions of the Defence Act, 1954, the military command of the Defence Forces is exercisable by the Government through the Minister for Defence. To aid and counsel the Minister for Defence on all matters in relation to the business of the Department of Defence on which he may consult it, there is a Council of Defence consisting of the Parliamentary Secretary to the Minister, the Secretary of the Department of Defence, the Chief of Staff, the Adjutant-General and the Quartermaster-General. Establishments provide at present for a Permanent Defence Force of approximately 13,000 all ranks, including the Air Corps and the Naval Service. The Defence Estimates for the year ending March 31, 1963, provide for approximately 26,000 all ranks of the Reserve Defence Force. Recruitment is on a voluntary basis. Minimum term of enlistment for the Army is three years in the Permanent Defence Force with, in most cases, nine years in the Reserve Defence Force. Suitable men may complete twenty-one years service in the Permanent Defence Force. For the Naval Service, enlistment is for six years in the Permanent Defence Force and six years in the Reserve Defence Force. The Naval Service comprises three corvettes and three tenders. The Defence Estimates for the year ending March 31, 1963, provide for an expenditure of £8,848,100.

FINANCE

	1961-62 (Actual)	1962-63 (Estimated)
Revenue.....	£151,686,000	£162,952,000
Expenditure.....	176,250,000	187,624,000

The expenditure figures include certain services of a capital nature regarded as proper to be met from borrowing. Issues for these services in 1961-62 amounted to £23,856,000 and for 1962-63 are estimated at £24,672,000.

The estimated Revenue for 1962-63 includes: Customs £47,150,000; Excise, £37,025,000; Estate, etc., Duties, £2,850,000; Income Tax, Sur-tax and Super-tax, £34,363,000; Corporation Profits Tax, etc., £4,040,000; Motor Vehicle Duties, £7,150,000; Stamp Duties, £3,100,000; Post Office Services, £11,640,000.

The principal items of estimated Expenditure for 1962-63 are Debt Service, £34,879,000; Agriculture, land division, etc., £32,889,000; Army, £8,848,000; Police, £5,017,000; Education, £19,413,000; Social Insurance, £6,479,000; Social Assistance, £20,015,000; Health Services £10,634,000; Postal Services, £9,597,000; Superannuation, £7,193,000.

The Gross Debt on March 31, 1962, was £542,000,000 with Assets £289,000,000, leaving the net total of the debt at £253,000,000.

RELIGION (Census of 1946)

Catholics.....	2,786,033
Protestant Episcopalians.....	124,829
Presbyterians.....	23,870
Methodists.....	8,355
Others.....	12,020
Total.....	2,955,107

EDUCATION

Primary Education is directed by the State (4,880 schools with an enrolment of 490,016, and average daily attendance 87.3 per cent.). Secondary Education is in private hands and is largely conducted by Religious Orders (542 recognized schools with 80,400 pupils 12-20 years of age). Vocational (Continuation and Technical) Education is conducted by 38 local Committees in 289 permanent schools (excluding 12 residential school of domestic training and one day trades preparatory school) and a large number of temporary centres (27,150 whole-time day students and 64,927 other students). There are two Universities in Dublin, of which the National University has 3 constituent colleges (Dublin, Cork and Galway) with 566 Professors, etc., and 7,249 students; and Trinity College, Dublin with 216 Professors, etc., and 2,748 students in the academic year 1959-60. The estimated State expenditure on education in 1962-63, excluding administration and inspection, is Primary £12,239,000; Secondary £3,140,750; Vocational £2,001,390; Science and Art £287,170. The vote for Universities and Colleges for 1962-63 amounts to £1,780,830, while in addition grants of £238,284 are provided in respect of the Faculties of General Agricultural and Dairy Science.

PRODUCTION AND INDUSTRY

Agriculture and Live Stock.—In 1961 these were 1,081,000 acres under corn crops, 505,700 under root and green crops, 12,100 under fruit and 1,889,100 under hay, a total of 3,487,900 acres. The principal produce in 1961 was: oats, 375,400 tons; wheat, 462,500 tons; barley, 507,300 tons; turnips 2,079,900 tons; potatoes 2,111,100 tons; sugar beet, 877,800 tons; and hay 4,051,900 tons. The *Live Stock* included 4,713,300 cattle, 4,527,600 sheep, 1,056,400 pigs and 207,100 horses.

Minerals.—1,400 persons were employed in the coal mines in 1960 and 232,000 tons of coal won.

Sea Fisheries.—5,712 persons were employed in the fisheries in 1961, the total value of all fish (excluding salmon) landed being £1,357,000.

COMMUNICATIONS

Railways.—In the year ended March 31, 1961, there were 1,747 miles of railway all of standard (5 ft. 3 in.) gauge; 11,053,487 passengers and 2,510,382 tons of merchandise were conveyed; the receipts were £8,375,912 and expenditure £8,853,383. These figures are in respect of railway working by *Córas Iompair Éireann*, the national transport undertaking which is now the only concern operating a rail service in the State.

Road Motor Services.—In 1961 road motor vehicles carried 295,143,248 passengers, the gross receipts being approximately £6,571,821.

Shipping.—In 1961 the number of ships with cargoes and in ballast entered at the various ports, Dublin, Cobh (Queenstown), Dún Laoghaire (Kingstown), Whitgate, Cork, Waterford, Rosslare, Drogheda, Limerick, Galway, Foynes, Dundalk, etc., was 10,649 of 10,190,399 tons, of which 1,752 (1,385,692 tons) were Republic of Ireland flag, and 5,229 (5,792,225 tons) British.

CIVIL AVIATION

Shannon Airport, 15 miles W. of Limerick, is on the main transatlantic air route. In 1961 the airport handled 383,366 passengers, 23,660 tons of cargo and 4,076 tons of mail.

Dublin Airport, 6 miles N. of Dublin, serves the cross-channel and European services operated by the Irish national airline *Aer Lingus* and other air-

lines. During 1961 the airport handled 963,382 passengers, 15,772 tons of cargo and 1,732 tons of mail.

Licensed private aerodromes include: Weston, 9 miles W. of Dublin; Dunmore East, 10 miles S.E. of Waterford; Coonagh, 2 miles W. of Limerick; Oranmore, 5 miles E. of Galway; Killarney Racecourse, 1 mile S. of Killarney; Farmers' Cross, 4 miles S.W. of Cork; Rosapenna Strand, 16 miles N. of Letterkenny.

1961	261,271,468	180,285,894	- 80,985,574

PRINCIPAL ARTICLES

Imports (1961)

The principal groups were: food £31,815,873; machinery and electrical goods £31,611,038; vehicles £25,347,544; textiles (excluding clothing) £25,285,569; oils, fats, resins and gums £20,614,523; live animals £15,394,884; chemicals, perfumery, dyes and colours £14,162,003; non-metalliferous mine and quarry products £13,199,850; iron and steel £12,592,442; paper and cardboard £7,996,175; fertilizers £6,313,306.

Domestic Exports (1961)

Principally live animals £55,382,338; food £55,135,791; textiles (excluding clothing) £12,825,042; drink £7,418,055.

CAPITAL

Dublin (*Baile Atha Cliath*) is a City and County Borough on the River Liffey at the head of Dublin Bay. In April, 1961, its population was 535,488. There are many notable public buildings in the City, among them the two Cathedrals of Christ Church and St. Patrick, the Bank of Ireland (formerly the House of Parliament) and Trinity College (the only constituent College of the University of Dublin). University College is a constituent college of the National University of Ireland. A large export trade of agricultural products passes through the city and there is a considerable brewing industry, while there is an increasing amount of light manufacturing.

Other cities and towns are Cork (pop. 77,860), Dún Laoghaire, formerly Kingstown (47,803), Limerick (50,497), Waterford (28,138), Galway (21,989), Dundalk (19,706), Drogheda (17,071), Sligo (13,138), Wexford (10,002), Bray (11,680), Kilkenny (10,158), Tralee (10,714), Clonmel (10,614) and Athlone (9,624).

ARMS OF IRELAND

Azure a harp or stringed argenti.

FLAG

Equal vertical stripes of green, white and orange.

§1961	4,282,000	23.4	1,702,000	9.3

* Births based on 50 per cent. sample. § Estimated. Includes data for Alaska.

Note.—Figures tabulated are for the United States, including (from 1959) Alaska and (from 1960) Hawaii. Deaths exclude foetal deaths. Except for 1960, birth and death rates are based on the population as estimated on July 1, 1960 figures are based on the Census taken on April 1.

IMMIGRATION AND NATURALIZATION

From 1820 to 1961, 42,112,305 immigrants were admitted to the United States. Of those admitted in 1961, 22,717 were born in the United Kingdom; 29,048 in Germany; 1,735 in Austria; 6,067 in Scandinavia; 20,652 in Italy; 3,957 in

France; 1,466 in Hungary; 21,338 in Asia; 32,038 in Canada; and 41,632 in Mexico. The total number of immigrants admitted in 1961, was 271,344. 132,450 alien residents of the United States became naturalized citizens during that year.

MARRIAGE AND DIVORCE

Laws of marriage and of divorce are within the exclusive jurisdiction of each State. Each State legislature enacts its own laws prescribing rules and qualifications pertaining to marriage and its dissolutions.

Year	Marriages	Per 1,000 Pop.	Estimated Divorces	Per 1,000 Pop.
1952	1,539,000	9.9	392,000	2.5

* Includes immigrants to territorial possessions, etc.

† Total for 10 years to June 30, 1960.

National Origins of the Population

In 1960, of a total white population of 158,837,671, 5.9 per cent. were foreign born; of the total non-white population of 20,488,000, 2.2 per cent. were foreign born. 34,950,406 persons in the United States were of foreign stock, the countries of origin being:

Country	Number	Country	Number	Country	Number	Country	Number
United Kingdom... 2,884,651		France..... 351,681		Finland..... 240,827		Canada..... 3,181,051	
Elre..... 1,773,312		Germany..... 4,320,664		Roumania... 233,805		Mexico..... 1,735,992	
Norway..... 774,754		Poland..... 2,780,026		Greece..... 378,586		Other American Countries... 580,679

Switzerland... 263,054		Yugoslavia... 448,503		Asia..... 1,141,839			
		U.S.S.R..... 2,693,113					

Nineteen per cent. of the U.S. population are first or second generation Americans. Of the above, 9,738,143 persons were foreign born and 24,312,263 born in the United States with one or both parents foreign born. Third and subsequent generation Americans (native born of native parents) numbered 145,275,265 in 1960.

PHYSIOGRAPHY

The conterminous States of the Republic occupy nearly all that portion of the North American Continent between the Atlantic and Pacific Oceans, in latitude 25° 50'–49° 23' North and longitude 66° 57'–124° 44' West, its northern boundary being Canada and the southern boundary Mexico. The separate State of Alaska reaches a latitude of 71° 23' N., at Point Barrow, a distance of 2,504 miles from the geographic centre of the United States.

Its coast-line has an estimated length of about 3,651 miles on the Atlantic, 1,872 miles on the Pacific, 2,608 miles on the Gulf of Mexico, and 2,470 miles on the Great Lakes. The principal river is the mighty Mississippi-Missouri-Red Rock, traversing the whole country from north to south, and having a course of 3,860 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Platte, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, James, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follow:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri-Red Rock. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Appalachian Highlands, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense prairies. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, etc., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium, the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, mined chiefly in Colorado, California, Montana, Utah, and Idaho. The highest point is Mount McKinley (Alaska), 20,320 feet above sea level, and the lowest point of dry land is in Death Valley (Inyo, California), 282 feet below sea-level. The mean elevation of the United States is approximately 2,500 feet.

GOVERNMENT

The United States of America is a Federal Republic consisting of 50 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organization as Territories, and 30 were admitted after such organization), and of 1 organized Territory. Hawaii formally entered the Union as the 50th State on Aug. 21, 1959, from which date the flag of the United States has 13 stripes and 50 stars in 9 horizontal rows of six and five alternately.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to twenty-third Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 16, 1920, Aug. 26, 1920, Feb. 6, 1933, Dec. 5, 1933, Feb. 26, 1951 and March 29, 1961), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE

The Executive power is vested in a President, who is elected every four years, and is eligible for re-election to one additional term. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet in their respective States on the first Monday after the second Wednesday in December following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the sixth day of January by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the highest on the list (not

exceeding three) the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice President, who, on the death of the President, becomes President for the remainder of the term. Under the XXth Amendment to the Constitution the terms of the President and Vice President end at noon on the 20th day of January of the year in which such terms would have ended if the Amendment had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice President, a statute provides for the succession.

The President must be at least 35 years of age and a native citizen of the United States. He receives a taxable salary of \$100,000 with a taxable expense allowance of \$50,000 and a non-taxable travelling allowance of not exceeding \$40,000. Under the XXIIrd Amendment to the Constitution, the tenure of the Presidency is limited to two terms. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and has power, "by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT

President of the United States (January 20, 1961, to January 20, 1965), JOHN FITZGERALD KENNEDY, born May 29, 1917, sworn in as President (in succession to Dwight D. Eisenhower), January 20, 1961. Democrat.
Vice-President, Lyndon Baines Johnson, of Texas, born Aug. 27, 1908, elected Nov. 8, 1960. Democrat.

THE CABINET

(Each \$25,000)

Secretary of State, Dean Rusk, of New York (born Feb. 9, 1909), appointed Jan. 21, 1961.
Secretary of Treasury, Douglas Dillon, of New Jersey (born Aug. 21, 1909), appointed Jan. 21, 1961.
Secretary of Defence, Robert S. McNamara, of Michigan (born June 9, 1916), appointed Jan. 21, 1961.
Attorney-General, Robert F. Kennedy, of Massachusetts (born Nov. 20, 1925), appointed Jan. 21, 1961.
Postmaster-General, J. Edward Day, of California (born Oct. 11, 1914), appointed Jan. 21, 1961.
Secretary of Interior, Stewart L. Udall, of Arizona (born Jan. 31, 1920), appointed Jan. 21, 1961.
Secretary of Agriculture, Orville L. Freeman, of Minnesota (born May 9, 1918), appointed Jan. 21, 1961.
Secretary of Commerce, Luther H. Hodges, of N. Carolina (born Mar. 8, 1898), appointed Jan. 21, 1961.
Secretary of Labour, W. Willard Wirtz, of Ohio (born Mar. 14, 1912), appointed Aug. 30, 1962.
Secretary of Health, Education and Welfare, Anthony J. Celebrezze, of Ohio (born Sept. 4, 1910), appointed July 31, 1962.

THE CONGRESS

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a veto power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 301,154. The Senate consist of 100 members. The salary of a Senator is \$22,500 per annum, with mileage at 20 cents per mile each session. The House of Representatives consists of 437 Representatives (435 from Nov. 6, 1962), and a resident commissioner from Puerto Rico. The salary of a Representative is \$22,500 per annum with mileage as for Senators. By the XIXth Amendment, sex is no disqualification for the franchise. On July 1, 1950, there were 47,860,228 men and 49,556,137 women of voting age, excluding members of the armed forces overseas.

THE EIGHTY-SEVENTH CONGRESS

Noon of Jan. 3, 1961, to Noon of Jan. 3, 1963.*
President of the Senate, Lyndon B. Johnson,
Texas..... \$30,000
Speaker of the House of Representatives,
John W. McCormack, Mass..... \$30,000
Secretary of the Senate, Feiton M. Johnston,
Miss.
Clerk of the House of Representatives, Ralph R.
Roberts, Ind.

Members of the 87th Congress were elected on Nov. 8, 1960.

The 87th Congress is constituted as follows:

Senate.—Democrats, 64; Republicans, 36. Total, 100.

House of Representatives.—Democrats, 263; Republicans, 174. Total 437.

* Legislation to permit the appointment of a different day was in progress during the 87th Congress.

CAPITAL OF THE U.S.

In 1790 Congress ratified the cession of 100 sq. miles by the States of Maryland and Virginia as a site for a Federal City to be the national capital of the United States. In 1791 it was decided to name the capital *Washington* and in 1793 the foundation-stone of the Capitol building was laid. In 1800 the seat of government was removed to Washington, which was chartered as a city in 1802. In 1846 the Virginia portion was retroceded and the present area of the *District of Columbia* (with which the City of Washington is considered co-extensive) is 69,245 square miles, with a population at the Census of 1960 of 763,956.

The District of Columbia is ruled directly by the President and Congress through a Board of Commissioners appointed by the President.

The City of Washington, the Capital of the United States, is considered co-extensive with the District of Columbia. It is situated on the west central edge of Maryland, opposite the State of Virginia, on the left bank of the Potomac at its confluence with the Anacostia, 107 miles from Chesapeake Bay and 186 from the Atlantic Ocean.

THE JUDICATURE

The *Federal Judiciary* consists of three sets of Federal Courts: (1) The *Supreme Court* at Washington, D.C., consisting of a Chief Justice and eight Associate Justices, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts and from the decisions of the highest Courts of the States. (2) The *United States Courts of Appeals*, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The 93 *District Courts*, served by 199 District Court Judges.

THE SUPREME COURT

(U.S. Supreme Court Building, Washington, D.C.)
Chief Justice, Earl Warren, Cal., born March 19, 1891, appointed Sept. 30, 1953..... \$35,500

Associate Justices (each \$35,000)

Name.	Born.	Apptd.
Hugo L. Black, Ala.	1886	1937
Wm. O. Douglas, Conn.	1898	1939
Tom C. Clark, Texas	1899	1949
John M. Harlan, N.Y.	1899	1955
William J. Brennan, Jr., N.J.	1906	1956
Potter Stewart, Ohio	1915	1958
Byron R. White, Colo.	1917	1962
Arthur J. Goldberg, Ill.	1908	1962

Supreme Court Officers.

Clerk, John F. Davis.
Chief Deputy Clerk, Edmund P. Cullinan.
Marshal, T. Perry Lippitt.
Reporter of Decisions, Walter Wyatt.
Librarian, Helen Newman.

CRIMINAL STATISTICS, U.S.

(Crime Index, 1958)

Crime	No. of Offences	
	1959	1960
Murder.....	8,589	9,140
Rape.....	15,160	15,560
Robbery.....	75,200	88,970
Aggravated Assault.....	123,590	130,230
Burglary.....	698,300	821,100
Larceny (\$50 and over)....	415,800	474,900
Thefts of Automobiles.....	293,800	321,400
Total.....	1,630,430	1,861,300

DEFENCE

Department of Defence.

Secretary of Defence (in the Cabinet), Robert S. McNamara (Jan. 21, 1961).
Secretary of the Army (not in the Cabinet), Cyrus R. Vance.
Secretary of the Navy (not in the Cabinet), Fred Korth.
Secretary of the Air Force (not in the Cabinet), Eugene Zuchert.

The Defence Reorganization Act, making important changes in the organization of the United States armed forces, came into effect on Jan. 1, 1959. It provided for unified command of the three services and their central control by the Defence Department, which also became responsible for research and development of new weapons. The Secretary of each service, Army, Navy and Air Force, became responsible to the Secretary of Defence for the operation and efficiency of his department. Existing practice by which service chiefs and individual departments might approach Congress on their own initiative was, however,

continued. The Secretary of Defence assumed powers under the Act to abolish, merge or transfer functions of the individual services, provision being made for proposals of this kind to be laid before Congress and the Senate for thirty days, with the possibility of a veto if objections were raised.

Unified Defence Commands

U.S. European Command, Paris.—Cdr., Gen. Lyman L. Lemnitzer (concurrently NATO Supreme Allied Commander).
Caribbean, Panama Canal Zone.—Cdr., Lt.-Gen. Andrew P. O'Meara (U.S. Army).
Atlantic, Norfolk, Virginia.—Cdr., Adm. Robert L. Dennison (U.S. Navy) (concurrently NATO Supreme Allied Commander, Atlantic).
Pacific, Hawaii.—Cdr., Adm. Harry D. Felt (U.S. Navy).
E. Atlantic and Mediterranean, London.—Cdr., Adm. Harold P. Smith (U.S. Navy).
Continental Air Defence Command, Colorado Springs.—Cdr., Lt.-Gen. John K. Gerhart (U.S.A.F.).
Strategic Air Command, Omaha.—Cdr., Gen. Thomas S. Power (U.S.A.F.).
Alaska Command, Anchorage, Alaska.—Cdr., Lt.-Gen. G. W. Mundy (U.S.A.F.).

Army.—The Army of U.S. had a strength of 8,291,336 on V.E. Day, reduced by June 30, 1959, to 591,700 (excluding Air Corps). The strength on April 30, 1962, was 1,080,847. Stationed in Europe were five divisions and other large combat elements of less than division size. There were two divisions in Korea and one in Hawaii. Strong combat units were on duty in the Caribbean area and in Alaska and units of approximately brigade strength were in Italy. The need for flexibility in combined-arms forces capable of rapid deployment to areas threatened by aggression prompted the inclusion of the Strategic Army Corps (STRAC) in a new unified command, the U.S. Strike Force. Some 5,600 fixed-wing and helicopter aircraft were in Army service, including helicopters of observation, utility and transport types. First quantity production of the Chinook helicopter, a transport type, was ordered in 1961. Under a 10-year modernization programme, the Army expects to reduce the number of aircraft models in service, but the number of Army aircraft is to rise to about 8,000 by 1970.

Navy.—The peak strength of the Navy (including Marine Corps) in the summer of 1945 was 3,855,497. The strength on April 20, 1962, was 670,412. Strength of the Marine Corps, 189,891.

The U.S. Navy had in service in June, 1962, approximately 900 vessels including attack carriers (16), anti-submarine carriers (10), cruiser types (13), destroyer types (238), command ship (1), submarines, including 25 nuclear submarines (9 of the *Polaris* type) (118), minelayers (84), patrol craft (70), amphibians (130) and auxiliaries (218).

Naval construction authorized for the 1962 programme included 13 nuclear-powered submarines (10 to carry *Polaris* missiles), 7 guided-missile frigates (1 nuclear-powered), 3 escort ships, 3 guided missile escort ships, an amphibious assault ship, 3 amphibious transports and several other special task and research vessels. Further supply of *Bullpup*, *Sidewinder* and *Sparrow* air-launched missiles and of *Tartar*, *Terrier* and *Talos* surface-to-air missiles was also authorized. The *Bullpup* missile, a radio-guided missile, carries a conventional warhead at supersonic speed and has a range of over 15,000 feet. Guided missile capability has been greatly increased with approximately 100 ships either fitted with or scheduled to receive the *Tartar*, *Terrier*, or *Talos* missile system and 41 *Polaris*-firing submarines either built or authorized

The five *Regulus*-firing submarines, one of which is nuclear powered, remain operational in the fleet. The first amphibious assault ship specially designed for helicopter transportation, the *Iwo Jima* was brought into service in 1961. It can carry 2,000 troops and 20 large transport helicopters. A nuclear-powered cruiser, *Long Beach*, was also commissioned.

Air.—The U.S. Air Force was formerly the Army Air Corps and directly under command of the War Department. In 1947 an independent Department of the Air Force was established under a Secretary of the Air Force. The Navy and Marine Corps retained separate air organizations. Strength of the Air Force (March 31, 1962), 888,737.

In 1961, the Air Force assumed new and significant responsibilities in the field of military space systems and its requirements for both manned and unmanned weapons were extended. Early in the year provision was made to increase production capacity for the *Minuteman* missile. The proportion of the strategic bomber force maintained

on a 15-minute ground alert was raised from one-third to one-half. Steps were also taken to strengthen the air defence command and control systems.

A new command, the Air Force Communications Service, was established to operate and maintain inter-base communications and flight and air traffic control. The initial strength of the Command was 30,000.

The B-52H bomber, equipped with turbo-fan engines which give a range of over 9,000 miles, was flown for the first time in March, 1961, in preparation for supply to the Strategic Air Command. Extensive testing of the intercontinental ballistic missiles, *Atlas*, *Titan* and *Minuteman*, was conducted during the year and system improvement proved successful. In the initial test flight of the X-15 experimental rocket plane, equipped with a 57,000 lb. thrust rocket engine, a speed of 2,905 m.p.h. was attained at 77,000 feet in a powered flight of 2 minutes 5 secs. Later X-15 flights attained a top speed of 3,920 m.p.h. and an altitude record of 217,000 feet.

FINANCE

PUBLIC DEBT

On June 30, 1961, the *Federal Public Debt* of the United States stood at \$288,971,000,000; the level at the end of the fiscal year 1960 was \$286,331,000,000.

COST OF LIVING IN U.S.A.

The Consumer Price Index (for city wage-earner and clerical worker families in 46 cities representative of all cities in the United States) showed a monthly average during the calendar year 1961 of 104.2 (the basic figure of 100 being the 1957-59 average). The average of consumer prices for the first four months of 1962 was:

January, 104.5, February, 104.8, March, 105.0 and April, 105.2.

According to figures prepared by the Bureau of Labour Statistics, the index of consumer prices (all items) rose from 103.8 to 104.5 during the calendar year 1961, displaying price stability. In the year to April, 1962, transportation rose from 106.0 to 107.2. Food rose from 102.5 to 103.4; medical care from 112.6 to 113.9; personal care from 105.6 to 106.3; apparel from 101.8 to 102.7; rent from 105.1 to 105.4; and reading and recreation from 108.5 to 109.4. During the first four months of 1962, the consumer price index for transportation rose from 106.0 to 107.2, and all other major groups increased.

The wholesale price index of all commodities showed a monthly average during 1959 of 100.6 (the average for the years 1957-59=100). The monthly average fell to 100.3 in 1961 and fell to 100.2 in May, 1962. Wholesale prices for farm products fell from 97.2 in 1959 to 96.9 in 1960, and remained steady at 96.9 in April, 1962. Industrial prices fell from 101.3 in 1960 to 100.8 in 1961, and rose to 100.9 in April, 1962.

PERSONAL INCOMES IN U.S.A.

Personal incomes in the United States rose from \$383.3 billion in 1959 to \$402.2 billion in 1960 and further to \$416.7 billion in 1961. In the year 1961, labour income rose by \$11.8 billion, business and

professional income by \$1.4 billion and personal interest income by \$1.4 billion. Non-agricultural personal income rose by \$26.8 billion. Farm proprietors' income rose by \$0.7 billion. Other main groups of personal income rose slightly. Preliminary estimates for May, 1962 (seasonally adjusted annual rate) showed personal income at \$440.0 billion, an increase of \$23.3 billion over the 1961 level. Labour income rose from \$290.8 billion in 1961 to \$310.5 billion in May, 1962, an increase of \$19.7 billion. Transfer payments rose from \$32.9 billion in 1961 to \$33.7 billion in May, 1962, business and professional incomes rose from \$36.5 billion in 1961 to \$38.0 billion in May, 1962, and personal interest income rose from \$27.3 billion in 1961 to \$29.3 billion in May, 1962.

PRODUCTION

AGRICULTURE AND LIVE STOCK

Agriculture.—The total land surface, excluding island possessions and Alaska, is 1,901,680,000 acres of which about 59 per cent. is in farms. The total number of farms in 1959 (1959 Census of Agriculture) was 3,703,642. The cash income from crops in 1956 was \$14,252,000,000; in 1957, \$12,461,000,000; in 1958, \$14,182,000,000; in 1959, \$14,656,000,000; in 1960, \$15,103,000,000; and in 1961, \$15,836,000,000. Cash income from livestock and livestock products in 1956, \$16,312,000,000; in 1957, \$17,363,000,000; in 1958, \$19,223,000,000; in 1959, \$18,856,000,000; in 1960, \$18,909,000,000 and in 1961, \$19,416,000,000.

Acreege reductions in major crops, particularly feed grains, prevented the 1961 total crop production from reaching record proportions. The all-crop production Index at 119 (1947-49=100) was 2 per cent. below 1960, but exceeded all previous years. The composite yield per acre Index for 1961 was 147 (1947-49=100), a new record and more than 2 per cent. above 1960. Acreege planted or grown for the 59 major crops totalled 310,000,000 acres, 4.5 per cent. less than in 1960 and the smallest planted acreege since 1912.

Live Stock on Farms, Jan. 1.

	1960	1961	1962
All cattle . . .	96,236,000	97,319,000	99,500,000
Cows	19,527,000	19,342,000	19,215,000
Hogs	59,006,000	55,443,000	56,982,000
Sheep	33,170,000	32,967,000	31,446,000
Stock Sheep	28,819,000	28,555,000	27,281,000
Chickens . . .	369,484,000	360,576,000	365,477,000
Turkeys . . .	5,633,000	6,772,000	6,352,000

The index of livestock and poultry numbers on farms and ranches on January 1, 1962, was 2 per cent. higher than a year earlier.

MINERALS

The value of mineral production in continental United States in 1961 totalled an estimated \$18 billion. The comparable value for 1960 was \$17.9 billion and for 1959 was \$17.2 billion.

Nearly 71 per cent. of the mineral production of the United States (in value) consists of fuels. In 1961 U.S. production of crude petroleum amounted to 2,620 million barrels, about 45,000,000 barrels more than in 1960.

Bituminous coal and lignite produced in 1961 totalled 400 million tons, 16,000,000 tons less than

MAJOR INDUSTRY GROUPS, 1960 (Adjusted)

Group	No. of Employees	Payroll	Value added by Manufacture
Food and kindred products	1,712,939	\$8,268,704,000	\$19,660,542,000
Tobacco products	82,500	319,386,000	1,545,009,000
Textile mill products	901,530	3,216,012,000	5,613,457,000
Apparel and related products	1,223,019	3,827,506,000	6,681,583,000
Lumber and wood products	595,969	2,151,516,000	3,457,555,000
Furniture and fixtures	364,602	1,529,808,000	2,618,501,000
Paper and allied products	580,236	3,120,332,000	6,568,545,000
Printing and publishing	908,314	5,064,435,000	9,262,335,000
Chemicals and allied products	722,450	4,420,527,000	14,380,033,000

Instruments	333,844	1,976,154,000	3,763,074,000
Miscellaneous manufacturing	588,174	3,122,574,000	5,273,331,000
Administrative and auxiliary	602,048	4,467,895,000	—
Total	16,726,109	\$88,015,133,000	\$163,230,807,000

in 1960. The average value of soft coal at the mine was estimated at \$4.65 a ton, compared with \$4.69 in 1960.

MANUFACTURES

The leading five States according to value added by manufacture (adjusted) for the 1959 Annual Survey were: New York (\$17,522,976,000), Ohio (\$13,850,502,000), California (\$13,589,103,000), Illinois (\$12,869,163,000), and Pennsylvania (\$12,643,651,000).

The average number of employees in 1959 for the United States as a whole was 16,670,794, salaries and wages totalling \$85,746,060,000. The value added by manufacture (value of output less cost of materials and supplies, plus value created by merchandising operations, etc.) was \$161,220,288,000.

LABOUR IN THE UNITED STATES

Organized Labour.—On December 5, 1955, the American Federation of Labour (AFL), founded in 1881, and the Congress of Industrial Organizations (CIO), formerly established in 1938, merged into an organization called the American Federation of Labour and Congress of Industrial Organizations. The combined membership is now 15,072,000 (including 927,000 members in Canada). There are also 3,045,000 members of unions not affiliated to the AFL-CIO.

Approximately one-third of the non-agricultural labour force of the United States is estimated to be organized.

Work Stoppages.—There were 3,367 stoppages recorded in 1961, involving 1,450,000 workers. There were 16,300,000 man-days of idleness, representing 0.14 per cent. of estimated working time of all workers.

Employment and Unemployment.—The civilian labour force (working population) was 71,922,000 in May, 1962. This includes self-employed, wage and salary-earners, and unpaid family workers, employed and unemployed. Unemployment was estimated at 3,719,000 (5.2 per cent.). In addition there were 2,032,000 temporarily stopped, and 12,657,000 working fewer than 35 hours a week.

Wages

	Average Weekly Earnings	Hours Per Week	Average Hourly Earnings
March 1962			
Manufacturing.....	\$65.91	40.3	\$2.38
Durable.....	104.45	40.8	2.56
Non-durable.....	85.32	39.5	2.16
Coal Mining.....	117.69	37.6	3.13

Building construction	118.05	36.1	3.27
Gas, Electricity and Sanitary Services...	115.34	40.9	2.82
Wholesale trade.....	95.18	40.5	2.35
Retail trade.....	65.39	37.8	1.73
(except eating and drinking places)			
Laundries, cleaning and dyeing plants.....	49.41	38.6	1.28

In March, 1961, gross average weekly earnings by industry ranged from \$156.35 per week in electrical work to \$42.01 in the manufacture of workshirts (35.6 hours and \$1.18 average hourly earnings). The average for all manufacturing was \$90.71, almost a four-fold increase since 1939 but in terms of 1947-49 purchasing power, the increase was 1½ times.

On Sept. 3, 1961, the minimum wage set by federal law became \$1.15 an hour for employees engaged in interstate commerce or in the production of goods for interstate commerce, or in activities

closely related and directly essential to such production. The law requires at least time and a half of an employee's regular rate of pay for all hours over 40 a week. From September 3, 1963, the minimum wage for these employees becomes \$1.25 an hour.

Other employees employed in certain large enterprises having some employees engaged in commerce or the production of goods for commerce, on September 3, 1961, became entitled to a minimum wage of \$1.00 an hour. Overtime premium pay will not become due to these workers until September 3, 1963, and then only after 44 hours in a week. The minimum wage and overtime premium pay for these employees will gradually be changed until on September 3, 1965, all employees to whom the law applies will have a minimum wage of \$1.25 an hour and overtime premium pay after 40 hours in a week.

There are certain exemptions from these monetary requirements in specific occupations and industries.

In addition to cash wages, most workers receive some type of "fringe" benefits—the most common forms being paid vacations, and public holidays, various types of insurance and health fund; financed by the employer or by employer and employees jointly.

RECLAMATION

Bureau of Reclamation, Department of the Interior, Interior Building, 18th and 19th Streets (between C and E streets), N.W., Washington, D.C. *Commissioner*, Floyd E. Dominy.

The Bureau of Reclamation constructs and operates irrigation, power and other multiple-purpose projects in the area west of the 97th meridian. It is the Federal agency with principal responsibility for water conservation in this region. Over 8 million acres of lands in the arid and semi-arid west can be irrigated by works constructed by the Bureau. In June, 1962, the Bureau had in operation, under construction or authorized, 135 irrigation and multiple-purpose projects. Among them are the multi-State Missouri River Basin Project; the Central Valley Project, California; the Columbia Basin Project, Washington State and the Fryingpan-Arkansas Project, Colorado, which will divert water from the western to the eastern slope of the Continental Divide.

Work is well advanced on the billion-dollar Colorado River Storage Project and participating projects which will aid economic expansion in 5 Western States—Colorado, Utah, Wyoming, Arizona, and New Mexico. The 408-foot-high *Navajo Dam*, on the San Juan River in New Mexico, was dedicated on Sept. 15, 1962. Other CRSP units are Glen Canyon, Flaming Gorge, and Curecanti storage units, and the Transmission Division. Work is also proceeding or completed on 7 of the participating projects which will benefit from storage of water in the main units.

Major dams on which the Bureau began construction in 1962 included; Yellowtail Dam, to be 520 feet high, on the Big Horn River in Montana; Sanford Dam, to be 200 feet high and 6,390 feet long, on the Canadian River in Texas; Norman Dam, to be 100 feet high and 7,220 feet long, on the Little River in Oklahoma; Cheney Dam, to be about 86 feet high and over 4.5 miles long, on the North Fork of the Neenesah River in Kansas; and Norton Dam, to be 100 feet high and 6,450 feet long, on Prairie Dog Creek in Kansas.

The total value of crops grown on all reclamation projects in 1961 was \$1,114,876,461. Cumulative value of all reclamation harvests since 1902 exceeded \$17.6 billion.

Grand Coulee Dam, on the Columbia River in the State of Washington, is the largest concrete structure in the world by volume (10,585,000 cubic yards). Its installed hydro-electric power plant capacity is 1,974,000 kW.

Hoover Dam (Arizona and Nevada), on the Colorado River, is the highest dam in the United States (726 ft.), and has an operating power plant with a capacity of 1,344,800 kW.

Shasta Dam (602 ft. high), on the Sacramento River in California, is a major feature of the Central

Valley project. It was completed in 1945, and the power plant has a rated capacity of 379,000 kW.

Hungry Horse Dam, completed in 1953, on the Flathead River in Montana, is 564 feet high and has a power capacity of 285,000 kW.

Trinity Dam, also a major feature of the Central Valley Project, is on the Trinity River in California. Completed in 1961, it is the world's highest earth dam at 537 feet, and will have an installed power capacity of 100,000 kW when the powerplant is completed.

EXTERNAL TRADE OF THE UNITED STATES

Figures for all periods shown have been adjusted to include imports of uranium ore and exports of uranium and other nuclear fuels.

Year	General Imports	Total Exports and Re-exports	Excess of Non-Imports Exports over Imports
1955.....	\$11,491,000,000	\$15,550,000,000	+ \$2,803,000,000

ROADS

In 1960 there were 3,545,693 miles of roads and streets in the United States, of which 3,116,125 miles were in rural areas and 429,568 miles were in urban areas. Surfaced roads and streets account for 2,556,970 miles of the total; 988,723 miles are unimproved and graded and drained. State primary roads, including extensions in urban areas, total 444,194 miles (439,992 surfaced). Other roads under State control total 264,860 miles (227,222 surfaced); 2,724,727 miles are under local control (1,862,368 surfaced); and 111,912 miles (27,388 surfaced) are under Federal control (in National forests and parks).

An estimated total of \$10,614,000,000 was spent in 1961 for roads and streets in the United States. Of this total \$6,915,000,000 was spent for State highways, \$1,783,000,000 was spent for county and local rural roads, \$1,738,000,000 was spent for city streets, and \$178,000,000 was spent on roads in Federal areas. Capital outlay accounted for 62.7 per cent. of the total expenditure; 25.4 per cent. was spent for maintenance; 4.7 per cent. for administration; 3.2 per cent. for highway police and safety; and 4 per cent. for interest on highway bonds.

*Motor Vehicles and Taxation**.—The number of motor vehicles registered in 1961 in the United States was 75,846,532, an increase of 2.8 per cent. over the 1960 total of 73,768,865. In 1941 the registrations in the U.S.A. were 34,894,134. The State Governments received \$1,468,554,000 in 1941 and \$5,509,512,000 in 1961, respectively, from motor-fuel, motor-vehicle and motor-carrier taxes. In 1961 the Federal Government received \$4,340,441,000 from excise taxes on motor vehicles

and parts, tyres and tubes, gasoline, diesel and special fuels and lubricating oil.

Accidents.—In 1960 there were 38,200 deaths caused by motor vehicle accidents. The death rate per 100,000,000 miles of travel was 5.3 in 1960, compared with 5.4 in 1959.

SHIPPING

The active ocean-going Merchant Marine of the U.S. on June 1, 1962, consisted of 908 vessels of 1,000 gross tons and over, of which 880 were privately owned and 28 were government-owned ships under charter or general agency agreement with private companies. There were 1,861 government-owned vessels in the reserve fleets. Of the active vessels, 573 were dry cargo ships, 29 were combination passenger and cargo and 278 were tankers.

AIR TRANSPORT

United States domestic and international scheduled airlines in 1961 were estimated to have carried 58,441,000 passengers over 39,827,000,000 passenger miles, over half of which were flown in jets. The freight flown by the scheduled airliners during 1961 totalled 732,946,000 ton-miles, and express 61,167,000 ton-miles. In addition, the airliners flew 299,216,000 ton-miles of mail, an increase of 24.4 per cent. over 1960.

Total operating revenues of all U.S. scheduled airlines reached the record figure of \$3,073,292,000 in 1961, an increase of 6.5 per cent. over 1960. Similarly, total operating expenses rose to a record high total of \$3,016,537,000 last year, or 7.45 per cent. more than the previous year. The net operating income (i.e. before deduction of taxes, interest, etc.) was \$56,755,000, a decrease of 26.76 per cent. from the previous year, resulting in a loss of \$36,887,000 compared with a profit of \$8,604,000 in 1960.

Nine principal classes of commercial air carriers can be distinguished in the United States, (a) The Domestic Trunk Lines (11); (b) Local Service Lines, operating the low-density traffic routes between the smaller traffic centres and between small and large centres (13); (c) The International and Territorial Group, including all U.S. flag air carriers authorized to operate between the U.S.A. and foreign countries, between foreign countries and into Mexico, the Caribbean and to Alaska and Hawaii (18); (d) Intra-Hawaiian Air Carriers, operating in Hawaii (2); (e) Intra-Alaskan Carriers, providing service within Alaska (12); other classes are (f) Certified All Cargo Lines (6); (g) Helicopter Operators (3); (h) Supplemental transport carriers (29); and (i) air freight forwarders (75) and air taxi operators, of which there are 2,618 authorized.

In 1961, 171,610 persons were employed by the domestic and international airlines, 2.4 per cent. more than in 1960.

EDUCATION

State School Systems

Almost every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 16 years of age, and those from 14 to 16 must attend school or be lawfully employed. In the States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

In 1961-62 the total number of children in the United States of 5 to 17 years of age was 45,132,000, of whom 38,633,000 were enrolled in public elementary and secondary schools. The average daily attendance in the public schools was 34,518,000, the average length of school term was estimated at 178 days, and the average number of days attended by each pupil enrolled at 160. In 1961-62, 1,454,000 teachers were employed. The average annual salary of all teachers was \$5,527.

The total revenue receipts for school purposes, excluding balances on hand, was about \$16,646,781,000. Of this amount, about \$68,634,000 was received from Federal sources, \$6,700,585,000 from State sources and \$9,337,562,000 from county and local sources. Current expenditure was \$14,568,255,000. \$2,953,999,000 was expended for sites, buildings, furniture and equipment and \$553,031,000 for interest.

Institutions of Higher Education

In the autumn of 1961 enrolment in institutions of higher education numbered 3,891,000.

Institutions of higher education include universities, colleges, professional schools, teachers' colleges and normal schools, and junior colleges. The 1961 survey of enrolments covered 1,985 institutions classified as follows: 1,458 universities, colleges and professional schools enrolling 3,370,000 students; and 527 junior colleges enrolling 521,000 students. There are 105 institutions of higher education attended predominantly by Negroes, enrolling 101,000 students included in the foregoing figures.

During the school year 1959-60, 394,889 bachelor's degrees were conferred, 255,504 to men and 139,385 to women; 74,497 masters' degrees, 50,937 to men and 23,560 to women; and 9,829 doctorates, 8,801 to men and 1,028 to women. Education, Business and Commerce, and Engineering, were, in that order, the fields in which most students received baccalaureate degrees. There were 90,179 bachelor's degrees in Education, 51,522 in Business and Commerce, and 37,808 in Engineering. The three leading fields of study for the master's degree were Education (33,512), Engineering (7,159) and Business and Commerce (4,643). The most popular fields of study on the doctorate level were Education (1,590), Chemistry (1,048) and Engineering (786).

Particulars of some of the Universities are: Harvard (11,677 students, including 342 women in 1961), founded at Cambridge, Mass., on Oct. 28, 1636, and named after John Harvard of Emmanuel College, Cambridge, England, who bequeathed to it his library and a sum of money in 1638; Yale (8,270 students, including 659 women, in 1961), founded at New Haven, Connecticut, in 1701; Bowdoin, Brunswick, Me. (founded 1794) (837 men); Brown, Providence, R.I. (founded 1764; 4,128 students, including 1,130 women, in 1961); Columbia, New York, N.Y. (founded 1754; 23,500 students, including 9,200 women, in 1961); Cornell (founded at Ithaca, N.Y., 1865; 11,889 students, including 2,879 women, in 1961); Dartmouth, Hanover, N.H. (founded 1769, 3,304

students including 6 women in 1961); Georgetown, Washington, D.C. (founded 1789; 6,269 students, including 1,016 women, in 1961); North Carolina. Chapel Hill, N.C. (founded in 1789; 10,021 students including 2,272 women, in 1961); Pennsylvania, Philadelphia, Pa. (founded 1740; 18,194 students, including 5,105 women, in 1961); Pittsburgh, Pittsburgh, Pa. (founded 1787; 13,623 students, including 3,968 women in 1961); Princeton, Princeton N.J. (founded 1746; 3,973 men); Tennessee, Knoxville, Tenn. (founded 1794; 13,457 students, including 4,086 women, in 1961); William and Mary, Williamsburg, Va. (founded 1693; 4,430 students, including 1,935 women, in 1961); New York University, founded in 1831 at New York, had 32,475 students, including 8,281 women, in 1961.

Private Schools and Colleges

In 1961-62 it was estimated that there were about 5,300,000 pupils in private kindergarten and elementary schools, 1,200,000 pupils in private high schools and academies and 1,540,000 students in privately controlled institutions of higher education. In addition there were some 21,000 pupils enrolled in privately controlled elementary and secondary schools for exceptional children.

WEIGHTS, MEASURES AND CURRENCY

The *Weights and Measures* in the United States in common use are of British origin and in the case of weights and linear units correspond in large part with those now employed in Great Britain. The *short ton* of 2,000 pounds (20 hundred weight of 100 pounds each) is generally used instead of the *long ton* of 2,240 pounds. The old "Winchester" bushel and the wine gallon and their subdivisions are used instead of the British Imperial units of capacity; 1 U.S. bushel = 0.9689 British bushel, and 1 U.S. gallon = 0.83267 British gallon. The U.S. *liquid quart* is divided into 32 fluid ounces. The Metric System of Weights and Measures is permissive, but is not extensively used except in scientific and pharmaceutical work. The unit of currency is the *dollar* of 100 *cents*. The rate of exchange with sterling will be found on p. 84.

INDIAN POPULATION

On October 1, 1961, the estimated Indian population of the United States exclusive of Alaska, was 552,000. This includes 14,400 persons of Indian blood among the 43,000 natives of Alaska. There are many persons of Indian blood who are not enrolled with any recognized tribe, have no rights in tribal property, and receive no services from the Government. The States with the largest estimated number of Indians still residing in reservation areas and receiving some services from the Government are: Arizona, 83,387; Oklahoma, 64,689; New Mexico, 56,225; South Dakota, 25,794; Montana, 21,181.

* Re-elected Nov. 6, 1956. † Died in office. § Assassinated. (a) Elected as Vice-President.

‡ Re-elected Nov. 5, 1940, the first case of a third term; re-elected for a fourth term Nov. 7, 1944.

TERRITORIES AND PRINCIPAL ISLAND POSSESSIONS OF THE UNITED STATES

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise: Palmyra Island; Kingman Reef (about 1 sq. mile); Johnston (or Cornwallis) Island and Sand Island (about 1 sq. mile in all); Canton and Enderbury Islands (jointly administered with Great Britain); Midway Islands; Wake Island; Guam; Howland, Baker and Jarvis Islands (about 3 sq. miles in all); American Samoa (including the island of Tutuila, the Manua Islands, and all other Islands of the Samoan group east of longitude 171° west of Greenwich together with Swains Island); the Commonwealth of Puerto Rico; the Virgin Islands of the United States, and Navassa Island (2 sq. miles).

The Canal Zone is under the jurisdiction of the United States.

The Trust Territory of the Pacific Islands is under the jurisdiction of the United States pursuant to a trusteeship agreement between the U.S. Government and the Security Council of the United Nations. It consists of the Mariana (except Guam), Caroline and Marshall Islands, with a land area of 687 square miles and a population of 77,913 in 1961. Nine individual languages are spoken in the Territory. Copra is the principal export of importance.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently embodied in Sections 5570-5578 of the Revised Statutes, are considered as appertaining to the United States. Responsibility for territorial affairs generally is centred in the Office of Territories, Dept. of the Interior, Washington, D.C.

CANTON AND ENDERBURY

Under the Anglo-American Pact of Aug. 10, 1928, Canton and Enderbury (of the Phoenix Island Group in the Central Pacific) were declared to be for the common use of Gt. Britain and U.S.A. for aviation and communications. The islands, which are about midway between Hawaii and Australia, extend to a total of 27 sq. miles with a population of 391 in 1962.

On April 6, 1939, the U.S. and Great Britain agreed to set up a joint regime for Canton and Enderbury Islands. Provision for the joint control of these islands was made by exchange of notes between the two Governments on April 6, 1939.

GUAM

Guam, the largest of the Ladrones or Mariana Islands in the North Pacific Ocean, lies in 13° 26' N. lat. and 144° 39' E. long., at a distance of about 1,506 miles east of Manila. The area of the island is estimated at 209 square miles, with a population of 67,044 at the 1960 Census. The Guamanians are of Chamorro stock mingled with Filipino and Spanish blood. The Chamorro language belongs to the Malayo-Polynesian family, but has had considerable admixture of Spanish. English is the language used throughout the island, although Chamorro is also used in Guamanian homes.

Guam was occupied by Japanese in Dec., 1941, but was recaptured and occupied throughout by U.S. forces before the end of August, 1944. Under the Organic Act of Guam of August 1, 1950 (Public Law 630 of the 81st Congress), Guam has

statutory powers of self-government, and Guamanians are United States citizens. A governor is appointed for a four-year term. A 21-member unicameral legislature is elected biennially. There is also a District Court of Guam, with original jurisdiction in cases under federal law.

Governor, William P. Daniel.

Secretary, Manuel F. Leon Guerrero.

CAPITAL, Agaña. Port of entry, Ψ Apra.

WAKE AND MIDWAY ISLANDS

Wake Island, annexed in 1898, has an area of about 3 sq. miles and lies in the N. Pacific about 2,300 miles from Hawaii on the direct route to Hong Kong. *Wake Island* was occupied by Japanese Dec. 27, 1941; it was re-occupied by U.S. on Sept. 15, 1945. Population (1960), 1,007.

Midway Islands, with a total area of 28 sq. miles and a population (1960) of 2,356, lie in the N. Pacific about 1,300 miles from Hawaii. There is no indigenous population. The group is under the jurisdiction of the U.S. Navy.

PUERTO RICO

Puerto Rico (Rich Port) is an island of the Greater Antilles group in the West Indies, and lies between $17^{\circ} 50' - 18^{\circ} 30'$ N. lat. and $65^{\circ} 30' - 67^{\circ} 15'$ W. long., with a total area of 3,435 square miles and a population of 2,349,544 (1960 Census). The majority of the inhabitants are of Spanish descent and Spanish and English are the official languages. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,399 miles distant from New York, and 963 miles from Key West. *Puerto Rico* was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508. It continued a Spanish possession until Oct. 18, 1898, when the United States took formal possession as a result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified on April 11, 1899. Sugar is grown along the coastal plain and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, and yams are also grown. The trade is principally with the U.S. 4,536 miles of paved roads were in use in 1958. There are good harbours at San Juan and Ponce. The Constitution approved by the Congress and the President of the United States, which came into force on July 25, 1952, establishes the Commonwealth of Puerto Rico with full powers of local self-government. Legislative functions are vested in the Legislative Assembly, which consists of 2 elected houses; the Senate of 27 members (2 from each of 8 senatorial districts and 11 at large) and the House of Representatives of 51 members (1 from each of 40 representative districts and 11 at large). Membership of each house may be increased slightly to accommodate minority representatives. The term of the Legislative Assembly is 4 years. The Governor is popularly elected for a term of 4 years. A Supreme Court of 9 members is appointed by the Governor, with the advice and consent of the Senate. There are 9 similarly appointed Secretaries at the head of permanent departments, but the selection of the Secretary of State must be approved also by the House of Representatives. The Governor appoints all judges. *Puerto Rico* is represented in Congress by a Resident Commissioner, elected for a term of 4 years, who has a seat in the House of Representatives, but not a vote. Great improvement has been made in the progress, industrialization and welfare of the island during the present century. A programme of tax exemption has raised income from industry to a level higher

Ψ Seaport.

than that from agriculture. Public schools are established throughout—enrolment in 1961 reached 626,420. The capital, Ψ San Juan, had 588,805 inhabitants in 1960, other major towns being Ψ Ponce 145,586, Ψ Mayaguez 83,850, Caguas 65,098, Ψ Arecibo 69,879 and Bayamón 72,221.

FINANCE

	1960	1961
Revenue.....	\$204,000,000	\$273,000,000
Expenditure.....	262,000,000	318,000,000

TRADE

Total Exports.....	611,838,292	674,000,000

Governor, Luis Muñoz Marín, elected 1948; re-elected 1952, 1956 and 1960.

Resident Commissioner, Antonio Fernós Isern.

AMERICAN SAMOA

American Samoa consists of the island of Tutuila, Anuu'u, Ofu, Olosega, Ta'u, Rose and Swains Islands, with a total area of 76.5 square miles and a population of 20,051 in 1960, distributed as follows:—Tutuila and Anuu'u 17,250; Rose Island, uninhabited; Manu'a group (Ofu, Ta'u and Olosega Islands) 2,695; and Swain's Island.

Tutuila, the largest of the group, has an area of 52 square miles and contains a magnificent harbour at Ψ Pago Pago (pop. 1960, 1,251), the capital and seat of government. The remaining islands have an area of about 24 square miles. Tuna and copra are the chief exports.

Under an Executive Order of the President, which became effective on July 1, 1951, civilian administration under the Department of the Interior replaced the Naval administration which had existed since 1900. At present the Government consists of an executive, a bicameral legislature and a judiciary. Most of the Samoans are U.S. nationals, but some have acquired citizenship through service in the United States armed forces.

Governor, H. Rex Lee.

Secretary, Eric J. Scanlan.

TRUST TERRITORY OF THE PACIFIC ISLANDS

The Trust Territory of the Pacific Islands consists of the Mariana (excluding Guam), Caroline and Marshall Islands which extend from latitude 1° to 20° north and from longitude 130° to 172° east. They cover an ocean area of 3,000,000 square miles but have a total land area of only 687 square miles. There are 96 separate islands and island groups in the Trust Territory. The population in 1961 was 77,913. The inhabitants of the Trust Territory are broadly classed as Micronesians. The native cultures vary markedly among island groups and even more among islands and atolls in the same geographic area. Nine mutually unintelligible languages are spoken in the territory.

The Trust Territory is administered by the United States pursuant to a Trusteeship Agreement with the Security Council of the United Nations of July 18, 1947, administration being under the general jurisdiction of the Secretary of the Interior.

For administrative purposes, the territory is divided into seven districts: Saipan, Rota, Palau, Yap, Truk, Ponape and the Marshalls. Local governments exist within each district.

High Commissioner, M. Wilfred Goding.

Deputy High Commissioner, José A. Benitez.

CAPITAL (Provisional).—Saipan, Mariana Islands.

VIRGIN ISLANDS

Purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed,

January 25, 1917. The total area of the islands is 133 sq. miles, with a population of 32,099 (1960 Census). *St. Thomas* (28 sq. miles) has a population of 16,201; *St. Croix* (84 sq. miles) has a population of 14,973; *St. John* (20 sq. miles) has a population of 925. *St. Croix* exports sugar and rum; *St. Thomas* is famous for its harbour.

CAPITAL, *Charlottesville Amalie* (11,000) contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months.

Governor, Ralph M. Palewosky.

Government Secretary, Cyril E. King.

THE PANAMA CANAL

The Panama Canal and its adjuncts, including the related commercial enterprises in the Canal Zone, are operated by the Panama Canal Company, which was formed on July 1, 1915, under the provisions of the Panama Canal Company Act. The Canal Zone is governed by the Canal Zone Government, which was established simultaneously with the new Canal Company. Both organizations are headed by Major-General Robert J. Fleming, Jr., U.S.A., who holds the joint title of Governor of the Canal Zone and President of the Panama Canal Company.

In 1823, Charles V of Spain ordered an investigation as to the possibility of a canal through the Isthmus of Panama. From then until 1904, the principal maritime nations of the world gave earnest consideration to the project. In 1876 a concession for the construction of a canal was granted to a French promotion corporation which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Inter-oceanic Panama Canal Company, of which de Lesseps was nominal head. For various reasons, including those of finance and an inability to master the health problems on the humid isthmus, the initial effort failed. A receiver was appointed in 1889 and a second French company undertook the last project, with excavation work resuming in 1894. This was continued until the United States Government acquired the effects of the French company in Panama on May 4, 1904.

Congress authorized the President in 1902 to purchase the rights and property of the French company for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognized by the United States, and a treaty was ratified on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The U.S. guaranteed the Republic of Panama's independence and agreed to pay it \$10,000,000 and an annuity which was to begin nine years after the ratification of the treaty. The canal is built through the centre of this territory. Under the terms of a treaty between Panama and the United States, signed at Panama in January, 1955, the United States increased its annuity to Panama from \$430,000 to \$1,930,000 and agreed to hand over to

the Republic land and railroad yards valued at \$25,000,000, to construct a high-level bridge over the Pacific entrance to the Canal at a cost of about \$20,000,000 and to extend various commercial and other privileges to the Republic. The Canal Zone has an area of 533 sq. miles (land area, 362 sq. miles) and a population of 42,122 (Census 1960).

The canal is fifty statute miles long (44.08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks in twin flights; 3 steps at Gatun on the Atlantic side, 1 step at Pedro Miguel and 2 at Miraflores on the Pacific side. Each lock chamber is 1,000 feet long and 110 feet wide. Transit from sea to sea usually takes 8 hours. The least width is in Gaillard Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The Panama Canal Company is engaged in a \$60,000,000 Canal improvement programme which will result in a minimum channel width of 500 feet in the Cut. Gatun Lake is 85 feet above sea-level. The Canal's minimum channel depth, including Gaillard Cut, is 42 feet.

Including only ocean-going commercial vessels, 300 Panama Canal net tons measurement or over, against which tolls were collected, the volume of commercial traffic passing through the Canal during each of the last 23 fiscal years is shown below:—

Fiscal Year	No. of Transits	Canal. * Net Tons	Cargo Tons
1940	5,370	24,144,366	27,299,016
1941	4,727	20,642,736	24,950,791
1942	2,688	11,010,004	13,607,444
1943	1,822	8,233,999	10,599,950

The United Nations

CHARTER OF THE UNITED NATIONS

The foundations of the Charter of the United Nations were laid at the Conference of Foreign Ministers in Moscow in 1943, and upon those foundations a structure was built at the meetings at Dumbarton Oaks, Washington, D.C., Aug. 21-Oct. 7, 1944. The design was discussed and criticized at San Francisco from April 25 to June 26, 1945, on which date representatives of 50 Allied Nations appended their signatures to the Charter.

The United Nations formally came into existence on October 24, 1945. It was later decided that its seat should be in the United States. Permanent headquarters have been erected at Manhattan, New York.

The following 108 states are members of the United Nations:—

Afghanistan, Albania, Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Bulgaria, Burma, Burundi, Byelorussian Soviet Socialist Republic, Cambodia, Cameroon, Canada, Central African Republic, Ceylon, Chad, Chile, China, Colombia, Congo (Brazzaville), Congolese Republic (Leopoldville), Costa Rica, Cuba, Cyprus, Czechoslovakia, Dahomey, Denmark, Dominican Republic, Ecuador, Ethiopia, Finland, France, Gabon, Ghana, Greece, Guatemala, Guinea, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iraq, Republic of Ireland, Israel, Italy, Ivory Coast, Jamaica, Japan, Jordan, Laos, Lebanon, Liberia, Libya, Luxembourg, Madagascar, Malaya, Mali, Mauritania, Mexico, Mongolia, Morocco, Nepal, Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Pakistan, Panama, Paraguay, Persia, Peru, Philippines, Poland, Portugal, Roumania, Ruanda, Salvador, Saudi Arabia, Senegal, Sierra Leone, Somalia, South Africa, Spain, Sudan, Sweden, Syria, Tanganyika, Thailand, Togo, Trinidad and Tobago, Tunisia, Turkey, Ukrainian Soviet Socialist Republic, Union of Soviet Socialist Republics, United Arab Republic, United Kingdom, United States of America, Uruguay, Venezuela, Voltaic Republic, Yemen, Yugoslavia.

The principal organs of the United Nations are:—(1) The General Assembly; (2) The Security Council; (3) The Economic and Social Council; (4) The Trusteeship Council; (5) The International Court of Justice; (6) The Secretariat.

1. The General Assembly

The General Assembly consists of all the Members of the United Nations. Each Member is entitled to be represented at its meetings by five representatives, but has only one vote. The General Assembly meets once a year in regular session normally beginning on the third Tuesday in September. Special Sessions may also be held.

The work of the General Assembly is divided between seven Main Committees, on each of which every Member has the right to be represented:—

(1) Political and Security (including the regulation of armaments); (2) Economic and Financial; (3) Social, Humanitarian and Cultural; (4) Trusteeship (including Non-Self Governing Territories); (5) Administrative and Budgetary; (6) Legal. There is also a Special Political Committee, to relieve the burden on the first Committee.

The Main Committees consider items referred to them by the General Assembly and recommend draft resolutions for submission to the Assembly's plenary meetings.

The Assembly has two procedural committees—a General Committee and a Credentials Committee; and three standing committees—an Advisory Committee on Administrative and Budgetary Questions, a Committee on Contributions and a Disarmament Commission.

The General Assembly appoints such *ad hoc* committees as may be required from time to time

for special purposes. The Assembly is also assisted in its work by subsidiary bodies such as a Board of Auditors, an Investments Committee, a United Nations Staff Benefit Committee, and an International Law Commission.

2. The Security Council

The Security Council consists of eleven Members, each of which has one representative and one vote. There are five *permanent Members* (China, France, U.K., U.S.A., U.S.S.R.) and six non-permanent Members elected for a two-year term.

The Security Council bears the primary responsibility for the maintenance of peace and security. Decisions on procedural questions are made by an affirmative vote of seven Members. On all other matters the affirmative vote of seven Members must include the concurring votes of the *permanent Members*, and it is this clause which makes the *Veto* possible. The only exception to this rule is that in regard to measures for peaceful settlement a party to a dispute must refrain from voting.

The General Assembly, any member of the United Nations, or the Secretary-General, can bring to the Council's attention any matter considered to threaten international peace and security. A non-member State can bring a dispute before the Council provided it accepts in advance the U.N. Charter obligations for peaceful settlement.

A *Committee on the Admission of New Members* was set up by the Security Council on May 17, 1946, for the purpose of examining applications for admission to membership in the United Nations which may be referred to it by the Security Council. It is composed of a representative of each of the members of the Security Council.

The Security Council also establishes *ad hoc* committees and commissions which may be required from time to time for special purposes.

3. The Economic and Social Council

This body is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters.

It has established the following Commissions: Statistical, Human Rights, Social, Status of Women, Narcotic Drugs, Population, International Commodity Trade, Regional Economic Commissions for Europe, Asia and the Far East, Latin America and Africa. The Council also supervises and co-ordinates the work of fourteen related agencies.

United Nations Children's Fund (UNICEF), London Office, 14-15 Stratford Place, W.1.—Established by the United Nations in 1946, to meet the emergency needs of children, particularly in war-devastated countries. UNICEF is financed by voluntary contributions from Governments and from the public, which amounted to £9,178,500 in 1960 and assisted 409 projects in 104 countries and territories.

4. Trusteeship Council

The establishment of a Trusteeship Council in connection with territories placed under United Nations supervision through individual Trusteeship Agreements was made possible after the General Assembly on December 13, 1946, approved the

following eight Trusteeship Agreements: *New Guinea* (with Australia); *Ruanda-Urundi* (Belgium); *French Cameroons* and *French Togoland* (France); *Western Samoa* (New Zealand); *British Cameroons*, *British Togoland*, and *Tanganyika* (the United Kingdom); a ninth agreement was afterwards approved concerning *Nauru* (administered by Australia on behalf of Australia, New Zealand and U.K.). The Trusteeship Agreement for British Togoland ceased to have effect in March, 1957, when that country was united with Ghana. The trusteeships in the French Cameroons and French Togoland came to an end in 1960 with the achievement of full independence by these States. The Trusteeship Agreements for the British Cameroons, Tanganyika and W. Samoa ended in 1961 and for Ruanda-Urundi in 1962.

A Trusteeship Agreement for the former Japanese mandated islands, the *Marshall's*, *Marianas* and *Carolinas*, was submitted by the United States to the United Nations, and after approval by the Security Council, came into force on July 18, 1947.

A Trusteeship Agreement for the former Italian Colony of *Somaliland*, in force from Dec. 2, 1950, ended on July 1, 1960.

The Trusteeship Council is composed of countries administering Trust Territories, permanent members of the Security Council, and enough other countries (elected by the General Assembly for three-year terms) to make an equal division between countries which administer Trust Territories and countries which do not.

The Trusteeship Council considers reports from administering authorities; examines petitions in consultation with the administering authority; makes periodic inspection visits; and checks conditions with an annual questionnaire on the political, economic, social, and educational advancement of the inhabitants of trust territories.

5. International Court of Justice

The International Court of Justice is the principal judicial organ of the United Nations. The Statute of the Court is an integral part of the Charter and all Members of the United Nations are *ipso facto* parties to it. The Court is composed of 15 judges, no two of whom may be nationals of the same State, and meets at The Hague.

If any party to a case fails to adhere to the judgment of the Court, the other party may have recourse to the Security Council.

THE SECRETARIAT

Secretary-General, U. Thant (*Burma*) (*acting*).

Under Secretaries

Special Political Affairs, Ralph J. Bunche (*U.S.A.*).

Chef de Cabinet, C. V. Narasimham (*India*).

Conference Services, Jiri Nosek (*Czechoslovakia*).

Economic and Social Affairs, P. de Seynes (*France*).

Trusteeship and Information from Non-Self-Governing Territories, D. Protitch (*Yugoslavia*).

Political and Security Council Affairs, E. Kiselev (*U.S.S.R.*).

Personnel, Sir Alexander McFarquhar (*U.K.*).

Public Information, H. Tavares de Sa (*Brazil*).

U.N. Information Centre, 14-15, Stratford Place, W1.

BUDGET OF THE UNITED NATIONS

The financial year coincides with the calendar year. On February 13, 1946, the General Assembly established a Working Capital Fund of \$25,000,000 (U.S.).

For the year 1961, the gross appropriation was \$72,969,300 (£26,000,000). The scale of assessments for the 1961 budget for British Commonwealth countries was: Australia, 1.79 per cent.; Canada, 3.11 per cent.; Ghana, 0.07 per cent.;

India, 2.46 per cent.; Malaya, 0.17 per cent.; New Zealand, 0.42 per cent.; Pakistan, 0.40 per cent.; South Africa, 0.56 per cent.; United Kingdom, 7.78 per cent. The United States contribution was 32.51 per cent.; U.S.S.R. was 13.62 per cent.; France was 6.40 per cent.; and China was 5.01 per cent. A new scale of assessment has been approved.

UNITED KINGDOM REPRESENTATIVES New York

Permanent Representative to the Security Council and Representative to the United Nations, Sir Patrick Dean, K.C.M.G. £7,015

Deputy Permanent Representative, C. T. Crowe, C.M.G.

Ministers, C. H. W. Hodge (*Treasury Adviser*); Miss B. Salt, C.B.E. (*Adviser for Economic and Social Affairs*).

Counsellors, A. H. Campbell (*Head of Chancery*); Miss J. A. C. Gutteridge, C.B.E. (*Legal Adviser*).

1st Secretaries, H. P. L. Atllee; W. R. Haydon; K. C. Thom; W. Bentley; S. J. G. Cambridge;

A. A. Acland; E. G. White.
3rd Secretary, D. E. Tatham.

Minister and Permanent Representative to the Trusteeship Council, Sir Hugh Mackintosh Foot, G.C.M.G., K.C.V.O., O.B.E.

1st Secretaries, J. A. Scott (*Commonwealth Relations*); J. A. Sankey (*Colonial Affairs*).

Geneva

Permanent Representative to the U.N. European Office, P. L. Carter.

INTERNATIONAL ATOMIC ENERGY AGENCY

Kärntnering 11-13, Vienna I.

Set up on July 29, 1957, to accelerate and enlarge the contribution of atomic energy to peace, health and prosperity throughout the world and to ensure that assistance provided by it is not used to further any military purpose. Agreements have been reached concerning the Agency's working relationship with the United Nations and its international agencies. In 1962, 77 states were in membership.

A General Conference of all members meets in regular annual session and in such special session as may be necessary. A Board of Governors (23 members) carries out the functions of the Agency. *Director-General*, Sigvard Eklund (*Sweden*).

INTERNATIONAL AGENCIES

Twelve other international organizations, having wide responsibilities in economic, social, cultural, educational and other related fields, carry out their functions in co-operation with the United Nations under agreements made with a standing committee of the Economic and Social Council.

International Labour Organisation (ILO) Geneva (London Office, 38-39 Parliament Street, S.W.1).—Established in 1919 as an autonomous institution associated with the League of Nations and recognized in 1946 by the United Nations as a special agency, the ILO exists to contribute to the establishment of lasting peace by promoting social justice and by international action to improve labour conditions and living standards, and to promote economic and social stability. In June, 1962, the Organisation had 102 member States.

A *General Conference*, composed of national delegations of two government delegates, one delegate representing labour, meets annually and formulates international social standards.

A 40-member *Governing Body*, composed of the representatives of 20 Governments, ten worker members and ten employer members, supervises the

work of the *International Labour Office* and of the various committees and commissions. Ten Governments hold seats on the Governing Body because of their industrial importance. These are at present Canada, China, France, Federal Republic of Germany, India, Italy, Japan, U.S.S.R., the United Kingdom and the United States.

The *International Labour Office* provides the Secretariat of the Organisation, collects and distributes information, assists governments upon request in drafting legislation on the basis of decisions of the Conference, directs technical and co-operation activities and issues publications.

Director-General, David A. Morse (U.S.A.).

Food and Agriculture Organization of the United Nations (FAO), Viale delle Terme di Caracalla, Rome.—Established on October 16, 1945, to raise levels of nutrition and standards of living, to secure improvements in the efficiency of the production and distribution of all food and agricultural products and to better the condition of rural populations, thus contributing to the expansion of world economy. Among its many activities the Organization promotes the global exchange of new types of plants, combats epidemics of animal diseases in many countries and provides technical assistance in such fields as nutrition and food management, soil erosion control, re-afforestation, irrigation engineering, control of infestation of stored foods, production of fertilizers, control of crop pests and diseases, and improvement of fishing vessels, fish distribution and marketing. A world-wide Freedom from Hunger Campaign will continue until 1965, and a World Food Congress will be held at Washington in 1963. Current work of the Organization includes a \$100,000,000 World Food Programme. The 1961 Conference approved a budget of \$31,185,000 for the 1962-63 biennium. In addition to these funds, the UN Special Fund and the Expanded Technical Assistance Program (ETAP) have allocated \$25,868,719 to FAO.

The policy of the Organization is directed by a two-yearly Conference of the 100 members and associates. A council (27 members) acts for the Conference between its sessions.

Director-General, B. R. Sen (India).

United Nations Educational, Scientific and Cultural Organization (UNESCO), 9 Place de Fontenoy, Paris, 7^{ème}.—Unesco was established on Nov. 4, 1946, to contribute to peace and security by promoting collaboration among the nations through education, science and culture in order to further universal respect for justice, for the rule of law and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language or religion, by the Charter of the United Nations; to collaborate in the work of advancing the mutual knowledge and understanding of peoples, . . . to give fresh impulse to popular education and to the spread of culture, . . . to maintain, increase and diffuse knowledge.

The three main bodies of the Organization are: a *General Conference* which meets every two years to approve the programme and budget, an *Executive Board* of 24 members and the *Secretariat*. In addition, National Commissions are set up in Member States to serve as a link with Unesco and carry out the programme of the Organization.

This programme is essentially designed to stimulate and expand international co-operation and national efforts in the fields of education, natural sciences, social sciences, cultural activities, mass communication and exchange of persons for study and educational travel abroad. Current activities of the Organization focus on development of

international co-operation among specialists and non-governmental organizations, the collection and dissemination of information, direct action to promote education and science in under-developed countries and the preparation of international agreements related to Unesco's interests. Member States at July 1, 1962, 106. Approved budget for 1962, U.S. \$16,498,000.

Director-General, René Mahen (France) (acting).

World Health Organization (WHO), Palais des Nations, Geneva. Established on April 7, 1948, the World Health Organization exists to forward the attainment by all peoples of the highest possible level of health. Its services are of two kinds—advisory, to spread knowledge, help to train personnel and assist countries on such subjects as malaria, tuberculosis, venereal diseases and other communicable diseases, maternal and child health, nutrition, and environmental health—and technical services of world wide interest such as biological standardization and unification of pharmacopœias, collection and dissemination of epidemiological intelligence, medical research and publication of technical and scientific works. Revised budget estimates for 1962 amount to \$24,863,800 and the approved working budget for 1963 is \$29,956,000. Membership (June, 1962), 115, including 4 Associate Members.

Organs are a *World Health Assembly* meeting annually to frame policy, an *Executive Board* (24 members), meeting at least twice a year, and a *Secretariat*. Operations in member countries are entrusted to six regional organizations.

Director-General, Dr. M. G. Candau (Brazil).

International Bank for Reconstruction and Development, 1818 H Street, Washington, 25 D.C.—Established on Dec. 27, 1945, to assist in the reconstruction and development of territories of members by facilitating the investment of capital for productive purposes; to promote private foreign investment and, when private capital is not readily available on reasonable terms, to supplement private investment by providing loans for productive purposes out of its own capital, funds raised by it, and its other resources; and to promote the balanced growth of international trade and the maintenance of equilibrium in balances of payments by encouraging international investment for the development of the productive resources of the International Bank's members. Loans made by the Bank since its inception to June 30, 1962, totalled \$6,500,000,000. Subscribed capital, July 5, 1961, \$20,485,100,000.

The *Board of Governors* consists of one Governor and one alternate appointed by each of the 75 member countries.

Eighteen *Executive Directors* exercise all powers of the Bank except those reserved to the Board of Governors. The *President*, selected by the Executive Directors, conducts the business of the Bank, with the assistance of an international staff. *President*, Eugene R. Black (U.S.A.).

International Finance Corporation (IFC), 1818 H Street, Washington 25, D.C.—The IFC is an international investment institution with capital of \$96,469,000 subscribed by 63 member governments. It is closely affiliated with the World Bank, but its operations are distinct as IFC deals exclusively with private business. Its purpose is to further economic growth in its developing member countries by investing—without government guarantee—in productive private enterprises, in association with private capital and management. In this connection, IFC seeks to attract private investment capital and bring together businessmen from the developing and industrialized areas, who

are seeking partners for joint ventures. IFC is essentially an investing rather than a lending institution, and it judges projects on their merits as investments for private capital. It supplements rather than competes with private capital, and it does not exercise management functions.

By June 30, 1962, IFC made 48 investments totaling \$65,735,000 in 20 member countries.

IFC is controlled by a *Board of Directors* consisting of the President (*Chairman*) and those Executive Directors of the World Bank who represent at least one government which is a member of IFC. A President is selected by the Board of Directors. *President*, Eugene R. Black (U.S.A.).

International Monetary Fund, 19 and H Streets, Washington 25, D.C.—Established on Dec. 27, 1945, the Fund exists to promote international monetary co-operation and the expansion of international trade; to promote exchange stability, maintain orderly exchange arrangements and avoid competitive exchange depreciations; and to assist in the establishment of a multilateral system of payments in respect of current transactions between members and in the elimination of foreign exchange restrictions which hamper world trade. Total drawings from the Fund up to April 30, 1962, amounted to \$6,265,500,000.

Managing Director, Per Jacobsson (Sweden).

International Civil Aviation Organization (ICAO), 1080 University Street, Montreal, 3—Established on April 4, 1947, to study problems of international civil aviation and the establishment of international standards and regulations for civil aviation, ICAO encourages the use of safety measures, uniform regulations for operation, and simpler procedures at international borders. It promotes the use of new technical methods and equipment. With the co-operation of members, it has evolved a pattern for meteorological services, traffic control, communications, radio beacons and ranges, search and rescue organization, and other facilities required for safe international flight. It has secured much simplification of government customs, immigration, and public health regulations as they apply to international air transport. 97 states are now members of ICAO. The net budget for 1961 was \$4,057,000 (Canadian).

An *Assembly* of delegates from member states meets annually. A *Council* of 21 members is elected by the Assembly, taking into account the countries of chief importance in air transport and the need for representation of the main geographical areas of the world. The Council is the executive body, working through subsidiary committees. *Secretary-General*, R. M. Macdonnell (Canada).

Universal Postal Union (UPU), Schosshaldenstrasse 46, Berne.—Established on October 9, 1874, by the postal Convention of Berne and in operation from July 1, 1875, UPU exists to form a single postal territory of all the countries, members of the Union, for the reciprocal exchange of correspondence in order to secure the organization and improvement of the various postal services and to promote in this sphere the development of international collaboration. Every member agrees to transmit the mail of all other members by the best means used for its own mail. The Union comprises all the countries of the world with the exception of the Maldives and Laccadive Islands. Budget, 1962, about \$788,000.

A *Universal Postal Congress* meets at five-yearly intervals.

Director, Dr. Edouard Weber (Switzerland).

International Telecommunication Union (ITU), Place des Nations, Geneva.—Founded at Paris in

1865 as the International Telegraph Union, ITU was re-organized in 1947 and since 1961 has been governed by the Convention adopted by the Geneva Conference held in 1959. ITU exists to set up international regulations for telegraph, telephone, and radio services to further their development and extend their utilization by the public, at the lowest possible rates; to promote international co-operation for the improvement and rational use of telecommunications of all kinds; the development of technical facilities and their most efficient operation. ITU allocates the radio frequency spectrum and registers radio frequency assignments. It studies, recommends, and collects and publishes information on telecommunication matters. The budget for 1962 was \$3,538,710.

Secretary-General, Gerald C. Gross (U.S.A.).

World Meteorological Organization (WMO), Geneva.—Established on March 23, 1950. WMO exists to facilitate world-wide co-operation in establishing networks of stations making observations related to meteorology, and to promote the establishment and maintenance of centres providing meteorological services; to promote the establishment of systems for the rapid exchange of weather information; to promote standardization of meteorological observations and to ensure their uniform publication; to further the application of meteorology to aviation, shipping, agriculture, and other human activities; to encourage research and training in meteorology and to coordinate their international aspects. The budget for 1960-63 is \$2,649,484.

A *World Meteorological Congress* meets at least once every four years. An *Executive Committee* (18 members), meeting at least annually, carries out the resolutions of the Congress, initiates studies and makes recommendations on matters requiring international action. Other organs are six *Regional Meteorological Associations* (Africa, Asia, S. America, N. and Central America, Europe and South-West Pacific), technical commissions and a Secretariat.

Secretary-General, D. A. Davies (U.K.).

Inter-Governmental Maritime Consultative Organization (IMCO), Chancery House, Chancery Lane, W.C.2.—Established on March 17, 1958, to provide machinery for cooperation among governments in the field of governmental regulation and practices relating to technical matters, including those concerning safety at sea; to encourage the removal of discriminatory action and of unnecessary restrictions by governments; to consider matters concerning unfair restrictive practices by shipping concerns; to consider any matters concerning shipping that might be referred to it by any organ or specialized agency of the United Nations; and to provide for the exchange of information among governments. In June, 1962, membership consisted of 51 nations. Budget, 1962-63, \$802,350.

An *Assembly* of all members meets every two years. A *Council* (16 members) acts for the Assembly between sessions.

Secretary-General, W. Graham (U.K.) (*acting*).

International Trade.—A draft charter for an international trade organization was completed in 1948, but it became clear that the leading trading powers would not ratify it without considerable delay. The organization has not yet been established.

An international treaty to which 43 countries are parties, the *General Agreement on Tariffs and Trade (GATT)* was signed in 1947, with the object of lowering and stabilizing tariffs, expanding international trade and promoting economic development. Five tariff conferences have since been held at which members have reduced or frozen their tariffs on various items.

Executive Secretary, E. W. White (U.K.).

Foreign Countries

The following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Courts, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies, Legations, and Consulates-General in London for various corrections and additions.

Salaries and Allowances.

The Salaries of Officers of Branch "A" of H.M. Foreign Service are shown below. In addition foreign allowances and furnished accommodation (or rent allowances in lieu thereof) are assigned to Officers serving abroad:—

Grade I—£7,015.	Grade V—£3,415.
Grade II—£5,015.	Grade VI—£2,715 to £3,415.
Grade III—£4,215.	Grade VII—£1,904 to £2,634.
Grade IV—£4,115.	Grade VIII—£1,456 to £1,785.
Grade IX—£823 to £1,331.	

NOTE.—Salaries of Ambassadors and of Ministers Plenipotentiary at British Embassies and Legations abroad shown in the following articles are in each case the maximum salary for the post and exclude *Frais de Représentation*.

ABYSSINIA. See Ethiopia.

AFGHANISTAN

(Afghānistān)

King of Afghanistan, H.M. Zahir Shah, born Oct. 15, 1914, acceded Nov. 8, 1933 (on the assassination of his father, Nadir Shah); married Nov. 7, 1931, Humaira, daughter of Sardar Ahmad Shah Khan, and has surviving issue four sons and two daughters: H.R.H. Prince Ahmed Shah Khan, b. Sept. 23, 1934; H.R.H. Prince Mohammad Nadir, b. 1941; H.R.H. Prince Daud, b. 1949; H.R.H. Prince Mir Wais, b. 1957; and H.R.H. Princess Bilqis, b. 1931; H.R.H. Princess Maryam, b. 1936.

EMBASSY IN LONDON

31 Princes Gate, S.W.7.
[Kensington: 8891]

Ambassador in London, His Excellency Mohammed Kabir Ludin.

1st Secretary, Faiz Ahmad Zikria.

2nd Secretary, Ghulam Farouq.

Afghanistan lies to the N. and W. of Western Pakistan. Its ancient name was Aryana, by which title it is referred to by Strabo, the Greek geographer who lived in the 1st century B.C. The estimated area is 250,000 sq. miles, and the population is estimated at about 10 to 12 millions. The population is very mixed. The most numerous race is the Pathan which predominates in the South and West, the main divisions being the Durranis, from whom the Royal family springs, and the Ghilzais. Then come the Tajiks, an Iranian people mainly cultivators and small traders. There are also Uzbeks and Turkomen in the North, Hazaras in the centre, Baluchis in the South-West and the Nuristanis who live near the Chitral border. All are Sunni Moslems, except the Hazaras and Kizilbashes, who belong to the Shia sect.

Afghanistan is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (now W. Pakistan) (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the

N.W. Frontier Province (now W. Pakistan) (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus, to the Oxus (or Amu Darya, "Mother of Rivers") which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier on the branch line from Merv, and thence N.E. was fixed by the Pamir agreement of 1895. The Russo-Afghan frontier was demarcated by the Tashkent Boundary Commission in 1948. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Patban tribes, who have a strong tradition of independence and are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Afghanistan is divided into seven major provinces, Kabul, Mazar-i-Sbarif, Kandahar, Herat, Nengrahar (formerly Eastern), Paktya (formerly Southern) and Qataghan, and eight minor provinces, Parwan, Ghazni, Farah-Chakhansur, Girishk, Maimana, Badakhshan, Shibarghan and Ghore. Each province is under a Governor (called in major provinces *Naib-ul-Hakumiah*, and in minor provinces *Hakin-i-Ala*).

Government.—Amir Abdurrahman (1880-1901) established a strong central government, with a regular civil and military organization, including offices for public works, posts, police, finance, trade, &c. The Army has been reorganized and is recruited by annual calls; service is for two years with the colours and eight with the reserve. The peace strength is about 64,000. A military academy and military colleges are located in Kabul; and provision is made for training of regular officers abroad. A small Air Force is maintained. All military and air force equipment is now of Russian pattern. Factories for munitions and for various commercial products have been erected in Kabul and elsewhere.

As the result of a British mission to Kabul in 1904-5, the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence. Afghan troops crossed the Indian frontier on May 2, 1919, on which the Indian Government took immediate steps to expel them; fighting followed and Dacca was occupied by British troops, but overtures were made by King Amanulla of Afghanistan and a treaty of peace was signed in August. By this treaty Afghanistan is left formally free and independent. By treaty of Nov. 22, 1921 (renewed in 1930), Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognize boundaries then existent, subject to a slight re-adjustment near the Khyber; and to establish Legations and consular offices. As successor state to the British Government, Pakistan has agreed that her relations with Afghanistan shall be based on the 1921 treaty.

Under the Constitution of Oct. 31, 1931, there is a Senate of 43 nominated members and a National Council of 171 elected members, with a Grand Assembly (*Loe Jirgch*) which is summoned on important occasions. The administration is entrusted to a Council of Ministers.

The laws of Afghanistan are based on the "Sharlat," or Islamic law, and tribal custom.

Production.—Agriculture and sheep raising are the principal industries. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Sugar beet and cotton are grown. Afghanistan is rich in fruits. Sheep, including the Karakul, and transport animals are bred. Silk, woolen and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, gold, chrome and talc are found.

The following main roads are open to motor traffic. (a) Internal: Kabul—Kandahar (310 miles); Kandahar—Farrah—Herat (400 miles); Herat—Maimana to Mazar-i-Sharif (500 miles); Mazar-i-Sharif—Kabul (380 miles). Also Kabul—Khanahad—Faizabad (450 miles); Kabul—Gardez (80 miles); Kabul—Bamian (140 miles). The road from Kabul to the North is being shortened by cutting through the Salang pass. (b) Roads to the frontiers: Kabul—Khyber (175 miles); Kandahar—Chaman (70 miles) and roads from Herat to the Russian and Persian borders. Work on the metalling of the Kabul—Khyber road by American engineers has begun and a new metalled road from Kabul to Kandahar and Spin Baldak is shortly to be constructed under an I.C.A. contract. The Pakistan North-Western Rly. is to extend a spur from Chaman to Spin Baldak. An agreement has recently been signed with the Soviet Government for the construction of a road from the Russian border at Kushk to Herat and Kandahar. Otherwise roads are unmetalled. A network of minor roads fit for motor traffic in fine weather links up all important towns and districts.

Goods are still conveyed by pack animals, but motor transport is rapidly taking the place of pack transport as the chief means of conveyance. The chief trade routes to Pakistan and India are the Khyber Pass route, from Kabul to Peshawar (190 miles), and the road from Kandahar to Chaman (70 miles).

Language and Literature.—The languages of the country are Persian and Pushtu and Turki (spoken by Uzbeks and Turkoman tribes in the North). The Turki language is unwritten in Afghanistan. All schoolchildren learn both Persian and Pushtu. The Government is encouraging the spread of Pushtu, the language of the Pathans. Education is free and nominally compulsory. elementary schools having been established in most centres; there are secondary schools in large urban areas and a university (established in 1932) at the capital.

The annual revenue, of some 2,000,000,000 *Afghanis*, consists largely of payments in kind. There are taxes on land, sales of animals, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories and mining royalties; in addition certain businesses and individuals have now become eligible for income-tax.

There are various official rates of exchange for the Afghani which apply mainly to government departments trading in certain commodities. The free rates fluctuate as much as 20 per cent. or more but in June, 1960, were approximately as follows: 700 *Afghanis* = 100 Indian Rupees; 550 *Afghanis* = 100 Pakistani Rupees; 106 *Afghanis* = £1; 38 *Afghanis* = \$1.

Trade with U.K.

	1960	1961
Imports from U.K.	£640,587	£459,183
Exports to U.K.	3,681,486	3,701,410

Exports are mainly Persian lambskins (Karakul), fruits, cotton, raw wool, carpets and spices, while

the imports are chiefly cotton yarn and piece goods, metals, leather goods, tea, sugar, jute manufactures, paper and cement.

CAPITAL, Kabul (about 300,000). The chief commercial centres are Kabul and Kandahar (77,000). Other provincial capitals are Herat (75,000), Mazar-i-Sharif (42,000), Jalalabad (22,000) and Khanabad (18,000).

FLAG. Vertical stripes of black, red and green, with white device in centre.

BRITISH EMBASSY

(Kabul)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Michael Cavenagh Gillett, K.B.E. C.M.G. (1957) £4,115

1st Secretary, H. J. Downing.

Military and Air Attaché, Col. W. H. R. Clifford, O.B.E.

2nd Secretaries, H. H. Hale; N. J. Barrington; J. F. Taylor (Consul).

Kabul is distant 7,500 miles from London, transit 21 days; by air 2-4 days.

ALBANIA

Head of the State, Hadji Lechi, assumed office, July 24, 1953.

Prime Minister, General Enver Hodja.

Situated on the Adriatic Sea, Albania is bounded on the north and east by Yugoslavia and on the south by Greece. The area of the Republic is estimated at 10,700 sq. miles, with a population (1955) of 1,394,000.

On Nov. 10, 1945, the British, U.S.A. and U.S.S.R. governments decided to recognize the Albanian administration under Colonel-General Enver Hodja as the provisional government of Albania on the understanding that free elections would be held at an early date, in order that a truly representative government could be formed. Elections were held in December, 1945, on Jan. 11, 1946, the Constituent Assembly declared Albania an independent Republic, and on Aug. 7, 1946, Albania applied for admission to the United Nations, but its entry was vetoed by Great Britain and the U.S.A. It was admitted in 1955. United Kingdom diplomatic relations with Albania ceased in 1946.

Albania is almost entirely an agricultural country and the staple crops are wheat and maize.

CAPITAL, Tirana (pop. 50,000).

FLAG.—Black two-headed eagle surmounted by yellow outline star, all on a red field.

ALGERIA

(Republic of Algeria)

President, Ahderrahman Farès.

Vice-President, Dr. Roger Roth.

*Provisional Executive**

The Executive, installed on April 7, 1962, consists of the President and Vice-President, five other F.L.N. members, 3 other Moslems and 3 Europeans.

General Affairs, Dr. Chawki Mostefai.

Economic Affairs, Abdesselam Belafid.

Agriculture, Mohammed Cheikh.

Finance, Dr. Jean Mannoni.

Administration, Abderrazak Chentouf.

Public Order, Abdelkader El Hassar.

Social Affairs, Dr. Hadji Boumedienne Hamidou.

Public Works, Charles Koening.

Cultural Affairs, Sheikh Mohammed Bayoud.

Posts and Telegraphs, Mohammed hen Teftifa.

*Mr. Ben Bella was elected on Sept. 26, 1962, by the Algerian National Assembly to be the first Prime Minister of Algeria.

Algeria lies between 8° 45' W. to 12° E. longitude, 37° 6' N. to a southern limit about 19° N. Area, 855,900 sq. miles (estimated). Population (1960), about 10,095,000.

CAPITAL.— Ψ Algiers, population (1961), 870,000.

Government.—Algiers surrendered to a French force on July 5, 1830, and Algeria was annexed to France in Feb. 1842. From 1881 the three northern departments of Algiers, Oran and Constantine formed an integral part of France. Between 1955 and 1960 these were re-organized to form 13 departments: Algiers, Tizi-Ouzou, Orleansville, Médéa, Constantine, Bône, Setif, Batna, Oran, Tlemcen, Mostaganem, Saida and Tlaret. An armed rebellion led by the Moslem *Front de Libération Nationale (F.L.N.)* against French rule broke out on Nov. 1, 1954. On May 13, 1958, demonstrations by the European population in favour of keeping Algeria French led to the formation of a Committee of Public Safety under the Commander-in-Chief, General Salan, and to the investiture of General de Gaulle as Prime Minister of France on June 1, 1958. General Salan became Delegate General of the French Government in Algeria. He was succeeded in December, 1958, by M. Paul Delouvrier.

On September 16, 1959, General de Gaulle announced plans for the self-determination of Algeria, but the Moslem Nationalist Rebellion continued. In January 1960, the European population of Algiers staged a seven-day revolt against General de Gaulle's policy, and barricades were erected in the streets. Peace talks between representatives of the French government and the Moslem Nationalist Leaders at Melun in June, 1960, proved abortive. M. Paul Delouvrier was replaced as Delegate General by M. Jean Morin on November 19, 1960. Further European riots at Algiers and other cities against the self-determination policy took place in Algeria in December, 1960, and were followed by Moslem demonstrations in favour of an independent Algeria.

On April 22, 1961, a military junta led by a former Commander-in-Chief in Algeria, General Challe, and pledged to ensure that Algeria would remain French, seized power in Algiers, but the revolt collapsed within four days. A further series of peace talks between representatives of the French Government and the Nationalists opened at Evlau on May 20, 1961. After two interruptions, agreement was finally reached between the French Government and the representatives of the Algerian Nationalists on March 19, 1962. This agreement covered future relations between France and Algeria if a referendum in Algeria confirmed the choice of the Algerian people for independence with continued cooperation with France. The terms of the agreement were confirmed by a referendum in France on April 8 and further by a referendum held in Algeria on July 1. President de Gaulle declared Algeria independent on July 4. (See also EVENTS OF THE YEAR.)

French Ambassador in Algiers, Jean-Marcel Jeanneney.

Economic.—Total value of imports in 1961 was N.F. 5,055,000,000 and of exports 1,820,000,000. The bulk of the trade is with France.

Trade with U.K.

	1960	1961
Imports from U.K. . .	£3,258,171	£3,005,978
Exports to U.K. . . .	12,073,485	9,208,780

Exports are mainly wine, barley and other cereals, skins, olives, fruits, iron and zinc ores, phosphate rock, corkwood, esparto grass, manufactured tobacco, vegetables and crude petroleum. The principal imports from the United Kingdom

were tractors and agricultural machinery, earth-moving and public works machinery, engines, machine tools and other machinery, rubber manufactures and metal manufactures. Natural gas from the Sabara is being supplied to the coastal area and exported in specially-designed tankers. There are plans for a pipe-line to France. In a few years crude oil and natural gas will probably represent important elements in the Algerian economy. Iron, zinc, lead and quicksilver mines are being worked. In 1961 there were 2,580 miles of railways open for traffic, and in 1961 the number of ships in foreign trade entering Algerian ports was 24,863. 34,473 commercial aircraft arrived at or departed from Algerian airports in 1961.

The principal town is Ψ Algiers, the capital. It has expanded considerably in the last six years and its population (1960) is 870,000. Other towns include Ψ Oran (430,000), Constantine (217,000), Ψ Bône (144,000), Sidi-Bel-Abbes (101,000), Tlemcen (80,000), Ψ Philippeville (85,000), Blida (87,000), Mostaganem (64,000), Tizi Ouzou (40,000).

Saharan Departments (previously known as the Southern Territories).—The territories of Ain Sefra, Ghardaia, Touggourt and the Saharan Oasis were formed into a separate colony on December 24, 1902. In 1957, a Ministry for the Sabara was set up in Paris, and two Saharan Departments, Saoura and the Oasis, were formed, with administrative headquarters at Colomb-Béchar and Laghouat respectively. (The administrative capital of the Oasis was moved to Ouargla in 1959). The Saoura consists of the former territories of Ain Sefra and the Oasis, of the former Territory of that name, together with parts of Ghardaia and Touggourt. The parts of Ain Sefra, Ghardaia and Touggourt lying north of the Saharan Atlas mountains were merged with the Algerian Departments of Saida and Médéa. In 1957, a joint organization for the Sahara (O.C.R.S.) was set up to control the economic development of the entire Saharan region, including the former French Sudan (now Mali), Niger and Chad, which were represented on the mixed Commission, and a Delegate General was appointed by the French Government to be responsible for the execution of the programme and for defence and public order. In May, 1961, the O.C.R.S. was re-organized so as to separate the functions of the Minister of the Sahara and those of the Delegate General to the O.C.R.S.

Oil, natural gas and iron ore were found to exist in quantities in the Saharan regions. Substantial oil and gas deposits are now being worked. In 1961, 8,400,000 tons of crude oil were exported.

ANDORRA

A small, neutral principality situated on the southern slopes of the Pyrenees, between Spain and France, with an approximate area of 180 square miles and population of approximately 6,000. It is surrounded by mountains which attain an altitude of from 6,500 to 10,000 feet. Historians place the origin between the eighth and ninth centuries. Andorra is divided into six Parishes each of which has four Councillors elected by vote to the Valleys of Andorra Council of Twenty-four (Heads of families only may vote). The nominal heads of the state are the Bishop of Urgel, Spain, and the President of the French Republic. These two "co-princes" can veto certain decisions of the Council of the Valleys but cannot impose their own decisions without the consent of the Council. Each co-prince nominates his own representative and has a Permanent Delegation and a Supreme Tribunal for the hearing of civil causes. These two Tribunes together form the Supreme Courts. The official language of the country is Catalan. Spanish *pesetas* and French *francs* are the accepted

currency. A good road crossing the Valleys from Spain to France is open most of the year. Andorra has deposits of iron and quantities of alum and lead, stone quarries, granite, jasper and marble. Slate is abundant. Timber includes pine, fir, oak, birch and box-tree. Potatoes and cereals are produced in the highlands and tobacco in the plains. The climate is naturally cold for six months, but mild in spring and summer. The mountain slopes are suitable for skiing, and it is estimated that 400,000 tourists visit the Valleys during the year. The imports from U.K. during 1961 were £42,939.

There are two radio stations in Andorra, one privately-owned and one operated by a French Government corporation. Both pay dues to the Council of the Valleys.

CAPITAL: Andorra la Vella (population 2,200).

FLAG.—Three vertical bands, blue, yellow, red; Andorran coat of arms frequently imposed on central (yellow) band but not essential.

H.M. Consul-General, L. Pott, C.B.E. (*Resident at Marseilles*).

ARABIA

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E. long. and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Muscat and Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, Dahana, and Rub Al Khali deserts), and the total population is believed to be about 10,000,000.

Language and Literature.—Arabic is spoken not only in Arabia, but in many other countries, either as the principal or auxiliary tongue, notably in Egypt and the Sudan, Libya, Morocco, Algeria, Iraq, Jordan, Syria, Lebanon; and to some extent also in Nigeria, Madagascar and Zanzibar. Owing to Moorish incursions it was formerly spoken in Spain, the Balearic Islands and Sicily. There are anthologies of pre- and post-Islamic poetry and a considerable prose literature, including popular romances and story cycles (such as "The Thousand Nights and One Night"), historical and biographical studies, and, resulting from the westernizing movement, there is a general revival of learning among Arabic speaking peoples. Many daily newspapers are published in Arabic and there is a native Arabic drama.

See also.—BAHRAIN; KUWAIT; MUSCAT AND OMAN; QATAR; SAUDI ARABIA; TRUCIAL STATES; YEMEN.

ARGENTINE REPUBLIC

(República Argentina.)

President, Dr. José María Guido; born August 20, 1910; assumed office, March 29, 1962.

CABINET.

Minister of the Interior (vacant).

Foreign Affairs (vacant).

Economy, Ing. Alvaro Alsogaray.

Education and Justice, Dr. Miguel Sussini.

National Defence (vacant).

Social Assistance and Public Health, Dr. Tiburcio Padilla.

Labour and Social Security, Sr. Galilco Puente.

Public Works and Service, Ing. Julio C. Crivelli.

Secretaries of State (*Subordinate to the Minister of Economy*):

Agriculture and Livestock, Dr. Cesar I. Urien.

Treasury, Dr. Rafael Ayala.

Commerce, Dr. Jorge Zaefferer Toro.

Industry and Mining, Sr. Fernando Meijide.

Fuel and Power, Dr. Jorge Bermudez Emperanza. (*Subordinate to the Minister of National Defence*):

War, Gen. Juan Bautista Loza.

Marine (vacant).

Air, Brig. Jorge Rojas.

(*Subordinate to the Minister of Public Works and Services*):

Communications, Gen. Pedro Maristani.

Transport, Ing. Roberto Servente.

EMBASSY IN LONDON.

9 Wilton Crescent, S.W.1.

[Belgravia: 3717]

Antibassador (vacant).

Counsellors, Dr. Juan Angel Peña Gaona; Luis Francisco Bengolea.

Military Attaché, Col. Ricardo Gutiérrez.

Naval Attaché, Capt. Raúl Francos.

Air Attaché, Commodore Egidio José Eyherabide.

Economic Counsellor, Raúl E. Delean del Castillo.

Financial Counsellor, Dr. Carlos C. Helbling.

First Secretaries, Andres E. Ceustermans; Federico Diego Erhart del Campo.

Second Secretary, Vicente Guillermo Arnaud.

Third Secretaries, Roberto Dellepiane Rawson; Guillermo Jorge McGough.

Economic Counsellor, Dr. Alfredo Louro.

Consul-General, Raúl Eduardo Sidders.

Consulate-General, 53 Hans Place, S.W. 1 (Knights-bridge: 1701).

There are also Consulates in Liverpool and Cardiff.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaux, extend from the northern to the southern boundaries: on the east are the great plains. Those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas extending from the Bolivian boundary in the north to the Río Negro; and south of the Río Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Córdoba by the San Luis

and Córdoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahía Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course in Argentina; and the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Río Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic. The climate ranges from sub-tropical to cold temperate.

The Republic consists of 23 provinces and one federal district (Buenos Aires), comprising in all an area of 1,079,965 square miles, with an estimated population of 20,959,100 (June 30, 1960).

In 1959 births numbered 467,300 and deaths 165,000, and in Jan.-June, 1960, 228,700 and 81,500 respectively.

Government.—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. This city was abandoned and later founded once more by Don Juan de Garay in 1580. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9), after a long campaign of liberation conducted by General José de San Martín, the independence of Argentina was declared by the Congress of Tucumán. A revolt in September, 1955, overthrew the Government under the presidency of General Juan D. Perón and an interim Provisional Government was formed by the late General Eduardo Lonardi. This Provisional presidency passed to General Pedro Aramburu in November, 1955.

A Constituent Assembly, elected on July 28, 1957, decided that the country should revert to the 1853 Constitution, in accordance with which, on February 23, 1958, general elections were held and Dr. Arturo Frondizi was elected President and Dr. Alejandro F. Gomez, Vice-President, for the normal period of six years. They assumed office on May 1, 1958, but several months later, owing to dissensions, Dr. Alejandro Gomez, the Vice-President, was forced to resign. The vice-presidency has not since been filled. Following Peronist victories in the partial elections of March, 1962, the armed forces arrested Dr. Frondizi and the Chairman of the Senate. Dr. Guido then assumed the Presidency. The elections were later annulled and Congress declared to be in recess.

Agriculture.—Of a total land area of approximately 700,000,000 acres, farms occupy about 425,000,000. About 60 per cent. of the farmland is in pasture, 10 per cent. in annual crops, 5 per cent. in permanent crops and the remaining 25 per cent. in forest and wasteland. A large proportion of the land is still held in large estates devoted to cattle raising but the number of small farms is increasing. The principal crops are wheat, maize, oats, barley, rye, linseed, sunflower seed, alfalfa, sugar and cotton. Argentina is pre-eminent in the production of beef, mutton and wool, being self-sufficient in basic foodstuffs and conducting a large export trade in many others. Pastoral and agricultural products provide more than 90 per cent. of Argentina's exports and they originate mainly from the pampas or rich central plain which embraces the

provinces of Buenos Aires, Santa Fé, Entre Rios, Córdoba and La Pampa.

The following table shows the yield of the more important crops:

Crop	1960-61 Tons
Wheat.....	3,960,000
Maize.....	930,000
Linseed.....	562,000
Oats.....	843,000
Barley.....	773,000
Rye.....	595,000
Sunflower seed.....	600,000
Rice.....	152,000
Canary seed.....	24,800
Cotton (fibre production).....	90,000
Sugar cane.....	9,800,000
Millet.....	257,000
Tea.....	25,930
Tobacco.....	42,600

Livestock.—Livestock population (in millions) in 1959 was: cattle, 41; sheep, 46; pigs, 4; horses, 5.5; and goats, 5. 9,200,000 cattle, were slaughtered in 1959. 8,700,000 sheep and 2,000,000 pigs. Cattle stocks are estimated at 46,000,000 head. Meat exports to U.K. in 1960 were 243,000 tons, compared with 258,000 in 1959; total meat exports fell from 512,728 tons in 1959 to 414,492 tons in 1960.

Mineral Production.—Oil is found in various parts of the Republic and is obtained to a considerable extent at Comodoro Rivadavia (Chubut), Mendoza, Plaza Huincul (Neuquen), Tartagal (Salta) and in other districts. A natural gas pipeline between Comodoro Rivadavia and Buenos Aires has been in operation since 1949. An oil pipeline from Campo Duran (Salta) to a refinery in San Lorenzo (Santa Fé) was put in service in March, 1960, as was also a natural gas pipeline from the same source to the outskirts of Buenos Aires.

The production of oil is of first importance to Argentina's rapidly expanding industries and, to some extent, to her economic and financial development. The crude oil output in 1960 and 1961 was:

	1960	1961
	Cubic Metres	
State oilfields and tractors.....	9,591,200	12,908,300
Private companies.....	561,700	520,000
Total.....	10,152,900	13,428,300

Coal, lead, zinc, tungsten, iron ore, sulphur, mica and salt are the other chief minerals being exploited. There are small worked deposits of beryllium, manganese, bismuth, uranium, antimony, copper, kaolin, arsenate, gold and silver. Coal production is approximately 300,000 tons per year (1961, 342,000 tons); this is produced at the Río Turbio mine in the province of Santa Cruz. The output of other materials is not large but greater attention is now being paid to the development of these natural resources.

Industries.—Meat-packing is one of the principal industries; flour-milling, sugar-refining, and the wine industry are also important. In recent years great strides have been made by the textile industry and in engineering, especially in the production of motor vehicles and steel manufactures.

Communications.—There are 27,874 miles of railways of which 15,604 miles are broad gauge (5' 6"), 1,940 miles standard (4' 8½"), 9,664 miles of 1 metre, 537 miles of 0.75 metre and 129 miles of 0.60 metre. They are all State property. Plans are in hand for complete re-organization of the railways which is expected to bring a substantial reduction in the lengths of lines operated. The

combined national and provincial road network totals approximately 91,500 miles of which 7,500 miles are surfaced. World Bank and other important loans are to be used for a considerable extension and surfacing improvement. There are air services between Argentina and all the neighbouring republics, Europe, Canada and the U.S.A.

Total tonnage entering Argentine ports was 9,418,876 in 1961. Of the latter figure, 1,287,713 tons were Argentine; 1,482,788 British; 932,316 Norwegian; 789,357 Italian; 782,404 U.S.A.; 649,694 Netherlands; 504,430 Panamanian; 414,506 German; 395,493 French; 317,509 Swedish; 308,798 Liberian; 304,801 Greek; 351,015 Spanish and 203,897 Danish.

There are now 13 short-wave broadcasting stations, 67 medium wave (of which 17 are official), 4 television stations in Buenos Aires, 1 each in Mar del Plata, Mendoza and Córdoba. Television receivers numbered 800,000 at the end of 1960.

Defence.—The Army is organized in 5 infantry, 1 motorised, 1 armoured and 3 cavalry divisions and 3 mountain groups, and numbers about 5,000 officers, 15,000 N.C.O.s and 65-70,000 men on a peace footing.

The Navy consists of 2 cruisers, 1 aircraft carrier, 1 training cruiser, 9 destroyers, 7 frigates, 1 ice-breaker, 8 minesweepers, 9 motor torpedo boats, 2 submarines, 23 landing craft, 7 oilers, 8 transports, 2 survey ships and auxiliary vessels; 4 squadrons Naval Air Arm. Strength about 2,000 officers and 25,000 men.

The Air Force consists of 5 brigades and a training force, with a strength of about 1,500 officers and 35,000 other ranks. The aircraft include Meteor IV., Lincoln, Lancaster, Viking, Bristol 170 and Dove.

Education.—Primary Education is free and compulsory for four years between the ages of 6 and 14. The scattered population of the country districts constitutes a problem in attendance which is being gradually solved. Illiteracy of adults has fallen in the last 20 years; it is now almost non-existent except in the north and far south, where it is still about 42 per cent. Secondary Education is controlled by the National Government in National Colleges, in Normal Schools, and in Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are National Universities at Córdoba, Buenos Aires, San Miguel de Tucumán, Santa Fé, Mendoza, La Plata and Bahía Blanca.

Language and Literature.—Spanish is the language of the Republic and the literature of Spain is accepted as an inheritance by the people. There is little indigenous literature before the break from Spain, but all branches have flourished since the latter half of the nineteenth century, particularly journalism. Under the Perón régime many newspapers and reviews were closed down and others turned into Government mouthpieces. Since the 1955 revolution the traditional freedoms have been restored. Over 400 daily newspapers are published in Argentina, including 64 in the city of Buenos Aires. The English language newspaper is the *Buenos Aires Herald* (daily). There are numerous other foreign language newspapers.

[Belgravia: 3731]

Ambassador in London, His Excellency Dr. Johannes Schwarzenberg (1955).

Counsellor, Dr. Friedrich Kudernatsch.

2nd Secretaries, Dr. Egon Libsch; Dr. Heinrich Blechner.

Military and Air Attaché, Lt.-Col. Franz Attems-Petzenstein.

Attachés, Dr. Peter Jankowitsch; Dr. Franz Parak.

Austria is a country of Central Europe bounded on the north by Czechoslovakia, on the south by Italy and Yugoslavia, on the east by Hungary, on the north-west by Germany and on the west by Switzerland. Its area is 32,376 square miles and its population 7,067,432 (1961).

Government.—The Austrian Federal Republic comprises nine States (Vienna, Lower Austria, Upper Austria, Salzburg, Tyrol, Vorarlberg, Carinthia, Styria and Burgenland) and was established in 1913 on the break-up of the Austro-Hungarian Empire. On March 13, 1938, as a result of the *Anschluss*, Austria (*Oesterreich*) was incorporated into the German *Reich* under the name *Ostmark*. After the liberation of Vienna in 1945, the Austrian Republic was reconstituted within the frontiers of 1937 and, after a period of provisional government, a freely elected Government took office on December 20, 1945. The country was divided at this time into four zones occupied respectively by the U.K., U.S.A., U.S.S.R. and France, while Vienna was jointly occupied by the four Powers. On May 15, 1955, the Austrian State Treaty was signed in Vienna by the Foreign Ministers of the four Powers and of Austria. This Treaty recognized the re-establishment of Austria as a sovereign, independent and democratic state, having the same frontiers as on January 1, 1938. It entered into force on July 27, 1955.

There is a National Assembly of 165 Deputies. At the last general elections in May, 1959, the Government Coalition of Austrian People's and Socialist Parties increased its large majority by one seat. The present state of the parties is as follows:

Austrian People's Party.....	79
Socialist Party.....	78
Freedom Party (right wing).....	8

Religion and Education.—The predominant religion is Roman Catholic. Elementary education is free and compulsory between the ages of 6 and 14, and there are good facilities for secondary, technical and professional education. There are Universities at Vienna, Graz and Innsbruck.

Language and Literature.—The language of Austria is German, but the rights of the Slovene- and Croat-speaking minorities in Carinthia, Styria and Burgenland are protected. The press is free. There are now 10 daily papers in Vienna and 23 in the provinces, as well as numerous weeklies and monthlies.

Production and Industry.—Agriculture is the most important industry, the arable land producing wheat, rye, barley, oats, maize, potatoes, sugar beet, turnips, and miscellaneous crops. Many varieties of fruit trees flourish and the vineyards produce excellent wine. The pastures support horses, cattle and pigs. Timber forms a valuable source of Austria's indigenous wealth with about 35 per cent. of the total land area consisting of forest areas. Coniferous species predominate and account for more than 80 per cent. of the timber under cultivation. Hard-wood trees are mainly confined to Lower Austria. Spruce is the most common among the conifers (about 60 per cent. of

the total) and beech is the most prevalent of the broad leaf trees.

Austria has important heavy industries. Production figures for 1961 include (in thousands of metric tons): pig iron 2,262, crude steel 3,101, rolled products 2,119. Raw magnesite, nitrogenous fertilizers, paper and chemical pulp are produced in quantity. In addition, motor cycles and motor-scooters, tractors and motor lorries are produced.

Hydro-electric power offers great possibilities in Austria. Much has already been done to develop it, and a long-term plan has been evolved for further development including greater export of electric current to surrounding countries. Production in 1961 was 16,628 million kWh.

Minerals.—There are large iron ore deposits and, in Eastern Austria, large oil deposits. In addition there are useful deposits of brown coal, magnesite, salt and lead. There are also limited deposits of copper.

FINANCE.

Budget	1961 (Schillings)
Ordinary Budget:	
Expenditure.....	47,001,000,000
Revenue.....	48,884,000,000
Extraordinary Budget:	
Expenditure.....	2,840,000,000
Revenue.....	40,000,000

Trade with U.K.

	1960	1961
Imports from U.K....	£21,146,469	£21,938,551
Exports to U.K.....	11,788,986	14,159,599

Currency.—The unit of currency is the *Schilling* of 100 *Groschen*, reintroduced in December, 1953. The official rate of exchange was fixed in May, 1953, at 72.80 Austrian schillings=£1, for all purposes.

CAPITAL, Vienna, on the Danube, population 1,627,566. Other towns are Graz (237,080), Linz (195,978), Salzburg (108,114), Innsbruck (100,695) and Klagenfurt (69,218).

FLAG.—Horizontal stripes of red, white, red, with eagle crest on white stripe.

BAHRAIN

Ruler, H. H. Shaikh Isa bin Sulman Al Khalifah, born 1932; acceded Nov. 2, 1961.

Bahrain consists of a group of low-lying islands situated halfway down the Persian Gulf some 20 miles off the east coast of Arabia. The largest of these, Bahrain Island itself, is about 30 miles long and 10 miles wide at its broadest. The two most important towns are Manama (61,726) and Muharraq (32,302). The latter is situated on a separate island of the same name which is connected with Bahrain Island by a causeway 1½ miles long. The population of the islands at the Census held in 1959 was 143,135, of whom about half are the original inhabitants belonging to the Shia Sect, the remainder, including the ruling family, being Sunnis. There are 2,815 Europeans and Americans (about

75 per cent. of whom live at the Bahrain Petroleum Company's town of Awall) and 21,586 non-Bahrainis of whom about half are Iranians, Indians and Pakistanis. The standard of living is high among the large and influential merchant class and steadily rising among the lower social groups.

Bahrain enjoys a typical Persian Gulf climate with long, mild winters and an annual rainfall of about 3". Summer extends from May to October, with temperatures between 90° F and 100° F and humidity often approaching 100 per cent. The surrounding sea abounds in a variety of fish, and some of the best prawns in the world inhabit the warm sheltered waters.

The ruling family (Al Khalifah) came originally from the neighbourhood of Kuwait and occupied Bahrain, which was then in the hands of the Persians, in 1782. The state is administered under the Ruler by a number of departmental heads whose activities are co-ordinated by the Secretariat. A small Administration Council consisting of members of the ruling family and heads of departments has been created by the Ruler to consider and advise on general matters; Health, Education, Port, Agriculture and Water Councils exist to advise the respective departments. Local government is the responsibility of six municipalities and the Rural Affairs Department which cares for the villages. Half of the members of four of the municipal councils (Manama, Muharraq, Rifaa and Hidd) are elected by the public and half nominated by the Government; all the members of the other two, which were created later (Sitra and Jidhafs) are nominated by the Government. In addition to the Department of Rural Affairs, there is a Department of Social Affairs, a Labour Department, a Lands Department and a Public Works Department. There is free primary and secondary education and free medical treatment.

In earlier days the only industry was the pearl trade, of which Bahrain was an important centre, but this has declined since the advent of the cultured pearl and petroleum dominates the scene. Oil was discovered in 1932 and The Bahrain Petroleum Company, Limited (BAPCO), has its headquarters in Awall, some eleven miles from Manama. The company also operates a refinery and about 80 per cent. of the oil refined is piped from Saudi Arabia.

The second source of revenue is that of Bahrain's traditional *entrepôt* trade. The island is conveniently situated to handle goods in transit to the mainland and it is estimated that not less than 70 per cent. of the imports unloaded at Bahrain were, up to a few years ago, destined for onward movement. A decline in this *entrepôt* trade has, however, occurred as there is a growing tendency, as new developments occur, for eastern Saudi Arabia, Qatar and other places in the Gulf to import direct. (In 1960 Bahrain re-exported 36.45 per cent. of its imports and in 1961, 25.71 per cent.) To counteract this trend and to encourage the *entrepôt* trade, free transit facilities were introduced in the port of Bahrain on January 1, 1958, and a new harbour, named the Mina Sulman after the late Ruler, was opened in May, 1962.

The principal imports and re-exports are household goods, foodstuffs, piece-goods, timber and building materials (especially cement), vehicles and machinery.

Manama, the capital and commercial centre, extends for two miles along the northern shore of Bahrain Island and is a regular port of call for thirty steamship lines. Bahrain is also a port of call for B.O.A.C. and other international airlines, with a newly-opened air terminal and facilities for jet airlines. Banking services are provided by the Bank of Bahrain and by branches of the Eastern

Bank, the British Bank of the Middle East and of the Arab Bank. There is a radio-telephone service to the United Kingdom and many other parts of the world. The electricity supply system is being extended over the island and piped water supplies are being introduced into the principal towns and villages.

The principal coin in use is a rupee introduced especially by the Reserve Bank of India for circulation in the Persian Gulf States. The value of this special rupee is the same as that of the Indian rupee (Rs. 13.285 = £1).

FLAG: Red, with vertical straight or serrated white bar next to staff.

CAPITAL, ♀ Manama; population, 61,726. *Secretary to the Government*, G. W. R. Smith, M.B.E. *H.M. Political Agent*, E. P. Wiltshire (1959). Bahrain is the headquarters of H.M. Political Resident in the Persian Gulf, Sir William Luce, G.B.E., K.C.M.G.

BELGIUM

(Royaume de Belgique.)

King of the Belgians, H.M. King Baudouin, born Sept. 7, 1930; succeeded July 17, 1951, on the abdication of his father, King Leopold III, after having acted as Head of the State since August 11, 1950; married Dec. 15, 1960, Doña Fabiola de Mora y Aragón.

Heir Presumptive, H.R.H. Prince Albert, born June 6, 1934, brother of the King; married July 2, 1959, Donna Paola Ruffo di Calabria, and has issue Prince Philippe Léopold Louis Marie, b. April 15, 1960; Princess Astrid Josephine-Charlotte Fabrizia Elisabeth Paola Marie, b. June 5, 1962.

Agricultural Attaché, M. Maurice Cammaerts.

Attachés, M. Jean Coene; M. Maurice Carmen; Mlle. F. van Haelewyck.

A Kingdom of Western Europe, with a total area of 11,775 square miles and a population, Dec. 31, 1961 (including Eupen and Malmedy) of 9,228,729. The Kingdom of Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea.

Belgium has a frontier of 831 miles, and a sea-board of 42 miles. The Meuse and its tributary, the Sambre, divide it into two distinct regions, that in the west being generally level and fertile, while the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dykes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 526 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 49° F. (summer 65°, winter 37°).

Belgium is inhabited by two distinct races, the Flemish, of Germanic stock, and the Walloons, of Latin stock. Since 1938 there has been an increase in the Flemish population of almost 517,000 and in the Walloon population of about 100,000. Nearly all the inhabitants are Roman Catholics.

Government.—The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium, in violation of the terms of the treaty.

The Kingdom was again invaded by Germany on May 10, 1940. The whole Kingdom eventually fell into enemy hands and was occupied by Nazi troops until the victorious advance of the Allies in September, 1944. A monument at Hertain in the province of Hainault (where British forces crossed the frontier on Sept. 3, 1944), set up by the Anglo-Belgian Union, was unveiled on St. George's Day, 1949.

According to the Constitution of 1831 the form of government is a constitutional representative and hereditary monarchy with a bicameral legislature, consisting of the King, the Senate and the Chamber of Representatives. The Senate is partly directly and partly indirectly elected (or co-opted) for 4 years. 100 members out of 175 are directly elected. The Chamber of Representatives consists of not more than 1 per 40,000 inhabitants and is elected directly by all adult nationals.

The elections of March 26, 1961, returned to the Senate 81 Social Christians (Catholics), 73 Socialists, 17 Liberals, 1 Communist and 3 others, total, 175; and to the Chamber of Representatives 96 Social Christians (Catholics), 84 Socialists, 20 Liberals, 5 Communists and 7 others, total 212.

Production.—Belgium is essentially a manufacturing country. With no natural resources except coal, annual production of which formerly

averaged some 30,000,000 tons but which dropped to 21,512,000 tons in 1961 following the closing of uneconomic pits, industry is based largely on the processing for re-export of imported raw materials. A large proportion of the population is engaged in agriculture and forestry, the former supplying four-fifths of the population's needs. Principal industries are coal, steel and metal products (Mons, Charleroi, Liège, Namur, Hainault, Brabant and Limburg), textiles (Ghent, Bruges, Courtrai, Verviers, etc.), glass, nitrogen, heavy chemicals, sugar, breweries, etc. Steel output in 1961 was 6,880,000 metric tons.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 261 State grammar and high schools. In addition there are 83 elementary schools under the control of the State and 296 under the control of local government authorities. There are 1,037 private colleges and secondary schools. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are independent institutions. After considerable opposition, Ghent University was in 1930 turned into a purely Flemish institution.

Language and Literature.—Flemish is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half of Brabant, and French in the provinces of Hainault, Namur, Luxemburg, Liège and the southern half of Brabant. Legislation enacted on Feb. 15, 1962, provided for a fixed linguistic border between the Flemish-speaking and French-speaking areas of Belgium. Flemish is recognized as the official language in the northern areas and French in the southern (Walloon) area and there are guarantees for the respective linguistic minorities. The City of Brussels and the University of Louvain are bilingual, though the latter is situated in a Flemish-speaking area. The linguistic border runs from a point south of Ypres and on the French frontier, to a point south of Brussels, then to a point north of Liège and east to the German frontier south of Aachen.

The literature of France and the Netherlands is supplemented by a current of indigenous Belgian literary activity, in both French and Flemish. Maurice Maeterlinck (1862-1949) was awarded the Nobel Prize for Literature in 1911. Louvain library, which ranked among the great libraries of the world, was destroyed by German invaders in the war of 1914-18; reconstructed, mainly by American funds, after peace was declared, it was again destroyed in May, 1940, by German invaders. There are about 58 daily newspapers (French, Flemish and some German) in Belgium.

FINANCE.

Francs

Revenue (1962) Ordinary Budget estimate).....	131,750,176,000

Total Imports	Fr. 197,854,439,000	Fr. 210,951,736,000
Total Exports	188,771,893,000	196,219,720,000

Trade with U.K.

	1960	1961
Imports from U.K.	£64,741,122	£77,253,887
Exports to U.K.	68,205,930	64,873,820

COMMUNICATIONS.—On Dec. 31, 1961, there were 4,620 kilometres of normal gauge railways operated by the Belgian National Railways, of which 956 kilometres were electrified; the length of light railways operated in 1961 was 821 kilometres (of which 708 were electrified). Belgian National Railways also operate 9,202 kilometres of regular bus routes. On Dec. 31, 1961, there were 823,643 telephone subscribers in Belgium.

Ship canals include *Ghent-Terneuzen* (18 miles, of which half is in Belgium and half in the Netherlands; constructed 1825-27) which, under the terms of an agreement recently signed by the Belgian and Netherlands Governments is to be improved to permit the passage to Ghent of ships up to 50,000 tons; *Roupele* (20 miles, by which ships drawing 18 ft. reach Brussels from the sea; opened in 1922); and *Bruges* (from Zeebrugge on the North Sea to Bruges, 6½ miles; opened in 1922). The *Albert Canal* (79 miles), which figured prominently in the fighting (Sept. 1944), for the relief of Belgium and the Netherlands and for the invasion of Germany, links Liège with Antwerp; it was completed in 1939 at the cost of £13,500,000, and accommodates barges up to 1,350 tons. The modernization of the port of Antwerp begun in 1956 is now well advanced. Inland waterway approaches to Antwerp are also to be improved. The river Meuse from the Dutch to the French frontiers, the river Sambre between Namur and Monceau, the river Scheidt from Antwerp-Ghent and the Brussels-Charleroi Canal will be widened or deepened to take barges up to 1,350 tons. These improvements are expected to be completed in 1966 and to cost £78,500,000. There are 10,169 kilometres of State roads and 1,288 kilometres of provincial roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine consisting (1961) of 91 vessels (625,667 tons), in addition to which there are 412 fishing boats (29,580 tons).

The Belgian National Airline operates regular services between Brussels and London, Manchester and many continental centres, as well as overseas services to the United States, the Congo and the U.S.S.R. A passenger and mail-carrying helicopter service, the first of its kind in the world, was inaugurated in 1953. Many foreign air-lines call at Brussels.

CITIES AND TOWNS.

The Capital, BRUSSELS, had a population (Dec. 31, 1961) of 1,019,543 (with suburbs). Other towns are Ψ Antwerp, the chief port (643,464); Ψ Ghent (229,860), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; Liège (448,155), the centre of the iron industry, and Charleroi (283,221), the important coal-mining and metallurgical centre; Mecheien or Malines (64,701); Ψ Ostend (56,747); Ψ Bruges (52,167). Brussels is 224 miles from London; transit, by rail and sea, 8 hrs.; by air, 1 hr.

NATIONAL FLAG.—3 vertical bands, black, yellow, red.

BHUTAN

Bhutan (area, about 18,000 sq. miles; pop. about 700,000, mainly Buddhists) is an independent State bounded on the North and East by Tibet, on the South by India, and on the West by Sikkim, which is now a Protectorate of the Republic of India. In 1949, a treaty was concluded with the Government of India under which the Kingdom of Bhutan agreed to be guided by the Government of India in regard to its external relations, but it still retains complete independence, issues its own passports and has diplomatic representatives in Tibet as well as in India. It also receives from the Government of India an annual payment of about £35,000 as compensation for portions of its territory annexed by the British Government in India in 1864. The principal cottage industries are weaving, metal works and crafts, and the main exports are timber, rice and wheat. The first motor road in Bhutan, 107 miles long, from Paro, the winter capital, to Phuntsholing in W. Bengal, was completed in February, 1962. The road took 2 years to build and reaches a height of 8,500 feet above sea level. Three other roads linking Bhutan with India are under construction or projected. The present Ruler is Maharaja Jigme Dorji Wangchuk who was born in 1929 and succeeded his father in March, 1952. The Government of India has a diplomatic representative whose headquarters are situated at Gangtok, capital of the neighbouring State of Sikkim.

CAPITAL, Punakha.

BOKHARA. See U.S.S.R.

BOLIVIA

(República de Bolivia)

President of the Republic, Señor Victor Paz Estensoro, assumed office, August 6, 1960.

EMBASSY IN LONDON.

106 Eaton Square, S.W.1

[Belgravia: 4248]

Ambassador, His Excellency Don Manuel Barrau Pelaez (1959).

Consulate, 106 Eccleston Mews, S.W.1.

Hon. Consul, Reginald Bird.

There are Bolivian Consular Offices in *Liverpool*, *Birmingham*, *Hull*, *Cardiff* and *Glasgow*.

The Republic of Bolivia extends between lat. 10° and 23° S. and long. 57° 30' and 69° 45' W., and its area is estimated at 415,000 square miles with an estimated population (1960) of 3,462,002. The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830).

The executive power is vested in a President elected for 4 years by direct popular vote. Under the 1961 Constitution, a President may be re-elected for a second term; after this 4 years must elapse before he is again eligible for election. A Vice-President is elected for 4 years and may be re-elected for a second term or as President; after a total of two terms, 4 years must elapse before he is again eligible for election. Since 1952 the National Revolutionary Movement has been in power. Dr. Paz was President from 1952 to 1956, Dr. Hernan Siles Zuazo from 1956 to 1960 and Dr. Paz was re-elected in 1960.

The National Congress consists of a Senate of 27 members elected for 6 years, with one-third renewable every two years and a Chamber of Deputies of 68 members elected for four years, one-half renewable every two years.

The chief topographical feature is the great central plateau (65,000 square miles) over 500 miles in length, at an average altitude of 12,500 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu, Illimani, and Sajama, three of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamore, and Madre de Dios.

Mining, petroleum and agriculture are the principal industries. The ancient silver mines of Potosi are now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of Malaya, the largest in the world, 20,735 metric tons being exported in 1961: copper, antimony, lead, zinc, asbestos, wolfram, bismuth, salt and sulphur are found, and petroleum is also produced. The Republic has been self-supporting in most petroleum products since January, 1954, and crude petroleum exports in 1961 to neighbouring countries, mainly Argentina, were valued at over \$U.S. 2,138,000. Its agricultural produce consists chiefly of rice, barley, oats, sugarcane, maize, cotton, indigo, rubber, cacao, potatoes, cinchona bark, medicinal herbs, brazil nuts, &c. Manufactures are in a very undeveloped state, but the Government plans to encourage their development under a policy of "diversification of the economy". There are 1,454 miles of railways in operation. New lines are under construction from Corumbá to Santa Cruz (405 miles) and from Yacuiba to Santa Cruz (312), both of which are virtually completed. Work on a third new line, from Cochabamba to Santa Cruz, was suspended some years ago. Another railway project from La Paz to Coroico is partially completed. There are about 10,950 miles of telegraphs, and wireless services between Riberalta, La Paz, Cobija, Capitandí (Chaco). There is direct railway communication to the sea at Antofagasta (32 hours), Arica (10 hours), and Mollendo (2 days), and also to Buenos Aires (3½ days); branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosi, and from Potosi to Sucre, the legal capital. The principal railway line is the Antofagasta and Bolivia railroad (749 miles), which is under British administration on behalf of the Bolivian Government. Communication with Peru is effected by rail to Guaquil and thence by steamer across Lake Titicaca to the railroad at Puno.

Commercial Aviation in Bolivia is conducted by Pan American-Grace Airways and Braniff Inter-

national Airways (American) and Lloyd Aereo Boliviano (Bolivian), the two former providing international connections with U.S.A., West coast South American countries, Canal Zone, Brazil and Argentina; Lloyd Aereo Boliviano, maintaining a service to Lima and Buenos Aires and attending to local flights, links La Paz with Oruro, Cochabamba, Santa Cruz and Trinidad, &c., and connects with LAN of Chile, Argentine Airlines and Cruzeiro do Sul of Brazil. There is a new line from La Paz to Asuncion and Buenos Aires, also operated by Lloyd Aereo Boliviano.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones, and Antofagasta by the "Pacific War" of 1879-1882.

Language and Literature.—The official language of the country is Spanish, but the Indian inhabitants (about two-thirds of the population) speak either Quechua or Aymará, the two races being more or less equal in numbers.

The Roman Catholic religion was disestablished in 1961 but relations between it and the State are good. Elementary education is compulsory and free and there are secondary schools in urban centres. The high percentage of illiterates is yielding to modern methods; all illiterates under 21 are nominally compelled to attend school. Provision is also made for higher education; in addition to St. Francisco Xavier's University at Sucre, founded in 1624, there are seven other universities, the largest being the University of San Andres at La Paz. Bolivian literature has not yet produced authors of world-wide renown. There are seven principal daily newspapers in Bolivia, with an estimated daily circulation of 80,000-100,000.

FINANCE.

The 1962 figure for estimated revenue and expenditure is Bs. 464,000,000,000.

On December 15, 1956, the *Boliviano* was made freely convertible for all purposes without restriction. The rate of exchange in 1961 was Bs. 11,865 = U.S. \$1; Bs. 33,222 = £1. (See also p. 84.)

Trade with U.K.

Imports from U.K.	£1,120,887	£1,081,488
Exports to U.K.	11,792,310	12,465,947

The principal exports are tin (almost all of which is exported to the U.K.), lead and antimony ores, silver, copper, wolfram, zinc, gold, nuts, hides and skins, vicuña wool and coffee; Bolivia also ranks as the second rubber-exporting country in South America after Brazil. The chief imports are wheat and flour, sugar, iron and steel products, machinery, vehicles and textiles.

SEAT OF GOVERNMENT, La Paz. Population (estimated 1960) 347,394. Other large centres are Cochabamba (90,037), Oruro (81,553), Santa Cruz (66,548), Sucre, the legal capital and seat of the judiciary (60,092), Potosi (53,528), and Tarija (20,127).

Commercial Attaché, Sr. Antonio Marinho.

CONSULATE-GENERAL IN LONDON.

Consul-General, Senhora Beata Vettorli.

Consul, Senhor Heitor Soares de Moura.

There are also Brazilian Consular offices at *Liverpool*, *Newcastle-on-Tyne*, *Southampton*, *Cardiff* and *Glasgow*.

POSITION AND EXTENT.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. Brazil extends between lat. 5° 16' N. and 33° 45' S. and long. 34° 45' and 73° 59' 22" W., being 2,683 miles from north to south, and 2,690 from west to east, with a coast-line on the Atlantic of 4,604 miles. The Republic comprises an area of 3,289,440 square miles with a population (estimated December, 1960) of 66,302,000.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Matto Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. The principal ranges are *Serra do Mar* in São Paulo; and the *Serra Geral* (Caparaó 9,393 feet) between Minas Gerais and Espírito Santo, the *Serra do Mantiqueira* (Itatiaia, 9,163 feet), and the *Serra do Espinhaço* (Itacolomi, 5,748 feet), in the south-east of Minas Gerais; and the *Serra do Paranaíba*,

between Golaz and Minas Gerais, the *Serra dos Aynores*, which divide Espírito Santo from Minas Gerais; and the *Serra do Gurgueia*, *Brauca* and *Araípe*, which envelop Piauí.

Brazil is unequalled for its rivers. The River Amazon has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the *Rio Branco*, *Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapaçós*, while the *Xingu* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaya* flow northwards from the Plateau of Matto Grosso and the mountains of Goiás to the Gulf of Pará. The *Parnaíba* flows from the encircling mountains of Piauí into the Atlantic. The *São Francisco* rises in the South of Minas Gerais and traverses Bahia on its way to the eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Matto Grosso, flows through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the *Ignassu*, which unites with the Upper Parana at the Brazil-Argentine-Paraguay boundary, are the majestic *Falls of the Ignassu* (200 ft.), and on the *São Francisco* are the no less famous falls of *Paulo Afonso* (260 ft.).

Government.—Brazil was colonized by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal. On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. Constitutional Government, under the Constitution of 1891, was suspended after the revolution of 1930. Dr. Getulio Vargas, who had been Chief of the Provisional Government since 1930, was elected President and assumed office on July 20, 1934. By a *coup d'état* of Nov. 10, 1937, he closed Congress, abolished the old political parties and issued a new Constitution. On Sept. 18, 1946, the *Estado Novo* established by Vargas was superseded by a new constitution, limiting the Presidential term to 5 years (in place of 7) and restoring a Congress of two chambers. In October, 1960, elections took place in which Sr. Jânio Quadros was elected President to succeed Dr. Kubitschek. Sr. Quadros resigned in August, 1961, and was succeeded by the Vice-President, Sr. Goulart.

Production.—There are large and valuable mineral deposits including among others, iron ore (hematite), manganese, bauxite, beryllium, chrome, nickel, tungsten, cassiterite, lead, gold, monazite (containing rare earths and thorium) and zirconium. Diamonds and precious and semi-precious stones are also found. The mineral wealth is still exploited to only a very limited extent. Production is increasing, but is capable of great further development. The iron ore deposits are particularly rich. The estimated production of iron ore in 1961 was 9,346,000 metric tons. Oil production in 1961 was 34,807,000 barrels. Coal production in 1961 was estimated at 2,330,000 metric tons. 2,070,000 metric tons of steel ingots and 76,896,000 barrels of refined petroleum products were produced in 1961. Licences for new foreign investments amounting to U.S.\$39,200,000 were issued in 1961, bringing the total value of licences issued in the seven-year period since 1955 to U.S.\$489,800,000. Investment has been particularly marked in the motor, tractor, shipbuilding and engineering industries.

Brazil's agricultural and vegetable produce is abundant, coffee, cotton, maize, sugar, cocoa, rice, citrus fruits and bananas being the main agricultural products, and rubber, carnauba wax, maté, jute and

other fibres being the main vegetable extracts. Timber is also important.

The main exports of agricultural produce in 1961 were:

	Metric Tons	Value \$U.S.
Coffee	1,018,018	710,386,000
Cotton	205,676	109,682,000
Cocoa beans.....	104,170	45,923,000

Coffee is grown mainly in the States of São Paulo and Paraná and to a lesser extent in Minas Gerais and Espírito Santo.

Defence.—The peace-time strength of the Army is 120,000, with an immediate reserve of 250,000. The Navy consists of 1 aircraft carrier, 2 cruisers, 19 destroyers and escorts, 11 corvettes, 3 submarines, 15 submarine chasers, 1 sail training ship, 3 ocean-going tugs, 3 survey vessels, 2 river monitors and various auxiliaries. The strength of the Navy is about 30,000 all ranks. The Air Force is the largest in South America, with 650 aircraft and a strength of 35,000 all ranks.

Education.—Primary education is carried out by State governments and municipalities and private initiative, in some cases with a Federal subsidy. In 1958 there were 82,953 primary schools (not including kindergartens) with an enrolment at the beginning of the school year (March) of 5,775,000 pupils. There were 182,602 teachers in the primary schools.

Secondary education is carried out by the Federal Government, State and Municipal Governments and by private schools. In 1959, there were 3,435 schools and 794,690 pupils. Other establishments classified at an intermediate level are 1,256 commercial schools with an enrolment of 171,994 pupils; 1,149 normal schools with 81,526 scholars; 420 industrial training schools with 22,312 pupils; 88 agricultural schools with 5,679 students.

A total of 89,586 students attended 20 Federal and State Universities and other establishments offering courses at a university level in 1959. There were 544 faculties in all the universities of Brazil, and also 502 isolated faculties. Of this total (1,046), there were 331 federal, 138 State, 23 municipal and 554 private faculties.

Language and Literature.—Portuguese is the language of the country, but Italian, Spanish, German, Japanese and Arabic are spoken by immigrant minorities, and newspapers of considerable circulation are produced in those languages. English and French are currently spoken by educated Brazilians.

Until the second quarter of the nineteenth century Brazilian literature was dominated by Portugal. French influence is traceable for the next half century, since when a national school has come into existence and there are many modern authors of high standing. Public libraries have been established in urban centres and there is a flourishing national press with widely circulated daily and weekly newspapers; 25 daily newspapers are published at Rio de Janeiro.

Communications.—In 1960 there were about 38,339 kilometres of railways in service, largely of 1 metre gauge, but including some 4,000 kilometres of other gauges. Traffic carried in 1960 was—Passengers, 420,583,000; Freight, 43,727,000 metric tons; Livestock, 4,339,000 head. During 1961 the ports of Rio de Janeiro and Santos together were used by 7,983 vessels representing 28,042,000 registered tons.

Nine foreign airlines, Air France, B.O.A.C., SAS, KLM, Aerolinas Argentinas, Swissair, Iberia, Alitalia and Lufthansa (in addition to Panir do Brasil)

operate services between Brazil and Europe. Pan American World Airways, Braniff, Varig and Real Aerovias Brazil operate services between Brazil and U.S.A., and there are connections with all Latin American countries. Eight major domestic airlines, as well as the Brazilian Air Force, maintain services throughout the country. During 1960, 7,367,701 passengers passed through Brazilian airports; 77,400 tons of cargo were received and 75,993 despatched. The airports of Rio de Janeiro and Sao Paulo alone recorded 147,271 aircraft arrivals and departures in 1961.

Postal facilities in Brazil include approximately 5,750 post offices and 50,000 miles of telegraph. In 1958, 874,000 telephones were in use, of which a large proportion are dial operated.

	FINANCE.	
	1961 (millions of Cruzeiros)	1962* (millions of Cruzeiros)
Revenue.....	317,500,000	439,016,079
Expenditure....	419,900,000	573,536,278
	*Estimated	

The total external debt of Brazil on December 31, 1961, was U.S.\$2,834,912,000. The total internal debt of the Union in 1961 amounted to Crs.28,719,592,000; States (1960)Crs.39,447,066,000. The average for the year 1961 of the official selling rates of the Bank of Brazil was Crs.53.204 = £1. Crs.18.92 = U.S.\$1. The free exchange market for the year 1961 gave an average of Crs.893.48 = £1 and Crs.316.16 = U.S.\$1.

TRADE (1961)	
Total Imports.....	\$U.S.1,460,093,463*
Total Exports.....	\$U.S.1,402,970,040*
	*Converted at official exchange rate.

Trade with U.K.		
	1960	1961
Imports from U.K.	£18,898,451	£16,088,645
Exports to U.K.	29,114,286	29,653,294

The principal imports are fuel oils, machinery, wheat, chemicals, industrial raw materials and newsprint. The principal exports are coffee (about 70 per cent. of the total value of exports), cocoa, timber, iron ore, sugar, fruit, tobacco, wax, hides and skins and fibre.

CAPITAL.—Brasília (inaugurated on April 21 1960). Population (estimated 1960), 142,000. Other important centres are the former capital ΨRio de Janeiro, with a population (est. 1960 of 3,288,000); São Paulo 3,850,000; ΨSalvador (Bahia) 656,000; ΨRecife (Pernambuco) 784,000; ΨBelém (Para) 401,000; ΨBelo Horizonte (Minas Gerais) 600,000; ΨFortaleza (Ceará) 514,000; ΨNiterói (Rio de Janeiro) 245,000; Curitiba (Paraná) 362,000; ΨPorto Alegre (Rio Grande do Sul) 643,000.

LEGATION IN LONDON.

12 Queen's Gate Gardens, S.W.7.
 [Knightsbridge: 9400]

Minister, His Excellency Radenko Grigorov (1962).

The Republic of Bulgaria is bounded on the north by Roumania, on the west by Yugoslavia, on the east by the Black Sea, and on the south by Greece and Turkey. The total area is approximately 43,000 square miles, with a population at the end of 1959 of 7,797,800. The largest religion of the Bulgarians is the Eastern Orthodox Church. For secular purposes the Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom,

but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of Southern Dobrudja to Roumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly*, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

Nazi troops entered the country on March 3, 1941, and occupied Black Sea ports, but Bulgaria was not officially at war with the Soviet Union. On August 26, 1944, the government declared Bulgaria to be "neutral in the Russo-German war" and delegates to Cairo sought terms of peace from Great Britain and the United States. The Soviet Union refused to recognize the so-called "neutrality" and called upon Bulgaria to declare war against Germany, and no satisfactory reply being received on Sept. 5, 1944, the U.S.S.R. declared war on Bulgaria. Bulgaria then asked for an armistice and on Sept. 7 declared war on Germany, hostilities with U.S.S.R. ending on Sept. 10. The armistice with the Allies was signed in Moscow, Oct. 28. On Sept. 9 a *coup d'état* gave power to the Fatherland Front, a coalition of Communists, Agrarians, Social Democrats and Republican officers and intellectuals. In August, 1945, the main body of Agrarians and Social Democrats left the Government. The Peace Treaty with Bulgaria was signed on Feb. 22, 1947, and came into force on Sept. 15, 1947. It recognized the return of Southern Dobrudja to Bulgaria.

GOVERNMENT.—On Sept. 8, 1946, a referendum was held, at which, according to the published results, an overwhelming majority declared for the abolition of the Monarchy and the setting up of a Republic. On Oct. 27, a general election to a Grand National Assembly (with power to make a constitution) was held; the Opposition won 201 seats out of 465. According to the present Constitution the legislature is a single chamber National Assembly or *Subranie* elected by adult suffrage on the basis of one deputy to every 25,000 inhabitants for a maximum term of four years. The opposition Agrarian Party was suppressed on Aug. 24, 1947, following the pronouncement of the death sentence on its leader, Nikola Petkov. The opposition newspapers ceased to appear after April, 1947. Nine opposition Social Democrats continued to sit in the National Assembly until they were placed under restraint in July, 1948. The Government Social Democratic Party fused with the Workers' (Communist) Party on Aug. 11, 1948.

Bulgaria linked herself to the other countries of Eastern Europe by a series of treaties of friendship, collaboration and mutual aid, the first of which was signed with Yugoslavia on November 27, 1947. This was followed by similar treaties with Roumania (January 16, 1948), the Soviet Union (March 18), Czechoslovakia (April 26), Poland (May 30) and Hungary (July 6). The treaty with Yugoslavia was abrogated in 1949.

PRODUCTION.—Bulgaria is essentially an agricultural country, but is engaged upon an elaborate programme of industrialization. Over 90 per cent. of the country's agriculture has been collectivized, and a much smaller proportion mechanized. The principal crops are wheat, maize, beet, tomatoes, tobacco, oleaginous seeds, fruit, vegetables and cotton. The live-stock includes sheep, goats, cattle, pigs, horses, asses, mules and water buffaloes.

In 1961 electricity generating capacity totalled 5,406 million kWh., compared with 4,675 million

kWh. in 1960. Much of this increase is from hydro-electric stations. The considerable progress which has been made in the exploitation of Bulgaria's mineral resources, is shown by the following production figures:—

	Production 1961	Percentage increase over 1960
Coal	18,600,000	109
Lead	41,000	101
Zinc	22,000	131
Copper concentrate (20 per cent. copper base)	82,000	115
Steel	340,000	134

There are other mineral deposits of varying importance, but no production figures are available. There are also a number of thermal and mineral springs, several of which have been modernized. Bulgaria's newly acquired heavy industry includes an iron and steel works which inaugurated its first blast furnace in 1957, a nitrogenous fertilizer plant and other chemical works.

DEFENCE.—Under the Peace Treaty signed between Bulgaria and the Allies, the Bulgarian Army is limited to 55,000 men, but it is believed at present to be at least 200,000 strong.

EDUCATION.—Free basic education is compulsory for children from 7 to 15 years inclusive. The Bulgarian educational system was reorganized on Soviet lines in September, 1950, and in 1960-61 there were 2,408 elementary schools, 93 secondary schools, 3,060 combined elementary and secondary schools, 144 grammar schools (gymnasias), 172 schools for all levels and 231 vocational training schools; there were 1,306,327 pupils and 56,414 teachers.

There are 20 universities (known as Higher Educational Establishments and including universities proper and Academies of Music, Science, etc.), including those of Sofia, Plovdiv and Varna. In 1960-61 there were stated to be 54,965 students at higher educational establishments.

LANGUAGE AND LITERATURE.—Bulgarian is a Southern Slavonic tongue, closely allied to Russian (see U.S.S.R.) with local admixtures of modern Greek, Albanian and Turkish words. There is a modern literature, chiefly educational and popular. The alphabet is Cyrillic, as in Russia. In 1960 there were 6 daily newspapers in Sofia.

	1962
	leva

Budget revenue (estimated)	37,665,000,000
Budget expenditure (estimated)	37,447,000,000

TRADE.

The principal imports are wool, industrial and agricultural machinery, metals, tools, chemicals, dyestuffs, drugs, rubber, paper. The principal exports are cereals, tobacco, fruit, vegetables, oil seeds, oils, fats, textiles, eggs, chemicals, essential oils including attar of roses, hardwoods, non-ferrous metals, and livestock. In 1960, 82 per cent. of Bulgaria's foreign trade was with the Soviet bloc, including 54 per cent. with the Soviet Union.

Trade with U.K.

	1960	1961
Imports from U.K.	£2,671,583	£1,805,870
Exports to U.K.	2,197,987	3,266,035

CAPITAL, Sofia. Pop. (1956), 725,756, at the foot of the Vitosha Range, the capital and commercial centre, is on the main railway line to Istanbul, 338 miles from the Black Sea port of ΨVarna (119,769) and 125 miles from Lom (23,015), on the Danube; ΨBurgas (72,795) is also a Black Sea port, those on the Danube being ΨRusé (83,472), ΨSvishtov (18,537), ΨVidin

(23,984). Other important trading and industrial centres are Plovdiv (162,518) and Pleven (57,758).

BURMA

(Republic of the Union of Burma.)

Revolutionary Government

Chairman and Member for Defence, National Planning, Finance, Judicial Affairs, General Ne Win.

BURMESE EMBASSY IN LONDON

19A Charles St., Berkeley Square, W.1.

Ambassador, His Excellency U Hla Maung (1961).

Area and Population.—Burma forms the western portion of the Indo-Chinese district of the continent of Asia, lying between 9° 58' and 28° N. latitude and 92° 11' and 101° 9' E. longitude, with an extreme length of approximately 1,200 miles and an extreme width of 575 miles. It has a sea coast on the Bay of Bengal to the south and west and a frontier with Pakistan and India to the north-west; in the north and east the frontier with China was determined by a treaty with the People's Republic in October, 1960, and is now in process of demarcation; there is a short frontier with Laos in the east, while the long finger of Tenasserim stretches southward along the west coast of the Malay Peninsula, forming a frontier with Thailand to the east. The total area of the Union is about 262,000 square miles, with an officially estimated population of 21,526,824—about 82 persons to the square mile.

Political Divisions.—The Union of Burma comprises Burma proper (at about 145,000 sq. miles by far the largest unit), administered direct by the Central Government, and also the Shan State (about 57,500 sq. miles), Kachin State (about 29,500 sq. miles), Karen State (about 11,600 sq. miles) and Kayah State (about 4,600 sq. miles) each with their own State Governments. There is also the Special Division of the Chins (about 14,000 sq. miles). Two additional States—Arakanese and Mon—arc proposed.

Physical Features.—Burma falls into four natural divisions, Arakan (with the Chin Hills region), the Irrawaddy basin, the old Province of Tenasserim, including the Salween basin and extending southwards to the Burma-Siam peninsula, and the elevated plateau on the east made up of the Shan States. Mountains enclose Burma on three sides, the highest point being Hka-kabo Razl (19,296 ft.) in the northern Kachin hills. Mt. Fopa, 4,981 ft., in the Myingyan district is an extinct volcano and a well-known landmark in Central Burma. The principal river systems are the Kaladan-Lenro in Arakan, the Irrawaddy-Chindwin and the Sittang in Central Burma, and the Salween which flows through the Shan Plateau.

Races, Language and Religions.—The indigenous inhabitants who entered Burma from the north and east are of similar racial types and speak languages of the Tibeto-Burman, Mon-Khmer and Tai

groups. The three important non-indigenous elements are Indians and Pakistanis (about 800,000), Chinese (about 300,000), with Europeans and Anglo-Burmans numbering less than 10,000. Burmese is the official language, but minority languages include Shan, Karen, Chin, and the various Kachin dialects. English is still spoken in educated circles in Rangoon and elsewhere. Buddhism is the religion of 85 per cent. of the people, with 5 per cent. Animists, 4 per cent. Moslems, 4 per cent. Hindus and rather less than 3 per cent. Christians.

Government.—Burma formed part of British India until April 1, 1937, when it became a separate territory with a considerable measure of self-government. The country was invaded by the Japanese in December, 1941, and until October, 1945, the Civil Government functioned in India.

The Treaty which made Burma an Independent State outside the British Commonwealth was signed in London on Oct. 17, 1947, and came into force on Jan. 4, 1948. For the first three years of its existence the Republic was torn by insurrection, mutiny and disorder. By 1951 the Union Government had recovered control of most of the country, though Papun, the capital of the Karen rebels, was not recovered till 1955.

The first general election under the new Constitution, during 1951, resulted in the return to power of the "Anti-Fascist People's Freedom League." At the second general election in April, 1956, the A.F.P.F.L. was returned with a reduced majority (171 out of 250 seats). In April, 1958, U Nu quarrelled with his principal supporters and in September invited General Ne Win and a caretaker Government to take office. In February, 1959, this arrangement was prolonged for another year. Elections were held in February, 1960, resulting in overwhelming victory for the "Clean" faction of the A.F.P.F.L. led by U Nu, now renamed the Union Party. U Nu's Government took office on April 4, 1960. On March 2, 1962, it was replaced by a revolutionary council of senior officers headed by General Ne Win after a *coup d'état* staged by the Army.

Education.—The literacy rate is high compared with other Asiatic countries, there is no caste system and women engage freely in social intercourse and play an important part in agriculture and retail trade. The University of Rangoon was founded in 1920 with a Medical College, an Engineering College and a Teachers' Training College attached. The Intermediate College at Mandalay was granted full university status in 1958; there are also intermediate colleges at Moulmein, Bassein, Taunggyi, Magwe, and Kyaukpya (in Arakan) and a new one is planned at Myitkyina. Good progress is being made in re-organization and extension of the educational system.

Finance.—The chief sources of revenue are profits on state trading, income-tax, customs duties, commercial taxes and excise duties; the chief heads of expenditure are general administration, defence, education, police and development. The budget estimates for 1961-62 were (in terms of sterling): receipts £110,250,000; expenditure £117,525,000.

Production, Industry and Commerce.—Two-thirds of the population depend on agriculture; the chief products are rice, oilseeds (sesamum and groundnut), maize, millet, cotton, beans, wheat and grain. Rice is the mainstay of Burma's economy; before the war Burma was the world's largest exporter of rice, her total production of over 7,000,000 tons a year being derived from 12,000,000 acres or 70 per cent. of the country's total cropped area. The pre-war yearly average of rice exports was over 3,000,000 tons. In 1961 exports were

1,624,000 tons. The net area sown to all crops in 1960-61 was 17,951,000 acres and reserved forests covered 22,264,960 acres. The principal export after rice is teak, of which some 200,000 tons were exported annually before the war. The 1961 figure was 90,000 tons. Burma is rich in minerals, including petroleum, lead, silver, tungsten, zinc, tin, wolfram and gemstones. Of these, petroleum is the most important. Production in 1961 was 147,522,277 gallons. There is a refinery at the main oilfield, Chauk, and an output of 685,000 gallons per day is planned for the Syriam refinery near Rangoon. Their combined output of petroleum products is sufficient for most of Burma's needs. The main production of petroleum is handled by a joint venture between the Burma Oil Company and the Union Government.

Under the Government's development plan, a steel rolling mill, a jute bag and twine mill, two cotton spinning and weaving mills, a pharmaceutical plant, a large hydro-electric scheme and three sugar factories are in production. Other industrial projects are being considered in connection with the £30,000,000 loan from the Chinese Communist Government and Japanese reparations which Burma hopes to have enlarged.

Trade with U.K.

	1960	1961
Imports from U.K.....	£11,545,343	£12,120,304
Exports to U.K.....	10,083,797	9,999,495

Burma joined the Colombo Plan in 1952 and is now receiving important assistance from member countries.

Communications.—The Irrawaddy and its chief tributary, the Chindwin, form important waterways, the main stream being navigable beyond Bhamo (900 miles from its mouth) and carrying much traffic.

ψ The chief seaports are Rangoon, Moulmein, Akyab and Bassein.

The Burma Railways had a total length in 1949 of 2,300 miles, extending to Myitkyina, on the Upper Irrawaddy. The first diesel locomotives were introduced in 1958 and a further 50 diesel-electric locomotives have been purchased with a recent World Bank loan. There are about 5,472 miles of main roads. Since the war a considerable network of internal air services has come into being. The airport at Mingaladon, about 9 miles north of Rangoon, has been reconstructed and handles much international traffic.

Chief Towns.—The chief city of Lower Burma, and the seat of the government of the Union is Rangoon, on the left bank of the Rangoon river, about 21 miles from the sea. The city contains the Sbwé Dagon pagoda, much venerated by Burmese Buddhists. Population (1953), about 740,000. Mandalay, the chief city of Upper Burma had a population of (1953) 186,000, Moulmein one of 103,000 and Bassein 78,000. Pagan, on the Irrawaddy, S.W. of Mandalay, contains many sacred buildings of interest to antiquaries.

NATIONAL FLAG.

The Union flag is red, with a canton of blue bearing a large white five-pointed star surrounded by 5 smaller stars.

BURUNDI

(Kingdom of Burundi)

Ruler, Mwambutsa IV, Mwami of Urundi.

Formerly a Belgian trusteeship under the United Nations, Burundi was proclaimed an independent State on July 1, 1962. Situated on the east side of Lake Tanganyika, the State has an area of 10,747 sq. miles and a population estimated at 2,213,000, mainly of the Bahutu and Batutsi tribes engaged in agriculture and the rearing of livestock. The chief crop is coffee much of which is exported to the United States. Other exports are livestock and hides from the large herds maintained.

CAPITAL: Kitega. The principal town and commercial centre of Burundi is Usumbura.

CAMBODIA

(Kampuchea)

Queen-Dowager (symbol of the Throne), Her Majesty Kossamak Nearing, widow of King Norodom Suramarit (died April, 1960).

Head of Government, H.R.H. Prince Norodom Sihanouk.

An interim Government, in which Chan Sen Chhum, President of the National Assembly, was appointed Prime Minister, assumed office on August 6, 1962.

ROYAL CAMBODIAN EMBASSY IN LONDON
26 Townshend Road, N.W.8.
[Primrose: 8011]

Ambassador in London, His Excellency Au Chheun.
1st Secretary, Chea San.
3rd Secretary, Limhoeur Limtouch.
Attaché, Meas Sonn.

Area and Population.—A kingdom with an area of some 70,000 square miles and a population of 5,000,000 (estimated), Cambodia is situated between Thailand to the west and South Vietnam to the east. It is bordered on the north and south respectively by Laos and the Gulf of Siam.

History.—Once a powerful kingdom, which, as the Khmer Empire, flourished between the tenth and fourteenth centuries, Cambodia became a French protectorate in 1863 and was granted independence within the French Union as an Associate State in 1949. Two years earlier Prince (then King) Norodom Sihanouk had promulgated a constitution providing for parliamentary government. The Geneva Conference of 1954 took Cambodia further along the road to independence by ensuring the withdrawal of French and Viet-minh forces from the country, and the process was completed when, in January, 1955, Cambodia became financially and economically independent not only from France but also from Laos and Vietnam. All governments since then have been drawn from the Popular Socialist Community, a movement formed by Prince Norodom Sihanouk who abdicated from the throne in March, 1955, in favour of his parents, King Norodom Suramarit and Queen Kossamak. The community holds all 77 seats in the National Assembly as a result of the last general elections which were held in June, 1962. Following the death of King Norodom Suramarit in April, 1960, a Council of Regency was in being

until June, when Prince Norodom Sihanouk assumed office as Head of State.

Geography, Economy and Communications.—Cambodia is largely underdeveloped and underpopulated with an economy based on agriculture, fishing and forestry, the bulk of its people being rice-growing farmers living in the basins of the Mekong and Tonlé Sap rivers. In addition to rice, which is the staple crop, the major products are rubber, livestock, maize, timber, pepper, palm sugar, fresh and dried fish, kapok, beans, soya and tobacco. Rice and rubber are the main exports. Fifty per cent. of the total land area is forest or jungle abounding in wild life of all kinds, including big game. The climate is tropical monsoon with a rainy season from May to October.

The country has some 4,000 kilometres of roads, of which about a third are hard-surfaced and passable in the rainy season. There is one railway which runs from Phnom-Penh to the Thai border. Phnom-Penh is a river port capable of receiving ships of up to 2,500 tons all the year round. The main installations of a deep water port at Sihanoukville (Kompong Som) on the Gulf of Thailand have been completed and can receive ships up to 10,000 tons. The port is linked to Phnom-Penh by a modern highway. A railway linking Sihanoukville to the capital is under construction. There is as yet no large-scale industry, but a textile mill and plywood and paper factories have been constructed with Chinese aid and a cement factory is under construction; a jute mill is also scheduled for construction under the Five Year Plan (1960-64). Cambodia receives substantial foreign aid, notably from the U.S.A., China, France, the Soviet Union, the Colombo Plan countries and Japan. Since 1956, Cambodia has sought to increase her foreign trade by the conclusion of trade exchange and payments agreements with several countries, including China, Poland, Czechoslovakia, North Vietnam, Yugoslavia, the United Arab Republic, Laos and Japan.

The Cambodian airline, Royal Air Cambodge, operates services with Air Vietnam between Phnom-Penh and Saigon and with Cathay Pacific Airways between Phnom-Penh and Hong Kong. A service to Vietnam and Hanoi is planned. There are flights also to Siemreap where the famous ruins of Angkor Wat are situated. Cargo boats from Singapore and Hong Kong visit Phnom-Penh regularly.

Culture and Education.—Cambodian culture is predominantly Indo-Siamese and is distinct from Annamite culture which is largely derived from China. The state religion is Buddhism of the "Little Vehicle". There are fairly large Chinese (300,000) and Vietnamese (400,000) minorities. The national language is Cambodian, although French is widely spoken and is still largely the official language of government and commerce. Considerable efforts are now being devoted to the development of education and new schools, colleges and technical institutes have been established. A Buddhist University has been inaugurated in Phnom-Penh, where there are also Faculties of Medicine and Law. A residential teachers' training college is now in operation.

CAMEROON REPUBLIC

(Federal Republic of Cameroon)

*President, Ahmadou Ahidjo, elected for 5 years, May
 5, 1960.*

The Republic of Cameroon lies on the Gulf of Guinea between Nigeria to the west and the Central African Republic and Chad to the east. It has an area of approximately 160,000 sq. miles and a population estimated (1961) at 4,907,000. Principal agricultural products are cocoa, coffee, cotton, bananas, groundnuts, timber and palm-oil. Rubber and tea are also being grown. There is an important aluminium processing plant. Trade with the United Kingdom in 1961 amounted in value to: imports, £975,124; exports to U.K., £881,418.

Formerly part of the German colony of Kamerun, the territory was administered by France from 1916 until 1959 as a trusteeship, latterly under the auspices of the United Nations Organization. Agreement regarding independence for the territory was reached between the Prime Minister of the Cameroons and the French Government in October, 1958, and from December of that year the Cameroonian Government assumed responsibility for all matters except defence, external relations and currency which were reserved to France. Cancellation of the French trusteeship on Jan. 1, 1960, was approved by the General Assembly of the United Nations and on that date the territory became independent under the name of the Cameroon Republic.

Following a plebiscite held in Feb., 1961, in the area of the Cameroons under United Nations trusteeship, the Republic was enlarged by the addition of the former British-administered Southern Cameroons and a federal constitution was adopted on October 1, 1961. A Federal Cabinet of eight ministers was appointed in October, 1961. The added territory is known as West Cameroon.

CAPITAL.—Yaoundé (60,000). Ψ Douala (120,000), is an important commercial centre.

FLAG.—Vertical stripes of green, red and yellow with two five-pointed gold stars in upper half of green band.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from just north of Arica to Cape Horn south, between lat. 17° 15' and 55° 59' S., and long. 66° 30' and 75° 48' W. Extreme length of the country is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a greater height. The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of the pass where the international road from Chile to Argentina crosses the frontier, has been erected a statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of a boundary dispute in 1902. There are no rivers of great size, and none of them is of much service as a navigable highway. In the north the country is arid.

Among the island possessions of Chile are the *Juan Fernandez group* (2 islands) about 360 miles distant from Valparaiso, where a wireless station has been erected. One of these islands is the reputed scene of Alexander Selkirk's (*Robinson Crusoe*) shipwreck. *Easter Island* (27° 8' S. and 109° 28' W.), about 2,000 miles distant in the South Pacific Ocean, contains stone platforms and hundreds of stone figures, the origin of which has not yet been determined. The area of the island is about 45 sq. miles.

Chile is divided into 25 provinces and the total area of the Republic is estimated at 290,000 square miles, with an estimated population of 7,440,000 (April, 1959). In 1929 Chile signed a treaty ceding the province of Tacna to Peru but retained the province of Arica in return for a payment to Peru of £1,200,000. Included in the total are four racial divisions: (a) Spanish settlers and their descendants; (b) indigenous Arucanian Indians, Fuegians, and Changos; (c) mixed Spanish Indians; and (d) European immigrants.

In 1959 the registered births per thousand inhabitants numbered 35.4; marriages 7.4; and deaths 12.5.

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maipú* (April 5, 1818), achieved the independence of the nation. Under the present Constitution (Aug. 30, 1925), the President is elected by direct choice of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of 147 Deputies. There is

universal suffrage for persons who have attained the age of 21, can read and write, and are on the electoral roll. Chilean women obtained equal voting rights with men on Dec. 21, 1948, before which they only participated in municipal elections.

PRODUCTION, &c.—Agriculture and mining are the principal occupations, though industrial development is being actively encouraged by the Government. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, hemp, chilli-pepper, potatoes, onions and melons are grown extensively; the vine and all European fruit-trees flourish in the central zone and fruit is an important export item. Excellent wines are produced and exported and are becoming more widely known in world markets. There are large timber tracts in the central and southern zones of Chile, some types of which were exported to Europe and the Argentine, but high production costs have caused serious difficulties to this export trade. The mineral wealth is considerable, the country being particularly rich in copper-ore, iron-ore and nitrate. Uranium is also said to have been discovered in small quantities. The production of refined copper in 1961 was 502,031 metric tons. The rainless north is the scene of the only commercial production of nitrate of soda (Chile saltpetre) from natural sources in the world. Production in 1961 (including potassium nitrate) was 1,110,405 metric tons. Chile also produces iodine, manganese ore, coal, and a small quantity of gold. 11,763,800 metric tons of coal and 5,255,468 metric tons of iron ores were produced in 1961. The country has also large deposits of high grade sulphur, but mostly around high extinct volcanoes in the Andes Cordillera, difficult of access. Production of refined sulphur has hitherto been in relatively small quantities. Annual production is between 25,000 and 50,000 metric tons. Oil was struck in Magalanes (Tierra del Fuego) in December, 1945, and the industry is now self-supporting. Production in 1961 was 1,472,703 cubic metres. An oleoduct 70 kilometres long now joins the principal field in Cerro Manantiales with Clarence Bay. Almost all the production is now being refined at Concon, a few miles north of Valparaiso. A large steel plant was completed and started operation during 1950 at Huachipato, near Concepción. In 1961 the output of steel ingots from Huachipato totalled 362,800 metric tons; rolling mill products totalled 283,800 metric tons.

In recent years a considerable cotton and woollen textile industry has developed. Minor industries include tanning, flour milling, lumbering, distilling, fish canning and whaling, brewing, and the manufacture of starch, soap, biscuits, rope, glassware, plastic goods, pottery, paint, boots and shoes, hosiery, millinery, cheese, furniture, matches, brushes, cordage, paper and newsprint, radio receivers and valves, rubber products, synthetic detergents, motor vehicle tyres and cigarettes. Domestic industries include weaving and embroidery.

COMMUNICATIONS.—Most of the country's commerce is distributed along its lengthy sea-board in Chilean ships, which have a virtual monopoly of cabotage. Foreign trade continues to be carried on mostly by foreign steamship lines operating either directly to the West Coasts of North and South America, or *via* the Panama Canal to Europe or *via* the Straits of Magellan. Chilean vessels have also been participating for many years in foreign trade with North America and Europe. The Chilean mercantile marine in May, 1962, numbered 65 vessels (of over 100 tons gross) with a total gross tonnage of 319,345. Under a law promulgated in

June, 1956, 50 per cent. of Chile's foreign trade must be carried by Chilean vessels.

The first railway was opened in 1851 and there are now 6,575 miles of track, of which 5,360 miles are State owned. A metre-gauge line runs from Pisagua to La Cañera, just north of Santiago. From La Calera to Puerto Montt runs the wide-gauge (1.676 metre) main line of the State railways.

With the completion of a section of 435 miles from Corumba, Brazil, to Santa Cruz, Bolivia, the Trans-Continental Line will link the Chilean Pacific port of Arica with Rio de Janeiro on the Atlantic. Another line from Antofagasta to Salta (Argentine) was opened in 1948. Further south, the Trans-Andine Railway connects Valparaiso on the Pacific with Buenos Aires, crossing the Andes at 11,500 ft.

Chile is served by 11 international airlines which, in 1958, carried 143,271 passengers in and out of the country. Four-fifths of the domestic traffic is carried by the State-owned Linea Aerea Nacional, which in 1960 carried 388,000 passengers over 429,900,000 passenger-miles. Chile has an extensive, system of airports which are being modernized with U.S. financial assistance.

Chile's road system is about 55,000 kilometres in length, but only an estimated 3,000 kilometres are first-class paved highways. At the end of 1960 there were registered 57,578 cars and taxis, 63,238 goods vehicles, 5,515 buses and 19,304 motor cycles and scooters.

The country had 192,000 telephone subscribers at the end of 1960. Telegrams are handled by 607 telegraph offices, mostly owned by the State.

DEFENCE.—Military service is compulsory, but not all those who are liable are required. Recruitment for the Navy is voluntary. In 1961 the Army had 6 infantry and 1 cavalry divisions with a total strength of 1,900 officers, 11,000 regular other ranks plus 11,000 conscripts. In addition there is a police force of "Carabineros" of 22,500 officers and men. The Air Force had 600 officers and 6,180 other ranks with a strength of 230 aircraft. The Navy consisted of 2 cruisers, 8 destroyers, 3 frigates, 3 corvettes, 2 submarines, all operational. There is a support force of transports, tankers, 1 submarine depot ship and ancillary small craft. The strength of the Navy is 937 officers and 13,785 men, plus a Marine Force for coastal defence of 87 officers and 2,200 men.

EDUCATION is free, elementary education being compulsory since 1920. There are 8 Universities (3 in Santiago, 2 in Valparaiso, 1 in Antofagasta, 1 in Concepción and 1 in Valdivia). The religion is Roman Catholic.

LANGUAGE AND LITERATURE.—Spanish is the language of the country, with admixtures of local words of Indian origin. Recent efforts have reduced illiteracy and have thus afforded access to the literature of Spain, to supplement the vigorous national output. The Nobel Prize for Literature was awarded in 1945 to Señorita Gabriela Mistral, for Chilean verse and prose. There are over 100 newspapers and a large number of periodicals, including some devoted to professional, scientific and social subjects.

FINANCE. 1960
Escudos

Local Currency:

49 Portland Place, W.1.

Chargé d'Affaires, Huan Hsiang.

AREA and POPULATION.—Estimates of population vary considerably. A census was carried out in June, 1953, and on Nov. 1, 1954, the National Bureau of Statistics, Peking, announced a final figure of 582,603,417 for the population of mainland China. 11,743,320 Chinese were estimated to be resident or studying abroad. The Bureau stated that 51.82 per cent. of the mainland population were males and 48.18 per cent. females; the birth rate averaged 37 per 1,000 and the death rate 17 per thousand. Distribution of the population by nationalities was:—

Chinese..... 547,283,057 Mongolians .. 1,462,955
 Tibetans.... 2,775,622 *Tribal peoples

Manchus.... 2,418,931 Other 6,718,025

* Incl. many aboriginal or primitive tribes in remote western districts of Western China. The total area has been stated as approximately 4,300,000 sq. miles.

The population of China was estimated by the United Nations in 1959 at 640,000,000.

THE PROVINCES OF CHINA.

The National Bureau of Statistics, Peking, published in 1954 the results of the 1953 Census of Population. Populations of the Chinese provinces, including Tibet and Inner Mongolia, are shown below. The Provinces of Jehol and Sikang were abolished on July 19, 1955, their territories being divided up; those of Jehol among Hopei, Liaoning and the Inner Mongolian Region; those of Sikang being absorbed by Szechwan Province.

Population Census of 1953.

† These 4 Eastern Provinces constitute the "East China People's Government" set up by the Communist Central Government in January, 1950. This regional régime includes the large centres of Shanghai, Nanking, Tsingtao and Foochow.

§ These 3 Provinces constitute the "North-Western China People's Government."

§ Sinkiang (Chinese Turkestan) was converted into Sinkiang-Uigur Autonomous Region in July, 1955. Autonomous local governments were set up

by the various nationalities in the area—Uigurs, Kazakhs, Tadjikhs, etc. Sinkiang is the largest province of China, about one-sixth of the whole area of the country. Some 80 per cent. of its population are Uigurs, of the Moslem religion.

Government.—On October 10, 1911, the party of reform forced the Imperial dynasty to a "voluntary" abdication, and a Republic was proclaimed at Wuchang.

Many years of internal dissension followed the establishment of the Republic, but in 1928 the *Kuomintang* (Nationalist Party) achieved supremacy and established a one-party government in Nanking which was accorded recognition by the Foreign Powers. After more than seven years of war with Japan (July 7, 1937, to Aug. 5, 1945), disputes arose between the Central Government and the Chinese Communists. There were hopes of a peaceful settlement in January, 1946, when, as a result of mediation by General George C. Marshall (then President Truman's special Envoy in China), an armistice was signed at Chungking and an all-party Consultative Conference was convened to resolve the disputed issues. These hopes of agreement were disappointed and hostilities broke out again.

On April 18, 1947, President Chiang Kai-shek attempted to unite the country by declaring one-party rule in China at an end and by announcing the formation of a new State Council to include representatives of the main political parties. The Communists declined to co-operate in the formation of this body and the Central Government's offer to reserve a number of seats for Communist representatives was later withdrawn.

A National Assembly was elected on Nov. 21, 1947, for six years. It had the power to elect and recall the President and Vice-President of the Republic, to amend the Constitution and to ratify amendments thereto proposed by the Legislative Yuan.

The year 1949 was marked by a rising tide of Communist successes. In January, 1949, Marshal Chiang Kai-shek resigned office as President and the authority of the Nationalist Government rapidly declined as province after province was occupied by Communist forces. The Nationalist Government abandoned Nanking on April 23, 1949, and headquarters were removed to Chungking. In August, the Communist forces advanced into South China, and by January, 1950, the Nationalists retained control only in the Islands of Formosa (Taiwan) and Hainan, and in some remote parts of Western China. Taipei, in Formosa, is now the Nationalist capital.

On Sept. 30, 1949, the "People's Political Consultative Conference" of 636 Delegates meeting at Peking elected a council of 56 members and a National Committee of 180 members to make proposals and recommendations to the Council. On October 1, Mao Tse-tung, Chairman of the Central People's Government, proclaimed at Peking the inauguration of the People's Republic of China.

The U.S.S.R. broke off negotiations with the Nationalist Government on October 2, 1949, and established diplomatic relations with the Central People's Government. The régime was recognized by all the Communist-dominated countries, by Great Britain on Jan. 6, 1950, and by a number of other countries.

Defence.—An order introducing compulsory military service for all men between the ages of 18 and 40 was passed by the Chinese Parliament in 1955. Regulations were also approved for the creation of an officer corps with ranks similar to those of the Russian Army. Nearly 80,000,000 men were made liable for service in the Army (3 years), the Navy (5 years) or the Air Force

(4 years). It was announced that the new Army would be organized in 14 combat and supporting corps, including a "political" division to serve with front-line troops.

Religion.—The indigenous religions of China are Confucianism (which includes ancestor worship), Taoism (originally a philosophy rather than a religion) and, since its introduction in the first century of the Christian era, Buddhism. All three are professed and practised by Chinese other than Moslems, Christians and Jews.

Education.—Under the Nationalist Government education was compulsory from the age of 6 to 12. This policy is stated to have been continued by the Communists. In 1952 there were about 550,000 primary schools in operation with about 45,000,000 pupils. There were also 5,100 secondary schools, with about 2,000,000 pupils. The majority of the 35 provinces have provincial universities in addition to national and private institutions. In August, 1950, the Communist Government took over all schools supported by foreign missions, and in October, 1950, closed the Roman Catholic University in Peking.

Language and Literature.—The Chinese language has many dialects, Cantonese, Hakka, Swatow, Foochow, Wenchow, Ning-po and Wu, and, most important, Mandarin (of which the standard form is Pekinese). There are many sub-dialects of Mandarin, some of which are closely allied while others diverge so much as to be almost separate dialects. Chinese literature is among the richest in the world and paper has been employed for writing and printing for nearly 2,000 years, movable wooden blocks having superseded carved wooden slabs many centuries ago. Confucian books of religion, histories, works dealing with philosophy and the arts, poetry, and literary criticism, novels and romances are abundant and many have been translated into other tongues. In 1937 there were 337 daily newspapers and 1,881 periodicals published at Nanking, Shanghai, Peking, Tientsin, Hankow, Canton and other large centres. All English-language newspapers in China had been closed down by March, 1951. As from Jan. 1, 1956, all Chinese newspapers appeared with characters printed horizontally, instead of in vertical form, and reading from left to right. Official approval was given in February, 1956, to a 30-letter Latin alphabet to replace some 30,000 ideographic characters at present used in written Chinese. The new alphabet has been introduced for trial in a Government campaign to modernize Chinese writing and eradicate illiteracy.

Currency and Exchange.—The *yuan* was re-valued with effect from March 1, 1955, on the basis of 10,000 old *yuan* for one new *yuan*. From the same date the official exchange rates for sterling and dollars were altered to:

6.893 *yuan* = £1; 2.46 *yuan* = \$1.

Production and Industry.—China is essentially an agricultural and pastoral country. Wheat, barley, maize, millet and other cereals, with peas and beans, are grown in the northern provinces, and rice and sugar in the south. Rice is the staple food of the inhabitants. Cotton (mostly in valleys of the Yangtze and Yellow Rivers), tea (in the west and south), with hemp, jute and flax, are the most important crops.

It was estimated that 230,000 sq. miles of cultivated land, about one-half of the total, had been affected by a series of national disasters—drought, floods, typhoons and insect pests—during 1960. Strict food rationing was in force in August, 1960, and early in 1961 it was announced that 20,000,000 workers had been transferred from urban areas and rural subsidiary occupations to agricultural

work in the autumn of 1960. 750,000 tons (28,000,000 bushels) of wheat and 260,000 tons (12,133,000 bushels) of barley were purchased from Canada and 1,050,000 tons of Australian wheat and 40,000 tons of flour in 1960-61.

Livestock is raised in large numbers. Silkworm culture is one of the oldest industries. Cottons, woollens and silks are manufactured in large quantities, and flour and rice milling have grown important in late years. The mineral wealth of the country is very great, coal of excellent quality being produced; iron ore, tin, antimony, wolfram, bismuth and molybdenum are also abundantly found. Oil is produced in the province of Kansu and in South Manchuria. Coal production in 1959 was 347,800,000 tons, an increase of 25 per cent. over 1958; crude oil production rose by 63 per cent. to 3,700,000, still a comparatively small amount. It was announced that 18,400,000 tons of steel were produced in 1960, compared with 13,350,000 tons in 1959 and 8,000,000 tons in 1958. Pig iron produced in 1959 totalled 20,500,000 tons.

Other production figures (with percentage increases over the year) were: Cotton, 2,410,000 tons (31 p.c.); Electricity, 41,500,000,000 kWh (51 p.c.); Cement, 12,270,000 tons (32 p.c.); Timber, 41,200,000 cu. metres (18 p.c.); Fertilizers, 1,333,000 tons (64 p.c.); Machine tools, 70,000 (40 p.c.); and Paper, 2,310,000 tons (31 p.c.).

The principal articles of export are animals and animal products; oils; textiles fibres; ores and metals and tea. The principal imports are raw cotton, cotton yarn and thread; oils, fats and soap; motor cars and ships; books, paper and paper-making materials; chemicals; metals and ores; and dyes, paints and varnishes.

Trade with U.K.

	1960	1961
Imports from U.K..	£31,433,308	£12,848,196
Exports to U.K....	24,719,428	30,869,389

COMMUNICATIONS.—Of the total area of China about half consists of table lands and mountainous districts where communications and travel are generally difficult and dangerous, the highest point being *Minyai Konka* (24,900 ft.) about 150 miles west of Chungking. To open up sea communications from the south-west the *Burma Road*, over 770 miles in length from Lashio, Burma, to Kunming in Yunnan, was constructed in 1937-39. The road was the chief highway for war supplies to China, until cut by the Japanese in 1942; the success of the Allies in Burma in 1945 restored the use of the road and of communication between Yunnan and Burmese ports. Motor lorries perform the journey in seven days, in contrast with the difficult and lengthy pack-mule transit before the road was constructed. There is motor road and railway connexion between Chungking and French Indo-China. In districts not served by roads the principal means of communication from E. to W. is afforded by the rivers, of which the principal are the Yangtse (3,400 miles), Hoangho or Yellow (2,600) and the West River (1,650), and from N. to S. by the Grand Canal.

Telegraphs connect Peking with Europe and Tibet. There are about 97,000 miles of land lines and several high-power wireless installations. Telephones, municipal and long-distance, are in general use in the settled and trade areas, and wireless telephony has been installed in the large centres.

SPECIAL TERRITORY

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly demarcated), from Kashmir to Burma, but is separated therefrom by the Himalayas. The

area is estimated at 463,000 square miles with a population of 1,273,969 (1953 Census.) About one-fifth of the male population are monks and polyandry is common. There is an army with an establishment of 10,000 all ranks, consisting of infantry serving on a militia basis and armed with modern weapons. India imports from Tibet wool, borax, salt, and musk; musk, horn and herbs are sent to China. The imports are chiefly cotton and woollen goods, grain, hardware, glass, sugar, biscuits, dried fruits and tobacco, with silver bullion and coined rupees to balance the excess of exports. The present currency is reckoned in *sangs* (mostly paper). The 1939 value was about 8 *sangs* = 1 rupee, which has risen in favour of Tibet to about $3\frac{1}{2}$ *sangs* = 1 rupee (1946). Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces.

In October, 1950, Chinese Communist forces invaded Eastern Tibet. The Dalai Lama later left Lhasa and set up his Government at Yatung, near the Sikkim frontier. On May 23, 1951, an agreement was reached whereby Tibet accepted Chinese suzerainty. The Communist army was allowed entry into Tibet and a Communist military and administrative headquarters set up.

A series of revolts against Chinese rule over several years culminated on March 17, 1959, in a rising in Lhasa. Heavy fighting continued for several days before the rebellion was suppressed by Chinese troops and military rule imposed. The Dalai Lama fled to India where he and his followers were granted political asylum. On May 4, the Indian Government announced that an estimated 9,000 Tibetans had entered India or the Himalayan hill states. The 7,000 refugees who had entered Assam would be settled in a suitable region of India. On March 28, 1959, the Chinese Prime Minister issued an order dissolving the Tibetan Government and setting up a 16-member Preparatory Committee for the Tibetan Autonomous Region, with the Panchen Lama as Chairman and including 4 Chinese officials.

CAPITAL.—Peking, population, 2,768,149 (Census of 1953). The population of the principal ports and trade marts is estimated as follows: Nanking, 1,020,000; Amoy, 240,000; Antung, 200,000; Canton, 1,496,000; Changsha, 700,000; Chefoo, 250,000; Chinkiang, 220,000; Chungking, 1,110,000; Foochow, 400,000; Hangchow, 600,000; Hankow (including Wuchang and Hanyang), 800,000; Harbin, 638,000; Hsinking, 420,000; Ichang, 110,000; Kirin, 150,000; Mengtze, 200,000; Mukden, 1,551,000; Ncwchwang, 170,000; Ningpo, 300,000; Shanghai, (1953) 6,204,417; Shasi, 150,000; Soochow, 300,000; Swatow, 200,000; Tientsin, (1953) 2,693,831; Tsingtao, 756,000.

FLAG OF "PEOPLE'S REPUBLIC."—The "Gate of Heavenly Peace" at Peking, superimposed on the national flag, with a large star and four small stars at the top, and a wheel at the base. The whole is encircled by ears of wheat and rice.

OFFICE OF THE BRITISH CHARGÉ D'AFFAIRES

5 Kuang Hua Lu,

Chien Kuo Men Wai, Peking.

Minister and Chargé d'Affaires, His Excellency Terence Willcocks Garvey, C.M.G. (1962) £4,115

Counsellor, H. T. Morgan.

1st Secretaries, L. S. Ross (Commercial); R. M. Evans; D. R. A. Spankie.

2nd Secretaries, D. K. Timms; G. E. Clark.

Attachés, G. E. Trinick; M. W. Hewitt.

H.M. Chargé d'Affaires also maintains an office in Shanghai.

FORMOSA

(Taiwan)

President, General Chiang Kai-shek, born 1886, assumed office 1949.

An island of some 13,800 sq. miles in the China Sea, Formosa lies 90 miles east of the Chinese mainland in latitude $21^{\circ} 45' N.$ — $25^{\circ} 38' N.$ The population, principally Chinese, was 10,050,000 at the census of 1961. The territory of Formosa includes the Pescadores Islands (Quemoy and Matsu) a few miles from the mainland, area 50 sq. miles. Originally settled by the Chinese, the island has been known as Ryukyu and Taiwan. It has been colonized in part by Dutch and Spanish expeditions and latterly by Japan. Japanese administration lasted from 1894 to 1945. General Chiang Kai-shek withdrew to Formosa in 1949, towards the end of the war against the Communist régime, accompanied by 500,000 Nationalist troops, since when the territory has continued under his presidency. American forces have intervened on several occasions to maintain the status quo, the United States recognizing the Formosa régime as Nationalist China.

The eastern part of the main island is mountainous and forest covered. Hsinkingshan (14,720 ft.) and Tz'ukaoshan (12,480 ft.) are the highest peaks. The western plains are watered by many rivers and the soil is very fertile, producing sugar, rice, tea, bananas, pineapples and tobacco. Formosa is a main producer of camphor. Coal, sulphur, iron, petroleum, copper and gold are mined. There are important fisheries. The principal seaports Ψ Tamsui and Ψ Keelung (145,200) are situated at the extreme north of the island. Goods to the value of £2,500,435 were exported to the United Kingdom in 1961; imports from U.K., £874,521.

CAPITAL.—Taipei (population 1961, 927,400). Other towns are Kaolisiung (275,600) and Tainan (229,500).

COLOMBIA

(República de Colombia.)

President, Sr. Guillermo-León Valencia, elected May 4, 1962

EMBASSY IN LONDON

3 Hans Crescent, S.W.1.

[Kensington: 9177]

Ambassador Extraordinary and Plenipotentiary (vacant). Counsellor, Señor Pedro Felipe Valencia.

1st Secretary, Señor Joaquín Fonseca.

Consulate-General, 3 Hans Crescent, S.W.1.

Consul-General, Señor Pablo Uribe Grajales.

There is a Colombian Consular Office at Liverpool.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between $2^{\circ} 40' S.$ to $12^{\circ} 25' N.$ lat. and 68° to $79^{\circ} W.$ long., with an estimated area of 461,606 square miles, and a population (estimated 1958) of 13,500,000.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Jiménez de Quesada penetrated to the interior and established on the site of the present capital a government which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811-1824. In 1819 Simón Bolívar (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were

formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic.

Following a period of dictatorship and government by decree from 1953, a military junta established on May 10, 1957, prepared the way for a return to democratic government. Congressional elections were held on March 16, 1958, which yielded a Liberal majority of votes. A plebiscite voted on December 1, 1957, had made constitutional changes by which the office of president would during the next sixteen years alternate between candidates of the Liberal and Conservative parties who would hold office for terms of four years, while the two parties would have equal representation in Congress and in the national and departmental governments. On May 4, 1962, presidential elections returned Señor Guillermo-León Valencia.

There are three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast tablelands, cool and healthy. This temperate region is the most densely peopled portion of the Republic.

The principal rivers are the Magdalena, Cauca, Atrato, Caquetá, Meta, Putumayo and Patía. The Patía flows through the famous *Minitima Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guatara) is spanned by the Rumichaca Arch, or *Inca's Bridge*, of natural stone. On the Rio Bogotá is the Great Fall of Tequendama, 482 feet in height.

The Colombian forests are extensive: among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; in 1960 some 55 million barrels of petroleum were produced and prospecting for new sources of production is in progress in many parts of the Republic. The principal agricultural products are coffee (which accounts for 80 per cent. of total exports by value), cotton, bananas, rice, cocoa, sugar, tobacco, maize, wheat and other cereals. Manufactures, mainly for home consumption, consist of woollen, cotton and artificial silk textiles, leather goods, chemicals, asbestos-cement goods, many pharmaceutical products, rubber goods, including motor tyres, furniture, boots and shoes, confectionery, cigarettes, beer, cement, glass containers and, since the latter part of 1954, steel. Successive foreign exchange crises have led to the encouragement by the Government of the rapid development of new industries, including the local assembly and partial manufacture of motor vehicles, radio sets and office machinery.

The Navy consists of 4 destroyers, 3 frigates, some gunboats and some other small craft, with personnel about 4,500, including one battalion of marines; a battalion of the Colombian army served with the United Nations forces in Korea. The first railway was opened in 1855, about 1,914 miles being open in 1949. The "Atlantic Railway" running through the Magdalena Valley, which links the departmental lines running down to the river, and completes the connection between Bogotá and Santa María, was opened in July, 1961. There are about 2,200 miles of rail in use at present. There were also (1955) some 13,125 miles of metalled roads, of which 8,440 miles are national highways and the remainder departmental and municipal highways; this excludes "dirt" roads

(passable by motors in dry weather only). Colombia was granted loans totalling \$47,300,000 (118,500,000 pesos) by the International Bank, towards the total of 515,000,000 pesos expected to be required to complete the rehabilitation of highways which is now in progress. The national telephone and telegraph system consists primarily of wireless links between the more important centres. Large appropriations have been made for modernization of the country's telecommunication system. A large volume of traffic is carried on the River Magdalena, which is navigable for 900 miles. There are daily passenger and cargo air services between Bogotá and all the principal towns. There are daily services to the U.S.A., frequent services to other countries in South America, a direct B.O.A.C. *Britannia* service once a week to London, and other services to London daily *viâ* New York, three times a week *viâ* Jamaica and twice a week *viâ* Paris, and air mail is delivered to the United Kingdom 3 to 5 days after leaving Bogotá. There are wireless stations in the main cities, and a television station in Bogotá with relays to Manizales, Medellín, Cali and Tunja.

Roman Catholicism is the established religion.

Language and Literature.—Spanish is the language of the country and education has been free since 1870. Great efforts have been made in reducing illiteracy and it is estimated that about 60 per cent. of those over 10 years of age can read and write. In addition to the National University with headquarters at Bogotá there are 20 other universities. There is a flourishing press in urban areas and a national literature supplements the rich inheritance from the time of Spanish rule.

FINANCE. 1960

Actual budget revenue	pesos 2,554,303,000

BRITISH CONSULAR OFFICES.

There are British Consular Offices at Bogotá, Barranquilla, Medellín, Cali and Cartagena.

BRITISH COUNCIL—Representative in Colombia, G. F. de Sausmarez, Calle 22, No. 6-21, Bogotá.

Distant from London 6,200 miles; sea and local air transit, to Bogotá (*viâ* Cartagena or Barranquilla), 22 days. Also *viâ* New York, minimum 12 days. By air, direct or *viâ* New York, Paris or Jamaica, 1 day.

THE CONGOLESE REPUBLIC

President, Joseph Kasavubu, assumed office June 30, 1960.

The State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908, and was administered by Belgium until June 30, 1960. Situated between long. 12°-31° E. and lat. 5° N.-13° S., the Congolese Republic comprises an area of 905,582 sq. miles, with a population estimated (1961) at 14,150,000.

Government.—On June 30, 1960, the Belgian Congo became an independent unitary state under the Presidency of M. Kasavubu with a provisional constitution, the *Loi Fondamentale*, drawn up by the metropolitan Belgian Parliament. On July 11, M. Moïse Tshombe announced the independence of the State of Katanga and although he failed to obtain international recognition he continued to act in an independent manner with the creation of a visa system, a Katanga franc, etc. M. Albert Kalondji followed in August with the creation of the "Autonomous Mining State of South Kasai" at Bakwanga.

By August there were about 25,000 U.N. troops in the Congo, sent at the request of the Prime Minister, M. Lumumba, but they were unable to prevent his attack on South Kasai. This action finally persuaded President Kasavubu to dismiss Lumumba on September 5 and to appoint M. Ileo, President of the Senate, in his stead. On September 14, Col. Mobutu, Chief of the General Staff, announced that he had decided to "neutralize" all politicians and political institutions until January 1, 1961. The Congo would be governed by a College of Commissioners General under the chairmanship of M. Justin Bomboko.

Many of the ministers of the Lumumba government fled to Stanleyville in October and on December 14, M. Antoine Gizenga, Vice-Premier in the Lumumba government, announced that he had decided to transfer the capital of the Republic to Stanleyville where the "legal" government would in future reside. His government was recognized by the Soviet Union, countries of the Eastern bloc and some members of the Afro-Asian bloc. In Leopoldville the College of Commissioners General continued in office until February 9, 1961, when, following a rumour that the U.S.A. and the Soviet Union had made an agreement to disarm the Congolese army, a pre-Round Table conference of Congolese leaders meeting at Leopoldville called for the immediate formation of a provisional government. M. Ileo was again appointed Prime Minister by the President. In March, 1961, all Congolese leaders, with the exception of M. Gizenga, met at Tananarive to discuss the future political structure of the Congo. It was decided in principle that it should become a Confederation of an as yet undetermined number of sovereign states. In the weeks following the conference 14 new states were formed but none of them had a legal basis for their existence pending the legal modification of the *Loi Fondamentale*. A further conference met at Coquilhatville at the end

of April to discuss the implementation of the Tananarive decisions. M. Gizenga again stayed away. M. Tshombe attended and was detained.

In June, 1961, however, M. Tshombe was released and announced that he had reached an agreement with the Central Government and had also made a military agreement by which General Mobutu would henceforth command the Katangan gendarmerie as well as the national army. These agreements were subsequently denounced by the Katangan National Assembly after M. Tshombe's return.

In July, the Parliament met at Lovanium University (outside Leopoldville) under the protection of the U.N.: the Stanleyville regime sent representatives but M. Tshombe did not. M. Adoula was elected Prime Minister and M. Gizenga accepted the post of Deputy Prime Minister. M. Tshombe subsequently announced that he would send Katangan representatives to the newly elected Parliament at Leopoldville. General Mobutu also declared his loyalty to the new Government. During September tension between the Katangan Government and the U.N. mounted and on September 13 fighting broke out. Mr. Hammarskjöld was killed in a flying accident on his way to meet M. Tshombe in an effort to bring an end to hostilities and achieve a settlement. On September 21 a cease-fire was declared.

An uneasy peace endured until December when fighting broke out again in connection with freedom of movement and free access to the airport in Elisabethville. A *de facto* cease-fire was announced on December 18. Messieurs Tshombe and Adoula met at Kitona two days later and announced an agreement, which M. Adoula later accused M. Tshombe of betraying. M. Tshombe came to Leopoldville in March, 1962, under a U.N. safe conduct but returned to Elisabethville in April with little achieved. He came again to Leopoldville the following month and protracted discussions followed resulting in the agreeing of terms of reference for four commissions to examine the outstanding problems connected with the reintegration of Katanga. However, no agreed communiqué was issued and future progress remained uncertain.

Meanwhile M. Gizenga had remained at Stanleyville, although those foreign countries (mostly from the Communist bloc) who had diplomatic missions in Stanleyville sought to transfer them to Leopoldville. After some months of fruitless efforts to negotiate, the Central Government arrested M. Gizenga in February, 1962 and he was held in detention near Leopoldville.

Proposals were put forward for the creation of a number of new provinces and consideration was given to the drafting of a new "federal" constitution.

The constitutional and political position thus remained unsettled by the second anniversary of Independence on June 30, 1962.

Climate.—Apart from the coastal district in the West which is fairly dry, the rainfall averages between 60 and 80 inches. The average temperature is about 80° F., but in the South the winter temperature can fall nearly to freezing point. Sleeping sickness, once very prevalent and destructive, is now decreasing, and malaria is under control in Leopoldville and Matadi.

Extensive forest cover the central districts.

Production.—The cultivation of oil palms is widespread, palm oil now being the most important agricultural cash product, although the value of exports has declined slightly since 1958 (in 1961 exports totalled *Fr.* 2,089,000,000). Rubber (Exports in 1961, *Fr.* 1,122,000,000), coffee (*Fr.* 657,000,000) and timber (*Fr.* 447,000,000) are the

next most important agricultural exports. The production of cotton, tea, pyrethrum, copal and fibres has been severely reduced owing to internal insecurity in 1960 and 1961. The country is rich in minerals, particularly Katanga province. Provisional production figures for 1961 are: copper 293,000 metric tons; zinc concentrates 182,000 metric tons; cobalt 8,400 metric tons; cadmium 190 metric tons; silver 108 metric tons and germanium 14 metric tons. Production of diamonds in Kasai province reached the record total of 18,000,000 carats in 1961, almost all being industrial stones. The output of gems at Tshikapa concession ceased completely early in 1962. Production of cassiterite, wolfram, tin and tantalite fell markedly in 1961. Extensive radium deposits exist near Elisabethville and reef-gold exists in the north-east of the Congo.

There is a wide variety of small but flourishing secondary industries, the main products being: cotton fabrics, blankets, sacks, footwear, beer, cigarettes, cement, paint and sugar. There are very large reserves of hydro-electric power.

The chief exports are copper, palm-oil and palm-kernels, coffee, diamonds, rubber, cobalt and cassiterite.

Trade with U.K.

Language, Religion and Education.—The people are mainly of Bantu-Negro stock, divided into semi-autonomous tribes, each speaking a Bantu tongue. Swahili, a Bantu dialect with an admixture of Arabic, is the nearest approach to a common language in the East and South, and Lingala along the river. It is estimated there are 5,000,000 African Christians in the Republic (Roman Catholic 4,200,000, Protestant 800,000).

COSTA RICA

(República de Costa Rica.)

President (1958-62), Señor Mario Echaudi Jimenez, elected February 1958.

EMBASSY IN LONDON.

4 Palace Gate, W.8.

Ambassador, Señora Maria del Carmen Guitterrez de Chittendam (1962).

1st Secretary and Consul-General (vacant).

Civil Attaché, Señor Marco Aurelio Guillén-Solano.

Cultural Attaché, Señor Don Alex de Soto-Montenegro.

Consul General, Miss O. Rodríguez-Quirós.

The Republic of Costa Rica, the most southerly State of Central America, extending across the isthmus between 8° 17' and 11° 10' N lat. and from 82° 30' to 85° 45' W. long., contains an area of 19,653 English square miles, and an estimated population (Dec., 1961) of 1,240,296. The rate of increase is about 4 per cent., one of the highest in the world. The population is basically of European stock in which Costa Rica differs from most Latin American countries. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824-1839 it was one of the United States of Central America.

On Dec. 1, 1948, the Army was abolished, the President declaring it unnecessary, as the country loved peace.

The coastal lowlands by the Caribbean Sea and Pacific have a tropical climate but the interior plateau, with a mean elevation of 4,000 feet, enjoys a temperate climate. The capital is 103 miles from the Atlantic and 72 miles from the Pacific.

The principal agricultural products are coffee (of a high quality), bananas, rice, maize, sugar-cane, potatoes, cocoa beans and hemp, the soil being extremely fertile. Increasing attention is being paid to cattle raising.

The chief ports are Limón, on the Atlantic coast, through which passes most of the coffee exported, and Puntarenas on the Pacific coast. Bananas are principally exported from Golfito, a port which has been developed on the Pacific Coast by the United Fruit Co. In 1961, 1,043 ships of a gross tonnage of 4,164,681 entered at Costa Rican ports. About 400 miles of railroad are open. The country is well provided with airways, and Pan-American Airways, LACSA and TACA call at San José, while feeder services link the main centres of population with the capital.

Spanish is the language of the country. Education is compulsory and free. The literacy rate is the highest in Latin America. In post-war years there has been a big advance in the provision of social services.

CUBAN EMBASSY IN LONDON

22 Mount Street, W.1.

[Mayfair: 6636]

Ambassador in London (vacant).

Chargé d'Affaires, Dr. Federico de Cordova Castro.

Consul, Señor Julio del Castillo, 329 High Holborn, W.C.1.

Cuba (the largest of the "West India" Islands) lies between 74° and 85° W. long., and 10° and 23° N. lat., with a total area of 44,178 sq. miles and a population (estimated, 1955) of 6,125,000.

The island of Cuba was visited by Christopher Columbus during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. [The island was under British rule for one year, 1762-1763, when it was

returned to Spain in exchange for Florida.] Separatist agitation culminated in the closing years of the 19th century in a fierce and blood-thirsty war. In 1898 the government of the United States intervened and despatched the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which remains an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from Aug. to Sept., 1906, when the U.S. Government resumed control. On Jan. 28 1909, a republican government was again inaugurated. In 1933 a revolution was followed by provisional government until May, 1936, when a constitutional government was elected. A new Constitution was promulgated in 1940, but its operation was suspended for various periods until February 24, 1955, when the Government elected on November 1, 1954, took office. A revolution led by Dr. Fidel Castro overthrew the Government of General Batista on January 1, 1959. A provisional government was set up and elections were promised within four years. During 1961 the Revolutionary Government was carrying out a programme of land and urban reform. All the major industries had been nationalized or placed under Government control. Dr. Castro has since proclaimed the revolution to be Socialist and himself to be a Marxist-Leninist. He has announced the impending formation of a single party State, and a new Socialist constitution has also been promised, but no date has been fixed for its introduction.

Of the total area of 28,000,000 acres, there were (1953), about 5,750,000 acres under cultivation, of which 61 per cent. was under sugar. Tobacco, sweet potatoes, bananas, rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pineapples, &c.) flourish. The chief agricultural products of the island are sugar and tobacco; sugar crop (1959) 5,790,600 Spanish long tons; tobacco crop (1959) 40,500 metric tons; the chief product of the forests is mahogany. White cedar is also used for boxing the tobacco crop. The estimated livestock figures include (1955) 4,500,000 cattle and 400,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

11,256 route miles of railroad are open (public service 3,677; private lines on plantations and in mining areas 7,579) and about 12,000 miles of telegraph line; there are about 8,291 miles of roads. The island forms an important stopping place for many international airlines.

Language and Literature.—Spanish is the language of the island, but English is widely understood. Education is compulsory and free. The University of Havana was founded in 1728 but until its enlargement under American auspices in the first quarter of the twentieth century no great progress was made in secondary or higher education. Public libraries have been established and there is a flourishing daily press with wide circulation.

FINANCE.

Public revenue in 1958 was estimated at \$365,247,946 and in 1959 at \$460,287,219. The

public debt stood at \$760,300,000 at the end of 1958.

Nominally \$=U.S. \$r. U.S. currency ceased to be legal tender in Cuba on June 30, 1951 (*see also* p. 84).

Area and Population.—Czechoslovakia, formerly part of the Austro-Hungarian Monarchy, declared its independence on Oct. 28, 1918 (Czechoslovak Independence Day), the territory thus affected having an area of 53,700 square miles.

Since the War of 1939-45 the territory and population of the Republic have undergone change. By a treaty with the Soviet Union (June 29, 1945) Ruthenia was ceded to U.S.S.R., thus reducing the area by over 4,000 square miles and the population by over 750,000. In addition, the Sudeten German minority was expelled as sanctioned at the Potsdam Conference and the preliminary results of the census of March 1, 1961, gave the population as 13,742,000.

Government.—In September, 1938, Adolf Hitler demanded the cession of the Sudeten districts. On Sept. 29, 1938, a Four Power Conference at Munich acquiesced in the annexation of the territory on the understanding that no further demands would be made, but on March 14, 1939, Nazi troops invaded Czechoslovakia, in flagrant violation of the terms of the Munich Conference, and two days later Adolf Hitler proclaimed that Czechoslovakia had "ceased to exist": a "Slovak State" was established and Bohemia and Moravia were declared a Protectorate of the Reich.

On July 22, 1940, Great Britain recognized the Czechoslovak National Committee set up in London as a provisional Czechoslovak Government, and on July 18, 1941, Great Britain fully recognized the Czechoslovak Government headed by President Benés.

Following the liberation of Eastern Slovakia by Soviet forces in 1945, President Benés and most of the members of his Government left London for Moscow for discussions with the Czechoslovak émigré movement in the Soviet Union on the formation of a new Government which would have its seat on Czechoslovak territory. The composition and programme of this Government, which was headed by M. Z. Fierlinger, were announced at Koscice in Slovakia on April 4, 1945. The Koscice Government included equal representation of four Czech parties (Czech Socialists, Social Democrats, Communists and Popular Party) and two Slovak parties (Democrats and Communists).

The first elections in the liberated Republic were held on May 26, 1946, the Communists emerging as the leading party with 38 per cent. of the votes cast. On July 3, 1946, K. Gottwald, the Communist leader, formed a Government of parties participating in a National Front. The uneasy alliance between the parties was terminated by a crisis precipitated by the mass resignation on February 20, 1948, of Ministers representing parties opposed to the Communists in protest against the widespread introduction of Communists into the police force by the Communist Minister of the Interior. The Communist Party, with the aid of Action Committees, seized power, and on February 25 a new Government, pre-

dominantly Communist, was formed. On May 30, 1948, new elections were held, the choice lying between a single joint election list of parties in the National Front, and a blank vote. The Communist control of the country is now unqualified. On July 11, 1960, a new constitution was proclaimed, replacing that of 1948. Its purpose was to express the fact that Czechoslovakia is now deemed to have completed the construction of Socialism and to be on the road to true Communism. The official title of the State was accordingly changed to "The Czechoslovak Socialist Republic".

The first Five-Year plan which came to an end in December, 1953, was largely concerned with extending heavy industry and industrializing Slovakia. It was officially claimed that production had doubled during the plan, but it was also admitted that the economy had been thrown out of balance by poor progress in the development of ore reserves, fuel, power and agricultural production. The second Five-Year plan covered the years 1956-1960, after two interim years (1954 and 1955) devoted to correcting these faults. During the second Five-Year plan gross industrial production increased by 66 per cent., the emphasis remaining on heavy industry. Progress in hard coal production and in increasing power generating capacity, however, was less good, and agricultural production remained virtually stagnant in spite of the continued formation of agricultural co-operatives. One of the major tasks of the third Five-Year plan (1961-65) is to increase agricultural production by improving the mechanization of agriculture.

Language and Literature.—Czech and Slovak are the official languages but the literature is mainly Czech in Bohemia, Moravia and Silesia. The Reformation gave a widespread impulse to Czech literature, the writings of Jan Hus (who was martyred in 1415) familiarizing the people with Wyclif's teaching. This impulse endured to the close of the seventeenth century when Amos Komensky, or Comenius (1592-1670) was expelled from the country. Under Austrian repression, and with the outlawing of the national language, there was a period of stagnation until the national revival in the early nineteenth century. Modern prose drama and fiction are represented by several authors of international reputation, notably K. M. Capek-Chod (1860-1927), F. X. Svoboda (1860-1943), Jaroslav Hilbert (1871-1936), Viktor Dyk (1877-1931), Arnost Dvortik (1880-1933), Ivan Olbracht (b. 1882), K. Capek (1890-1938), and Vladimir Vancura (1891-1942). Liberty of the press ceased with the violation of independence in 1939. It was temporarily restored on the liberation of the country. After the Communist coup of February 25, 1948, however, freedom of the press was "curtailed." All papers and periodicals were forced to follow the party line and a number of publications were banned.

Education.—In 1960-61 the number of pupils in general (primary and secondary) schools was given as 2,220,800. In addition there were, in 1960-61, 237,900 pupils at technical schools, including 92,400 adults studying extra-murally. Education is compulsory and free for all children from the ages of 6 to 14, and under the 1960 Education Act the school-leaving age is being raised to 15. There are four universities in Czechoslovakia of which the most famous is Charles University in Prague (founded 1348), the others being situated at Bratislava, Brno and Olomouc. In 1960-61 the number of university students was said to be 94,040, with another 26,740 extra-mural students.

Finance.—The Czechoslovak currency is the Czechoslovak Koruna (Kčs=Czechoslovak crown)

of 100 heller. From the devaluation of the pound in 1949 up to May 30, 1953, the exchange rate was Kčs. 130.58 = £1. On June 1, 1953, the official rate was changed to Kčs. 20.16 = £1, but a bonus of 100 per cent. was added to certain non-commercial transfers including the encashment of travellers' cheques. This change took place as the result of an internal currency reform when a new currency was issued at a basic exchange rate of Kčs. 1.00 of the new currency for Kčs. 5.00 of the old. The present rate is Kčs. 20.10 = £1. The 100 per cent. bonus still applies. The Budget estimates for 1962 total Kčs. 123,201,000,000 for expenditure and Kčs. 123,322,000,000 for revenue.

Trade with U.K.

DAHOMEY

(Republic of Dahomey)

President, Hubert Maga, elected for five years, December 11, 1960.

President of the National Assembly, Valentin Djibodé Aplogan.

President of the Supreme Court and Minister of Foreign Affairs, Emile Zinzou.

Vice-President and Minister of Development, S. M. Apithy.

A republic situated in West Africa, between 2° and 3° W and 6° and 12° N., Dahomey has a short coast line of 78 miles on the Gulf of Guinea but extends northwards inland for 437 miles. It is flanked on the west by Togo, on the north by the Voltaic Republic and Niger and on the east by Nigeria. It has an area of about 47,000 square miles and a population estimated in 1961 at 1,934,000. Although poor in resources, Dahomey is one of the most thickly populated areas in West Africa, with a high level of education. It is divided into four main regions running horizontally: a narrow sandy coastal strip, a succession of intercommunicating lagoons, a clay belt and a sandy plateau in the north.

The first treaty with France was signed by one of the kings of Abomey in 1851 but the country was not placed under French administration until 1892. Dahomey became an independent republic within the French Community on Dec. 4, 1958; full independence outside the Community was proclaimed on August 1, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in

Paris on April 24, 1961. Dahomey is a member of the *Conseil de l'Entente* (see Ivory Coast). The official language is French.

The Constitution of Dahomey, adopted on November 25, 1961, provides for a presidential system of government, a single Chamber National Assembly and a Supreme Court. At elections held on Dec. 7, 1960 the newly-established *Parti Dahoméen de l'Unité* won a large majority.

Principal products are agricultural—palm oil, palm kernels, ground-nuts, maize, millet and sorghum, the first three providing the main exports. Anticipated revenue of the Republic in 1961, was francs CFA 6,337,594,000, of which 1,200,000,000 was foreign aid. Trade in 1961 was valued at: Imports, francs CFA 6,275,345,000; Exports, francs CFA 3,579,000,000. Imports from U.K., £295,037. The currency of Dahomey is the *Franc CFA* (francs CFA 50 = French N.F. 1).

CAPITAL.—Porto Novo (35,000). Principal commercial town and port, Cotonou (81,800).

FLAG.—Three stripes, one vertical, green, two horizontal yellow and red.

British Ambassador (see Ivory Coast).

Vice-Consuls, Niels Lassen (*Commercial Secretary*); Bent Richnagel (*Commercial Secretary*).
Consul, C. Jacobsen.
Vice-Consul, T. F. Germer.

AREA AND POPULATION.—A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Funen, Lolland, etc., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'–57° 45' N. lat., and 8° 5'–15° 12' E. long., with an area of 16,608 square miles, and a population estimated (January, 1, 1960) at 4,565,500. In 1960 there were 76,195 births, 43,681 deaths and 36,176 marriages.

GOVERNMENT.—Under the Constitution of the Kingdom of Denmark Act of June 5, 1953, the legislature consists of one chamber, the *Folketing*, of not more than 179 members, including 2 for the Farøe and 2 for Greenland. The voting age is 21 years. In the 1960 elections the Social Democrats obtained 76 seats; Venstre 38; Conservatives 32; Radicals 11; Socialist People's Party 11; Farøe 2; Greenlanders 2; Slesvig Party (German Minority) 1; Independent 6.

EDUCATION is free and compulsory, the schools being maintained by taxation. Special schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen (founded in 1478) and Aarhus (1933).

LANGUAGE AND LITERATURE.—The Danish language is akin to Swedish and Norwegian. Danish literature, ancient and modern, embraces all forms of expression, familiar names being Hans Christian Andersen (1805–1875), Søren Kierkegaard (1813–1855) and Georg Brandes (1842–1927), with Henrik Pontoppidan (1857–1943) and Karl Gjellerup (1857–1919), who shared the Nobel Prize for Literature in 1917, and Johannes V. Jensen (1873–1950), who received the same award in 1945. Over 200 newspapers are published in Denmark; 11 daily papers are published in Copenhagen.

PRODUCTION AND INDUSTRY.—Twenty-one per cent. of the population live exclusively by agriculture, and about 48 per cent. by manufactures and trade. The chief products are wheat, rye, oats, barley, potatoes, seeds, cattle, horses, pigs and dairy produce; manufactures based on imported raw material cover most of the home consumption.

COMMUNICATIONS.—Mercantile marine (ships above 100 gross tonnage) (December, 1959) 880 ships, with a gross tonnage of 2,208,033. In 1959 there were 4,301 kilometres of railway and 528,885 kilometres of telegraph and telephone lines.

There are also *Vice-Consulates* at *Aabenraa*, *Aalborg*, *Aarhus*, *Esbjerg* and *Odense*; and at *Thorshavn* (Farøe). There is a *Consular Agent* at *Klaksvig* (Farøe).

BRITISH COUNCIL.

Representative, M. W. Blake (*Cultural Attaché*), c/o The British Embassy.

Outlying Parts of the Kingdom

The outlying parts of Denmark have about 55,000 inhabitants. The FARØE, or Sheep Islands (540 sq. m. pop. (1955) 32,456), capital, Thorshavn, are governed by a *Lagting* of 25 members, and send 2 representatives to the *Folketing* at Copenhagen. On September 14, 1946, the *Lagting*, with the consent of the Danish Government, for its own guidance held a plebiscite on the Farøe. About one-third of the electors did not, however, take part in the voting: of the rest a little more than half the votes cast were in favour of separation from Denmark and the establishment of a republic. At a subsequent general election for the *Lagting* a great majority voted in favour of remaining a part of the Kingdom of Denmark with a certain extent of home rule. In 1948 the Farøe received a certain measure of home rule. Special Farøese affairs are administered by a council of 3 members. Trade with U.K. in 1961 totalled: Imports, £475,952; Exports, £1,378,655. GREENLAND (ice-free portion about 132,000 sq. m., total area about 840,000 sq. m., population, Dec. 31, 1959, 31,855), is divided into 3 provinces (West, North and East). West Greenland (capital, Godthaab) has a *Landsraad* of 14 members and sends 2 representatives to the *Folketing* at Copenhagen. The trade of Greenland is mainly under the management of the Royal Greenland Trade Department; discoveries of lead were made in 1948. Imports from U.K. (1961), £141,650. The United States of America has acquired certain rights to maintain air bases in Greenland.

DOMINICAN REPUBLIC

(República Dominicana.)

President, Lic. Rafael F. Bonnelly, assumed office January 1, 1962.

EMBASSY IN LONDON

Consul-General, Señor Victor Cabral.

There are also Consular Offices at Liverpool, Birmingham, Manchester, Nottingham, Grimsby, Sheffield, Southampton, Plymouth, Cardiff, Edinburgh, Glasgow and Belfast.

The Dominican Republic, formerly the Spanish portion of the island of Hispaniola, is the oldest settlement of European origin in America.

The island was discovered by Christopher Columbus in December, 1492, who named it "La Española" or "Little Spain." In 1496 he ordered his brother, Bartolomew Columbus, to found the capital at the mouth of the Ozama River, on the south of the island, which city he called Sanjo Domingo. The island immediately became the objective for adventurous Spanish colonists, who exploited the native Indians for the sake of the gold found in the streams. African negroes were imported for the sugar and other plantations both in Santo Domingo and Haiti.

In 1821 Santo Domingo broke away from Spain and declared itself independent, but in 1822 it was invaded and subjugated by its negro neighbours from the west, the Haitians. The latter were driven out on Feb. 27, 1844, when the Dominican Republic was definitely proclaimed by the natives.

The country was occupied by American marines from 1916 until the adoption of a new Constitution in 1924. In July, 1924, a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the Customs and the redemption of foreign obligations, which continued to be administered by an American official.

From 1930 until May 30, 1961 (when he was assassinated) Generalissimo Rafael Trujillo ruled the country with an iron hand. Since January 1, 1962, legislative and executive powers have been vested temporarily in a seven-man Council of State headed by the President of the Republic. Elections for a constituent assembly to revise the constitution and later for a new President and Legislature were expected to be held before the end of 1962.

The Dominican Republic lies between Cuba on the west and Puerto Rico on the east and covers an area of about 19,322 square miles, with a population of 3,013,525 at a Census held in August, 1960. The climate is tropical in the low lands and semi-tropical to temperate in the higher altitudes. According to local classification there are 2,398 miles of first class and 2,098 miles of second class and inter-communal roads in the Republic. There is a direct road from Santo Domingo to Port-au-Prince, the capital of Haiti, enabling the journey to be made in one day. There are about 80 miles (Sánchez-La Vega) of public railway, and a telephone system connects practically all the principal towns of the republic. The Dirección General de Comunicaciones, All American Cables, and Radio Corporation of America maintain an efficient telegraph service with all parts of the world. There are more than 60 commercial broadcasting stations and there

is a television station operated by Radio Santo Domingo, which with the help of relay stations provides reception of its programmes throughout the Republic. A second television station in Santo Domingo-Rahintel transmits to the local area.

Spanish is the language of the Republic.

Sugar, coffee, cocoa, and tobacco are the most important crops. Other products are peanuts, maize, rice, bananas, molasses, salt, cement, timber, cattle, iron ore, sisal products, honey and chocolate. There are several light industries producing sisal bags and rope, glass products, cotton textiles, shoes, paper, rum, matches, peanut oil and other products.

The Republic is served by five airlines, Pan-American, Caribair, Compania Brasileira de Aviación (VARIG), Venezuelan National Airways (VIASA) and the Compania Dominicana de Aviación. The new international airport 18 miles to the east of the capital is now in full operation.

FINANCE

Budget	1961	1962†

[Knightsbridge: 1367]

Ambassador in London, His Excellency Don Alfredo Ledesma Malo (1961).

Air Attaché, Col. Gonzálo Fernández.

2nd Secretary, Dr. Manuel Andrés Borrero.

3rd Secretaries, Señora Dora Paulson; Señor Alvaro Villagómez (*Consular Affairs*).

Consulats at *Liverpool*, *Birmingham* and *Glasgow*.

Area and Population.—Ecuador is an equatorial State of South America, the mainland extending from lat. 1° 38' N. to 4° 50' S., and between 75° 26' and 81° W. long., comprising an area reduced by boundary settlements with Peru (Jan. 29, 1942) to about 226,000 sq. miles.

The Republic of Ecuador is divided into 20 provinces and one territory. It has a population estimated (June, 1959) at 4,169,204, mostly descendants of the Spaniards, aboriginal Indians, and Mestizos. The territory of the Republic extends across the Western Andes, the highest peak of which is Aconcagua, in the Chilean sector (22,976 ft.), the highest peaks in Ecuador being Chimborazo (20,498 ft.), Iliniza (17,405 ft.), Carluhuariza (16,515 ft.); Cotocachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.), and Sincholagua (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayas, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

The *Galápagos* (Tortoise) Islands forming the province of Colon, were annexed by Ecuador in 1832. The archipelago lies in the Pacific, about 500 miles from Saint Elena peninsula, the most westerly point of the mainland. There are 12 large and several hundred smaller islands with a total area of about 3,000 sq. miles and an estimated population (1959) of 1,790. The capital is San Cristobal, on Chatham Island. Although the archipelago lies on the equator, the temperature of the surrounding water is well below equatorial average owing to the *Antarctic Humboldt Current*. The islands export guano, orchilla moss and cattle. There is an increasing amount of fishing, mainly for the North American market.

Government.—The former *Kingdom of Quito* was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Viceroyalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822). A new constitution was issued on Dec. 31, 1946.

Production and Industry.—The chief products are bananas, cocoa, coffee, rice, petroleum, straw hats, vegetable ivory and balsa wood. The petroleum, like the products of Ecuador's farm lands and cotton industry, which are extensive, is almost wholly consumed internally. Small amounts of gold, silver and lead are mined, and emeralds and rubies are occasionally found.

Communications.—There are about 2,000 miles of permanent roads and 2,500 miles of roads which are only open during the dry season. There are about 750 miles of railway, including the railway from Quito to Guayaquil. The laying of a new track from Ibarra to San Lorenzo has now been completed. Seven commercial airlines (Panagra,

Area, Braniff, K.L.M., Avianca, Equatoriana de Aviación and Air France), operate international flights, linking Ecuador with New York, Miami, Lima, Santiago, Rio de Janeiro, etc. Area and other Ecuadorian companies operate internal services between all important towns.

Defence.—The standing Army has a strength of about 8,000. There is an Air Force of some 40 front line aircraft and a small Navy. All are being advised by U.S. missions.

Language and Literature.—Spanish is the language of the country. The electorate of Congress is confined to adult male and female citizens who can read and write, and in recent years considerable headway has been made in reducing the high figure of illiteracy. 3 daily newspapers are published at Quito and 6 at Guayaquil. Elementary education is free and compulsory. In 1957-58 there were 501,622 pupils at the 4,661 primary schools and 53,840 pupils at the 249 High Schools. The 6 Universities (at Quito, Guayaquil, Cuenca, Loja and Portoviejo) and the Polytechnic School at Quito had 6,646 students in the same year.

FINANCE 1960

[Kensington: 7212]

Ambassador, His Excellency Haddis Alemayehon (1961).

1st Secretaries, Berhane Deneke; Tesfaye Mekasha.
2nd Secretary, Amare Guga.
3rd Secretary, Bahta Mellus.

Position and Extent.—The Empire of Ethiopia, with which Eritrea has been federated since 1952, is in North-Eastern Africa, bounded on the north west by the Sudan; on the south by Kenya; on the east by French Somaliland and the Republic of Somalia; and on the north-east by the Red Sea. The area is estimated at 400,000 square miles (Eritrea approximately 50,000), with a population estimated (1961) at 21,800,000 (Eritrea 1,000,000), of whom about one-third are of the ruling race of Amharas and the remainder mainly Gallas, Guraghi, Sidama, Agao, negro tribes on the west and south frontiers, and Danakil and Somalis on the east.

Ethiopia is mainly a mountainous country, volcanic in origin, with several peaks of about 14,000 ft., notably in the centre and in the Simlela range in the north; many other mountains exceed 10,000 ft. Eritrea consists of a mountainous hog-back range up to 10,000 ft., interposed between the Red Sea and the Sudan, flanked on east and west by flatter territory. The lower country and valley gorges of both Ethiopia and Eritrea are very hot; the higher plateaux are well watered, with a genial climate. On the high plateaux there are two main seasons in the year, a dry winter, October to May, and a rainy summer from June to September, with a season of "small rains" occurring generally in March. The chief river is the Blue Nile, issuing from Lake Tana; the Atbara and many other tributaries of the Nile also rise in the Ethiopian highlands.

The Amharas, who inhabit the southern highlands of Eritrea, provinces of Tigre, Begemdir, Gojjam, parts of Shoa, and many of the Gallas, are Christian (a branch of the Coptic Church). The head of the Coptic Church is the Patriarch at Alexandria. Since 1959, however, the Ethiopian Church has been autocephalous; the Patriarch ranks immediately after the Alexandrian Patriarch. Moslems predominate in some areas, notably northern Eritrea, Harar and Jimma and Arussi, the Moslem centre being at Harar. The province of Gamu Gofa and parts of Sidamo and Arussi have considerable pagan elements.

GOVERNMENT

Ethiopia.—The Empire is governed by a Council of Ministers, responsible to the Emperor, and a Parliament consisting of a Senate and a Chamber of Deputies, in accordance with the constitution promulgated in 1955. Elections, on a basis of universal suffrage, were held in 1957, and the Chamber of Deputies met for the first time at the end of that year. The second General Election was held in 1961. The Chamber enjoys greater fiscal control than the previous Assembly and there is a limited degree of ministerial responsibility to Parliament. The Senate continues to be nominated by the Emperor.

Eritrea.—Eritrea was administered by Great Britain from the end of the Second World War until September 15, 1952, when in accordance with a resolution of the United Nations Assembly of December 2, 1950, it was federated with Ethiopia under the Ethiopian Crown. A new Constitution for Eritrea was ratified by the Emperor on August 11, 1952. The Government of Eritrea has legislative, executive and judicial powers in domestic affairs, and its jurisdiction extends to all matters not vested in the Federal Government, including health, education, welfare, law and order, the levying of taxes and adoption of a budget. Defence, currency, foreign affairs, finance, foreign trade and communications (including ports) are within the jurisdiction of the Federal Government.

Full executive power is, subject to certain safeguards, in the hands of a Chief Executive elected by the Assembly to hold office during its own term, but not responsible to the Assembly. The single chamber Assembly is elected by all adult males of federal nationality. There is also in Eritrea a representative of the Emperor who has certain formal rights and prerogatives not affecting Eritrea's autonomy. English was adopted as the official language of the Eritrean Assembly.

Production and Industry.—The principal pursuits are agriculture and cattle breeding. In the hotter regions, sugar-cane, cotton, &c., flourish; in the middle zone maize, wheat, barley, coffee, oranges and other fruit trees, tobacco, potatoes and oil seeds are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. Coffee provided approximately 50 per cent. of the country's total exports by value in 1961. The forests are a potential source of wealth. Horses, mules, donkeys, cattle, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people. Industry is small, the main products being textiles, foodstuffs, beer and cement.

Communications.—A railway links Addis Ababa, the capital, *via* Dire-Dawa, with Jibuti, 486 miles away. In Eritrea a narrow gauge line runs from Massawa to Asmara and on to Agordat. Several roads were constructed before and during the Italian occupation; the principal road runs from Addis Ababa to Dessie and on to Asmara, with a branch from Dessie to Assab on the Red Sea Coast. Gondar is linked to Asmara by a road through Axum and Adua. Others run from Addis Ababa west to Lekempi, south-west to Jimma, Gore and Gambela, south to the Kenya frontier, and in the East from Dire Dawa to Harar and the northern region of the Somali Republic. Partly financed by large loans from the International Bank for Reconstruction and Development, much further improvement and extension of roads is being undertaken. The Ethiopian Air Lines maintain regular services from Addis Ababa to most of the provincial towns. External services are operated to Jibuti, Taiz, Hodeida, Port Sudan, Calro, Khartoum, Nairobi, Athens, Frankfurt, Lagos, Accra, Conakry and Monrovia.

Defence.—A Ministry of Defence has been instituted. The armed forces comprise the Imperial Army, the Imperial Bodyguard, the Imperial Air Force and the Imperial Navy. The Army consists of infantry, artillery, engineers, signals, ordnance, and supply services, and has an armoured squadron of light tanks and armoured cars. An American Military Mission trains the Army, and Swedish officers are employed in the Ministry of Defence. There is now a military academy at Harar. The Imperial Air Force comprises a ground attack wing, a transport squadron and a flying training school. The aircraft are of Swedish and American manufacture.

The Imperial Navy has a small headquarters in Addis Ababa with a naval base situated at Massawa. The training of the Navy is mainly in the hands of Norwegian instructors. The Fleet comprises two coastal cutters and two motor torpedo boats.

Education.—Elementary education is provided without religious discrimination by Government schools in the main centres of population; there are also Mission schools and cadet-schools for the Army, Air Force, and Police. Government secondary schools are found mainly in Addis Ababa, but also in most of the provincial capitals. In 1961 the Hailé Selassie I University was founded to co-ordinate the existing institutions of higher education (University College, Engineering, Building and Theological Colleges in Addis Ababa, Agricultural College at Alemaya, near Harar, and Public Health Centre in Gondar, etc.) and to provide a framework for future development. Amharic is the official language of instruction, with English as the first foreign language. Arabic is taught in Koran Schools; and Ge'ez (the ancient Ethiopic) in Christian Church Schools, which abound. Adult education is met to some extent by institutes which provide evening classes in Addis Ababa.

FINANCE

1961-62

	Ordinary	Extraordinary
Revenue.....	£27,100,000	£17,100,000
Expenditure.....	27,700,000	16,900,000

Currency.—The Ethiopian dollar has a value of 5.52 grains of fine gold and is divided into 100 cents. At Dec. 31, 1961, the combined note and coin issue amounted to £26,800,000; gold, silver and foreign exchange reserves amounted to £20,700,000. Eth. \$7 = £1.

TRADE

Total Imports (Yr. to Sept. 10, 1961)	£32,400,000
Total Exports (Yr. to Sept. 10, 1961)	26,300,000

Trade with U.K.

	1960	1961
Imports from U.K.....	£2,392,805	£2,948,061
Exports to U.K.....	1,652,896	1,630,441

The chief imports by value are cottons, petroleum products, machinery, motor vehicles and parts; the principal exports by value being coffee, oilseeds, hides and skins, and pulses.

CAPITAL. Addis Ababa (population, estimated July, 1961, 449,021), also capital of the province of Shoa; Asmara (population 120,000) is the capital of Eritrea; other provincial capitals are Makale (Tigré), Gondar (Begemdir), Dessie (Wallo), Debra Markos (Gojjam), Lekempti (Wallega), Goré (Illababor), Jimma (Kaffa), Chenchä (Gamu-Gofa), Yirgalem (Sidamo), Aselle (Arusi), Goba (Bale), and Harar (Harar). Dire Dawa is the most important commercial centre after Addis Ababa and Asmara, Ψ Massawa and Ψ Assab (recently enlarged) are the two main ports. There are ancient architectural remains at Aksum, Gondar, Lalibela and elsewhere.

ETHIOPIAN FLAG.—Three horizontal bands; green, yellow, red; bearing crowned lion at centre.

BRITISH EMBASSY

(Addis Ababa)

Ambassador. His Excellency John Wriothlesley Russell, C.M.G. (1962) £4,115
Counsellor. D. R. Ashe.
Naval Attaché. Cdr. P. R. C. Higham, R.N.
Military Attaché. Lt.-Col. I. J. D. Stevenson-Hamilton, D.S.O.
Air Attaché. Wing-Cdr. D. B. Delany, A.F.C.
Civil Air Attaché. R. S. Swann.
Second Secretaries. E. A. J. Fergusson; Miss E. M. Dumbell, O.B.E.
First Secretary (Commercial). M. B. Eaden.
First Secretary and Consul. R. G. Peel, M.B.E.

BRITISH CONSULAR OFFICES

There are British Consular Offices at Addis Ababa, Asmara and Mega.

BRITISH COUNCIL

Representative. P. G. Lloyd, P.O. Box 1043, Addis Ababa.

FINLAND

(Suomi)

President. Dr. Urho Kaleva Kekkonen, born 1900, elected Feb. 15, 1956; re-elected 1962, for term of six years.

CABINET

(April 13, 1962)

Prime Minister. Dr. Ahti Karjalainen.
Foreign Affairs. Prof. Veli Merikoski.
Interior. Eeli Erkkilä.
Justice. Dr. J. O. Söderhjelm.
Finance. Osmo Karttunen.
Defence. Arvo Pentti.
Education. Mrs. Arml Hosia.
Agriculture. Dr. Johannes Virolainen.
Communications. Erkki Savela.
Trade and Industry. Toivo Wihnerheimo.
Social Affairs. Olavi Saarinen.
Deputy Ministers. Onni Koski (*Finance*); Verner Korsbäck (*Agriculture*); Onni Närvinen (*Communications*); Miss Kyllikki Pohjola (*Social Affairs*).

FINNISH EMBASSY IN LONDON

66 Chester Square, S.W.1

(Sloane: 0771)

Ambassador in London. His Excellency Leo Tuominen (1957).

Area and Population.—A country situated on the Gulfs of Finland and Bothnia, with a total area of 130,127 square miles, of which 70 per cent. is forest, 9 per cent. cultivated, 9 per cent. lakes and 12 per cent. waste and other land, population (Jan. 1, 1961), 4,477,300. In 1959 the birth rate was 18.9, death rate 8.8 per 1,000. The infant mortality rate was 23.6 per 1,000 live births. 93.1 per cent. of the people are Lutherans, 1.6 per cent. Greek Orthodox and 5.3 per cent. others. The loss of Karelia meant resettling about 480,000 refugees mainly on some 46,000 new farms provided by the Government, partly from holdings exceeding 62 acres and partly by purchase.

The Aland Archipelago (Ahvenanmaa), a group of small islands at the entrance to the Gulf of Bothnia, covers about 572 square miles, with a population (1959) of 22,144 (97 per cent. Swedish-speaking). The islands have a semi-autonomous status.

Government.—Under the Constitution there is a single Chamber (*Eduskunta*) for which women are eligible, now composed of 200 members, elected by universal suffrage of both sexes. The legislative power is vested in the Chamber and the President. The highest executive power is held by the President who is elected for a period of 6 years.

Upon the re-election of the President, the Prime Minister, Mr. Martti Miettunen, tendered on Mar. 1, 1962, the resignation of his Government which had been in office since July 14, 1961. After prolonged negotiations Dr. Karjalainen formed a Government of all parties on April 13, 1962, supported by 113 of the 200 members of the Diet.

Defence.—By the terms of the Peace Treaty (Feb. 10, 1947) with U.K. and U.S.S.R., the army is limited to a force not exceeding 34,000. The Navy is limited to a total of 10,000 tons displacement with personnel not exceeding 4,500. The Air Force, including naval air arm, is limited to 60 machines with a personnel not exceeding 3,000. Bombers or aircraft with bomb-carrying facilities are expressly forbidden. The Defence Forces contain a cadre of regular officers and N.C.O.'s, but their bulk is provided by conscripts who serve for 8-11 months. None of the defence forces has the full complement permitted.

Education.—Primary education is compulsory and free for all children from 7 to 15 years, and in 1960 there were 630,900 in attendance at primary schools, with 216,100 in secondary schools; and 31,000 in colleges for vocational training. In 1960 there were 11 Higher Schools with 6,300 students, and 4 universities; the State University of Helsinki (about 11,000 students); 2 at Turku (one Swedish-speaking); and a new university (400 students) at Oulu. Combined enrolment at Higher Schools and Universities was 21,350.

Language and Literature.—Most Finns are bilingual. 91.2 per cent. speak Finnish as their first language, 8.6 Swedish and the remaining 0.2 per cent. other languages (mainly Lapps living a nomadic life in the North). Since 1883 Finnish has been on an equal footing with Swedish as the official language of Finland, but since independence in 1919 Finnish has slowly been displacing Swedish. In literature also, until the close of the eighteenth century, Swedish was dominant, but awakening Finnish nationalism in the early years of the nineteenth century and the establishment of an association for the promotion of Finnish literature in 1831 gave Finnish the status of a literary language. There is a vigorous modern literature. Eemil Sillanpää was awarded the Nobel Prize for Literature in 1939. There are 65 daily newspapers in Finland.

Production and Industry.—Finland has a greater area covered in forest than any other European country except the Soviet Union. Consequently the national economy is based on the timber, pulp and paper industries. These industries employ a large proportion of the working population and accounted in 1959 for 74 per cent. of Finland's foreign exchange earnings. The metal and metal working industries, producing 17 per cent. of Finland's export income in 1959, form the second important group. In the agricultural field, production is relatively low and the tendency is towards dairy farming. Exports of agricultural and dairy products amounted to 6 per cent. of total exports in 1959. The remaining export revenue came from the glass, ceramics and furniture industries. To a large extent domestic requirements in the textile, rubber, plastics, chemical and pharmaceutical, footwear and foodstuff trades, are met by local factories.

Communications.—There are 3,700 miles of railroad and a well-developed telegraph and telephone system. There is railway connection with Sweden

and U.S.S.R., passenger boat connection with most of the countries of Western Europe, and telephone communication with most countries of the world. External civil air services are maintained by BEAC (as far as Stockholm), Aero Oy (Finnish Airlines), Scandinavian Airlines System and Pan American Airways. Aero Oy and Aero Flot each maintain a service with Moscow twice a week. Aero Oy maintains an extensive internal air service. Aero Flot maintains a service twice a week with Leningrad and Czech State Airlines twice a week with Prague. The merchant fleet (June, 1961) consists of 204 steamships (298,095 tons gross), 241 motor vessels (501,188 tons gross), and 88 sailing ships with auxiliary engine (9,417 tons gross).

FINANCE		1961
Revenue (<i>Budget</i>).....	Marks	406,190,993,000
Expenditure (<i>do.</i>).....		406,184,331,000
Debt (March 1961).....		147,000,000,000
Finnish Mark 896 (approx.) = £1 (see also p. 84).		

TRADE		1960
Total Imports.....	Marks	339,747,000,000
Total Exports.....		316,523,000,000

Trade with U.K.

	1960	1961
Imports from U.K....	£47,836,556	£51,244,820
Exports to U.K....	95,669,215	94,898,220

The principal imports are raw materials, food-stuffs, machinery and manufactured goods. The exports are principally the output of the timber mills (timber, cellulose and paper).

CAPITAL. Ψ Helsinki (Helsingfors). Population (Jan., 1961), 462,300; other towns are Tampere (Tammerfors), 126,500; Ψ Turku (Åbo), 124,600; Lahti, 65,000; Pori (Björneborg), 54,100; Oulu (Uleaborg), 59,200; Ψ Vaasa (Vasa), 44,800; and Kuopio, 43,600.

FLAG.—White with blue cross.

NATIONAL DAY: December 6.

Departments of the District of Paris appear in italic type.

(a), (b), (c). These Departments correspond with the districts of Alsace and Lorraine.

Area and Population.—The most westerly State of Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 45' E. to 4° 45' W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1939) at 212,895 square miles divided into 90 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The population of Metropolitan France on Jan. 1, 1962, was estimated at 46,200,000 by the French National Institute of Statistics. During 1960 there were 835,400 live births, 496,900 deaths and 315,000 marriages.

Government.—The monarchical system of government was overthrown by the *French Revolution* (1789–1793), and the *First Republic* endured until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the “Hundred Days” of Napoleon (March 20–June 29, 1815), until the *Second Republic* of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the *Third Republic* was set up. The constitution of the Third Republic vested the legislative power in a Chamber of Deputies and a Senate. The executive was vested in the President, who was elected for 7 years by the Senate and Chamber assembled in Congress.

On Sept. 1, 1939, Germany invaded Poland, thus precipitating war with France and Great Britain, which had (March 31, 1939) given an open pledge to support Poland against aggression.

On June 17, 1940, the late Maréchal Pétain sought terms of surrender from the Germans. A number of French troops had reached British ports after the evacuation of the British Expeditionary Force from Dunkirk and St. Valéry, and on June 23, 1940, after stating that the French Government had capitulated before all means of resistance had been exhausted, General de Gaulle announced the formation of a Provisional National Committee “to defend that part of the French Empire which has not yet been conquered by Germany and to free that part of France still under the yoke of the invader.”

On June 3, 1943, after prolonged negotiation, there was set up a *French Committee of National Liberation*, which was recognized by the allied nations on August 26, 1943.

Paris was liberated on August 25, 1944, and on October 13, 1944, the de Gaulle administration was recognized by the allied nations as the government of France.

Under the de Gaulle administration there was a single chamber legislature (The National Consultative Assembly) which met at Algiers until France was liberated. The enlarged Consultative Assembly met in the Luxemburg Palace (Paris), formerly the Senate House, on Nov. 7, 1944.

Following a national referendum on Oct. 21, 1945, a Constituent Assembly was elected with the task of drafting a new constitution. This was duly drawn up and adopted at a further referendum on Oct. 13, 1946. A National Assembly and Council of the Republic, elected on a territorial basis, were set up. With amendments made in 1954, the Constitution of the Fourth Republic was in force from 1946 until Oct. 5, 1958. From the liberation of Paris in 1944 until the Fourth Republic came to an end in 1958, 26 Cabinets were formed with an average life of 5½ months. The Government of M. Mollet for 76 months in 1956–57 was the longest in office, that of M. Queuille in 1950 the shortest, being in office for only three days.

Insurrections took place in Algeria and in the Metropolitan Department of Corsica in May, 1958, and, faced by a threat of imminent insurrection among the armed forces at home, President Coty warned the nation that it was on the brink of civil war and invited General de Gaulle to form a Government. M. Pflimlin formally resigned the office of Prime Minister on May 31. On June 1, by 329 votes to 224, Gen. de Gaulle was invested in the National Assembly as Prime Minister, with power to govern by decree for a period of six months during which time proposals for constitutional reform would be submitted to a national referendum.

The Fifth Republic.—The Constitution of the Fifth Republic, embodying important changes, was adopted by an overwhelming majority at a referendum held on Sept. 28 in Metropolitan France and all overseas departments and territories. (See also *French Community below*).

The President is elected for a term of 7 years by an electoral college consisting of both Houses of Parliament, the departmental general councils, overseas assemblies and elected representatives of the municipal councils. He is also eligible for re-election. The President appoints the Prime Minister. He may dissolve the National Assembly after consultation with the Prime Minister and Presidents of both Houses, but may not do so more than once in twelve months. He may submit disputed legislation to a national referendum at the request of the Government or of both Houses of Parliament. The President may assume special powers in an emergency. At the presidential elections held on Dec. 21, 1958, General de Gaulle was elected President by an overwhelming majority and took office on Jan. 8, 1959, as first President of the Fifth French Republic.

Parliament consists of the National Assembly and the Senate. Bills may be presented in either House, except money bills, which must originate in the National Assembly. The normal session of Parliament is confined to 5½ months each year and it may also meet in extraordinary session for 12 days at the request of the Prime Minister or a majority of the Assembly. Voting rights are personal and can only be delegated in special circumstances.

The *Prime Minister* and the Cabinet are responsible only to Parliament. The Prime Minister is assumed to have the Assembly's confidence unless the Opposition moves a censure motion signed by not less than one-tenth of the deputies; such motion must be approved by an absolute majority; if defeated, its sponsors must not introduce another no-confidence motion in the same session. Ministers relinquish Parliamentary seats on joining the Cabinet.

A *Constitutional Council* is responsible for supervising all elections and referenda and must be consulted on all constitutional matters and before the President of the Republic assumes emergency powers. At the request of the Government, the *Economic and Social Council* gives advice on bills, ordinances or decrees referred to it. Any economic or social plan or bill must be submitted to it.

Production.—The chief agriculture products are wheat, barley, rye, maize, oats, potatoes, beet-root (for the manufacture of sugar), bops, &c. Rice is being grown in parts of the Camargue (Rhône delta). Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c.

The harvest in 1961 was:—

	(Quintals)
Wheat.....	95,720,000
Oats.....	25,907,000
Barley.....	54,128,000
Rye.....	3,433,000
Maize.....	24,855,000

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent, as the names Bordeaux, Burgundy, Champagne, &c., universally testify. Production of wine in 1961 (excluding Algeria) was 46,715,000 hectolitres. Cider-making is also an important industry. The live stock (1961) included 20,010,000 cattle, 9,110,000 sheep and lambs, 8,924,000 pigs,

1,664,000 horses and 1,167,000 goats. The mineral resources include coal, oil, pig iron, bauxite, copper, lead, silver, antimony and salt. In 1961 coal production amounted to 53,500,000 tons and oil production in the *France Zone* totalled 19,000,000 tons. The most important manufactures are of metals, cars, aircraft, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, cottons, woollens, carpets, linen, silk and lace.

Language and Literature.—French is the universal language of France and of a large proportion of the people of Belgium, Luxembourg, Switzerland, Italy, Egypt, Tunisia, Algeria, Mauritius, Haiti, the Province of Quebec, Canada, and of the State of Louisiana, U.S.A., to whom the almost inexhaustible literature of France is a treasured heritage. The work of the *French Academy*, founded by Richelieu in 1635, has established *le bon usage*, equivalent to "The King's English" in Great Britain. French authors have been awarded the Nobel Prize for Literature on 10 occasions—R.F.A. Sully-Prudhomme (1901), F. Mistral (1904), Romain Rolland (1915), Anatole France (1921), Henri Bergson (1937), Roger M. du Gard (1937), André Gide (1947), François Mauriac (1952), Albert Camus (1957) and St. John Perse (Alexis Léger) (1960).

Defence.—The personnel of the Defence Forces at the end of 1961 was: *Army*, 818,700 (including *Gendarmie* of 65,000); *Navy* (Oct. 1, 1961), 77,594; *Air Force*, 143,560. The French Navy included 3 aircraft carriers, 3 cruisers, 60 destroyers and frigates and 21 submarines.

Education.—The educational system is highly developed and centralized. It is administered by the Ministry of National Education, comprising (a) the *Direction de l'Administration Générale*, and the *Direction de l'Enseignement Supérieur*, and the *Direction Générale de l'Organisation et des Programmes Scolaires*, the three principal administrative services; (b) the Superior Council of National Education (consultative); (c) the High Commissariat for Youth and Sports; (d) other organizations and services concerned with libraries, research, external relations whose heads are directly responsible to the Minister; and (e) the Inspectorate. *Local Administration* comprises 20 Territorial Academies, with inspecting staff for all grades, and (b) Departmental Councils presided over by the *Préfet*, and charged especially with primary education. Primary and secondary education are compulsory, free and secular, the school age being from 6 to 14 (6 to 16 from 1967 onwards). Schools are for boys, for girls, or mixed. (i) *Primary* education is given in *écoles maternelles* (nursery schools), *écoles primaires élémentaires* (primary schools) and *collèges d'enseignement général* (4-year secondary modern course); (ii) *Secondary* education in *collèges d'enseignement technique* and *lycées* (7-year course leading to one of the eight options of the *baccalauréat*: classic A or A'—two classical languages; classic B or C—Latin plus modern languages or science; modern—modern languages plus science and mathematics; M—mathematics and experimental sciences; technical A or B). Many private establishments also exist in all categories. (iii) *Special schools* are numerous. (iv) There are 19 *universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix (A.D. 1409), Alger, Besançon (1485), Bordeaux (1441), Caen (1432), Clermont-Ferrand (1808), Dijon (1772), Grenoble (1339), Lille (1530), Lyons (1808), Montpellier (1125), Nancy (1572), Nantes (re-created 1961), Paris (1150), Poitiers (1431), Reims (1961) Rennes (1735), Strasbourg (1567) and Toulouse (1230).

A new Académie of Orléans was created in 1961, but there is as yet no faculty. Higher education is also given in various branches—medicine, law, science and arts—in State institutes in Amiens, Angers, Chambéry, Le Mans, Limoges, Nice, Pau, Rouen, St. Etienne and Tours.

Archæology, etc.—There are dolmens and menhirs in Brittany, prehistoric remains in Dordogne, cave drawings in Ariège, and throughout France various megalithic monuments erected by primitive tribes, predecessors of Iberian invaders from Spain (now represented by the Basques), Ligurians from northern Italy and Celts or Gauls from the valley of the Danube. Julius Caesar found Gaul "divided into three parts" and described three political groups—Aquitanians south of the Garonne, Celts between the Garonne and the Seine and Marne, and Belgæ from the Seine to the Rhine. Roman remains are plentiful throughout France in the form of aqueducts, arenas, triumphal arches, &c., and the celebrated Norman and Gothic Cathedrals, including Notre Dame in Paris, and those of Chartres, Reims, Amiens (where Peter the Hermit preached the First Crusade for the recovery of the Holy Sepulchre), Bourges, Beauvais, Rouen, etc., have survived invasions and bombardments, with only partial damage, and many of the renaissance and XVIIth century châteaux survived the French Revolution.

Roads.—The length of the *Routes Nationales* is about 50,500 miles, and of other roads 437,500 miles. The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways in general use having a length of 8,000 km. The Rhône is navigable for 1,200-ton vessels from the sea to Switzerland.

Railways.—The system of railroads in France is very extensive. The length of lines of general interest, exclusive of local lines, open for traffic on Jan. 1, 1962, was 38,840 km., of which 7,260 km. were electrified. The lines left open in Sept., 1944 totalled only 11,125 miles, but the work of reconstruction then begun has restored the pre-war figure. Traffic in 1960 totalled 31,800,000,000 passenger-kilometres and 56,500,000,000 ton-kilometres and in 1961, 33,480,000,000 passenger-km. and 58,836,000,000 ton-km.

Civil Aviation.—In 1961 passenger/kilometres flown by aircraft of French airlines totalled 6,360,000,000, of which 4,773,600,000 were by *Air France*.

Shipping.—The French mercantile marine on Jan. 1, 1962, consisted of 783 ships of 4,842,397 tons gross, of which 64 were passenger vessels (585,050 tons), 171 tankers (2,022,893 tons) and 541 cargo vessels (2,098,713 tons).

FINANCE 1962

Total revenue (*Budget*).... NF. 68,856 milliard
Ordinary expenditure (*do.*)... 70,098 milliard

The *Public Debt*, on November 30, 1961, amounted to NF 84,594,000,000, of which the external debt accounted for NF 10,663,000,000.

Currency.—The unit of currency is the *franc* of 100 *centimes*. On August 11, 1957, a system of exchange rates was introduced which amounted to a devaluation of the franc by 20 per cent. in certain sectors. This devaluation was made general on October 26, 1957. On Dec. 29, 1958, the franc was further devalued by 17½ per cent. to Frs. 1,382 = £1 (Frs. 492.70 = \$1 U.S.). The *New Franc*, worth 100 old francs, came into use on Jan. 1, 1960, in metropolitan France and Algeria, as the basic monetary unit. Bank notes in 10, 50 and 100 new franc denominations and coins for 1 and 5 new francs were introduced. Further coinage in new francs is being introduced to replace the old coinage progressively.

COMMERCE

The principal imports are wool, cotton, chemicals, coke, crude oil, oleaginous fruits and seeds, machinery, raw skins, timber, rubber, copper and coffee. The principal exports are chemical products, iron and steel, textiles (silk and cotton), automobiles, wine and other agricultural products, soaps and perfumes, and glass.

FRENCH FOREIGN TRADE 1961

	New France	
Imports.....	25,638,000,000	
Exports	26,351,000,000	
Trade with U.K.		
	1960	1961
Imports from U.K. £	87,482,083	£112,190,285
Exports to U.K....	131,855,952	142,957,125

OVERSEAS DEPARTMENTS

With effect from Jan. 1, 1947, the colonies of Guyane (French Guiana), Martinique, Guadeloupe and La Réunion with its dependencies have been theoretically administered in exactly the same way as the Metropolitan Departments, but in practice somewhat greater discretion is allowed to the Prefects and the locally elected bodies.

La Réunion.—Formerly Ile de Bourbon, about 420 miles E. of Madagascar, Réunion has been a French possession since 1643. Area, about 1,000 sq. miles. Population (1960), 330,400. Capital, St. Denis (41,863). Assigned to the administration of Réunion are the distant islands of St. Paul (3 sq. miles), New Amsterdam (27 sq. miles) and Kerguelen containing whaling and fishing stations (1,100 sq. miles). The Crozet Islands (200 sq. miles) and Adélie Land (see p. 721) in the Antarctic Continent are also dependencies of Réunion.

Martinique.—An island situated in the Windward Islands group of the West Indies, between the British colonies of Dominica in the north and St. Lucia in the south. Population (1960), 274,400. Capital, Ψ Fort de France (60,600). Other towns are Ψ Trinité (39,173) and Ψ Marin (31,369).

Guadeloupe.—In the Leeward Islands of the West Indies, the island of Guadeloupe, together with Marie Galante, the Ile des Saintes, Petite Terre, St. Barthélemy and St. Martin, form the other West Indian Department of France. Population (1960), 266,400. Capital, Ψ Pointe à Pitre (26,200). Other towns are Ψ Basse Terre (13,636) in Guadeloupe and Ψ Grand Bourg (12,827) in Marie Galante.

French Guiana.—Area, 35,000 sq. miles. Population (1960), 30,900. Capital, Ψ Cayenne (13,300). Situated on the north-eastern coast of South America, French Guiana is flanked by Netherlands Guiana on the west and by Brazil on the south and east. Under the administration of French Guiana is a group of islands (St. Joseph, Ile Royale and Ile du Diable), known as Iles du Salut. On Devil's Isle, Captain Dreyfus was imprisoned from 1894-1899.

CAPITAL OF FRANCE. Paris, on the Seine.

Population (1954), (*Paris ville*) 3,075,678.

District of Paris.—Created by legislation promulgated on August 2, 1961, the District covers the areas of the Seine, Seine-et-Marne and Seine-et-Oise Departments, with a population of some 8,000,000. Improvement and development of the Paris region is the responsibility of a Council of Administration consisting of 28 members, half elected by the Government from among local members of Parliament and the other half by local councils. The Council, which has its own budget and revenue, co-ordinates the development works

of existing authorities and has power to initiate its own schemes. A Delegate-General appointed by the Government is the Council's executive officer. The first meeting of the Council was held on Dec. 19, 1961.

President of the Council of Administration, M. Marc Jaquet.

Delegate-General, M. Paul Delouvrier.

Twenty-three other French cities have populations greater than 100,000— Ψ Marseilles (661,492); Ψ Lyons (471,270); Toulouse (268,863); Ψ Bordeaux (257,946); Ψ Nice (244,360); Ψ Nantes (222,790); Lille (194,616); Roubaix (110,067); St. Etienne (181,730); Strasbourg (200,921); Ψ Toulon (141,117); Nancy (124,797); Clermont Ferrand (113,391); Ψ Rouen (110,540); Ψ Le Havre (139,810); Rennes (124,122); Reims (121,145); Grenoble (116,440); Limoges (105,990); Dijon (112,844); Angers (102,142); Ψ Brest (110,713); Le Mans (111,891).

The chief towns of Corsica are Ψ Ajaccio (32,997) and Ψ Bastia (42,729).

Paris is distant from London 267 miles; transit by air, 1 hr.

FLAG.—The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

BRITISH EMBASSY

(35 Faubourg St. Honoré, Paris 8e)

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Pierson Dixon, C.M.G., C.B. (Oct, 1960)..... £7,015

Envoy Extraordinary and Minister Plenipotentiary, Sir Anthony Rumbold, Bt., K.C.M.G., C.B.

Minister (Economic), W. Harpham, C.M.G., O.B.E.

Counsellor and Consul-General, H. Braham, C.B.E.

Counsellors, Hon. P. E. Ramsbotham; A. H. Birch, O.B.E. (*Commercial*); F. B. Richards, D.S.C. (*Press*); L. Hagestadt, O.B.E. (*Labour*).

1st Secretaries, R. A. Farquharson; M. D. Butler; R. A. Fyjis-Walker; J. T. Fearnley; S. H. Anstey; R. W. P. Dawson, C.B.E., D.S.O.; H. W. S. Cornish; N. Morton.

2nd Secretaries, J. B. S. Pedler; T. Macaulay; A. M. Brooks, D.S.O., M.C.; Miss A. M. Wood; H. Tansey; I. J. Benson; D. H. Bevan.

3rd Secretaries, M. R. Jenkins; J. A. Birch.

Naval Attaché, Capt. C. B. H. Wake-Walker, R.N.

Asst. Naval Attaché, Cdr. E. R. Gurney, R.N.

Military Attaché, Brigadier B. Wilson, D.S.O.

Asst. do. Lt.-Col. J. I. G. Capadose.

Air Attaché, Air Commodore G. F. W. Heycock,

D.F.C.,

Asst. Air Attaché, Wing-Cdr. M. G. Bourdaud'hui.

Civil Air Attaché, P. A. Robinson.

Scientific Attaché, R. V. Melville.

Agricultural Attaché, A. V. Vickery.

Chaplain of the British Embassy Church, Rev.

R. J. W. Morris.

BRITISH CONSULAR OFFICES

There are British Consular Offices in Metropolitan France at *Paris, Ajaccio, Bordeaux, Boulogne, Calais, Cherbourg, Dieppe, Dunkirk, Le Havre, Lille, Lyons, Marseilles, Nice, St. Malo and Strasbourg.*

BRITISH CHAMBER OF COMMERCE

6 Rue Halévy, Paris

President, H. Talbot.

Vice-President, M. F. Bannerman.

BRITISH COUNCIL

Representative in Paris, R. P. Hinks, 36 rue des Ecoles, Paris V.

THE FRENCH COMMUNITY

The Constitution of the Fifth French Republic promulgated on Oct. 6, 1958, envisaged the establishment of a French Community of States closely linked with common institutions. In the last four years a number of the former French States in Africa have seceded from the Community but for all practical purposes continue to enjoy the same close links with France as those that remain formally members of the French Community. The Community Institutions in fact never operated as envisaged and the major part of the mechanism is for the present at least in abeyance. Nevertheless, with the exception of Guinea, which opted out of the Community in the 1958 referendum, all the former French African colonies are closely linked to France by a series of financial, technical and economic agreements. French relations with these countries are conducted through the *Quai d'Orsay* and, so far as aid and technical assistance is concerned, through the Ministry of Co-operation which has been specially set up for this purpose. M. Jacques Foccart, as Secretary General to the Presidency for the Community and African and Malagasy affairs heads the President's personal secretariat which supervises and coordinates French relations with these countries.

Madagascar (République malgache).—See separate article.

MAURITANIA
(Islamic Republic of Mauritania)

President and Prime Minister, Moktar Ould Daddah.

Ambassador in London, His Excellency Mamoudou Touré (1962).

Mauritania lies on the north-west coast of Africa between Spanish Sahara and the Republic of Senegal. It is bounded on the east and south by the Republic of Mali. Area 322,340 sq. miles. The population of Mauritania was estimated at 727,000 in 1961. The Republic of Mauritania elected on November 28, 1958, to remain within the French Community as an autonomous republic. It became fully independent on Nov. 28, 1960. Mauritania's main source of potential wealth lies in rich deposits of iron ore around Fort Gouraud, in the north of the country. These are being exploited by an international company, the Société de Mines de Fer de Mauritanie, with the aid of a loan from the I.B.R.D. Exports of iron ore are expected to begin early in 1963. Mauritania imported goods to the value of £78,421 from the United Kingdom in 1961.

FLAG.—Yellow star and crescent on green ground.

CAPITAL.—Nouakchott.
British Ambassador, His Excellency John Howard Peck, C.M.G. (1962) (Resident at Dakar).

REPUBLIC OF SENEGAL

President, Léopold Senghor, elected Sept. 5, 1960.
Prime Minister, Mamadou Dia (Aug. 22, 1960).
Ambassador in London, His Excellency M. Léon Boissier-Palun, 24 Cadogan Square, S.W.1 [Knightsbridge: 6491].

Senegal lies on the west coast of Africa between Mauritania in the north and the Republic of Guinea in the south. It has an area of 77,814 sq. miles and the population was estimated at 2,973,300 in 1961.

Formerly a French colony, Senegal elected on Nov. 25, 1958, to remain within the French Community as an autonomous republic. Foundation of a Federation of Mali, to consist of the State of Senegal, (French) Soudan, Dahomey and Upper Volta, was announced in January, 1959, and the

Federation came into existence on April 4, consisting of Senegal and the Sudanese Republic only, the others having meanwhile withdrawn. Mali was proclaimed fully independent by the President of the Federal Assembly, M. Léopold Senghor, on June 20, 1960. However, these arrangements proved short-lived as on August 22, 1960, the Senegal Legislative Assembly formally approved measures to secede from the Federation and continue as an independent state. Senegal's principal exports are groundnuts (raw and processed) and phosphates.

CAPITAL.— Ψ Dakar (383,000).

FLAG.—Three vertical bands, green, yellow and red; a green star on the yellow band.

British Embassy: B.P. 6025, Dakar.

British Ambassador, His Excellency John Howard Peck, C.M.G. (1962) £4,115

CHAD REPUBLIC

President, François Tombalbaye, elected August 11, 1960.

Situated in north-central Africa, the Chad Republic extends from 23° N. latitude to 7° N. latitude and is flanked by the Republics of Niger and Cameroon on the west, by the Kingdom of Libya in the north, by the Sudan on the east and by the Central African Republic on the south. It has an area of 487,920 sq. miles and a population estimated in 1961 at 2,675,000. Chad became a member state of the French Community on Nov. 28, 1958, and was proclaimed fully independent on August 11, 1960. On April 14, 1962, a new Constitution was adopted for a presidential-type regime, Mr. Tombalbaye accepting the formal title of President on April 23, 1962. Trade with U.K., 1961: Imports, £186,465; Exports to U.K., £63,725.

CAPITAL.—Fort Lamy, south of Lake Chad (45,600).

FLAG.—Vertical stripes, blue, yellow and red.

French High Representative, M. Hubert Argoud.

British Ambassador, His Excellency W. S. Laver (1962) (Resident at Brazzaville, Congo).

CENTRAL AFRICAN REPUBLIC

President, David Dacko, assumed office August 17, 1960.

Formerly the French colony of Ubanghi Shari, the Republic lies just north of the Equator between the Cameroon Republic and the southern part of Sudan. It has a common boundary with the Republic of Chad in the north and with the Congolese Republic in the south. The Republic has an area of about 234,000 sq. miles and a population estimated (1961) at 1,227,000. On December 1, 1958, Ubanghi Shari elected to remain within the French Community and adopted the title of the Central African Republic. It became fully independent on August 17, 1960. Imports from U.K., 1961, £207,044; Exports to U.K., £42,390.

CAPITAL.—Bangui, near the border with the Congolese Republic (82,300).

FLAG.—Four horizontal stripes, blue, white, yellow, green, crossed by central vertical red stripe; a yellow star in centre of blue half-stripe next staff.

French High Commissioner, M. Roger Barbécrot.

British Ambassador, His Excellency W. S. Laver (1962) (Resident at Brazzaville, Congo).

REPUBLIC OF CONGO

President, Fulbert Youlou, assumed office August 17, 1960.

The Republic lies on the Equator between Gaboon on the west and the Congolese Republic on the east, the River Congo and its tributary the

Ubanghi forming most of the eastern boundary of the state. The Congo has a short Atlantic coastline. Area of the Republic of Congo is 129,950 sq. miles, with a population (Census of 1962) of 864,000. Formerly the French colony of Middle Congo, it became a member state of the French Community on November 28, 1958, and was proclaimed fully independent on August 17, 1960.

Trade with U.K., 1961: Imports, £784,691; Exports to U.K., £484,832.

CAPITAL.—Brazzaville (136,000); Ψ Pointe Noire (54,000).

FLAG.—Tricolour of green, yellow and red (diagonal yellow stripe).

French High Representative, M. Jean Rossard.
British Ambassador, His Excellency William Scott Laver (1962).

REPUBLIC OF GABOON

President, Leon M'ba, assumed office August 17, 1960.

Gaboon lies on the Atlantic coast of Africa at the Equator and is flanked on the north by the Spanish territory of Rio Muni and the Cameroon Republic and on the east and south by the Republic of Congo. It has an area of 101,400 sq. miles and a population estimated in 1961 at 440,000. Gaboon elected on Nov. 28, 1958, to remain an autonomous republic within the French Community and was proclaimed fully independent on August 17, 1960. Trade with U.K., 1961: Imports, £535,911; Exports to U.K., £611,734.

CAPITAL.—Libreville (16,700).

FLAG.—Horizontal bands, green, yellow and blue.
French High Representative, M. Jean Risterucci.

British Ambassador, His Excellency W. S. Laver. (Resident at Brazzaville, Congo).

SOMALILAND AND ISLAND TERRITORIES

French Somaliland.—Area, 9,000 sq. miles. Population (1957), 67,000. Capital, Ψ Jibuti (17,000). Situated on the N.E. African coast round the Gulf of Tajura and extending about 80 miles inland.

New Caledonia.—Area, 7,200 sq. miles. Population (1956), 68,000. Capital, Ψ Noumea (12,000). A large island in the Western Pacific, 700 miles E. of Queensland. Dependencies are the Isle of Pines, the Loyalty Islands (Mahé, Lifou, Urea, etc.), the Hoon Islands and Alofiis. New Caledonia was discovered in 1774 and annexed by France in 1854; from 1871 to 1896 it was a convict settlement.

Wallis and Futuna Islands.—Following a request from local kings and chiefs, it was decided by referendum (Dec. 27, 1959) that the islands would become the sixth Overseas Territory of France. Population of the islands, formerly dependencies of New Caledonia, is about 9,500, mostly Polynesians.

French Polynesia.—Area, 2,500 sq. miles. Population (1956), 77,000. Capital, Ψ Papeete (15,220), in Tahiti. Includes the Society Islands (Tahiti, Moorea, Makatea, etc.), the Marquesas (Nukahiva, Hiva-0a, etc., 500 sq. miles. population, 3,000); the Leeward Isles (Huahine, Raiatea, Tahaa, Bora Bora, Maupiti, etc.); the Gambier Islands (Mangareva, etc.); the Tubuai Islands (Tubuai, Rurutu, Raiivava, Rimatara and Rapa Island); and Maiao Island.

Comoro Archipelago.—Area, 800 sq. miles. Population (1957), 177,000. Capital, Dzaoudzi. Includes the islands of Great Comoro, Anjouan, Mayotte and Mohilla and certain islets in the Indian Ocean.

St. Pierre and Miquelon.—Area, 93 sq. miles. Population (1957), 4,900. Two small groups of islands off the coast of Newfoundland.

The former French settlements in India, Pondicherry, Mahé, Karikal and Yanam were formally transferred to India on Aug. 16, 1962.

GERMANY

* Deutsches Reich (German Realm)

THE HISTORY OF GERMANY from 1863-1945 is marked by wars of aggression. In 1864, Prussia, in company with Austria, attacked Denmark, and after a short campaign annexed the peninsula of Schleswig-Holstein. In 1866, as a result of war with Austria (the Seven Weeks' War), Prussia acquired the hegemony of the North Germanic Confederation from Austria. After the Franco-Prussian War of 1870, when Prussia wrested Alsace-Lorraine from France, the North Germanic Confederation and three South German States became the German Confederation, the King of Prussia being proclaimed German Emperor at Versailles on Jan. 18, 1871.

At the outbreak of the War of 1914-1918, Germany was a Confederate League bearing the name German Empire under the hereditary presidency of the King of Prussia holding the title of German Emperor. At the close of the war, Germany lost most of the gains she had acquired since 1863, including all her colonies.

GERMANY BETWEEN THE TWO WARS.—On Nov. 9, 1918, two days before Germany sued for an Armistice from the victorious Allies, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. In January, 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female). The Assembly met at Weimar (Feb. 6, 1919), and elected Friedrich Ebert President of the Republic, a position he occupied until his death (Feb. 28, 1925) when Field Marshal Paul von Hindenburg was elected in his stead. Von Hindenburg was re-elected April 10, 1932, the rival candidate being Adolf Hitler, who was born at Braunau, Austria (April 20, 1889) and had migrated as a young man to Bavaria. A General Election of 1933 provided Hitler's party, the *Nationalsozialistische Deutsche Arbeiter Partei* (National Socialist German Workers' Party, or *Nazis*) with an absolute majority in the legislature (*Reichstag*) and Hitler became Prime Minister (Cancellor), a position which became fused with that of President at the death of von Hindenburg (Aug. 2, 1934), and Adolf Hitler exercised supreme and uncontrolled authority in the Reich.

THE WAR OF 1939-1945.—After concluding a Treaty of Non-Aggression with Soviet Russia (Aug. 24, 1939), Germany invaded Poland (Sept. 1, 1939), thus precipitating war with France and Great Britain, who had (March 31) given a pledge to support Poland against aggression.

Germany invaded and occupied Denmark and Norway (April, 1940), Belgium, the Netherlands, Luxemburg and France (May, 1940). Norway capitulated on June 9, France sued for peace in mid-June. The lightning war against Britain began on August 11, 1940, but the *Lufwaffe* attack, which was to prepare the way for invasion, was defeated. In April, 1941, Yugoslavia was invaded and Ger-

* Nazi historians referred to the National Socialist régime as *Drittes Reich*. The *First* was the Holy Roman Empire, established in A.D. 962 by Otto I of Saxony, enduring until 1806. The *Second* was established by Prince Otto von Bismarck, after the Franco-Prussian war in 1871, and endured until 1918. The *Third* was established by Adolf Hitler in 1933.

many joined Italy in attacking Greece and Crete. On June 22, 1941, the U.S.S.R. was invaded. In 1942 the Nazi empire reached its height. The boundaries of Greater Germany included Alsace-Lorraine, Luxemburg, Eupen-Malmédy, large areas of Poland, Memelland and Slovenia; Germany and her satellites controlled all European countries except the British Isles, Spain, Portugal, Switzerland, Sweden and parts of European Russia, as well as large tracts of North Africa. The turning point came in November, 1942, with the Soviet victory at Stalingrad and the British at El Alamein. In 1943 a Soviet offensive threw the invader back almost to the Polish frontier, and the Western Allies, after defeating the Axis in North Africa, landed in Italy. In June, 1944, the Second Front opened on the Normandy beaches and by September, 1944, Germany itself was the battlefield. On May 8, 1945, the unconditional surrender of all German forces was accepted by representatives of the Western Allied and Soviet Supreme Commanders.

Hitler committed suicide on April 30, 1945.

In 1962 the Federal Statistical Office reported that during the course of the war from 1939-1945, 593,000 persons were killed during allied air attacks on Germany and 403,000 dwellings were destroyed. 537,000 civilians were killed, some 15 per cent. children under 14, and 56,000 foreign civilians, members of the police and armed forces. In the area now covered by the Federal Republic persons injured numbered 486,000, including 16,000 foreigners and prisoners of war.

THE POST WAR PERIOD.—After the surrender the Allied Powers assumed supreme authority in Germany. Power was to be exercised by the Commanders-in-Chief, each in his own zone of occupation and jointly in matters affecting Germany as a whole through a Control Council. Berlin was to be governed jointly by the four occupying powers. The guiding lines of policy were laid down in the agreement reached between the U.K., U.S. and U.S.S.R. Governments at Potsdam in August, 1945, which was to remain in force until a Peace Treaty should confirm or revise its directives. It was decided that "for the time being no Central German Government shall be established," but that central German administrative departments acting under the direction of the Control Council should be established in the fields of finance, transport, communications, foreign trade and industry. The Eastern frontier of Germany was provisionally redrawn (pending final settlement in the Peace Treaty) to transfer the northern area of East Prussia, including Königsberg (now Kaliningrad), to the U.S.S.R. and the rest of East Prussia and all the area lying east of the Oder and Western Neisse rivers to Polish control. On Oct. 15, 1947, the Saar, enlarged at the expense of German territory, voted for economic union with France, but following a plebiscite was incorporated in the Federal Republic of Germany on Jan. 1, 1957. The Potsdam agreement also laid down that Germany should be disarmed and prohibited from producing armaments, that production of certain other goods should be limited to the amount needed to support a peacetime economy and that existing capital equipment surplus to these requirements should be removed as reparations and distributed by the Inter Allied Reparations Agency among the nations who had suffered war damage, in proportion to their losses. (The proportions were fixed by the Paris Conference of November, 1945.) The agreement further dealt with denazification, democratization, refugees, restitution, decartelization, etc.

Though certain details of the Potsdam agreement (not yet superseded by a Peace Treaty) have been carried out, differences in interpretation among the Allies have made it impossible to apply the provisions in full. Quadripartite control became a dead letter when the Russians withdrew from the Control Council in March, 1948.

Federal Republic of Germany

President, Dr. Heinrich Lübke, born Oct. 14, 1894, elected July 1, 1959, for five years from Sept. 15, 1959.

CABINET

Federal Chancellor, Dr. Konrad Adenauer (C.D.U.),
Vice-Chancellor and Minister for Economic Affairs, Prof. Ludwig Erhard (C.D.U.),
Foreign Minister, Dr. Gerhard Schröder (C.D.U.),
Interior, Hermann Höcherl (C.S.U.),
Justice, Dr. Wolfgang Stammberger (F.D.P.),
Finance, Dr. Heinz Starke (F.D.P.),
Defence, Dr. Franz-Josef Strauss (C.S.U.),
Labour, Theodor Blank (C.D.U.),
Affairs of the Federal Council and Länder, Dr. Hans-Joachim von Merkatz (C.D.U.),
Housing, Paul Lücke (C.D.U.),
Agriculture, Werner Schwarz (C.D.U.),
All-German Affairs, Ernst Lemmer (C.D.U.),
Transport, Dr. Hans-Christoph Seebohm (C.D.U.),
Posts and Telegraphs, Richard Stückden (C.S.U.),
Family and Youth Questions, Dr. Josef Würmeling (C.D.U.),
Economic Property of the Federal Republic, Hans Lenz (F.D.P.),
Economic Co-operation, Walter Scheel (F.D.P.),
Atomic Matters, Dr.-Ing. Siegfried Balke (C.S.U.),
Refugees, Wolfgang Mischnick (F.D.P.),
Special Tasks, Dr. Heinrich Krone (C.D.U.),
Health, Dr. Elisabeth Schwarzhaupt (C.D.U.),
 C.D.U.=Christian Democratic Union; C.S.U.=Christian Social Union; F.D.P.=Free Democrats.

EMBASSY IN LONDON

Chesham Place, S.W.1.

[Belgravia: 5033]

Ambassador Extraordinary and Plenipotentiary, His Excellency Hasso von Eitzdorf (1961).
Minister-Counsellor, Dr. Rudolf Thierfelder.
Counsellors, Prof. Fritz Caspari; Dr. Rudolf Knickenberg (*Legal and Consular*); Dr. Hans Scherer (*Press*); Karl Hans Berlet (*Economic*).

Area and Population.—The area of the Federal Republic is approximately 95,737 sq. miles. A Census held on June 6, 1961, showed the total population of the Federal Republic as 53,975,200, excluding Western Berlin, compared with approximately 40,248,000 in 1939. Distribution of the population among the *Länder* in June, 1961, was:—

Schleswig-Holstein	2,316,600
Hamburg	1,832,400
Lower Saxony	6,641,400
Bremen	706,400
North Rhine Westphalia	15,901,700
Hessen	4,814,400
Rhineland Palatinate	3,147,100
Baden-Württemberg	7,759,000
Bavaria	9,513,900
Saarland	1,072,400

Western Berlin had a population of 2,197,600 at the Census held on June 6, 1961.

The population of the principal cities and towns in the Federal Republic in June 1961 was:—

Hamburg.....	1,845,107	Münster.....	179,393
Munich.....	1,080,000	Bielefeld.....	175,000
Cologne.....	795,183	Aachen.....	172,000
Essen.....	726,000	Solingen.....	170,000
Frankfurt/Main	674,079	Ludwigshafen..	170,000
Düsseldorf.....	664,000	Münchenglad-	
Stuttgart.....	645,000	bach.....	154,216
Dortmund.....	630,000	Bonn.....	145,000
Hanover.....	576,600	Bremerhaven..	142,300
Bremen.....	557,000	Freiburg.....	138,800
Duisburg.....	500,000	Osnabrück.....	136,350
Nuremberg.....	454,221	Saarbrücken...	134,000
Wuppertal.....	424,552	Darmstadt.....	133,000
Gelsenkirchen..	392,000	Mainz.....	131,888
Bochum.....	365,000	Recklinghausen	131,800
Mannheim.....	315,000	Oldenburg....	128,800
Kiel.....	271,000	Heidelberg...	128,000
Oberhausen....	261,000	Remscheid....	123,500
Wiesbaden.....	258,500	Regensburg...	120,900
Brunswick.....	249,000	Würzburg.....	117,995
Karlsruhe.....	246,000	Herne.....	117,500
Lübeck.....	234,766	Offenbach/	
Augsburg.....	208,000	Main.....	113,000
Krefeld.....	205,800	Bottrop.....	112,500
Kassel.....	202,400	Wanne-Eickel..	108,000
Hagen.....	195,000	Salzgitter.....	107,000
Mülheim/Ruhr	188,500	Wilhelmshaven	100,637

Vital Statistics.—There were 18.3 live births per 1,000 inhabitants in the Federal Republic in 1961, compared with 19.8 per 1,000 for the same area in 1938. There was an excess of live births over deaths in 1961 of 7.4 per 1,000 and in 1938 of 8.4.

Government.—The Federal Republic grew out of the fusion of the three western zones. The economic union of the U.K. and U.S. zones followed the Fusion Agreement of December, 1946. The Bizone was later joined by the French zone and in 1948-49 a Parliamentary Council, elected by the Diets of the three zones, drafted a provisional democratic federal constitution for Germany. This Basic Law came into force in the three western zones on May 24, 1949. It provides for a President, elected for a five-year term, a Lower House, with a four-year term of office, elected by direct universal suffrage, and an Upper House composed of delegates of the *Länder*, without a fixed term of office.

The results of the elections held for the lower House (*Bundestag*) on September 17, 1961, were as follows:

Party	Numbers
Christian Democratic and Christian Social Unions.....	251
Social Democrats.....	203
Free Democrats.....	67
Total.....	521

These figures include a total of 22 members for Berlin (C.D.U./C.S.U., 9; S.P.D., 13; F.D.P., 67). The Christian Democratic and Christian Social Unions, having no absolute majority, formed a coalition with the Free Democrats.

When the Federal Government took office the Allied Military Governors were replaced by High Commissioners. In 1952 a contractual agreement was signed between the Federal Republic and the western Allies, whereby the Republic, in return for certain promises regarding a defence contribution, a foreign debt settlement, and the continuation of allied policies concerning decartelization, democratization, restitution, etc., regained virtual sovereignty in May, 1955, after ratification by all the parties

concerned. The High Commissioners then became Ambassadors.

The Prime Ministers of the *Länder* governments in July, 1961, were:—

Ministers-President

Baden-Württemberg.—Kurt-Georg Kiesinger.
Bavaria.—Dr. Hans Ehard.
Berlin.—Willy Brandt (*Governing Mayor*).
Bremen.—Wilhelm Kaisen.
Hamburg.—Dr. Paul Nevermann.
Hessen.—Dr. Georg-August Zinn.
North Rhine-Westphalia.—Dr. Franz Meyers.
Rhineland-Palatinate.—Dr. Peter Altmeier.
Saarland.—Dr. Franz-Josef Röder.
Lower Saxony.—Dr. Georg Diederichs.
Schleswig-Holstein.—Kai Uwe von Hassel.

Economic Position.—Despite the difficulties arising from the division of Germany, which cut off from the Federal Republic the main food producing areas of Eastern Germany and some of the principal centres of light industry, German economic recovery has made rapid strides since the currency reform of 1948. As a result of United States and British economic aid and of successful economic policies pursued by the Federal Government, Germany has regained her position as the main industrial power on the Continent, and is the most economically powerful member of the European Common Market. The Gross National Product at current prices in 1961 was estimated at DM. 310.4 milliard, an increase of DM. 28 milliard or 9.9 per cent. over 1960. In accordance with the Franco-German Agreement of 1957, the economic integration of Saarland with the Federal Republic took place on July 6, 1959.

Agriculture.—The total agricultural area (in 1961) amounted to 54,825 sq. miles, of which 30,656 sq. miles were under plough. The forest area is 27,437 sq. miles. The 1961 harvest yielded 6,700,400 metric tons of bread grains, 5,687,700 metric tons of feeding grains and 21,503,800 metric tons of potatoes. The livestock population at the end of 1961 included 13,276,700 cattle, 634,100 horses, 1,009,500 sheep, 17,206,900 pigs and 65,838,100 fowls.

Industry.—The average index of industrial production per working day (excluding Saarland and Berlin) has developed as follows (1950=100):

	1960	1961
Mining.....	146	150
Manufacturing industry.....	260	276
(i) Basic materials.....	263	275
(ii) Capital goods.....	337	365
(iii) Consumer goods.....	211	220
(iv) Foodstuffs.....	214	223
Power (electricity and gas).....	243	257
Building industry.....	222	241
Total industry.....	249	264

Hard coal production rose from 142.3 million tons in 1960 to 142.7 million tons in 1961; brown coal rose from 96.1 million tons to 97.2 million tons; pig iron fell from 25.7 million tons to 25.4 million tons; crude steel fell from 34.1 million tons to 33.5 million tons; rolled steel products fell from 22.5 million tons to 21.9 million tons. An average of 145,991 passenger vehicles a month were produced in 1961 (1960=139,525), 19,562 commercial vehicles (1960=19,180), 211,000 tons of sulphuric acid (1960=216,000), 60,384 tons of chlorine (1960=54,817), 33,606 tons of cotton yarn (1960=35,079) and 9,472 tons of woollen yarn (1960=9,794), 564,700 new dwellings were completed in 1961 (1960=574,400).

Labour.—Of 20,933,600 employed in September, 1961, 13,794,900 were men. The average number of unemployed was 161,100, of whom 106,300 were men. In 1961, an average of 8,001,975 were employed in industry; coal mining absorbed 517,683; iron and steel production, 365,901; mechanical engineering and vehicle production, 1,599,624; chemicals, 479,510; and textiles and clothing, 952,622. Productivity of labour in industry (excluding electricity, gas and building industry) per working hour in 1961 reached 194 per cent. (1960=184) of the 1950 level.

Finance.—Under the Federal constitution the yields of indirect taxes, other than the beer tax, accrue to the Federal Government, while direct taxes accrue to the *Länder*, who are obliged to transfer part of them to the central authorities. From 1961, the financial year coincides with the calendar year instead of, as previously, ending on March 31 each year. The 1960 financial year is from April 1 to December 31, 1960, and figures are therefore valid only as to 75 per cent.

The pattern of budgetary expenditure in 1961 was: Total expenditure DM. 44.8 milliard (1960=41.9 milliard); Social expenditure (including housing and welfare), DM. 16.8 milliard (about 37 per cent.); Defence (including the amount spent on foreign troops in the Federal Republic), DM. 12.9 milliard (about 29 per cent.); Agriculture and food, DM. 2.3 milliard (about 5 per cent.); Transport, DM. 3.2 milliard (about 7 per cent.).

In 1952 an agreement was reached for the settlement of German pre-war and post-war foreign debts. An agreement was also signed whereby the Federal Republic will pay to Israel and Jewish organizations over a period of years reparations amounting to DM. 3.5 milliard.

Foreign Trade.—In 1961, imports (including West Berlin) were valued at DM. 44,363 million (1960=42,723 million); and exports at DM. 50,978 million (1960=47,946 million); 26.3 per cent. of imports consisted of foodstuffs and 20.5 per cent. of industrial raw materials; 31.1 per cent. came from the Common Market† countries; 19.4 per cent. from the E.F.T.A.* and 15.9 per cent. from the United States and Canada. The Common Market† countries took 31.7 per cent. of all exports, the E.F.T.A.* 28.3 per cent. and the United States and Canada 7.8 per cent.

Trade with U.K.

	1960	1961
Imports from U.K.	£163,394,204	£171,261,149
Exports to U.K.	181,543,618	194,292,276

Communications.—The state-owned railways of the Federal Republic measure 19,060 miles and the privately owned railways 3,229 miles, a total of 22,289 miles. In 1961 the railways handled 321,900,000 tons of goods and the inland waterways 172,000,000 tons. Railway rolling stock (*Deutsche Bundesbahn*) included, in 1961, 6,766 steam locomotives, 1,128 electric locomotives, 1,089 diesel locomotives, 19,747 passenger coaches, 887 rail buses and 273,107 goods waggons. The classified roads measure 84,668 miles. On Jan. 1, 1962, there were 5,587,599 cars and 716,835 lorries. Ocean-going shipping under the German flag in Dec., 1961, amounted to 5,274,000 tons gross.

Social Welfare.—There is compulsory insurance against sickness, accident, old age and unemployment. Children's allowances are payable in respect

of the third and subsequent children. Pension schemes for widows and orphans of public servants are in operation. Public assistance is given to persons unable to earn their living, or with insufficient income to maintain a minimum standard of living.

Law and Justice.—Judicial authority is exercised by the Federal Constitutional Court, the Supreme Federal Court, and the courts of the *Länder*. Judges are independent and subject only to the law. The death sentence has been abolished.

Language and Literature.—Modern (or New High) German has developed from the time of the Reformation to the present day, with differences of dialect in Austria and Alsace and in the German-speaking cantons of Switzerland. The literary language is usually regarded as having become fixed by Luther and Zwingli at the Reformation, since which time many great names occur in all branches, notably philosophy, from Leibnitz (1646-1716) to Kant (1724-1804), Fichte (1762-1814), Schelling (1775-1854) and Hegel (1770-1831); the drama from Goethe (1749-1832) and Schiller (1759-1805) to Gerhart Hauptmann (1862-1946); and in poetry, Heine (1800-1856). German authors have received the Nobel Prize for Literature on five occasions—Theodore Mommsen (1902), R. Eucken (1908), P. Heyse (1909), Gerhart Hauptmann (1912), and Thomas Mann (1929). There are now 1,464 daily papers.

Education.—School attendance is compulsory for all children between the ages of 6 and 14. For the school year 1959-60 there were 30,000 elementary schools, with 198,000 teachers and 5,000,000 pupils in the Federal Republic. State expenditure per primary school pupil per annum amounted to DM. 640. In addition there were 760 intermediate schools with 310,000 pupils and 10,100 teachers, 1,550 grammar schools with 743,000 pupils and 14,000 teachers. State expenditure per pupil for intermediate schools was D.M. 980 and for grammar schools was D.M. 1,440 per annum. The grammar school leaving examination (*Abitur*) entitles the holder to a place of study at a university. The number of examinations passed in 1957 was 38,700. Children below the age of 18 who are not attending an intermediate or grammar school are obliged to take a three-year course (part-time) at a vocational school. There were 9,700 such schools with 2,300,000 pupils and 22,000 teachers. State expenditure per pupil per annum was DM. 1,100. In the winter term of 1959 the 18 universities, 8 technical universities, and 7 other institutions of university status, together with teacher training and other colleges in the Federal Republic registered a total of 196,000 German, and 18,800 foreign students. The largest universities are in Munich, Berlin, Cologne, Aachen (T.U.), Hamburg, Frankfurt, Heidelberg, Freiburg and Göttingen. There were 1,200 adult education centres with 3,500 rural branches. The attendance figure for 1959 was 4,400,000 and state expenditure amounted to 40,000,000 DM.

Religion.—At the 1950 Census there were 24,430,815 Protestants in the Republic, 21,576,179 Roman Catholics, 17,116 Jews, 142,849 agnostics and 1,528,713 others.

CAPITAL, Bonn, in North Rhine Westphalia, on the left bank of the Rhine, 15 miles distant from Cologne. Population, 145,000.

Deputy Commandant (*Minister*), A. G. R. Rouse, C.M.G., O.B.E.

Administrative Officer, D. J. Lloyd, M.B.E.

Eastern Germany

Administration.—When the Federal Republic was formed, the People's Council of the Soviet zone, appointed in 1948, was converted into a Provisional People's Chamber. On Oct. 7, 1949, this Chamber enacted a constitution of the "German Democratic Republic," and a provisional Land Chamber was established, now known as *Volkskammer*. The German Democratic Republic is not recognized by the governments of western countries. A number of governmental reforms have been introduced since the original constitution was drafted. The Presidency was abolished on Sept. 12, 1960. From that date the main Government posts have been held as follows:—

Chairman, Council of State, W. Ulbricht.

Prime Minister, Otto Grotewohl.

President of the *Volkskammer*, Dr. Johannes Dieckmann.

Deputy Prime Minister and Foreign Affairs, Dr. Lothar Bolz.

Chairman, State Planning Commission, B. Leuschner.

Chairman, State Control Commission, F. Lange.

It was not until the summer of 1953 that the Soviet Commander-in-Chief was replaced in the civilian sphere by a High Commissioner. In September, 1953, the post of High Commissioner was combined with that of Ambassador.

Area and Population.—The area of Eastern Germany is 41,380 sq. miles and its population in October, 1946, was 17,300,000*:

Saxony-Anhalt	... 4,200,000	Saxony	... 5,600,000
Brandenburg	... 2,500,000	Thuringia	... 2,900,000
Mecklenburg	... 2,100,000		

Principal cities and towns: Dresden (467,666); Leipzig (607,655); Magdeburg (236,326); Halle (222,505); Erfurt (174,633); Rostock (114,869); Zwickau (122,862), and Karlmarxstadt (Chemnitz) (250,188). Eastern Berlin, an integral part of the zone and its capital city, has a population of approximately 1,200,000.

In July, 1952, in the interests of "democratization" and the further centralization of power, the old *Länder* (regions) were abolished and replaced by 14 *Bezirke* (regions) as follows:

Land	Bezirke
Mecklenburg	... Rostock; Schwerin; Neubrandenburg.

Brandenburg	... Potsdam; Cottbus; Frankfurt.
Saxony	... Karlmarxstadt; Dresden; Leipzig.
Saxony-Anhalt	... Halle; Magdeburg.
Thuringia	... Erfurt; Gera; Guhl.

Each region has its own *Bezirktag* (assembly) and *Bezirksrat* (council) to deal with purely regional affairs.

Economic Position.—From the economic point of view the Eastern zone is a more unbalanced area than the Federal Republic. It is more nearly self-sufficient in food, but has few industrial raw materials apart from brown coal and copper ore. Before the war its highly developed secondary industries were dependent on Ruhr coal and steel.

The Soviets claimed reparations from Germany to a value of \$ (1938) 10 milliard. Between 1945 and March, 1948, they removed considerable quantities of capital equipment to the U.S.S.R. and took over a number of important plants as Soviet State Concerns (S.A.G.). S.A.G.'s now account for perhaps one-eighth of all industrial production in Eastern Germany. Their products are sold partly in Germany and partly to the U.S.S.R. and other foreign countries. In addition the zone pays reparations from current production to the U.S.S.R. and, although the amounts have been reduced, the obligation continues until 1965. Economic control has been centralized, industry subjected to rigid central planning, state ownership

* Figures published in 1961 by the West German Ministry of Refugees showed that 2,600,000 refugees had fled to the Federal Republic from Eastern Germany (*German Democratic Republic*) in 1949-1961, many of them crossing to the Western sector of Berlin. More than a quarter of a million persons fled to the Federal Republic in each of the years 1955-1957. In the first six months of 1961, 103,159 refugees were received in West Germany, 30,444 more in July and a further 15,000 in August, 1961, until the Berlin border was sealed by the East German authorities. Refugees crossing in 1960 included about 700 doctors, 142 professors and college lecturers and some 2,000 school teachers.

and trading greatly expanded at the expense of private interests and the basic industries given priority over secondary industries. Large new steel plants have been erected at Fürstberg/Oder and at Calbe, and crude steel production is now greater than before the war.

The East German Government announced on April 14, 1960, that collectivization of agriculture in East Germany had been completed, the only exceptions being a few small areas unsuitable for large-scale farming.

Trade with U.K.

GREECE

(Hellas)

King of the Hellenes, Paul I, born Dec. 14, 1901; *acceded* (on the death of his brother King George I), April 1, 1947; *married* Jan. 8, 1938, Princess Frederika, daughter of the Duke of Brunswick (born April 18, 1917), and has issue:—

- (i) Crown Prince (*Diadoch*) H.R.H. Prince Constantine, Duke of Sparta, born June 2, 1947.
- (ii) H.R.H. Princess Sophia, born Nov. 2, 1938; *married* May 14, 1962, H.R.H. Don Juan Carlos, of Spain.
- (iii) H.R.H. Princess Irene, born May 11, 1942.

CABINET

(June, 1956; reconstructed Nov., 1961)

Prime Minister, Constantine Karamanlis.
Deputy Prime Minister, Panayotis Kanellopoulos.
Minister to the Prime Minister, Dimitrios Niakris.
Minister of Co-ordination, Panayotis Papaligouras.
National Defence, Arlside Protopapadakis.
Foreign Affairs, Evangelos Avcroff-Tossizza.
Justice, C. Papaconstantinou.
Interior, George Rallis.
National Education and Religion, Grigorios Cassimatís.
Finance, Spyrikdon Theotokis.
Commerce, Panayotis Pinielís.
Industry, Zíssis Zíssakis.
Public Works, Gen. Solon Ghikas.
Communications, Dimitrios Vranopoulos.
Agriculture, Constantine Adamopoulos.
Social Welfare, Andreas Stratos.
Mercantile Marine, Stylianos Kotiadis.
Labour, Constantine Chrysanthopoulos.
Northern Greece, Dionysios Manentis.

ROYAL GREEK EMBASSY IN LONDON

51 Upper Brook Street, W.1
[Mayfair: 0694]

Ambassador Extraordinary and Plenipotentiary (vacant).
Counsellor, J. A. Dracoulis.
1st Secretaries, D. C. Petrou; A. J. Stephanou.
2nd Secretary (*Consular Affairs*), S. Konstantopoulos.
Naval and Military Attaché, Captain M. Stavridis.
Minister Plenipotentiary (*Press Affairs*), M. Cosmetas.
Air Attaché, Group Capt. M. J. Fragiskos.
Commercial Counsellor, E. Anagnostopoulos.
Commercial Secretary, G. Mitrofanis.
Hon. Educational Counsellor, P. Argenti.
Consulate General, Department of Information and Commercial Department, 49 Upper Brook Street, W.1.

There are Honorary Consulates at Birmingham, Bradford, Bristol, Falmouth, Hull, Inningham, Liverpool, Middlesbrough, Newcastle, Plymouth, Portsmouth, Southampton and Yarmouth, Swansea and Glasgow, and at Belfast.

A maritime Kingdom in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Libyan and Ionian seas, and on the E. by Turkey, with an estimated area of 51,182 sq. miles. Provisional results of a census held throughout the country on March 19, 1961, recorded a population of 8,388,553.

The area of the mainland is 41,328 sq. miles, and of the islands 9,854 sq. miles. The main divisions are: *Macedonia* (which includes Mt. Athos and the island of *Thasos*), *Thrace* (including the island of *Samothrace*), *Epirus*, *Thessaly*, *Continental Greece* (which includes the island of *Euboea* and the *Sporades*, or "scattered islands," of which the largest is *Skyros*), the *Peloponnese* (or *Morea*), the *Dodecanese* or *Southern Sporades* (12 islands occupied by Italy in 1911 during the Italo-Turkish War and ceded to Greece by Italy in 1947) consisting of Rhodes, Astypalaia, Karpathos, Kassos, Nisyros, Kalymnos, Leros, Patmos, Kos, Symi, Khalki and Tilos, the *Cyclades* (a circular group numbering about 200, with a total area of 923 sq. miles; the chief islands are Syros, Andros, Tinos, Naxos, Paros, Santorini, Milos and Serifos), the *Ionian Islands* (Corfu, Paxos, Levkas, Ithaca, Cephalonia, Zante and Cerigo), the *Aegean Islands* (Chios, Lesbos, Limnos and Samos). In Crete there was for over 1,500 years (3000 to 1400 B.C.) a flourishing civilization which spread its influence far and wide throughout the Aegean, and the ruins of the palace of Minos at Cnossos afford evidence of astonishing comfort and luxury. Greek civilization emerges about 1300 B.C. and the poems of Homer, the blind poet of Chios, which were probably current about 800 B.C., record the 10-year struggle between the Achaeans of Greece and the Phrygians of Troy (1194-1184 B.C.).

Government.—The Independence of Greece dates from March 25 (O.S.), 1821, and was ratified by the *Treaty of Adrianople* (Sept. 14, 1829) and the *Convention of London* (Feb. 3, 1830), after a successful insurrection against the Ottoman Empire, to which the country had been subjected since the 15th century. The first Head of State was a Greek, John Capodistrias, who was assassinated in Nauplia in 1831. The Allied Powers then chose a prince of the Wittelsbach (Bavarian) dynasty; he ruled as King Otho until his abdication in 1862. He was succeeded by King George I of the Glucksburg (Danish) dynasty. Since then Greece has had one period as a republic (1924-35) and one period of uncertainty (from the Second World War until September, 1946), but in both cases returned to the monarchical system under the Glucksburg dynasty after a plebiscite.

At the time of its independence, the Kingdom of Greece included little more than the Peloponnese, Sterea Hellas and the Cyclades, but the Ionian Islands were added in 1864, Thessaly in 1881, Macedonia, Crete and the Aegean Islands in 1913, Western Thrace in 1919 and the Dodecanese in 1947. The Treaty of Sèvres (1922), under which Greece would have received large territories round Istanbul and in Asia Minor, was nullified by the Greek defeat in the Asia Minor campaign of 1922. This was followed by a major exchange of populations which largely settled the minority problems between Greece and Turkey. The long campaign for *enosis* (union) of Cyprus with Greece was terminated in 1959 by the Zürich and London Agreements which led to the proclamation of Cyprus as an independent republic in 1960.

On October 28, 1940, Italy declared war on Greece and invaded the country from Albania, but within a month Greek troops, assisted at sea and in the air by Great Britain, expelled the invader and advanced in triumph into Albania. On April 6,

1941, Germany invaded Yugoslavia and Greece and came to the aid of the defeated Italian forces. British and Commonwealth ground forces were sent to the assistance of Greece, but the fresh onslaught led to her occupation by German, Italian and Bulgarian troops. By her own exertions and by Allied help Greece was freed in October, 1944.

There followed in December-January, 1944-5 a short period of civil war in which the Communists attempted to seize power by force. In 1947, Communist guerrilla disturbances assumed the proportions of civil war, which continued with increasing damage and destruction to the country until the summer of 1949 when the Greek Army's victories overwhelmed the guerrillas. Normal conditions were sufficiently restored throughout the country to enable a general election to be held on March 5, 1950. Since then, with considerable economic help from the United States, Greece has made great progress in the formidable task of rehabilitation and reconstruction. Greece acceded to the North Atlantic Treaty in Feb. 1952. In the economic field the country has made steady, if slow, progress. From 1954-59 relations between Greece and the United Kingdom were severely strained by the Cyprus issue, but since its settlement by the Zürich and London agreements (February 11 and 19, 1959) they have improved rapidly.

At a general election held on October 29, 1961, the National Radical Union Party of M. Karamanlis was for the third time returned to power. It received 50.8 per cent. of the total votes cast and a total of 179 seats in the Chamber. The Union of Centre Parties (Liberal, PADE and Populist Party Union) emerged as the leading Opposition party (76 seats). The extreme left (PAME) returned 54 fewer members and secured 14.6 per cent. of the total votes cast. A new Cabinet was formed by M. Karamanlis on Nov. 4, 1961. (See above).

Defence.—The Navy has 80 ships, most of which have been provided by the United States. The strength of the Army is 120,000. The Air Force consists of 24,000 men, nine offensive squadrons and two transport squadrons, together with a few helicopters and the necessary support, training and maintenance organizations.

Production.—Though there has in recent years been a substantial measure of industrialization, Greece is still predominantly an agricultural country. Agriculture employs about half the working population, the most important product and export being tobacco, which still, despite recent difficulties in disposing of the crop abroad, accounts for one-third of the value of total visible exports from Greece. Since the war the production of wheat, cotton and rice has been greatly increased, partly in an attempt to make the country's economy less dependent upon tobacco. The most important of the fruit trees are the olive, vine, orange, lemon, fig, almond, pomegranate and currant-vine, and considerable efforts have lately been made to develop exports of Greek fresh fruit and vegetables as well as currants and other dried fruits. Currants, grown mainly around Patras, remain one of Greece's main exports, the United Kingdom being the principal purchaser.

The principal minerals mined in Greece are iron ore, iron pyrites, manganese, magnesite, chrome, bauxite, lead, zinc and emery, and prospecting for petroleum is being carried on. The chief industries are textiles (cotton, woollen, silk and rayon), chemicals, cement, glass, metallurgy, shipbuilding, domestic electrical equipment and footwear. An oil refinery, the first in Greece, was opened near Athens early in 1958 and industrial projects, either in the course of being carried out or planned in the

near future, include the extension of the existing iron and steel industries, the establishment of a plant for the manufacture of aluminium and other factories for sugar, fertilizers, tyres and polystyrene; the development of the country's electric power resources; irrigation and land reclamation schemes, and the exploitation of Greece's lignite resources for fuel and industrial purposes. Greece enjoys substantial financial assistance from the United States and has received loans from the Federal Republic of Germany. Following a decision made at the N.A.T.O. ministerial meeting in Athens in May, 1962, a consortium of 8 countries from O.E.C.D. has been formed to help Greece's economic development.

Communications.—The 2,650 kilometres of Greek railways had all been repaired by the end of 1950, in spite of delays due to the activities of guerrilla bands. All are now State owned with the exception of the Athens-Piræus Electric Railway. The railway from Athens to the Peloponnese, serving Patras and southern Greece, is metre gauge, but the other lines, except one or two minor ones, are standard gauge. Athens is linked with Istanbul, Paris (*via* Belgrade, Trieste and Lausanne), Ostend (*via* Belgrade, Salzburg, Cologne and Brussels) and Vienna by direct sleeping-car services. Greek roads total somewhat over 50,000 kilometres, of which about 30 per cent. are classified as national highways and 30,000 km. are classified as provincial roads. More than 7,000 km. of both classes are asphalt and a further 14,000 km. are macadamized. At the end of Dec., 1961, the Greek mercantile fleet numbered 959 ships with a total tonnage of 6,739,667 tons gross. A further 680 Greek-owned ships were under foreign flags (6,296,973 tons gross). The Greek national airline, Olympic Airways, flies numerous internal and external services, including Athens-London, and it and other airlines connect Athens directly with most countries in Europe and the Middle East.

Religion.—Over 97 per cent. of the people are adherents of the Greek Orthodox Church, which is the State religion, all others being tolerated and free from interference. The Church of Greece recognizes the spiritual primacy of the Œcumenical Patriarch of Constantinople, but is otherwise a self-governing body administered by the Holy Synod under the Presidency of the Archbishop of Athens and All Greece. It has no jurisdiction over the Church of Crete, which has a degree of autonomy under the Œcumenical Patriarch, nor over the Monastic Community of Mount Athos and the Church in the Dodecanese, both of which come directly under the Œcumenical Patriarch.

Education is free and compulsory from the age of 6 to 12 and is maintained by State grants. There are two Universities, Athens and Salonica, that of Athens being of wide repute.

Language and Literature.—The spoken language of modern Greece is descended by a process of natural development from the "Common Greek" of Alexander's empire. Official and technical matter is mostly composed in *Katharevusa*, a conservative literary dialect evolved by Adamantios Corais (Diamant Coray), who lived and died in Paris (1748-1833), but novels and poetry are mostly composed in *dimotiki*, a progressive literary dialect which owes much to John Psycharis (1854-1929). The poets Solomos, Palamas, Cavafis and Sikelianos have won a European reputation.

CURRENCY

The Greek *drachma* has an official exchange rate of 84 = £1 sterling and 30 = U.S. \$1.

GUATEMALA

(República de Guatemala)

PRESIDENT

Gen. Miguel Ydígoras Fuentes, assumed office March 1, 1958.

EMBASSY IN LONDON

30 Collingham Gardens, S.W.5

[Fremantle: 7463]

Ambassador Extraordinary and Plenipotentiary in London, Colonel Don Felipe Doroteo Monterroso (1962).

1st Secretary, Señor Don Eduardo de León-Strecker.
 2nd Secretary, Señor Don Juan José Jauregui-Varela.

There is a Consulate-General at Liverpool and Consuls at Glasgow and Belfast.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45' to 17° 49', and in W. long from 88° 12' 49" to 92° 13' 43", and comprises an area of 42,042 square miles, and a population (at the census of 1950) of 2,788,122. There is a single chamber legislative assembly of 68 members and a cabinet of 11 of whom 10 are Ministers of State. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 12,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,000 ft.) was destroyed by an upheaval in Dec., 1917. The country is well watered by numerous rivers; the climate is hot and malarial near the coast, temperate in the higher regions. The rainfall in the capital is 57 in. per annum. The chief Ψ seaports are San José de Guatemala and Champerico on the Pacific and Livingston, Matias de Gálvez (formerly Santo Tomás) and Puerto Barrios on the Atlantic side.

Language and Literature.—Spanish is the language of the country, and since the establishment of the University in the capital education has received a marked impulse and the high figure of illiteracy is being reduced. The National library contains about 80,000 volumes in the Spanish tongue.

FINANCE 1961-62

EMBASSY IN LONDON

Ambassador, His Excellency Tibou Tounkara (1962)

Formerly part of French West Africa, Guinea has a coastline on the Atlantic Ocean between Portuguese Guinea and Sierra Leone and in the interior is adjacent to Senegal, Mali and the Republic of Ivory Coast. Area, 96,865 sq. miles. The population was estimated in 1961 at 3,000,000, mostly of the Fullah, Malinké and Soussou tribes. It is estimated that there are about 2,000 Europeans in the country.

Government.—Guinea was separated from Senegal in 1891 and administered by France as a separate colony until 1958. In the referendum held in Metropolitan France and the overseas territories on Sept. 2, 1958, Guinea rejected the new French Constitution. Accordingly, on Sept. 28, it was declared that Guinea had separated itself from the other territories of French West Africa which had adopted the Constitution. French administrative and financial assistance was terminated; and Guinea left the French Community. On October 2, 1958, Guinea became an independent republic governed by a Constituent Assembly. M. Sékou Touré, Prime Minister in the Territorial Assembly, assumed office as head of the new Government.

A provisional constitution, adopted on Nov. 12, 1958, declared Guinea "a democratic, secular and social republic", powers of government being exercised by a president assisted by the Cabinet. The President, eligible for a term of 7 years and for re-election, is head of state and of the armed forces. M. Sékou Touré was elected President of the Republic by an overwhelming vote in an election (in which he was the sole candidate) in January, 1961. General recognition of Guinea as an independent state was followed by her admission to membership of the United Nations in December, 1958.

Guinea withdrew from the Franc Zone on March 1, 1960, and established her own currency, the *Guinea franc* (at par with the *franc C.F.A.*). The consequent payment difficulties led to the rupture of commercial relations with France, hitherto her most important supplier and purchaser.

Production, etc.—The principal products of Guinea are alumina, iron-ore, palm kernels, millet, rice, coffee, bananas, pineapples and rubber. Principal imports are cotton goods, manufactured goods,

tobacco, petroleum products, sugar, rice, flour and salt; exports, alumina, iron-ore, diamonds, coffee, hides, bananas, palm kernels and pineapples. In the mountains in the hinterland of Guinea (Fouta Djalon, 4,970 feet), where the rivers Senegal, Gambia and Niger have their sources, large deposits of bauxite (the raw material of aluminium) are worked and alumina is produced for export. Bauxite has been worked and exported from the Conakry area where there are also rich deposits of iron-ore and large-scale mining is carried on.

Trade with U.K.

	1960	1961
Imports from U.K.	£564,679	£835,379
Exports to U.K.	1,374,485	866,597

CAPITAL.—Ψ Conakry (100,000). Other towns are Kankan (24,000), which is connected with Conakry by a railway, Kindia (13,000), N'Zérékoré, Mamou, Siguiri and Labé.

FLAG.—Three vertical stripes of red, yellow and green.

Conakry

Ambassador Extraordinary and Plenipotentiary and Consul General, His Excellency Hilary William King, M.B.E. (1962).

1st Secretary, D. N. Lane.

2nd Secretary, P. B. Thompson.

3rd Secretary (and Consul), R. S. Jones.

British Council Representative, J. H. Grimes.

HAITI

(République d'Haiti)

President, Dr. François Duvalier, installed Oct. 22, 1957; re-installed May 22, 1961.

EMBASSY IN LONDON

22 Hans Road, S.W.3.

Chargé d'Affaires, Maurice Cassus.

The Republic of Haiti occupies the western third of the island of Hispaniola, which, next to Cuba, is the largest island in the West Indies.

The area of the Republic is about 10,000 sq. miles with a population of about 4,000,000. The people are mainly negroes but there are numbers of mulattoes and others with some admixture of European blood. About 250 British subjects, chiefly of British West Indian origin, reside in Haiti.

A French colony under the name of Saint-Dominique from 1697, the slave population, estimated at 500,000, revolted in 1791 under the leadership of Toussaint L'Ouverture, who was born a slave and made himself Governor-General of the colony. He capitulated to the French in 1802 and died in captivity in 1803. Resistance was continued by Jean Jacques Dessalines, also a former black slave, who, on January 1, 1804, declared the former French colony to be an independent state. It was at this time that the name Haiti, an aboriginal word meaning mountainous, was adopted. Dessalines became Emperor of Haiti, but was assassinated in 1806. In 1915, following a period of political upheaval, the country was occupied by a force of U.S. marines. The occupation came to an end in 1934, and U.S. control of the revenue of Haiti officially ended on October 1, 1947.

The six-year term of General Magloire having ended in December 1956, he attempted to stay in power for a further period but was forced to resign and go into exile. A period of political upheaval followed and for many months there was no effective government. A military junta took over

in June, 1957, and elections were held in September, following which Dr. Duvalier was installed as the new President of the Republic.

Production, Industry, etc.—In French colonial times, Haiti was one of the most productive countries in the world and the richest French possession. Improvident methods of peasant agriculture succeeded the plantation system and resulted in the gradual impoverishment of natural resources through exhaustion of the soil, deforestation and erosion. In recent years measures for agricultural rehabilitation have been taken with the aim of a gradual restoration of the productiveness of the country. The main project now approaching completion is a scheme for the irrigation of more than 70,000 acres of the Artibonite valley for which the Import-Export Bank approved a loan of \$27,000,000 and the Development Loan Fund, on May 28, 1959, a further loan of \$4,300,000.

The principal products are coffee, sisal, sugar, essential oils, bananas, logwood, cocoa and cotton. Coffee accounts for about two-thirds of total exports and is the mainstay of the country's economy. Exports of bauxite began in 1957 and production of copper in the Terre Neuve area started in 1960. Industry is still on a small scale. The tourist trade expanded until 1956, since when it has fallen off owing to political upheavals.

Communications.—There are very few asphalted roads and internal communications are very bad. Air services between the capital and the principal provincial towns are maintained by the Aviation Corps of the Haitian Army. The principal towns and villages are connected by telephone and/or telegraph. The internal telephone and telegraph system is permanently out of order. The reinstallation which was being carried out by a British firm was stopped in 1957 and has not been resumed. External telegraph, telephone and postal services are normal.

Air services by Pan-American World Airways are regular and frequent, and there are passenger sailings every 10 days (approx.) for New York and Panama by the Grace Line. Freight sailings are frequent for the U.S.A., Canada and Europe. Sailings between Haiti and Jamaica are infrequent. (Air mail transit U.K./Port-au-Prince 4-7 days.)

Climate.—The climate is tropical with comparatively little difference in the temperatures between the summer (March-October) and the winter (Nov.-Feb.). The temperature at Port-au-Prince rarely exceeds 95° F., but the humidity is high, especially in the autumn.

Language and Literature.—French is the language of the government and the press, but it is only understood by the educated minority. The usual language of the people is Creole. Education is free but estimates of illiteracy are as high as 90 per cent. There are 4 French daily newspapers and several weekly papers including 2 in English. The total circulation is very small.

(Republica de Honduras)

President, Dr. José Ramón Villeda Morales (Dec. 21, 1957).

HONDURAN EMBASSY IN LONDON

104 Great Portland Street, W.1.

[Langham: 6103]

Ambassador, His Excellency Dr. Francisco José Durón (1960).

Consul-General, Dr. Gonzalo Rodríguez-Soto.

There is a Consular Office at Birmingham.

Honduras, one of the five Republican States of Central America, lies between lat. 13° and 16° 30' N. and long. 83° and 89° 41' west, with a seaboard of about 400 miles on the Caribbean Sea and an outlet, consisting of a small strip of coast 77 miles in length on the Pacific. Its frontiers are contiguous with those of Guatemala, Nicaragua and El Salvador.

The Republic contains a total area of approximately 43,278 square miles and a population of 1,887,389 (estimate of June 30, 1959) of mixed Spanish and Indian blood. There is a strong foreign negro (British West Indian) element in Northern Honduras. The country is very mountainous, being traversed by the Cordilleras. Most of the soil is poor and acid, except for a few areas along the North coast and in the interior. There has been no recent volcanic activity. Rainfall is seasonal, May to October being wet and November to April dry. The climate varies with the altitude, being tropical throughout the year in the coastal belts and temperate and mainly healthy in the uplands.

Originally discovered and settled by the Spaniards at the beginning of the sixteenth century, Honduras formed part of the Spanish American Dominions for nearly three centuries until 1821 when independence was proclaimed.

Under the Constitution of Dec. 21, 1957, the Legislature consists of a single Congress of 58 members elected by popular vote in the ratio of approximately one per 30,000 inhabitants. The executive authority is vested in the President who is assisted by a Cabinet of nine Ministers.

The Republic is divided into 18 departments, the newest of which, Gracias a Dios, formed in Feb. 1957, covers all the territory previously known as La Mosquitia, together with portions of the Departments of Olancho and Colón. It is inhabited by Indian tribes and largely unexplored.

The chief industry is the production of bananas. Other products are coffee, coconuts, tobacco, beans, maize, rice and tropical fruits. Cattle raising is becoming an increasingly important industry, a large number of cattle being exported to the neighbouring countries every year. Honduras is

also a timber producing country, the most important woods being pine, mahogany and cedar. There are large tracts of uncultivated land.

The mineral resources of the country are reputed to be considerable, but only a small portion is at present exploited owing to transport difficulties.

1,008 miles of railway were in operation in the year 1957, chiefly to serve the banana plantations and the Caribbean ports. The total road mileage is approximately 2,000, the greater part of which is in poor condition, but improvements are now being made and new roads built. There are 15 airports in use in Honduras, exclusive of numerous small landing and emergency fields. There are three international air services (TACA Internacional, PAA and TAN) and a domestic air service (SAHSA). There are 2,979 miles of telephone lines, 4,981 miles of telegraph lines and 369 post-offices.

The chief ports are Puerto Cortes, Tela and La Ceiba on the North Coast, through which passes the bulk of the trade with the United States and Europe, and Amapala, situated on Tiger Island in the Gulf of Fonseca, on the Pacific side.

Language and Literature.—The language of the country is Spanish. Primary and secondary education is free and compulsory and, although there is still a great deal of illiteracy, it is gradually diminishing. There is no recognized native literature.

LEGATION IN LONDON

(35 Eaton Place, S.W.1)

[Belgravia: 4048]

Minister in London, His Excellency Béla Szilágyi (1959).

Consulate, 46 Eaton Place, S.W.1 (Belgravia: 4462).

Area and Population.—The area of Hungary may be stated as approximately 36,000 sq. miles with a population Jan. 1, 1960) of 9,997,870.

Government.—Hungary was reconstituted a kingdom in 1920 after having been declared a republic on Nov. 17, 1918. She joined the Anti-Comintern Pact on Feb. 24, 1939, and entered the 1939-45 War on the side of Germany. On Jan. 20, 1945, a Hungarian provisional government of liberation, which had been set up during the preceding December, signed an armistice with the United Nations under the terms of which the frontiers of Hungary were withdrawn to the limits existing in 1937.

For the first four years after the liberation, Hungary was governed by a coalition of the Smallholder, National Peasant, Social Democrat and Communist parties. During this time land reform was carried out, the great landowners being dispossessed and their estates partitioned among peasants; mines, heavy industry, banks and schools were nationalized. By 1949 the Communists, under the leadership of Mr. Rákosi, having compelled the Social Democrat Party to merge with them, and having disrupted the peasant parties, had succeeded in gaining a monopoly of power. Elections in that year, in which candidates for the National Assembly were drawn from a single list, resulted in 95.6 per cent. of the votes cast being obtained by the Communist-dominated People's Front. A campaign was opened to collectivize agriculture and by 1952 practically the entire economy had been "socialized."

In mid-1953 Mr. Imre Nagy replaced Mr. Rákosi as Prime Minister, though the latter continued to hold his post as First Secretary of the Party. Mr. Nagy introduced a more moderate policy based largely on the development of agriculture rather than heavy industry; but in April, 1955, Mr. Rákosi succeeded in turning the tables on his rival who was removed from his position as Prime Minister and subsequently expelled from the Party. But after the 20th Congress of the Soviet Communist Party, opposition to Mr. Rákosi within the Hungarian Communist Party mounted and on July 18, 1956, he was removed from his post as

First Secretary and succeeded by Mr. Gerö, who had been one of his closest associates. The period from July to the outbreak of the national revolution on Oct. 23, 1956, was marked by growing ferment in intellectual circles and increased discord within the Party. The immediate signal for the revolt was a series of students' demonstrations, first in Szeged on Oct. 22 and in Budapest a day later. The chief demands put forward by students and other demonstrators were for the return of Mr. Nagy as Prime Minister, for the withdrawal of Soviet troops from the country and for free elections. Fighting broke out on the night of Oct. 23 between demonstrators, who had been joined by large numbers of factory workers, and the State Security Police (A.V.H.). Soviet forces intervened in strength early the next morning. By Oct. 30 Soviet troops had withdrawn from Budapest and on Nov. 3 Mr. Nagy formed an all-party coalition government. This government was overthrown and the revolution suppressed as the result of a renewed attack by Soviet forces on Budapest in the early hours of Nov. 4. Simultaneously the formation of a new Hungarian Revolutionary Worker Peasant Government under the leadership of Mr. Kádár, Mr. Gerö's successor as First Secretary of the Party, was announced. The trial and execution of Imre Nagy and three of his associates was announced on June 17, 1958. Dr. Ferenc Münnich succeeded as President of the Council on Jan. 27, 1958, and held office until Sept. 13, 1961, being replaced by Mr. Kádár. Several other Ministers were replaced at the same time.

Production, Industry, etc.—Though industrialization has made considerable progress in the last decade, agriculture still occupies an important place in the Hungarian economy and 58 per cent. of the total area of the country is arable land. About 14 per cent. of this arable land is owned by state farms and about 75 per cent. by co-operative farms. Production of the most important crops in 1960 was as follows (1,000 tons):—Wheat 1,767; rye 354; barley 986; oats 203; rice 45; maize 3,504; potatoes 2,656; sugar-beet 3,370; cattle-turnip 1,431; sunflower 86; lucerne 18; red clover 852.

Industry is mainly based on imported raw materials, but Hungary has her own coal (mostly brown), bauxite, some iron ore and oil. Output figures in 1960 (1,000 tons) were as follows:—coal 26,523; bauxite 1,289; iron ore 516; pig-iron 1,249; steel 1,885; crude oil 1,215; cement 1,571.

The output of raw materials and general industrial production were sharply reduced by the revolution of Oct., 1956, but all the ground then lost has since been made up and industrial production rose by 12 per cent. in 1959. Hungary's economic plan for 1962 provided for an increase of 8 per cent. in industrial production.

Religion and Education.—About two-thirds of the Magyars are Roman Catholics, and the remainder mostly Calvinist. There are five types of schools under the Ministry of Education—infant schools 3-6, general schools 6-14 (compulsory), vocational schools (15-18), secondary schools (15-18), universities and adult training schools (over 18). In the academic year 1959-60 there were 31,000 students at universities, 177,000 at secondary schools of all types and 1,314,000 at general schools.

Language and Literature.—Magyar, or Hungarian, is one of the Finno-Ugric languages. Hungarian literature began to flourish in the second half of the sixteenth century. Among the greatest writers of the nineteenth and twentieth centuries are Mihály Vörösmarty (1800-1855), Sándor Petöfi (1823-1849), János Arany (1817-1882), Endre Ady (1877-1918), Attila József (1905-

1937), Mihály Babits (1883-1941) and Dezsö Kosztolányi (1885-1936).

Finance.—The budget estimates for the year 1962 were: Revenue, *Forints* 84,483,000,000; Expenditure, *Forints* 83,886,000,000. The *Forint* (of 100 *Filler*) has an official exchange value of 32.87 *Forints* = £1, but travellers to Hungary are accorded a bonus of 100 per cent. when exchanging sterling and certain other foreign currencies.

EMBASSY IN LONDON

1 Eaton Terrace, S.W.1

[Sloane: 5131-2]

Ambassador Extraordinary and Plenipotentiary, His Excellency Henrik Björnsson (1960).

Iceland is a large volcanic island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W. long., with an estimated area of 40,500 square miles, or greater than that of Ireland. The population was 179,829 on Dec. 1, 1961.

Iceland was uninhabited before the ninth century, when settlers came from Norway. For several centuries a form of republican government prevailed, with an annual assembly of leading men called the *Althing*, but in 1241 Iceland became subject to Norway, and later to Denmark. During the colonial period, Iceland maintained its cultural integrity but a deterioration in the climate, together with frequent volcanic eruptions and outbreaks of disease led to a serious fall in the standard of living and to a decline in the population to little more than 40,000. In the nineteenth century a struggle for independence began which led first to home-rule for Iceland under the Danish Crown (1918), and later to complete independence under a republican form of rule in 1944.

The Icelandic Cabinet normally consists of seven Ministers, responsible to the *Althing*, a Parliamentary assembly of 60 members. The present government is a coalition of Conservatives and Social

Democrats, with the Progressive and Communist parties forming the Opposition.

Iceland lives very largely by her catching and export of fish, and this is held to justify an extension of exclusive fishery limits round her coast to a greater extent than that hitherto sanctioned by international law. In 1952, the Icelandic limits were extended from three to four miles, and at the same time a new method of establishing base-lines across bays and estuaries was introduced. This led to a dispute with the U.K., and the British trawler industry succeeded in imposing a ban on the landing of fish by Icelandic trawlers in England. This dispute was settled in October, 1956, by which time a considerable proportion of the Icelandic fish trade had been diverted to Russia. Conferences on the law of the sea held at Geneva in 1958 and 1960 ended without reaching a decision and it was announced on April 28, 1960, that the British Government refused to recognize Iceland's unilateral claim for a 12-mile fishery limit.

After lengthy negotiation between the Icelandic and British Governments, the dispute was settled by an Exchange of Notes on March 11, 1961, by which the United Kingdom Government agreed that it would no longer object to a 12 mile fishery zone around Iceland and the Icelandic Government agreed that United Kingdom fishing vessels could fish within certain specified zones between 6–12 miles for a period of 3 years.

The principal products of the island are fish, fish oils, whales, mutton, wool and ponies. The principal exports are fish, fish meals and oils, whale oil and meat, and sheepskins; the imports consist of almost all the necessaries of life, the chief items being grain and meal, sugar, coffee, salt, coal, oil and petrol, cotton goods, tobacco, spirits, hardware and timber.

At January 1, 1962, the mercantile marine consisted of 850 vessels of a gross tonnage of 136,250. There were: 48 trawlers (33,570 tons), 31 passenger and freight vessels (45,965 tons), 101 fishing boats of over 100 tons (26,346 tons), 665 fishing boats of under 100 tons (23,520 tons), 7 coastguard and lifesaving vessels (2,607 tons), 4 oil tankers (13,839 tons) and 3 other vessels (503 tons). There is a regular shipping service between Reykjavik, Leith and Copenhagen, fortnightly in summer and every three weeks in winter. Frequent but irregular services run between Reykjavik and Hull, and the Continent.

A regular twice-weekly air service (daily in summer) is maintained between Renfrew and London and Reykjavik. There are also air services from the island to Scandinavia, U.S.A. and Germany. Road communications are adequate in summer but greatly restricted by snow in winter. Only roads in town centres are well surfaced. The State highways and side roads are non-metalled (gravel and kava dust). The climate and terrain make first-class surfaces for highways out of the question.

Language and Literature.—The ancient Norraena (or Northern tongue) presents close affinities to Anglo-Saxon and as spoken and written in Iceland to-day differs little from that introduced into the island in the ninth century. There is a rich literature with two distinct periods of development, from the middle of the eleventh to the end of the thirteenth century and from the beginning of the nineteenth century to the present time.

Situated between latitudes 6° North and 11° South and between longitudes 95° and 141° East, Indonesia comprises the islands of *Java* and *Madura*, the island of *Sumatra*, the *Rionu-Lingga Archipelago* (which with *Karimon*, *Anambas*, *Natuna* Islands, *Tambelan*, and part of *Sumatra*, forms the "Residency of Riouw"), the islands of *Bangka* and *Billiton*, part of the island of *Borneo*, *Celebes Island*, the *Moluca Islands* (*Ternate*, *Halmahera*, *Buru*, *Ceram*, *Banda*, *Timor-Laut*, *Larat*, *Bachlam*, *Obi*, *Kei*, *Aru*, *Babar*, *Leti* and *Wetar*), part of *Timor Island*, and the islands of *Bali* and *Lombok*, with a total area of 735,000 miles, and a population (1961 census) of 96,000,000.

From the early part of the 17th century much of the Indonesian Archipelago was under Netherlands rule. Following the World War, 1939–45, a strong nationalistic movement manifested itself and after sporadic fighting the formal transfer of sovereignty by the Netherlands took place on December 27, 1949. The provisional federal constitution then adopted was, on August 15, 1950, changed to a unitary Republic of Indonesia in

which the separate provinces were guaranteed broad regional autonomy and on February 13, 1956, the agreement of 1949 with the Netherlands was unilaterally abrogated. As a result of the failure of the parliamentary parties to provide political and economic stability, President Sukarno as Commander-in-Chief of the Armed Forces proclaimed martial law on March 14, 1957, and appointed a temporary cabinet under a non-party Prime Minister. At the end of the year the Government, in response to popular feeling, took over control of most of the Dutch commercial concerns. The great majority of Dutch citizens left the country during the next few months. On February 15, 1958, regional discontent came to a head with the proclamation of a rival Indonesian Government in West Sumatra and North Celebes under Dr. Staffruddin. The Central Government resorted to military action and organized resistance had ceased in Sumatra by May, 1958, though small scale operations continued till the autumn of 1961.

On July 5, 1959, the President issued a decree dissolving the Constituent Assembly and declared the re-application of the 1945 constitution. The elected House of Representatives was dissolved by the President on March 5, 1960, and a nominated House has been set up in its place. There are also a Supreme Advisory Council and a National Planning Council with advisory powers. Under the 1945 constitution, sovereignty is vested in the Provisional People's Consultative Assembly which was inaugurated in November, 1960. This nominated Assembly is responsible for ratifying national policy, but effective authority is vested in the President himself.

Finance.—The budgetary system in Indonesia has been in deficit for some years now. The note circulation increased from *rupiahs* 19.5 billion to Rp. 25.6 billion during 1959, and to Rp. 34.5 by the end of 1960. Gold and foreign currency cover for the currency declined during the early part of 1959 from around 8 to 5 per cent., but a revaluation of the *rupiah* in August, by means of a currency reform which also devalued the higher notes to one-tenth of their full value, readjusted the percentage of cover to over 30 per cent. An improvement in the foreign currency reserves raised this to 34.7 per cent. by the end of the year. By the end of 1960 the figure stood at 34.6 per cent., since when no further figures for gold and foreign currency cover or money in circulation have been released. It is, however, clear, that foreign exchange reserves have been seriously depleted and note issues considerably increased.

Another effect of the monetary measures in August, 1959, was to reduce the *rupiah* from Rp. 85 = £1 to Rp. 126 = £1. Further monetary measures introduced from August 27, 1960, allow the import of many previously banned commodities, at a special rate of exchange of *Rupiah* 560 = £1. A special tourist rate of exchange of the U.S. \$ equivalent to *Rupiah* 250 = £1 was introduced on May 1, 1961. Since March, 1962, national importers have been allowed negotiable foreign exchange permits to the value of 15 per cent. of their realised f.o.b. exports. On a specially established exchange under the control of the Bank of Indonesia, such permits were realising 20 times their face value by June, 1962.

Production.—Nearly 70 per cent. of the population of Indonesia is engaged in agriculture and related production. Copra, kapok, nutmeg and cinnamon are produced mainly by smallholders; palm oil, sugar, fibres and cinchona are produced by large estate companies. Rubber, tea, coffee and tobacco are also produced in quantity. Rice is a traditional staple food for the people of Indonesia

and the islands of Java and Madura are important producers.

Indonesia is rich in minerals; petroleum, tin, coal and bauxite are the principal products; gold, silver, manganese phosphates, nickel and sulphur were produced in quantity before the Second World War and there are considerable deposits, the exploitation of which the Government is now starting.

Trade with U.K.

	1960	1961
Imports from U.K.	£19,379,491	£21,389,258
Exports to U.K.	5,981,587	6,014,018

Principal exports to the United Kingdom are rubber, tea, petroleum and sugar. Imports from the United Kingdom are mainly of machinery, electrical equipment, aircraft, cars, cycles, and other vehicles, chemical and pharmaceutical goods, woven and piece goods and sewing thread.

Transport.—In Java a main line connects Djakarta with Surabaya in the East of Java and there are several branches, including a line from Semarang on the North coast to Djogjakarta in the South. In Sumatra the important towns of Medan, Padang and Palembang are the centres of short railway systems.

Sea communications in the archipelago were maintained for many years by a Dutch shipping line but in December, 1957, this ceased to operate. The resulting dislocation of shipping services among the islands is gradually being mitigated by the acquisition by the Government Shipping Board of ships for various national shipping companies. Transport by small craft on the rivers of the larger islands plays an important part in the export trade. Air services in Indonesia are operated by Garuda Indonesian Airways and the country is served by various international services, including those of B.O.A.C. There are approximately 46,500 miles of roads in Indonesia.

CAPITAL: Batavia (Java) has been renamed Djakarta (population 3,000,000) and is the capital of the Republic of Indonesia. Other important centres are: (Java) Surabaya, Semarang, Bandung, Tjeribon, Surakarta and Djogjakarta; (Madura) Pamekasan (180,000); (Sumatra) Palembang (500,000), Medan (500,000) and Padang; (Celebes) Macassar (450,000) and Menado; (Borneo) Banjarmasin, Balikpapan and Pontianak; (Moluccas) Ternate (9,000); (Bali) Denpasar and Singaradja (120,000); (W. Timor) Kupang (10,000).

FLAG.—Equal bands of red over white.

NATIONAL ANTHEM: *Indonesia Raya*. August 17 is celebrated as INDEPENDENCE DAY in Indonesia.

IRAQ

Council of Sovereignty (exercising presidential powers), General Najib al-Ruba'i (*Chairman*); Rashad Arif; Abdul Masid Kammuna.

CABINET

(February, 1959)

Prime Minister and Minister of Defence, Maj.-Gen. Abdul Karim Qasim.
 Minister of Foreign Affairs, Hashim Jawad.
 Interior and (Interim) Agrarian Reform, Brig. Ahmad Muhammad Yahya.
 Justice, Rashid Mahmud.
 Education and acting Minister of Guidance, Brig. Ismail Ibrahim Arif.
 Health, Maj. Gen. Muhammad al-Shawwaf.
 Communications, Hassan al-Talabani.
 Planning, Dr. Tal'at al-Shaibani.
 Municipalities, Baqir al Dujaili.
 Commerce, Nadhim al Zahawi.
 Public Works and Housing, Hassan Rif'at.
 Industry, Brig. Muhiddin Hamid.
 Finance, Dr. Mudhaffar Hussain Jamil.
 Agriculture, Colonel Adil Jalal.
 Oil, Muhammad Salman.

IRAQ EMBASSY IN LONDON

21-22 Queen's Gate, S.W.7

[Knightsbridge: 7141]

Ambassador in London (vacant).

Chargé d'Affaires, Nathir Umari.

1st Secretaries, Taha Marouf; Fouad Al-Rawi.

2nd Secretary, Wissam Al-Zahawi.

3rd Secretary, Abdul Kareem Al-Tikriti.

Military Attaché, Lt.-Col. Khalil Ibrahim.

Asst. Military Attaché, Maj. Abdul Munim Lafta.

Air Attaché, Lt.-Col. K. M. Al-Azzawi.

Commercial Attaché, Dr. Khalid Al-Shawi.

Cultural Attaché, Ismail Mohamad Ismail (acting).

Assistant Cultural Attaché, Ali Mohammed Al-Mathno.

Financial Attaché, Tariq Abdul Karim Wajdi.

Assistant Attaché, Hamid Fahmi Al-Qadhi.

Attachés, Mamdoh Abdul Hamid Mohammad;

Widad Ali Ajjam.

Area, etc.—Lying between the Rivers Euphrates and Tigris, Iraq extends from Turkey on N. and N.E. to the Persian Gulf on the S. and S.E. and from Iran on E. to Syria and the Arabian Desert on W., the approximate position being between 37½° to 48½° E. long., and from 31° to 30° N. lat.

The total area of Iraq is about 172,000 sq. miles, the distance from Basrah in the south to Mosul in the north being approximately 500 miles.

Population (1957 census):—

	Males	Females	Totals
Baghdad.....	670,161	636,443	1,306,604
Hillah.....	177,543	176,071	353,614
Diyala.....	166,506	163,307	329,813
Diwaniyah...	246,467	261,081	507,548
Ramadi.....	119,306	114,056	234,262
Karbala.....	105,317	111,668	217,015

	3,294,073	3,244,036	6,538,109

The *Liwa* is the present Iraqi unit of administration, the *Vilayet* being the former Ottoman unit.

Of the total population there were in 1947: Moslems 4,226,974 (five-thirteenths being Sunni and eight-thirteenths Shiite), Christians 141,664, Jews 116,836, and other religions, 38,862 (Mandaeans Yazidis, Bahais, &c.). Almost the entire Jewish population has now emigrated to Israel.

The *Euphrates* (which has a total length of 1,700 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles); the other arm rises in the north-west of Erzerum in the Dumlu Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Qurna, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the districts of Diarbekir, Van and Bitlis conjoin.

Government.—Under the Treaty of Lausanne (1923), Turkey renounced the sovereignty over Mesopotamia. A provisional Arab Government was set up in Nov., 1920, and in Aug., 1921, the Emir Faisal (3rd son of ex-King Hussein of the Hejaz) was elected King of Iraq.

In 1939 King Faisal II, grandson of Faisal I, acceded to the throne at the age of 3 on the death of his father, King Ghazi, and until 1953, when Faisal II ascended the throne, Iraq was ruled by Prince Abdullah as Regent. Faisal II, together with Prince Abdullah, other members of the Royal family and the then Prime Minister, Gen. Nuri al-Said, was assassinated in Baghdad in July, 1958, during a *coup d'état* resulting in the formation of a republican form of government. The monarchy was succeeded by a three-man Council of Sovereignty exercising presidential powers and a republican cabinet formed by Brigadier (now Major-General) Qasim.

Production and Industry.—Iraq is capable of supporting a considerably greater population if irrigation is developed and extended. Apart from the valuable revenues to be derived from oil the wealth of the country depends upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley, beans, rice, dates and Indian corn; wheat averages 464 lb. per acre, barley 612 lb., and rice over 370 lb. Cotton growing is successful in some years. Tobacco from the northern *liwas* is sufficient for the needs of the country. Production of crude oil in Iraq totalled 662,609 long tons in 1935, rising to 4,162,939 long tons in 1938. Revised production figures for the years 1954-1961 are:

	Long Tons	Long Tons
1954....	29,615,569	1958.... 34,931,461
1955....	32,716,227	1959.... 40,897,676
1956....	30,606,282	1960.... 46,534,398
1957....	21,361,979	1961.... 48,000,000

Few industries are yet established on any scale but an increasing industrialization is taking place under both private enterprise and Government action. An economic and technical co-operation agreement was signed with the Soviet Union in 1960, providing for the setting up of specified industries. Existing industries include cement, building materials, flour milling, cigarettes, soap, beer, steel fabrications including furniture, tanning, textiles, footwear and vegetable oils.

Communications and Trade.—New roads are being rapidly built, and communications between Baghdad and the provincial capitals are being improved and secured. Under the terms of the Permanent Economic Plan, 1961-66, 51 per cent. of all oil

royalties is allocated for development projects. A minimum of £25,000,000 per annum is guaranteed, but oil revenues are at present running at a level of about £95,000,000 per annum. The Permanent Economic Plan provides for a total expenditure of ID556,000,000 on industry, communications, agriculture and building construction. The industrial projects include 13 factories being supplied under the Iraq/Soviet Agreement. Contracts for 9 of these were signed in 1962, and work on some has already begun.

The port of Basrah is well equipped and able to handle expeditiously all seaborne traffic. Continuous dredging of the Shatt-al-Arab has provided a navigable channel of 22½ feet at low water (as compared with 9 feet before dredging was begun) giving easy access to the Port at all times. A new channel across the Fao Bar has recently been dredged. The desert route between Baghdad and the Mediterranean carries an increasing amount of traffic, though most goods reaching Iraq are still sent *via* Basrah. Exceptional floods in the spring of 1954 caused serious damage in Central Iraq and interruptions to communications, but effective flood control works have since been completed and prevented severe flooding in 1957.

Airports for the use of international air traffic have been provided at Baghdad and Basrah (Maqil). BOAC provides a thrice-weekly service between London and Baghdad, which is also served by Iraqi Airways and airlines of Iran, the Lebanon, the Netherlands, Italy, West Germany, Switzerland, Czechoslovakia and Pakistan. Iraqi Airways operates a daily service to Basrah and services from Baghdad to Mosul, Kirkuk, the Persian Gulf, Amman, Beirut, Cairo, Damascus, Tehran, Athens, Istanbul, Rome, Zürich, Prague, Vienna, Frankfurt, London, Karachi and Bombay.

Iraqi Republican Railways provide a regular passenger and goods service between Baghdad and Basrah by the metre gauge line completed in 1920, which also extends northwards to Khanaqin, Kirkuk and Arbil. The railway line from Baghdad to Mosul, linking up through Syria and Turkey with the Mediterranean and the Bosphorus, is standard gauge. The Basra-Baghdad line is being replaced by a standard gauge line. The route for a line between Kirkuk and Sulaimaniya is being surveyed.

Language, Literature and Archaeology.—The language is mainly Arabic (*see* Arabia) and English is widely used in commerce, science and the arts.

There is evidence that an advanced civilization had been reached in the alluvial valley of the Euphrates while Europe was in a state of barbarism. Astronomy, geometry, engineering and land surveying were cultivated by the Sumerians of Mesopotamia, and various arts reached a point of perfection by 3000 B.C., as investigations at Ur of the Chaldees have shown. Sumerian culture spread from Mesopotamia to Crete and Egypt and to Greece. In 1944 excavations at Tell Hassuna, near Shura (on the Tigris in North Iraq) unearthed abundant traces of culture dating back to 5000 B.C.

Excavations in 1948 at Tel Abu Shanrain, 14 miles south of "Ur of the Chaldees," confirm Eridu's claim to be the most ancient city of the Sumerian world.

Hillah, the ancient city on the left bank of the Shatt el Hillah, a branch of the Euphrates, about 70 miles south of Baghdad, is near the site of Babylon and of the "house of the lofty-head" or "gate of the god" (Tower of Babel).

Mosul *Litwa* covers a great part of the ancient kingdom of Assyria, the ruins of Nineveh, the Assyrian capita., being visible on the banks of the Tigris, opposite Mosul. A British archaeological

expedition has been excavating at Nimrud in the same area since 1950.

Qurna, at the junction of the Tigris and Euphrates, is the traditional site of the *Garden of Eden*. The "Tree of Knowledge," which had stood there "from time immemorial," withered and died in December, 1946. It has been replaced by a shoot said to be from the original tree.

FINANCE

	1960-61	1961-62*
Total revenue . . .	ID102,100,000	ID112,000,000
Total expenditure . . .	116,200,000	120,700,000

*Estimated.

The Iraqi Dinar of 1,000 Fils = £1 sterling.

TRADE

(Excluding oil)

	1960	1961
Total imports . . .	ID139,500,000	ID145,600,000
Total exports	7,000,000	7,800,000

Trade with U.K.

	1960	1961
Imports from U.K. . . .	£28,906,787	£28,512,331
Exports to U.K.	54,185,198	45,027,769

The principal imports are iron and steel, mechanical and electrical machinery, motor cars, cotton and rayon piecegoods, sugar and tea; and the chief exports are crude petroleum, cereals, dates, raw wool, hides, live animals and raw cotton.

CAPITAL.—The chief city is Baghdad, the former capital of the Abbassid dynasty, one of the Caliphs of that dynasty being Haroun al Rashid or "the Arabian Nights." Baghdad has a population of 552,047; of the other towns Mosul has a population of 340,541 and Ψ Basrah, 206,302.

FLAG.—Equal vertical stripes of black, white and green; 8-pointed star bearing yellow orb in centre of white stripe.

Without Portfolio, Yosef Almogi (*Mapai*).

NOTE:—*Mapai*—Labour Party.

N.R.F.—National Religious Front.

L.A.—Leahdut Avodah (Unity of Labour).

EMBASSY IN LONDON

2 Palace Green, Kensington, W.8

Ambassador in London, His Excellency Arthur Lourie (1960).

Consular Section, 2A Palace Green, W.8.

Area and Population.—Israel lies on the western edge of the continent of Asia at the eastern extremity of the Mediterranean Sea, between lat. 29° 30'–33° 15' N. and long. 34° 15'–35° 40' E. Its political neighbours are Lebanon on the North, Syria on the North and East, Jordan on the East and the Egyptian province of Sinai on the South.

The area is estimated at 7,992 square miles out of the 10,429 square miles comprised in the whole of Palestine (the remainder being occupied by Jordan and Egypt). The population was estimated (Dec., 1961) at 2,232,600, of whom 1,985,500 were Jews, the remainder mostly Arabs. These figures result from the rapid progress of Jewish immigration since the establishment of the State. In 1912 there were only 83,790 Jews in Palestine out of a total population of 752,048. During the upheavals of 1948–49 some 600,000 Arabs left the country as refugees and settled in neighbouring countries. Since 1948 the population of Israel has more than trebled.

Hebrew is the official language of Israel. Arabic is also used extensively in Government publications and on coins and stamps. Arabs are entitled to transact all official business with Government Departments in Arabic, and provision is made in the *Knesset* for the simultaneous translation of all speeches into Arabic.

Physical Features.—Israel comprises four main regions: (a) the hill country of Galilee and Judea and Samaria, rising in places to heights of nearly 4,000 feet; (b) the coastal plain from the Gaza strip to North of Acre, including the plain of Esdraelon running from Haifa Bay to the south-east, and cutting in two the hill region; (c) the Negev, a semi-desert triangular-shaped region, extending from a base south of Beersheeba, to an apex at the head of the Gulf of 'Aqaba; and (d) parts of the Jordan valley, including the Hula Region, Tiberias and the south-western extremity of the Dead Sea. The principal river is the Jordan, which rises from three main sources in Israel, the Lebanon and Syria, and flows through the Hula valley and the canals which have replaced Lake Hula, drained in 1958. Between Hulata and Tiberias (Sea of Galilee) the river falls 926 ft. in 11 miles and becomes a turbulent stream. Lake Tiberias is 666 ft. below sea-level and liable to sudden storms. Between it and the Dead Sea the Jordan falls 591 ft. The other principal rivers are the Yarkon and Qishon. The

largest lake is the *Dead Sea* (shared between Israel and Jordan); area 393 sq. miles, 1,286 feet below sea-level, 51·5 miles long, with a maximum width of 11 miles and a maximum depth of 1,309 ft.; it receives the waters of the Jordan and of six other streams, and has no outlet, the surplus being carried off by evaporation. The water, therefore, contains an extraordinarily high concentration of mineral substances. The highest mountain peak is Mount Meron, 3,962 feet above sea-level, near Safad, Upper Galilee.

Climate.—The climate is variable, similar to that of Lower Egypt, but modified by altitude and distance from the sea. The summer is hot but is tempered in most parts by daily winds from the Mediterranean. The winter is the rainy season lasting from November to April, the period of maximum rainfall being January and February.

Antiquities.—The following are among the principal historic sites in Israel: Jerusalem: the Church of the Dormition and the *Cænaculum* on Mount Zion (the principal Christian and Moslem Holy Places of the Jerusalem area are in Jordan territory); Ein Karem: Church of the Visitation, Church of St. John the Baptist. Galilee: The Sea; Church and Mount of the Beatitudes, ruins of Capernaum and other sites connected with the life of Christ, Mount Tabor: Church of the Transfiguration. Nazareth: Church of the Annunciation and other Christian shrines associated with the childhood of Christ. There are also numerous sites dating from biblical and mediæval days, such as Ascalon, Cæsarea, Atlit Megiddo and Hazor.

History.—The early history of Palestine, from the time when Moses led the children of Israel from Egyptian bondage towards the *Promised Land* to the time of the *Diaspora* (Dispersion) in the second century of the Christian Era, can be found in the Books of the Old Testament and in the Works of Josephus. Before the dispersion it had become the cradle of Christianity and the *Holy Land* of the Christian World, but after the break up of the Roman Empire, into which it had been brought by Pompey in 65 B.C., it was conquered by Moslem Arabs (A.D. 634), remaining under the Crescent as part of the Ottoman Empire (except for a break from 1098 to 1187 under the Crusaders) until Allenby's victory over the Germano-Turkish forces in the plain of Armageddon (Megiddo) on September 19, 1918.

On November 2, 1917, a statement, afterwards known as *The Balfour Declaration*, was made by the British government that Britain viewed with favour the establishment in Palestine of a home for the Jewish people. This principle was incorporated in the mandate to Britain, which came officially into force on Sept. 29, 1923. From 1917 until 1948 Great Britain administered Palestine and laid the foundations of modern self-government.

The British mandate ended at midnight on May 14, 1948, when the Jewish National Council proclaimed a Jewish State of Israel, with David Ben-Gurion as Prime Minister. On the following day Palestine was invaded by Syrian and Lebanese troops in the north, by the Transjordan Arab Legion and the Iraqis in the east and by the Egyptians in the south. On June 30 the last British troops left Haifa, which was taken over by Israel.

Hostilities ceased in January, 1949. The four armistice agreements signed under United Nations auspices in 1949 left Israel in occupation of various areas originally allotted to the Arab State. The situation as at present governed by the terms of the armistices has not yet been stabilized by peace treaties between Israel and any of its neighbours. The Arab parts of Palestine occupied by Jordan were

formally incorporated with the latter in April, 1950. Egyptian forces occupy the "Gaza strip," a small coastal area with an Arab population.

Government.—There is a Cabinet and a single-chamber Parliament (*Knesset Israel*) of 120 members. On August 15, 1961, eleven political parties returned members to the *Knesset*, including *Mapai* (42), *Liberals* (17), *Herut* (17), *National Religious Front* (12), *Mapam* (9) and *Leahdut Ha'avoda* (8). The General Election was followed by a long period of negotiations among the parties and it was not until November, 1961, that a new Coalition of *Mapai*, *National Religious Front* and *Leahdut Ha'avoda*, with the support of three smaller groups, was formed. The new Cabinet under Mr. Ben-Gurion took office on Nov. 2, 1961 (*See above*).

Immigration.—The Declaration of Independence of May 14, 1943, laid down that "the State of Israel will be open to the immigration of Jews from all countries of their dispersion." The Law of Return, passed by the *Knesset* on July 5, 1950, provides that an immigrant visa shall be granted to every Jew who expresses his desire to settle in Israel. Since the establishment of the State 971,469 immigrants had entered Israel from over 100 different countries by the end of 1960.

Education.—Elementary education for all children from 5 to 14 years is compulsory. In the 1960-61 school year the number of pupils in elementary and secondary schools was approximately 600,000, of whom about 50,000 were Arab pupils attending Arab schools, 80,000 in kindergartens, 412,000 at primary and 70,000 at post-primary and secondary schools, 12,000 at universities and comparable institutions and 25,000 elsewhere. The Hebrew University has about 6,589 graduate and undergraduate students. The Israeli Institute of Technology (*Technion*) at Haifa provides courses in engineering, architecture, aeronautics and other technical subjects for 3,317 students. Tel Aviv University provides courses in science and the humanities for 825 students. The Weizmann Institute of Science at Rehovoth is engaged in pure and applied research.

Finance.—Government expenditure for the fiscal year 1960-61 totalled I.L. 1,588,519,742 while revenue during the same period was I.L. 1,569,587,103.

The unit of account is the Israel pound of 100 *agorot*. The official rate of exchange (following devaluation of the I.L. on Feb. 9, 1961) is I.L.8.442 = £1 sterling.

COMMUNICATIONS

Railways and Roads.—Israel State Railways started operating in August, 1949. Towns now served are Haifa, Tel Aviv, Jerusalem, Lydda, Naharia, Beersheba, and intermediate stations. In December, 1961, the total railway network amounted to 650 kms. There were approximately 3,073 km. of paved roads. In December, 1961, there were 96,780 licensed vehicles.

Shipping.—Israel's merchant marine on December 31, 1961, included 66 vessels with a total deadweight tonnage of 519,825. In 1961, 1,380 ships with a net tonnage of 2,977,272 entered Israeli ports. Cargo (excluding fuel) unloaded during the year amounted to 2,154,432 tons and cargo loaded to 1,061,064 tons.

The chief ports are Ψ Haifa, a modern harbour, with a depth of 30 ft. alongside the main quay; the port on the Red Sea at Ψ Eilat, with an annual cargo-handling capacity of 200,000 tons, Ψ Jaffa and Ψ Tel Aviv, where there are harbours for small craft, and large vessels anchor at open roadstead. Ψ Acre has an anchorage for small vessels. A deep-water port at Ashdod on the Mediterranean Coast

about 20 miles south of Tel Aviv is under construction and is expected to have by 1964/65 a cargo-handling capacity of 1,000,000 tons.

Civil Aviation.—The B.E.A./Olympic Airways/Cyprus Airways consortium operates eight Comet services per week between Lydda and London, two of them *via* Nicosia. B.O.A.C. operates two Boeing 707 services per week on the same route. El Al (Israel Airlines) operates five Boeing 707/720B services per week between Lydda and London, and other services to Amsterdam, Athens, Brussels, Johannesburg, Munich, New York, Paris, Rome, Teheran and Zurich. Three Britannia services of El Al operate weekly to Nicosia and Istanbul, and two to Vienna. During 1961, 3,351 aircraft arrived at Lod (Lydda) Airport, carrying 148,377 passengers and 2,052,102 kilograms of freight; 140,400 passengers and 3,171,138 kilograms of freight left through the same airport.

PRODUCTION AND INDUSTRY

Agriculture.—The country is generally fertile and climatic conditions vary so widely that a large variety of crops can be grown, ranging from temperate crops, such as wheat and cherries, to subtropical crops such as sorghum, millet and mangoes. The famous "Jafa" orange is produced in large quantities in the coastal plain for export; other kinds of citrus fruits are also grown and exported. The citrus yield during the 1961-62 season was approximately 492,000 tons. Of this total, 343,000 tons were exported, of which about 113,500 tons went to the U.K. Olives are cultivated, mainly for the production of oil used for edible purposes and for the manufacture of soap. The main winter crops are wheat and barley and various kinds of pulses, while in summer sorghum, millet, maize, sesame and summer pulses are grown. Large areas of seasonal vegetables are planted; potatoes can be grown in the autumn and in the winter. Since the establishment of the State of Israel, beef, cattle and poultry farming have been developed and the production of mixed vegetables and dairy produce has greatly increased. Tobacco and medium staple cotton are now grown. Fishing has also been extended, and production (mostly from fish ponds) reached 14,393 tons in 1961. All kinds of summer fruits such as figs, grapes, plums and apples are produced in increasing quantities for local consumption. Water supply for irrigation is the principal limiting factor to greater production, but the number of new deep wells is being extended and the construction of a pipeline to take water to the Negev from the River Jordan continues. A large part of the dairy industry is dependent on the production of fodder crops under irrigation; areas under fodder crops have doubled. The Israel land measure is the *dunam*, equivalent to 1,000 square metres (approximately a quarter of an acre).

Industry.—Among the more important industries are citrus and by-products, manufactured food products, pharmaceuticals, textiles and wearing apparel, artificial teeth, polished diamonds, plywood, cement, plastics, light engineering and the assembly of motor cars and trucks.

TRADE

	1960	1961
Imports.....	\$502,678,000	\$570,338,000
Exports.....	\$216,605,000	\$245,108,000

Trade with U.K.

	1960	1961
Imports from U.K.....	£15,302,561	£19,834,616
Exports to U.K.....	14,730,063	13,769,463

The principal imports are foodstuffs, crude oil, machinery and vehicles, iron, steel and manufactures thereof, and chemicals. The principal

exports are citrus fruits and by-products, polished diamonds, plywood, cement, tyres, minerals, finished and semi-finished textiles.

CAPITAL.—Most of the Government departments are in Jerusalem, (population, estimated 1961, 166,302), which is not, however recognised as the capital by the United Nations. Other principal towns are Ψ Tel Aviv-Jaffa (386,612); Ψ Haifa and district (182,007); Ramat Gan (90,234).

FLAG.—White, with two horizontal blue stripes, the Shield of David in the centre.

JERUSALEM

Jerusalem and District is at present divided between Israel and Jordan under the terms of the armistice arranged at the end of hostilities. The Old City, which contains 34 of the 36 recognized Holy Places, is under the control of Jordan; the New City, with 2 Holy Places, is under Jewish administration. A resolution proclaiming Jerusalem as the capital of Israel was adopted by the Israel parliament on Jan. 23, 1950.

Financial Counsellor, Signor Antonio Zecchi.

Cultural Attaché, Filippo Donini.

Press Attaché, Signor Mario de Mandato.

Italian Consulate General, 38 Eaton Place, S.W.1. (Belgravia: 4831).

Consul General, Signor Stanislao Cantono di Ceva.

Area and Population.—Italy is a Republic in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba and about 70 islands (with certain dependencies noted below). Italy is bounded on the N. by Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavians, etc., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area may be estimated at 324,000 sq. kilometres, about 121,000 sq. miles, with a population (estimated December, 1961) of 50,463,762.

Live births in 1961 numbered 930,000, deaths 468,000, and marriages 398,000 (estimated figures).

Physiography.—The peninsula is for the most part mountainous, but between the Apennines, which form its spine, and the East coastline are two large fertile plains; of Emilia/Romagna in the north and of Apulia in the south. The Alps form the northern limit of Italy, dividing it from France, Switzerland Austria and Yugoslavia. *Mont Blanc* (15,782 feet), the highest peak, is in the French Pennine Alps, but partly within the Italian borders are *Monte Rosa* (15,217 feet), *Matterhorn* (14,780 feet) and several peaks from 12,000 to 14,000 feet.

The chief rivers are the Po (220 miles), which flows through Piedmont, Lombardy and the Veneto and the Adige (Trentino and Veneto) in the north, the Arno (Florentine Plain) and the Tiber (flowing through Rome to Ostia). The *Rubicon*, a small stream flowing into the Adriatic near Rimini (and now usually identified with the Fiumicino) formed the boundary between Italy and Cisalpine Gaul: "crossing the Rubicon" (as Caesar did in 49 B.C., thus "invading" Italy in arms) is used to indicate definite commitment to some course of action.

Government.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848 to 1870, in which the great patriots Mazzini (born 1805; died 1872), Garibaldi (born 1807; died 1882) and Cavour (born 1810; died 1861) were the principal figures. It was completed when Lombardy was ceded by Austria in 1859 and Venice in 1866, and through the evacuation of Rome by the French in 1870. In 1871 the King of Italy entered Rome, and that city was declared to be the capital.

Benito Mussolini, known as *Il Duce* (The Leader), was born July 29, 1883, and was continuously in office as Prime Minister from June 30, 1925, until July 25, 1943, when the fascist régime was abolished. He was captured by Italian partisans while attempting to escape across the Swiss frontier and was put to death on April 28, 1945.

In fulfilment of a promise given in April, 1944, that he would retire when the Allies entered Rome a decree was signed on June 5, 1944, by the late King Victor Emmanuel III under which Prince Umberto, the King's son, became "Lieutenant-General of the Realm." The King remained head of the House of Savoy and retained the title of King of Italy until his abdication on May 9, 1946, when he was succeeded by the Crown Prince.

A general election was held on June 2, 1946, together with a referendum on the question of Republic or Monarchy. The Referendum resulted in 12,717,923 votes for a Republic and 10,719,284 for a Monarchy. The Royal Family left the country on June 13, and on June 28, 1946, a Provisional President was elected.

Since the General Election of 1948, governments have been formed by Signor de Gasperi (1948-53, coalition); Signor Pella (1953-54, *Christian Democrat*); Signor Scelba (1954-55, coalition); Signor Segni (July, 1955-May, 1957, coalition); Signor Zoli (June, 1957-May, 1958, *Christian Democrat*); Signor Fanfani (May, 1958-Feb., 1959, coalition); S. Segni (Feb., 1959-Feb., 1960, *Christian Democrat*, with *Liberal* support). Signor Segni resigned on Feb. 24, 1960, when the *Liberal Party* withdrew its support and, after a long crisis in which two unsuccessful attempts were made to form Centre-Left governments, Signor Tambroni formed another single-party *Christian Democrat* government on March 25, 1960, enjoying the Parliamentary support of the Neo-Fascist Party. This was, however, short-lived, being succeeded in July, 1960, by a new ministry headed by Signor Fanfani which was assured of a majority in both Houses by agreement reached with the Social Democrats, Republicans and Liberals. The single-party *Christian Democrat Government* was replaced in February, 1962, by a tripartite Government again headed by Signor Fanfani, which consisted of *Christian Democrat*, *Social Democrat* and *Republican Party* ministers. It was formed on the basis of a programme agreed with the *Socialist Party* which undertook to support its programme in Parliament either by voting for its measures or by abstention from opposition. The Liberals then went into opposition.

The New Constitution.—On Dec. 22, 1947, the Constituent Assembly approved the new Constitution laying the foundation of the Italian Republic, Article I of which states "Italy is a Democratic Republic founded on work. Sovereignty belongs to the people who exercise it in the forms and within the limits of the Constitution."

Defence.—The Army consists of about 230,000 men and includes two armoured divisions, five recently reorganized infantry divisions, five Alpine brigades and five brigade groups. The Navy consists of 2 cruisers, 6 destroyers, 43 escorts, 7 submarines, 77 minesweepers and also coastal craft and fleet auxiliaries. The Air Force consists of about 500 aircraft; approximate strength: officers, 5,579; men, 47,842; cadets at Air Academy, 232; in training, 1,696.

Language and Literature.—Italian is a Romance language derived from Latin. It is spoken in its purest form at Siena (Tuscany), but there are numerous dialects, showing variously French, German, Spanish and Arabic influences. Sard, the dialect of Sardinia, is accorded by some authorities the status of a distinct Romance language. Italian literature (in addition to Latin literature, which is the common inheritance of the civilized world) is one of the richest in Europe, particularly in its golden age (Dante, 1265-1321; Petrarch, 1304-1374; and Boccaccio, 1313-1375) and in the re-

naissance during the fifteenth and sixteenth centuries (Ariosto, 1474-1533; Machiavelli, 1469-1527; Tasso, 1544-1595). Modern Italian literature has many noted names in prose and verse, notably Manzoni (1785-1873), Carducci (1835-1907) and Gabriele d'Annunzio (1864-1938). The Nobel Prize for Literature has been awarded to Italian authors on four occasions—G. Carducci (1906), Signora G. Deledda (1926), Luigi Pirandello (1934) and Salvatore Quasimodo (1959). In 1959, there were 94 daily newspapers published in Italy, of which 18 were published in Rome and 11 in Milan.

Education.—Primary education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the 26 Universities are of very ancient foundation, Bologna, Genoa, Macerata, Naples, Padua and Perugia in thirteenth century; Siena, Rome, Pisa, Pavia and Ferrara in fourteenth century; Catania and Turin in fifteenth century; Parma, Messina and Urbino in sixteenth century.

Production.—Agriculture is still Italy's main industry; the principal products are cereals, fruit (especially citrus), vegetables, olives and olive oil, cheese and wine. Wheat is the most important cereal with an average annual yield of over 8,000,000 metric tons since 1948. Sugar beet is by far the most important industrial crop; tobacco is also grown but the harvest was very poor in 1961. Livestock supply large dairy and meat industries. Fishing is carried on extensively, mainly for the home market, although some tunny is exported.

Italy is generally poor in mineral resources but since the war large deposits of natural methane gas and smaller deposits of oil have been discovered and rapidly exploited. Production of lignite has also increased. Sulphur production, in Sicily and Calabria, is important although declining in volume. Other minerals produced in significant quantities include iron ores and pyrites, mercury, lead, zinc and aluminium. Marble is a traditional product of the Massa Carrara district. Salt and tobacco are Government monopolies.

The chief manufactures are textiles of all kinds including synthetic fibres, iron and steel and their products, building materials, ships, rolling stock, motor vehicles, rubber products, leathers and footwear, chemicals, agricultural and industrial machinery of all kinds, wood manufactures, especially furniture, food preserves and plastics. Numerous artisan industries produce gloves, straw products and typical Italian artistic products such as pottery, glassware, mosaics, coral and imitation jewellery.

Tourist Traffic.—Nearly 19,000,000 tourists visited Italy during 1961, compared with 18,000,000 in 1960, 16,800,000 in 1959, 15,300,000 in 1958, and 14,600,000 in 1957. Of the 1961 total, the largest number were from Germany, 4,780,000. There were 1,608,000 visitors from the United Kingdom in 1961.

Communications.—Serious damage to the railway system during the war necessitated a large programme for restoring the tracks, electrification, rebuilding stations and replacing and increasing rolling stock. Further steps are now to be taken to modernize the system, notably the tracks and rolling stock. A network of *autostrade* (motorways) are at present under construction between the major cities and steps have been taken to improve local roads particularly in the South where these were formerly very poor or non-existent. The

Italian Mercantile Marine totalled 5,502,113 tons on December 31, 1961, compared with 3,500,000 tons before the war.

THE ECONOMY AND FOREIGN TRADE

General Economic Conditions.—Italy's rapid economic expansion continued in 1961 although not quite at the rate achieved in 1960. The gross national product rose by 6.7 per cent., agricultural production by 6 per cent. and industrial production by 9.5 per cent. Industrial investment actually rose by 20 per cent. over 1960 and the Government inaugurated a L315,000,000 Agricultural Development Plan. Encouraged by the Government, an increasing proportion of industrial as well as agricultural investment is going to the South although most industrial activity is concentrated in the North. Steel production in 1961 was 9,100,000 metric tons, an increase of 11 per cent. over 1960. Motor vehicle production rose by 17.7 per cent. over 1960 to 759,115 units. The currency remained stable in 1961 but in the first four months of 1962 consumer prices began to rise considerably faster than in recent years. Unemployment fell to 1,400,000 in January, 1962 (20 per cent. less than in January, 1961) and there are shortages of skilled labour. Increasing prosperity and a rising standard of living have led to a growing demand for consumer goods. Foreign exchange reserves totalled U.S.\$3,322,000,000 in February, 1962.

Industrial Activity.—Of Italy's total labour force of over 20,000,000 nearly 6 million (29.5 per cent.) work on the land; over 8 million people (40 per cent.) work in industry. The North is traditionally the main industrial area, the principal centres of heavy industry being Milan, Turin and Genoa. Italy has to import most of her coal but this disadvantage has largely been overcome by the exploitation of natural gas deposits and hydro-electric power. Electricity production in 1961 was 58.6 milliard kWh, including production from thermal power stations which totalled 17.3 milliard kWh. (double the figure for 1960). Two nuclear power stations are under construction. The main industries are general engineering, motor vehicles, shipbuilding, electrical, petro-chemical, rubber, oil refining (30.8 million tons were refined in 1960), textiles and clothing, food processing, consumer goods and tourism.

Foreign Trade.—Germany, the United States, France, the Middle East oil states and the United Kingdom are the main sources of Italy's imports. The principal markets for her exports are Germany, the U.S.A., France, Switzerland and the United Kingdom. In recent years the balance of visible trade has been against Italy, but this deficit has been offset by her invisible earnings, particularly from tourism, and by a high level of foreign investment.

	1959	1960	1961
		(£'000,000)	
Total Imports	1,200.0	1,695.9	1,875.8
Total Exports	1,040.0	1,310.9	1,504.2

Trade with U.K.

	1960	1961
Imports from U.K.	£87,889,120	£114,581,336
Exports to U.K.	98,675,701	102,430,658

The following table gives the percentage by value of Italy's total trade in 1961 with EEC, EFTA and United Kingdom:—

	Italian Imports	Italian Exports
EEC	29.4	31.4
EFTA (including U.K.)	15.3	21.1
U.K.	5.5	6.7

CURRENCY

The market rate of exchange in the first four months of 1962 fluctuated between *lire* 1,740 and 1,745 = £1.

CAPITAL. Rome, founded according to legend by Romulus in the year now known as 753 B.C., is situated on the Tiber, 15 miles from its mouth. It was the focal point of Latin civilization and dominion under the Republic and afterwards under the Roman Empire, and became the capital of Italy when the kingdom was established in 1871. Population (estimated, Oct. 1961), 2,160,773.

Estimated population of the principal cities and towns on October 15, 1961 was: Milan, 1,580,978; Ψ Naples, 1,179,608; Turin, 1,019,230; Ψ Genoa, 775,107; Bologna, 441,143; Florence, 438,138; Ψ Venice, 336,184; Ψ Bari, 311,268; Ψ Trieste, 273,390; Verona, 221,138; Padua, 198,403; Ψ Taranto, 191,515; Brescia, 174,116; Ψ Leghorn, 159,973; Ferrara, 151,145; Ψ Reggio Calabria, 150,334; Parma, 140,844; Modena, 139,496; Ψ La Spezia, 121,191; Ψ Salerno, 118,171; Reggio Emilia, 116,515; Ψ Ravenna, 115,205; Bergamo, 113,512; in Sicily: Ψ Palermo, 587,063; Ψ Catania, 361,466; Ψ Messina, 251,423; in Sardinia: Ψ Cagliari, 181,499.

TRIESTE.—From June 12, 1945, the area of Trieste was administered by Allied Military Government; Zone A, including Duino and the city and harbour of Trieste, by Anglo-U.S. forces and Zone B, including the towns of Capodistria, Pirano and Cittanuova by Yugoslavia. Provision for setting up a Free Territory of Trieste, included in the Italian Peace Treaty signed in Paris on Feb. 10, 1947, proved to be unworkable and military occupation of the two Zones continued until 1954, when an agreement was concluded in London on Oct. 5 between Italy, Yugoslavia, the United Kingdom and the United States, partitioning this territory between Italy and Yugoslavia along the line of demarcation of the two Zones, with a minor frontier rectification in favour of Yugoslavia. Zone A, an area of about 90 square miles with a population of 296,229, was formally handed over to Italian administration on October 26, 1954.

Friuli—Venezia Giulia.—Legislation introduced in the Chamber of Deputies on June 19, providing for the creation of an autonomous region of Friuli-Venezia Giulia, consisting of the three provinces of Udine (population, 800,000), Gorizia (140,000) and Trieste (300,000), was passed on July 24, 1962, and referred to the Senate. The city of Trieste will be the capital of this proposed new region.

ISLANDS.—*Pantelleria Island* (part of Trapani Province) in the Sicilian Narrows, has an area of 31 sq. miles and a population of 10,306. The *Pelagian Islands* (Lampedusa, Linosa and Lamplone) are part of the Province of Agrigento and have an area of 8 sq. miles, pop. 4,458.

FLAG.—Vertical stripes of green, white and red.

IVORY COAST

(Republic of the Ivory Coast)

President and Minister for Foreign Affairs, Félix Houphouët-Boigny, elected for five years on November 27, 1960.

President of National Assembly, Philippe Yacé.

President of Economic & Social Council, Jean Delafosse.

President of Supreme Court, Ernest Boka.

Minister of State, Auguste Denise.

IVORY COAST EMBASSY IN LONDON

4 Halkin Place, S.W.1
[Belgravia: 1568]

Ambassador Extraordinary and Plenipotentiary, His Excellency Amadou Bocoum.

Counsellor, M. Louis Guirandou N'Diaye.

Press Attaché, M. René Boissin.

1st Secretary, M. Victor Oga Agnon.

The Ivory Coast is situated on the Gulf of Guinea between 5° and 10° N and 3° and 8° W and is flanked on the West by Guinea and Liberia, on the North by Mali and the Voltaic Republic and on the East by Ghana. It has an area of about 189,029 square miles—tropical rain forest in the southern half and savannah in the northern—and a population estimated in 1961 at 3,300,000 divided into a large number of ethnic and tribal groups.

Although official French contact was made in the first half of the 19th century, the Ivory Coast became a Colony only in 1893 and was finally pacified in 1912. It decided on December 5, 1958 to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 7, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961. The Ivory Coast was a founder member of the *Conseil de l'Entente*, established on May 29, 1959, as a loose union embracing also, without abrogation of sovereignty, Dahomey, Niger and Upper Volta. The official (and only common) language is French.

The Ivory Coast has a presidential system of government modelled on that of the United States and the French Fifth Republic. The single Chamber National Assembly of 70 members was elected on November 27, 1960, for five years. The defence of the Constitution, which was promulgated on Nov. 3, 1960, is vested in a Supreme Court.

Finance.—The currency of the Ivory Coast is the Franc CFA (50 francs CFA = 1 French N.F.). In 1961 revenue and expenditure balanced at Francs CFA 26,314,450,000.

Trade.—The principal exports are coffee, cocoa, bananas and timber, a small percentage of the latter

being sent to the U.K. The country has a small diamond industry and a few other unimportant deposits. Trade in 1961 was valued at: Imports, Francs CFA 37,009,000,000; Exports, Francs CFA 43,603,000,000.

Trade with U.K.

	1961
Imports from U.K.	£1,570,044
Exports to U.K.	951,501

CAPITAL, Ψ Abidjan (population 200,000) which is also the main port and handled 2,378,366 tons of goods (exports and imports) in 1961.

FLAG.—3 vertical stripes, orange, white and green.

Defence Agency, Kenjiro Shiga.

Economic Planning Agency, Ajihiro Fujiyama.

Science and Technology, Miss Tsuruyo Kondo.

Chief Cabinet Secretary, Yasumi Kurogane.

JAPANESE EMBASSY IN LONDON

46 Grosvenor Street, W.1
[Hyde Park: 6030]

Ambassador, His Excellency Katsumi Ohno.

Minister Plenipotentiary, Haruki Mori.

Counsellors, Kosaku Inada (Financial); Shizuo Saito (General Affairs); Tadatomi Ishimaru (Commercial).

1st Secretaries, Kei Miyakawa (Press); Sankichi Suzuki (Transport); Col. Michio Utsunomiya (Defence Attaché); Kyo Ando (Agricultural); Yoshio Okawa (Commercial); Kiyohisa Mikanagi (General Affairs); Jitsuo Okabe (Labour).

and Secretaries, Masataka Okura (*Financial*); Shigefumi Tamiya (*Scientific*); Yutaka Nomura (*General Affairs*).

3rd Secretaries, Genrokuro Furuhasbi (*Financial*); Sosuke Hanaoka (*Commercial*); Kunihiko Murono (*Visas*); Tsuneo Tanaka (*General Affairs*); Atachés, Hiroyuki Yushita (*Protocol*); Masayoshi Matsumura (*Press*); Kazuo Kishi (*Accounts*).

Area and Population.—Japan consists of 4 large and many small islands situated in the North Pacific Ocean between longitude 128° 6' East and 145° 49' East and between latitude 26° 59' and 45° 31' N., with a total area of 182,700 square miles and a population Jan., 1960, of 93,160,000.

Japan Proper consists of *Honshū* (or Mainland), 230,532 sq. k. (89,011 sq. m.), *Shikoku*, 18,773 sq. k. (7,248 sq. m.), *Kyūshū*, 42,079 sq. k. (16,247 sq. m.), *Hokkaidō*, 77,096 sq. k. (29,764 sq. m.). Formosa and the Kwantung Province, which had been throughout the years of Japanese expansion and aggression leased or annexed, reverted to Chinese sovereignty after the War of 1930-45.

After the unconditional surrender to the Allied Nations (Aug. 15, 1945), Japan was occupied by Allied forces under General MacArthur (Sept. 15, 1945). A Japanese peace treaty conference opened at San Francisco on Sept. 4, 1951, and on Sept. 8, 48 nations signed the treaty, which became effective on April 28, 1952. Japan then resumed her status as an independent power.

British participation in the occupation of Japan was virtually over by May, 1950. However, the outbreak of hostilities in Korea in June, 1950, resulted in the despatch to Korea of British Forces, from the United Kingdom, Australia, New Zealand and Canada to participate in the United Nations action. The main base of this force was established in Japan at Kure. On July 1, 1956, the base was moved to Inchon, Korea, and all Commonwealth troops had left Japan by the middle of 1957.

Under the terms of the Japan-U.S.A. Security Treaty of Sept. 8, 1951, United States forces remained to assist in the defence of Japan. However, as Japan's own Self Defence Forces have been built up, U.S. ground troops have been withdrawn. A revised version of the security treaty, which went into effect on June 23, 1960, was the subject of considerable controversy in the summer of that year.

Vital Statistics.—In February, 1962, Japan proper contained 94,570,000 inhabitants. The birth rate in 1961 was 16.8 per 1,000 (compared with 34.3 per 1,000 in 1947). It has been stated that a major part in reducing the birth rate to its present level was played by drastic methods, induced abortion and sterilization, the legal grounds for which had been extended by the Eugenics Law, 1948, to include economic and social hardship. In 1955, the highest year, 1,170,143 legal abortions were recorded and 43,255 cases of sterilization, compared with a total of 1,721,000 live births in that year. It was also estimated that a further 300,000 abortions at least had been procured illegally. The Japanese Government is engaged on an extensive family planning campaign to shift the balance from drastic to approved methods of birth control.

The death rate in 1961 was 7.4 per 1,000, compared with 17 per 1,000 in pre-war years, natural increase of the population being 881,000 in 1961. It is estimated that, if present trends continue, the population of Japan will reach 102,206,000 in 1970 and 113,293,000 in 1995. The *Ainu*, remnant of the indigenous inhabitants, are dying out but are still found in small numbers.

Physiography.—The coastline exceeds 17,000 miles and is deeply indented, so that few places are far from the sea. The interior is very moun-

tainous, and crossing the mainland from the Sea of Japan to the Pacific is a group of volcanoes, mainly extinct or dormant. Mount Fuji, the loftiest and most sacred mountain of Japan, about 60 miles from Tokyo, is 12,379 ft. high and has been dormant since 1707, but there are other volcanoes which are active, including Mount Aso in Kyūshū. There are frequent earthquakes, mainly along the Pacific coast near the Bay of Tokyo. Japan proper extends from sub-tropical to sub-arctic zones. Heavy snowfalls are frequent on the western slopes of Hokkaidō and Honshū, but the Pacific coasts are warmed by the Japan current. There is a plentiful rainfall and the rivers are short and swift-flowing, offering abundant opportunities for the supply of hydro-electric power.

Government.—According to Japanese tradition, Jimmu, the first Emperor of Japan, ascended the throne on Feb. 11, B.C. 660. Under the Constitution of Feb. 11, 1889, the monarchy was hereditary in the male heirs of the Imperial house. A new constitution approved by the Supreme Allied Commander was published on March 6, 1946, superseding the "Meiji Constitution" of 1889 and containing many radical changes based on the constitutional practices of the United Kingdom, U.S.A. and France. Among the most important innovations are the abandonment of the doctrine of Imperial Divinity, the renunciation of war, and the establishment of a Supreme Court.

The new constitution came into force on May 3, 1947. Legislative authority rests with *The Diet*, which is bicameral, consisting of a *House of Representatives* and a *House of Councillors*, both Houses being composed of elected members. Executive authority is vested in the Cabinet which is responsible to the Legislature.

A general election was held on November 20, 1960, in which the Liberal Democratic Party was once more returned to power. The strength of the parties in the House of Representatives on June 5, 1962, was: Liberal Democratic Party, 296; Socialist Party, 143; Democratic Socialist Party, 15; Communist Party, 3; Independents 2; (8 vacancies). After election of half the members on July 1, 1962, strengths of the parties in the House of Councillors was: Liberal Democratic Party, 142; Socialist Party, 66; Democratic Socialist Party, 11; Independents, 20; Comrades Group, 7; Communist Party, 4.

Agriculture and Livestock.—Owing to the mountainous nature of the country not more than one-sixth of its area is available for cultivation. There were in 1959 23,395,000 hectares of forest, which include the *Cryptomeria japonica*, *Pinus masoniana*, *Zelkova keaki*, and *Pawlonia imperialis* in addition to camphor trees, mulberry, vegetable wax tree and a lacquer tree which furnishes the celebrated lacquer of Japan. The soil is only moderately fertile, but intensive cultivation secures good crops. In 1960 there were 4,868,000 hectares under cereals (rice, 3,336,000 hectares.) The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, about 12,800,000 metric tons being produced annually. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits such as apples, strawberries, pears, grapes, figs, and peaches, are produced, and the American navel orange is extensively grown. Mulberry trees are now cultivated on only 170,700 hectares (1960) compared with 577,525 in 1935.

Minerals.—The country has mineral resources,

including gold and silver, and copper, lead, zinc, iron chromite, white arsenic, coal, sulphur, petroleum, salt and uranium, but iron ore, coal and crude oil are among the principal post-war imports to supply deficiencies at home.

Industry.—Japan is the most highly industrialized nation in the Far East, with the whole range of modern light and heavy industries, including mining, metals, machinery, chemicals, textiles (cotton, silk, wool and synthetics), cement, pottery, glass, rubber, lumber, paper, oil refining and shipbuilding. The labour force of Japan in February, 1962, was 43,670,000, of which only 470,000 were unemployed. Of the total labour force, some 32,570,000 were engaged in non-agricultural industries, 10,580,000 in agriculture and forestry and 530,000 in fisheries.

Communications.—There were 28,179 kilometres of Government and private railroad (steam and electric) in March, 1960. The Japanese mercantile marine reached 6,000,000 gross tons in 1941, but more than three-quarters of it was sunk during the war. On January 1, 1961, the merchant fleet (ocean-going ships over 3,000 tons gross) consisted of 1,937 steel vessels totalling 6,399,868 tons gross. It is intended to expand to 13,350,000 tons by 1970, which will necessitate new construction of 9,700,000 tons, of which 74 per cent. will be industrial carriers.

In Japan the Maritime Safety Board has responsibility for merchant shipping and pilotage. Its strength in 1961 was about 10,900 with some 420 vessels and a few aircraft.

Armed Forces.—After the unconditional surrender of August, 1945, the land forces were disarmed and disbanded and all aircraft confiscated by the occupying forces.

Although the Constitution of Japan prohibits the maintenance of armed forces, an internal security force, known as the National Police Reserve, came into being at the end of 1950. In October, 1951, this Force was renamed the National Safety Force and together with a Coastal Safety Force was placed under a National Safety Agency. By January, 1953, the National Safety Force had reached its authorized strength of 110,000.

In March, 1954, a Mutual Defence Agreement for the supply of equipment and materials was concluded with the United States. In June, the mission of the forces was extended to include the defence of Japan against direct and indirect aggression, the Agency was renamed the Defence Agency, the forces under it, the Ground Self Defence Force and the Maritime Self Defence Force respectively, and a new arm, the Air Self Defence Force, was created.

By 1956, the authorized uniformed strength of these forces was 160,000, 22,700 and 10,350 respectively and by 1962 these figures had increased to 171,500, 33,291 and 38,337. The Combined Defence Agency vote for 1962-63 is Yen 205,824,000, 8.4 per cent. of the total budget.

At the end of 1961, the Maritime Self Defence Force had 18 destroyers (4 ex-U.S.), 26 frigates (20 ex-U.S.), 2 submarines (1 ex-U.S.) and 147 minor war vessels and auxiliaries. The Fleet Air Arm has 138 operational aircraft, including helicopters, all shore-based.

The Ground Self Defence Force is broadly organized into 12 divisions (about 9,000 strongly), one armoured division and an airborne brigade. Reorganization was due to be completed in 1962. Equipment other than Japanese-made light trucks and some armoured vehicles, is largely of U.S. manufacture.

The Air Self Defence Force had at the end of 1961, 482 jet operational aircraft, many of which are used in a training rôle, 285 jet training aircraft and about 360 piston-engined aircraft of various types. 56 per cent. of these aircraft were built in Japan. Its strength including 5,887 officers, 30,823 airmen and civilians, totalled 38,337.

Religion.—All religions are tolerated. The principal religions of Japan are Mahayana Buddhism and Shinto. The Roman Catholic Church has 1 Cardinal, 1 archbishop and 9 bishops. The Nippon Seikokai (Holy Catholic Church of Japan) has 10 Japanese bishops and is an autonomous branch of the Anglican communion. There is also an United Protestant Church.

Education.—According to the laws passed in 1947, education on elementary level (6-year course) and lower secondary level (3-year course) is free, compulsory and co-educational. Upper secondary schools (3-year course) are mainly established and maintained by prefectures, and are co-educational. They have several courses in general, agricultural, commercial, technical, mercantile marine, radio-communication and home-economics education, etc. There are 2- or 3-year junior colleges and 4-year universities. Some of the 4-year universities have graduate schools. In May, 1961, the total number of these junior colleges and universities was 540, of which 100 were established and maintained by the State, while 72 were established and maintained by prefectures and cities, and 368 were private institutions. The most prominent universities are the seven State Universities of Tokyo, Kyoto, Tohoku (Sendai), Hokkaidô (Sapporo), Kyushu (Fukuoka), Osaka and Nagoya, and the two private universities, Keio and Waseda.

Language and Literature.—Japanese is said to be one of the Uro-Altaic group of languages and remained a spoken tongue until the fifth-seventh centuries A.D., when the Chinese characters came into use. Japanese who have received school education (99.8 per cent. of the population) can read and write the Chinese characters in current use (about 1,800 characters) and also the syllabary characters called Kana. English is the best known foreign language. It is compulsory in almost all middle and high schools. In April, 1961, there were 653 libraries open to the public (5 National Diet libraries, 610 state and 38 private) with 22,983,795 volumes. In addition, there were 766 University libraries with 36,124,806 volumes in May, 1961. There were 102 daily newspapers in Japan of which 16 were published at Tokyo, 10 at Osaka and 12 in the Nagoya region. Japan's present total newspaper circulation is estimated at 39,139,000 copies and 1.84 per household.

FINANCE

The Budget for the financial year 1962-63, ending on March 31, is estimated to balance at Yen 4,226,800,000,000 for revenue and expenditure on the general account, an increase of 24.2 per cent. over the preceding financial year.

The official rate of exchange of yen 360=1 U.S.\$ was established on April 25, 1949, and (after Japan's accession to the International Monetary Fund) was confirmed by the Fund on May 11, 1953. The list of currencies in which banks are allowed to deal has recently been expanded considerably. Exchange rates of all currencies are allowed to fluctuate within IMF limits.

PRODUCTION AND TRADE

Being deficient in natural resources, Japan has had to develop a complex foreign trade. Principal

imports consist of raw materials (cotton, wool, mineral oils, ruhher, iron ore, coking coal, salt, wood pulp, hides), foodstuffs (wheat, barley, soya beans, sugar), petroleum, chemicals and specialized machinery. Principal exports consist of cotton and rayon textiles, machinery, ships, metals and products, canned fish, chemicals and a wide variety of manufactured goods, including chinaware, toys, bicycles, sewing machines, cameras and transistor radios.

FOREIGN TRADE

	1960	1961
	\$1,000	\$1,000
Total Imports.....	4,491,132	5,810,432

JORDAN

(The Hashemite Kingdom of The Jordan)

King of the Jordan, Hussein, G.C.V.O., born November 14, 1935, succeeded on the deposition of his father, King Talal, Aug. 11, 1952, assumed constitutional powers, May 2, 1953, on coming of age.
Prime Minister, Wasfi Tel (Jan., 1962).

JORDANIAN EMBASSY IN LONDON

7 Palace Green, W.8

[Western: 3685]

Ambassador, His Excellency Anastas Hanania.

1st Secretary and Consul, Zeid al-Rifa'i.

Military, Naval and Air Attaché, Brig. Mohammed Is-haq.

Area and Population.—The Hashemite Kingdom of the Jordan is made up of two areas: Western Jordan, which includes the districts of Hebron, Jerusalem and Nablus, and Eastern Jordan, which includes the districts of Ma'an, Kerak, Belqa and Ajlun. The union of East and West Jordan was effected by a decision taken unanimously by both houses of the Legislature on April 24, 1950. The union was recognized a few days later by the British Government subject to certain reservations on the subject of Jerusalem. The Kingdom is bounded on the north by Syria, on the west by Israel, on the south by Saudi Arabia and on the east by Iraq. The majority of the population are Sunni Moslems and Islam is the religion of the state. The first census of population, held in Oct.-November, 1961, disclosed a population of 1,752,095.

Government.—The Executive consists of a Council of Ministers and the legislature of a Senate (25 persons nominated by the King) and a House of Representatives, consisting of 50 elected members.

Production and Industry.—West Jordan is fertile, but severely eroded. East Jordan (the old Amirate of Transjordan), consists of a fertile mountainous area and the eastern half of the Jordan valley which are productive; the rest of the country is arid steppe. Jordan's only industrial product of note is raw phosphate, of which about 390,000 tons were exported in 1961.

Communications.—The Hejaz Railway runs (with the exception of the first few miles) through Jordan territory from Deraa to Ma'an. During the Second World War, 24 miles of line were laid from Ma'an to Ras Naqb; there are good roads to all the chief towns in the country. A new road now connects Aqaba, the country's only port, with Amman.

FINANCE

	1962-63

KOREA

(Hankuk.)

Korea is situated between 124° 11" and 130° 57" E. long., and between 33° 7" and 43° 1" N. lat. It has an area of 85,256 sq. miles with an estimated

population of about 28,000,000, of whom about 21,500,000 live south of the present dividing line. The southern and western coasts are fringed with innumerable islands, of which the largest, forming a province of its own, is Chejudo (Quelpart). The soil is fertile, but the arable land is limited by the mountainous nature of the country. The staple agricultural products are rice, barley, and other cereals, beans, cotton, tobacco and hemp. Fruit-growing and sericulture are also practised. Gingseng, a medicinal root much affected by the Chinese, is largely grown at Kaesong (now in North Korean hands) but also in parts of South Korea. It forms a rich source of revenue. Gold, copper, coal, iron, graphite, tungsten and other minerals are distributed throughout the country, but are more abundant in the north. In pre-war days the south was mainly agricultural and most of the limited industries were in the north. Political necessity in recent years has led to some industrialization south of the demarcation line, but the southern portion of the peninsula remains predominantly agricultural.

History.—The last native dynasty (Yi) ruled from 1392 until 1910, in which year Japan formally annexed Korea. The country remained an integral part of the Japanese Empire until the defeat of Japan in 1945, when it was occupied by troops of the U.S.A. and the U.S.S.R.; the 38th parallel being fixed as the boundary between the two zones of occupation. The U.S. Government endeavoured to reach agreement with the Soviet Government for the creation of a Korean Government for the whole country and the withdrawal of all Russian and American troops. These efforts met with no success, and in September, 1947, the U.S. Government laid the whole question of the future of Korea before the General Assembly of the United Nations. The Assembly in November, 1947, resolved that elections should be held in Korea for a National Assembly under the supervision of a temporary Commission formed for that purpose by the United Nations and that the National Assembly when elected should set up a Government. The Soviet Government refused to allow the Commission to visit the Russian Occupied Zone and in consequence it was only able to discharge its function in that part of Korea which lies to the south of the 38th parallel.

The Korean War.—The country remained effectively divided into two along the line of the 38th parallel, until the aggression of June 25, 1950, when the North Korean forces invaded South Korea. On the same day, at an emergency meeting of the United Nations Security Council, a resolution was adopted calling for immediate cessation of hostilities, and the withdrawal of the North Korean armed forces to the 38th parallel. The Communist forces ignored this demand and continued their advance. In response to a Security Council recommendation that United Nations members should furnish assistance to repel the attack, 16 nations, including the United States of America and the United Kingdom, came to the aid of the Republic of Korea. A unified command under the leadership of the United States was established on July 8. Shortly afterwards U.S. troops were landed in Korea but were at first unable to stem the Communists' onslaught. Finally the United Nations and South Korea forces were able to stabilize a front around the Pusan perimeter. On September 15, U.S. Marines made a successful surprise landing at Inchon which was quickly followed by a breakout from the Pusan perimeter and a general advance to the north. The Communist forces had been pushed back almost to the Manchurian frontier, when, at the beginning of November, hordes of Chinese "Volunteers" began to pour over the

Yalu River and by sheer weight of numbers forced the U.N. troops to withdraw once again south of Seoul. However, the latter quickly regrouped and threw the Communist forces back to approximately the old dividing line.

The fighting was ended by an armistice agreement signed by the U.N. Commander-in-Chief and the commanders of the North Korean army and the Chinese People's "Volunteers" on July 27, 1953. By this agreement (which was not accepted by the government of the Republic of Korea) the line of division between North and South Korea remained in the neighbourhood of the 38th parallel. The Geneva Conference discussed Korea from April 26 to June 15, 1954, but failed to agree on measures for reunifying the country.

Republic of Korea

Acting President, Gen. Pak Chung Hi.
Prime Minister, Chul Kim (July 11, 1962).

KOREAN EMBASSY IN LONDON
36 Cadogan Square, S.W.1.
[Kensington: 8025]

Ambassador Extraordinary and Plenipotentiary, His Excellency Yong Shik Klm.
Counsellors, Yoo Don z Han.

2nd Secretaries, Soo Woo Ryeec; Nam Ki Lec;
Charllho Chung.

Attaché, Johnson Limb.

Naval, Military and Air Attaché, Col. Bong Hi Chun.

The Republic of Korea has been officially recognized by the Governments of the United States, France, Great Britain, and most other countries except the U.S.S.R. and its satellites. It has an area of 96,930 sq. km. (37,426 sq. miles) and a population (estimated Dec. 1, 1960) of 24,994,117.

A general election was held on May 10, 1948, and the first National Assembly met in Seoul on May 31. The Assembly passed a Constitution on July 12, and on July 20 elected Dr. Syngman Rhee as the first President of the Republic of Korea for four years. On August 15, 1948, the Republic was formally inaugurated and American Military Government came to an end. All U.S. troops were withdrawn by the end of June, 1949.

In the elections on March 15, 1960, Syngman Rhee and his nominee the late Lee Ki Poong were returned by overwhelming majorities as President and Vice-President respectively. Widespread resentment against the conduct of the elections culminated in demonstrations by University students in Seoul on April 18 and 19, renewed on April 25 and 26 after demonstrations by the professors, which finally led to the resignation of President Rhee on April 27 and the replacement of his Liberal Party Government. On May 16, 1961, a number of army officers led a revolution which overthrew the government of Dr. John M. Chang, while leaving the President in office. This movement, now re-named the Supreme Council for National Reconstruction, rules the country in place of the former House of Representatives and House of Councillors. The Supreme Council's programme calls for efficient, incorrupt government, austerity, social, moral and economic regeneration, strengthened anti-Communism and adherence to the U.N. Charter and Korea's international commitments. On March 22, 1962, President Yun resigned. General Pak Chung Hi took over as acting President, retaining his post as Chairman of the Supreme Council, pending elections and the restoration of civil government, which have both been promised for 1963.

The Republic of Korea has an army of about 550,000 men, a small navy mainly for coast pro-

tection duties, a small air force and a Marine Corps which includes one division trained in amphibious operations.

Finance.—The Budget for the year ending December 31, 1962, totals *Hwan* 689, 100,000,000, allowing for a deficit of *Hwan* 10,800,000,000. Expenditure on National Defence is estimated at *Hwan* 196,300,000,000.

The official rate of exchange consists of a basic rate, used only for budgetary purposes, of *Hwan* 1,250 = \$1 plus a variable certificate rate. From Feb.-July, 1961, the certificate rate was *Hwan* 50 = \$1 giving a total rate of *Hw.* 1,300 = \$1. The quotation for £1 varies slightly.

Trade.—The Republic of Korea's main exports are tungsten and iron ores, graphite, anthracite, fish and fish products, agar-agar, seaweed and raw silk. Her main customer is Japan. Imports greatly exceed exports. In 1961 exports totalled \$43,000,000; imports amounted to \$255,000,000 of which \$154,500,000 were financed by American aid.

Trade with U.K.

	1960	1961
Imports from U.K.	£2,717,308	£1,381,562
Exports to U.K.	624,511	380,579

CAPITAL.—Seoul, population (1960), 2,444,883. Other main centres are ΨPusan (pop. 1,163,614), Taegu (pop. 678,277) and ΨInchon (pop. 402,009). Pusan on the south-east coast, and Inchon on the west coast, only 28 miles from Seoul, are the main ports but the development of Inchon is hampered by a tide variation of 28-30 feet.

1st Secretaries, S. J. Whitwell, M.C. (*Head of Chancery and Consul*); R. A. Kidd.
Air Attaché, Group-Capt. J. G. Bishop, D.F.C. (*resident in Tokyo*).
2nd Secretaries, J. H. Bailey; A. B. Smart.
Vice-Consul, Miss J. Woolrich.

Democratic Peoples' Republic of Korea.—Meanwhile in the Russian-occupied zone north of the 38th parallel the Democratic People's Republic had been set up with its capital at Pyongyang; a Supreme Peoples' Soviet was elected in September 1948, and a Soviet-style Constitution adopted. Recognition had been given by the U.S.S.R. and its satellites.

KUWAIT

(The State of Kuwait)

Amir, H.H. Shaikh Sir Abdullah As-Salim As-Sabah, C.C.M.G., C.I.E., born 1895, *accessed* Feb. 25, 1950.

KUWAIT EMBASSY IN LONDON

40 Devonshire Street, W.1.

[Langham: 8941]

Ambassador, His Excellency Sayyid Khalifa Khalid al-Ghunaim (1961).

Kuwait is an independent Arab State whose relations with the United Kingdom are governed by an exchange of letters dated June 19, 1961, in which Her Majesty's Government confirmed its recognition of Kuwait's independent status. It extends along the shore of the Persian Gulf from Iraq to Saudi Arabia, with an area of about 5,800 square miles and a population, according to a census taken in 1961, of just over 321,000. The total European and American population was about 3,500 in 1961. The port of ΨKuwait, the capital (pop. 97,000; with suburbs 210,000), is traditionally an *entrepôt* for goods for the interior, and for the export of pearls (in diminishing quantities),

skins and wool. However, with the development of the oil industry, the importance of the *entrepôt* trade has diminished. Imports for the year 1960 amounted to approximately £86,400,000, while exports, including re-exports, amounted to about £8,300,000, excluding oil. Kuwait was traditionally the show-building centre for the Persian Gulf, but the craft is declining. The centre of the Kuwait Oil Company's production is at Burgan, south of Kuwait town. An oil port has been constructed by the company at Mina-al-Ahmadi, about five miles from Ahmadi, the company's administrative and residential centre. Production of crude oil in 1961 totalled 81,408,294 tons. The Company is jointly owned by the British Petroleum Company and the American Gulf Oil Corporation. It employs about 7,000 men, including British, Americans, Indians, Pakistanis, Kuwaitis and Arabs from neighbouring territories. Oil was also struck in the Kuwait-Saudi Arabian Neutral Zone to the South of the State early in 1953. Concessions for this area are held by the American Independent Oil Co. from Kuwait and the Getty Oil Company from Saudi Arabia. Total production of crude oil in the neutral zone in 1961 was approximately 8,000,000 tons. The Arabian Oil Company, of Japan, having been awarded in 1958 the oil concession for the Neutral Zone offshore sea-bed by Kuwait and Saudi Arabia for their respective half shares, commenced exploratory drilling in the summer of 1959 and struck oil in commercial quantity early in 1960. The first shipment of crude oil was made in March, 1961 and shipments have continued at the rate of about 1,000,000 tons a year. A concession covering the off-shore area of Kuwait proper was awarded to the Sheli Company in November, 1960, and the concession agreement in the name of The Kuwait Shell Petroleum Development Co. was signed in Kuwait on January 15, 1961. The establishment of a Kuwaiti company, The Kuwait National Petroleum Co., was authorised by an Emirie Decree on October 5, 1960. This Company took over the distribution of petroleum products in Kuwait from the Kuwait Oil Co., on June 1, 1961.

As a result of the very considerable oil revenues, the Kuwait Government embarked on a large scale development scheme and plans for social services. Education and medical treatment are free. New hospitals and schools continue to be built. In 1961-62 there were 30,663 boys and 20,024 girls in 128 schools. Kuwait has a domestic water supply from a State-owned sea water plant which operates on waste natural gas from the oil fields. The plant can produce over 6,000,000 gallons of fresh water daily. For storage there are two 15,000,000 gallon reservoirs and one of 3,000,000 gallons. The power station has a capacity of 160,000 kw. The town is now served by a network of dual carriageway roads and more are under construction.

Ships of British, Dutch and other lines make regular calls at Kuwait. B.O.A.C., Kuwait Airways and several Middle Eastern airlines operate regular air services, and other companies make non-scheduled flights to Kuwait under charter. Wire-less communications, telephone and postal services are conducted by the Kuwait Government. Banking is carried out by the British Bank of the Middle East, the National Bank of Kuwait, the Commercial Bank, and the Gulf Bank. The currency is the Kuwait *dinar*, equal in value to the £. The introduction of a new Kuwaiti *rupee* is under consideration.

Government.—Although Kuwait had been independent for some years, the "exclusive agreement" of 1899 between the Shaikh of Kuwait and the British Government was formally abrogated

by an exchange of letters dated June 19, 1961. This exchange was immediately followed by Iraqi claims to sovereignty over Kuwait, in accordance with the terms of the exchange, and the Amir requested British military assistance to help him maintain his sovereignty and independence, which was immediately supplied. British troops were withdrawn in October, 1961, and replaced by the Arab League Security Force composed of contingents from various Arab States.

Elections were held in December, 1961 for a Constituent Assembly, which held its first meeting in January, 1962. A council of Ministers including non-members of the ruling family was formed in January, 1962, to replace the former Supreme and Joint Councils and H.H. the Amir assumed the additional office of Prime Minister.

FLAG.—Three horizontal stripes of green, white and red, with black trapezoid next to staff.

BRITISH EMBASSY Kuwait

Ambassador Extraordinary and Plenipotentiary, His Excellency John Christopher Blake Richmond, C.M.G. (1961).

1st Secretary and Consul, M. W. Errook.

1st Secretary, W. K. F. Boswell.

2nd Secretary, F. S. E. Trew.

3rd Secretary, M. I. Goulding.

Economic Counsellor, W. P. Cranston.

1st Secretary (Commercial), A. B. Ball.

3rd Secretary (Commercial), A. B. N. Morey.

British Council Representative in the Persian Gulf, O. J. J. Tuckley, M.B.E., P.O. Box 345, Kuwait.

LAOS

King, Setha Khatya (. . . Savang Vatthana), born 1908, succeeded Nov. 4, 1959.

Prime Minister, Prince Souvana Phouma (Aug. 16, 1960).

EMBASSY IN LONDON 5 Palace Green, W.8

Ambassador Extraordinary and Plenipotentiary (vacant).

Laos includes the former Kingdoms of Luang Prabang and Vientiane and the Principality of the Champassak, united under King Sisavang Vong of the House of Luang Prabang, father of the present ruler. The country has an estimated area of 90,000 square miles and an estimated population of 2,500,000. The independence of the kingdom was recognized by France in July, 1949. In the Indo-China war the rebel Pathet Lao forces led by Prince Souphannouvong collaborated with the Viet Minh. The 1954 Geneva Agreements provided for the integration of the Pathet Lao forces and the re-unification of the country. Agreement was reached on these points in November, 1957 but the agreement later broke down and in 1960 elections brought a right-wing government to power.

The government was overthrown on August 9, 1960, by a *coup d'état* led by Captain Konglae. The new government of Prince Souvana Phouma was opposed by one half of the army led by General Phoumi Nosavan who set up a Revolutionary Committee at Savannakhet under the nominal headship of Prince Boun Oum. General Phoumi retook Vientiane in December, 1960, and, Souvana Phouma's government having fled, a government under Prince Boun Oum was approved by the National Assembly on January 4. Captain Konglae and Prince Souvana Phouma returned to Xieng Khouang where, in collaboration with the pro-communist Pathet Lao forces and with material support from communist countries, they were able

to counter-attack successfully and compel the Government forces to agree to a cease-fire. A 14-nation conference met in Geneva in May, 1961 to work out an interuational framework for Laotian neutrality. Agreement was held up by internal rivalries in Laos, but in June, 1962, the "three Princes" finally agreed on a coalition government under Prince Souvana Phouma, and a new Geneva agreement to safeguard Laotian neutrality was signed on July 23.

CAPITAL.—Vientiane, population (estimated) 80,000.

FLAG.—Three-headed white elephant on 5 steps, surmounted by parasol, all on a red ground.

BRITISH EMBASSY Vientiane

Ambassador Extraordinary and Plenipotentiary, His Excellency Donald Charles Hopson, C.M.G., D.S.O., M.C., T.D. (1962) £3,415

Military Attaché, Lt.-Col. J. M. B. Isaac, M.C.
Asst. do., Maj. C. E. J. Leaphard, M.C.
3rd Secretaries, D. A. Campbell; B. C. Gane.

LEBANON

President of the Republic of Lebanon, General Fuad Chehab, elected July 31, 1958; assumed office September 23, 1958.

Prime Minister, Rashid Karamch.
Foreign Affairs, Phillippe Takla.

LEBANESE EMBASSY IN LONDON (21 Kensington Palace Gardens, W.8) (Bayswater: 7265]

Ambassador, His Excellency Shaikh Khalil Takieddinne (1962).

Counsellor, Elie J. Boustany.

Attaché, Ibrahim Kharma.

Consular Section, 15 Palace Gardens Mews, W.8 (Bayswater: 8485).

The republic of the Lebanon is in the Levant, covering a portion of the former Ottoman Empire taken from the Turks by British forces (with a small French detachment and some Arab forces under the Emir Faisal and Colonel Lawrence) in 1918, but following the Anglo-French Convention of September, 1919, Great Britain withdrew in favour of France, to whom a Mandate was granted by the Supreme Council of Allied Powers in 1920. The French authorities granted a Constitution and the first President of the Republic (under the Mandate) was elected in 1926.

In 1941 hostilities broke out between the French troops in Syria and Lebanon and the Allied Forces in the Middle East, the latter having been directed to prevent further Nazi penetration into French Mandated Territory. Hostilities ceased on July 11, 1941, and the French High Command agreed to remove the garrison.

In accordance with the undertaking given by the British and Free French Forces, Syria and Lebanon were declared to be independent and separate States. In 1943 the amended Constitution came into force and the first President of the independent Lebanon Republic was elected.

Under an agreement signed by General Catroux (on behalf of the French Committee of National Liberation) and by representatives of Syria and Lebanon "all powers and capacities exercised hitherto by the French under mandate" were transferred to the Syrian and Lebanese governments as from Jan. 1, 1944.

Lebanon forms a strip, about 120 miles in length and varying in width from 30 to 35 miles, along the Mediterranean littoral, and extending from the Palestine frontier on the south to the Nahr al Kebir (15 miles north of Tripoli) on the north; its eastern boundary runs down the Anti-Lebanon range and then down the Great Central depression, the *Beqaa*, in which flow the rivers Orontes and Litani. It is divided into 5 districts, North Lebanon, Mount Lebanon, Beirut, South Lebanon and Beqaa. The seaward slopes of the mountains have a Mediterranean climate and vegetation. The inland range of Anti-Lebanon has the characteristics of steppe country. There is a mixed Arabic-speaking population of Christians, Moslems and Druses.

Area and Population.—The total area of Lebanon is about 4,300 sq. miles, the population being estimated at 1,626,000 in 1960.

Production.—Fruits are the most important products and include olives, citrus fruit and apples. Tobacco, silk, cotton, cement, textiles, confectionery, steel and wooden furniture, wines and other alcoholic drinks are also produced. There is little remaining of the famous cedars of Lebanon.

Railways.—A narrow-gauge railway runs from Beirut to Damascus, connecting at Rayak with a branch of the standard-gauge line which runs from Tripoli through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybin to the Iraq frontier at Tel Kotchek. A standard gauge railway also runs up the coast from Nakoura on the Palestine border, through Sidon and Beirut to Tripoli, but the Sidon-Nakoura sector is not in use at present.

Roads.—All the principal towns in the country are connected by roads, for the most part good.

Civil Aviation.—Beirut International Airport is one of the most important traffic centres in the Middle East. Numerous international air services to all parts of the world pass through it, and local services connect with all Middle Eastern capitals except Tel Aviv. There are 4 national airline companies in the Lebanon serving international as well as local routes. Of these the most important is Middle East Airlines, which operates *Comet* and *Viscount* services.

Rivers.—The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch; the Litani flows southwards from Lebanon, turns westwards round the southern extremity of the range and flows into the Mediterranean.

Archaeology, etc.—Lebanon has some important historical remains, notably Baalbek (Heliopolis) which contains the ruins of I-III century Roman temples and Juhail (Biblos), one of the oldest continuously inhabited towns in the world.

Language and Literature.—Arabic is the principal language (see Arabia), and French is also widely used. The use of English is increasing. About 35 daily papers are published, including 3 in French, 2 in English and 4 in Armenian; and a further 30 periodicals.

Education.—There are four universities in Beirut, the American and the French (R.C.) Universities established in the last century, and the Lebanese National University and the Arab University which are recent foundations in the early stages of development. There are several institutions for vocational training and there is a good provision throughout the country of primary and secondary schools, among which are a great number of private schools.

CHIEF TOWNS.— Ψ Beirut (population about 500,000) is the capital of the Lebanon. Ψ Tripoli (175,000), Zahlé (40,000), Ψ Sidon (25,000), Ψ Tyre (12,000) are other towns of importance.

FINANCE

Receipts and Expenditure, 1962 (Estimated)
£L375 000,000.

Currency. The monetary unit is the Lebanese £(L); official rate £1 = £L6.13. There is also an officially recognized free market in foreign currencies, which is used for nearly all commercial transactions. The free market rate for sterling is variable, but averages about £L8.40 = £1.

TRADE

Principal imports: Gold and precious metals, cereals, cotton and woollen textiles, artificial and cotton yarns, iron and steel goods, wood pharmaceuticals, raw hides, sugar, motor-vehicles, livestock, wheat, flour, machinery, crude oil, chemicals and domestic electric appliances, and paper.

Principal exports: Gold and precious metals, citrus fruits, onions, textiles, apples and pears, scrap metal, vegetables, hides and skins, soap, butter, cereals, oil-seed, cement products, wooden and steel furniture, tobacco and wines.

Trade with U.K.

	1960	1961
Imports from U.K.	£10,902,933	£16,704,624
Exports to U.K.	1,889,110	1,838,429

There is also a considerable transit trade through Beirut, mainly in gold and crude oil. Lebanon is the terminal for two oil pipe lines, one, belonging to the Iraq Petroleum Company, debouching at Tripoli, the other belonging to the Trans-Arabian Pipeline Company, at Sidon. There are refineries at each end of the pipeline which can, to all intents and purposes, fulfil Lebanon's needs.

FLAG.—Horizontal bands of red, white and red with a green cedar of Lebanon in the centre of the white band.

AIR TRANSIT FROM U.K.—London-Beirut (2,169 miles), 6 hrs. 40 mins.

BRITISH EMBASSY

Beirut

Ambassador Extraordinary and Plenipotentiary, His Excellency Sir Moore Crosthwaite, K.C.M.G. (1958) £4,115

LIBERIAN EMBASSY IN LONDON

21 Prince's Gate, S.W.7
 [Kensington: 9405]

Ambassador Extraordinary and Plenipotentiary, His
 Excellency George T. Brewer, Jr. (1959).
Consul-General, Mrs M. Reeves-Gorgla, 13 New
 Burlington Street, W. 1.

An independent Negro Republic of Western Africa, occupying that part of the coast between Sierra Leone and the Ivory Coast, which is between the rivers Mano in the N.W. and Cavalla in the S.E., a distance of about 350 miles, with an area of about 43,000 square miles, and extending to the interior to latitude 8° 50', a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1822, and has been recognized since 1847 as an independent State. The population was estimated in 1961 at 1,250,000. The first national census was being held in 1962.

The executive power is vested in a President elected for 4 years (8 years in the first instance) assisted by a Cabinet; there are two houses of Legislature, the Senate, with 10 members elected for six years, and the House of Representatives with 39 members elected for four years. There is no regular army, but there is an enlisted National Guard of about 2,000 men. The artificial harbour and free port of Monrovia was opened on July 26, 1948. There are 9 ports of entry, including 3 river ports.

Liberia is receiving assistance from the U.S. A.I.D. (successor to I.C.A.), particularly in the field of education, and technicians have been sent from U.S.A. to advise on various projects. A loan of \$15,000,000 has been negotiated with the Import-Export Bank to finance road construction. UNESCO, WHO and FAO have missions in the country providing technical assistance. The U.S.A. has also made loans for the improvement of power supplies.

FINANCE		1960-61
Revenue.....		£32,709,536
Expenditure.....		32,785,496
	§= U.S. Dollar.	

TRADE		1959	1960
Imports.....		\$42,908,547	\$69,190,400
Exports.....		66,892,469	82,609,200

Trade with U.K.		1960	1961
Imports from U.K.....		£4,577,205	£2,929,003
Exports to U.K.....		3,723,007	2,829,422

The principal exports are crude rubber, iron ore, uncut diamonds, palm kernels, cocoa and coffee. Iron ore deposits have been discovered and its export is being rapidly developed. The chief imports are manufactured goods of all kinds, transport equipment and foodstuffs.

The language of the Republic is English. British weights and measures (but American dollars) are used.

CAPITAL, Ψ Monrovia. Est. Pop. 41,000 Other ports are Ψ Marshall and Ψ Harper (Cape Palmas).

FLAG.—alternate horizontal stripes (5 White, 6 Red), with 5-pointed white star on blue field in upper corner next to flagstaff.

LIBYAN EMBASSY IN LONDON

58 Princes Gate, S.W.7.

[Kensington: 5235]

Ambassador, His Excellency Dr. Abdussalam Buseiri.

Counsellor, Dr. Omar Muntasser.
2nd Secretaries, Mohammed Sadeq; Ali Shaneba; Guima Turkey.

Cultural Attaché, Ahmed Ben Khayal.
Commercial Attaché, Aiat Azzabi.

Libya, on the Mediterranean coast of Africa, is bounded on the East by Egypt and the Sudan, on the South by the Republics of Chad and Niger, and on the West by Algeria and Tunisia. It consists of the three provinces of Tripolitania, Cyrenaica and the Fezzan, with a combined area of approximately 810,000 square miles and a population estimated (1961) at 1,195,000. The people of Libya are principally Arab with some Berbers in the West and African negroes in the Fezzan, and there is a considerable Italian minority in Tripolitania. Islam is the official religion of Libya, but all religions are tolerated. The official language is Arabic.

Vast sand and rock deserts, almost completely barren, occupy the greater part of Libya. The Southern part of the country lies within the Sahara Desert. There are no rivers and, as rainfall is precarious, a good harvest is infrequent. Agriculture is confined mainly to the coastal areas of Tripolitania and Cyrenaica, where barley, wheat, olives, almonds, citrus fruits and dates are produced, and to the areas of the oases, many of which are well supplied with springs supporting small fertile areas. Among the important oases are Ghaghbab, Gadames, Jofra, Sebha, Murzuch, Brach, Gat, Jalo, Bir Hakim and the Kufra group in the South-East. Exports from Libya include crude oil, wool, cattle, sheep and horses, esparto grass, olive oil, sponges and hides and skins. Principal imports are foodstuffs, including sugar, tea and coffee and most constructional materials

and consumer goods. Twenty-two oil companies are prospecting in the country and two American companies, Esso and Oasis, have already found exploitable fields and several other companies have had promising strikes.

Exports of crude oil officially commenced on October 25, 1962, when H.M. King Idris opened the Esso pipeline at Mersa Breglia, a newly-constructed oil terminal. The pipeline connects Esso's Zelten field with the sea some 90 miles away. The U.S. Oasis Company has also constructed a pipeline from Dabra and Mahuk in Tripolitania to the sea at Ras-es-Sidre. Further plans include a pipeline from Waha (in Cyrenaica) to Dabra (Tripolitania). Oil production in Libya amounted to approximately 300,000 barrels a day in mid-1960—exports 125,000 barrels per day. B.P. discovered oil in their concession in Southern Cyrenaica during 1962 and by mid-year tested production was over 15,000 barrels a day from 3 wells.

The ancient ruins in Cyrenaica, at Cyrene, Ptolemais (Folmeta) and Apollonia, are outstanding, as are those at Leptis Magna near Homs, 70 miles from Tripoli and at Sabratha, 40 miles west of Tripoli. Recently an Italian expedition has found in the S.W. of the Fezzan a series of rock-paintings more than 3,000 years old which are technically in advance of any yet seen. The Museum in the Castello at Tripoli has been completely re-organized and is of great interest to visitors.

Communications in Libya are good in the coastal area, where a motor road runs from the Tunisian frontier through Tripoli to Benghazi, Tobruk and the Egyptian border, serving the needs of the main population centres. A road from the coast to Sebha, capital of the Fezzan, is nearing completion. Elsewhere roads are poor and the transport inland is confined to caravan and occasional motor bus routes. There are airports near Tripoli (Idris el Awal) and Benghazi (Bcmina) regularly used by commercial airlines, and military airfields at El Adem (near Tobruk, R.A.F.), and Wheelus Field, Mellaha (near Tripoli, U.S.A.A.F.).

Government.—Libya was occupied by Italy in 1911–12 in the course of the Italo-Turkish War, and under the Treaty of Ouchy (Oct., 1912) the sovereignty of the province was transferred by Turkey to Italy. In 1939 the four Provinces of Libya (Tripoli, Misurata, Benghazi and Derna) were incorporated in the national territory of Italy as *Libia Italiana*. After the Second World War Tripolitania and Cyrenaica were placed provisionally under British and the Fezzan under French administration, and in conformity with a resolution of the General Assembly on Nov. 21, 1949, Libya became on Dec. 24, 1951, the first independent state to be created by the United Nations.

Libya has a federal form of government and an hereditary monarchy. Government is by a two-chamber parliament. The Senate of 24 members, equally divided between the three Provinces, is nominated half by the King and half by the three Provincial Legislative Councils. The House of Representatives is an elected body at present consisting of 55 members, 35 from Tripolitania, 15 from Cyrenaica and 5 from the Fezzan. Members are elected on a basis of one for every 20,000 inhabitants provided that the number of members in any one of the three provinces shall not be less than 5, and elections of all members are to be held every four years. Legislation may be initiated by the King, the Senate or the House of Representatives, except laws concerning the Budget or taxation, which may not be introduced by the Senate.

The three Provinces of Tripolitania, Cyrenaica and the Fezzan are each administered by a Governor assisted by an Executive and a Legislative Council.

Currency.—Libya entered the Sterling Area on January 3, 1952, and a new currency was introduced on March 24, 1952. The £ Libyan is equal to the £ Sterling and is divided into 100 piastres and 1,000 millièmes. There are seven denominations of notes (£10, 5, 1, ½, and ¼, 10 piastres and 5 piastres) and five denominations of coins (1 and 2 piastres, 5, 2 and 1 millièmes).

Grants have been made by the United Kingdom, France, Italy and the United States to foster Libya's economic development and technical assistance is being provided by the United Nations and the United States.

A treaty of alliance and friendship between the United Kingdom and Libya, together with military and financial agreements, was signed at Benghazi on July 29, 1953. The United Kingdom will provide financial aid to Libya for 20 years. During the first five years £1,000,000 was paid annually for economic development, while from 1953–55 £2,750,000, in 1956 £3,000,000 and 1957 £3,250,000 was paid to the Libyan Budget. The figure for the second five-year period has been fixed at £3,250,000 for the Budget; the development aid from this source has ceased. Libya will make military facilities available to British troops (including the R.A.F.) which will be stationed in Libya under certain conditions. The United States Government is permitted under the terms of the United States–Libyan Base Rights Agreement of Oct. 30, 1954, to maintain armed forces and installations in Libya. A separate exchange of notes governs the financial assistance which the United States Government will provide for Libya's economic development during the period of this Agreement which runs until Dec. 24, 1970.

Trade with U.K.

	1960	1961
Imports from U.K.	£12,429,062	£12,231,433
Exports to U.K.	715,246	2,876,144

CAPITAL. Tripoli and Benghazi are the joint capitals of Libya. A new Federal capital is under construction at Beida in Cyrenaica, to which Ministers have now officially moved.

The principal towns with the latest available estimates of populations are Tripoli (170,000); Misurata (56,902); Benghazi (69,718); Homs-Cussabat (62,272); Derna (15,891); Barce (9,992); Tobruk (4,995); Sebha (7,298).

FLAG.—The Libyan National flag is a tricolour of red, black and green horizontal stripes, bearing a white crescent and star in the centre.

BRITISH EMBASSY IN LIBYA

LIECHTENSTEIN

(Fürstentum Liechtenstein)

Prince, Franz Josef II., b. Aug. 16, 1905; *suc.* Aug. 25, 1938; *married* March 7, 1943, Countess Gina von Wilczek.

A Principality on the Upper Rhine, between Vorarlberg (Austria) and Switzerland, with an area of 59.61 square miles and a population (census, Dec. 1960) of 16,495. The main industries are metal goods, cotton spinning and weaving, calculating machines, cameras, measuring instruments, coating of lenses, manufacture of vacuum apparatus, ceramics, artificial teeth and sausage casings, textiles, various apparatus, foodstuffs, leatherware and woodwork. The chief products are cotton yarn, cotton material, screws, bolts and bolt-shooting apparatus, needles, knitting machinery, ceramics, artificial teeth, precision measuring instruments, vacuum pumps, coated lenses, shoes, leather gloves, calculating machines, cameras, bed springs, conveyor belts, cooking ovens, boilers, preserves, damask cloth, socks and stockings, and furniture. Revenue (1961), *Swiss francs* 19,882,319. Expenditure (1961), *Swiss francs* 19,474,818.

Trade with U.K.

	1960	1961
Imports from U.K.....	£ 142,909	£161,836
Exports to U.K.....	1,694,380	697,080

The language of the Principality is German.

FLAG: Blue and Red (blue at the top, red at the bottom, with a gold crown in the blue part).

CAPITAL, Vaduz. Pop. (1960) 3,500.

British Consul-General, J. M. Walsh, C.M.G., O.B.E. (1962) (resides at 56 Dufourstrasse, Zürich, Switzerland).

LUXEMBURG

(Grand-Duché de Luxembourg)

Grand Duchess, H.R.H. Charlotte, G.C.V.O., born Jan. 23, 1896, succeeded (on the abdication of her sister) Jan. 9, 1919; married, Nov. 6, 1919, Prince Felix of Bourbon-Parma (H.R.H. the Prince of Luxembourg, K.B.E.). *Heir Apparent* (and since May, 1961, *Lieutenant-Representative* of the Grand Duchess), The Hereditary Grand Duke (Prince Jean), born Jan. 5, 1921, married, April 9, 1953, Princess Joséphine-Charlotte of Belgium, and has issue, Princess Marie Astrid, born Feb. 17, 1954; Prince Henri, born April 15, 1955; Prince Jean and Princess Margaretba (twin son and daughter), born May 15, 1957.

Prime Minister and Minister of Finance, M. Pierre Werner.

Deputy Prime Minister, Foreign Affairs, Defence, M. Eugène Schaus.

Labour, Social Security, Public Health, M. Emile Colling.

Public Works, Physical Education, M. Robert Schaffner.

Agriculture, Education, M. Emile Schaus.

Justice, Economic Affairs, Middle Classes, M. Paul Elvinger.

Interior, Transport, M. Pierre Grégoire.

EMBASSY IN LONDON

27 Wilton Crescent, S.W.1.

[Belgravia: 6961]

Ambassador Extraordinary and Plenipotentiary and Consul-General, His Excellency André J. Clasen (1955).

A Grand Duchy in Western Europe, bounded by Germany, Belgium, and France. Established as an independent State under the sovereignty of the King of the Netherlands as Grand Duke by the Congress of Vienna in 1815, it formed part of the Germanic Confederation, 1815-66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory. On the death of the King of the Netherlands in 1890 it

passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the beginning of the war in 1914, but was liberated in 1918. By the *Treaty of Versailles*, 1919, Germany renounced her former agreements with Luxemburg in respect of the customs union, etc., and in 1921 an economic union was made with Belgium (Belgolux). The Grand Duchy was again invaded and occupied by Germany on May 10, 1940. The constitution of the Grand Duchy was modified on April 28, 1948, and the stipulation of permanent neutrality was then abandoned. Luxemburg is now a fully effective member of the Western association of powers and a signatory of the Brussels and North Atlantic Treaties. She is also a member of the European Coal and Steel Community, the High Authority and Court of which have their seat in Luxemburg; of the European Economic Community and of "Euratom". Besides Belgolux, Luxemburg is also a member of the Belgium-Netherlands-Luxemburg Customs Union (Benelux).

The area is 1,000 square miles; the population (1960 census) 314,800, nearly all Roman Catholics. There is a Chamber of 52 Deputies, elected by universal adult suffrage for 5 years. Legislation is submitted to the Council of State. The Grand Duchy is rich in iron-ore and possesses an important iron and steel industry with an annual productive capacity of over 3,000,000 tons. The revenue for 1961 was estimated at *Francs* 5,763,391,000, expenditure *Francs* 5,871,955,000. The Luxemburg franc has at present the same value as the Belgian franc and the latter is legal tender in the Grand Duchy. Exchange Rate, 140 *Francs* = £1. There are approximately 260 miles of railway.

Trade with U.K.

	1960	1961
Imports from U.K.....	£ 312,563	£592,237
Exports to U.K.....	1,115,903	612,285

The capital, Luxemburg, pop. (1960), 71,653, is a dismantled fortress. The country is well wooded, with many deer and wild hoar. The language is Letzehergisch but French is the official language: all speak German and many English.

FLAG.—Three horizontal hands, red, white and blue.

MALGASY EMBASSY IN LONDON

33 Thurloe Square, S.W.7.

[Knightsbridge: 3714]

Ambassador, His Excellency Pierre Razafy-Andriamihaingo (1961).

Area 228,000 sq. miles. Population (1961), 5,487,000. Madagascar is 240 miles distant from the S.E. coast of Africa and is the fifth largest island in the world. It became a French protectorate in 1890. In 1896 the Hova dynasty was suppressed and the administration entrusted to a Governor General. Constitutional reforms were introduced in 1957, giving the island internal autonomy and Madagascar adopted republican status on Oct., 14,

1958, while remaining within the French Community. Complete independence was proclaimed on June 26, 1960, and immediately thereafter, the President of the Republic, M. Philibert Tsiranana, signed formal agreements with the French Government confirming Madagascar's continued membership of the French Community and establishing co-operation with the French Republic on defence, monetary, judicial and educational matters, etc.

Agriculture and cattle raising are the principal industries; minerals include graphite and mica. Total exports in 1961 were *Fr.* CFA 19,137,700,000 compared with *Fr.* CFA 18,489,400,000 in 1960. Principal exports in order of value during 1961 were coffee (29 per cent. of total exports), vanilla, rice, sugar, clove, rafia, tobacco, fresh meat, butter beans, sisal, groundnuts, pepper, mica and graphite. The main imports in 1961 (which totalled *Fr.* CFA 25,532,300,000, compared with *Fr.* CFA 27,657,200,000 in 1960) were textiles, transport equipment, metal goods, chemical products, food products and beverages, machinery and engineering equipment, clothing and shoes, petroleum products.

Trade with U.K.

	1960	1961
Imports from U.K.....	£595,729	£502,765
Exports to U.K.....	968,958	887,381

CAPITAL, Tananarive (240,000). Other towns are Ψ Tamatave (39,627), the chief port; Fianarantsoa (36,189); Ψ Majunga (34,119), the second port; Tuléar (33,843), and Diego Suarez (22,772).

The former dependencies of Madagascar in the Mozambique Channel, Juan de Nova, Europa Island and Bassas da India (uninhabited), are integral parts of the French Republic and, as such, are administered by the Ministry of Overseas Territories and Departments of the French Government. The Island of Saint-Marie, off the east coast of Madagascar is recognized as a dependency of the Malgasy Republic but its inhabitants are to enjoy dual (French/Malgasy) nationality.

FLAG.—Equal horizontal bands of red (above) and green, with vertical white band by staff.

BRITISH EMBASSY

19 Rue Amiral Pierre, Tananarive

(P.O. Box 167)

Ambassador Extraordinary and Plenipotentiary, His Excellency John Edmund Dudley Street. £3,415 1st Secretary and Consul, P. P. Caruana, M.B.E. Vice-Consul, M. Pitcher.

There is an Honorary British Vice-Consul at Tamatave.

MALI

(Republic of Mali)

President, Modibo Kéita.

The Republic of Mali, an inland state in north-west Africa, is bounded by Mauritania in the west, by Algeria in the north, by the Republic of Niger in the east and by the Voltaic Republic, Ivory Coast and Guinea in the south. It has an area of 582,437 square miles and the population was estimated at 4,100,000 in 1961.

Formerly the French colony of Sudan, the territory elected on Nov. 24, 1958, to remain as an autonomous republic within the French Community. It associated with Senegal in the Federation of Mali which was granted full independence on June 20, 1960. The Federation was effectively dissolved on August 22 by the secession of Senegal. Dissolution of the Federation was recognized by the Sudanese Republic and the title Republic of Mali was adopted on Sept. 22, 1960. The Republic is no longer a member of the French Community.

Trade with the United Kingdom in 1961 amounted to: Imports from U.K., £1,580,312; Exports £1,569,726. On July 1, 1962, a Mali franc equal in value to the Franc CFA was introduced and a new State bank of issue was set up.

CAPITAL.—Bamako (110,000).

FLAG.—Vertical stripes of green (by staff), yellow and red.

MEXICAN EMBASSY IN LONDON

48 Belgrave Square, S.W.1

[Belgravia: 4037]

Ambassador, His Excellency Señor Lic. Don Antonio Armendariz (1961).

Minister-Counsellor, Señor Don Gustavo Luders de Negri.

Counsellor, Señor Lic. Don Rubén González Sosa. 3rd Secretary, Señor Lic. Don. Raul Valenzuela Ezquerro.

Commercial Attaché, Señor Lic. Don Julio Faesler Carlisle.

Area and Population.—Mexico occupies the southern part of the continent of North America, with an extensive seahoard to both the Atlantic and Pacific Oceans, extending from 14° 33' to 32° 43' N. lat. and 86° 46' to 117° 08' W. long., and comprising one of the most varied zones in the world. It contains 29 states, 2 territories, and the federal district of Mexico, making in all 32 political divisions, covering an area of 758,000 square miles. Preliminary results of the Mexican General Census taken on June 8, 1960, showed a total population of 34,625,903.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of Lower California, with a mountainous surface, separated from the mainland by the Gulf of Lower California. The

Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltépetl ("El Pico de Orizaba") on the east. In February, 1913, a new volcano (*El Parícutin*) was in eruption about 250 miles from Mexico City and 20 miles from the town of Uruapan, but is no longer active. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 6,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 6,000 feet). The only considerable rivers are the *Río Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Río Grande de Santiago*, the *Río Balsas* and *Río Papaloapan*. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas." The largest fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), and *Pátzcuaro*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude, the rainy season lasting from June to October.

History and Archaeology.—The present Mexico and Guatemala were once the centre of a remarkable indigenous civilization, which had unknown beginnings in the centuries before Christ, flourished in the periods from 500 to 1100 A.D. and 1300 to 1500 A.D. and collapsed before the little army of Spanish adventurers under Hernán Cortés in the years following 1519. Pre-Columbian Mexico was divided between different but connected Indian cultures, each of which has left distinctive archaeological remains: the best-known of these are Chichén Itzá, Uxmal, Bonampak and Palenque, in the States of Yucatán and Chiapas (Maya); Teotihuacán, renowned for the Pyramid of the Sun (216 feet high) in the Valley of Mexico (Teotihuacano); Monte Albán and Mitla, near Oaxaca (Zapotec); El Tajín in the State of Vera Cruz (Totonac); and Tula in the State of Hidalgo (Toltec). The last and most famous Indian culture of all, the Aztec, based on Tenochtitlán, suffered more than the others from the Spaniards and only very few Aztec monuments remain.

A few years after the Conquest, the Spaniards built Mexico City on the ruins of Tenochtitlán, and appointed a Viceroy to rule their new dominions, which they called New Spain. The country was largely converted to Christianity, and a distinctive colonial civilization, representing a marriage of Indian and Spanish traditions, developed and flourished, notably in architecture and sculpture. In 1810 a revolt began against Spanish rule. This was finally successful in 1821, when a precarious independence was proclaimed. Friction with the United States in Texas led to war from 1845-48, at the end of which Mexico was forced to cede the northern provinces of Texas, California and New Mexico. In 1862 Mexican insolvency resulted in invasion by French forces which installed Maximilian as Emperor. The empire collapsed with the execution of the Emperor in 1867 and the austere reformer, Juárez, restored the republic. Juárez's death was followed by the dictatorship of Porfirio Díaz, which saw an enormous increase of foreign, particularly British and United States, investment in the country. In 1910 began the Mexican Revolution which reformed the social structure and the land system, curbed the power of foreign companies and ushered in the independent industrial Mexico of today.

Government.—Under the Constitution of Feb. 5, 1917 (as subsequently amended), Congress consists

of a Senate of 60 members, elected for six years, and of a Chamber of Deputies, at present numbering 178, elected for three years. Presidents, who wield full executive powers, are elected for six years; they cannot be re-elected.

There are five political parties registered in Mexico, of which by far the largest and most influential is the *Partido Revolucionario Institucional* (P.R.I.) which has for many years constituted the government party.

Communications.—Veracruz, Tampico and Coahuila are the chief ports on the Atlantic, and Guaymas, Mazatlán, Acapulco and Salina Cruz on the Pacific. Work is proceeding on two new ports, Matamoros on the Atlantic and Topolobampo on the Pacific. Registered merchant marine amounted at the end of 1960 to 316,630 gross tons, with 5,892 vessels (5 tons and over, 2,563; under 5 tons, 3,329). There were 23,654 kilometres of railway track open in Mexico in 1960. Work is proceeding on the reorganization, rehabilitation and re-equipment of the whole system: help in this has been forthcoming from the World Bank, the Export-Import Bank and private sources in the United States. Railway wagons are already manufactured in Mexico and it is possible that railway carriages will be manufactured before very long. Work is going ahead fast on a track between Chihuahua and Topolobampo to link north central Mexico with the Pacific.

The total length of road at the end of 1960 was 45,089 kilometres, of which 37,691 kilometres were usable in all weathers. Mexico City may be reached by at least three excellent roads from the United States, and work is continuing on roads southward from Mexico City to Yucatán and the Guatemalan border. These are already usable for all but the rainy season. The road between Durango and Mazatlán was opened in 1961.

At the end of 1960 the national telegraph system's lines were 180,910 kilometres in length. International telegraph services to the United States frontier are provided by the Government-owned Mexican Telegraph Company and then through the United States to Canada and Europe. Telephone communications are similar.

There is a good internal network of air services: commercial flights rose from 88,000 in 1958 to 102,000 in 1959. Distance covered in 1960 totalled 75,551 kilometres. Registered civil aircraft in 1960 numbered 714 (commercial, 114; private, 599). The principal international air services are from Mexico to New York, Vancouver, Toronto, Los Angeles, Chicago, Miami, Lima, Guatemala, direct; Mexico to Houston-Montreal-Amsterdam; Mexico to Panama-Caracas; and Mexico to Miami-Paris.

Production.—The total acreage of arable land is estimated at 60,000,000 acres, though only some 25,000,000 acres are considered arable without artificial irrigation. Approximately 13,000,000 acres are under cultivation and great efforts are being made to increase this area. Grazing land is estimated at 80,000,000 acres and about 50,000,000 acres are under forest. The principal agricultural crops are maize, beans, wheat, sugar cane, coffee, cotton, tomatoes, chili, tobacco, rice, chickpeas, groundnuts, sesame, alfalfa, vanilla, cocoa and many kinds of fruit, both tropical and temperate. The maguery, or Mexican cactus yields several fermented drinks, mezcál and tequila (distilled) and pulque (undistilled). Another species of the same plant supplies sisal-hemp (herequen). The forests abound in mahogany, rosewood, ebony and chicle trees.

In 1959 there were 21,561,000 head of cattle, 5,228,000 horses, 2,698,000 mules, 3,297,000

donkeys, 5,788,000 sheep, 10,620,000 goats 9,422,000 pigs and 127,067,000 poultry.

The principal industries (apart from agriculture) are mining and petroleum, but during recent years there has been very considerable expansion of both light and heavy industries, 80 per cent. of all consumer goods now being made in Mexico. Most of the remaining 20 per cent. is in fact made up of bulk imports of foodstuffs and motor vehicles for assembly, so that the true figure for local manufacture of consumer goods is nearer to 92 per cent. The steel industry has expanded rapidly and produced 1,682,106 tons of steel in 1961. The mineral wealth is great, but in recent years the low world market prices have caused a slump in the mining industry. The principal minerals are gold, silver, copper, lead, zinc, quick-silver, iron and sulphur. Substantial reserves of uranium have been found. Production in 1961 amounted to (kilograms): Gold, 8,357; Silver, 1,254,789; Copper, 49,314,448; Lead, 181,325,751; and Zinc, 268,972,931.

The total petroleum reserves were said to be over 4,787 m. U.S. barrels in 1960. Total production of crude oil and natural gasoline reached 108,772,000 barrels in 1960, against 106,000,000 in 1959. During 1959 and 1960 Petroleos Mexicanos, the nationalized oil industry, received large credits from various countries for the re-equipment of the industry and the development of the petro-chemical industry.

Woolen and cotton spinning and weaving, the making of footwear and clothing and of domestic appliances of all kinds have made such progress in recent years that all these industries are protected by high import duties and import licence restrictions.

An indication of the rapid industrial expansion of Mexico is that output of electricity increased from 4,423 million kWh in 1950 to 10,728 million kWh in 1961.

Defence.—The regular army has a strength of fifty infantry battalions, one infantry brigade and a Presidential Guard of three battalions, 21 cavalry regiments, a parachute battalion and a small number of artillery and engineer units. There is also a conscript army of about 250,000 men organized into National Service divisions, each 6,000–7,000 strong. The Navy has some 36 ships of all kinds and the Air Force some 160 aircraft.

Language and Literature.—Spanish is the official language of Mexico and is spoken by about 90 per cent. of the population. About 2,500,000 inhabitants speak Indian languages, but half of these speak Spanish as well. Of those speaking indigenous languages only about 30 per cent. speak Nahuatl, 9 per cent. Maya, 8 per cent. Zapotec, 7 per cent. Otomi and 10 per cent. Mixtec, the remainder speaking other varieties of the minor linguistic families. The National Library at the capital contains about 500,000 volumes. The Press of Mexico is in a flourishing condition with many daily newspapers in the capital and in other urban centres. The first printing press and the first regularly issued newspaper in the New World were established by the Spaniards in Mexico City.

Education.—Education is divided into primary, secondary and university. Primary education is free, secular and nominally compulsory. In 1960 there were 32,895 primary schools with almost 5,000,000 pupils, 1,065 secondary schools with 193,314 pupils, and 847 technical and commercial secondary schools with 168,098 pupils. The National University of Mexico was founded in 1533 and re-organized in 1910. There are 9 other Universities including one exclusively for women. The prevailing religion is Roman Catholic. In

1957, only 28 per cent. of the population above 6 years old were illiterate; while progress in reducing illiteracy has been steady over the last few years, it has barely kept pace with the rapidly increasing population.

	FINANCE	1962
Estimated revenue (<i>Budget</i>)...	<i>Pesos</i>	12,321,000,000
" expenditure (<i>do.</i>)..	"	12,320,000,000

Minister of State (vacant).

Secretary of State and Director of Prince's Household, M. Paul Noghès.

CONSULATE—GENERAL IN LONDON

4 Gray's Inn Square, W.C.1

[Chancery: 5323]

Consul-General, H. E. Cubitt.*Vice-Consul*, A. J. Hucker.

A small Principality on the Mediterranean, with land frontiers joining France at every point, and consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino. The Principality comprises a narrow strip of country about 2 miles long and half-a-mile broad (area approx. 360 acres), with (1956) 20,422 inhabitants (Monégasque nationals, 2,696), and a yearly average of over 650,000 visitors. The whole available ground is built over, so that there is no cultivation, though there are many public and private gardens. Monaco has a small harbour (20 ft. alongside quay), and the import duties are the same as in France. There is a Council of State of 13 members and a Council of Government composed of the Minister of State and three State Counsellors. There is a local police force of 160 men.

CAPITAL, Monaco-Ville.

FLAG.—Red and white.

BRITISH CONSULAR OFFICE

Monaco—*Consul-General*, A. Hermann.

MONGOLIA

(Mongolian People's Republic)

Prime Minister, Tse Den-hal (May, 1952).

Area and Population.—Mongolia is an almost entirely unsurveyed tract in Asia, bounded by the Siberian provinces of U.S.S.R. in the north, the Chinese province of Sinkiang and the Great Wall of China in the south, by Manchuria on the east and by the Tarbagatal Mountains and the Turkistan provinces of U.S.S.R. on the west.

The total area is estimated at 1,750,000 to 2,000,000 square miles with a total population (not yet enumerated) of 3,000,000 to 5,000,000, of whom the greater number are traditionally adherents of Lamaism, a form of Buddhism.

North-West Mongolia consists of an elevated plateau bounded by the Russian Altairange (N.W.), the Sayans (N.E.), the Kentei (S.E.), and the Ektag Altai (S.W.). The plateau contains many lakes and is watered by numerous rivers, among which are the headwaters of the Yenisei, the Irtsa and the Selenga. Agriculture is almost unknown, but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport animals (camels and oxen). The exports are wool, hides, skins, and gold.

The principal town of North-Western Mongolia is Ulan Bator (Ulan-Bator-Khoto, "Town of the Red Knight") which has an estimated population of 80,000 to 100,000; other centres are Uliassutai, and Kobdo of importance as trading posts on the main caravan routes. Part of North-Western Mongolia has been incorporated in the Soviet Union as the *Tannu Tuva* autonomous Province

which lies between the Sayan and Tannu Ola ranges, the capital being Kyzyl.

South-East and South Mongolia include the Gobi ("Desert"), or *Sha-mo* ("Saud Desert"), which covers nearly one-third of the total area, and in the extreme south-east the *Ordos* Desert, bounded on the south by the Great Wall of China, and encircled on the north by part of the main stream of the Hwangho river. Agriculture is carried on wherever Chinese influence has been exerted, but is mainly confined to the south-eastern borders. The principal industry (as in North-West Mongolia) is sheep and cattle raising and the breeding of camels, oxen and horses for transport, in order to supply the caravan routes from China to Siberia. The centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobi. Of recent years this trade has been organized and financed by Soviet Russia. The principal centres are: Kalgan, Kudukhoto, Kuku-erghi, Dolon-Nor and Birukhoto. In the north-east, Keru-lun (on the river of that name), is a junction of the southern routes from the Chinese province of Perchili and the western routes from Urga, in N.W. Mongolia.

Government.—In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kiakhta was recognized as an Autonomous Republic. Negotiations with Russia, after the 1917 revolution, led to an alliance, and by Treaty (May 31, 1924) the U.S.S.R. acknowledged the suzerainty of China over Outer Mongolia, but by the Russo-Chinese Treaty of Aug. 25, 1945, China recognized the complete independence of Outer Mongolia.

FLAG.—Vertical tricolour, red, blue, red and in the hoist magical symbols in gold.

MOROCCO

(Kingdom of Morocco)

King, H.M. King Hassan II, born July 9, 1929; acceded February 26, 1961, on the death of his father, King Mohammad V.

CHIEF MINISTERS

(May 8, 1961)

Prime Minister, Minister of Defence, Agriculture and Interior, H.M. King Hassan II.

Ministers of State, Allal Al Fassi (*Islamic Affairs*); Dr. Abdelkrim Al Khatib (*African Affairs*); Prince Fall Ould Oumair, Emir of Trarza (*Saharan and Mauritanian Affairs*).

Ministers of State without Portfolio, Mohammed Hassan Al Ouezzani; Rashid Mouline.

Minister of Foreign Affairs and personal representative of the King, Ahmad Balafrej.

Interior and Agriculture, Ahmad Rida Guedira.

Justice, Mohammad Boucetta.

National Economy and Finance, Mohammad Douiri.

Education, Dr. Yusef Bel Ahbes.

Coymerce, Industry, Mines and Merchant Marine, Dr.

Mohammed Benhima.

Ahmad Al Alaoui.

Public Health, Dr. Yusef Bel Ahbes.

Public Works, M. Driss Slaoui.

Posts and Telegraphs, Mohammed Abdeslam Al

Fassi.

Labour and Social Affairs, Abdelqadir Benjelloun.

Defence, Mahjoubi Aherdan.

MOROCCAN EMBASSY IN LONDON

66 Ennismore Gardens, S.W. 7.

[Knightsbridge: 8827]

Ambassador, Prince Moulay Hassan Ben El Mehdi.

Secretaries, Lem Fedel Bennouna; Mohamed Abderrahman El Alaoui; Abbes El Mokri; Abdelhaq Saadani.

Chancellor, Abdelhaq Lahlou.

Area and Population.—Morocco is situated in the north-western corner of the African continent between latitude $27^{\circ} 40' - 36^{\circ}$ N. and longitude $2^{\circ} - 11^{\circ}$ W. with an area estimated at approximately, 180,000 sq. miles, and a population (estimated 1961) of 11,626,000. It is traversed in the north by the Riff Mountains and in a general S.W. to N.E. direction, by the Middle Atlas, the High Atlas, the Anti-Atlas and the Sarrho ranges. The northern flanks of the Middle and High Atlas Mountains are well wooded but their southern slopes, exposed to the dry desert winds, are generally arid and desolate, as are the whole of the Anti-Atlas and Sarrho ranges. The north-westerly point of Morocco is the peninsula of Ceuta which is separated from the continent of Europe by the narrow strait of Gibraltar. The Jebel Mousa dominates the promontory and, with the rocky eminence of Gibraltar, was known to the ancients as the *Pillars of Hercules*, the western gateway of the Mediterranean.

Climate.—The climate of Morocco is generally good and healthy, especially on the Atlantic coasts, the country being partially sheltered by the Atlas mountains from the hot winds of the Sahara. The rainy season may last from November to April. The plains of the interior are intensely hot in summer. Average summer and winter temperatures for Rabat are 81° F. and 45° F.; for Marrakesh 101° F. and 40° F. respectively.

Administration.—The Treaty of Fez of 1912 provided for the establishment of a French Protectorate over Morocco, and France became responsible for the foreign relations of the Sultan and for the defence and administration of the country. The subsequent Franco-Spanish Treaty of 1912 provided for the establishment of a Spanish "sphere of influence" extending over northern Morocco with the exception of the Zone of Tangier. Ceuta and Melilla (see under Spain) are Spanish "State Territories." Ceuta, situated opposite Gibraltar, has been a Spanish possession since the close of the sixteenth century, and Melilla, further east on a rocky promontory of the Riff coast, has been a Spanish possession since 1492. The Penon (Rock) of Alhumas, Penon de Velez and the Zaffarin Islands are Spanish possessions.

Tangier, until 1960, enjoyed a special régime. Before the war of 1914-1918, negotiations between the British, French and Spanish Governments took place but the outbreak of the war prevented the proposed international régime for Tangier from being put into operation. A new Convention providing by the Tangier Statute for the international administration of the Tangier Zone was, however, signed by the three Governments at Paris on December 18, 1923. It was brought into force on June 1, 1925, and modified by a Protocol of July 25, 1928, by which Italy adhered to it. Under the Convention only native affairs were reserved to the Sheressian authority. In March, 1941, Spain suppressed the international administration, deposed the Sultan's representative in Tangier and substituted for him the Sultan's Khalifa in the Spanish Zone. In 1956 negotiations between the Moroccan Government and the Statutory Powers culminated in the Tangier Conference which sat in Tangier in October. This was followed by the grant of a Royal Charter on August 26, 1957, ensuring the continuation of a free monetary system and free trade in Tangier. These arrange-

ments ended on April 19, 1960, when the Zone was fully incorporated into Moroccan territory.

On August 20, 1953, Sidi Mohammed ben Youssef, Sultan of Morocco for 25 years, was de-throned, and exiled together with his family. Sidi ben Moulay Arafa was proclaimed Sultan in his stead but although a series of reforms was instituted as a progressive handing over of government to the Moroccans, the Nationalist movement increased rapidly and civil disturbances became serious. The insistent Moroccan desire for the return of their former Sultan led to the withdrawal in September, 1955, of Sultan Moulay Arafa. Mohammed ben Youssef was reinstated as Sultan and he returned to Morocco on November 16, 1955. The formation of a Moroccan Government quickly followed; negotiations with France which opened in February, 1956, culminated in a joint Franco-Moroccan declaration of March 2, 1956, which recognized Morocco's independence and sovereignty. Negotiations with the same end in view were then engaged with Spain, resulting in a similar joint declaration of April 7, 1956.

Following independence there has been a series of Governments, headed by prominent Moroccan political personalities. King Muhammad V took charge himself as Prime Minister on May 20, 1960, with his son, the Crown Prince Moulay Hassan, as his Deputy. At the same time the King announced that a Constitution would be enacted by the end of 1962, drawn up by a constitutional Council of 78 members who were appointed by the King later that year. King Muhammad died suddenly on February 26, 1961, and was succeeded by the Crown Prince, who took the style of King Hassan II. The King at first retained his father's Cabinet, but in June, 1961 formed a new Government in which all shades of opinion, other than the National Union of Popular Forces, were represented. This Government, with minor alterations, remains in office. King Hassan, in a speech in January, 1962, specifically confirmed that the constitution would be enacted by the end of that year as planned, and it was afterwards given out that an expert commission had been formed to draft it.

Defence.—In the protectorate era, the protecting powers were responsible for defence. Arrangements were completed during 1951 with France for the use of air bases in the Southern (former French) Zone by the U.S. Air Force. Bases were constructed at Nouaceur, Sidi Slimane and Benguerir, but in 1959 it was agreed that the U.S.A. would evacuate her forces by the end of 1963 and there followed a period of increasing pressure upon France and Spain to evacuate their forces also. France agreed to evacuate her land and sea forces by March 2, 1961, under an agreement signed on September 1, 1960, and subsequently agreed to the complete evacuation of all her forces by October, 1961. The Moroccan army, formed in 1956, is about 40,000 strong. A Moroccan air force was also formed in 1959 and a navy in 1960. The Soviet Union agreed in November, 1960, to supply Mig 15 and 17 jet aircraft for the Moroccan air force. 14 aircraft were delivered in February, 1961. They were accompanied by a party of technicians and instructors. The Moroccan Army also received in 1962 a consignment of Russian arms. The Army already possesses quantities of French and American equipment, including aircraft.

Production and Trade.—Morocco's main sources of wealth are agricultural and mineral. The construction of dams for irrigation and for electric power is an important factor in the country's development. Its industries are in the main ex-

tractive and such as rely on local raw materials. Importance is also attached to the tourist trade.

Among agricultural, forest and animal products in sufficient quantity for export are citrus fruits, early and canned vegetables, leguminous plants, esparto, vegetable fibre, cork, skins and hides, casings, raw wool, fish (preserved and canned). Livestock in 1961 included about 15,000,000 sheep, 7,000,000 goats, 3,000,000 horned cattle and smaller numbers of donkeys, camels, horses and pigs.

Morocco's leading mineral exports are phosphates, manganese, iron ore, lead and zinc. Other minerals produced include anthracite, petroleum, cobalt, graphite, copper, molybdenum, tin, antimony, ochre and gypsum. Production of phosphates reached 7,949,702 tons in 1961 of which 7,620,890 tons were exported. There is a small oil refinery at Sidi Kacem and a new one at Mohammedia, near Casablanca, which began to operate early in 1962. Production of crude oil in 1961 amounted to 80,000 tons.

Morocco's main import requirements are petroleum products, motor vehicles and tyres, building materials, fabrics, agricultural and other machinery, chemical products, clothing, householdware, sugar, green tea and other foodstuffs.

The trade of Morocco, which is chiefly with France and the *franc* area, the U.S.A., Germany, the United Kingdom and Italy, was valued in 1962 at: Imports, *DH* 2,257,381; Exports *DH* 1,731,312 (*dirham* (*DH*)=100 M. francs).

Trade with U.K.*

	1960	1961
Imports from U.K....	£4,927,740	£5,047,058
Exports to U.K....	13,819,187	12,753,121

* Excluding Tangier Province

There are British Chambers of Commerce at Casablanca (101 Boulevard Mohammed el Hansali) and at Tangier (Boite Postale 2142, Socco).

Finance and Currency.—A new unit of currency, the *dirham* (1 *DH*=M. francs 100) was introduced in October 1959, concurrently with the devaluation of the M. franc from M. francs 1.176=£1 to M. francs 1.416-8=£1. Future public accounting will be expressed in *dirhams*, the rate for which is thus: *DH* 14.168=£1.

The 1962 Ordinary Budget amounted to *DH* 1,820,000,000 and the Development Budget to *DH* 505,000,000.

Communications: Railways.—The railway runs south from Tangier to Sidi Kacem. From this junction, one line runs eastwards through Fez and Oujda to Algeria, and another continues southwards, through Rabat and Casablanca, to Marrakesh. A line running due South from Oujda skirts the Morocco-Algeria frontier and reaches Colomb-Bechar in Algeria, the beginning of the Mediterranean-Niger project. Moroccan railroads cover 1,092 miles and traction is electric or by diesel locomotives.

Roads.—In the former Southern Zone the road network is extensive (9,000 miles of road suitable for year-round traffic and some 20,000 miles of dry-season tracks). In the former Northern Zone an asphalt road links Tangier with Tetuan, branches north to Ceuta, and continues eastward through Villa San Jurjo to Mellila, and on to Oujda through Berkane. The new Route de l'Unité, connecting the road network of the former Northern Zone with the South, through Fez, was opened to traffic in 1962.

Tangier is distant from London about 1,200 miles or a matter of hours by air, 4 days by sea.

There are air services between Tangier and Gibraltar connecting with B.E.A. services to London. Air-France and Royal-Air-Maroc operate internal services and many between Morocco and towns in France and Spain. There are also regular services to other European countries and to Algeria, West Africa, Equatorial Africa and the Congolese Republic.

Language.—Arabic is the official language. Berber is the vernacular mainly in the mountain regions. French and Spanish are also spoken, mainly in the towns. The European population, about 500,000 in 1954, has since been much reduced by the departure of a large part of the French community. Three Arabic, five French and one Spanish newspapers are published daily.

Education.—There are government primary, secondary and technical schools. At Fez there is a theological university of great repute in the Moslem world. There is a secular university at Rabat. Schools for special denominations, Jewish and Catholic, are permitted and may receive government grants.

CAPITAL.— Ψ Rabat (population 227,445). On Jan. 2, 1962, it was decreed that Tangier (141,714) would be the summer capital of Morocco, the King and the Government residing there for two months each year from 1962. Tangier was on the same date declared a "free zone" primarily for commercial purposes. The other chief towns are: Ψ Casablanca (665,277); Marrakesh (243,134); Fez (216,133); Meknès (175,934); Oujda (128,645); Tetuan (101,352). Ψ Kenitra (86,000) was renamed Mina Hassan Tani (Port Hassan II) on July 9, 1962. The towns of Fez, Marrakesh and Meknès were capitals at various times in Morocco's past history.

FLAG.—Red, with green pentagram (the Seal of Solomon).

MUSCAT AND OMAN

(The Sultanate of Muscat and Oman)

Sultan, Saïd bin Taimur, born, Aug. 13, 1910, succeeded his father (as 13th of his dynasty to be Sultan of Muscat and Oman), Feb. 10, 1932.

The independent State of Muscat and Oman is situated at the easterly corner of Arabia. Its seaboard is nearly 1,000 miles long and extends from near Tibet on the west coast of the Musandam Peninsula round to Ras Darbat Ali, with the exception of the stretch between Dibba and Kalba on the east coast of the peninsula which belongs to the Trucial Shaikhdom of Sharjah. Ras Darbat Ali marks the boundary between the Sultanate and the territory of the Sultan of Qishn and Socotra, a Sultanate within the Aden Protectorate. The

Sultanate extends inland to the borders of the Rub'al Khali or "Empty Quarter" as the South-Eastern Arabian Desert is called. Physically, the Sultanate consists of 3 divisions, a coastal plain, a range of hills and a plateau. The coastal plain varies in width from 10 miles in the neighbourhood of Suwaiq to practically nothing in the vicinity of Matrah and Muscat towns, where the hills descend abruptly into the sea. The mountain range runs generally from north-west to south-east, reaching its greatest height in the Jebel Akhdar region where heights of over 9,000 feet occur. The hills are for the most part barren, but in the high area round Jebel Akhdar they are green and there is considerable cultivation. The plateau has an average height of 1,000 feet. With the exception of oases there is little or no cultivation. North-west of Muscat the coastal plain is known as the Batinah. It is fertile and prosperous, the date gardens extending for over 150 miles, Batinah dates (which ripen in the first half of July, well before the Basra dates) being famous for their flavour. The coast-line between Muscat and the province of Dhofar is barren and forbidding. The fertile province of Dhofar lies on the south-eastern coast of Arabia. Sugar cane is grown and cattle can be raised in this province, which is the only part of the Arabian peninsula to receive the benefit of the monsoon. Frankincense is also exported. Its principal town is Salalah on the coast, while Ψ Murbat is the port. Ψ *Gwadar*, situated on the Baluchistan coast, formerly belonged to the Sultanate, but was transferred to Pakistan on September 8, 1958.

The town of Muscat is the capital and seat of Government of the Sultanate of Muscat and Oman, although the Sultan himself has stayed in Salalah since 1958. Possessing a natural harbour, though exposed to the north-west wind (*Shumal*), and at one time a town of some commercial importance, it has lost most of its trade, which has been transferred to the adjacent town of Matrah. Matrah is the starting point for the trade routes into the interior. Other ports on the Gulf of Oman are Sohar, Khahurah and Sur. None, however, provides sheltered anchorage.

The area of the Sultanate has been estimated as about 82,000 square miles and the population as 550,000. The inhabitants are for the most part Arab, but there is a strong infusion of negro blood, especially along the coast. The inhabitants of the towns of Muscat (pop. 6,208) and Matrah (pop. 14,119) are mostly of Baluchi and Negro stock. The Baluchis have originally mostly migrated from Mekran and the Negroes from Zanzibar. There are few Arab residents in these two towns. In the valleys of the interior, as well as on the Batinah, date cultivation has reached a high level, and there are possibilities of agricultural development if the water supply were more certain. A Development Secretary was appointed in 1958, and under his control much progress has been made in agriculture, public health, education and roads. The inland tribes breed large numbers of camels, which are prized in Arabia for their quality. There are no industries of importance.

The only port of call for steamers is Ψ Muscat (one of the ports on the inland route between Bombay and Basra). 216 vessels of all nationalities with a total tonnage of 718,754 entered the port in the foreign trade of Muscat in 1961. The mail service between Muscat and Basra is once every two or three weeks in each direction. The G.P.O. London, operates the post office in Muscat. The postage stamps are ordinary British stamps surcharged with their value in Indian currency. Cable and Wireless, Ltd., operates the telegraph

office, and an automatic telephone service in Muscat and Matrah.

Inland transport is by pack animals. The towns of Muscat and Matrah are now connected by a fairly good concrete road and the concrete road from the airfield at Bait-al-Falaj to Matrah is almost complete. Outside the towns of Muscat and Matrah and the airfield there are only tracks ranging from good ones which have been cleared and graded to ravines containing large boulders or stretches of soft sand. Land Rovers and similar types of truck are the only vehicles which can be relied on. The Sultanate Development Department has completed 447 miles of motorable tracks so far.

In December, 1951, a new treaty of friendship, to remain in force for 15 years, was signed between the United Kingdom and the Sultanate of Muscat and Oman.

FINANCE.

Annual Revenue (estimated) £900,000

The common medium of exchange is the Maria Theresa dollar. On the coast the Indian Gulf rupee circulates, and is the official currency of the Sultanate, although not generally in use in the interior. There are also three denominations of copper coins, twenty, ten, and five, called "baizas." The normal rate of exchange is 170 baizas=1 M.T. dollar=Rs.3½ (approx.). The weights in use are one kiyas=the weight of six dollars or 5.9375 oz.; 24 kiyas=one Muscat maund; 10 maunds=one Farasala; 200 maunds=1 Bahar. Rice is sold by the bag, other cereals by the following measurement: 40 Pails=one Farrah; 20 Farrahs=one Khandi.

Trade with U.K.

	1960	1961
Imports from U.K.	£709,878	£1,109,953
Exports to U.K.	15,250	14,684

Commerce and Trade.—Trade is mainly with India, Pakistan and the Persian Gulf States. Imports for the year ended March 31, 1961, amounted to Rs.355 lakhs; export figures for the same period are not available but exports for the year ending March 31, 1958 amounted to Rs.92 lakhs. Chief imports for 1961 were: rice, Rs.71 lakhs; wheat and wheat flour, Rs.26 lakhs; sugar, Rs.14 lakhs; cement, Rs.8 lakhs; pumping equipment, Rs.6.7 lakhs; cigarettes and tobacco, Rs.5.2 lakhs.

CAPITAL, Ψ Muscat, population (estimated) 3,500.

12A, Kensington Palace Gardens, W.8

[Bayswater: 1594]

Ambassador, His Excellency Kali Prasad Upadhyay (1961).

1st Secretary, Bharat Raj Bhandary.

Military Attaché, Lt.-Col. S. P. Shah.

Nepal (area about 54,000 sq. miles; pop. (1961), 9,387,661) lies between India and Tibet on the slopes of the Himalayas, and includes Mt. Everest (29,002 ft.). Amid the mountains lie many fertile

valleys. The lower hills and Terai Plains are covered with jungle, in which wild animals abound. Rice, wheat, maize, etc., are grown. Katmandu, the capital, is connected with India by a road, the mountain section of which was built by India under the Colombo Plan.

Nepal exports rice and other grains, hides, oil-seeds, *ghi*, cattle, jute, large quantities of timber, &c., and imports cotton goods and yarn, sugar, salt, spices, petrol, metals, &c. Nepalese imports from U.K. were valued at £92,088 in 1960 and £93,682 in 1961. The revenue, realized chiefly from land rent, forests, customs, &c., is approximately £5,500,000. A State Bank was inaugurated on April 26, 1956, to issue bank notes, regulate the Nepalese currency, fix foreign exchange rates and help in the preparation of a national budget.

The inhabitants are of mixed stock with Mongolian characteristics prevailing in the north and Indian in the south, and their religions are Buddhism and Hinduism. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha or Gurkha, became predominant in 1768. During the 1914-18 and the 1939-45 wars, the Nepalese Government rendered unstinted and unconditional assistance to the British Government.

From the middle of the nineteenth century, Nepal was ruled by the Rana family which provided the hereditary prime ministers of the country. After the Second World War, a revolutionary movement in 1950 and 1951 achieved the aim of restoring to the monarchy the powers which it had lost 104 years before and of breaking the hereditary power of the Ranas. After ten years, during which various parties and individuals tried their hand at government, King Mahendra resumed direct powers on December 15, 1960, with the object of leading a united country to basic democracy.

CAPITAL.—Katmandu, population (1961) 122,507.

FLAG.—Double-peaked standard of red with blue border on peaks; white moon with rays and human face in centre of top peak; white quarter sun, recumbent in centre of bottom peak.

Consul-General, N. Brat.

Consul, A. G. Jonker.

Area and Population.—The Kingdom of the Netherlands is a maritime country of Western Europe, situated on the North Sea, in lat. 50° 46'–53° 34' N. and long. 3° 22'–7° 14' E., consisting of 11 provinces plus the North-East Polder (reclaimed part of the Zuider Zee) and containing a total area of 34,830 sq. kms. The population on Jan. 1, 1962, was 11,721,511. The live birth-rate in 1961–62 was 21.2 per 1,000 of the population, and the death-rate 7.6.

The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Scheldt. The chief agricultural products are potatoes, sugar beet, cattle, horses, swine, butter, wheat, rye, barley, oats, beans, peas, flax-seed, cheese, poultry, eggs, vegetables, fruit and flower bulbs and there is an important fishing industry. Among the principal industries are engineering, motors, shipbuilding, iron and steel, incandescent lamps, radio, electrical and telecommunications equipment, cotton, woollen, linen and rayon spinning and weaving, earthenware, glass, leather goods, boots and shoes, chemical and pharmaceutical products, oils, paper and board, cigars, sugar, "genever" liqueurs, beer, clothing, bicycles, tyres and rubber products. Production of coal (1961) was 12,620,968 metric tons; oil, 2,046,490 metric tons; and steel, 1,970,600 metric tons. Diamond-cutting, though still an important industry, has declined considerably in importance, now employing about 655 hands, compared with about 3,500 before the war.

Government.—In 1815 the Netherlands became a constitutional Kingdom under King William I., a Prince of Orange-Nassau, a descendant of the house which has taken a leading part in the destiny of the nation since the 16th century. The States-General comprise the *Eerste Kamer* (First Chamber) of 75 members, elected for 6 years by the Provincial Diets; and the *Tweede Kamer* (Second Chamber) of 150 members, elected for 4 years by men and women voters of 23 years and upwards. Members of the *Tweede Kamer* are paid.

General elections were held on March 12, 1959, for the Second Chamber of the States-General. Party representation (after the increase in the Chamber's membership of Nov. 6, 1956) now stands at Catholic People's Party 49; Labour Party, 48; Liberal, 19; Anti-Revolutionary, 14; Christian Historical Union, 12; Communists, 3; Pacifist Socialists, 2; Political Reformers, 3. The present Cabinet was formed on May 19, 1959, after an interregnum of four months.

The Upper House of the States General was elected by the Provincial Councils after the General Elections. Representation (after the increase in the Chamber's membership of Nov. 6, 1956) is: Catholic People's Party, 25; Labour Party, 22; Anti-Revolutionary Party, 8; Christian Historical Union, 8; Party of Freedom and Democracy, 7; Communist, 4; Political Reformers Party, 1.

Defence.—The post-war army is a component part of the North Atlantic Treaty Organization. The Royal Netherlands Navy is being built up to a modern force of one aircraft carrier, 2 heavy cruisers, 12 modern destroyers and 6 submarines, supported by an escort force of 24 frigates and a considerable number of ancillary vessels. The Air Force, which since 1953 has been independent of the Army with the title "Royal Netherlands Air Force," has been reconstituted since the war, and now forms an integral part of the air defences of the N.A.T.O. countries. After a period of reorganization and expansion it has now attained a considerable strength consisting mainly of jet-fighters which are divided between an air defence and a tactical air command. Part of the latter is integrated into a N.A.T.O. tactical air force.

Language and Literature.—Dutch is a West-Germanic language of Saxon origin, closely akin to Old English and Low German. It is spoken in the Netherlands and the northern part of Belgium. It is also used by many people in the Netherlands West Indies, Afrikaans, one of the two South African languages, has Dutch as its origin, but differs from it in grammar and pronunciation. There are ten national papers, four of which are morning papers, and there are many regional daily papers.

Education.—Illiteracy is practically non-existent. Primary and secondary education is given in both denominational and State schools, the denominational schools being eligible for State assistance on equal terms with the State schools. Attendance at primary school is compulsory. Secondary schools for working classes are numerous, well equipped and well attended. The principal Universities are at Amsterdam, Groningen, Leiden, Nijmegen (R.C.), and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (economics), Wageningen (agriculture), Tilburg (R.C.) (commercial) and Eindhoven (polytechnic) (opened in Sept. 1957).

Communications.—The total extent of navigable rivers is 4,232 miles (large rivers comprising 696 miles) and of main roads approximately 4,720 miles. On Dec. 1, 1961, the total length of the railway system amounted to 2,019 miles, of

which 1,009 miles were electrified. The mercantile marine on July 1, 1961, consisted of 1,894 ships of total 4,910,000 gross registered tons, including vessels registered in the Netherlands Antilles and Surinam, but excluding tugs and contractors' equipment. The total length of air routes covered by K.L.M. (Royal Dutch Airlines) in the summer of 1961 was 167,670 miles.

TRADE

During 1961, the European Economic Community, as established by the Treaty of Rome in 1957, between France, Germany, Italy and the Benelux countries, continued to reduce internal tariffs. More progress was made than had been planned in the original Treaty, with the result that duties were down by 40 per cent. by mid-1962. External tariffs rose correspondingly, but with practically complete liberalization, imports into the Netherlands rose in 1961. In conformity with the Treaty, the Netherlands is reducing customs duties on imports from France, West Germany and Italy. The Netherlands does not impose duties on Belgium and Luxembourg with which countries she is already in association in the Benelux Customs union.

Since the level of the Benelux tariff was below that of the other three members of the EEC, Netherlands duties on imports from countries outside the Community are in most cases being increased towards the projected final level for the Community as a whole. The Netherlands imposes very few quantitative restrictions on imports.

The rate of overall production in the Netherlands rose from 157 to 159 in 1961 and that of production per worker fell from 140 to 138 (1953 = 100).

In 1961 Dutch imports amounted to Fl. 18,652,000,000 and exports to Fl. 15,712,000,000 so that imports were covered by exports to the extent of 84 per cent.

BRITISH CONSUL

Representative, H. G. Wayment, 343 Keizers-
gracht, Amsterdam.

OVERSEAS TERRITORIES

I. *Netherlands New Guinea*.—

The territory of Netherlands New Guinea (estimated population 1960, 736,731), comprises the western half of the island of New Guinea. Mount Wilhelmia is the highest point in Oceania.

It was decided at the Round Table Conference between Holland and Indonesia that the future status of New Guinea would be decided by negotiation between the two parties within a year of the transfer of sovereignty to Indonesia on December 27, 1949. A joint Dutch-Indonesian Commission was formed to investigate the facts of the case, and reported back to the two Governments in 1950. The future of West New Guinea was not settled until 1962, when the Netherlands Government agreed to transfer sovereignty to the Government of Indonesia, after an interim period of 10 months' control by the United Nations. The territory is known to Indonesia as West Irian.

II. *Netherlands West Indies*.—"Nederlandsch West-Indië" comprise *Surinam* (Dutch Guiana) in South America, and certain islands in the West Indies known as the Netherlands Antilles (Curacao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba). The area of Surinam is about 54,000 sq. miles, with a population in 1959 of about 302,372; area of Netherlands Antilles, 394.1 sq. miles, with a population of 187,041 at January 1, 1961. Under the Realm Statute which took effect on December 29, 1954, Surinam and the Netherlands Antilles received autonomy in domestic affairs, as parts of the Netherlands Realm under the Crown. Agreement on their new status was reached after prolonged negotiations between the Netherlands Government and representatives of the territories concerned. Bauxite is an important export of Surinam. The Netherlands Antilles has a considerable trade with the United Kingdom:

Trade with U.K.

	1960	1961
<i>Netherlands Antilles</i>		
Imports from U.K.....	£7,538,613	£5,151,665
Exports to U.K.....	22,651,537	22,169,037

	1960	1961
<i>Surinam</i>		
Imports from U.K.....	£1,603,815	£1,514,053
Exports to U.K.....	39,150	92,434

The administrative capital of Surinam is *Paramaribo* (population, 1952, 86,400); the capital of Curacao is *Ψ Willemstad* (pop. 45,000) of Aruba,*Ψ Oranjestad*; of Bonaire, *Ψ Kralendijk*; of St. Martin, *Philipsburg*; of St. Eustatius, *St. Eustatius*, *Oranjestad*; and of Saba, *Bottom*. *Governor of Netherlands Antilles*, Dr. A. B. Speckenbrink.

NICARAGUA

(República de Nicaragua)

President, Col. Luis Somoza, re elected Feb. 2, 1957.
Foreign Affairs, Dr. Rene Schick.

NICARAGUAN EMBASSY IN LONDON

Flat G, 48 Berkeley Square, W.1
[Grosvenor: 5324]*Ambassador*, His Excellency Señor Dr. Don Alejandro Montiel Argüello (1961).*Area and Population*.—Nicaragua is the largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situated between 9° 45'–15° N. lat. and 83° 40'–87° 38' W. long., containing an area of 57,145 English square miles and a population (1960 estimate) of 1,474,549, of whom about three-quarters are of mixed blood. Another 15 per cent. are white, mostly of pure Spanish descent, and the remaining 10 per cent. are Indians or negroes. The latter group includes the Mosquitos, who live on the Atlantic Coast and were formerly under British protection.*Government*.—The eastern coast of Nicaragua was touched by Columbus in 1502, and in 1519 was overrun by Spanish forces under Davila, and formed part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution took effect on May 1, 1951. The President is elected by direct suffrage for six years. Congress comprises a Senate of 16 members (together with ex-Presidents of the Republic) and a Chamber of Deputies of 42 members.*Agriculture and Industry*.—The country is mainly agricultural. The major crops are coffee, cotton, sesame, sugar, rice and maize. Bananas, beans, cocoa and ipecacuanha are also important. Live-stock and timber production, already considerable, are capable of unlimited expansion. Nicaragua possesses deposits of gold and silver, both of which are mined and exported by United States and Canadian concessionaires.*Communications*.—There are 270 miles of railway, all on the Pacific side, 3,159 miles of telegraph and 3,721 miles of telephone and there are several powerful wireless stations and a television station at Managua. An automatic telephone system has been installed in the capital. Transportation, except on the Pacific slope, is still attended with difficulty but many new roads have either been opened or are under construction. The Inter-American Highway runs from the Honduras frontier in the north to the Costa Rican border in the south; the interoceanic highway, running laterally from Corinto on the Pacific coast to Rama, whence there is a natural waterway to Bluefields on the Atlantic, is progressing and admits of a through passage in dry weather.*Language and Literature*.—The official language of the country is Spanish. In 1961 there were 5 daily newspapers published at Managua, and 4 in the provinces. Education is backward, at least 60 per cent. of the population being illiterate. There are universities at León and Managua.

NIGER

(Republic of Niger)

President, Minister for Foreign Affairs and Minister of National Defence, Hamani Diori, elected for five years, November 9, 1960.

President, National Assembly, Boubou Hama.

Situated in West Central Africa, between 12° and 24° N. and 0° and 16° E., Niger has common boundaries with Algeria and Libya in the north, Chad in the east, Nigeria and Dahomey in the south, and Mali and the Voltaic Republic in the west. It has an area of about 484,000 square miles with a population estimated in 1961 at 2,870,000. Apart from a small region along the Niger Valley in the south-west near the capital the country is entirely savannah or desert. The main races in Niger are the Haussas in the east, the Djermas in the south-west and the nomadic Touaregs in the north.

The first French expedition arrived in 1891 and the country was fully occupied by 1914. It decided on December 18, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 3, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, defence, etc., were signed in Paris on April 24, 1961.

The constitution of Niger, adopted on November 8, 1960, provides for a presidential system of government, modelled on that of the United States and the French Fifth Republic, and a single Chamber National Assembly, whose life was extended under the terms of the constitution for a further period of five years. Niger is a member of the *Conseil de l'Entente* (see Ivory Coast). The official language is French.

Finance and Trade.—Revenue in 1961 totalled francs CFA 5,069,100,000 and expenditure francs CFA 5,636,000,000 (provisional figures). Total value of trade in 1960 was: Imports, francs CFA 3,439,105,000; Exports, francs CFA 3,108,107,000. Trade of the Republic with U.K. in 1961 was valued at: Imports, £125,787; Exports to U.K., £27,679. The currency of Niger is the *Franc*

CFA (50 francs CFA = 1 French N.F.). Cattle-rearing and the cultivation of groundnuts are the main industries and provide the two main exports.

CAPITAL.—Niamey (30,200).

FLAG.—Three horizontal stripes, orange, white and green with an orange disc in the middle of the white stripe.

BRITISH AMBASSADOR (see Ivory Coast).

NORWAY

(Norge)

King, Olav V, K.G., G.C.B., b. July 2, 1903; *succeeded*, Sept. 21, 1957, on death of his father King Haakon VII, *married* March 21, 1929, Princess Märtha of Sweden (born March 29, 1901; *died* April 5, 1954); having issue, Harald (see below) and two daughters.

Heir-Apparent, H.R.H. Prince Harald, b. Feb. 21, 1937.

CABINET

Consulate-General, 42 Lancaster Gate, W.2.

Consul-General, G. F. C. Collin.

Consul, A. A. Bouston.

Vice-Consul, A. Petersen.

Area and Population.—Norway ("The Northern Way"), a kingdom in the northern and western portion of the Scandinavian peninsula, was founded in 872. It is 1,752 km. in length, its greatest width about 430 km. The length of the coastline is 2,650 km., and the frontier between Norway and

the neighbouring countries is 2,555 km. (Sweden 1,643 km., Finland 716 km. and U.S.S.R. 196 km.). It is divided into 20 counties (*fylker*) and comprises an area of 323,917 sq. km. with a population (1959) of 3,572,000. In 1958 there were 62,985 births (17.9 per 1,000 inhabitants), 31,645 deaths (9.0 per 1,000) and 23,931 marriages (6.8 per 1,000); the infant mortality rate in 1958 was 20.0 per 1,000 live births.

The Norwegian coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. At the North Cape the sun does not appear to set from the second week in May to the last week in July, causing the phenomenon known as the *Midnight Sun*; conversely, there is no apparent sunrise from about Nov. 18 to Jan. 23. During the long winter nights are seen the multiple coloured *Northern Lights* or *Aurora Borealis*, which have a maximum intensity in a line crossing North America from Alaska to Labrador and Northern Europe to the Arctic coast and Siberia. A similar phenomenon occurs in the Antarctic and is known as *Aurora Australis*.

Production.—The cultivated area is about one-fourth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

The *Gulf Stream* pours from 140 to 170 million cubic feet of warm water per second into the sea around Norway and causes the temperature to be higher than the average for the latitude. It brings shoals of herring and cod into the fishing grounds and causes a warm current of air over the west coast, making it possible to cultivate potatoes and barley in latitudes which in other countries are perpetually frozen.

The chief industries are agriculture and forestry, mining, manufactures, fisheries, whaling and shipping. The most recent figures showed that 34 per cent. of the population lived on industry, 22 per cent. on agriculture and forestry, 9 per cent. on trading, 9 per cent. on transport and communications and 6 per cent. on fishery and whaling. Manufactures are aided by great resources of water power, estimated at 12,500,000 kw. at 75 per cent. efficiency, of which over 3,200,000 kw. are utilized. In normal years the quantity of fish caught by Norwegian fishing vessels is greater than that of any other European country except U.S.S.R. In 1958 the total catch amounted to 1,370,000 metric tons. Whale oil production, chiefly from pelagic whaling in the Antarctic, was 863,000 barrels in 1959.

Government.—From 1397 to 1814 Norway was united with Denmark, and from Nov. 4, 1814, with Sweden under a personal union which was dissolved on June 7, 1905, when Norway regained complete independence. Under the constitution of May 17, 1814, the *Storting* (Parliament) itself elects one-quarter of its members to constitute the *Lagting* (Upper Chamber), the other three-quarters forming the *Odelsting* (Lower Chamber). Legislative questions alone are dealt with by both parts in separate sittings.

On April 8-9, 1940, Germany invaded Norway, and it was not until June 7, 1945, that the late King Haakon was able to return from Great Britain to Oslo.

Defence.—Norway is a member of the North Atlantic Treaty Organization, and the Headquarters of Allied Forces, Northern Europe, is situated near Oslo. Extensive reorganization of the Norwegian armed forces is in progress. Compulsory national

service lasts 18 months in the navy and air force and 16 months in the Army.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo (opened in 1811) was attended by 5,261 students and the University of Bergen (opened in 1948) by 929 students in 1959. The State Institute of Technology in Trondheim possesses University status and awards degrees in engineering and architecture. In 1959 it was attended by 1,433 students.

Language and Literature.—Norwegian is one of the Scandinavian languages and is the language of the mainland and of Svalbard. Old Norse literature is among the most ancient (and the richest) in Europe. Modern Norwegian became formed in the time of the Reformation and Ludvig Holberg (1684-1754) is regarded as the founder of Norwegian literature, although modern Norwegian literature dates from the establishment of a national university at Christiania (Oslo) in 1811 and with the writings of Wergeland (1805-1845). Some of the famous names are Henrik Ibsen (1828-1906) the dramatist, Bjørnstjerne Bjørnson (1832-1910) journalist, dramatist and novelist and Nobel Prize-winner in 1903, Jonas Lie (1833-1908) novelist, Knut Hamsun (1859-1952) novelist and Nobel Prize-winner in 1920, and Sigrid Undset (1882-1949), champion of Norwegian womanhood and herself a Nobel Prize-winner in 1928. In 1958 there were 87 daily newspapers in the country with a total circulation of 1,298,000, and 90 newspapers publishing on two or three days a week with a total circulation of 335,000.

Communications.—The total length of railways open in 1959 was 4,492 km., of which 77 were private lines. The final section of the Nordland Railway from Mo i Rana to Bodø, 60 miles north of the Arctic Circle, was completed in 1962 and opened on June 7 by King Olav. The length of telegraph and telephone lines in 1959 was 86,110 km. (State, 79,956) with 3,584,000 km. of wire (State, 3,369,000). At the end of 1959 a total of 462,863 road motor vehicles were registered, of which 192,377 were passenger cars (including taxis) and 151,516 were motor cycles.

Civil Aviation.—On scheduled airlines operated by Scandinavian Airlines System (SAS) on behalf of Det Norske Luftfartsselskap (DNL), by Braathens South American and Far East Airtransport (SAFE), and by Widerøes Flyveselskap A.S. in 1959:—kilometres flown, 19,436,000; passengers carried, 577,790.

Mercantile Marine.—The Mercantile Marine, Jan. 1, 1960, consisted of 2,209 vessels of 10,486,000 gross tons (vessels above 100 gross tons, excluding fishing boats, floating whaling factories, tugs, salvage vessels, icebreakers and similar types of vessel). The fleet ranks fourth among the merchant navies of the world.

SVALBARD

(Spitsbergen and Bear Island)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitsbergen ("Pointed Mountain") Archipelago was recognized by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway. In September, 1941, Allied forces (British, Canadian and Norwegian) landed on the main island. After destruction of the accumulated stocks of coal and dismantlement of mining machinery and the wireless installation, the Norwegian inhabitants (about 600) were evacuated to a British port and the Russians (about 1,500) to the U.S.S.R. After the war the Norwegian mining plants were rebuilt. In 1956 the production of coal, the chief mineral of the archipelago, was 390,000 tons.

The Svalbard Archipelago lies between 74°–81° N. lat. and between 10°–35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge

Islands, separated from the mainland by Stor Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group. In addition to those engaged in coal-mining, the archipelago is also visited by hunters for seal, foxes and polar bears.

South Cape is 360 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsö, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsö to Green Harcour 2½ to 3 days; from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean (70° 49'—71° 9' N. lat. and 7° 53' 9" 5' W. long.) was joined to Norway by law of Feb. 27, 1930.

Norwegian Antarctic

BOUVET ISLAND (54° 26' S. lat. and 3° 24' E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER THE FIRST ISLAND (68° 50' S. lat. and 00° 35' W. long.), was declared a dependency of Norway by resolution of Government, May 1, 1931.

PRINCESS RAGNILD LAND (from 70° 30' to 66° 40' S. lat. and 24° 15' to 33° 30' E. long.) has been claimed as Norwegian since Feb. 17, 1931.

QUEEN MAUD LAND.—On Jan. 14, 1939, the Norwegian Government declared the area between 20° W. and 45° E., adjacent to Australian Antarctica, to be Norwegian territory.

Consul-General (London), Señor Belgica Q. de Ortiz.

Consul-General (Liverpool), Señora Carmen Lara de Paniza.

There are Consular Offices of the Republic at Newcastle, Glasgow and Birmingham.

Panama on the isthmus of that name which connects N. and S. America, was formerly one of the nine Departments of Colombia. After a revolt (Nov. 3, 1903) it declared its independence and established a separate Government, with a single chamber legislature elected every four years and now consisting of 53 elected members. The area of the Republic is 31,890 sq. m., the population, according to preliminary figures of the 1960 census, was 1,067,766. The birth rate in 1959 was 40.8 and the death rate 9.1 per thousand. The soil is extremely fertile, but nearly one-half of the land is uncultivated. The chief crops are bananas, coconuts, cacao, coffee and cereals. The shrimping industry plays an important rôle in the Panamanian economy. A railway 47 miles in length joins the Atlantic and Pacific oceans.

* Boundaries extended, January 1, 1958.

Education is compulsory and free from 7 to 15 years. In 1960-61 there were 1,215 official primary schools and 83 private primary schools; 27 official secondary and 100 private secondary schools. Primary students numbered 161,800 in 1960-61; secondary students, 38,874. There were 7,534 students at Panama University.

Language and Literature.—The official language is Spanish. There are 8 daily newspapers published in the capital, 2 of which print editions in English. There is also one English and one Spanish weekly newspaper.

PARAGUAYAN EMBASSY IN LONDON

51B Cornwall Gardens, S.W.7

[Western: 1253]

Ambassador in London, His Excellency Dr. Ramiro Recalde de Vargas (1960).

Consul-General, Sr. Oscar Barrios Arce.

There are Paraguayan Consulates in *London* and *Liverpool*.

Area and Population.—Paraguay is an inland sub-tropical State of South America, situate between Argentina, Bolivia and Brazil. The area is computed at 157,000 square miles, with an estimated population of 1,700,000.

Paraguay proper consists of a series of plains, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draught. Many of the tributary streams arc also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asunción; but is liable to shrink unduly with drought. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills arc covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Ncembucu," or "endless," is drained by *Lake Ypoa*, a large lagoon, south-east of the capital. The *Chaco*, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, formed the subject of a long-standing dispute with that country and led to war between Paraguay and Bolivia from 1932 to 1935. The Chaco is practically a dead level, though a slight and uniform rise westward is now known to exist; it suffers much from floods and still more from drought.

Government.—Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain.

The Senate was abolished under the constitution adopted in 1940 and replaced by a Council of State nominated by the government. The Chamber of Representatives comprises 40 members. In 1954 women were accorded civil rights.

Production.—About three-quarters of the population are engaged in agricultural and pastoral pursuits, cattle breeding being the principal industry. In addition to canned meat, timber, quebracho extract, cotton, hides, *yerba mate*, tobacco, and *petit grain* essence (which are the principal exports), manioca, sugar, maize, rice, citrus fruits and edible oils are also produced for home consumption. Grac fruit is now exported. The production of rice, wheat and ground nuts is being encouraged by the government. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad.

Communications.—A railway, 985 miles in length, connects Asunción with Buenos Aires. The journey takes 55 hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and Asunción (3 to 5 days). Direct shipping services operate frequently between Hamburg, Antwerp, Amsterdam and Asunción, and monthly between Liverpool, London and Asunción. A shipping service from New York was started early in 1955. Five airlines operate services from Asunción. *Aerolíneas Argentinas* operates a daily service between Asunción and Buenos Aires calling at Corrientes and Rosario. *Braviff* (American) has a twice weekly service, through Asunción, from Buenos Aires to New York (calling also at Lima and La Paz). *Pan American Airways* have a weekly flight through Asunción between Buenos Aires and New York via Caracas, while their subsidiary company, *Panair do Brasil*, operates weekly services to Rio de Janeiro (via São Paulo) and to Santiago. *Varig/Real* (Brazilian) maintains three flights a week to Rio de Janeiro with calls at Foz do Iguazu, Curitiba and São Paulo. *Pluna* (Uruguayan) carries on a twice weekly service to Montevideo and Buenos Aires. *Lapsa* (*Lloyd Aero Paraguayo S.A.*) operates a weekly service to Curitiba, São Paulo and Rio de Janeiro, and also to Montevideo.

There are about 100 miles of asphalted roads in Paraguay, and about 200 miles of earth roads in fairly good condition. Bus services connect the principal towns.

Defence.—There is a permanent military force of about 8,000 all ranks. Two gunboats and a number of torpedo boats patrol inland waters.

Language and Literature.—The language of the country is Guarani (the idiom of the most advanced tribe of Indian inhabitants with whom the Spanish explorers formed an alliance) but Spanish is spoken in the larger towns. Four daily newspapers are published in Asunción.

Education.—Primary education is free and compulsory. There are a few secondary and special schools and a national university with close on 1,000 students.

Area and Population.—Persia comprises an area of 628,000 sq. miles, with a population estimated at 21,000,000 in January, 1962. It is mostly an arid table-land, encircled, except on the east, by mountains, the highest in the north rising to 28,700 ft. The central and eastern portion is a vast salt desert.

* On Oct. 26, 1949, it was announced that foreigners might henceforth use the name Persia.
£3,415

The Persians are mostly Shi'ah Moslems but among them are a few hundred thousand Zoroastrians, Bahals, Sunni Moslems and Armenian Christians. There is also a substantial Jewish community. Civil and Penal codes based on those of France and Switzerland are in force.

Government.—Persia was ruled from the end of the 18th century by Shahs of the Qajar Dynasty, with despotic power, subject only to the influence of interpreters of the sacred law. A nationalist movement became active in Dec., 1905, and in Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. After the war of 1914-18, the subsequent troubles and the signature of the Soviet-Persian Treaty of 1921, a vigorous Prime Minister, Reza Khan, formerly an officer of the Persian Cossack Regiment, re-established general order. On Oct. 31, 1925, the last representative of the Qajar Dynasty, Sultan Ahmed Shah who had been absent from the country for some time, was deposed by the National Assembly, which handed over the government to the Prime Minister, Reza Khan, who was elected Shah on Dec. 13, 1925, by the Constituent Assembly, and took the title Reza Shah Pahlavi.

Owing to Nazi German penetration before and during the early part of the war of 1939-45, the Shah and his Government tended so far to favour the Axis powers that, after the German invasion of the U.S.S.R. in 1941, counter-measures became necessary; British and Soviet Forces entered the country from south and north on August 25, 1941, and expelled the agents of the Axis. On September 26, 1941, Reza Shah abdicated and left the country, nominating the Crown Prince as his successor. The Prince ascended the throne under the title of Mohammad Reza Shah Pahlavi.

Under the Anglo-Soviet-Persian Treaty of Alliance of January 29, 1942, the independence and territorial integrity of the country were guaranteed by the United Kingdom and the U.S.S.R. Evacuation by the forces of both powers was to take effect within six months of the signature of the armistice with Germany and her associates. On September 9, 1942, Persia declared war on the Axis powers and on February 28, 1945, on Japan. During the remainder of the war with Germany, Persia became one of the principal routes of aid to the Soviet Union. United States Forces, which had joined British and Soviet troops in Persia to participate in the delivery of aid to Russia, were withdrawn from the country at the end of 1945. British troops evacuated Persia, in accordance with the Anglo-Soviet-Persian agreement, by March 2, 1946, six months after the conclusion of hostilities with Japan. Soviet troops, nevertheless, remained; and when Communist disturbances took place in the north-west part of Persia known as Azerbaijan, they refused to allow Persian forces to enter the area, with the result that an autonomous government was established at Tabriz. Soviet forces, however, eventually left the country in the month of May. This belated evacuation took place in accordance with an agreement which included provision for the formation of a Perso-Soviet Oil Company to operate in the north of Persia, subsequently rejected by the Majlis, and an understanding that the question of Azerbaijan should be peaceably settled. In December, 1946, Persian Government forces entered the province, virtually unopposed by the partisans of the autonomous Government, which itself collapsed upon the flight of the revolutionary leaders into the Soviet Union.

In March, 1949, the Shah issued an Imperial Firman convoking a Constituent Assembly to make certain revisions to the Constitution and

the Assembly was duly elected and convened on April 21. After this Assembly the Senate was formed for the first time.

On March 17, 1951, the Majlis adopted a Bill for the nationalization of the Persian oil industry, and on March 20, the Bill was approved by the Senate. On April 28, the Majlis agreed to a resolution, which was passed on April 30 by the Senate, recommending the immediate taking over of all installations, including those of "the late Anglo-Iranian Oil Company." On April 29 the Shah appointed Dr. Mussadiq Prime Minister. The oil company sought arbitration, but this was rejected by the Persian government, and on May 26 the British government applied to the International Court of Justice at The Hague for a declaration that this refusal to submit to arbitration was illegal. The application was not approved.

In August, 1953, after the Shah had appointed Gen. Zahedi as Prime Minister, fighting broke out between his followers and those of Dr. Mussadiq. The Shah temporarily left the country, but Gen. Zahedi's forces were successful, and Dr. Mussadiq was arrested together with a number of the members of his former Cabinet. In December, 1953, diplomatic relations with Great Britain, which Persia had broken off in October, 1952, were re-established, and in August, 1954, the oil dispute was settled by an agreement, ratified on October 29, which provided for compensation to the A.I.O.C. and for the production, refining and sale of Persian oil by a Consortium in which the A.I.O.C. have a 40 per cent. share (*Production and Industry*, below). In November, 1955, Persia joined the Baghdad Pact, later Central Treaty Organization (CENTO).

For the purposes of local government the country is divided into 11 Provinces (*Ustans*) comprising 76 Sub-Provinces (*Shahristans*), under Governors-General and Governors, respectively.

Defence.—The present strength of the Persian Army, mainly conscript, is approximately 175,000. The army, to which is attached a U.S. Advisory Mission, is well-equipped by 1939 standards and comprises 12 divisions and ancillary troops grouped under two Army headquarters with the preponderance of strength in North-West Persia. The present strength of the Air Force is approximately 8,000. It is equipped with about 120 American aircraft, including 80 jets.

The gendarmerie, to which is also attached a United States Mission, has a strength of nearly 30,000 all ranks. The Persian Navy consists of a small fleet of frigates, minesweepers and patrol boats in the Persian Gulf and some small craft in the Caspian Sea. The personnel of the Navy amounts to about 5,000 all ranks.

Education.—Since 1943 primary education has been compulsory and free. There are over 9,000 schools, 1,700,000 pupils, and also a few foreign schools in Tehran; there are Universities in Tehran and Tabriz, and University Colleges at Isfahan, Meshed and Shiraz.

Language and Literature.—Persian, or Farsi, the language of Iran, and of some other areas formerly under Persian rule, is an Indo-European tongue with many Arabic elements added; the alphabet is mainly Arabic, with writing from right to left. Among the great names in Persian literature are those of Abu'l Kâslm Mansûr, or Firdausi (A.D. 939-1020), Omar Khayyâm, the astronomer-poet (died A.D. 1122), Muslihu'd-Din, known as Sa-di (born A.D. 1184) and Shems-ed-Din Muhammad, or Hafiz (died A.D. 1389). The Persian Press consists of a large number of Tehran and provincial newspapers and periodicals. Two Tehran dailies and three weeklies have circulations exceeding

20,000 copies. Circulations in the provinces are very small. English and French dailies are published in Tehran.

The commercial rate of exchange was stabilized in 1955 as follows: Bank Melli buying rate: *Rials* 210 = £1. Selling rate *Rials* 214.2 = £1. The official rate of Exchange is *Rials* 75 = \$1.

Production and Industry.—While petroleum is the principal product and by far the greatest export, Persia, except for its desert areas, is essentially an agricultural country and 80 per cent. of the inhabitants depend for their living on the land. Sheep and goats are numerous and good wool is produced. There are extensive forests in the north and west, the conservation of which is an urgent problem. The cultivation of opium is prohibited. A certain amount of progress has been made in the development of industry. Apart from petroleum, the principal industries are carpet weaving, cotton ginning, spinning and weaving (Isfahan, Tehran and Shahi areas), wool spinning and weaving, jute sacks, silk goods (Chalus), sugar, tea, fruit, caviar (Caspian Fisheries Company), meat canning, distilling and brewing, tobacco and cigarettes. The oilfields had produced over 200,000,000 metric tons of oil from their first output to Dec. 31, 1946, and subsequent figures (in metric tons) were 1946, 19,858,471; 1947, 21,737,949; 1948, 24,871,000; 1949, 26,807,000; 1950, 35,000,000; 1951 (to Oct.) 17,000,000. Oil shipments were resumed on Oct. 30, 1954, and recent production figures have been (long tons): 1955, 15,772,000; 1956, 25,934,000; 1957, 37,800,000; 1958, 39,800,000; 1959, 44,700,000; 1960, 51,000,000; 1961, 57,100,000.

The former functions of A.I.O.C. (now renamed "British Petroleum Company") in Persia were taken over for an initial period of 25 years by a consortium of 8 oil companies (including A.I.O.C., one French, one Dutch and five U.S.), A.I.O.C. receiving from Persia £25,000,000 cash in the 10 years from Jan. 1, 1957, in compensation for its oil assets in Northern Persia and in settlement of losses since 1951; and from the other members of the consortium for their shares, about £214,000,000 payable over 20-25 years. The consortium is responsible for the production, refining and sale of Persian oil through two operating companies, while "non-basic" operations are undertaken by the National Iranian Oil Company.

Communications.—The principal roads are from the frontier of Iraq at Khusruvi to Tehran; from Tehran *via* Arak to Ahwaz and Khorramshahr; from Tehran *via* Qum, Isfahan and Shiraz to Bush-hire; from Tehran into Azerbaijan, through Tabriz to Julfa (on the Soviet frontier) with branch roads into Turkey and Northern Iraq; from Tehran to Meshed; three roads through the Elburz mountains to the Caspian coast and the Soviet borders east and west of the Caspian Sea; and from Isfahan, *via* Yazd and Kerman to Zahidan and thence to Meshed. Zahidan is connected by road with Quetta (Pakistan). Some of these roads traverse extremely difficult mountainous country; others are desert tracks. Generally speaking, Persian roads are not asphalted but gravel-surfaced. Railways have been constructed since 1927. The *Trans-Iranian Railway*, from Bandar Shahl, on the Caspian Sea, to Bandar Shahpur, on the Persian Gulf, was inaugurated in 1938; this line has a total length of 872 miles, the total cost, after eleven years' work, being approximately £30,000,000. The

branch lines from Tehran to Meshed and to Tabriz have now been completed. There are also railroads from Tabriz to Julfa and from Zahidan to Mirjawa and branch lines from Ahwaz to Khorramshahr and from Khorramshahr to Tanuma in Iraq (on the Shatt el Arab, opposite Basra) were opened during the war. An extension from Qum to Kasham is now in operation as is one from Bandar Shah to Gorgan.

Civil Aviation.—In May, 1946, a Department of Civil Aviation was created, subordinate to the Ministry of Roads. Progress has been made towards establishing first-class International Airports at Tehran and Abadan, with secondary airfields in accordance with ICAO standards. The *Iranian National Air Service* was formed from the former *Iranian Airways* and *Persia Air Services* in February, 1962. The Company is 51 per cent. Government-owned and operates internal services and some services between the Middle East and Europe. Air France, K.L.M., S.A.S., Iraqi, M.E.A., P.A.A., Lufthansa, B.O.A.C., Alitalia and Aryana Airways operate services to Tehran.

TRADE

	1959-60	1960-61
Imports <i>Rials</i>	41,630,135,378	52,657,139,041
Exports ..	7,701,017,170	8,459,875,199

These figures are calculated at the commercial rate of exchange and exclude oil exports.

Trade with U.K.

	1960	1961
Imports from U.K.....	£26,153,534	£33,603,527
Exports to U.K.....	48,557,715	48,955,113

The leading imports into Persia are cotton and woollen fabrics, tea, sugar, motor vehicles, railway material, industrial machinery, chemicals and pharmaceuticals, electrical goods, hardware, china-ware and cement; the principal exports are heavy oils, petrol, carpets, gum, fruits, hides and skins, animal casings, cotton, wood staves and rice.

The principal countries trading with Persia are the U.K., U.S.A., Germany, Japan, India and the U.S.S.R.

CAPITAL: Tehran, population (1956) 1,500,000. Other large towns are Tabriz (290,000), Isfahan (254,000), Meshed (242,000), Shiraz (169,000), Resht (109,000), Kerman (62,000), Hamadan (100,000), Yazd (66,000), Kermanshah (125,000), Abadan (226,000), Ahwaz (120,000).

FLAG.—Equal horizontal bands of green, white and red; with arms (lion and sun) in centre.

PERU

(República del Peru)

The former President of Peru, elected in 1956, was deposed by a military *coup d'état* on July 18, 1962, ten days before his six-year term of office was due to expire. The *coup* followed presidential elections at which none of the candidates achieved the necessary one-third of the total votes cast. The country is at present governed by a military *Junta* which has announced that further elections for the Presidency and for Congress will take place on June 9, 1963. The *Junta* consists of: General Ricardo PÉREZ Godoy; General Pedro Vargas PRADA Peirano; Vice Admiral Juan Francisco TORRES Matos; General Nicholas LINDLEY LÓPEZ.

COUNCIL OF MINISTERS

Minister of Air, General Pedro Vargas PRADA Peirano.
War, General Nicholas LINDLEY LÓPEZ.

Marine, Vice-Admiral Juan Francisco TORRES Matos.
Interior, General Juan BOSISO Colla.

Finance and Commerce, General Ricardo PÉREZ Godoy.

Foreign Affairs, Vice-Admiral Luis Edgardo LLOSA Gonzales Pavón.

Education, Vice-Admiral Franklin PEASE Oliveira.

Development and Public Works, General Mazimo Verástegui Izurreta.

Labour and Indian Affairs, General José Gallardo Schiaffino.

Health, General Victor Solano Castro.

Justice and Culture, General Juan Orrego Aguinaga.
Agriculture, General Jesús Melgar Escutti.

PERUVIAN EMBASSY IN LONDON

52, Sloane Street, S.W.1

[Belgravia: 1917/2545]

Ambassador Extraordinary and Plenipotentiary, His Excellency Señor Don Gonzalo N. de Arumburu (1962).

1st Secretary, Señor Don Hubert Wieland.

2nd Secretary, Señor Don Luis Solari.

Naval Attaché, Rear Admiral Carlos Monge.

Asst. Naval Attaché, Commander Jorge Parodi.

Consul-General, Señor Don Luis R. Méndez.

Consul-General, Liverpool (24 Sir Thomas Street), Señor Don Guillermo Gerberding.

Vice-Consuls, Señor Don Guillermo Nieto; Señor Don Jaime Cáceres.

There are Consulates at *Hull*, *Birmingham* and *Glasgow*.

Area and Population.—Peru is a maritime Republic of South America, situated between 0° 00' 48" and 18° 21' 00" S. latitude and between 68° 39' 27" and 81° 20' 13" W. longitude. The area of the Republic including 4,440 square kilometres of the Peruvian section of Lake Titicaca and 32 square kilometres of the coastal islands, is about 531,000 square miles. The total population at the Census of July 2, 1961, was 10,364,620 (preliminary figures). In 1960 there were 386,917 births, 106,997 deaths and 31,663 marriages.

Physical Features.—The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points in the Peruvian sector being *Huascaran* (22,211 feet), *Huandoy* (20,855 feet), *Ausangate* 20,235 feet), *Arequipa* (or *Misti*) volcano (18,364 feet), *Hualcan* (20,000 feet), *Chachani* (19,037 feet), *Antafajsha* (18,020 feet), *Pichu-pichu* (17,724 feet), and *Mount Meiggs* (17,583 feet).

There are three main regions, the *Costa*, west of the Andes, the *Sierra* or mountain ranges of the Andes, which include the *Punas* or mountainous wastes below the region of perpetual snow and the *Montana*, or *Selva*, which is the vast area of jungle stretching from the eastern foothills of the Andes to the eastern frontiers of Peru. The coastal area,

lying upon and near the Pacific, is not tropical, though close to the Equator, being cooled by the Humboldt Current; its chief products are cotton, sugar, and petroleum. It contains the capital, Lima, and most of the white population. In the mountains, where most of the Indians live, are to be found minerals in great richness and variety, and cattle, sheep, llamas and alpacas are bred there. In the mountain valleys maize, potatoes and wheat are grown. Upon the eastern slopes of the Andes are to be found very large tracts suitable for cultivation and stock raising. The main products of the jungle are timber, barbasco and leche caspi.

Government.—Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541). He subjugated the Incas (the ruling caste of the Quichua Indians), who had started their rise to power some 500 years earlier, and for nearly three centuries Peru remained under Spanish rule. A revolutionary war of 1821–1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended in 1860, 1919, 1933, 1936 and in 1939), and is that of a democratic Republic. The President is elected for six years by direct vote of the people. Congress is composed of a Senate and of a Chamber of Deputies, both Houses being elected for six years. Voting is compulsory for all Peruvian men and women between the ages of 21 and 60, for married men and women between 18 and 60 and for single men and women between the ages of 18 and 21 who are legally released from parental tutelage.

At the presidential elections in July, 1962, no candidate received the necessary (one-third) proportion of the votes, but the electoral board refused to annul the election. On July 18, 1962, President Prado was arrested and all civil and political posts taken over by military personnel. The *coup d'état* was led by the President of the Chiefs of Staff, Gen. Perez Godoy, who promised "clean" elections in 1963.

Production.—Agriculture and mining are the principal industries, employing over 70 per cent. of the inhabitants. The chief crops in order of value are cotton, potatoes and other vegetables, sugar, fruit, maize, rice, wheat barley, grapes and coffee. At June 30, 1959, the gainfully employed population numbered 3,893,551, of whom 2,255,923 were engaged in agricultural and pastoral activities.

4,477,573 acres were under cultivation at the end of 1959 and steps are being taken to increase this area, which was probably larger in Inca times, by more intensive irrigation. Minerals produced in 1960 were valued at *soles* 5,987,760.112 and included lead, zinc, copper, iron ore, petroleum, silver, gold, tungsten, blismuth, antimony and vanadium. The islands off the Pacific coast provided guano amounting to 157,844 metric tons in 1960.

Communications.—In recent years the coastal and sierra zones have been opened up by means of roads and air routes and there is air communication, as well as communication by protracted land routes, with the tropical eastern zones, which lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. The completion in 1944 of the trunk road of the *Andean Highway* from the Pacific port of Callao, via Lima, Oroya, Cerro de Pasco (14,700 ft.), Huanuco, Tingo Maria, to Pucallpa, the river port on the Ucayali, one of the largest tributaries of the Amazon and accessible all the year round to vessels of 3,000 tons, forms a link between the Pacific, the Amazon and the Atlantic. The trunk road runs through the *Boqueron del Padre Abad*, a

pass rediscovered on July 22, 1937, in the backbone of the Blue Cordillera. The Peruvian section of the Pan American highway is complete and is asphalted throughout the major part of its length.

The first railway was opened in 1850 and of the 2,494 miles of railways now operating, Government lines account for 578 miles, the Peruvian Corporation 1,180 miles and private enterprises about 726 miles. There is also steam navigation on the eastern rivers such as the Ucayali (see Andean Highway, above) and Huallaga, and in the south on Lake Titicaca. Air services are maintained throughout Peru, and a number of international services call at Lima.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription (2 years), and numbers about 30,000 of all ranks. Armoured units are equipped with American and French vehicles. Engineer units are employed on the reconstruction of roadways in North Eastern Peru using American equipment. **Navy.**—The Navy consists of 2 cruisers; 5 destroyers; 3 frigates; 4 submarines completed in the United States of America in 1954-57; 4 LST's; 7 river gunboats; 4 fleet oilers; 4 fleet auxiliaries; 2 river transports; 4 patrol boats; 4 launches; 1 floating dock; 3 tugs. There is a naval cadet school at La Punta and a submarine base at Callao. **Air Force.**—The Air Force is equipped with British Hunter and Canberra aircraft; American fighter, bomber, transport and training aircraft; French helicopters (*Alouette*) for training and rescue purposes. There are military aerodromes at Talara, Chiclayo, Las Palmas (near Lima) and Piura, and a seaplane base at Iquitos.

Education.—Elementary education is compulsory and free for both sexes between the ages of 6 and 14. In 1959 there were 1,391,952 pupils undergoing primary education and 141,061 attending secondary schools. There were 12,231 state primary schools with 32,031 teachers and 193 state secondary schools with 4,270 teachers. In addition there were 1,503 private schools providing primary and secondary education with 9,293 teachers and 656 schools conducted by religious orders. The State provides rural agricultural schools for Indians, mining schools and polytechnics in the more populated centres. The University of San Marcos at Lima, founded in 1551, had 11,622 students in 1959, and there are smaller universities at Cuzco, Arequipa and Trujillo, a Catholic university at Lima, and a national engineering university.

Language and Literature.—Spanish is the official language of the country and notably of the original Spanish stock from which the governing and professional classes are mainly recruited, but more than half the nation is composed of Indians, whose principal languages (Quichua and Aymara) are widely spoken. Before the arrival of Pizarro, the Incas had attained a high state of culture, some traces of which survived three centuries of Spanish rule. Modern Peruvian literature includes a national drama in the Spanish tongue and many Peruvian writers have attained international fame. The national library founded at Lima in 1821 was pillaged by Chileans in the Pacific War of 1879-1883, but many of the scattered manuscripts and books have since been recovered. The greater part of the historical section of the library was destroyed by fire in 1943. The first printed news-sheet in South America was issued at Lima in 1594 and in 1960 there were 5 main national daily papers, and 48 provincial ones with a small and purely local circulation. A chair of English was established in 1938 at the Universidad Mayor de San Marcos in Lima.

PHILIPPINE EMBASSY IN LONDON

9a Palace Green, W.8

[Western: 3646]

Ambassador in London, His Excellency Melquiades J. Gamboa (1962).

Area and Population.—The Philippines are situated between 21° 20'–4° 30' N. lat. and 116° 55'–126° 36' E. long., and are distant about 500 miles from the south-east coast of the continent of Asia.

The total land area of the country is 114,834 square miles, of which total 106,914 square miles are contained in the eleven largest islands, the 7,079 other islands having a combined area of 7,920 square miles.

The principal islands are:—

Name	sq. miles	Name	sq. miles
Luzon....	40,422	Mindoro....	3,759
Mindanao....	36,538	Leyte.....	2,786
Samar....	5,050	Cebu.....	1,793
Negros....	4,906	Bohol.....	1,492
Palawan....	4,550	Masbate.....	1,263
Panay....	4,446		

Other groups in the Republic are the Sulu Islands (Capital, Jolo), Bahuyanes and Batanes; the Catanduanes; and Culion Islands.

The population of the Philippines at the 1960 census was 27,455,199.

The inhabitants, known as Filipinos, are basically all of Malay stock, with a considerable admixture of Spanish and Chinese blood in many localities, and over 90 per cent. of them are Christians, predominantly Roman Catholics. Most of the remainder are Mohammedan Moros in the south, and Pagans, mainly in the north. There is a Chinese minority estimated at 350,000, and other much smaller foreign communities, notably Spanish, American and Indian.

Government.—The Portuguese navigator Magellan came to the Philippines in 1521 and was slain by the natives of Mactan, a small island near Cebu. In 1565 Spain undertook the conquest of the country which was named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 Manila was occupied by a British force, but in 1764 it was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. After the Spanish fleet had been destroyed in Manila Bay (May 1, 1898), Manila was captured by American troops with the help of Filipinos, on Aug. 13, 1898, and the Islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898. However, the Filipinos, under Aguinaldo, rose up in arms on Feb. 4, 1899, against the U.S. Government, main-

taining a desultory rebellion until it was quelled in 1902. Following this, the Philippine Commission was established, consisting of a Governor-General and Commissioner appointed by the President of the United States, who exercised a large measure of executive and legislative authority.

A measure of local independence was granted under the Jones Act of August 29, 1916. On March 24, 1934, the Tydings-McDuffie Law, gave the Philippines a "Commonwealth" Status. The Republic of the Philippines came into existence on July 4, 1946. The Constitution provides for a President elected for a term of four years, and a bi-cameral Congress, consisting of a Senate composed of 24 senators and a House of Representatives of not more than 120 members. No person may serve as President for more than eight consecutive years. The term of office of Senators is six years and of Representatives four years.

Language and Literature.—The official languages are English, Spanish and the National language (of Malay origin) Tagalog. A majority of the people read or understand English, which is the language of instruction. The literacy rate is estimated at 75 per cent. There is a National library in the capital with branches in other urban centres, and a flourishing English press. Education accounts for about a quarter of local expenditure in the national budget. Secondary and higher education is extensive. There are 24 private universities recognized by the Government, including the Dominican University of Santo Tomas (founded in 1611), the first in the Far East and 25 years older than Harvard; there is also the State-supported University of the Philippines at Manila (1908).

Roads and Railways.—Communications suffered serious damage during the War of 1941–45 owing to the lack of proper maintenance during the Japanese occupation and destruction by bombardment. The highway system of approximately 22,747 miles of roads and streets is undergoing rehabilitation and extension. Before the war the railways, which were largely Government owned, operated approximately 845 miles of track of which some 832 miles were in operation in 1960. Rolling stock losses were also heavy, but have been largely made up, and the Manila railway, on Luzon island, has been converted to diesel traction.

Shipping.—The ports of entry are Manila, Cebu, Iloilo, Zamboanga, Davao, Jolo, Legaspi, Aparri, José Panganiban, San Fernando La Union and Tacloban. There are nearly 2,000 vessels of various types, totalling over 130,000 tons, engaged in coastwise and river traffic.

Civil Aviation.—Air transport plays a key part in inter-island travel and an important one in communications overseas. Philippine Air Lines (54 per cent. Government-owned) operate a comprehensive air service between the islands and run regular flights to Hong Kong.

FINANCE 1962-63

The Philippines is a predominantly agricultural country, the chief products being rice, coconuts, maize, sugar-cane, abaca (manila hemp), truits, tobacco and lumber.

The principal Philippine exports in both natural and manufactured states are coconuts, sugar, abaca, base metals, lumber, pineapples, embroideries and tobacco.

CAPITAL.— Ψ Manila, in the island of Luzon: population (1960), including the separately administered but integral areas of Quezon City and Pasay City, 3,006,627. Quezon City has been designated as the future capital of the Philippines, but pending completion of government building projects, the Executive, Legislative and Judicial departments of the government are still located in Manila. The next largest cities are Ψ Cebu (259,194), Davao (231,833), Ψ Iloilo (150,976), Ψ Zamboanga (131,411) and Bacolod (119,169).

FLAG.—Equal horizontal bands of blue (above) and red; gold sun with three stars on a white triangle next staff.

Commercial Attachés, Jerzy Dzierzynski; Jan Kosciński.

Consulate-General in London, 19 Weymouth Street, W.1.

Area and Population.—In 1939 the area of the Polish Republic was 150,572 square miles with a population of about 35,000,000, of whom 30 per cent. were national minorities (including over 3,000,000 Jews). Frontier changes took place at the end of the war as foreshadowed at the Tebran Conference in 1943. About 69,000 square miles of territory in the east were ceded to the Soviet Union. In exchange Poland received in the west 39,000 square miles of Eastern Germany. The southern boundary was not affected except for minor adjustments to that part formerly dividing Poland from Ruthenia (Czechoslovakia). The western boundary is formed by the Rivers Oder and Neisse. Poland now has a maritime frontier stretching from west of Kaliningrad (formerly Königsberg) to west of Szczecin (formerly Stettin). As a result of the change of frontier and of very great war-time losses, at the census of December 3, 1950, the population had fallen to 24,977,000 in an area of 121,000 square miles; on Dec. 31, 1961, it was estimated at 30,133,000. In 1961 live births showed a rate of 20.7 per 1,000; deaths, 7.6 per 1,000; infant mortality, 54 per 1,000 (provisional figures). Roman Catholicism is the religion of the vast majority of the inhabitants.

Government.—The Republic of Poland (reconstituted within the limits of the old Polish Commonwealth) was proclaimed at Warsaw in November, 1918, and its independence guaranteed by the signatories of the Treaty of Versailles. The Polish Commonwealth had ceased to exist in 1795 after three successive partitions in 1772, 1793 and 1795, in which Prussia, Russia and Austria shared. During the Napoleonic wars, the small Grand Duchy of Warsaw was created but was dissolved by the final act of the Congress of Vienna. The so-called "Congress Kingdom" was then established on the Polish territory which had fallen to Russia's share and the Tsar assumed the title of King of Poland. Prussia acquired Poznan and Polish Pomerania, Austria acquired Galicia and the small Republic of Cracow came into existence under the joint control of Prussia, Russia and Austria. In 1831, after an insurrection, the Congress Kingdom was dissolved and annexed by Russia and in 1848 the Austrian absorbed the Cracow Republic, Poland as an independent state ceasing to exist until the end of the War of 1914-18, when she became independent once again, after 150 years of foreign rule.

In March, 1939, Great Britain entered into a treaty with Poland (France had done so in 1921) guaranteeing Polish territory against aggression, and on Hitler's invasion France and Britain implemented their guarantee. On September 17, 1939, Russian forces invaded eastern Poland and on September 21, 1939, Poland was declared by Germany and Russia to have ceased to exist. A

line of demarcation was established between the areas occupied by German and Russian forces. At the end of the war a Coalition Government was formed in which the Polish Workers' Party played a large part. In December, 1948, the Polish Workers' Party and the Polish Socialist Party fused in the new Polish United Workers' Party. This is a Communist Party which closely controls every branch of State activity. A new Constitution modelled on the Soviet Constitution of 1936 was adopted on July 22, 1952. It changed the title of the country to the Polish People's Republic (*Polska Rzeczpospolita Ludowa*). It made no provision for a President of the Republic, whose functions were to be jointly exercised by a Council of State. Private ownership of land and freedom of religion was recognized. Church and State were to be separate.

Despite the guarantee of religious freedom in the Constitution, a campaign of encroachment in 1953 culminated in the arrest of the Primate of the Roman Catholic Church, Cardinal Wyszyński. Dissatisfaction with the régime and conditions of life led to riots in Poznań in June, 1956, and subsequently M. Władysław Gomułka, who had been expelled from the Party in 1949, was reinstated and elected First Secretary of the Party. At the same time Cardinal Wyszyński was allowed to resume his functions. In Jan., 1957, elections to the *Sejm* were held and in Feb., 1957, a reconstructed Government, still led by M. Cyrankiewicz, took office. Fresh elections to the *Sejm* were held in April, 1961; M. Cyrankiewicz remained Prime Minister, with the composition of the Government almost unchanged.

Education.—Elementary education is compulsory and free. In 1961-62 there were 4,994,356 pupils in elementary schools, 298,396 in secondary schools, and 977,800 students in technical, professional and trade colleges and schools. There are universities at Krakow, Warsaw, Poznań, Lodz, Wrocław, Lublin and Toruń and a considerable number of other seats of higher study.

Language and Literature.—Polish is a western Slavonic tongue (see U.S.S.R.), the Latin alphabet being in use, as in Czechoslovakia. Polish literature developed rapidly after the foundation of the University of Cracow (a printing press was established there in 1474 and there Copernicus died in 1543). A national school of poetry and drama survived the dismemberment and the former era of romanticism was followed by realistic and historical fiction, including the works of Henryk Sienkiewicz (1846-1916), Nobel Prize-winner for Literature in 1905, Bolesław Prus (1847-1912), and Stanisław Reymont (1868-1925), Nobel Prize-winner in 1924. There are now 46 daily papers published in Poland, 11 of them in Warsaw.

Production and Industry.—On January 3, 1946, a decree was issued to provide for the nationalization of mines, petroleum resources, water, gas and electricity services, banks, textile factories and large retail stores. At present over 90 per cent. of Polish industry is stated to be "socialized", but 86 per cent. of agricultural land is privately farmed.

Area and Population.—Continental Portugal occupies the western part of the Iberian Peninsula, bounded on north and east by Spain, and on south and west by the Atlantic ocean; it contains an area of 34,500 square miles, with an estimated population (including the Azores and Madeira) of 8,980,682 (1958). It lies between $36^{\circ} 58' 42''$ $9' 12''$ N. lat. and $6^{\circ} 11' 48'' 29' 45''$ W. long., being 302 miles in length from N. to S., and averaging about 117 in breadth from E. to W. The Azores and Madeira Islands in North Atlantic are politically an integral part of the Republic.

In 1958 there were 212,467 live births, 91,891 deaths and 73,096 marriages in Continental Portugal.

Government.—From the eleventh century until 1910 the government of Portugal was a monarchy, and for many centuries included the Vice-Royalty of Brazil, which declared its independence in 1822. In 1910 an armed rising in Lisbon drove King Manoel II. and the Royal family into exile, and the National Assembly of Aug. 21, 1911, sanctioned a Republican form of government. The President is elected for seven years by indirect vote of the electors, who vote for members of an electoral college to select the President. He is not eligible for a second term. The Prime Minister is appointed by the President, who also appoints the other Ministers on the recommendation of the Prime Minister. The Government is responsible only to the President. There is a single Chamber Legislature (*Assembleia Nacional*) of 120 members elected by direct vote of the electors. There is also a "Corporative Chamber" consisting of representatives of local authorities and industrial, commercial, cultural and religious interests, to which all bills introduced into the Chamber must be submitted for its opinion. The Legislature is in session for three months in the year. In the recess the Government legislates by decrees or decrees-laws, of which the latter only must be confirmed by the legislature. Both men and women enjoy the franchise; but there are certain educational or tax-payment qualifications.

Production.—The chief agricultural products of Portugal are cork, wheat, maize, rye, rice, oats, barley, potatoes, beans, chickpeas, onions, olives, oranges, lemons, figs, almonds, resinous products, timber and wine (including the rich red "port" shipped from Oporto). Sardine fisheries are important.

There are extensive forests of pine, oak, cork, eucalyptus and chestnut, covering about 20 per cent. of the total area of the country, and lumbering is the second largest industry.

The principal mineral products are iron pyrites, wolfram, iron ores, tin, and gold and silver. The principal manufactures are textiles, furniture, pottery, glassware, cork goods, leather, paper, cement, fertilizers and chemicals. A steel works has recently begun production.

The Second Six-Year Development Plan (1959-64) provides *inter alia* for irrigation, agricultural resettlement and afforestation, for the development

of electricity generation, mainly by hydroelectric means, of the steel and chemical industries, for extensive port works including a new shipyard at Lisbon, railway electrification, a bridge over the River Tagus at Lisbon and the expansion of the fishing and merchant fleets.

Defence.—Military service is compulsory for all men who are physically fit, less than 25 per cent. being exempted each year. The peace strength of the army is: officers 2,821 (active list), and about 2,000 (reserve); other ranks—permanent cadre of 34,000 with a yearly class of 31,000. A considerable amount of modern equipment has been received from the U.S.A. The navy consists of 860 officers and 6,375 ratings, manning a total of over 60 destroyers, frigates, sloops, submarines, mine-sweepers, patrol vessels and other small craft. The destroyers are of pre-war design, and many of the others have been either built or bought abroad mainly in the U.K. or U.S.A. The frigates, minesweepers, submarines and coastal patrol vessels are all of late-war or post-war construction. The establishment of the Air Force is 500 officers and 2,000 men with 350 aircraft of all types.

Language and Literature.—Portuguese is a Romance language with admixtures of Arabic and other idioms. It is the language of Portugal and Brazil. Portuguese language and literature reached the culminating point of their development in the *Lusiadas* (dealing with the voyage of Vasco da Gama) and other works of Camoens (Camões), born in 1524, died in 1580. Until the second quarter of the nineteenth century Portuguese literature dominated that of Brazil. Modern literature, both prose and verse, is in a flourishing condition and there are more than twenty daily newspapers, of which 9 are published in Lisbon.

Education is free and compulsory for three years from the age of 7. In 1952 a series of new measures was decreed to ensure school attendance and to reduce illiteracy, which was 30 per cent. at the time of the 1950 Census. Secondary education is mainly conducted in State lycées, but there are also private schools. There are also military, naval, technical and other special schools. There are Universities at Coimbra (founded in 1290), Lisbon (1911) and Oporto (1911).

Communications.—On Jan. 1, 1959 there were 2,235 miles of railway open for traffic, of which 475 miles were narrow gauge. The Lisbon-Sintra (15 miles), Lisbon-Cascais (16 miles) and Lisbon-Entroncamento (66 miles) lines are electrified and work on the Entroncamento-Oporto was expected to start in 1961.

On Dec. 31, 1959, the mercantile fleet comprised 90 long-distance vessels with a total gross registered tonnage of 427,430 tons, 19 port-to-port vessels (21,452 tons), 30 national coasters (3,791 tons) and 41 international coasters (6,351 tons). In 1959, 35,147,174 gross tons of shipping entered ports in continental Portugal and adjacent islands, including 5,890,065 gross tons under the British flag.

Civil Aviation is controlled by the Ministry of Communications. There is an international airport at Portela, about 5 miles from Lisbon, and the airport of Pedras Rubras near Oporto is also used for some international services. There is a civil airline, an inter-island service, services in Portuguese Africa and an airline running services within Portuguese India and to Karachi. British European Airways and Transportes Aereos Portugueses operate a daily service between London and Lisbon by agreement between them which calls at Oporto twice weekly in both directions. There are altogether 19 airlines operating a total of about 400 services a month through Lisbon airport.

MADEIRA AND THE AZORES

Madeira and The Azores are administratively parts of metropolitan Portugal.

The *Madeiras* are a group of islands in the Atlantic Ocean about 520 miles west of Lisbon, and consist of Madeira, Porto Santo and 3 uninhabited islands (Desertas). The total area is 314 square miles, with a population of 269,769. Ψ Funchal in Madeira, the largest island (270 square miles), is the capital, with a population of 37,035; Machico (4,734). Trade with U.K., 1961: Imports from U.K., £775,937; Exports, £209,834.

The *Azores* are a group of 9 islands (Flores, Corvo, Terceira, Sao Jorge, Pico, Fayal, Graciosa, Sao Miguel and Santa Maria) in the Atlantic Ocean, with a total area of 922 square miles and a population of 318,558. Ψ Ponta Delgada the capital of the group, has a population of 22,448. Other ports are Ψ Angra, in Terceira, (10,296) and Ψ Horta (8,564). Trade with U.K., 1961: Imports from U.K., £311,094; Exports, £148,199.

PORTUGUESE OVERSEAS PROVINCES

CAPE VERDE ISLANDS, off the west coast of Africa, consist of two groups of islands, Windward (Santo Antão, São Vicente, Santa Luzia, São Nicolau, Boa Vista and Sal, the last-named having a South Atlantic air base, opened in 1949) and Leeward (Maio, São Tiago, Fogo and Brava) with a total area of 1,516 square miles and a population (Census of 1950) of 148,331. Revenue (1957) *Escudos* 119,969,000; imports (1957) *Escudos* 378,361,000; exports *Escudos* 346,820,000, shipping entries (1957) 8,749,927 gross tons. Capital, Ψ Prala (6,000). Vessels take coal and oil at Ψ Mindelo, Sao Vicente (Pop. 20,000).

SÃO TOMÉ and PRÍNCIPÉ ISLANDS, in the Gulf of Guinea (area 372 square miles, population (1950), 60,159). Revenue (1957) *Escudos* 71,899,000; imports (1956) *Escudos* 137,345,000; exports, *Escudos* 173,670,000. Capital, Ψ São Tomé (3,187). The fort of St. John Baptist on the Slave Coast is a dependency of the Province of São Tomé.

ANGOLA has an area of 488,000 sq. miles, pop. 4,145,266, with present capital Ψ St. Paul de Luanda (pop. 40,000), and capital designate Nova Lisboa, and includes also Kabinda and Portuguese Zaïre (N. of Congo). Angola was restored to Portugal by the Netherlands in 1648. Revenue (1957) *Contos* 2,172,394; imports (1957), *Contos* 3,595,578; exports, *Contos* 3,327,927. Imports from U.K., 1961, £4,522,286. Shipping entries (1957) 8,991,000 gross tons.

PORTUGUESE GUINEA, area 14,000 sq. miles, pop. (1950) 510,777 (capital Ψ Bissau, population 6,000). Revenue (1957) *Escudos* 150,446,000; imports (1956) *Escudos* 208,082,000; exports, *Escudos* 207,359,000; shipping entries (1953), 186,783 gross tons.

A transcontinental railway from *Benguela* (Lobito Bay) in Angola, which traverses the Katanga mineral district of the Congo and then runs southwards through Rhodesia to Bulawayo and eastwards to Beira, is being developed under British, Belgian and Portuguese control. This line makes through communication from Lobito Bay on the Atlantic to Beira on the Indian Ocean.

PORTUGUESE EAST AFRICA, OR MOZAMBIQUE, Lourenço Marques, Inhambane, Quelimane, Tete, Mozambique, Cape Delgado and Nyasa, together with the territory of Manica and Sofala, has a total area of 297,657 square miles, with a population (1950) of 5,732,317. Capital Ψ Lourenço Marques (48,000). Revenue (1957) *Escudos* 3,131,067,000; imports (1957), *Escudos* 3,111,562,000; exports, *Escudos* 2,029,294,000; trade with U.K., 1961: Imports from U.K., £5,236,840; Exports, £2,847,053. Shipping entries (1956), 18,463,714 gross tons.

Ψ **MACAU**, in China, on the Canton River, has an area of 5 square miles and a population (1950) of 187,772. Revenue (1957), *Escudos* 109,755,000.

PORTUGUESE INDIA.—On December 18–19, 1961, the Portuguese possessions of *Goa, Daman (Damao)* and the island of *Diu* were invaded and occupied by the Indian Army. The three territories were absorbed into the Indian Union, legislation enacted on March 14, 1961, providing for their administration by the Central Government.

PORTUGUESE TIMOR (the eastern portion of the island), in the Malay Archipelago, has an area of 7,329 square miles, with a population (1950) of 442,378. Revenue (1957) *Escudos* 71,546,000; imports (1957), *Escudos* 61,330,000; exports *Escudos* 38,880,000; shipping entries (1957), 88,587 gross tons. Capital, Ψ Dili, pop. 7,000.

QATAR

Ruler of Qatar, Shaik Ahmad bin Ali bin Abdullah al Thani; succeeded Oct. 24, 1960.

Deputy Ruler and Minister of Finance, Shaik Khalifa bin Hamad al Thani.

Director of the Government, Dr. Hassan Kamei.

Qatar is an independent Arab Shaikhdom in special treaty relations with Her Majesty's Government. It covers the peninsula of Qatar from approximately the Northern shore of Khor al Odaid to the Eastern shore of Khor al Salwa. The area is about 4,000 sq. miles, with a population variously estimated at 45–60,000.

Oil deposits on land are being exploited by the Qatar Petroleum Company, a subsidiary of I.P.C., under a concession granted by the Ruler, and the first oil shipment was made on December 31, 1949. Oil is now being extracted at the rate of over 8,000,000 tons a year. Considerable development has resulted from this source of income. Outside Doha and the oil company's installations, conditions are primitive. The inhabitants are semi-settled tribesmen and Bedouin; apart from employment in the oil industry and on development projects, pearling, which has greatly declined in recent years, and fishing, are the only alternatives to poor grazing as a means of livelihood. Such towns as exist are merely enlarged villages, with the exception of Doha, which boasts a bazaar, a good harbour for native craft, an airport, an increasing number of modern buildings, and an expanding population. The oil company has constructed a deep water port at Umm Said on the East coast of the peninsula. The offshore concession is held by the Shell Company of Qatar, which is at present drilling for oil in the sea bed. Regular air services connect Qatar with the other Persian Gulf Shaikhdoms (Bahrain, the

Trucial States and Kuwait), Muscat, the Lebanon, Europe and the United Kingdom. The Ruler has an international staff of technical assistants. Wireless communications are managed by Cable and Wireless, Ltd. The Post Office is run by the British G.P.O. The currency is the Indian external rupee.

Foreign affairs are in the charge of the British Political Agent who lives in Doha.

CAPITAL.—Doha. Population (estimated) 40,000.

FLAG.—White and coffee-coloured, white portion near the mast; vertical indented line comprising 17 angles divides the colours.

British Political Agent, P. McKearney.

ROUMANIAN LEGATION IN LONDON

4 Palace Green, W.8

[Western: 9666]

Envoy Extraordinary and Minister Plenipotentiary, His Excellency Alexandru Lazareanu (1961).

Area and Population.—Roumania is a republic of South-Eastern Europe, formerly the classical *Dacia* and *Scythia Pontica*, having its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* (and the addition thereto of a strip of Southern *Bessarabia*) under the *Treaty of Paris* (April, 1856). The area in October, 1945, was estimated at 91,600 sq. miles, with a population (estimated, 1960) of 18,493,414.

Government.—The principalities remained separate entities under Turkish suzerainty until 1859, when Prince Alexandru Ion Cuza was elected Prince of both, still under the suzerainty of Turkey. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, whose successors the crown was vested. By the *Treaty of Berlin* (July 13, 1878) the Principality was recognized as an independent State, and part

of the *Dobruđa* (which had been occupied by the Roumanians) was incorporated. On March 27, 1881, it was recognized as a Kingdom.

The outcome of the War of 1914-13 added Bessarabia, the Bukovina, Transylvania, The Banat and *Crîșana-Maramureș*, these additions of territory being confirmed in the Treaty of St. Germain, 1919, and the Treaty of Petit Trianon, 1920.

On June 27, 1940, in compliance with an ultimatum from U.S.S.R., Bessarabia and Northern Bukovina were ceded to the Soviet Government, the area affected being about 20,000 sq. miles, with a population of about 4,000,000.

In August, 1940, Roumania ceded to Bulgaria the portion of Southern Dobruđa (about 3,000 sq. miles) taken from Bulgaria in 1919.

During 1947 the historical parties, the National Peasant Party and the National Liberal Party, were liquidated and the trials and condemnations of their leaders took place. On Dec. 30, 1947, King Michael was forced to abdicate and the establishment of the Roumanian Peoples' Republic was proclaimed. On February 23, 1948, the Social Democrats were swallowed up by the Communist Party when the two fused to form the Roumanian Workers' Party, since when the Social Democrat element has been steadily liquidated. On March 28, elections were held for the Grand National Assembly. The People's Democratic Front, composed and dominated by the Roumanian Workers' Party, with its puppets the Ploughmen's Front, the National Popular Party and the Popular Hungarian Union, allocated itself 405 out of 411 seats; the new Constitution was passed and the Præsidium and Council of Ministers appointed. Thereafter the progress of the new People's Democracy towards socialism was hastened by the nationalization law of June 11, which brought under State control all industrial enterprises, mining, banking, transport and insurance. In October the Uniate Church was forcibly suppressed. At the turn of the year the dictatorship of the proletariat was officially established. The landowners were dispossessed, disfranchised and exiled on March 2, 1949. In 1950 the creation of collective farms was intensified. The liquidation of the middle classes continued, and on April 20 most buildings owned by former members of the "bourgeoisie" were nationalized without compensation.

The currency reform of January, 1952, effectively wiped out the savings of the peasants. In May, 1952, several ministers were attacked for opposing the currency reform, following a deviationist policy of economic opportunism, and sabotaging the economic development of Roumania. They were replaced by other ministers, and the changes were made the occasion for a tightening of the Workers' Party organization and the elimination of the remaining Social Democrats from the Government and Workers' Party.

A new Constitution, modelled on the Soviet Constitution of 1936, was adopted unanimously on September 24, 1952, by the Grand National Assembly. The Assembly was later dissolved and elections were held for a new Grand National Assembly on November 30, 1952; in each constituency there was only one candidate for election, representing the People's Democratic Front. Further elections on similar lines were held in February, 1957 and in March, 1961.

Agriculture.—The soil of Wallachia and Moldavia is among the richest in Europe producing wheat, maize, millet, oats, barley, rye, beans, peas and other vegetables. Grape vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp. Agriculture and sheep and cattle raising are the

principal industries of Roumania, but the climate of this part of South-Eastern Europe is of the Continental character, and the intense winter cold and summer heat, and fierce summer drought sometimes defeat these principal industries. The forests of the mountainous regions are extensive (17,851,401 acres), and the timber industry is important. The total arable land under cultivation in 1960 was about 10,000,000 hectares.

Socialization of agriculture was completed, at least on paper, when plans for collectivization were fulfilled in the spring of 1962, some three years ahead of the planned date.

Natural Resources and Industry.—Petroleum is the backbone of Roumanian industry and of the country's general economy. Production in 1936 (the peak pre-war year) amounted to 8,700,000 tons. In the immediate post-war period, production declined to less than half this figure, but it is now claimed that, with the discovery of new oil-fields, production has recovered and reached a new peak of 11,582,000 tons in 1961. The country is also rich in other minerals, and produces in limited quantities coal, lignite, iron, gold, silver, mica and uranium. Industrialization is proceeding rapidly and at the end of the first Five-Year Plan, 1951-55, the Government claimed to have exceeded their intention of increasing industrial production by 244 per cent. compared with 1950. The subsequent Five-Year Plan was later reduced to cover a four-year period, 1956-59, during which an average annual increase in industrial production of 10 per cent. was claimed. The new Six-Year Plan (1960-65) provides for an average annual increase of industrial production of 13 per cent. An increase of 16 per cent. in industrial production was achieved in each year 1960 and 1961.

Other 1961 production figures, with 1965 targets in brackets are:

Crude oil.....	11,582,000 tons (12,200,000)
Coal....	8,704,000 tons (11,500,000-12,500,000)
Electric power	8,631,000,000 kWh (18,500,000,000)
Natural gas...	7,197,000,000 cu. metres (13,300,000,000)
Steel.....	2,127,000 tons (3,300,000)
Pig Iron.....	1,099,000 tons (2,000,000)

Language and Literature.—Roumanian is a Romance language with many archaic forms and with admixtures of Slavonic, Turkish, Magyar and French words. The folk-songs and folklore, composed by the people themselves, and transmitted orally through many centuries (and collected in the 19th century), form one of the most interesting of such collections. The publication of all books and reviews is controlled and authorized by the *Editura de Stat*, which comes under the jurisdiction of the Council of Ministers. In 1960, 31 daily newspapers were published. The dominating religion is that of the Roumanian Orthodox Church.

Education is free and nominally compulsory. With 2,588,000 in attendance in 1960, including over 241,000 at secondary schools and 80,000 in higher education. There are four Universities, at Bucharest, Iași, Cluj and Timisoara. A "Marxist-Leninist" University was opened in Bucharest in 1951. There are polytechnics at Bucharest, Timisoara, Cluj, Brasov, Galatz and Iasi, two commercial academies at Bucharest and Brasov, and agricultural colleges at Bucharest, Iasi, Cluj, Craiova and Timisoara.

Communications.—In 1960 there were 6,824 miles of railway open for traffic. The mercantile marine, as a result of war losses, seizure and reparations, was reduced to a few moderate-sized sea-going

steamers and a number of coastal and river craft, but is being steadily built up. The principal ports are Constantza (on the Black Sea), Glurgiu, Braila, Galati and Turnu-Severin (on the Danube), and Sulina (on the Danube Estuary). Work on a canal linking the Danube and the Black Sea just north of Constantza was abandoned in 1953 and no more was heard of the project to build a canal linking Bucharest with Danube Estuary.

FINANCE

Final figures of actual state revenue expenditure in 1960 were: Revenue, Lei 58,171,000,000; Expenditure, Lei 55,423,000,000.

	1961*	1962*
	Lei	Lei
Revenue.....	66,206,000,000	78,790,000,000
Expenditure.....	63,605,000,000	77,790,000,000

*Budget Estimates.

Up-to-date figures of the Public Debt are not available. No foreign loans (other than short-term commercial loans) are known to have been contracted since March, 1947. The internal debt was virtually wiped out by stabilization in August, 1947; there has been no internal loan issue since that date.

The Roumanian Leu (of 100 Bani) was revalued for the third time since the war on Feb. 1, 1954, foreign exchange rates being fixed at £1=16.80 lei and 1 U.S. \$=6.00 lei. On July 1, 1957, the Roumanian State Bank announced the payment of 100 per cent. premium on all "capitalist" currencies for non-commercial transactions. This premium brings the effective exchange rate to £1=33.60 lei and 1 U.S. \$=12 lei. A special tourist rate is available to tourists who make their arrangements through O.N.T. CARPATI (State tourist agency): lei 43.00=£1.

	TRADE	
	1960	1961
	Lei	Lei
Imports.....	3,886,700,000	4,886,700,000
Exports.....	4,303,700,000	4,757,100,000

No complete figures for foreign trade have been published since the start of the Communist régime. Imports are chiefly semi-manufactured goods, raw materials, machinery and metals; exports consist principally of maize, wheat, barley, oats, petroleum, timber and cattle. Trade with U.K., although relatively small has increased notably since the signature of an Anglo-Roumanian trade arrangement in 1960.

Trade with U.K.

	1960	1961
Imports from U.K....	£3,044,469	£13,566,252
Exports to U.K.....	3,901,074	6,064,950

About 65 per cent. of Roumanla's foreign trade is now with the Soviet Union and the other countries of Eastern Europe. Roumania is a member of the Soviet-sponsored "Council for Mutual Economic Assistance."

CAPITAL, Bucharest, on the Dimbovitza, population (1960) 1,225,507. Other towns with a population of over 100,000 in 1960 are: Cluj (161,931); Timsoara (146,988); Brasov (for a time called Stalin) (128,882); Ploesti (125,724); Iasi (123,172); Ψ Constantza (112,993); Arad (112,457); Ψ Bralla (110,901); Craiova (108,773); Oradea (105,949); Ψ Galati (105,048).

FLAG.—Three vertical bands, blue, yellow, red, with the emblem of the Republic in the centre band.

BRITISH LEGATION

24 Strada Jules Michelet, Bucharest 3

Minister, His Excellency James Dalton

Murray, C.M.G..... £4,115

1st Secretary, J. I. McGhie.

Military Attaché, Lt.-Col. A. C. F. Godwin.

RUANDA

(Republic of Ruanda)

President, Grégoire Kayibanda, born 1925; elected

Oct. 26, 1961; assumed office, July 1, 1962.

A small state situated in North Central Africa, between Tanganyika and the Congolese Republic, Ruanda became an independent republic on July 1, 1962. Formerly part of the Belgian-administered trusteeship of Ruanda-Urundi, it has an area of 10,169 sq. miles and a population estimated at 2,634,500, mainly of the Batutsi and Bahutu tribes and some 50,000 pygmies. Coffee and cotton are grown and there is some mineral production. Cattle and hides are also exported.

At a referendum held in September, 1961, under supervision of the United Nations, a large majority voted against the retention of the monarchy which was accordingly abolished on Oct. 2, 1961. Elections for a new Legislative Assembly were also held in September, 1961, and the Assembly elected M. Kayibanda as President of the National Council, to hold office as Head of State and Head of the Government. Admission of Ruanda to membership of the United Nations was approved on July 26, 1962.

CAPITAL.—Kigall.

British Embassy.—An ambassador to the new states of Burundi and Ruanda was appointed in 1962, to be resident at Usumbura, Burundi. See BURUNDI.

SALVADOR

(República de El Salvador)

President, Lt.-Col. Julio A. Rivera; elected April 29,

1962; assumed office July 1, 1962.

Vice-President, Dr. Francisco Lima.

Minister of Foreign Affairs, Dr. Escobar Sorzano.

SALVADOREAN EMBASSY IN LONDON

6 Roland Gardens, S.W.7

[Fremantle: 2455]

Ambassador, Dr. Antonio Melendez (1958).

Secretary and Consul-General, Dr. Ricardo González.

Area and Population.—The Republic of El Salvador extends along the Pacific coast of Central America for 160 miles with a general breadth of about 50 miles, and contains an estimated area of 7,722 square miles, with a population (Census of 1961) of 2,501,278. El Salvador is therefore one of the most densely populated countries of the new world. It is divided into 14 Departments.

The surface of the country is very mountainous, many of the peaks being extinct volcanoes. The highest peaks are the Santa Ana volcano (7,700 ft.) and the San Vicente volcano (7,200 ft.). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot, but towards the interior the altitude tempers the severity of the heat. Much has been done in recent years to improve sanitary conditions and services. There is a wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of El Salvador, the most recent being that of May 6, 1952, when the towns of Jucuapa and Chinameca were destroyed.

The principal river is the Rio Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while farther away and to the west lies the smaller but very picturesque lake of

Coatepeque, which appears to have been formed in a vast crater flanked by the Santa Ana volcano.

Government.—Salvador was conquered in 1525 by Pedro de Alvarado, and formed part of the Spanish vice-royalty of Guatemala until 1821. In 1839 the Republic broke away from the federation of Central American States. A new Constitution was adopted in 1950. The President is elected for six years and the Legislature for two. President Lemus was elected in 1956, but was deposed in Sept., 1960. A five-man *Junta de Gobierno* assumed power, but was itself deposed in Jan., 1961, when a Civil-Military Directory took office. The Directory enacted by decree a sweeping programme of social reforms and held elections for a Constituent Assembly on December 17, 1961. This Assembly re-enacted the 1950 Constitution with some amendments and elected a provisional President. Presidential elections were then held on April 29, 1962, at which the only candidate was Colonel Rivera. Colonel Rivera was formerly a member of the Civil-Military Directory and had resigned in September, 1961, to lead the official *Partido Conciliación Nacional*.

Production and Industry.—The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes; cane sugar is also produced, as well as cotton, maize, sesame, indigo, rice, balsam, etc. In the lower altitudes towards the east, sisal is produced and used in the manufacture of coffee and sugar bags.

Education.—The illiteracy rate is about 50 per cent. Primary education is nominally compulsory, but the number of schools and teachers available is too small to enable education to be given to all children of school age. In recent Budgets, however, a high percentage of the national revenue has been devoted to education and great efforts are being made to eliminate the existing shortage of schools and teachers.

Language and Literature.—The language of the country is Spanish. Indigenous literature has not yet produced work of international repute. There are 4 daily newspapers published at the capital, and 4 in the provinces.

Communications.—A British railway (the Salvador Railway Co.), nearly 100 miles in length, connects Acajutla with the capital and with the important coffee centre of Santa Ana. The International Railways of Central America have a line from the port of La Unión (on the Gulf of Fonseca) to the capital and another one in the opposite direction which taps the richest coffee growing region in the country and proceeds to Zacapa (in Guatemala) thereby affording continuous railway communication between San Salvador and Guatemala City and Puerto Barrios on the Caribbean coast. The re-draining and re-paving of most of the capital has been completed, as has also the macadamizing or paving of several hundred miles of rural roads, many of which are now passable all the year round. There is a good motor road between the port of La Libertad and the capital (23 miles), while motor transportation is possible throughout the year between the capital and Guatemala City. The Pan-American Highway from the Guatemalan frontier follows this route and continues to the Honduran frontier. The highway is now completed through the country. Pan-American Airways, TACA, TAN, LANICA, SAHSA and LACSA connect El Salvador with the rest of the world.

There are post and telegraph offices throughout the country. There are many broadcasting stations and two television stations.

FINANCE

	1961 Colones	1962 Colones

There is a Consular Office at *La Libertad*.

San Salvador is 5,700 miles from London.

SAN MARINO

(Repubblica di San Marino)

Regents, Two "Capitani Reggenti",

CONSULATE GENERAL IN LONDON

19 St. Peter's Road, St. Margaret's,
Twickenham, Middlesex

[Popesgrove: 9213]

Consul General, R. E. Rudge.

A small Republic in the hills near Rimini on the Adriatic, founded, it is stated, by a pious stonemason of Dalmatia in the 4th century. The Republic always resisted the Papal claims and its integrity is respected by Italy. The Republic is governed by a State Congress of 10 members, under the Presidency of two Captains-Regent. There is a general legislative council of 60 members elected by a universal suffrage for a term of 5 years. A Council of Twelve forms a Supreme Court of Justice. The area is approximately 23 square miles, the population about 17,000. There is an army of 180. The city of San Marino, on the slope of Monte Titano, has three castles, a fine church and Government palace, a theatre and a museum. The principal industries are wine, cereals, cattle, ceramics, lime, concrete, cotton yarns, colour and paints. A Treaty of Extradition between the Governments of Great Britain and the Republic of San Marino has been in force since 1899.

In 1962 revenue and expenditure balanced at lire 2,333,496,875. The capital San Marino, has a population of 2,000.

FLAG.—Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

SAUDI ARABIA

(al Mamlaka al Arabiyya as-Sa'udiyya.)

King of Saudi Arabia, H.M. King Saud bin Abdul Aziz, G.B.E., born 1902, succeeded Nov. 9, 1953. The Saud family previously ruled in Nejd but was deposed by Ibn al Rashid and took refuge in Kuwait. Ibn Saud, the father of the present king, occupied Riyadh in 1900 and conquered the larger part of Nejd in 1913. In 1921 he became Sultan of Nejd, conquered the Hejaz and became King in 1926. He changed the name of his Kingdom to Saudi Arabia in 1932.

Crown Prince, H.R.H. Amir Faisal bin Abdul Aziz, G.B.E., born 1904.

Foreign Affairs, Shaikh Ibrahim al Sewayel.
 Defence and Civil Aviation and (Acting) Economy and Finance, H.R.H. Mohammed bin Saud.
 Interior, Prince Faisal bin Turki bin Abdul Azziz.
 Agriculture, Shaikh Abdullah Dehag.
 Education, Shaikh Abdul Aziz bin Hassan.
 Trade and Supplies, Shaikh Ahmed Shata.
 Communications, Sheikh Atallah es-Saad.
 Oil and Mineral Resources, Shaikh Abdullah Tariqi.
 Health, Dr. Hassan Latif.
 Labour and Social Affairs, Sbaikh Nassir el-Manqur.

EMBASSY IN LONDON.

(Diplomatic relations suspended.)

The Kingdom of Saudi Arabia, so named since Sept. 20, 1932, is a personal union of two countries, the Sultan of Nejd being also King of the Hejaz.

By the Treaty of Jeddah (May 20, 1927) Great Britain recognized Ibn Saud as an independent ruler, King of the Hejaz and of Nejd and its Dependencies.

The total area of the Kingdom is about 927,000 sq. miles, with an estimated population of not more than 6 millions.

In the 18th century Nejd was an independent State and the stronghold of the Wahhabi sect. It subsequently fell under the Turkish yoke, but in 1913 Ibn Saud threw off Turkish rule and captured from the Turks the Province of Hasa. In 1921 he added to his dominions the territories of the Rashid family of Jehel Shammar, which he captured by force of arms; in 1925 he completed the conquest of the Hejaz, and in 1926 accepted the surrender of the greater part of Asir, the whole of which is now part of the Kingdom.

Neja ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahana Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic and is estimated at close on 3,000,000, the majority being Moslems of the Wahhabi movement. There is little agriculture, but wheat and barley are grown, and there is an experimental farm, irrigated from natural deep pools and covering 3,000 acres, at al-Khari, about 50 miles south of Riyadh. The principal occupation of the bulk of the population is camel and sheep raising, but oil makes by far the largest contribution to the economy of the country. Oil was found in commercial quantities at Dammam, near Dhahran in the Hasa in 1938, and by 1955 production of crude oil from field storage amounted to over 350,000,000 barrels per annum. Exports other than oil are negligible. The capital is Riyadh (100,000), and the principal trading centres are Hofuf (the chief

town of the Hasa province) (100,000), Ψ Al Khobar and Ψ Dammam on the Persian Gulf littoral, Anaiza, Buraida, Hail (20,000), and Jauf. The old ports (Persian Gulf) were Ψ Qatif, Ψ Uqair and Ψ Al Khobar, which were suitable only for sailing craft, but the Arabian-American Oil Company, which is exploiting the Hasa oil under a 60 years' lease, has built a deep-water port for its own purposes at Ψ Ras Tannura, and a civil deep-water port, with a pier seven miles long, was brought into use at Ψ Dammam in 1950. A railway is now in operation from Dammam through Hofuf to Riyadh.

The Hejaz ("The Boundary"—between Nejd and Tihamah) extends from Asir in S. to Transjordan in N., and from the Red Sea, the Gulf of Akaha in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 1,000,000 to 1,500,000, including many nomad tribes. On the coast are the small ports of El Wejeh, Yanhu', Raheg, Gizan and Ψ Jeddah, the main port of Saudi Arabia. Jeddah contains the ruins of the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the course of the disused Sandi-Arabian section of the Hejaz Railway which is scheduled for reconstruction. The Oasis of Khaibar, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. Medina (al Madinah al Munawwarah, "The City of Light"), once the terminus of the Hejaz Railway, 820 miles from Damascus, has a permanent population of about 20,000 and is celebrated as the hural place of Muhammad, who died in the city on June 7, 632 (12 Rabla, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. Mecca, the birth-place of the Prophet, is 45 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 100,000. The city contains the great mosque surrounding the Kaaba, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gahriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. Ψ Jeddah (200,000) is the principal port and commercial centre.

Asir ("The Inaccessible") extends, geographically, from a line drawn inland from Birk on the southern limit of Hejaz to the northern boundary of the Yemen, some 12 miles N. of the port of Meldi. Its breadth extends about 180 miles eastwards to Bisha in the north and to the boundary of the Beni Yam in the south. According to ancient Arab geographers, Asir used to be considered as a part of the Yemen. The territory includes the Farsan Islands, where prospectors have searched for oil, but without success. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasture and bear grain. Capital, Abha.

Trade and Finance.—Formerly the annual pilgrimage to the Holy Places of the Hejaz provided Saudi Arabia with virtually the whole of her means of payment for imports. It is therefore not surprising that the foreign trade of the country was largely conducted by the merchant communities of Jeddah and Mecca. Industry was, and is, almost non-existent. Imports are estimated to have averaged about £2,500,000 annually before 1939, of which the United Kingdom contributed less than £100,000. India was traditionally Saudi

Arabia's principal commercial connection; and indeed the legal tender of Saudi Arabia, the silver rial, is of the same weight and fineness as the old Indian rupee. Religious objections to usury have affected the development of banking in Saudi Arabia. Though paper money is widely used, it is not officially recognised as currency. It has virtually supplanted gold as a means of payment for transactions nevertheless. Exchange rates, which were formerly subject to violent fluctuations, have now been given a considerable degree of stability by the operations of the Saudi Arabian Monetary Agency. The country shared the inflationary experiences of other Middle East countries during the war years. The effect of oil developments and of investment, mainly American, in Saudi Arabia has been to revolutionize the country's foreign exchange position and greatly to increase the size of the market.

Trade with U.K.

	1960	1961
Imports from U.K.	£6,179,561	£6,696,309

Communications.—The railway from the port of Dammam to the oilfields at Abqalq and through Hofuf to Riyadh was opened late in 1951. The only completed metalled road, apart from those in the oilfields area, connects Mecca with its Port of Jeddah, but a new road from Jeddah to Medina (about 420 miles) was partially completed by a British firm and the remainder has been completed by a local contractor. The Saudi Arabian Government employs Transworld Airlines to pilot and maintain the Government-owned Saudi Arabian Airlines with Dakota, Skymaster, Conair and Bristol aircraft. Scheduled services are flown between Jeddah, Taif, Riyadh, Hofuf and Dhahran. There are first-class airports at Dhahran, originally built by the United States Army as a military base, and at Jeddah. The other airfields named are being developed. Saudi Arabian airlines also maintain regular services to Cairo and Beirut. Twice-weekly services operated by Aden Airways, Arab Airways (both subsidiaries of B.O.A.C.), Air Liban and Misraï call at Jeddah, the route of Aden Airways including Cairo-Luxor-Jeddah-Port Sudan-Asmara-Kamaran-Aden and return.

Education.—There are over 300 Government schools, mostly primary, but including seven secondary schools and one preparatory school, which prepares students who have completed their secondary course for University training, in Egypt or elsewhere. There is no University in Saudi Arabia. With three exceptions, all schools are maintained by the Government. Instruction is given to boys only. There are no girls' schools.

SAUDI ARABIAN FLAG.—Green oblong, white Arabic device in centre: "There is no God but God, Muhammad is the Prophet of God," and a white scimitar beneath the lettering.

CAPITAL, Riyadh, population about 100,000.

BRITISH EMBASSY

Saudi Arabia severed diplomatic relations with the United Kingdom on November 6, 1956. The Government of Pakistan has assumed responsibility for the protection of British interests in Saudi Arabia.

SOMALIA
(Somali Republic)

President, Aden Abdulle Osman, *elected* July 6, 1961, for a term of six years.

Prime Minister, Dr. Abdi Rashid Ali Shirmarke.
Minister of Foreign Affairs, Abdullabi Issa.

The Somali Republic occupies part of the north-east horn of Africa, with a coast-line on the Indian Ocean extending from the boundary with Kenya (2° South latitude) to Capo Guardafui (12° N.); and on the Gulf of Aden to the boundary with French Somaliland. Somalia is bounded on the west by French Somaliland, Ethiopia and Kenya and covers an area of approximately 288,000 sq. miles. The population, of which a large proportion is nomadic, is estimated (1961) at 1,990,000. Cattle raising is the main occupation in Somalia and there is a modest export trade in cattle on the hoof, skins and hides. Italy imports the bulk of the banana crop under agreement with the Somali Government.

Government.—The Somali Republic, consisting of the former British Somaliland Protectorate and the former Italian trust territory of Somalia, was set up on July 1, 1960. British rule in Somaliland lasted from 1887 until June 26, 1960, with the exception of a short period in 1940-41 when the Protectorate was occupied by Italian forces. Somalia, formerly an Italian colony, was occupied by the United Kingdom from 1941 until the end of 1950, when it was placed under Italian administration by resolution of the United Nations. This trusteeship came to an end on July 1, 1960, when Somalia became independent and united with the former British Somaliland Protectorate under the title of the Somali Republic. The President of the Legislative Assembly of Somalia was elected provisional first President of the Republic. Aden Abdulle Osman was returned to office as the first substantive President of the Republic and a new government was formed on July 27, 1961.

EMBASSY IN LONDON

South Africa House, Trafalgar Square, W.C.2
 [Whitehall: 4488]

Ambassador Extraordinary and Plenipotentiary, His Excellency, Dr. Hilgard Muller (1961).

Area and Population.—The Republic occupies the southernmost part of the African continent from the courses of the Limpopo, Malopo and Orange Rivers (34° 50' 22" South latitude) to the Cape of Good Hope, with the exception of Basutoland, Bechuanaland and Swaziland, and part of Mozambique. It has a total area of 472,359 square miles, and a total population (census of 1961, preliminary) of 1,584,128 (White, 3,067,638; African, 10,807,809; Coloured, 1,488,267; and Asian, 477,414). Populations of the Provinces at the 1961 census (preliminary figures) were: Cape Province (278,465 sq. miles), 5,308,839; Natal (33,578 sq. miles), 2,933,447; Transvaal (110,450 sq. miles), 6,225,052; Orange Free State (49,866 sq. miles), 1,373,790.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the districts of Babanango, Vrheid and Ngotshe and by Swaziland. In 1951, the appointment was confirmed of Cyprian Bekuzulu, grandson of Dinizulu and great-grandson of Cetewayo, as Paramount Chief of the Zulus in Natal.

The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Swartberg* and *Langberg* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Roggeveld* and *Nuweveld* ranges to the north is the Great Karroo Plateau, which is bounded on the east by the *Suecuberg*, containing the highest summit in the province (Kompassberg, 7,800 feet). In the east are ranges which join the *Drakensberg* (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magaliesberg* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the High Veld of the south, the Bankenveld of the centre, and the Low Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a fertile sub-tropical area. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces. The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the Drakensberg and flowing

into the Atlantic between the Territory of South West Africa and the Cape Province. The *Limpopo*, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

Government.—The self-governing colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, 1910, under the South Africa Act, 1909, in a legislative union under the name of the Union of South Africa, the four colonies becoming Provinces of the Union. The Union of South Africa continued as a member of the British Commonwealth until 1961, the Crown being represented by a Governor-General. A referendum held among white voters on October 5, 1960, decided by a narrow majority in favour of Republican status. 1,633,772 votes were cast—a poll of 90.73 per cent.—with 52.05 per cent. in favour. The Union of South Africa became a republic on May 31, 1961, and withdrew from the Commonwealth. Mr. C. R. Swart, Governor-General of the Union from Jan. 12, 1960, resigned on April 30, 1961, and was elected the first President of the Republic on May 10, by an electoral college consisting of the members of both Houses of Parliament. The President assumed office on May 31, 1961.

The *Senate*, as reconstituted by the Senate Act, 1960, consists of 54 members, appointed or elected for a term of five years. Eleven are appointed by the Government (8 for the Republic, 2 for South West Africa and a Coloured representative). Forty-three are elected (Transvaal, 14; Cape Province, 11; Natal and Orange Free State, each 8; and South West Africa, 2). The Act of 1960 reintroduced proportional representation at elections to the Senate and excluded Native representation.

The *House of Assembly* consists of 160 elected members, 52 of whom represent the Cape of Good Hope, 16 Natal, 68 Transvaal, 14 the Orange Free State, and 6 South West Africa. There are also 4 members elected under the Separate Representation of Voters Act, 1951, to represent the electoral divisions for the coloured voters in the Cape Province. Members of both Houses must be South African citizens of white descent. White female franchise was introduced under the provision of Act No. 18 of 1930. Cape Bantu voters ceased to be entitled to elect 3 members in Nov. 1959.

After the General Election on Oct. 18, 1961, the party representation in the House of Assembly was as follows: Nationalist Party, 105; United Party, 49; National Union, 1; Progressive Party, 1; Representatives of Coloured Voters, 4. Total, 160.

Defence.—The South Africa Defence Act, 1957, became law on Nov. 1, 1958. This Act, as amended in 1961, provides that every citizen between the ages of 17 and 65 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed course of peace training with the Citizen Force or Commandos spread over a period of four consecutive years. Thereafter citizens are required to serve with the Reserve for a prescribed period of time.

Education.—The Provinces have been relieved of all vocational education (technical and industrial), and the Department of Education, Arts and Science under the Minister is concerned with 9 Universities, 11 technical colleges, schools of industries, reformatories and State technical, housecraft and commercial high schools, State-aided vocational schools and State and State-aided special schools for the physically handicapped. There are two non-white university colleges and three Bantu university colleges, students of these taking the examinations

of the University of South Africa. The number of full-time students at the universities in June, 1960, was 26,947.

The central direction of public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces. Each Department is controlled by a Director. The majority of schools for whites in all the Provinces are state schools. In all Provinces primary education in schools for all races is free. Secondary education in all the Provinces is also free, with an age limit of 19 years in the Cape Province. Expenditure on education in 1959-60 by the Central Government was R.41,823, and by provincial administrations R.122,667, a total for the Republic of R.164,490.

Communications.—The total open mileage of Government-owned railway lines at the end of March, 1961, was 13,635 miles, of which 13,187 miles were 3 ft. 6 in. gauge and 448 miles 2 ft. gauge. The capital expenditure on Government railways up to March 31, 1961, amounted to R363,307,376. Working expenditure (excluding depreciation) amounted to R199,327,957. Internal air services are operated between all the major centres in South and South West Africa. Regional air services are operated between Johannesburg and the Federation of Rhodesia and Nyasaland, East Africa, Central Africa and Portuguese East Africa. The "Springbok Service" is operated jointly by South African Airways and the British Overseas Airways Corporation, using modern aircraft and providing a regular service between Johannesburg and London.

In the year ended March 1961, South African ports handled 18,994,435 tons of goods, excluding mail, passengers' baggage and stores, in the overseas trade, and 1,032,296 tons in coastwise trade. The total harbour revenue in 1960-61 was R18,832,038, the expenditure R12,801,747. Ψ The principal ports are Cape Town, Port Elizabeth, and East London; Durban; Walvis Bay and Luderitz Bay.

On March 31, 1961, there were 3,286 post and 3,520 telegraph offices open.

Production and Trade.—The principal crops produced in 1960 (lbs. '000) were wheat, 1,513,931; barley, 30,558; oats, 100,009; kaffir corn, 476,600; mealies, 8,067,000; and groundnuts, 266,872.

Mineral production is of the greatest importance in the South African economy, value of production in 1961 being (R1,000): gold, 569,524; diamonds, 37,252; coal, 59,687; copper, 20,693; tin, 2,272; silver, 1,622; asbestos, 22,256 and export sales of prescribed minerals 79,267,992. 43,613,000 tons of marketable coal were produced in 1961.

Value of trade in 1961 (with 1960 figures in *italic* type) was: R1,005,701,016 (R1,111,253,832); Exports, R948,728,096 (R884,067,777).

Trade with U.K.*

	1960	1961
Imports from U.K.	£154,033,784	£147,100,693
Exports to U.K.	96,410,426	103,264,927

*Excluding gold bullion and specie.

Currency.—The South African £ reached parity with the £ sterling in 1946. A new decimal currency the *Rand* (R.) was introduced in South Africa on Feb. 14, 1961, including the British High Commission Territories of Basutoland, Bechuanaland and Swaziland. By agreement with the International Monetary Fund the par value of the *Rand* had previously been fixed at 10s. sterling. Five silver coins, the *crown* (50 cents); *florin* (20 cents); *shilling* (10 cents); *6d.* (five cents); and *3d.* (2½ cents);

and bronze coins, 1 cent and ½-cent were struck for ordinary use. (See also p. 84.)

Finance.—Revenue of the Republic of South Africa in 1961-62 totalled R737,800,000 (1960-61, R730,600,000), expenditure R723,400,000 (1960-61, R657,500,000). The Gross Public Debt of the Republic on March 31, 1962, was R2,638,000,000.

CAPITAL.—The administrative seat of the Government is PRETORIA, Transvaal; population (census of 1960, preliminary), 415,989; the seat of the Legislature is Ψ CAPE TOWN, population (1960), 731,481. Cape Town is 5,979 miles from Southampton; transit by mail steamship 14 days, and by air mail two days. There is a modern and well-equipped aerodrome seventeen miles by road from the centre of the city. Cape Town's harbour and docking facilities, existing and projected, are in keeping with its status as a world port of commercial and strategic importance. Other large towns are Johannesburg, Transvaal (1,096,541); Ψ Durban, Natal, the principal harbour on the south-east coast (655,370); Germiston, Transvaal (204,605); Ψ Port Elizabeth, Cape (270,815); BLOEMFONTEIN, capital of Orange Free State (140,924); Benoni, Transvaal (135,467); Springs, Transvaal (135,231); PIETERMARITZBURG, capital of Natal (95,124); Veerening-Vanderbyl Park, Transvaal (115,892); and Ψ East London, Cape (114,584).

FLAG.—Three horizontal stripes of equal width; from top to bottom, orange, white, blue; in the centre of the white stripe, the old Orange Free State flag hanging vertical, towards the pole the Union Jack horizontal, away from the pole the old Transvaal Vierkleur, all spread full. The national flag was adopted by the Union in 1927 and was flown side by side with the Union Jack. This practice was expected to be continued in Natal.

South West Africa.

Administrator, D. T. du P. Viljoen.

SOUTH WEST AFRICA lies between S. lat. 17° 23' and the Orange River, with a narrow strip between 17° 30'-18° 20' S. lat. extending from 21° to 25° E long., known as the Caprivi Zipfel, and gives access to the Zambesi. Off the coast are a number of guano islands (Hollandsbird, Mercury, Ichaboe, Seal, Penguin, Halifax, Loag, Possession, Albatross, Pomona, Plumpudding, Sinclair and Roastbeef Islands).

The estimated area of the country is 318,261 square miles, and the population (1961 census, preliminary) is 525,064, of whom 73,154 are whites.

South West Africa was occupied by Germany in 1884, but at the conclusion of the War of 1914-1918 the territory was mandated to the Union of South

Africa in accordance with the Treaty of Versailles. Under the Union Act No. 49 of 1919, the exercise of the mandate was vested in a Governor-General, who delegated his powers to an Administrator appointed by the Union Government. A limited measure of self-government was conferred upon the inhabitants by the Union Act No. 42 of 1925. Fundamental and far-reaching changes in the constitutional position of the Territory were introduced by the passing of the South-West Africa Affairs Amendment Act, 1949 (No. 23 of 1949). The Advisory Council was abolished and all 18 members of the Legislative Assembly are now chosen by the registered voters of the Territory.

The Territory is represented in the House of Assembly of the Republic of South Africa by six members duly elected by the registered voters of the Territory and in the Senate by four Senators, of which two are elected and two nominated by the Republican Government.

Generally speaking, only the Parliament of the Republic has the power to legislate on those matters in respect of which the Legislative Assembly is not competent to legislate, and the Legislative Assembly in respect of other matters.

On July 11, 1950, the International Court of Justice at The Hague delivered an opinion that South West Africa was still under international mandate; that international obligations resulting from the mandate were still incumbent on the Union, including obligation to submit reports on its administration; and that South Africa was not competent to modify its international status without consent of the United Nations.

The Capital of the Territory is Windhoek, which lies practically in the centre of the country at 5,500 ft. above sea-level. The ports are Ψ Walvis Bay and Ψ Luderitz. The port and enclave of Walvis Bay, constitutionally and administratively, are however part of Cape Province and not of South West Africa.

Area and Population.—A National State in the south-west of Europe, between 36°-43° 45' N. lat. and 4° 25' E.-9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees. Continental Spain occupies about eleven-thirteenth of the Iberian peninsula, the remaining portion forming the Republic of Portugal. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 166,700 square miles, with an estimated population (Dec., 31, 1960) of 30,430,698. Provisional returns for 1961 gave 645,260 births, 256,211 deaths and 237,160 marriages. Infant mortality was estimated at 3.8 per 100 births in 1961.

Physical Features.—The interior of the Iberian Peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, Sierra Morena, Sierra Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho.

Government.—Phoenician traders visited the peninsula more than a thousand years before the Christian era, but they were traders rather than settlers, although Cadiz has preserved its identity and claims to be "the oldest city in the world." The Roman occupation of Spain was completed after the close of the Second Punic War (201 B.C.) and *Hispania* was divided into two provinces. After the decline of the Roman Empire the Italian elements, which had partly displaced the Celts and Iberians, were in turn disturbed by settlers of Germanic origin. After the union of Aragon and Castile in the 15th century Spain was ruled by sovereigns of the Aragon, Habsburg and Bourbon lines (with the intervention of a Republic 1873-74). Alfonso XIII, succeeding at birth in 1886. On April 14, 1931, following the results of the Municipal Elections, which showed anti-monar-

chical feeling to be extremely high in all the chief towns of Spain, King Alfonso XIII. left the country, and the Queen and other members of the Royal Family on the following day. A Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. The Republican Assembly (*Cortes*) was a single Chamber Congress of Deputies. Each Province had an Assembly (*Diputación Provincial*), and, with the approval of the *Cortes*, Provinces might combine to form an Autonomous Region within the Republic.

On July 18, 1936, a counter-revolution broke out in many military garrisons in Spanish Morocco and spread rapidly throughout Spain. The principal leader was General Francisco Franco Bahamonde, formerly Governor of the Canary Islands, from which office he was dismissed by the Azaña Government. The struggle, in its later phases, threatened to cmhroil some of the European Powers, those of Nazi-Fascist tendency lending aid to General Franco (leader of the Military-Fascist fusion, or *Falange*) while those of Communist views supported the Azaña (*Popular Front*) government. In October, 1938, many of the supporting troops were withdrawn, and on March 29, 1939, the Civil War was declared to have ended, the Popular Front Governments in Madrid and Barcelona surrendering to the *Nationalists* (as General Franco's followers were then named). On June 5, 1939, the Grand Council of the *Falange Española Tradicionalista y de las Juntas Ofensivas Nacional-Sindicalistas*, which replaced the former *Cortes*, met at Burgos to legislate for the reorganization of the country under the Presidency of General Franco, who had assumed the title of *Caudillo* (Leader) of the Empire and Chief of the State. In the Civil War of 1936-39 over 1,000,000 lives were lost.

On July 1, 1942, General Franco announced the reinstatement of the *Cortes de España*, which was composed (May, 1955) of 515 members: *ex officio* members—16 ministers, 101 National Councillors of Falange, the President of the Council of State, the President of the Supreme Court of Justice, the President of the Supreme Court of Military Justice, 12 rectors of universities, 3 presidents of Royal Academies, and 52 mayors of the provincial capitals including Ceuta and Melilla. *Elected Members*—159 representatives of national syndicates, 101 representatives of municipalities, 4 representatives of Royal Academies, and 15 representatives of professions. *Nominated Members*—50 persons of high ecclesiastical, military, administrative or social rank.

On April 1, 1947, a Law of Succession was promulgated creating two new bodies: the Council of the Realm and the Council of Regency. The main duty of the Council of the Realm is to nominate a successor to Generalissimo Franco should the latter not already have done so before the time of his decease or incapacitation. The Council of Regency is intended to rule during an interregnum and in the absence abroad of the Head of State; it has a membership of three. On July 6, 1947, a referendum asking approval of this law was announced (July 27) to have received 14,145,163 affirmative votes out of a recorded total of 15,219,563. Under this law a Regency Council of three was to be set up in the event of the death or incapacitation of the Head of the State.

Defence.—*Army*: Spain is divided into nine Military Regions, the Balearic Islands' Command, North Africa Command, and Canary Islands, West Africa Command. Each Military Region contains one or more Divisions, and, with the exception of 9th Military Region, possesses a Corps H.Q. There are in Spain one Armoured, one Cavalry, four

Mountain and seven Infantry Divisions of which three are mechanized. There are also an Airborne Brigade and Independent brigades of Infantry, mechanized Cavalry and Artillery in the Peninsula. The Spanish Army in North Africa consists of the strong garrisons of Ceuta, Melilla and the Spanish islands in North Africa. In Canary Islands and West Africa an Inter Service Command under an Army general, contains long service forces in which the Legion is predominant. The Guardia Civil also forms part of the Army though it operates as a gendarmerie in the rural areas under control of the Ministry of the Interior. Marines are now wholly under Naval command.

The active *Navy* consists of 3 cruisers, 6 destroyers, 27 A/S escorts (destroyers, frigates and corvettes), 3 minelayers, 19 minesweepers, 3 landing ships, 2 squadrons of helicopters and a large number of small craft. An extensive modernization programme was completed in 1961.

The *Air Force* is divided into 5 Air Regions with 2 overseas Air Zones, and a separate, functional Air Defence Command. It consists of 5 Fighter Wings, 2 Fighter-Bomber Wings, 3 Light Bomber Wings and 2 Transport Wings, with many training and rescue aircraft.

Education.—Primary education is free, but compulsory attendance cannot be enforced because of the inadequate number of schools. Official figures of illiteracy in 1950 give a total number of illiterates, excluding children under 10, of 3,983,890, or 14.24 per cent. of the population (men, 9.86 per cent., women, 18.30 per cent.). There are 11 Universities in continental Spain and 1 at La Laguna in the Canary Islands. The University of Salamanca was founded in 1230, Valencia (1245), Oviedo (1317), Valladolid (1346), Barcelona (1450), Saragosa (1474), Santiago (1501), Seville (1502), Granada (1526), Madrid, Murcia (1915).

Language and Literature.—Castilian is the language of more than two-thirds of the population of Spain and is the form of Spanish spoken in Mexico, Central and (except in Brazil) Southern America. Basque, reported to have been the original language of Iberia, is spoken in the rural districts of Vizcaya, Guipuzcoa and Alava. Catalan is spoken in Provençal Spain, and Galician, spoken in the north-western provinces, is allied to Portuguese. The literature of Spain is one of the oldest and richest in the world, the *Poem of the Cid*, the earliest and best of the heroic songs of Spain, having been written about A.D. 1140. The outstanding writings of its golden age are those of Miguel de Cervantes Saavedra (1547-1616), Lope Felix de Vega Carpio (1562-1635) and Pedro Calderón de la Barca (1600-1681). The Nobel Prize for Literature has three times been awarded to Spanish authors—J. Echegaray (1904), J. Benavente (1922) and Juan Ramón Jiménez (1956).

FINANCE 1961

Revenue.....	Pesetas	81,066,600,000
Expenditure.....		73,897,900,000

Public Debt (December 31, 1961) excluding parastatal organizations and State-guaranteed issues: Pesetas 95,222,540,000.

The rate of exchange for the *peseta* in June, 1961, was 168.0 *pesetas* = £1 sterling (see also p. 84).

Production and Industry.—The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, apricots and grapes. The agricultural products include wheat, barley, oats, rice, hemp and flax. In 1961 the orange crop, of which Germany, the United Kingdom and France were the chief importing countries,

amounted to 1,540,000 tons. The vine is cultivated widely; in the south-west, Jerez, the well-known sherry and tent wines are produced.

Spain's mineral resources of coal, iron, wolfram, copper, lead and other ores are variously exploited. Many of the richer and more easily worked deposits have been exhausted, but the authorities are actively engaged in stimulating the exploitation of hitherto unworked or lower grade deposits. In 1961 the coal output amounted to 15,759,000 tons and iron ore 6,065,000 tons. The iron and steel industries produced 2,200,000 tons of pig iron and 2,330,000 tons of steel. Other production figures (in tons) included: cement, 6,108,000; lead, 66,000; zinc, 38,655; sulphuric acid, 1,023,000; paper, 381,400; cotton yarn, 88,600; and wool yarn 16,400. Production of electric power was 20,775 million kWh. The fishing industry is of importance.

The principal manufactures are textile goods of all kinds, footwear and other leather goods, ceramics, sewing machines, bicycles, chemical products and light engineering manufactures.

The tourist industry is becoming increasingly important and it is estimated that 5,496,000 tourists visited Spain in 1961.

Communications.—In 1960 there were 11,335 miles of railways in service. The sea-going mercantile marine in 1960 consisted of 1,742 vessels of 1,643,621 gross tons. Civil aviation is under the control of the Air Ministry; there are several inland and international services in operation.

TRADE

	1959 Pesetas	1960 Pesetas
Imports.....	47,690,405,000	43,280,199,000
Exports.....	29,859,709,000	43,501,454 000

There are Consular Offices at *Barcelona, Palma de Mallorca, Tarragona, Valencia, Cartagena, Granada, Seville, Cadiz, Jerez, Algeciras, La Linea, Vigo, Bilbao, San Sebastian, Tenerife, Las Palmas, Orotava (Canary Islands), Ceuta and Melilla (Morocco) and Madrid.*

BRITISH COUNCIL

Representative, D. A. A. Traversi, O.B.E., Calle Almagro 5, Madrid.

There are British Institutes at Madrid, Barcelona, Seville and Valencia.

BRITISH CHAMBER OF COMMERCE OF SPAIN. Carrera San Jeronimo 28, *Madrid*; Paseo de Gracia 11 (Segundo), *Barcelona*; Pascual y Genis 22, *Valencia*. Madrid, 1,150 miles; transit, 45 to 50 hours.

The BALEARIC ISLES are an archipelago off the east coast of Spain. There are four large islands (Majorca, Minorca, Iviza and Formentera) and seven smaller (Aire, Aucanada, Botafoch, Cahnera, Dragonera, Pinto and El Rey). The islands were occupied by the Romans after the destruction of Carthage and provided contingents of the celebrated Balearic slingers. The total area is 1,935 square miles, with a population of 441,842. The archipelago forms a province of Spain, the capital being Ψ Palma in Majorca, pop. 149,921; Ψ Mahon (Minorca), pop. 16,547.

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 908,718. The Canary Islands form two Provinces of Spain.—*Las Palmas* (Gran Canaria, Lanzarote, Fuerteventura and the islets of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lohos), with seat of administration at Ψ Las Palmas (pop. 177,746) in Gran Canaria, where major oil companies have installations for re-fuelling shipping; and *Santa Cruz de Tenerife* (Tenerife, La Palma, Gomera and Hierro), with seat of administration at Ψ Santa Cruz in Tenerife, pop. 124,462.

Trade with U.K.

ISLA DE LOS FAISANES or ILE DE LA CONFERENCE is a Franco-Spanish condominium, under the Treaty of Bayonne Dec. 2, 1855, and March 27, 1901. It lies at the mouth of the Bidassoa in La Higuera bay. It is uninhabited.

Ψ CEUTA is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 square miles, with a population of 64,000.

Ψ MELILLA is a town on a rocky promontory of the Rif coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492. The population is 87,000. Ceuta and Melilla are parts of Metropolitan Spain.

Spanish Colonies

The Spanish Colonies consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population estimated in 1935 at 951,000.

SPANISH GUINEA, consisting of the islands of Fernando Póo and Annobon, the Corisco Islands and Rio Muni (mainland) was divided into two provinces on April 1, 1960, each becoming a province of Metropolitan Spain under a civil governor, the inhabitants having the same rights as Spanish citizens. *Fernando Póo* lies in the Bight of Biafra in 3° 12' N. lat. and 8° 48' E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. With its dependencies it has an area of about 800 square miles, and a population estimated at 34,200. The capital of Spanish Guinea is Ψ Santa Isabel (pop. 9,000) on the island of Fernando Póo. The total area, mainland and islands, is about 10,000 sq. miles, with an estimated population of 204,495, of whom about 4,124 are whites.

Annobon Island (Anno Bom), in the Gulf of Guinea, in 1° 24' S. lat. and 5° 3E. long.; population 1,410.

Corisco Islands, consisting of Corisco, Elobey Grande, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce.

Rio Muni (the second province) is a coastal settlement between Cameroon and Congo (1° N.—2° 10' N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni Benito and Campa rivers, and at Ψ Bata (the principal town) on the coast.

WESTERN SAHARA.—Spanish possessions in the Western Sahara consist of two provinces—Ifrni and Spanish Sahara. Ifrni (capital, Sidi Ifrni) extends on the coast from the mouth of Bou Sedra (Asif Salogvad) (approximately 29° 38' N. lat.) to the River Assaka (Nun) which forms the S.W. boundary. The eastern boundary runs between 9° 50' and 9° 55' W. long. The coast line is 36 miles in length and the territory measures approximately 950 square miles. The province of Spanish Sahara extends from 27° 40' N. lat. in the north to La Agüera (Cape Blanco) in the south, though the main southern boundary runs along latitude 21° 20'. The land area is approximately 125,000 square miles. Spanish Sahara is divided into two regions separated by latitude 26° which passes south of Cape Bojador. The northern region is the Segula el Hamra (Rio Rojo) of which the capital is Aaitun. It extends eastward to approximately 8° 40' W. long. The southern region is the Rio de Oro, of which the capital is Villa Cisneros. Its eastern boundary is approximately 12° W. long. Total population about 36,000.

SPANISH MOROCCO.—In addition to Ceuta and Meilla, Spain exercised until 1956 a protectorate over a part of Northern Morocco. Moroccan independence was proclaimed after negotiations with France and Spain in 1956 (see "Morocco"). Remaining Spanish settlements on the Moroccan seaboard are:—

Alhucemas, the bay of that name includes six islands; population 366.

Peñon de la Gomera (or Peñon de Velez) is a fortified rocky islet about 40 miles west of Aihucemas Bay; population 450.

The Chaffarinas (or Zaffarines) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 610.

SUDAN

(Republic of the Sudan)

Council of Ministers

President, Prime Minister, Minister of Defence and Commander-in-Chief, Ferik Ibrahim Abboud.

Minister of Information and Labour, Lewa Mohammed Talaat Farid.

Works and Mineral Resources, Lewa Ahmed Rida Farid.

Minister of State for Cabinet Affairs and Deputy Commander-in-Chief, Lewa Hassan Beshir Nasr.

Communications, Lewa Ahmed Magdoub El Bahari. Commerce, Industry and Supply, Lewa Mohammed Ahmed Irwa.

Interior and Local Government, Miralaj Ei Magboul El Amin Ei Hag.

Education and Justice, Sayed Ziada Osman Arbab.

Finance and Economics, Sayed Abdel Magid Ahmed.

Foreign Affairs, Sayed Ahmed Mohammed Kheir.

Health (vacant).

Animal Resources, Sayed Santino Deng.

Agriculture, Irrigation and Hydro-Electric Power, Sayed Mekki El Manna.

[The first seven Ministers are also members of the Supreme Council for the Armed Forces.]

SUDANESE EMBASSY IN LONDON

3 Cleveland Row, S.W.1.

[Trafalgar: 8080]

Ambassador Extraordinary and Plenipotentiary, His Excellency Sayed Amin Ahmed Hussein (1961). 1st Secretaries, Mohamed Kamal ei Bakri; Mustafa Medani Abbasher.

3rd Secretary, Ali Yasseln Geiyy.

Military Attaché, Col. Suieman Ibrahim Mohamed. Press Attaché, Motasim ei Bereir.

Cultural Attaché, Bushra Abdel Rahman Soghayer. Assistant Cultural Attaché, Abul Gasim Badri.

Area and Population.—The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36' N. lat., and reaches from French Equatorial Africa about 21° 49' E. (at 12° 45' N.) to the north-west boundary of Eritrea in 38° 35' E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 950 miles.

The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Ethiopia; on the south lie Kenya Colony, the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa and Libya.

The *White Nile* enters from Uganda at the Sudan frontier post of Nimule in Equatoria Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. The *Blue Nile* flows from Lake Tana on the Ethiopian Plateau. Its course in the Sudan is nearly 500 miles long, before it joins the White Nile at Khartoum. The next confluence of importance is at Atbara where the main Nile is joined by the River Atbara. The total length of the Nile, now accepted as the longest river in the world, is estimated to be 4,160 miles from its source to the Mediterranean Sea. Between Khartoum and Wadi Halfa occur five of the six *Cataracts*.

The estimated area is about 976,750 sq. miles, with a population (estimated 1961) of 12,109,000, partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 8,000 Europeans. The Arabs and Nubians are all Moslems. The Negroes are generally pagans, but some have been converted to Christianity and others are beginning

to go over to Islam. Population of provinces at the census of 1956 was: Bahr-el-Ghazal 991,022; Blue Nile 2,069,646; Darfur 1,328,765; Equatoria 903,503; Kassaia 941,039; Khartoum 504,923; Kordofan 1,761,968; Northern 873,059; Upper Nile 888,611.

Government.—By virtue of the Condominium Agreement of 1899 between H.M. Government and the Egyptian Government, and Article 11 of the Anglo-Egyptian Treaty of 1936, the Sudan was administered by a Governor-General on the joint behalf of Great Britain and of Egypt.

On February 12, 1953, an Anglo-Egyptian Agreement guaranteed to the Sudanese the right to determine their own future and reserved the sovereignty of the Sudan until the day of self-determination for the Sudanese. The first Sudanese General Election was held at the end of 1953.

The Sudan House of Representatives on Dec. 19, 1955, voted unanimously a declaration that the Sudan was a fully independent sovereign state, and on Jan. 1, 1956, the Republic was proclaimed and was recognized by Great Britain and Egypt, a Supreme Commission being sworn in to take over sovereignty. On November 17, 1958, by means of a *coup d'état*, the Army took over control of the country. The constitution was suspended, Parliament and political parties dissolved. A Supreme Council of the Armed Forces and a Council of Ministers were set up.

Education.—Arabic has been adopted as the national language, and the Government has taken over formal education in the southern provinces, which had hitherto been largely in the hands of various Christian Missions. The University of Khartoum (formerly Gordon Memorial College) was raised to university status on July 24, 1956. It has about 1,600 students. Students graduating in 1962 numbered 197, compared with 168 in 1961.

There are some 22 secondary schools with 6,865 pupils; 131 intermediate schools with 24,000 pupils; some 1,000 elementary schools with 179,000 pupils and 1,480 junior elementary schools with 155,000 pupils. In technical education there are 17 intermediate schools with 2,016 pupils, 7 secondary schools with 802 pupils and 2 higher technical colleges with 750 students. There are 9 teacher training institutes for elementary and intermediate teachers, with some 900 students. In December, 1961, was opened the Higher Teacher Training Institute in Omdurman, with now some 150 trainees for secondary teaching. In summer 1961 there were 174 non-Government schools with 43,399 pupils. Thus governmental education at all levels is expanding rapidly.

Production.—The principal grain crop is *dura* (great millet), the staple food of the people in the Sudan. Sesame and ground-nuts are other important food crops, which also yield an exportable surplus and a promising start has been made with castor seed. The principal export crop is cotton. Main production is of long-staple (Egyptian type) cotton, but smaller quantities of short-staple (American type) cotton are also grown. Much of the high quality, long-staple cotton is provided by the Sudan Gezira Scheme, a Government-controlled project irrigated from the Sennar Dam on the Blue Nile. An extension to this known as the South West Extension (Managil Scheme) has also been producing long staple cotton since 1959. The Sudan also produces the bulk of the world's supply of gum arabic. Livestock is the mainstay of the nomadic Arab tribes of the desert and the negro tribes of the swamp and wooded grassland country in the South.

Communications.—The railway system (3 ft. 6 in. gauge) has a route length of about 3,200 miles, linking Khartoum with Wadi Halfa, Port Sudan, Wad Medani, Sennar, Kosti, El Obeid and Nyala. A lines branches out southwards to Wan from the Sennar/Nyala western line. Regular rail and Nile steamer services (operated by Sudan Railways) connect with the Egyptian State Railways to the North, and with the East African Railways and Steamers system to the South. Port Sudan is a well-equipped modern seaport. Sudan Airways run regular services from Khartoum to many parts of the Sudan and to Egypt, Greece, Italy, the Lebanon, Aden and the United Kingdom and are equipped with some Comet aircraft.

FINANCE

	1962-63
Revenue.....	£S61,034,473
Expenditure.....	52,152,337

£S = Sudanese Pound of 100 Piastres.

Exchange Rate 97-15 Piastres = £1 sterling.

TRADE

	1961

Consul, H. Sköld.

Area and Population.—Sweden occupies the eastern half of the Scandinavian peninsula in N.W. Europe and comprises 25 local government districts. "Län," with an area of 173,436 sq. miles, and a population, Jan. 1, 1961, of 7,498,770. Of the 59,967 foreigners (non-Scandinavians) with permission to reside in Sweden, about 28,900 are Baltic refugees and 18,000 Germans. In 1960 there were 102,200 births (13.6 per 1,000 inhabitants), 75,001 deaths (10.0 per 1,000) and 49,873 marriages (6.7 per 1,000). In 1960 the infantile mortality rate was 16.6 per 1,000.

Government.—Under the Constitution of June 6, 1809 (with amendments) the throne is hereditary in the House of Bernadotte, Prince of Ponte Corvo, a Marshal of France, who was invited to accept the title of Crown Prince, with succession to the throne. The Marshal landed at Helsingborg on Oct. 20, 1810, and succeeded Charles XIII. in 1818. There is a Diet (Riksdag) of two Chambers, *Första Kamnaren* of 151 members, elected for 8 years; and *Andra Kamnaren* of 232 members, elected for 4 years. The Council of Ministers (*Statsråd*) is responsible to the Riksdag.

Production and Industry.—About 21 per cent. of the working population is devoted to agriculture, forestry and fisheries, about 260,000 being owners and 50,000 tenants of the land they cultivate. The country may be divided into three separate districts, the northern, forest; central, mining, industrial agricultural and forest; the southern, agricultural and

industrial. The climate in the south is favourable for producing grain. The principal articles of cultivation are oats, wheat, rye, barley, potatoes, roots, oiliferous plants and grasses. Dairy produce, however, accounts for about half the value of Swedish agricultural production. Sweden contains the great lakes of Vänern, Vättern, Mälaren and Hjälmareu. The forests are very extensive, covering over one-half of the surface of the country, and consisting chiefly of pine, spruce and birch; these are of great importance, supplying timber, pitch, fuel and tar, in addition to sulphite, sulphate and mechanical wood pulp for the paper-making and rayon industries. The mineral resources are extremely rich; iron ore of excellent quality; lead, zinc, sulphur, manganese, arsenic, gold, granite and marble. There are also considerable deposits of low grade uranium ore. There is a railroad opening up the rich iron-ore districts of Lapland and mineral trains run from Gällivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic.

In 1959 there were 16,487 industrial establishments (including mines and quarries) employing 679,843 operatives, and 187,691 in administrative and executive posts. The fishing industry landed catches valued at Kr.168 979,000 in 1960.

Communications.—Railroads totalling 9,650 miles in length (of which 9,100 are the property of the State) were open on January 1, 1961. At the beginning of 1961 there were 368 telephones for every 1,000 of the population, 359 per 1,000 had obtained wireless licences and in April 1962 the number of television licences issued had reached 1,500,000. The number of private cars in use on the same date was estimated at about 1,200,000 or 1 to every 7 of the population. The Mercantile Marine (Feb. 1962), consisted of a total of 1,405 ships of 4,018,000 gross tons. Civil aviation is under the control of the Ministry of Communications, under whose supervision all matters concerning civil aviation are handled by the Department of Civil Aviation. Regular domestic air traffic is maintained by the Scandinavian Airlines system (on behalf of the Swedish Airlines) and by A. B. Linjeflyg. Regular European and inter-continental air traffic is maintained within the framework of the Scandinavian Airlines System in Copenhagen by the Swedish Airlines in collaboration with the Danish and Norwegian Airlines.

Service.—Service in the Defence Forces is universal and compulsory, between 35,000 and 40,000 being trained annually; strength of the *Army* during the war of 1939-45 was about 500,000, equipped on modern lines and principally mechanized. The *Navy* consists of 2 cruisers, 8 destroyers, 13 frigates, 37 motor torpedo boats, 21 submarines and a large number of minor craft and auxiliaries. The naval stations are Stockholm, Karlskrona and Göteborg. The *Air Force* consists of 20 wings, chiefly fighters,

Religion.—The State religion is Lutheran Protestant, to which over 95 per cent. of the people adhere.

Language and Literature.—Swedish is one of the Germanic languages spoken by the people of Scandinavia and is closely allied to Icelandic, Danish and Norwegian. Swedish national literature may be dated from the foundation of the University of Uppsala in 1477 and reached its golden age under Gustavus III. (1771-1792), who founded the Swedish Academy in 1786. Among modern Swedish authors who have achieved world-wide reputations are August Strindberg (1849-1912), dramatist and novelist; Selma Lagerlöf (1858-1940), who was awarded the Nobel Prize for Literature in 1909 on account of her pre-eminence as a novelist; Verner von Heidenstam (1859-

1940), poet and Nobel Prize-winner (1916); Erik A. Karlfeldt (1864–1931), Nobel Prize-winner in 1931 after his death, and Par Lagerkvist, Nobel Prize-winner, 1951. In 1961 there were 180 daily newspapers in the country, 5 major papers being published at Stockholm, 4 at Göteborg and 4 at Malmö.

Education.—(i.) *Primary*: Compulsory and free. Maintained by the State and by local taxation. Attendance good. (ii.) *Secondary*: Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics, commerce and navigation. (iv.) *Universities*: State Universities at Uppsala (founded 1477); Lund (founded 1668); Stockholm and Göteborg.

Asst. Military and Air Attaché, Peter Storrer.

Consular Section, 1 Montagu Place, W.1.

Consul and Head of Chancery, Ernst Ribi.

There is a Swiss Consulate in Manchester.

Area and Population.—The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'–47° 48' N. lat. and 5° 58'–10° 3' E. long. It is composed of 22 Cantons, 3 subdivided, making 25 in all, of very dissimilar size, united under a Constitution dated May 29, 1874, and comprises a total area of 15,950 square miles, with a population (Dec. 31, 1961) of 5,560,000. In 1961 there were 99,238 live births, 51,004 deaths and 42,257 marriages. The infant mortality rate was 21 per 1,000 live births. In 1960, out of a total of 5,429,061, 52.6 per cent. of the population was Protestant, 45.6 per cent. Roman Catholic and 0.4 per cent. Jewish.

Physical Features.—Switzerland is the most mountainous country in all Europe. The Alps, covered with perennial snow and from 5,000 to 15,217 feet in height, occupy its southern and eastern frontiers, and the chief part of its interior; and the Jura mountains rise in the north-west. The Alps occupy 61 per cent., and the Jura mountains 12 per cent., of the country. The Alps are a crescent-shaped mountain system situated in France, Italy, Switzerland, Bavaria and Austria, covering an area of 80,000 square miles from the Mediterranean

* The President is elected in December and remains in office from Jan. 1 to Dec. 31; he is generally succeeded by the Vice-President.

to the Danube (600 miles). The highest peak, Mont Blanc, Pennine Alps (15,732 feet) is partly in France and Italy; Monte Rosa (15,217 feet) and Matterhorn (14,780 feet) are partly in Switzerland and partly in Italy. The highest wholly Swiss peaks are Finsteraarhorn (14,026), Aletschhorn (13,711), Jungfrau (13,671), Mönch (13,456), Eiger (13,040), Schreckhorn (13,385), and Wetterhorn (12,150) in the Bernese Alps, and Dom (14,918), Weisshorn (14,803) and Breithorn (13,685).

The Swiss lakes are famous for their beauty and include Lakes Maggiore, Zürich, Lucerne, Neuchâtel, Geneva, Constance, Thun, Zug, Lugano, Walensee and Brienz.

Production and Industry.—Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables as well as grapes are grown. Dairying and stock-raising are the principal industries, about 3,000,000 acres being under grass for hay and 2,000,000 acres pasturage. The forests cover about one-quarter of the whole surface. The chief manufacturing industries comprise engineering and electrical engineering, metal-working, chemicals and pharmaceuticals, textiles, watchmaking, woodworking, foodstuffs and footwear. Banking, insurance and tourism are major industries.

Government.—The legislative power is vested in a Parliament consisting of two Chambers, a National Council (*Nationalrat*) of 196 members, and a Council of States (*Sänderat*) of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council (*Bundesrat*) of 7 members, elected for four years by the Federal Assembly and presided over by the President of the Confederation. The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year. Not more than one of the same canton may be elected member of the Federal Council; on the other hand, there is a tradition that Italian and French-speaking areas should between them be represented on the Federal Council by at least two members.

Defence.—**Army.** Elite (ages 20 to 36), 16 yrs.; initial training, 118 days. Subsequently 8 training periods of 21 days; then Landwehr (36 to 48) and Landsturm (48 to 60). Under the proposed reorganization of the Swiss forces, the ages for military service will be reduced as follows: Elite, 20-32 years, Landwehr, 33-42, Landsturm, 43-50. **Air Force.** Ground personnel: as Army. Flying personnel: age 20 to 36. Initial training 1 year. 6 weeks with squadron each year and completion of 70 hours' flying. After 36 revert to ground duties with Air Force or Army.

Communications.—By the end of June, 1961, the electrification of the entire Swiss railway system of 3,582 miles (Swiss Federal Railways 1,809 miles, Swiss privately owned railways 1,773 miles) of track was completed. At the end of 1961, there were 40,580 miles of telegraph and telephone lines. By December, 1961, the number of telephone subscribers amounted to 1,158,410 and the network was fully automatic throughout the country. There were 1,499,088 licensed radio receivers and 193,819 television receivers. At the end of 1960, the total length of first-class roads was 10,862 miles. The number of motor vehicles licensed at the end of 1961 was 985,472 (549,778 private cars, 336,700 motor cycles, motor scooters and bicycles with auxiliary motor, 3,274 motor buses, 88,637 motor lorries, 5,904 special vehicles and 1,179 tractors).

A merchant marine, established in 1940, consisted in 1961 of 29 vessels with a total displacement of 162,519 tons (gross). In addition 437 vessels with a total tonnage of 388,537 were engaged in Rhine shipping. In 1961, goods handled at the Basle Rhine Port amounted to 6,817,490 tons. 112 lake vessels transported 8,632,000 passengers and 658,345 tons of freight in 1960. During 1961, Swissair flew 21,690,162 miles and carried 1,439,918 passengers.

Education.—Control by cantonal and communal authorities. No central organ, illiteracy practically unknown. (i.) *Primary*: Free and compulsory. School age varies, generally 7 to 14. (ii.) *Secondary*: Age 12-15 for boys and girls. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities*: Basle (founded 1460), Berne (1834), Fribourg (1889), Geneva (1873), Lausanne (1890), Zürich (1832), and Neuchâtel (1909), and the technical University of Zürich and a commercial University of St. Gall.

Language and Literature.—There are three official languages: French, German and Italian. In addition Romansch is recognized as a national, but not an official language. German is the dominating language in 19 of the 25 cantons; French in Fribourg, Geneva, Neuchâtel, Valais and Vaud; Italian in Ticino, and Romansch in parts of the Grisons. Many modern authors, alike in the German school and in the Suisse Romande, have achieved international fame. Karl Spitteler (1845-1924) and Hermann Hesse (1877-) were awarded the Nobel Prize for Literature, the former in 1919, the latter in 1947.

FINANCE		1961

2nd Secretary, Mlsbah Dalati.

Cultural Attaché, Nazem Tahan.

Area and Population.—Syria is in the Levant, covering a portion of the former Ottoman Empire, with an estimated area of 70,100 sq. miles and a population of 4,500,000, Arabic speaking and mainly Moslems. It includes the districts of Damascus, Aleppo, Lattakia, Hama, Homs, Hassakch, al Rashid, Deir-*ez-Zor*, Idlib, Deraa and Suweida. It is bounded on the north by Turkey, on the east by Iraq, on the south by Jordan and Israel, and on the west by the Lebanon and thence northwards by the Mediterranean to the Turkish frontier. The Orontes flows northwards from the Lebanon range across the northern boundary to Antioch (Turkey). The Euphrates crosses the northern boundary near Jerablus and flows through north-eastern Syria to the boundary of Iraq.

Archaeology, etc.—The region is rich in historical remains. Damascus (*Dimishq ash-Sham*) is the most ancient city in the world, having an existence as a city for over 4,000 years. It is situated on the river Abana (now known as Barada), in an oasis at the eastern foot of the Anti-Lebanon, and at the edge of the wide sandy desert which stretches to the Euphrates. The city contains the Omayyad Mosque, the Tomb of Saladin, and the "Street Called Straight" (Acts ix, 11), while to the North-East is the Roman outpost of Dmeir and further east is Palmyra.

On the Mediterranean coast at Amrit are ruins

of the Phoenician town of Marath, where the *tell* has been found and is being excavated and also ruins of Crusaders' fortresses at Markab, Sahyoun, and Krak des Chevaliers. At Tartous (also on the coast) the cathedral of Our Lady of Syria, built by the Knights Templars in the XII-XIII century has been restored as a museum.

Little cities, dating from 2,000 to 1,500 B.C., have recently been explored on the west bank of the Euphrates at Jerablus and Kadesh.

Government.—Syria, which had been under French mandate since the 1914-18 war, became an independent Republic during the 1939-45 war. The first independently elected Parliament met on August 17, 1943, but foreign troops were in part occupation until April, 1946. Syria remained an independent Republic until February, 1958, when it became part of the United Arab Republic. Syria seceded from the United Arab Republic on Sept. 28, 1961, and has a transitional Council of Ministers numbering twelve.

Production and Industry.—Agriculture is the principal source of production; wheat and barley are the main cereal crops, but the cotton crop is the highest in value. Tobacco is grown in the maritime plain in Sahel, the Sahyoun and the Djebleh district of Lattakia; skins and hides, leather goods, wool and silk, textiles, cement, vegetable oil and copper and brass utensils are locally produced. Mineral wealth is small but oil has been found at Karachuk in the north-eastern corner of the Region and drilling is continuing. An oil refinery is in production at Homs and revenue is derived from the Kirkuk-Banias oil pipeline and the pipeline from the oilfields of Saudi-Arabia to Sidon in Lebanon (Tapline). There is a five-year industrial development plan and a 10-year economic development plan.

Language and Literature.—Arabic is the principal language (see Arabia), but a few villages still speak Aramaic, the language spoken by Christ and the Apostles. There are 7 daily newspapers and 6 periodicals in Arabic published in Damascus and 9 daily newspapers and 8 periodicals in the provinces.

Education.—Education in Syria is under State control and, although many of the schools are privately owned, they all follow a common system and syllabus. Elementary education is free at State Schools, and is compulsory from the age of seven. Secondary education is not compulsory and is free only at the State Schools. Because of the shortage of places, entry to these State Schools is competitive. Damascus University, founded in 1924, has faculties of law, medicine, engineering, science, arts and a Higher Teachers' Training College. The number of students has risen from a few hundred in 1943 to about 16,000 in 1962. There are also about 2,000 students at Aleppo University (founded 1962). Approximately 10 per cent. of all students receive scholarships, and at the present time Palestinian refugees are admitted free. The rest pay fees.

Communications.—A narrow-gauge railway runs from Belrut in the Lebanon to Damascus, connecting at Rayak (Lebanon) with the standard-gauge line which runs from Tripoli (in the Lebanon) through Homs, Hama and Aleppo to the Turkish frontier, from Nusaybln to the Iraq frontier at Tel Kotchek. From Damascus the Hejaz railway runs southwards to Jordan. All the principal towns in the country are connected by roads of varying quality. A small internal air service operates between Damascus and Aleppo, and between Aleppo and Qamichlyé, and Aleppo, Lattakia and Damascus. There are also flights from Damascus to Palmyra and Deir-*ez-Zor*.

Currency.—The monetary unit is the Syrian paper pound (£Syr.). The market rate of exchange for commercial transactions was approximately £Syr 10.16 = £1 sterling in June, 1962. A serious adverse balance of trade led, in February, 1961, to the imposition of exchange control which placed all exchange at the disposal of the Government and abolished the free money market.

TRADE

Principal Imports.—Gold, textiles, petroleum products, vehicles, agricultural equipment, machinery of all kinds and electrical material, base metals and wares thereof, chemicals and pharmaceuticals, wood and its manufactures, live animals and animal products, vegetable products, rubber products.

Principal Exports.—Textile materials and manufactures (including raw cotton and wool), cereals and vegetable products, live animals and animal products, raw hides and skins, prepared foods, gold.

The value of Syria's foreign trade at the free rate of exchange, was:—

		1960
Imports.....	£Syr.	778,260,000
Exports.....		344,203,000

Trade with U.K.

		1960	1961
Imports from U.K.....	£7,172,312	£6,015,967	
Exports to U.K.....	1,680,670	1,145,191	

CHIEF TOWNS.—Damascus (population 450,000) is the capital of Syria, other important towns being Aleppo (population 450,000), Homs (150,000) and Hama (100,000), and the principal port is Ψ Lattakia (52,000).

FLAG: Green over white over black horizontal bands, with three red stars on central white band.

BRITISH EMBASSY

Mousallem al Barudi Street, Damascus.

Ambassador Extraordinary and Plenipotentiary, His Excellency Thomas Eardley Bromley, C.M.G. (1962).

1st Secretaries, H. D. Michell, D.F.C.; J. C. M. Mason (Commercial).

2nd Secretary (Commercial), F. W. J. Cooper.

3rd Secretaries, C. J. H. Keith; C. A. Roberts (Consular).

THAILAND (Siam)

King, His Majesty Bhumibol Adulyadej, born 1927; succeeded his brother, June 9, 1946; married Princess Sirikit Kitiyakara, April 28, 1950; crowned, May 5, 1950; daughter born, April 6, 1951; son and heir born, July 28, 1952; second daughter born, April 2, 1955; third daughter born, July 4, 1957.

Prime Minister, Field Marshal Sarit Thanarat.

Foreign Minister, Nai Thanat Khoman.

ROYAL THAI EMBASSY IN LONDON

21-23 Ashburn Place, S.W.7 [Frobisher: 2983];

28 Princes Gate, S.W.7 [Knightsbridge: 5421].

Ambassador in London, His Excellency Mom Luang Peckdhip Malakul (1958).

Area and Population.—The Kingdom of Thailand, or Muang Thal, formerly known as Siam, has an area of 198,247 sq. miles with a population (estimated 1960) of 25,500,000. Thailand is in South-Eastern Asia. It has a common boundary with the Federation of Malaya in the south, and is bounded on the west and north-west by the Union of Burma and in the north-east and east by the Kingdoms of Laos and Cambodia, which were formerly part of the French Colony of Indo-China. Although there is no common boundary between Thailand and China,

the Chinese province of Yunnan is only separated from the Thai northern border by a narrow stretch of Burmese and Lao territory. The country slopes southwards from the north-west and from the great mountains of Tibet. The principal rivers are the Salween (which forms a boundary with Burma for 200 miles), the Mcnam Chao Phya with its tributary the Meping (which are Thai throughout) and the Mekong and its tributaries, which water the eastern plateau.

Government.—Thailand is a sovereign independent state. Under the interim constitution promulgated in February, 1959, following on the bloodless revolution of October, 1958, the King exercises legislative power by and with the advice and consent of a Constituent Assembly, executive power through the Council of Ministers and judicial power through the courts established by law. He is advised by a Privy Council appointed by himself. The 240 members of the Constituent Assembly, who were appointed in February, 1959, under the terms of the interim constitution, as well as acting for the time being as the national legislature, have the additional task of drafting a permanent constitution for Thailand, but no definite date has yet been set for the completion of this.

Language, Religion and Education.—Thai is basically a monosyllabic, tonal language, a branch of the Indo-Chinese linguistic family. The principal religion is Buddhism, its followers numbering over 16 millions in 1953, with 627,435 Moslems and some 70,000 Christians. The 2,500th anniversary of the Buddhist Era was celebrated in Bangkok from May 12-15, 1957, with religious and public ceremonies. Primary education is compulsory and free and secondary education in Government Schools is free. In 1960 there were 27,314 schools of all kinds, with 4,344,689 pupils and 131,651 teachers. There are 5 Universities attended by 40,829 students, 34 training colleges and 196 vocational schools (all types).

Production and Industry.—The country's most important products are agricultural or forest; rice (about 4,500,000 tons a year), rubber (about 170,000 tons a year and increasing) and timber (about 1,300,000 cubic metres a year and decreasing). Other crops of some importance are sugar cane, tapioca, kenaf, groundnuts, tobacco, maize, soyabans and coconuts.

As regards mineral wealth, tin (production about 10,000 tons a year) is important, and small amounts of wolfram, iron and lead ores are mined, and over 100,000 tons of lignite. Upwards of 200,000 tons a year of salt is produced by sea-water evaporation, but production is declining owing to marketing difficulties.

Much emphasis has been laid since 1959 on the encouragement of foreign investment in new local industries. By mid-1960 forty contracts had been signed for investment of this sort, including 4 car assembly plants, two pharmaceutical factories (the latter already in production), as well as textile, electrical bulb and appliances, and a wide range of other factories of moderate size.

Up to 1959, industry had been comparatively undeveloped in Thailand; but industries established previously include: cement, sugar, a little iron and steel, soap products, cigarettes, leather, glassware, ceramics, gunny bags, paper, textiles, marble plywood and shaving board and tapioca. Cottage industries produce silk and cotton textiles in substantial quantity, and these and the local black-engraved (niello) silverware and bronzeware are popular with visitors.

Communications.—About 2,250 miles of State-owned railways were open to traffic in 1961. The track is metre gauge. Main lines run from Bang-

kok to Aranya Pradet, linking up with the Cambodian state railway at this border town (160 miles E.); *via* Korat to Ubol (about 352 miles E.) and to Nongkhai (415 miles N.E.) the ferry terminal on the River Mekhong opposite Vientiane, capital of Laos; to Chiangmai (411 miles N.); and to Haadyai (600 miles S.), whence lines go down the eastern and western sides of the Malayan Peninsula, *via* Sungai Golok and Penang respectively, to Singapore.

In 1960 the country had about 6,000 miles of main, all-weather roads, of which about 1,000 miles might be termed first-class. A large road-building programme is in preparation. Bangkok is an international airport of importance, and services connect it with Europe, America, India, Pakistan, Japan and Australasia, as well as other parts of S.E. Asia. The Thai Airways Company has internal services between Bangkok and all the principal towns, and a new company, Thai Airways International (THAI), was formed in 1960 in association with SAS to operate international routes. There are about 14,500 miles of telegraph lines. The harbour at Bangkok can take vessels up to 10,000 tons dead weight.

Budget Estimates	FINANCE	
	1960	1961
	Millions of Baht	
Total revenue.....	7,700	8,000
Total expenditure.....	7,700	8,000

Since 1953 Thailand has received a total of U.S.\$106,000,000 in loans from the International Bank for rehabilitation and development of railways, the port of Bangkok, and irrigation, including the latest loan (in 1957) of \$66,000,000 for the Yan-Hee hydro-electric project.

The value of United States economic and technical aid to Thailand amounted by July, 1960 (the beginning of the U.S. fiscal year) to U.S.\$275,200,000 (including \$46,200,000 in loans); the expected programme for 1961 being about \$24,300,000. In addition, the military aid programme up to the end of the fiscal year 1959 cost \$304,718,000 (\$17,000,000 in 1959) and the estimate for 1960 was \$24,782,000.

The exchange rate for the *Baht* is not officially fixed, but has for some time remained in the neighbourhood of *Baht* 59 = £1 sterling, with little fluctuation. Foreign exchange reserves are at present sufficient and steady, and the currency backing is 60 per cent.

	TRADE	
	1960	
	Millions	
	of Baht	
	£ sterling	
Total imports (c.i.f.).....	9,362	159,000,000
Total exports.....	8,610	146,000,000

	Trade with U.K.	
	1950	1961
Imports from U.K....	£12,450,859	£13,159,991
Exports to U.K.....	3,771,249	7,239,957

In 1960 the value of rubber exports equalled the value of rice exports. These two commodities together accounted for about 60 per cent. of the total value of all Thailand's exports. Other exports consisted mainly of tin, live cattle, eggs, maize, tapioca, teak, hides and skins and lac. Main imports are textiles, metal manufactures, machinery, vehicles and transport equipment, chemicals and petroleum products.

CAPITAL, Ψ Bangkok (with Dhonburi), pop. 1960—2,318,000; in the delta of the Manam Chao Phya. Other centres are Chiangmai, Nakorn Sawan and Korat, but no other town approaches Bangkok in size or importance.

FLAG.—Five horizontal bands, red, white, dark blue, white, red (the blue band twice the width of the others).

TOGO

(Republic of Togo)

President, Sylvanus Olympio, assumed office as *Head of State* April 27, 1960; elected *President*, April 9, 1961.

Minister of State and Minister for Foreign Affairs, Paulin Freitas.

The Republic occupies a narrow strip of territory running north from a short coast-line on the Gulf of Guinea and lies between the Republics of Ghana on the west and Dahomey on the east. It has an area of 36,000 sq. miles and a population (estimated 1961) of 1,440,000, including people of several African races. The Ewe race are in a majority in the south. The economy of Togo is largely agricultural, the main exports being coffee, cocoa, palm kernels, copra, cotton and manioc. A promising start has been made in the growing of teak. Development of phosphate mines by a group of French companies began in 1955.

Trade with U.K.

	1960	1961
Imports from U.K.....	£459,803	£971,576
Exports to U.K.....	116,938	120,387

Formerly part of the German colony of Togoland surrendered in 1914, the Republic was administered by France as a mandated territory and from 1946 as a trusteeship under the auspices of the United Nations Organization. On November 14, 1958, the United Nations General Assembly voted for the cancellation of the trusteeship and for the establishment of an independent state at a date in 1960 to be agreed between Togoland and France. Accordingly, the Republic of Togo was set up as an independent state on April 27, 1960. A new constitution was adopted and a President elected on April 9, 1961.

CAPITAL.—Ψ Lomé (70,000).

FLAG.—Green and yellow horizontal stripes; a quarter in red in one corner bearing a white star.

BRITISH EMBASSY

Ambassador Extraordinary and Plenipotentiary, His Excellency Oliver Kemp, O.B.E. (1962).

and Secretary, K. H. Jones (*Vice-Consul*).

TRUCIAL STATES

Seven independent Shalkhdoms, known collectively as the Trucial States, have treaty relations with the British Government originating in treaties to prevent slavery and the piracy, which formerly gave the name of "The Pirate Coast" to this area, and to maintain a perpetual maritime truce. The earliest treaty dates from 1820.

The British Government, by virtue of a treaty made in 1892, is responsible for the external affairs of the states through the British Political Resident in the Persian Gulf and the British Political Agent in the Trucial States. Six of the states lie on the coast of the Gulf between the Musandam peninsula in the East and the Qatar peninsula in the West

and one, Fujairab, lies on the Gulf of Oman. The approximate combined area of the states is 32,000 square miles and the estimated population is about 86,000. Security in the area is maintained by the Trucial Oman Scouts, the force having its headquarters at Sharjah.

Revenue is chiefly derived from customs dues on imports and oil concession payments. The export of dried fish is also a significant source of revenue and some pearling is carried on. Petroleum Development (Trucial Coast) Ltd. holds concessions in all the states except Fujairah, Ras al Khaimah and Sharjah. The British Government has financed a Trucial States Development Fund to contribute to the material welfare of the people, particularly in the field of health, agriculture and education and Kuwait and Qatar have also contributed educational assistance to the states. There is a hospital in Dubai and dispensaries in all the states. Her Majesty's Courts have jurisdiction over certain categories of foreigners. The Rulers of all the states meet together in the Trucial Council to discuss matters of mutual interest twice or three times a year. The currency is the Persian Gulf Indian rupee.

Abu Dhabi is the largest of the Trucial States in area, stretching from the Khor el Odaid in the West to the borders with Dubai in the region of Jebel Aii. It includes seven villages of the Buraimi oasis and a number of settlements in the series of oases known as the Liwa. Two oil companies are operating in Abu Dhabi territory, Petroleum Development (Trucial Coast) Ltd. on land and Abu Dhabi Marine Areas Ltd. in the Abu Dhabi off-shore concession area. Oil has been discovered off Das Island, where the latter company has its headquarters and production is expected to start in 1962. There are airfields at Abu Dhabi and at Das Island. A cable office was opened in Abu Dhabi at the end of 1960. *Dubai* is by far the largest town in the Trucial States and has a population estimated at about 40,000. It is the main port for the import of goods into the Trucial States and the interior of Oman, and there is also a lively *entrepôt* trade. The value of imports in the year 1960 was over £6,000,000. It has a good natural harbour, improvements to which began in 1959. An airport was completed in 1960 and the Dubai Telephone Company commenced operations in the same year. The main source of revenue is from customs. Wireless communications are managed by International Aeradio Limited and the Post Office is run by the British G.P.O. *Sharjah* has a port, much silted up, and a diminishing *entrepôt* trade. It has an airport served by Gulf Aviation which connects it with Doha, Bahrain, Kuwait and Muscat. *Sharjah* has dependencies on the Batinah coast at Khor Fakkhan, which forms a good natural harbour, Kalba and Dibba. There is a trade school there run by the British Government. *Ajman* is the smallest state, having a population of only about 3,000. It has inland enclaves at Manama and Masfut. *Umm el Quwain* does a small trade in dried fish. It has an oasis at Falaj al Mu'alla where palms and some fruit are grown. *Ras al Khaimah* has a population of about 7,000, of whom about half live in the town. It is an ancient seaport near which some remains of archaeological interest have been found. Dates, vegetables and tobacco are grown. An agricultural experimental station and agricultural school have been opened in Ras al Khaimah territory under the Trucial States Development Scheme. *Fujairah* was recognized as one of the Trucial States in 1952. The inhabitants are in the main cultivators in the mountains of the Musandam peninsula and on the Batinah coast. The most important export is tobacco.

British Political Agent, Trucial States, D. F. Hawley, M.B.E. (resident at Dubai).

British Political Officer, Abu Dhabi, R. O. Miles (acting).

Ambassador, His Excellency Habib Chatty (1962).

Counsellor, Hachemi Ouanès.

1st Secretary, Miss Falka Farouk.

Attaché, Mustapha Trabelsi.

Area and Population.—Tunisia lies between Algeria and Libya and extends southwards to the Sahara Desert, with a total area of 45,000 sq. miles and a population (estimated 1961) of 4,168,000.

Government.—A French Protectorate from 1881 to 1956, Tunisia became an independent sovereign State with the signing on March 20, 1956, of an agreement whereby France recognized Tunisia's independence and right to conduct her own foreign policy and to form a Tunisian Army. The United Kingdom formally recognized Tunisia as an independent and sovereign state on May 10, 1956. Following a first general election held on March 25, 1956, a Constituent Assembly met for the first time on April 8. On July 25, 1957, the Constituent Assembly deposed the Bey, abolished the monarchy and elected M. Bourguiba first President of the Republic. A few days later the Government was reconstructed on the "presidential" model, the Ministers becoming Secretaries of State. On June 1, 1959, the Constitution was promulgated and on December 7, 1959, the National Assembly held its first session.

Important changes in the system of local government were decreed on June 16, 1956. The country was divided into 14 regions each ruled by a Governor assisted by a Secretary-General.

Production, Trade, etc.—The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The chief exports are cereals, olive oil, phosphates, iron-ore, lead and derivatives, wines, etc., dates, etc.; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. In 1961 imports totalled 88,447,000 *dinars* and exports 46,345,000 *dinars*. The greater part of the trade is with France which, in 1960, took 52 per cent. of the exports and supplied 60 per cent. of the imports.

Trade with U.K.

	1950	1961
Imports from U.K.	£2,597,401	£2,045,436
Exports to U.K.	£5,235,778	£6,221,303

A new currency, the Tunisian *dinar*, was adopted on Nov. 3, 1958. At the same time a new Central Bank of Tunisia became responsible for the issue of notes. Although Tunisia remains in the Franc Zone the *dinar* is not tied to the French franc and on June 1, 1962, stood at 1:168 to the £. Except for minor fluctuations it has been at this level for the past four years. So far as trade is concerned Tunisia was effectively part of metropolitan France until September, 1959, when she abrogated the Customs Union with the latter and a new trade and payments agreement was negotiated. This reduced or eliminated the tariff advantages enjoyed by certain French goods.

CAPITAL. Ψ Tunis, connected by canal with La Goulette on the coast, had a population (Municipal Council area) of 680,000 at the Census of 1956. The ruins of ancient Carthage lie a few miles from the city. Other towns of importance are Ψ Sfax (65,635), Ψ Sousse (48,172), Kairouan (33,968).

FLAG.—Red crescent and star in a white orb, all on a red ground.

Area and Population.—The Turks belong to the Turanian Race, which comprises the Manchus and Mongols of North China, the Finns, and the Turks of Central Asia. Their numbers probably exceed 50,000,000, with the same language, religion and culture, but the actual Turkish State occupies only a small part of the area inhabited by the Turkish Race, the remainder being in Soviet Russia, China, Afghanistan and Persia. Under the Seljuks (Turkish rulers in Anatolia) the conquest of Asia Minor was completed in the 11th century. The Seljuks were succeeded, early in the 14th century, by the Osmanli dynasty, which remained in power until the War of 1914-18.

During the 15th, 16th and 17th centuries the Ottoman Empire was one of the strongest Powers in the world, extending from the Caspian Sea to the Adriatic and Hungary, and from the Indian Ocean to Morocco and the Sudan. It comprised Asia Minor, part of Russia, the Ukraine, the Crimea, the Balkan States and the whole of Arabia. The Black Sea, the Mediterranean, the Red Sea and the Ægean were dominated by Turkish ships, and the Ottoman dominions included not only the Byzantine Empire, but the greater part of the whole Roman Empire.

Turkey now extends from Adrianople to Transcaucasia and Persia, and from the Black Sea to the Mediterranean, Syria and Iraq. The sixth general census of population was held in October 1955. The results of the last four counts are:—

Year	Population
Oct., 1945.....	18,790,174
Oct., 1950.....	20,936,524
Oct., 1955.....	24,111,778
Oct., 1960.....	27,776,769

Turkey in Europe (9,256 sq. miles, population 2,262,023 in 1955) consists of Eastern Thrace, including the cities of Istanbul (Constantinople) and Edirne (Adrianople), and is separated from Asia by the Bosphorus at Istanbul and by the Dardanelles (Hellespont)—about 40 miles in length with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (285,246 sq. miles, population 21,849,755 in 1955), comprises the whole of Asia Minor or Anatólia ("Land of the Rising Sun" or Orient), and extends from the Ægean Sea to the western boundaries of Georgia, Soviet Armenia and Persia, and from the Black Sea to the Mediterranean and the northern boundaries of Syria and Iraq. The former Turkish Sanjak of Alexandretta (latterly known as the Republic of Hatay), was ceded by France on July 23, 1939, having formed part of Mandated Syria since 1922.

Government.—For two centuries before the War of 1914-18, disintegration had reduced the power and extent of the Turkish Empire, and after that War its boundaries were still further restricted, Iraq, Syria and Arabia passing into other hands. Sultan Mehmed VI., the last of the Osmanli rulers, fled from Constantinople to Malta on Nov. 20, 1922, and the Sultanate was abolished by the National Assembly. On Oct. 29, 1923,* the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal (later known as Kemal Atatürk) President. Following the introduction of a multi-party régime in 1945, the Democratic Party was returned to power in 1950

* TURKISH NATIONAL HOLIDAY.—Oct. 29 is observed throughout the Republic as a National Holiday.

and re-elected in 1954 and 1957. On May 27, 1960, the D.P. Government was overthrown by the Turkish Armed Forces which ruled through the Committee of National Union, a body originally composed of 38 military officers, but reduced to 23 following an internal purge in November, 1960. The committee ruled from January to November, 1961, in conjunction with a civilian House of Representatives, the two bodies together forming the Constituent Assembly. Following a prolonged trial on multiple charges of crimes against the Constitution, Adnan Menderes, the former Democratic Party Prime Minister, was executed on Sept. 17, 1961, together with the former Foreign and Finance Ministers. Sentence of death passed on Celal Bayar, former President, was commuted to life imprisonment.

In October, 1961, general elections for a new National Assembly, composed of the Senate of the Republic (150 Senators) and the Assembly (450 Deputies) resulted in the People's Republican Party getting 173 seats in the Assembly, against 158 for the Justice Party (successor to D.P.), 54 for the Republican Peasants National Party and 65 for the New Turkey Party. In the Senate the J.P. obtained 70 seats, the P.R.P. 36, the R.P.N.P. 16 and the N.T.P. 28. The C.N.U. was dissolved (its members becoming additional life Senators), and General Cemal Gürsel was elected President of the Republic. M. Ismet İnönü, leader of the P.R.P., formed a coalition government comprising the P.R.P. and the J.P. This coalition broke up on May 31, 1962, and was replaced by a second coalition, with M. İnönü as Prime Minister again, composed of the P.R.P., N.T.P. and R.P.N.P., with the J.P. in opposition.

Turkey is divided for administrative purposes into 67 *vilayet* with subdivisions into *kaza* and *nahiye*. Each *vilayet* has a governor (*vali*) and elective council.

Religion and Education.—The majority of the inhabitants are Moslems. There are numerous Christians (of the Latin and Eastern rites) in Istanbul (Constantinople) and a considerable number of Jews. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic. Education is compulsory, free, and secular. There are elementary, secondary and vocational schools.

In 1955 there were over 17,800 primary schools, with about 1,877,000 pupils. There are two universities at Istanbul (one being a Technical University), two at Ankara (including the recently-founded Middle East Technical University), one at Izmir and one at Erzerum (the Atatürk University). The expenditure allocated to education in the 1961 budget was $\text{L}1,951,974,650$.

Language and Literature.—Osmanli or Ottoman Turkish is one of the Turanian languages spoken from Macedonia to Siberia. Until 1926 this language was written in Arabic script, but in that year the Roman alphabet was substituted for use in official correspondence and in 1928 for universal use, with Arabic numerals as used throughout Europe. Mainly as a consequence of this change the percentage of Turks who can read and write is rising steadily. Ancient Turkish literature aped the Arabic manner, but the revolution of 1908 was followed by a popular reaction against the writings of the past (which appealed only to a small class) and led to the introduction of a native literature free from foreign influences and adapted to the understanding of the people. The vehicle first employed was the newspaper, printed in the neo-Latin alphabet, with supplements for prose and dramatic fiction, poetry and literary criticism. The leading Turkish newspapers are centred in Ankara and

Istanbul, although most provincial towns have their own daily papers. There are foreign language papers in French, Greek and English and numerous magazines and weeklies on various subjects.

Production and Industry.—Although it is estimated that 16 per cent. of the country is entirely unproductive and only 16 per cent. fully arable, agriculture provides a livelihood for 75 per cent. of the population and the economy is based extensively on the export of agricultural products. Agriculture is still largely primitive, but is being modernized at an accelerated pace. The principal crops are cereals, cotton, tobacco, sultanas and figs, pulses, oilseeds, valonea, hazel-nuts, opium, sugar beet, and many varieties of fruit. Since 1949, when there were only 4 sugar factories in Turkey, the country has become self-supporting in sugar, and has a margin for export. There are now 17 sugar factories. With the important exception of wheat, which is grown mostly on the arid Central Anatolian Plateau, most of the crops are grown on the fertile littoral. Tobacco, sultana and fig cultivation is centred at Izmir, where substantial quantities of cotton are also grown. The main cotton area is the Çukurova Plain around Adana. In 1960 it was estimated that there were more than 76,000,000 head of livestock, including horses, donkeys and mules. Animal by-products include wool, hides and skins, and mohair. The forests which lie between the littoral plain and the Anatolian Plateau, contain beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple. During recent years the Government has attempted, so far not altogether successfully, to combat the depredations of peasant and goat which threatens to destroy the existing forests within the next 25 years.

Turkey's second most important industry is based on her considerable mineral wealth, which is, however, as yet comparatively unexploited. The most important developments are in coal, of which some 7,000,000 metric tons are produced annually (over one-third of which is lignite), and which is used to meet domestic needs. The main export minerals are chromite, production of which in 1961 amounted to about 400,000 tons (of which nearly 380,000 metric tons were exported) and copper, of which 20,000 metric tons were produced in 1961 (of which some 8,000 metric tons were exported). Iron ore, boron minerals, manganese ores and salt are the other principal mineral developments. Working mainly through the State-owned Eti Bank (Mining) and the Sümer Bank (Industry), great strides have been made during recent years in industrializing the country. The share of private industry is increasing. Developments include the expansion of the iron and steel works at Karabük, and other factories and plans for the production of textiles, paper, pulp, cement, artificial silk, sugar, leather goods, glass-ware, heavy chemicals, artificial fertilisers, canned goods, wines and spirits, vegetable oils, soap and refined sulphur. The cement industry has recently made great progress: many new factories have been built throughout the country and annual production, which totalled 375,522 metric tons in 1949, reached the figure of 2,028,000 metric tons in 1961. Legislation was passed in 1954 to encourage the investment of foreign capital in Turkey and to permit the exploitation of Turkey's petroleum resources by foreign companies. At the end of June, 1962, 20 American, British, German and Turkish companies were prospecting for oil in Turkey. Production of oil by the Turkish Petroleum Administration, from the Raman-Garzan field in Eastern Turkey, amounted to 424,000 metric tons in 1961. The An oil refinery at Izmit, owned jointly by the

Turkish Petroleum Corporation and Caltex, went into production in August, 1961, and the construction of a refinery at Mersin, for the Socony-Mobil Oil-Shell-B.P. consortium, was completed in June, 1962. The combined production capacities of the Batman refinery and the two new refineries at Izmit and Mersin (which will refine imported crude oil), will be about 4,500,000 metric tons.

In 1960, the State Planning Organization, which is attached to the Office of the Prime Minister, drew up plans for the long-term development of Turkey. In July, 1961, the State Planning Organization announced that developments should be planned over 15 years, in three successive 5-year plans. During the first 5-Year Development Plan, which will run from March 1, 1963, to February 28, 1967, it is hoped to increase the national income by 7 per cent. per year.

COMMUNICATIONS

Railways.—The complete network became the property of the State Railways Administration in 1948. The total length in operation at the end of March, 1962, was 7,882 kilometres. In 1961, the railways carried 81,381,000 passengers, 12,320,000 tons of freight and 4,204,000 head of livestock.

Roads.—In September, 1948, a 9-year road construction programme was started, involving the construction, reconstruction, improvement and maintenance of a national highway system totalling 24,300 kilometres of all-weather standard roads. Much progress has been made with the help of mechanized road building equipment from American aid sources. By 1960, there were 23,647 kilometres of road open to traffic throughout the year. The total number of motor vehicles, excluding tractors, in use at the beginning of 1961 was 114,208.

Posts.—In 1960, the number of telephone subscribers in Turkey was 180,030. There is a considerable shortage of telephone lines in some of Turkey's major cities; consequently work began in 1961 to provide 55,700 additional lines in 15 of the main cities in the country.

Shipping.—The strength of the Turkish Merchant Navy at the beginning of 1956 was 1,510 vessels, totalling about 752,000 tons. About 35 per cent. of Turkey's commercial fleet is owned by the Denizcilik Bankasi (the Maritime Bank).

Civil Aviation.—The State Airlines (T.H.Y.) operate all internal services and have services to Athens, Beirut, Nicosia, Rome, Frankfurt and London, while most of the leading foreign airlines, including British European Airways, operate services to Istanbul and some also to Ankara. The T.H.Y. fleet is composed of Vickers Viscounts, Dakotas and Fokker Friendships. The airports at Istanbul, Ankara and Adana have been improved to P.I.A.C.O. (Class B) standard and a sum of £T45,000,000 is being spent on ten other new airfields in Turkey. In addition nine military airfields, costing £T160,000,000, are being constructed by N.A.T.O.

Imports from U.K.....	£16,885,863	£23,223,428
Exports to U.K.....	11,533,548	12,006,437

The imports included iron and steel, machinery and spares, petroleum products, textiles and yarn, agricultural machinery, motor vehicles and pharmaceuticals; the exports included tobacco, cotton, dried fruit, cement, sugar, livestock, chrome ore, oilseeds, opium and valonia.

The principal imports from United Kingdom in 1961 were road vehicles, machinery, apparatus and appliances, metal manufactures, chemicals and pharmaceuticals; the principal exports to United Kingdom were tobacco, mohair, nuts, figs and raisins, cotton and horax.

CAPITAL OF TURKEY, ANKARA (Angora), an inland town of Asia Minor, about 200 miles E.S.E. of Istanbul, with a population (1955 census), of 353,170 and now estimated to exceed 500,000. Ankara (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple (now in ruins), dedicated to Augustus, contains the *Monumentum (Matrino) Ancyranum*, inscribed with a record of the reign of Augustus Caesar. A new city has been laid out on modern lines, with parks, statues and avenues. **ISTANBUL** (Constantinople), the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire in A.D. 364; estimated population, 1,214,616. Istanbul contains the celebrated Mosque of St. Sophia, since 1934 a museum of Byzantine and Turkish art. Other cities are Ψ Izmir (Smyrna) 286,310; Adana 172,465; Bursa (Brusa) 131,366; Eskisehir 122,755; Gaziantep 97,144; Konya 93,125; Kayseri (Caesarea) 81,127 and Erzerum 69,499.

FLAG.—Red, with white crescent and star.

Press Counsellor, Ahmed Ibrahim Khabil Anis.

AREA AND POPULATION.—The total area of Egypt is estimated at 1,000,000 square kilometres (386,110 square miles), the inhabited area being only 35,168 square kilometres (13,578 square miles), with a population (estimated 1961), 26,059,000.

There are three distinct elements in the native population. The largest, or "Egyptian" element, is a Hamito-Semitic race, known in the rural

districts as *Fellahin* (*fellâh*—ploughman, or tiller of the soil). The *Fellahin* have been mainly of the Moslem faith since the conquest of the country in the 7th century, but in 1947 there were more than 1,000,000 Coptic and Greek Orthodox Christians in Egypt. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts, of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated end of the Nile Valley and the Fayûm. The third element is the *Nubian* of the Nile Valley between Aswân and Wadi-Halfa, of mixed Arab and negro blood. The *Bedouin* and *Nubians* are Moslems.

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Libyan or Western Desert, and (c) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Gafatin and Zeberged (or St. John's island). This territory lies between 22° and 32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is continuous with the Sudan. The western boundary runs from a point on the coast 10 kilometres N.W. of Sollûm to the latitude of Siwa and thence due S. along the 25th meridian to the parallel of 22° N. (the N. boundary of the Sudan) at 'Uweinât Mountain. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E. long.) to the head of the Gulf of Aqaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aqaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *feddâns* (12,431 square miles) and the area of lakes at 641,000 *feddâns* (1,039 square miles), a total of 8,308,000 *feddâns* (13,470 square miles).

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country.

The Nile has a total length of 4,160 miles. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*, an arid region, containing some depressions, whose springs irrigate small areas known as *Oases*, of which the principal, from S.E. to N.W., are known as Kharga, Dakhli, Farafa, Baharia, and Siwa.

On the eastern edge of the Libyan Desert, a few miles south-west of Cairo stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 189 feet long. In the Eastern Desert a great backbone of high and rugged mountains extends north-westwards from Ethiopia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones,

dissected by *wadis* (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well, and here and there are to be found small encampments of wandering Arabs.

Religions.—At the Census of 1947 there were 17,397,946 Moslems, 1,346,035 Coptic Christians, 50,200 Roman Catholics, 155,600 other Christians (Protestant and Reformed Churches), and 65,639 Jews. The chief Moslem religious authorities in Egypt are the *Sheik el Gami el Azhar* and the *Mufti al Gumburiya al Arabiya al Muttahida*.

Government.—From 30 B.C. to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811 and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841.

In 1882, a military revolt, headed by an officer of the Egyptian Army (*Abmed Arabi Pasha*), assumed alarming proportions and a British expedition was despatched to re-establish the authority of the Kbedive. Meanwhile a revolt had broken out in the southern provinces, headed by *Sheikh Mohammed Ahmed*, of Dongozia, who proclaimed himself a *Mahdi* of Islam, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation until 1936 (see below).

During the War of 1914–18 a British Protectorate over Egypt was declared (Dec. 18, 1914) and Khedive Abbas Hilmi was deposed. He was succeeded by Hussein Kamel, with the title of Sultan, who died Oct. 9, 1917, being succeeded by his brother, Ahmed Fuad. The British Protectorate terminated on Feb. 28, 1922, and Sultan Ahmed Fuad was proclaimed King of Egypt. Following closely on the accession of King Farouk, the *Anglo-Egyptian Treaty* was signed in London (Aug. 26, 1936); the military occupation by British troops was terminated and Ambassadors were duly accredited at the Courts of St. James's and Cairo.

The security of Egypt was threatened after the outbreak of war in 1939 and reinforcements were sent from Britain and the Dominions. Axis troops invaded Egypt in 1940 and fierce fighting ensued, with Allied victories and reverses, until the decisive victory in "The Battle of Egypt" (Oct.–Nov. 1942) drove the enemy out of the country. In July, 1952, following a military *coup d'état*, King Farouk abdicated in favour of his infant son, who became King Ahmed Fuad II. In June, 1953, however, Gen. Neguib's military council deposed the young king, and declared Egypt a Republic, Gen. Neguib himself assuming the Presidency. In November, 1954, General Neguib was deposed by Lt.-Col. Gamal Abdel Nasser and the military council. On June 23, 1956, Col. Nasser assumed office as President, after an election at which voting was compulsory, and he was the only candidate.

The United Arab Republic came into being on Feb. 1, 1958, when a union of Egypt and Syria was confirmed by a plebiscite. A provisional constitution announced on Feb. 5, provided for a Presidential régime with a National Assembly selected from the existing Egyptian and Syrian Chambers. The Government was by regional councils with a central cabinet. As a result of a *coup d'état* in Syria on

September 28, 1961, Syria seceded from the Union, a development accepted by President Nasser. The title and flag of the U.A.R. were, however, retained for Egypt.

In November, 1961, President Nasser announced arrangements for the drafting of a new Constitution, to replace the provisional Egyptian Constitution of January, 1956, which had been superseded by the U.A.R. Constitution of 1958. On the basis of recommendations by a Preparatory Committee convened in November, 1961, for this purpose, a representative elected Assembly, the National Congress of Popular Forces, met from May 21–July 5. The Congress discharged the dual tasks of approving the National Charter presented by President Nasser, expressing the aims and ideals of the Egyptian Revolution, and the formation of an Arab Socialist Union, henceforward to be the basis of popular representation in the U.A.R., the General Congress, which would be the next stage in Constitutional development. This Congress is to decide the formation of an elected Legislative Assembly, which will in its turn be entrusted with the task of drawing up a permanent Constitution for the U.A.R.

Agriculture.—The principal crops grown during *Saifi* (summer) are cotton, rice, sugar cane, and sorgho (maize). *Nili* (flood) part of *Saifi*, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally begins in July; the principal crops are maize and rice. *Chitwi* (winter) begins in November and ends in June; the principal crops are cereals, bersim (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connection runs to Wadi Halfa, connecting the Egyptian Republic with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line to the frontier at Sollûm, thus joining Tripoli to Egypt. The gauge is standard (4 ft. 8½ in.). There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley.

Roads and Caravan Routes.—A sea coast motor road exists from Alexandria to Mersa Matruh, with an extension along the coast to Sollûm and thence to connect with the coast road in Libya. The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir, a metalled road, being probably the most frequently used.

Shipping.—Apart from the three great seaports of Alexandria, Port Said and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollûm and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitûn, Jemsa and Hurghada in the Gulf of Suez, and Safaga and Qoseir on the Red Sea.

Currency.—£E (Egyptian pound of 100 piastres) = £1 os. 6½d. sterling. Official Rate of Exchange —(Buying) Piastres 97.40 = £1; (Selling) Piastres 97.60 = £1. (See also p. 84.)

Trade with U.K.

	1960	1961
Imports from U.K. . . .	£19,457,893	£22,257,349
Exports to U.K.	6,665,261	4,880,734

The principal imports are metals, and manufactures thereof, coal and coke, chemicals and pharmaceuticals, capital plant and other machinery, vehicles, foodstuffs, timber and wood and paper. The exports are principally raw cotton, rice, mineral products and onions.

British Council Representative, I. H. Williams.

CAPITAL.—Cairo (population 1960, 3,346,000), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century.

ψ ALEXANDRIA (pop. 1960), 1,513,000, founded 232 B.C. by Alexander the Great, was for over 1,000 years the capital of Egypt and a centre of Hellenic culture which vied with Athens herself. Its great *pharos* (lighthouse), 480 feet high, with a lantern burning resinous wood, was one of the "Seven Wonders of the World." Other towns are: Ismailia (276,000); ψ Port Saïd (244,000); Mansura (102,709), Asyût (284,000), Faiyûm (162,000), Tanta (139,965), Mahalla el Kuhra (115,509), ψ Suez (203,000), ψ Damietta (97,000).

CAIRO is 2,520 miles from London: transit *via* Trieste, 5 days; *via* Marseilles, 6 days.

EMBASSY IN LONDON

48 Lennox Gardens, S.W.1

[Kensington; 8835]

Ambassador in London, His Excellency Dr. Roberto E. MacEachen (1961).

Secretary and Consul, Señor Don Carlos A. Ghringhell.

Secretary, Señor Don Guy P. Nery.

Area and Population.—The smallest Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30°—35° S. and long. 53° 25'—57° 42' W., with an area of 72,180 square miles, and an estimated population of 3,000,000 (over 1,000,000 in the capital), almost entirely white and predominantly of Spanish and Italian descent. Most Uruguayans are Roman Catholics. There is complete freedom of religion and no church is established by the State.

Physical Features.—The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which cross the Brazilian boundary and extend southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the *Rio Negro* (with its tributary the Yi), flowing from north-east to south-west into the *Rio Uruguay*. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Queguay, and the Cehollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merin. The climate is reasonably healthy. The summer is warm, but the heat is often tempered by the breezes of the Atlantic. The winter is, on the whole, mild, but cold spells, characterized by icy winds from the South Polar regions, are experienced in June, July and August. Rainfall is regular throughout the year, but there are occasional droughts.

Government.—Uruguay—or the *Banda Oriental*, as this territory lying on the eastern bank of the Uruguay River was then called—resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726-1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. In 1825, the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated.

A new Constitution was approved and brought into force on March 1, 1952, whereby the executive power is discharged by a National Council of State composed of nine members, elected every four years and assisted by nine ministers. The members of the National Council of State are eligible for re-election after four years have elapsed since the date on which their mandate ceased. The Legislature consists of a Chamber of 99 deputies and of a Senate of 30 members, elected for four years by all adult male and female citizens who can read and write. Elections for the National Council of State and the legislature took place in November, 1958. They were won by the Partido Nacional after 93 years in opposition and the new government took office on March 1, 1959.

The Republic is divided into 19 Departments each with a chief of police and a Departmental Council. The most important cities of the interior are Salto and Paysandu, both situated on the River Uruguay, which forms the main line of division from Argentina.

Production and Industry.—Wheat, barley, maize, linseed, sunflower seed and rice are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of cattle and sheep, the wool of which is of excellent quality. The 1961 livestock census showed figures of 8,700,000 cattle, 21,500,000 sheep, 640,000 horses, 270,000 hogs, and 19,000 goats. In addition to the meat packing industry, textiles and wine and beer are of importance. The development of local industry continues and during and since the Second World War, in addition to the greatly augmented textile industry, marked expansion in local production is notable in respect of tyres, sheet-glass, three-ply wood, cement, leather-curing, beet-sugar, edible oils and the refining of petroleum and petroleum products. There are no mineral deposits of importance.

Communications.—There are about 5,000 miles of national highways, and about 7,508 miles of telegraph, with 48,375 miles of telephones.

In 1955 there were about 1,828 miles of standard gauge railway in use in Uruguay. A national Corporation was formed to administer the railway systems purchased by the Government from four British companies in 1948.

Civil aviation is developing rapidly. An internal airline, PLUNA, which is now owned by the State, runs a daily passenger and limited freight service to the principal capitals of the interior, and also runs services to Southern Brazil, Paraguay and Argentina. International passenger and freight services are maintained by American, South American and European airlines. The airport of Carrasco lies 12 miles outside Montevideo.

Education and Social Services.—Uruguay is one of the most advanced of the South American states, with old-age pensions, maternity and child welfare centres, accident insurance, etc. Primary education is compulsory and free, with about 252,400 pupils in 1,879 state schools and technical and trade schools, and evening courses for adult education. In 1959 there were 54,800 pupils in secondary schools including 9,700 in the 11 State liceos of the capital. The University at Montevideo (founded in 1840) had, in 1961, 15,000 students enrolled in its ten faculties.

Language and Literature.—Spanish is the language of the Republic. Modern literature has provided some authors with international reputations and the literature of Spain is accessible in all public libraries. 12 daily newspapers are published in Montevideo with an estimated total circulation of 550,000. Most of them are distributed throughout the country.

FINANCE

The budget for 1959 was \$900 million (revenue) and \$895 million (expenditure). The budget for 1960-63 was approved in November, 1960, and provided for an estimated revenue of Ur. \$1,475 million for 1960, rising to Ur. \$2,580 million by 1963. Expenditure was estimated at Ur. \$1,347 million increasing to Ur. \$2,251 million during the same period.

Ur. \$

Internal Debt (July, 1962)..... 2,308,138,893
External Debt (July, 1962)..... 73,290,778

The monetary unit is the *peso*. By a law dated December 17, 1959, the nominal value of the *peso* was reduced from 0.585 grammes of fine gold to 0.136719 grammes of pure gold of a standard value of 900 milésimos of fine gold giving a parity of *pesos* 6.50 to the U.S. *dollar*. The circulating medium is, however, the paper *peso* which at the free rate of exchange has a value of about 8d. The

rate for the £ in August, 1962, was about *pesos* 30.77 (buying) and for the U.S. *dollar pesos* 10.98 (buying).

Imports from U.K.....	£6,265,588	£8,432,873
Exports to U.K.....	12,336,826	15,858,567

*The total import figure for 1960 includes goods to the value of \$U.S. 21,344,621 received under U.S. Public Law No. 480, which are payable in Uruguayan currency. Also included is an amount of \$U.S. 25,837,936 corresponding to goods imported by state enterprises before 1960, but which had not been shown in previous trade returns.

The exports are principally animal and agricultural products, and include chilled, frozen and canned meat, wool, hides and oleaginous products; the imports are principally machinery, motor vehicles, fuels and lubricants, raw materials, construction materials, timber and foodstuffs. The principal imports from the U.K. are agricultural machinery, motor vehicles, tinplate, rayon fibre, hardware, road-making machinery and cellulose.

CAPITAL, Montevideo, Pop. (1959), 900,000. Other centres are Ψ Salto (41,000), Ψ Paysandu (42,000), Rivera (31,000), Ψ Mercedes (24,000), Melo (21,000) and Minas (20,000).

FLAG.—Four blue and five white horizontal stripes surcharged with sun on a white ground in the top corner, next flagstaff).

Time of transit from London to Montevideo, by air, 22 hours (B.O.A.C. Comet).

Trade Representative, V. I. Rodnov.

Deputy Trade Representatives, A. G. Tikhonov;

S. F. Anfimov.

AREA AND POPULATION

The U.S.S.R. is now composed of 15 Union-Republics (see below). Before the outbreak of the war of 1939-45 the U.S.S.R. consisted of 11 Republics—the Russian Socialist Federal Soviet Republic (R.S.F.S.R.) and the Ukrainian, Belorussian, Armenian, Azerbaidjan, Georgian, Turkmen, Uzbek, Tadjik, Kazakh and Kirghiz Soviet Socialist Republics. After the collapse of Poland in September, 1939, the Soviet Government by agreement with Germany seized five-eighths of Poland's territory, the so-called *Western Ukraine* and *Western Belorussia*, subsequently incorporated into the Ukrainian and Belorussian Republics respectively.

In March, 1940, some territories ceded by Finland under the 1940 Treaty were joined to the Karelian Autonomous Soviet Socialist Republic to form a Karelo-Finnish S.S.R. which became the 12th constituent Republic of the U.S.S.R., while others, including the town of Viipuri (Vyborg), were added to the R.S.F.S.R. Similarly, in August of the same year, the major part of *Bessarabia* ceded by Roumania in June was joined to the Moldavian A.S.S.R. to form a Moldavian S.S.R. as the 13th Soviet Republic, while a smaller part of Bessarabia, including the

Danube estuary port of Izmail, and *Northern Bukovina*, also ceded by Roumania, became part of the Ukraine. The new Soviet-Roumanian frontier was confirmed by the 1947 Peace Treaty with Roumania.

In August, 1940, the three independent Baltic States, *Estonia, Latvia and Lithuania*, were forcibly incorporated into the Soviet-Union to form the 14th, 15th and 16th Republics respectively. In June, 1945, *Ruthenia* was ceded by Czechoslovakia and became part of the Ukrainian S.S.R. under the name of *Transcarpathia*. After the defeat of Germany, a part of *East Prussia* with its capital Königsberg (renamed Kaliningrad in July, 1946) became part of the R.S.F.S.R., while the port and district of *Memel* (Klaipeda) was incorporated into the Lithuanian S.S.R. By the 1947 Peace Treaty with Finland, the district of *Petsamo* (Pechenga) was added to the territory of the R.S.F.S.R. In the Far East, the southern half of *Sakhalin* and the whole of the *Kurile Islands* were incorporated into the last-named Republic in 1945, after the defeat of Japan. In October, 1944, *Tannu-Tuva*, until the war of 1939-45 a nominally independent state lying to the N.W. of Outer Mongolia, became the autonomous province of *Tuva* and in 1961, the Autonomous Republic of *Tuva*, within the R.S.F.S.R.

In July 1956, the Karelo-Finnish Republic reverted to the status of an Autonomous (*Karelian*) Republic within the R.S.F.S.R.

Area and population (according to the 1959 census) of the constituent Republics of the U.S.S.R. (with their capitals):—

Republic	Sq. miles	Population
I. R.S.F.S.R.		
(Moscow)	6,593,391	117,494,000
II. Ukraine (Kiev)	232,046	41,893,000
III. Belorussia (Minsk)	80,154	8,060,000
IV. Uzbekistan (Tashkent)	158,069	8,113,000
V. Kazakhstan (Alma-Ata)	1,064,092	9,301,000
VI. Georgia (Tbilisi)	26,911	4,049,000
VII. Azerbaidjan (Baku)	33,436	3,700,000
VIII. Lithuania (Vilnius)	26,173	2,713,000
IX. Moldavia (Kishinev)	13,012	2,880,000
X. Latvia (Riga)	24,695	2,094,000
XI. Kirghizia (Frunz)	76,642	2,063,000
XII. Tadjikistan (Dushanbe)	54,010	1,982,000
XIII. Armenia (Erevan)	11,306	1,768,000
XIV. Turkmenistan (Ashkhabad)	188,417	1,520,000
XV. Estonia (Tallinn)	17,413	1,196,000
Total	8,599,776	208,826,000

The net increase of population since the 1939 census amounts to only 18,100,000. Assuming a theoretical average annual rise of 3,000,000 (at present the annual rise is 3,500,000), the net increase between 1939 and 1959 should have amounted to about 60,000,000. The deficit of 42,000,000 is the measure of direct and indirect losses suffered by the Soviet people as a result of the war and the deportation policies of the Government. The age-groups of young people born between 1942 and 1946 are abnormally thin.

Geographically, the growth of the population has been very uneven. There has been a steady shift eastwards. Thus, while the total population has increased since 1939 by 9.5 per cent., that of the Urals has risen by 32 per cent.; of Western Siberia, by 24 per cent.; of Eastern Siberia, by 34 per cent.; of the Far East, by 70 per cent.; of Central Asia and Kazakhstan, by 38 per cent. Two Republics on

the Western fringes of the Union, *Belorussia and *Lithuania, have actually suffered a net loss of population (844,000 and 167,000 respectively).

Another demographic feature is the growing urbanization. While in 1939 the proportion of urban population was 32 per cent. of the total,* in 1959 it has reached 48 per cent., owing to migration into towns, growth of new towns, incorporation of villages into conurbations and a higher birth-rate in urban areas. There are now 25 towns with over 500,000 (11 in 1939).

The proportion of women to men is 55 to 45 per cent. There is a high incidence of marriages (12 per 1,000), a high birth-rate (25 per 1,000) and a low mortality-rate (7.5 per 1,000).

Ethnic Composition of the Population

	(millions)
Russians	114.827
Ukrainians	36.981
Belorussians	7.829
Uzbeks	6.004
Tartars	4.969
Kazaks	3.581
Azerbaidjanis	2.929
Armenians	2.787
Georgians	2.650
Lithuanians	2.326
Jews	2.268
Moldavians	2.214
Germans	1.619
Chuvashes	1.470
Latvians	1.400
Tadjiks	1.397
Poles	1.380
Mordovians	1.285
Turkmenians	1.004
Bashkirs	0.983
Kirghizians	0.974
Estonians	0.969
Daghestan tribes	0.945
Udmurtsians	0.623
Maris	0.504
Other Nationalities	5.009

CONSTITUTION

Under the 1936 ("Stalin") Constitution, the *Union of Soviet Socialist Republics* is "a socialist state of workers and peasants" (§ 1) in which "all power belongs to the working people as represented by the Soviets [Councils] of Working People's Deputies" (§ 3), while its economy is based on "the socialist ownership of the instruments and means of production" (§ 4). "The land, its mineral wealth, waters, forests, mills, factories, mines, rail, water and air transport, banks, communications, large state-organized agricultural enterprises, as well as municipal enterprises and the bulk of dwelling-houses in the cities and industrial localities, are state property" (§ 6), while "the joint enterprises of collective farms and co-operative organizations . . . constitute the common, socialist property of the collective farms and co-operative organizations" (§ 7). "The law [also] permits the small private economy of individual peasants and handicraftsmen based on their own labour and precluding the exploitation of the labour of others" (§ 9). "The personal property right of citizens in their incomes and savings from work, in their dwelling-houses and subsidiary home enterprises, in household articles . . . as well as the right of citizens to inherit personal property, is protected by law" (§ 10). The whole economic life, however, is subordinated to the state economic plan (§ 11).

* Within present borders.

The U.S.S.R. is a federal state, "formed on the basis of a voluntary union of equal Soviet Socialist Republics" (§ 13); every Republic has "the right to secede from the U.S.S.R." (§ 17).

"The highest organ of state power in the U.S.S.R. is the Supreme Soviet of the U.S.S.R." (§ 30) which exercises exclusively the legislative power (§ 32). It consists of two Chambers, the *Soviet of the Union* (elected on the basis of one deputy for every 300,000 of the population) and the *Soviet of Nationalities* (elected at the ratio of 25 deputies from each Union Republic, 11 from each Autonomous Republic, 5 from each Autonomous Province and 1 from each National Territory) (§§ 33-35). The *Supreme Soviet* which, as a rule, meets 4 to 5 times a year for about a week, delegates most of its power to its *Presidium* which acts as a kind of collective President of the U.S.S.R. between the sessions.

"The highest executive and administrative organ of state power is the Council of Ministers of the U.S.S.R." (§ 64). It is appointed by the Supreme Soviet (§ 70) and is accountable to it, or, in the intervals between the sessions, to its *Presidium* (§ 65).

The Supreme Court of the U.S.S.R. and the Special Courts of the U.S.S.R. are elected by the Supreme Soviet for a term of five years (§ 104). Similarly, the Procurator-General, who exercises "supreme supervisory power to ensure the strict observance of law" (§ 113), is appointed by the Supreme Soviet for a term of seven years.

Citizens of the U.S.S.R. have the right to work, to rest and leisure, to maintenance in old age and sickness and disability relief and to education (§§ 118-121). "Women are accorded equal rights with men" (§ 122). Citizens are accorded equal rights irrespective of their nationality or race (§ 123). The citizens are also guaranteed freedom of speech, of the press, of assembly and of street processions and demonstrations, "in conformity with the interests of the working people and in order to strengthen the socialist system" (§ 125).

Section 126 of the Constitution is remarkable for containing the only reference to the real master of the country, the Communist Party. It says that "the most active and politically conscious citizens in the ranks of the working class and other sections of the working people unite in the Communist Party of the Soviet-Union, which is the vanguard of the working people in their struggle to strengthen and develop the socialist system and is the leading core of all organizations of the working people, both public and state." The draft of a new Party programme, published on July 30, 1961, envisages a great increase of the economic capacity of the country and promises the transition to "full Communism" some time after 1980.

A special Committee, with N. S. Khrushchev as its chairman, was set up by the XXIInd Party Congress in November, 1961, to draft a new Constitution.

Local Government.—The State power in regions, provinces, autonomous provinces, territories, districts, towns and rural localities is vested in the *Soviets of Working People's Deputies* (§94), elected by the working people of the respective administrative units for a term of two years (§95). The executive and administrative organ of a Soviet is its Executive Committee elected by it (§99). The Union Republics and the Autonomous Republics have Supreme Soviets and Councils of Ministers of their own (§§ 57-63 and 79-88), although their jurisdiction is severely circumscribed in favour of the central Government. Since February,

1944, the Union Republics have had the right to enter into direct relations with foreign states and to conclude agreements and exchange diplomatic and consular representatives with them (§ 18A). So far, however, the only important activity of this kind has been the individual membership of the Ukraine and of Belorussia in the United Nations Organization. Similarly, the 1944 law allowing each Union Republic to possess its own Republican military formations (§ 18B) seems to have remained a paper provision.

The Union Republics possess Ministries of their own for internal affairs, certain branches of heavy and light industry, agriculture, public health, trade, finance and the like. The work of these Ministries is co-ordinated by respective federal Ministries and/or the *Gosplan*. The Union Republics possess exclusive jurisdiction over such matters as motor transport, housing, social security, municipal affairs, local industry, education and, since 1956, inland water transport and justice. The general trend lately has been toward progressive administrative decentralization or, rather, "de-concentration," particularly in industrial matters.

Religion.—Section 124 of the Constitution lays down that "in order to ensure to citizens freedom of conscience, the church in the U.S.S.R. is separated from the state, and the school from the church," and that "freedom of religious worship and freedom of anti-religious propaganda is recognized for all citizens." Churches have remained open in virtue of contracts concluded between the congregations and the local authorities. The clergy live on voluntary donations from their parishioners. A new *modus vivendi* between the Government and the religious communities was created during the War of 1939-1945. Two administrative bodies, the Council for the Affairs of the Russian Orthodox Church and the Council for the Affairs of Religious Cults, were set up in October, 1943, to provide liaison between the Council of Ministers and the religious bodies. In September, 1943, Stalin agreed to the election of the Patriarch of Moscow and All Russia, a post which had been vacant since the death of Patriarch Tikhon in 1925. Patriarch Sergius, elected by the Council of the Russian Church in 1943, died in May, 1944, and was succeeded in February, 1945, by the present holder of the See, Patriarch Alexius. A number of seminaries for training of priests, many churches, mosques and synagogues and several big monasteries have been reopened. Several religious periodicals are now published in the U.S.S.R., but religious propaganda is still banned.

The proselytizing successes of the religious communities, notably of various sectarian bodies, have become of great concern to the authorities; there has been a great increase of anti-religious articles in the press since 1958, and a number of religious institutions was once again closed or banned.

Education.—Under the Constitution, citizens of the U.S.S.R. have the right to education. Since 1956 the entire educational course, including higher education at universities, technical colleges, etc., has been free. In view of an acute shortage of young man-power caused by the abrupt fall of the birth-rate in the years 1942-1946, the government has been discouraging secondary school graduates from going on immediately to the University. Boys and girls of school-leaving age are ordered by law to put in two years of practical work in industry and agriculture, and 80 per cent. of all vacancies in the universities are reserved for young people who have accomplished this spell of practical work.

The state controls all educational institutions, theatres, cinemas, museums, libraries and picture galleries, as well as the press and the radio. The main centre of research and learning is the Academy of Sciences of the U.S.S.R., which is in effect a vast and efficient government-controlled pool of scientists.

President, M. V. Keldysh.

Chronological System.—On February 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar, and by a decree of June 16, 1930, the Soviet Government advanced all the clocks in the Union by one hour, thus adopting permanent Summer Time. The country is divided into several time zones (Moscow time is 3 hours ahead of G.M.T.).

LANGUAGE, LITERATURE AND ARTS

Language and Literature.—Russian is a branch of the Slavonic family of languages which is divided into the following groups: *Eastern*, including Russian, Ukrainian and White Russian; *Western*, including Polish, Czech, Slovak and Sorbish (or Lusatian Wendish); and *Southern*, including Serbo-Croat, Slovene, Macedonian and Bulgarian. The Western group and part of the Southern group are written in the Latin alphabet, the others in the Cyrillic, said to have been instituted by SS. Cyril and Methodius in the ninth century, and largely based on the Greek alphabet. Before the Westernization of Russia under Peter the Great (1682-1725), Russian literature consisted mainly of folk ballads (*byliny*), epic songs, chronicles and works of moral theology. The eighteenth and particularly the nineteenth centuries saw a brilliant development of Russian poetry and fiction. Romantic poetry reached its zenith with Alexander Pushkin (1799-1837) and Mikhail Lermontov (1814-1841). The 20th century produced great poets like Alexander Blok (1880-1921), the Nobel Prize laureate of 1958 Boris Pasternak (1890-1960) and Vladimir Mayakovsky (1893-1930). Realistic fiction is associated with the names of Nikolai Gogol (1809-1852), Ivan Turgenev (1818-1883), Fedor Dostoyevsky (1821-1881) and Leo Tolstoy (1828-1910), and later with Anton Tchekov (1860-1904), Maxim Gorky (1868-1936), and Ivan Bunin (1870-1953).

Great names in music include Glinka (1804-1857), Mussorgsky (1839-1881), Rimsky-Korsakov (1844-1908), Rubinstein (1829-1894), Tchaikovsky (1840-1893), Rakhmaninoff (1873-1949), Scriabin (1872-1915), Prokofiev (1891-1953), Stravinsky (b. 1882) and Shostakovich (b. 1906).

FINANCE

A new, "heavy" Rouble was introduced on January 1, 1961. Prices and wages have been changed accordingly at the rate of 10 old Roubles = 1 new Rouble. The exchange rate of the new Rouble, however, has been altered in favour of foreign currencies. The official exchange rate is now £1 = R. 2.52. New banknotes in circulation are those valuing R. 1, 3, 5, 10, 25, 50 and 100. There are also new coins valuing Kopecks 1, 2, 3, 5, 10, 15, 20, and 50 and R. 1. Old Kopeck coins are also current at the same value as new ones.

DEFENCE

No official returns concerning the services have been made for many years. According to Western estimates, the Soviet forces (including the MVD and KGB troops) amounted in 1959 to about 3,800,000 men. The *ground forces* were estimated to number about 2,700,000 (including security forces), formed in ca. 140 infantry divisions (including 70 armoured), some 40 artillery divisions (including some tactical missile units), an unknown number of cavalry divisions and independent brigades and 130 cadre divisions. The *Navy* is understood to be under-

going a big reorganization. Building of larger ships of the cruiser type seems to have been halted. Some cruisers are being converted to guided missile ships. The strength of the submarine fleet is uncertain. The Soviet Navy appears to possess between six and 12 nuclear submarines and 18 conventionally-powered boats with guided missiles. The number of ordinary submarines appears to have been reduced from 450 in 1960 to 430 in 1961. The *Air Force* was estimated in 1959 to number 700,000 personnel and over 25,000 operational aircraft, having at its disposal about 1,000 airfields on the territory of the U.S.S.R. It consists of five commands, the Long Range A.F., the Frontal A.F., the Fighter A.F., the Airborne Troops A.F. and the Navy A.F. There is an unknown number of strategic missile units and of A.A. units which were made a separate arm in 1955. A Rocket Weapons Command was set up in 1960.

Length of service is fixed at two years for the Army and the MVD troops, three years for the KGB border units and the Air Force and four years for the Navy and Coastal Defence Units. The general tendency is to turn the Soviet Armed forces into a professional body.

Minister of Defence, Marshal R. Ya. Malinovsky.

Senior Vice-Minister, Marshal A. A. Grechko.

Chief of General Staff, Marshal M. A. Zakharov.

On May 14, 1955, a Treaty of Friendship, Co-operation and Mutual Assistance was signed in Warsaw between the Soviet Union and its European satellites (Albania, Bulgaria, Eastern Germany, Hungary, Poland, Roumania and Czecho-Slovakia) to serve as a counter-poise to NATO. A unified military command was set up in Moscow (C.-in-C., Marshal A. A. Grechko).

INDUSTRY AND AGRICULTURE

One of the most remarkable aspects of Soviet economy has been the transformation of what was primarily an agricultural country into the second-strongest industrial country in the world in the course of the five successive *Five Year Plans* and the current *Seven Year Plan*. The 1958 output amounted to 43,000,000* tons of pig iron, 59,900,000 tons* of steel, 42,900,000* tons of rolled metal, 506,500,000* tons of coal, 129,500,000* tons of crude oil, 33,300,000 tons* of cement, 264,000,000,000 kW/h of electric power.

The area under crops increased from 292,121,000 acres in 1913 to 484,400,000 in 1959. Land under crops east of the Volga and the Caspian Sea has greatly increased, in Kazakhstan by nearly five times, since 1913. Stock breeding has been less of a success. The *live stock* in 1959 included 74,100,000 cattle (66,800,000 in 1928), including 33,900,000 cows (33,200,000 in 1928), 136,100,000 sheep and 53,300,000 pigs. The lingering crisis in the field of meat and dairy production caused spectacular price increases (25-30 p.c.) in the early summer of 1962.

Two major reforms in the course of 1958 have given greater scope to the collective farms (*kolkhozy*)—the abolition of the State-owned Machine-and-Tractor Stations and the sale of their equipment to the *kolkhozy*; and the reorganization of the system of compulsory deliveries of produce by the farms to the State. On the other hand new territorial farming boards were established in 1961 to tighten up control over agricultural production.

Forests cover nearly 40 per cent. of the whole area of the Union and form a considerable source of wealth.

* Metric.

Trade with U.K.

	1960	1961

COMMUNICATIONS

Railways.—Length of railways in use:

Year	Miles	Year	Miles
1913.....	44,551	1950.....	72,637
1928.....	47,772	1955.....	74,998
1940.....	65,926	1957.....	75,265
	1958.....		76,383

European Russia is relatively well served by railways, Leningrad and Moscow being the two main focal points of rail routes. The centre and south have a good system of north-south and east-west lines, but the eastern part (the Volga lands) traversed as it is by trunk lines between Europe and Asia which enter Siberia *via* Sverdlovsk, Chelyabinsk, Magnitogorsk and Ufa, lacks north-south routes. In Asia, there are still large areas of the U.S.S.R., notably in the Far North and Siberia, with few or no railways. Railways built since 1928 include the Turkestan-Siberian line (*Turksib*) which has made possible a large-scale industrial exploitation of Kazakhstan, a number of lines within the system of the *Trans-Siberian Railway* (Magnitogorsk-Kartaly-Troitsk, Sverdlovsk-Kurgan, Novosibirsk-Proyektnaya, etc.), which are of great importance for the industrial development in the east, the Petropavlovsk-Karaganda-Balkhash line which has made possible the development of the Karaganda coal basin and of the Balkhash copper mines, and the Moscow-Donbass trunk line. Lines envisaged under the new Seven Year Plan include the Stalinsk-Magnitogorsk trunk line. In the northern part of European Russia, the North Pechora Railway has been completed, while in the Far East a second Trans-Siberian line is under construction; it will follow a more northerly alignment than the existing Trans-Siberian and will terminate in the Pacific port of Sovetskaya Gavan.

Sea Ports and Inland Waterways.—The most important ports (Odessa, Nikolayev, Batum, Taganrog, Rostov, Kerch, Sebastopol and Novorossiysk) lie around the Black Sea and the Sea of Azov. The northern ports (Leningrad, Murmansk and Archangel) are, with the exception of Murmansk, icebound during winter. Several new ports have been built along the Arctic Sea route (between Murmansk and Vladivostok) and are now in regular use every summer. The great Far Eastern port of Vladivostok, the Pacific naval base of the U.S.S.R., is kept open by icebreakers all the year round. Inland waterways, both natural and artificial, are of great importance in the country, although all of them are icebound in winter (from 2½ months in the south to 6 months in the north). The great rivers of European Russia flow outwards from the centre, linking all parts of the plain with the chief ports, an immense system of navigable waterways which carries about 139,000,000 tons of freight per year. They are supplemented by a system of canals which provide a through traffic between the White, Baltic, Black and Caspian Seas. The most notable of them, built largely by forced labour, are the *White Sea-Baltic Stalin Canal*, and the *Moscow-Volga Canal*. The 63-miles long *Volga-Don Canal*, linking the Baltic and the White Seas in the North to the Caspian, the Black Sea and the Sea of Azov in the South, was completed in May, 1952.

FLAG OF THE U.S.S.R.—Red, with five-pointed star above hammer and sickle.

NATIONAL DAY OF THE U.S.S.R.—November 7 (Commemorating the Bolshevik *coup d'état* of 1917).

BRITISH EMBASSY

(Sofitskaya Naberezhnaya 14, Moscow)

British Ambassador, His Excellency Sir Humphrey Trevelyan, K.C.M.G., C.I.E., O.B.E. £7,015

Minister, W. Barker, C.M.G., O.B.E.
Counsellors, H. F. T. Smith; D. L. L. Stewart (Commercial); F. Garrett (Scientific).

1st Secretaries, E. Bolland; J. C. Cloake; K. J. Uffen; A. Brooke-Turner (Cultural Attaché); K. Kirby (H.M. Consul); Dr. W. F. Townsend-Coles (Medical Officer).

2nd Secretaries, G. Cowell; M. C. C. Wheeler; D. O. Amy; E. J. Scott; G. Heffer.

3rd Secretaries, C. L. G. Mallaby; A. D. Loehnis; F. B. Wheeler; D. J. Johnson; E. G. B. Johnson; G. D. G. Murrell; W. S. Dally; Miss R. Chaplin.

Naval Attaché, Captain J. A. Templeton-Cotill, R.N.

Assistant Naval Attachés, Lt.-Cdr. A. E. Thompson, R.N.; Lt.-Cdr. M. V. Middleton, R.N.

Military Attaché, Brlg. L. Maxwell, O.B.E.

Assistant Military Attaché, Major I. M. Aylwin.

Air Attaché, Air Commodore M. D. Lyne, A.F.C.

Assistant Air Attachés, Sqn.-Ldr. R. A. Nash; Sqn.-Ldr. C. Woods; Flt.-Lt. N. Walsh.

There are no British Consulates in the U.S.S.R. apart from the Consular Section attached to the Embassy.

I.—R.S.F.S.R.

(The Russian Soviet Federal Socialist Republic)

Chairman of the Presidium of the Supreme Soviet, N. N. Organov.

Chairman of the Council of Ministers, D. S. Polyansky.

Minister of Foreign Affairs, M. A. Menshikov.

Chairman of All-Russian Economic Council, S. A. Afanasyev.

The R.S.F.S.R. has no Communist Party Central Committee of its own; there is, however, a Bureau of the Central Committee of the CPSU for the R.S.F.S.R., with N. S. Khrushchev as its Chairman, and G. I. Voronov as 1st Vice-Chairman.

The R.S.F.S.R., the largest and the most important of the Republics, occupies the major half of the European part of the U.S.S.R. and the major northern half of its Asiatic part and makes up 77 per cent. of the total territory of the U.S.S.R. with 56 per cent. of the total population. It consists of 16 Autonomous Republics (the Bashkir, Buryat, Checheno-Ingush, Chuvash, Dagestan, Kabardin-Balkar, Kalmyk,* Karelian, Komi, Mari, Mordovian, North-Osetian, Tartar, Tuva, Udmurt and Yakut A.S.S.R.'s); 6 regions (Altai, Khabarovsk, Krasnodar, Krasnoyarsk, Maritime and Stavropol) containing in their turn 5 autonomous provinces and 4 national territories; 49 provinces (Amur, Archangel, Astrakhan, Belgorod, Bryansk, Chelyabinsk, Chita, Gorky, Irkutsk, Ivanovo, Kalinin, Kaliningrad, Kaluga, Kamchatka, Kemerovo, Kirov, Kostroma, Kuibyshev, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Orenburg, Penza, Perm, Pskov, Rostov, Ryazan, Sakhalin, Saratov, Smolensk, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Vladimir, Volgograd, Vologda, Voronezh and Yaroslavl), which in their turn include 6 national territories.

* During the Second World War, the Kalmyks, a Mongolian people, were scattered to remote areas in a deportation programme. Their territory was restored as an autonomous province in 1957, and on July 30, 1958, the Supreme Soviet of the U.S.S.R. restored a Kalmyk A.S.S.R.

Physical Features.—The R.S.F.S.R. may be conveniently divided into three areas, a low-lying flat Western part stretching eastwards up to the Yenisei and divided in two by the Ural ridge; an eastern part, between the Yenisei and the Pacific, consisting of a number of tablelands and ridges, and a southern mountainous part. Climatically, the R.S.F.S.R. lies in all zones, except the tropics, and may be divided into the following belts (from north to south): Arctic, Tundra, Forest, Mixed Forest-Steppe, Steppe, Sub-Tropics.

The Republic has a very long coast-line, including the longest Arctic coast-line in the world (about 17,000 miles). The most important rivers in the European Part of the R.S.F.S.R. are the Volga with its tributaries Kama and Oka, the Northern Dvina and the Pechora, the short but wide Neva, the Don and the Kuban, and in the Asiatic part, the Ob with the Irtysh, the Yenisei, the Lena and the Amur, and, further north, Khatanga, Olenek, Yana, Indigirka, Koiyama and Anadyr. Lakes are abundant, particularly in the north-west. The huge Balkal Lake in Eastern Siberia is the deepest lake in the world. There are also two large artificial water reservoirs within the Great Volga canal system, the Moscow and Rybinsk "Seas."

Minerals.—The Republic occupies one of the first places in the world for mineral wealth. Coal is mined in the Kuznetsk area, in the Urals, south of Moscow, in the Donets basin (its Eastern part lies in the R.S.F.S.R.) and in the Pechora area in the North. Oil is produced in the Northern Caucasus and in the area between the Volga and the Ural (the so-called "Second Baku"). The Ural mountains contain a unique assortment of minerals—high-quality iron ore, manganese, copper, aluminium, gold, platinum, precious stones, salt, asbestos, pyrites, coal, oil, etc. Iron ore is mined, in addition to the Urals, near Kursk, Tula, Lipetsk, Khoper, in several areas in Siberia and in the Kola Peninsula. Non-ferrous metals are found in the Altai, in Eastern Siberia, in the Northern Caucasus, in the Kuznetsk Basin, in the Far East and in the Far North. Nine-tenths of all U.S.S.R. forests are located in the R.S.F.S.R.

Production and Industry.—The vastness of the territory of the Republic and the great variety in climatic conditions cause great differences in the structure of agriculture from north to south and from west to east. In the Far North stag breeding, hunting and fishing are predominant. Further south, timber industry is combined with grain growing. In the southern half of the forest zone and in the adjacent forest-steppe zone, the acreage under grain crops is far larger and the structure of agriculture more complex. In the eastern part of this zone, between the Volga and the Urals, cereiculture is predominant (particularly summer wheat), with cattle breeding next. Beyond the Urals, we find another important grain-growing and stock-breeding area in the southern part of the Western-Siberian plain. The southern steppe zone is the main wheat granary of the U.S.S.R., containing also large acreages under barley, maize and sunflower. In the extreme South (Krasnodar region, Stavropol region) cotton is now cultivated. Vine, tobacco and other Southern crops are grown on the Black Sea shore of the Caucasus.

Industrially, the R.S.F.S.R. occupies the first place among the Soviet Republics. Major changes in the location of industry have occurred since the revolution and again since the war with two new industrial areas being developed in the Urals and in the Kuznetsk basin, although Moscow and Leningrad are still the two largest industrial centres in the country. Most of the oil produced in the

U.S.S.R. now comes from two areas in the R.S.F.S.R.—the Bashkir and Tartar Autonomous Republics. All industries are represented in the R.S.F.S.R., including iron and steel and engineering. Industrial centres include Magnitogorsk, Chelyabinsk, Novokuznetsk, Tula, Komsomolsk, Perm, Ufa, Irkutsk, Kuibyshev, Krasnoyarsk, Nizhny-Tagil, Novosibirsk, Omsk, Volgograd, Gorky, Saratov, Grozny, Rostov and Taganrog.

CAPITAL, MOSCOW. Population 5,032,000 (an increase of 120 per cent. since 1939). Moscow, founded about A.D. 1147 by Yuri Dolgoruki, became first the centre of the rising Moscow principality and, later, in the 15th century, the capital of the whole of Russia (Muscovy). In 1325, it became the seat of the Metropolitan of Russia. In 1703 Peter the Great transferred the capital to the newly built St. Petersburg, but on March 14, 1918, Moscow was again designated as the capital. Ψ Leningrad (before the First World War "St. Petersburg" and from 1914-1919; "Petrograd") has a population of 3,300,000.

Other cities with populations exceeding 500,000 (1959) are:—

Gorky (Nizhny-Novgorod).....	942,000
Novosibirsk (Novonikolayevsk).....	887,000
Kuibyshev (Samara).....	806,000
Sverdlovsk (Yekaterinburg).....	777,000
Cheyabinsk.....	688,000
Kazan.....	643,000
Perm.....	628,000
Ψ Rostov-on-Don.....	597,000
Volgograd (Stalingrad; Tsaritsyn).....	591,000
Saratov.....	581,000
Omsk.....	579,000
Ufa.....	546,000

About 83 per cent. of the population are Russians.

Ψ Seaport.

II.—THE UKRAINE

First Secretary of the Party Central Committee, N. V. Podgorny.

Chairman of the Presidium of the Supreme Soviet, D. S. Korotchenko.

Chairman of the Council of Ministers, V. V. Shcherbitsky.

Chairman of Republican Economic Council, A. S. Kuzmich.

Minister of Foreign Affairs, L. F. Palamarchuk.

This Republic, second largest in population, lying in the south-western part of the European half of the U.S.S.R., was formed in December, 1917. It consists of 25 provinces—Cherkasy, Chernigov, Chernovtsy, Crimea, Dnepropetrovsk, Donets, Kharkov, Kherson, Khmelintsky, Kiev, Kirovograd, Lugansk, Lvov, Nikolayev, Odessa, Poltava, Rovno, Stanislav, Sumy, Ternopol, Transcarpathia, Vinnitsa, Volhynia, Zaporozhye and Zhitomir.

Physical Features.—The larger part of the Ukraine forms a plain with small elevations. The Carpathian mountains lie in the south-western part of the Republic. The climate is moderate, with relatively mild winters (particularly in the south-west) and hot summers. The main rivers are the Dnieper with its tributaries, the Southern Bug and the Northern Donets (a tributary of the Don).

Production and Industry.—The main centre of Soviet coal mining and iron and steel industry is situated in the southern part of the Ukraine. Engineering and chemical industry have been greatly developed under the Soviet régime. In 1955, the Ukraine provided 37 per cent. of the total Soviet steel, 39 per cent. of metal goods and 32 per cent. of coal. The central forest-steppe region (mainly on the right bank of the Dnieper)

is the greatest sugar-producing area in the U.S.S.R. The Ukraine also leads in grain-growing and stock-raising.

There are large deposits of coal and salt in the Donets Basin, of iron ore in Krivoy Rog and near Kerch in the Crimea, of manganese in Nikopol, and of quicksilver in Nikitovka.

CAPITAL (since 1934), Kiev, the oldest city in Russia, founded in the 9th century A.D., was the capital of the Russian State from 865 to 1240. Population (1959) 1,102,000. Other cities with population over 500,000 are:—

Kharkov	930,000
Donetsk (Stalino); Yuzovka, i.e. Hughes-ovka)	701,000
ψ Odessa	667,000
Dnepropetrovsk (Yekaterinoslav)	658,000

III.—BELORUSSIA (White Russia)

First Secretary of the Party Central Committee, K. T. Mazurov.

Chairman of the Presidium of the Supreme Soviet, V. I. Kozlov.

Chairman of the Council of Ministers, T. Ya. Kiselev. Minister of Foreign Affairs, K. V. Kiselev.

Chairman of Republican Economic Council, A. M. Tarasov.

The Belorussian S.S.R., lying in the western part of the European half of the U.S.S.R., was formed early in 1919. It now consists of six provinces (Brest, Gomel, Grodno, Minsk, Mogilev and Vitebsk). It is largely a plain with many lakes, swamps and marshy land. Before the revolution of 1917 the area was one of the most backward parts of European Russia. Since then, agriculture has been greatly developed, thanks to draining of swamps. Most of the Republic's industry is also of recent growth. Woodworking is of great importance, but engineering has also been greatly extended with several major plants built in Gomel and Minsk.

The main rivers are the upper reaches of the Dnieper, the Niemen and of the Western Dvina.

CAPITAL, Minsk. Population 509,000.

Belorussians make up four-fifths of the population, with Russians and Poles coming next.

IV.—UZBEKISTAN

First Secretary of the Party Central Committee, Sh. R. Rashidov.

Chairman of the Presidium of the Supreme Soviet, Mrs. Ya. S. Nasriddinova.

Chairman of the Council of Ministers, R. Kurbanov.

The Uzbek S.S.R. was formed in 1924 and consists of the Kara-Kalpak A.S.S.R. and of 7 provinces (Andizhan, Bokhara, Ferghana, Khorezm, Samarkand, Surkhan-Darya and Tashkent). It lies between the high Tien-shan Mountains and the Pamir highlands in the east and south-east and sandy lowlands in the west and north-west. The major part of the territory is a plain with huge waterless deserts and several large oases, which form the main centres of population and economic life. The largest is the Ferghana valley, watered by the Syr-Darya. Other oases include Tashkent, Samarkand, Bokhara and Khorezm. The climate is continental and dry. Minerals include oil (in the Ferghana valley and in Khauadag), coal (Angren) and sulphur (Shorsu).

The Uzbeks, a Turkic people, make up 62 per cent. of the population, the Russians (14 per cent.) and Tartars (five per cent.) come next.

There is a major agricultural machinery plant at Tashkent and a chemical combine at Chirchik. Uzbekistan is the main cotton-growing area of the U.S.S.R. producing more than 60 per cent. of all Soviet cotton. Irrigation has always been of decisive importance in this area, and the Soviet

Government has done much in this field, including the construction of the Great Ferghana Canal (230 miles).

CAPITAL, Tashkent. Population 911,000. Samarkand (195,000) contains the Gur-Emir (Tamerlane's Mausoleum), completed A.D. 1400 by Ulug-bek, Tamerlane's astronomer-grandson. and a 15th-century observatory, recently restored.

V.—KAZAKHSTAN.

First Secretary of the Party Central Committee, D. A. Kunayev.

Chairman of the Presidium of Supreme Soviet, I. Sh. Sharipov.

Chairman of the Council of Ministers, M. Beisebayev.

The Kazakh S.S.R., the second-largest Union-Republic, stretching from the lower reaches of the Volga and the Caspian in the west to the Altai and Tien-shan in the east, and bordering on China, was formed in 1920 as an autonomous republic (under the name of the Kirghiz A.S.S.R.) within the R.S.F.S.R., and was constituted a Union Republic in 1936. It consists of the Virgin-land Region (*Tselhnyy Kray*), comprising the Kokchetav, Kustanay, North-Kazakhstan, Pavlodar and Tselinograd (formerly, Akmolinsk) Provinces; the West-Kazakhstan Region comprising the Aktyubinsk, Guryev and Uralsk Provinces; the South-Kazakhstan Region comprising the Chimkent, Djambul and Kzyl-Orda Provinces, and of four other Provinces (Alma-Ata, East-Kazakhstan, Karaganda and Semipalatinsk).

Kazakhstan is a country of arid steppes and semi-deserts, flat in the west, hilly in the east and mountainous in the south-east (Southern Altai and Tien-shan). The climate is continental and very dry. The main rivers are the (Upper) Irtysh, the Ural, the Syr-Darya and the Ili. Kazakhstan contains rich deposits of non-ferrous metals: copper in Kounrad, Djezkazgan and Boshchekul, other metals in the Altai, in the Kara-Tau Mounts, and elsewhere. It also contains an important coal-producing area (Karaganda) ranking third in the U.S.S.R. and an oil-bearing area (near Emba). Major centres of metal industry exist now in the Altai Mountains, in Chimkent, North of the Balkhash Lake and in Central Kazakhstan. Stock-raising is highly developed, particularly in the central and south-western parts of the Republic. Grain is grown in the North and north-east and cotton in the south and south-east. In 1954 an ambitious programme of development of "virgin" lands in the steppes was launched by the Government to increase grain production.

The Kazakhs (a Turkic people) are now in a minority in the Republic named after them; they constitute only 30 per cent. of its population. Russian settlers make up 43 per cent. and Ukrainians 8 per cent.

CAPITAL, Alma-Ata (formerly Verny). Population 455,000.

VI.—GEORGIA

First Secretary of the Party Central Committee, V. P. Mzhavanadze.

Chairman of the Presidium of the Supreme Soviet, G. S. Dzoteniidze.

Chairman of the Council of Ministers, G. D. Djavakishvili.

The Georgian S.S.R., occupying the north-western part of Transcaucasia, lies on the shore of the Black Sea and borders in the south-east on Turkey. It was formed in 1921; in 1922 it joined the Transcaucasian Federation which, in its turn, adhered to the U.S.S.R. in the same year. After the liquidation of the Transcaucasian S.F.S.R. in 1936 Georgia became a Union Republic. It contains two Autonomous Republics (Abkhazia and

Adjarja) and the South-Osetian Autonomous Province. Georgia is a country of mountains, with the Greater Caucasus in the north and the Smaller Caucasus in the south. A relatively low-lying land between these two ridges is divided into two parts by the Sura Ridge: Western Georgia with a mild and damp climate and Eastern Georgia with a more continental and dry climate. The Black Sea shore and the Rion lowlands are subtropical in their climatic character. The most important mineral deposits are manganese (Chiatury), coal (Tkibuli and Tkvarcbeli) and oil (Kakhetia). Georgia is leading as regards production of manganese in the U.S.S.R. There are also many oil refineries. Viniculture and tobacco-growing are the two main agricultural industries. The Black Sea coast harbours many famous holiday resorts. Georgians make up 63 per cent. of the population, the remainder being composed of Armenians, Russians, Azerbaidjani and Osetians.

CAPITAL, Tbilisi (Tiflis). Population 664,000.

VII. AZERBAIDJAN

First Secretary of the Party Central Committee, V. Yu. Akhundov.

Chairman of the Presidium of the Supreme Soviet, M. A. Iskenderov.

Chairman of the Council of Ministers, E. A. Alikhanov.

The Azerbaidjan S.S.R. occupies the eastern part of Transcaucasia, on the shores of the Caspian Sea, and borders on Persia. It was formed in 1920. Between 1922-1936 it formed part of the Transcaucasian Federation. In 1936 it became a Union Republic. It contains the Nakhichevan Autonomous Republic and the Nagorno-Karabakh Autonomous Province.

The north-eastern part of the Republic is taken up by the south-eastern end of the main Caucasus ridge, its south-western part by the smaller Caucasus hills, and its south-eastern corner by the spurs of the Talysh Ridge. Its central part is a depression irrigated by the Kura and by the middle reaches of its tributary Aravga. Sheltered by the mountains from the humid west winds blowing from the Black Sea, Azerbaidjan has a continental climate. The land requires artificial irrigation. The Republic is very rich in minerals, particularly in oil. The Baku oilfields form the second-largest oil-producing area in the U.S.S.R. A large power station on the Kura (Mingechaur) was completed in 1954. Azerbaidjan is also important as a cotton growing area. The Azerbaidjani (Turks) make up two-thirds of the population of the Republic, Armenians, about 12 per cent., and Russians, about 14 per cent.

CAPITAL, Ψ Baku, Population 968,000.

VIII.—LITHUANIA

First Secretary of the Party Central Committee, A. J. Snieckus.

Chairman of the Presidium of the Supreme Soviet, J. I. Paleckis.

Chairman of the Council of Ministers, M. J. Šumauskas.

Lithuania, formerly a Province of the Russian Empire, was declared an independent Republic at Vilna in 1918 and was incorporated into the U.S.S.R. in August, 1940. It was occupied by German forces from June, 1941, until the autumn of 1944. The Republic forms a plain with a large number of lakes and swamps. The forests occupy 19 per cent. of the whole area. The main river is the Niemen with its tributaries.

The chief industries are agriculture and forestry, the chief products being rye, oats, wheat, barley, flax, sugar-beet and potatoes. Before its in-

corporation into the Soviet Union, Lithuania exported a large quantity of meat and dairy produce.

The Lithuanians make up four-fifths of the population, Russians and Poles, 8.5 per cent. each. The majority of the Jews were exterminated by the Germans.

CAPITAL, Vilnius (Vilna, restored to Lithuania by U.S.S.R. after invasion and collapse of Poland in 1939, and recaptured by Soviet forces in July, 1944). Population 235,000.

IX.—MOLDAVIA

First Secretary of the Party Central Committee, I. I. Bodyul.

Chairman of the Presidium of the Supreme Soviet, I. S. Koditsa.

Chairman of the Council of Ministers, A. F. Diorditsa.

Moldavia, occupying the south-western corner of the U.S.S.R., borders in the west on Roumania with the Pruth forming the frontier. In 1918, Roumania seized the Russian Province of Bessarabia. In 1924 a Moldavian Autonomous Republic was formed within the Ukraine, and in 1940 the U.S.S.R. forced Roumania to give back Bessarabia, the major part of which was merged with the Moldavian A.S.S.R. to form a Moldavian Union Republic. Moldavia was occupied by the Germans and Roumanians between 1941-1944.

The northern part of the Republic consists of flat steppe lands, now all under plough. Some forests skirt the Dniester. Further south, around Kishinev, there are woody hills, and further south again, low-lying steppe lands. The climate is moderate. The main river is the Dniester, navigable along the whole course.

The main industry is agriculture (viniculture, fruit-growing and market-gardening). Industry is insignificant in both parts of Moldavia, but the Republic has the densest population in the U.S.S.R. A radical agrarian reform has been carried out under the Soviet régime. Moldavians make up 65 per cent. of the population, with Ukrainians, and Russians next. In the south there are colonies of Bulgarians.

CAPITAL, Kishinev (Chisinau). Population 214,000.

X.—LATVIA

First Secretary of the Party Central Committee, A. J. Pelše.

Chairman of the Presidium of the Supreme Soviet, J. E. Kalnberziu.

Chairman of the Council of Ministers, V. P. Ruben.

The Latvian S.S.R., lying on the shores of the Baltic and of the Gulf of Riga, was formerly a Baltic Province of the Russian Empire. It was proclaimed an independent state in 1918 and was forcibly incorporated into the U.S.S.R. in August 1940. Between 1941 and 1944 the Republic was occupied by the German forces.

The surface of the country is generally flat, interspersed by occasional chains of hills. The climate is moderately-continental. The main rivers are the lower reaches of the Western Dvina and its tributaries. Forests occupy 20 per cent. of the total territory.

The Latvians make up 62 per cent. of the Republic's population, the Russians, 27 per cent.

Latvian industry was always highly developed, with shipbuilding, engineering, chemical industry, textile industry, wood-working and dairying being the chief occupations. Both Riga and Liepaja (Libava, Liebau) are important sea-ports.

As in other newly-acquired Republics an agrarian reform was carried out in Latvia in 1940-41 and again after 1944.

CAPITAL, Ψ Riga. Population 605,000.

XI.—KIRGHIZIA

First Secretary of the Party Central Committee, T. U. Usabaiyev.

Chairman of the Presidium of the Supreme Soviet, T. Kulatov.

Chairman of the Council of Ministers, B. Mambetov.

The Kirghiz S.S.R. occupies the north-eastern part of Soviet Central Asia and borders in the south-east on China. In 1924, a Kara-Kirghiz Autonomous Province was formed within the R.S.F.S.R. In 1926 it became a Kirghiz Autonomous Republic, and in 1936, a Union Republic. It contains two provinces (Osh and Tien-Shan). The Kirghiz Republic is a mountainous country, the major part being covered by the ridges of the Central Tien-Shan, while mountains of the Pamiro-Altai system occupy its southern part. There are a number of spacious mountain valleys, the Alal, Susamyr, the Issyk-kul lake and others. The majority of the population is concentrated in plains, lying at the foot of mountains—Chu, Talass, part of the Ferghana Valley where agriculture prospers. Industry is insignificant, but some mining is done. A number of railways have been built under the Five Year Plans. The Kirghiz now constitute only 40 per cent. of the population, the Russians, 30 per cent. The Uzbeks (in Eastern Ferghana) amount to 10 per cent.

CAPITAL, Frunze (formerly Pishpek). Population 217,000.

XII.—TADJIKISTAN

First Secretary of the Party Central Committee, D. R. Rasulov.

Chairman of the Presidium of the Supreme Soviet, M. Rakhmatov.

Chairman of the Council of Ministers, A. Kakharov.

The Tadjik S.S.R. lies in the extreme south-east of Soviet Central Asia and borders in the south on Afghanistan and in the east on China. It was originally formed in 1924 as an Autonomous Republic within the Uzbek S.S.R. and became a Union Republic in 1929. It includes the Gorno-Badakhshan Autonomous Province and the Leninabad Province.

The country is mountainous: in the east lie the Pamir highlands with the highest point in the U.S.S.R., the Stalin Peak (24,500 feet), in the centre the high ridges of the Pamir-Altai system. Plains are formed by wide stretches of the Syrdarya valley in the north and of the Amu-Darya in the south.

Like the other Central-Asiatic Republics, Tadjikistan is a cotton-growing country. Its climatic conditions favour the cultivation of Egyptian cotton. Irrigation is of great importance. Fifty-three per cent. of the population are Tadjiks (linguistically and culturally akin to the Persians), about 23 per cent. Uzbeks, the rest Russians and Tartars.

CAPITAL, Dushanbe (formerly Stalinabad; Dyushambe). Population 224,000.

XIII.—ARMENIA

First Secretary of the Party Central Committee, Ya. N. Zarobyan.

Chairman of the Presidium of the Supreme Council, Sh. M. Arushanyan.

Chairman of the Council of Ministers, A. E. Kochinyan.

The Armenian S.S.R. occupies the south-western part of Transcaucasia; it was formed in 1920. In 1922 it joined the Transcaucasian Federation, and on its liquidation in 1936 became a Union Republic. In the south it borders on Turkey. It is a mountainous country consisting of several vast table lands surrounded by ridges.

The population and the economic life are concentrated in the low-lying part of Armenia, the Aras valley and the Erevan hollow; the climate is continental, dry and cold, but the Aras valley has a long, hot and dry summer. Irrigation is essential for agriculture. At the junction of the former Turkish, Persian and Russian boundaries is *Mount Ararat* (17,260 ft.), the traditional resting place of "Noah's Ark." Industrial and fruit crops are grown in the low-lying districts, grain in the hills. Armenia is traditionally noted for her wine. There are large copper ore and molybdenum deposits and other minerals. The Armenian Church centred in Etchmiadzin is the oldest established Christian Church, Christianity having been recognized as the State religion in A.D. 300.

Nearly 90 per cent. of the population is Armenian.

CAPITAL, Erevan. Population 509,000.

XIV.—TURKMENISTAN

First Secretary of the Party Central Committee, B. O. Ovezov.

Chairman of the Presidium of the Supreme Soviet, N. Bayramov.

Chairman of the Council of Ministers, A. A. Annaliyev.

Turkmenia occupies the extreme south of Soviet Central Asia, between the Caspian and the Amu-Darya and borders in the south on Iran and Afghanistan. It was formed in 1924 and contains three provinces (Chardjou, Mary and Tashauz). The country is a low-lying plain, fringed by hills in the south. Ninety per cent. of the plain is taken up by the arid Kara-Kum desert. Of all Central-Asiatic Republics, Turkmenia is the lowest and driest. The principal industries are agriculture and stock-raising, cotton, wool, astrakan furs, carpets and horses being the principal products. Minerals include oil and sulphur. Most of the land under plough is artificially irrigated. Silk industry is of an old standing. There are also some fisheries in the Caspian.

Turkmen, nomadic in the past, make up 61 per cent. of the population, with Russians coming second, and Uzbeks, third.

CAPITAL Ashkhabad (formerly Ashkhabad, Poltoratsk). Population 170,000.

XV.—ESTONIA

First Secretary of the Party Central Committee, I. G. Käbin.

Chairman of the Presidium of the Supreme Council, A. A. Mürisepp.

Chairman of the Council of Ministers, W. I. Klauson.

Estonia, formerly a Baltic province of the Russian Empire, was proclaimed an independent Republic in 1918. In 1940, it was forcibly incorporated into the U.S.S.R. It lies on the shores of the Baltic and of the Finnish Gulf in the north and of the Gulf of Riga in the south-west. Some 800 islands, among them Dagö and Ösel, form part of Estonian territory. Between 1941-44, Estonia was occupied by the German forces.

The country forms a low-lying plain with many lakes, among them the Chud (or Pskov) Lake, on the border with the R.S.F.S.R. Forests take up about one-fifth of the territory. Agriculture and dairy-farming are the chief industries, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon and eggs the chief products of dairy farming. There are important manufactures, including textiles, engineering, shipbuilding, wood-working, etc.

The population consists of Estonians (73 per cent.) and Russians (22 per cent.).

CAPITAL, Tallinn (formerly Reval). Population 280,000.

THE VATICAN CITY STATE

(Stato della Città del Vaticano)

Sovereign Pontiff (261st), His Holiness Pope John XXIII (Angelo Giuseppe Roncalli), born at Sotto il Monte (Bergamo), Nov. 25, 1881, elected Pope (in succession to Pius XII) Oct. 28, 1958.

Secretary of State, Cardinal Amleto Cicognani, appointed Aug. 14, 1961.

The office of the ecclesiastical head of the Roman Catholic Church (*Santa Sede* or Holy See) is vested in the Pope of Rome, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, and in 1859 the Papal States had an area of 17,218 square miles, with a population of 3,124,688. During the reign of Pius IX. (1846-1878), the Papal States of Romagna, Umbria and the Marches were incorporated in the Kingdom of Sardinia and with the remaining States (Rome, Comacchio, Viterbo, Civita Vecchia, Velletri and Frosinone) became part of Unified Italy in 1870. The territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo and the temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognized the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and of the Catholic Church in Italy and agreeing to pay 750,000,000 lire in cash and the income at 5 per cent. on 1,000,000,000 lire State bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power. The population of the Vatican City at the census in March, 1947, was 940.

BRITISH LEGATION

(91 Via Condotti, Rome)

British Envoy Extraordinary and Minister Plenipotentiary to the Holy See, His Excellency Sir Peter William Shelley Yorke Scarlett, K.C.M.G., K.C.V.O. (1960)..... £4,115
1st Secretary, D. Cape.
Attaché, J. D. Utley.
Archivist, Miss A. Y. Thomas.

VENEZUELA

(La Republica de Venezuela)

President, Señor Rómulo Betancourt, assumed office Feb. 13, 1959.

VENEZUELAN EMBASSY IN LONDON

3, Hans Crescent, S.W.1

[Knightsbridge: 4206]

Ambassador in London, His Excellency Dr. Ignacio Iribarren Borges (1959).

Economic Counsellor, Señor Julio Planchart.

1st Secretary, Señor Gabriel Paoli.

3rd Secretary, Señora Mercedes Senior.

Naval and Military Attaché, Capt. Armando de Pedraza Perelra.

Air Attaché, Lt.-Col. Edgar Suárez Micr y Terán.

Special Attaché, Señora Miriam Blanco-Fombona de Hood.

There are Consulates-General at London and Liverpool.

Area and Population.—The most northerly Republic of South America, situated approximately between 1° 40' S. lat. and 12° 26' N. lat. and 59° 52'–73° 15' W. long. It consists of one Federal District, 20 states and 2 territories. The best authorities cal-

culate the actual present area to be approximately 352,051 square miles. The population at the Census on February 26, 1961, was 7,523,999.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia, east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being *Margarita*, which is politically associated with Tortuga, Cubagua and Coche to form the State of *Nueva Esparta*. Margarita has an area of about 400 square miles. In 1942 Great Britain ceded to Venezuela the small island of *Patos* (170 acres) about 3 miles from the mainland.

Physical Features.—The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima, and on the eastern border the Sierras de Rincote and de Usupamo, enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parima contains Yapurani (7,175 feet) and Duida (8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (9,000 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly llanos, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the southern highlands of the republic to its outflow in the deltaic region of the north-east.

A Franco-Venezuelan Expedition, led by Major Frank Risquez, claims to have discovered the source of the Orinoco, on Nov. 27, 1951, at 63° 15' W. long., 2° 18' N. lat., and about 1,100 metres above sea-level.

The Orinoco is navigable for large steamers from its mouth for 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles farther up-stream. Dredging operations completed at the beginning of 1954 opened the Orinoco to ocean-going ships, of up to 24 ft. draft, as far as Puerto Ordaz (about 150 miles up-stream). Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apurc (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are Zulía (290 square miles), south-west of Maracaibo, and Valencia (216 square miles), about 1,400 feet above sea-level in the Maritime Andes. The llanos also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes,

is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot, wet season lasts from April to October the dry, cooler season from November to March.

Government.—Venezuela was visited by Columbus in 1498, and in 1499 by Alonso de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Caracas, and the country remained under Spanish rule until the revolt under *Simon Bolivar*, a native of Caracas, who defeated the Spanish forces in the battles of Los Taguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of 47. Venezuela formed part of the Federal Republic of Colombia from 1822-30, since which time it has been independent.

On Nov. 30, 1952, polling took place to elect a new Constituent Assembly, which published a new Constitution on Nov. 30, 1952, and chose a Senate and Chamber of Deputies. The validity of these elections was subsequently queried, but Col. Marcos Pérez Jiménez declared himself elected as the Provisional President. On April 19, 1953, with the passing of the new Constitution, he was declared Constitutional President for a term of five years. Before the expiry of this term, however, on January 23, 1958, his military dictatorship was overthrown by a popular and military uprising, and a Government Junta, presided over by Rear-Admiral Wolfgang Larrazábal Ugueto, assumed the temporary government of the country. Larrazábal resigned on Nov. 14, 1958, in order to stand for President in the elections held on December 7, 1958, his place as President being filled by Dr. Edgar Sanabria who in turn handed over the Presidency to Sr. Rómulo Betancourt on the success of the latter and his party in the elections. Sr. Betancourt presides over a Coalition Government composed of his own political party A.D. (*Acción Democrática*) and COPEI (the Social Christian Party).

Production and Industry.—The produce of Venezuelan forest and fields includes the following: (a) Tropical forest region: orchids, wild rubber, timber, mangrove bark, balata gum and tonka beans. (b) Agricultural areas: cocoa beans, coffee, cotton, rice, maize, sugar, sesame, groundnuts, potatoes, tomatoes, other vegetables, sisal and tobacco. Although there is an extensive beef and dairy farming industry, the country does not produce all the grain and other food products it requires. Food and drink imports were valued at Bs. 523,000,000 in 1960. An autonomous Government department, the *Corporación Venezolana de Fomento*, and other Government agencies, are endeavouring, by loans, investment and other means, to foster agricultural and industrial development. A strong nationalist movement began in 1958 to speed up the rate of industrialization; to this end many tariffs were raised and legislation introduced to compel Governments to give preference to national manufacturers.

The principal industry is that of *Petroleum*.

The production of the oilfields is shown below (in barrels of 42 gallons):—

Year	Barrels	Year	Barrels
1946.....	388,500,000	1954.....	691,181,000
1947.....	438,000,000	1955.....	785,237,000
1948.....	490,000,000	1956.....	899,183,000
1949.....	482,300,000	1957.....	1,014,929,190
1950.....	546,730,000	1958.....	950,957,040
1951.....	622,187,000	1959.....	1,010,873,795
1952.....	658,427,000	1960.....	1,044,520,500
1953.....	644,221,000	1961.....	1,065,743,712

Before the war of 1939-45 over 80 per cent. of the crude oil was exported to Netherlands' West Indies refineries. In 1942 small refineries were established in Venezuela, capable of handling about 200,000 barrels daily. The large Shell plant at Punta Cardon went into production in February, 1949, and the Creole refinery at Amuay a year later. Other refineries are being operated at Caripito, San Lorenzo, Puerto La Cruz, Tucupit6, El Chaire and El Palito and 31.8 per cent. of the total output of crude oil was refined in Venezuela in 1961. Hitherto the Venezuelan Government has been receiving over 50 per cent. of the profits of local oil companies. As a result of income tax increases decreed in December, 1958, this percentage was raised to over 70 per cent. Rich iron ore deposits in South Venezuela are being developed and production reached 14,565,436 metric tons in 1961. A steel works is nearing completion in Quayana. It already makes seamless tubes and will use local ore and power from the newly-opened Caroni River hydroelectric plant.

Other industries include gold, diamonds and asbestos; cotton, wool and rayon weaving; manufacture of paper, cement, beer, tyres, cigarettes, soap, animal feeding concentrates, non-alcoholic drinks, simple steel products, shoes, tins, jewellery, rope, metal and wooden furniture, sacks, paint and motor-vehicle assembly, preparation of pharmaceutical goods, lard, powdered milk, vegetable oil, flour, biscuits and other foods; fishing and fish-canning; pearl fishing. New industries planned include petrochemicals, plate glass, and the manufacture of paper from bagasse.

Language and Literature.—Spanish is the language of the country. Some Venezuelan literature is of international repute. There are 23 daily newspapers in Venezuela, of which 8 are published in Caracas, 75 weeklies and 23 fortnightlies. There are also 233 other periodicals, mostly monthlies, but including also some appearing once, twice or three times a week.

Education is free and primary education compulsory from the age of 7 years. There were, in 1959-60, 1,074,434 primary school pupils and 149,335 secondary school pupils including those at technical schools. There are seven universities in Venezuela, three in Caracas and the others in Maracaibo, Mérida, Valencia and Ciudad Bolívar. The total number of university students is 21,292 (1960).

	FINANCE	
	1959 Bolivares	1960 Bolivares
Revenue.....	5,743,000,000	6,136,000,000
Expenditure.....	6,314,000,000	6,136,000,000
Direct Public Debt (March 31 1962)..		1,568,890,000

The public debt on February 28, 1961 amounted to Bs. 1,493,495,914. The Government controlled foreign exchange rate at present fluctuates around Bs. 9.38 to the £. The official free rate is about Bs. 12.8 to the £ and the unofficial free rate is about the same. There are special buying rates for petroleum, coffee and cocoa. (See also p. 84.)

Communications.—There are about 17,900 miles of all-weather roads. The State has now acquired all but a very few of the railway lines, whose total length is only some 760 miles. A substantial railway reorganization plan has been drawn up which will involve the abandonment of four systems with differing gauges and the construction of new lines of standard gauge. One of these lines, 173 km. long (Puerto Cabello-Barquisimeto), was inaugurated in 1959. Several British, U.S. and European airlines provide Venezuela with a wide range of services. There are three Venezuelan airlines (two of them state-owned) which between them have a comprehensive network of internal lines and also connect Caracas with New York, Miami, Bermuda, Havana, Lima, Bogotá, the West Indies, Lisbon, Madrid and Rome. The Venezuelan state-owned merchant fleet controls a total tonnage of about 250,000. Foreign vessels are not permitted to engage in the coast trade. The telegraph, radio-telegraph and radio-telephone services are state-owned. There are one government-controlled and 79 commercial broadcasting stations. There are five television stations in Venezuela (three in Caracas, one in Maracaibo and one in Valencia). The two Caracas commercial television stations have relay transmitters in the interior of the country, Radio Caracas T.V. having five and Venevisión three.

TRADE
1959 1960

Imports	Bs. 4,720,000,000	Bs. 3,571,424,000
Exports	7,897,000,000	8,500,216,297

The principal imports are machinery, foodstuffs, durable and non-durable consumer goods, iron, steel and chemicals. The principal exports are petroleum and petroleum products (87.7 per cent. in 1960), iron ore, coffee and cocoa. The value of exports of iron ore in 1960 amounted to Bs. 554,310,000.

Trade with U.K.

	1960	1961
Imports from U.K.	£27,718,024	£17,933,138
Exports to U.K.	71,815,323	67,384,338

CAPITAL, Caracas (3,000 ft.). Population, February, 1961, 1,257,515; other principal towns are Maracaibo (457,416), Barquisimeto (231,793), Valencia (204,273), Maracay (142,192), San Cristobal (129,059), Cumaná (110,201) and Ciudad Bolívar (87,928).

FLAG.—Three horizontal bands, yellow, blue, red (with seven white stars on blue band).

VIETNAM

President of the Republic of Vietnam, Ngo dinh Diem, assumed office, Oct. 26, 1955; re-elected for 5 years, April, 1961.

VIETNAM EMBASSY IN LONDON

12 Victoria Road, W.8

[Western: 37651]

Ambassador Extraordinary and Plenipotentiary, Ngo Dinh Luyen (1956).
1st Secretaries, Phan Van Thinh; Le Van Ky (Consular); Pham Huy Ty (Economic).
2nd Secretaries, Nguyen Trieu Dan; Dao Huu Tuong; Le Van Loi; Tran Manh Phuc.
3rd Secretary, Nguyen Duc Quy (Press).
Attaché, Le Dinh Phuoc.

Since the Geneva Conference of July 1954, Vietnam has been divided into two zones.

SOUTHERN ZONE

The Southern Zone has an area of 66,281 sq. miles. Its population was estimated in 1960 at 14,072,000. Rice and rubber are the chief products. Total trade in 1960 was: Imports £85,836,000; Exports £30,552,000.

Trade with U.K.

	1960	1961
Imports from U.K.	£2,592,196	£1,639,338
Exports to U.K.	1,691,085	3,430,303

The rate of exchange (official market sale) in 1961 was VN\$98.0 = £1.

On October 23, 1955, a referendum showed a large majority in favour of the deposition of the former Chief of State, Bao Dai, and the election of Ngo dinh Diem to his place. The latter was accordingly proclaimed Chief of State on October 26, and his first act was to declare Vietnam a Republic of which he became the President. An elected constituent assembly, after two months' deliberation, set up a democratic constitution which was promulgated on October 26, 1956. This constituent assembly, on the date of the promulgation of the constitution, became the first Legislative Assembly of the Republic of Vietnam. A new national assembly was elected in 1959 and President Diem was re-elected for a second term of 5 years in April, 1961. The Government of the Republic of Vietnam in Saigon is recognized by the United Kingdom, the United States, France and other members of the United Nations as the legal government of Vietnam.

CAPITAL.—Ψ Saigon, population (1960, with Cholon), 1,400,000. Other principal towns are Huế (1960 population: 103,870) and Ψ Tourane (1960 population: 104,800). Saigon and Tourane are the main ports.

BRITISH EMBASSY

Saigon

Ambassador Extraordinary and Plenipotentiary, His Excellency Henry Arthur Frederick Hohler, C.M.G. (1959) £4,115

British Council Representative, H. C. Burrow, 119 Dai-lo Nguyen-Hue, Saigon.

NORTHERN ZONE

President, Ho Chi Minh, assumed office, 1945; re-elected July 15, 1960.

Vice-President, Ton Duc Thang.
Prime Minister, Pham Van Dong (1955).
Minister of Foreign Affairs, Ung Van Khiem.

The Northern Zone (north of the 17th parallel) has an area of approximately 63,000 sq. miles and a population of 16,500,000 (approx.). The capital is Hanoi (750,000) and the chief port is Ψ Haiphong

(367,000). The chief crop is rice, of which the production in 1961 was claimed to be 4,600,000 tons, while the chief industrial products are coal and cement. The production of apatite (phosphate) is increasing, and with Chinese and Soviet aid some new factories have been built to produce consumer goods.

The régime in the north styles itself the Government of the Democratic Republic of Vietnam, of which the President is Ho chi Minh. Power is wielded by the *Lao Dong* (or Workers') Party which is Communist in character, and which can exert its influence through another mass organization known as the Fatherland Front (which some years ago superseded the "Vietminh"). The policy of the northern régime is to work for unification of north and south, whilst in the meantime it strives to remould the political and economic life of the north on Communist lines. A five-year plan started in 1961. Elections to the "Second National Assembly" were held in the north in May 1960. The régime has diplomatic relations with the U.S.S.R., China and other states of the Sino-Soviet bloc, but very few other countries recognize it.

There is a British Consulate General at *Hanoi*.

VOLTAIC REPUBLIC (Republic of Upper Volta)

President, Maurice Yaméogo, *re-elected for five years*, Dec. 8, 1960.

President National Assembly, Koné Begnon.

The Voltaic Republic is an inland, savannah state in West Africa, situated between 9° and 15°N and 2°E and 5°W with an area of about 100,000 square miles and a population estimated in 1961 at 3,635,000. It has common boundaries with Mali on the west, Niger and Dahomey on the east and Togo, Ghana and the Ivory Coast on the south. The largest tribe is the Mossi whose king, the Moro Naba, still wields a certain moral influence.

Upper Volta was annexed by France in 1896 and between 1932 and 1947 was administered as part of the Colony of the Ivory Coast. It decided on December 11, 1958, to remain an autonomous republic within the French Community; full independence outside the Community was proclaimed on August 5, 1960. Special agreements with France, covering financial and cultural matters, technical assistance, etc., were signed in Paris on April 24, 1961. The Voltaic Republic is a member of the *Conseil de l'Entente*. The official language is French. The constitution, adopted by referendum on November 27, 1960, provides for a presidential form of government with a single chamber National Assembly, whose life was extended by the terms of the constitution for a further period of five years.

The principal industry is the rearing of cattle and sheep and the chief exports are livestock, groundnuts, shea nuts and cotton. Small deposits of gold, manganese and copper have been found. Total revenue of the Republic in 1960, excluding foreign aid, was francs CFA4,894,000,000; expenditure, francs CFA5,824,000,000. Value of trade in 1960 amounted to: Imports, francs CFA 2,027,000,000; Exports, francs CFA1,603,000,000. The currency is the Franc CFA (francs CFA50 = French N.F.1).

Trade with U.K.

	1961
Imports from U.K.	£66,086
Exports to U.K.	21,266

CAPITAL.—Ouagadougou (70,000). Other principal town: Bobo-Dioulasso (45,000).

FLAG.—Three horizontal stripes, black (above), white and red.

British Ambassador, see Ivory Coast.

THE YEMEN

(The Mutawakilite Kingdom of The Yemen)
*King of The Yemen Saif al Islam Muhammad al Badr**, born 1920, succeeded Sept. 19, 1962.

* Sana'a Radio announced on Sept. 27, 1962, that the King had been killed during destruction of the royal palace by Yemeni rebels led by Army officers. There was some doubt as to the situation in the Yemen at the time of going to press.

YEMEN LEGATION IN LONDON.
41 South Street, W.1.
[Grosvenor: 5246]

Minister, His Excellency Ahmed Mohamed Al-Shamy (1961).

Yemen, "the land on the right hand" (of Syria) and the *Arabia Felix* of the ancients, occupies the S.W. corner of Arabia between Asir and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 4,000,000. It extends inland to the borders of the Hadramaut. The highlands and central plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, with an abundant and regular rainfall. The main exports are coffee, cotton, oil-grains, salt, hides, and raisins. Trade agreements have been concluded with a number of countries. Aden is an important centre for Yemeni exports and imports. No statistics of the total British trade with the Yemen are available. Direct imports from the U.K., which in 1961 totalled £40,574 and direct exports to the U.K., which in 1961 totalled £97,711, represent only a small percentage of the actual trade between the two countries. The chief port of the Yemen is Ψ Hodeida (Ahmedia) which now has deep water quays, able to accommodate ocean-going vessels.

The ruins of Marib, the ancient Sabæan capital and its dam are in the Yemen.

On March 8, 1958, an agreement was signed in Cairo whereby the Yemen joined the United Arab Republic in a federation to be known as the United Arab States. This agreement was abrogated by the U.A.R. in December, 1961.

FLAG.—Red, with horizontal Arabian sword in centre with 3 stars above and 2 below.

CAPITAL, Taiz (pop. about 20,000); Sana'a has about 60,000 inhabitants. Other cities of the Yemen are Ψ Hodeida, Ibb, Mocha and Beidba.

BRITISH LEGATION
Taiz

Envoy Extraordinary, Minister Plenipotentiary and *Consul-General*, His Excellency Christopher Thomas Gandy (1962).
2nd Secretary, H. J. Ash (*Vice-Consul*).

YUGOSLAVIA

3rd Secretary, Petar Lombardić.

Military and Air Attaché, Col. Vincent Polajner.

Naval Attaché, Capt. Ljubiša Mihajlović.

Economic Counsellor, Svetozar Marković.

Asst. Air Attaché, Lt.-Col. Zdravko Loucar.

Assistant Military Attaché, Maj. Stojanče Stojličić.

Asst. Commercial Attaché, Naste Calovski.

Area and Population.—Yugoslavia is a Federation comprising the People's Republics of Serbia, Croatia, Slovenia, Montenegro, Bosnia and Herzegovina, and Macedonia. Serbia includes the autonomous province of the Vojvodina and the autonomous region of Kosovo and Metohija (Kosmet). In July, 1946, Pelagosa and adjacent islands with all territory east of the line known as the *French Line* in Istria (including Pola and Fiume) were ceded by Italy to Yugoslavia. By an agreement concluded in London on Oct. 5, 1954, between Yugoslavia, Italy, the United Kingdom and the United States, Zone B of the Trieste Territory was transferred to the civil administration of Yugoslavia, under whose military administration it had been since 1945. Zone B, an area of 200 square miles with a population of 73,500, included the towns of Kopar (Capodistria), Piran (Pirano) and Novi Grad (Cittanova). The area has now been divided between the Republics of Slovenia and Croatia. The area of Yugoslavia in 1953 was estimated at 255,804 square kilometers (98,725 square miles) and the population in May, 1961, at 18,538,000. As a result of the war there was a decrease of nearly 2,000,000 in the population of Yugoslavia, and this loss has only recently been made up.

Montenegro (Crna-Gora) was united to Serbia by a decision of the Montenegrin Parliament in November, 1918, when King Nicholas was deposed.

Government.—Stretching from Central Europe to the Balkans, different parts have been subjected to different historical, religious, cultural and geographical influences. Serbia came early under the Orthodox Church and then passed 500 fallow years of subjection to the Turkish Empire. In Bosnia, an outpost of the Turkish Empire, large numbers of the population were forcibly converted to Islam. Croatia and Slovenia, on the other hand, came under the Roman Catholic Church, and in later years were subjected to the civilizing influence of the Austro-Hungarian Empire. Such factors have, despite community of race, hampered the process of fusion into a united nation. In Jan. 1929, King Alexander abrogated the

Constitution and instituted an absolute monarchy for two years, when it was superseded by a modified constitution. On King Alexander's assassination in 1934, his brother, Prince Paul governed as Regent, with two others, on behalf of the young King Peter. Faced with the threat of German invasion, the Government came to an accommodation with Hitler on March 25, 1941, but was overthrown two days later by a popular rising, which placed King Peter at the head of the state. The country was invaded by the German and Bulgarian armies on April 6, 1941, and the King and Government went into exile. The invaders parcelled up the country, placing Serbia under a puppet government, Dalmatia under Italian administration and Croatia under the so-called independent régime of Pavelić (Ustashi). Two main resistance movements developed, the Chetniks under Mihajlović, and the Partisans under Marshal Josip Broz, commonly known as Marshal Tito. The latter emerged from the turmoil of the war years as the most potent force in the country and the modified constitution was superseded by an agreement signed on November 1, 1944, by the Yugoslav Prime Minister (Dr. Ivan Subasić) and Marshal Tito as leader of the National Liberation Committee, recognizing a provisional parliament. On March 7, 1945, the agreement was confirmed by the Royal Yugoslav government in London, and a provisional government was set up in Belgrade.

On Nov. 29, 1945, the Constituent Assembly of Yugoslavia, at a joint session of the Skupština and the House of Nationalities, proclaimed Yugoslavia a Republic. In January, 1953, a new Constitution became effective, under which two houses (the Federal Council and Council of Producers) were established. Elections to these houses were held in November, 1953 and March, 1958.

Defence.—The Army, Navy and Air Force on a peace footing consist of 370,000 officers and men, the war strength being about 1,250,000.

Religion and Education.—The Orthodox, Roman Catholic, Protestant, Islamic and Judaic faiths are recognized by the State. According to the 1948 Census, 49.53 per cent. of the population is Orthodox, 36.7 per cent. Catholic, 1.14 per cent. Protestant and other Christian denominations 12.52 per cent. Moslem and 0.04 per cent. Jews. The Church is separated from the State. All religious instruction in schools has been forbidden since January 1952. Priests are allowed to teach in churches. Eight years elementary education is compulsory and all education is free. In 1961 there were 14,527 elementary schools with 84,279 teachers and 2,764,000 pupils and 1,699 secondary schools with 37,915 teachers and 503,000 pupils. There are five universities: Belgrade, Zagreb, Ljubljana, Sarajevo and Skopje, with 77 faculties and 104,875 students and 11 art academies with 1,418 students.

Language and Literature.—The languages of the country are Serho-Croat, Slovenian and Macedonian, all South Slav tongues. Serho-Croat predominates and is the language of the Federal Government. In Serbia, Macedonia and Montenegro the Cyrillic script is used and in the rest of the country the Latin; Hungarian, Roumanian, Albanian and Italian are also used in certain districts. The desire for the political union of the South Slavs led to a cultural unity and a revival of Slav literature. There are 4 Serbian daily newspapers in Belgrade, 2 Slovene dailies in Ljubljana (Lahach), 2 Croat dailies in Zagreb, 2 dailies in Novi Sad, one in Hungarian, 2 dailies in Rijeka, one in Italian and daily papers at Skopje, Sarajevo, Priština, Split, Maribor and Osijek.

Production and Industry.—About 50 per cent. of the population is engaged in agriculture, although

in recent years industry has expanded rapidly and industrial production has more than doubled since 1947. Since 1955 substantial new investment has been diverted from basic industry to consumer goods. In agriculture the main emphasis is on increased investment in mechanization and fertilizers. The main crops are wheat and maize, of which the average yield in 1961 was 3,170,000 and 4,550,000 tons respectively. The forest areas produced some 8,707,000 cubic metres of timber in 1961. According to Yugoslav official estimates, the livestock population during 1961 was approximately as follows: horses, 1,220,000; cattle, 5,709,000; sheep, 10,842,000; pigs, 5,804,000; poultry, 28,885,000. Minerals are a great source of wealth, particularly in the central regions. Estimated production in 1961 included the following ('000 tons): Hard coal, 1,313; brown coal, 9,494; lignite, 13,266; copper, 61; lead, 90; iron ore, 2,184; pig iron, 997; steel, 1,532; aluminium, 27; zinc, 37; mercury, 550 and petroleum, 1,341.

FINANCE

Federal Budget (estimated figures).		1961
		Dinars
Revenue.....	528,800,000,000	
Expenditure.....	516,100,000,000	

The Yugoslav *Dinar* has a nominal value of 1/10 penny, the official exchange rate being 2,100D=£1 (see also p. 84).

Communications.—In 1960 there were approximately 11,000 miles of standard and narrow gauge railway. There are also 20,714 miles of telephone lines and 21,560 miles of telegraph lines. Yugoslavia has a long seaboard on the Adriatic coast. The principal Yugoslav ports are Rijeka, Šibenik, Split, Zadar, Dubrovnik and Kotor (Carraro) and new ports are under construction at Ploče and Bar. The Danube forms a great commercial highway and the tributary rivers Sava and Tisa provide other shipping routes.

Trade with U.K.

	1960	1961
Imports from U.K.	£14,370,721	£14,475,206
Exports to U.K.	15,732,815	19,168,343

The chief exports to the United Kingdom are cereals (mainly maize), meat and meat products, timber and furniture. The main imports from the United Kingdom are machinery of all kinds, chemicals, iron and steel, road vehicles, aircraft, and metal goods.

CAPITAL.—Belgrade, population (1961) 594,000. Other towns are: Zagreb (457,000), Ljubljana (157,000), Sarajevo (198,000), Skoplje (168,000), Rijeka (100,000), Maribor (85,000), Novi Sad (111,000) and Split (99,000).

PASSPORT REGULATIONS

Applications for Foreign Office passports must be made on the forms obtainable at any of the Passport Offices (addresses given below) or at any Local Office of the Ministry of Labour. Applications for passports required in less than four working days should not be taken to Ministry of Labour Offices.

London.—Clive House, Petty France, S.W.1.

(Hours: Mon.—Fri., 9.30–4.30.)

Liverpool.—India Buildings, Water Street, Liverpool 2. (Hours: Mon.—Fri., 9.30–4.30.)

Glasgow.—14 Princes Square, 48 Buchanan Street, Glasgow, C.1. (Hours: Mon.—Fri., 9.30–4.30.)

The Passport Offices are also open for cases of special emergency only, between 4.30 p.m. and 6 p.m. (Saturdays 9.30–4) or (Glasgow 9.30–1 p.m.) and in London on Sundays and Public Holidays between 10 a.m. and noon.

To facilitate the issue of passports applicants are recommended to make personal application to any one of the above mentioned offices. If it is not possible to make personal application at one of the Passport Offices or Ministry of Labour Local Offices, completed forms of applications should be sent to one of the three Passport Offices, with photographs, supporting documents and the fee of £1 10s. Remittances sent with postal applications should be in the form of a Cheque or Postal Order which should be crossed and made payable to the Passport Office. Notes or postage stamps should not be sent in payment.

Notes or postage stamps should not be sent in payment.

Foreign Office Passports are granted:—

(i) To citizens of the United Kingdom and Colonies.

(ii) To British subjects without citizenship.

(iii) To British Protected Persons.

Passports are available for five years in the first instance, unless otherwise stated. They may be renewed for a further period of 5 years for a fee of £1. Where, however, a passport has already been renewed for a shorter period, it may be extended for the remainder of the 5 year period on payment of a fee of 4s. 6d. for each year of renewal. They are not available beyond ten years from the original date of issue. Thereafter, or if at any time the Passport contains no further space for visas, a new Passport must be obtained.

A Passport including particulars of the holder's wife is not available for the wife's use when she is travelling alone. A wife's particulars may only be added at the time of issue of a passport.

Children who have reached the age of sixteen years require separate Passports. When they apply for a Passport the written consent of father or other legal guardian is necessary.

The application must be countersigned in Section 9 by a Member of Parliament, Justice of the Peace, Minister of Religion, Medical or Legal Practitioner, Bank Officer, established Civil Servant, Public Official, Police Officer or any person of similar standing personally acquainted with the applicant. The applicant's birth certi-

ficance and other evidence in support of the statements made in the application must be produced.

In the case of children under the age of 16 requiring a separate passport, an application should be made by the child's father or other legal guardian on form (B) obtainable from a Passport Office or any local office of the Ministry of Labour.

If the applicant for a Passport be a British subject by naturalization or registration, the Certificate of Naturalization or registration must be produced with the application.

British Passports are generally available for travel to all countries. The possession of a Passport does not, however, exempt the holder from compliance with any *Immigration Regulations* in force in British or foreign countries, or from the necessity of obtaining a *visa* where required.

A Passport cannot be issued or renewed by the Foreign Office on behalf of a person already abroad; such person should apply, in a foreign country, to the nearest British Mission or Consulate, or, within the British Commonwealth outside the United Kingdom of Great Britain and N. Ireland, to the nearest local Passport issuing authority.

Persons resident in Northern Ireland should apply in person to the Foreign Office Passport Agency, 1 May Street, Belfast, or by post to the Branch Passport Office, Liverpool; citizens of the United Kingdom and Colonies resident in the Irish Republic should make application to the Visa Section, British Embassy, 30 Merrion Square, Dublin.

RENEWAL OF PASSPORTS

Applications for the renewal of Foreign Office passports must be made on Form D, obtainable at any of the Passport offices (see above) or at any local office of the Ministry of Labour.

PHOTOGRAPHS

Duplicate unmounted photographs of applicant (and his wife, if to be included in the Passport) must be sent. These photographs should be printed on *titin* paper and must not be glazed on the reverse side. They should measure not more than 2½ in. by 2 in. or less than 2 in. by 1½ in., and should be taken full face without a hat.

British Visitors' Passports

A simplified form of travel document is available for British subjects* (Citizens of the United Kingdom and Colonies) wishing to pay short visits (not exceeding three months) to certain foreign countries, *viz.*

AUSTRIA	LUXEMBURG
BELGIUM	MONACO
DENMARK†	NETHERLANDS
FINLAND†	NORWAY†
FRANCE	PORTUGAL (incl.
(incl. CORSICA)	MADEIRA &
GREECE	AZORES)
W. GERMANY	SAN MARINO
(incl. West Berlin	SPAIN (incl. BALEARIC &
by air only)	CANARY ISLANDS)
ICELAND	SWEDEN†
ITALY	SWITZERLAND
LIECHTENSTEIN	TURKEY

Holders may also pay short visits to Canada, Gibraltar and Malta. A British Visitor's Passport must be valid for three months beyond the last day on which the visitor will be in Canada.

A fee of 7s. 6d. is charged for the issue of a British Visitors' Passport, which is valid for 12 months, cannot be amended and is not renewable; on expiry application should be made for a new passport if required. Particulars of an applicant's wife and/or children under 16 years can be included at the time of issue only at no extra cost. A child of 8 years of age and over is eligible to hold a British Visitors' Passport. Applications for, or including, a person under 21 years of age (unless married or serving in H.M. Forces) must be countersigned by the legal guardian.

British Visitors' Passports are obtainable by application on Form VP (from any local office of the Ministry of Labour and from the Passport Office or Branches). Applicants in England, Scotland and Wales should take the completed form in person to any local office of the Ministry of Labour which will normally issue the passport without further delay; applicants in Northern Ireland to any office of the Ministry of Labour and National Insurance. *British Visitors' Passports are not obtainable from the Passport Office or Branches.* Two recent passport photographs will be required, of the applicant and of his wife if to be included; photographs of children are not required. Size of photographs must be 2 in. × 1½ in. (see also PHOTOGRAPHS above). Particulars of any foreign exchange already obtained during the year (from November 1) must be declared on the application form. No visas are required on British Visitors' Passports.

*See Legal Notes. †Length of stay restricted to three months in any nine months in Nordic Group Countries (including Finland) as a whole.

ECONOMIC CO-OPERATION IN EUROPE

Long-term plans for the expansion of world trade were agreed during the later years of the Second World War. The Bretton Woods Agreement of 1944 led to the establishment of the International Bank (IBRD) and the International Monetary Fund (IMF) in 1945 and to the signing by 37 nations in 1947 of the General Agreement on Tariffs and Trade (see p. 819). The promise of substantial assistance by the United States (Marshall Aid) to European countries was followed by the establishment of a European Recovery Programme (ERP). Fourteen nations (all outside the Soviet bloc) accepted a general invitation by the United Kingdom and France to all European countries to discuss joint economic action at Paris in July, 1947, and the 16 countries signed on April 16, 1948, a convention setting up an Organization for European Economic Co-operation (OEEC), with the objects of promoting production, removing restrictions on trade and payments and of striving for financial stability and full employment.

OEEC and OECD

The immediate task of OEEC was to administer the European Recovery Programme and to allocate American aid which totalled \$13,100,000,000. Marshall Aid provided the dollars necessary for certain vital imports, while the counterpart funds accruing to member countries from the re-sale of these imports were used for promotion of long-term investment and productivity. By 1956, OEEC countries had considerably surpassed the pre-war level in most of the main sectors of production and trade. Aid to the United Kingdom was suspended in 1950 and to other participants in 1951. The work of the Organization included the co-ordination of general economic and financial policies, technical assistance to industry and agriculture, the promotion of research and of scientific and technical training and information, the assessment of long-term energy requirements, peaceful development of nuclear energy, allocation of raw materials in times of shortage, special assistance to the development of less advanced areas in Greece, Italy and Turkey and arrangements for the liberalization of trade and payments. Spain entered OEEC in July, 1959.

Under control of the Council (now the Council of OECD) two executive agencies were set up. The *European Productivity Agency* (1953) is controlled by a governing body of representatives of member and associated states and works through centres in member countries. It has paid particular attention to management training, trade union problems, wholesale and retail marketing, applied research, private restrictive practices, farming methods and technical assistance to the less developed areas of Europe. The *European Nuclear Energy Agency* (ENEA) was set up on Feb. 1, 1957, to further the development of production and uses of nuclear energy by co-operation between member states. It has set up three joint undertakings—The European Company for Chemical Processing of Irradiated Fuels (*Eurochemie*), the Halden Boiling Heavy Water Reactor in Norway and the Dragon project in the United Kingdom. The latter is the building of a high-temperature, gas-cooled reactor at the Atomic Research Establishment at Winfrith, Dorset, and research on reactors of this kind. Work has also been done on health and safety norms and on nuclear insurance.

EUROPEAN MONETARY AGREEMENT (EMA).—A European Payments Union (EPU) was organized in 1950 to make possible multilateral settlements between member countries of OEEC in spite of restrictions on currency convertibility. The arrangements of EPU were unsuitable for operation where currencies were convertible and in 1955 arrangements were made by OEEC for EPU to be succeeded automatically by a new European Monetary Agreement (EMA) if countries with more than half of the EPU quotas (credits allowed under the system of settlement) gave notice that they would make their currencies convertible. This stage was reached in December, 1958, when

non-resident sterling was made freely transferable and restrictions on the convertibility of the Belgian, French, German, Italian and Dutch currencies were removed.

EMA consists of a multilateral system of settlements and a European Fund. It provides facilities for monthly settlements in dollars, but only of such balances as have not been normally settled through the foreign exchange markets. The European Fund is financed by gold contributions from members and resources transferred from EPU. It facilitates the system of settlements and provides short-term credits (up to 3 years) to member states in balance of payments difficulties.

Board of Management

Chairman, M. A. Hay (Switzerland).

Vice-Chairmen, L. Petch (U.K.); J. P. Koszul (France).

Members, M. P. Calvert (France); M. C. de Strycker (Belgium); G. Carli (Italy); K. Getz Wold (Norway); G. Schleiminger (W. Germany).

CODE OF TRADE LIBERALIZATION.—Decisions and resolutions of the Council of OEEC have set standards for the removal of quantitative restrictions on trade between member countries. Since 1955, most member countries have accepted the obligation to the other member countries of keeping at least 90 per cent. of their trade free from restrictions. In the categories of agriculture, raw materials, and manufactures the proportion freed is 75 per cent. The Code is administered by a Steering Body for Trade of 7 members appointed by OEEC in 1956.

OECD.—Conferences held in 1959 and 1960, between representatives of the OEEC countries, the Governments of the United States and Canada, and the Commission of the European Common Market (EEC), recommended the establishment of an improved organization for economic co-operation in which Canada and the United States would participate as full members. Accordingly a Convention was signed on December 14, 1960, providing for the reconstitution of OEEC as the *Organization for Economic Co-operation and Development*. Signatories of the Convention are:—

Austria	Italy
Belgium	Luxemburg
Canada	Netherlands
Denmark	Norway
France	Portugal
Germany	Spain
(Federal	Sweden
Republic)	Switzerland
Greece	Turkey
Iceland	United Kingdom
Irish Republic	United States

Following ratification by the Governments concerned, the Convention came into force on Sept. 30, 1961, at which date OEEC was superseded by the new Organization.

The objects of OECD are (1) to achieve the highest sustainable economic growth and employment and a rising standard of living in member

countries and thus to contribute to the development of world economy; (2) to contribute to sound economic expansion in member, as well as non-member, countries in the process of economic development; and (3) to contribute to the expansion of world trade on a multilateral, non-discriminatory basis in accordance with international obligations.

The Convention provides for a Council composed of all the members as the executive body of the Organization, to meet in sessions of Ministers or permanent representatives, with a chairman designated annually, and any necessary committees and subsidiary bodies. Paris was designated as the headquarters of the Organization and Prof. Thurkil Kristensen (Denmark) was appointed *Secretary-General* of OECD on Sept. 30, 1961.

EUROPEAN COAL AND STEEL COMMUNITY (ECSC)

High Authority, Place de Metz 2, Luxembourg.
Council of Ministers, Rue Auguste Lumière 3-5,
Luxembourg.

Common markets in coal and iron ore were formally opened in February, 1953, and in steel in April, 1953, by Belgium, France, Germany (Federal Republic), Italy, Luxembourg and the Netherlands. Originally proposed by M. Robert Schumann, the French Foreign Minister, in 1950, the Community functions under the terms of a treaty between the six powers, effective on July 23, 1952. Four principal organs were set up. The *High Authority* is a supra-national executive body of nine members drawn from the member countries, who may not report to individual governments nor receive instructions from them. Duties of the High Authority under the Treaty are to ensure free competition; to supervise investments and to make and guarantee loans; to obtain funds by levies on production, by borrowing and through grants; to regulate production and distribution and to fix prices in certain prescribed cases. A Consultative Committee expresses the views of producer, dealer and consumer groups.

For a 5-year transitional period certain tariffs, subsidies and price controls were allowed to continue. By February 10, 1958, when the period ended, barriers to trade in coal and steel had been abolished, subsidies eliminated and rules of non-discrimination applied; harmonized external tariffs on steel products of 2-13 per cent. *ad valorem* had been introduced for the member countries. By 1960 the tonnage of iron and steel traded within the Community had risen by 375 per cent. over the tonnage traded in 1952; the tonnage of coal traded in 1961 was 27 per cent. more than in 1952.

The *Council of Ministers* of ECSC, consisting of one government representative from each member country, co-ordinates the economic policies of the Community with those of its member states. The Common Assembly set up by the 1952 Treaty, drawn from the parliaments of member countries, was re-named *The European Parliament* and provides a forum for discussion and general control in respect not only of ECSC but also of the European Economic Community (EEC) and *Euratom* (see below). Functions of the original Court of Justice of ECSC were similarly extended in 1957.

EUROPEAN ECONOMIC COMMUNITY (EEC)

(THE COMMON MARKET)

Discussions were held at Messina, Sicily, in 1955 between the Foreign Ministers of the six member states of ECSC (see above) on proposals for further advances towards economic integration in Europe,

and after intensive study of these proposals, a treaty was signed at Rome on March 25, 1957, setting up the European Economic Community.

The Treaty aimed to lay the foundations of an enduring and closer union between the European peoples by gradually removing the economic effects of their political frontiers. It provides a transitional period of 12-15 years during which customs duties between member states are being progressively reduced, trade restrictions and discrimination removed, economic and social policies harmonized, and a common agricultural policy established. In view of the different social structure of agriculture in the various countries of the Community, a special régime applies, but policy includes increased productivity, safeguards for an adequate standard of living in the agricultural population, stabilization of markets and fair prices for consumers. Members are permitted to fix minimum prices for imported commodities during the transitional period.

A first 10 per cent. reduction in custom duties within the Common Market took place on Jan. 1, 1959, and import quotas of individual member states were converted to global quotas and increased. Tariffs were again reduced by 10 per cent. on July 1, 1960. The Council of the Community resolved on May 12, 1960, to speed up the process of liberalization and to aim for complete elimination of internal tariffs by 1966. An additional 10 per cent. reduction in customs duties was accordingly made on Jan. 1, 1961. A year later a further cut of 10 per cent. was made, and a second acceleration brought a total reduction of 50 per cent. on industrial tariffs by July, 1962. In January of that year the Community formally passed into Stage Two of its transition period, having agreed on the detailed implementation of a common policy for agriculture.

External Tariff Quotas.—All industrial quotas were abolished at the end of 1961, several years ahead of schedule. The Treaty visualizes the achievement of a common external tariff at the end of the transitional period. The first step towards this was taken at the end of 1960, on the basis of a tariff provisionally reduced by 20 per cent. Subsequently, in negotiations with the other members of the G.A.T.T. during 1961-62, this cut was consolidated for most products. The only items for which the common tariff has still to be agreed are petroleum products.

In the first four years of the Common Market intra-Community trade increased by an average of 21 per cent. per annum, and the gross product of the Community rose by some 20 per cent.

Other aspects of its work were as follows:

Free Movement.—Free circulation of labour, services and capital throughout the Community is envisaged, as well as the right to settle, work and trade anywhere in the Community by the end of the transition period. Detailed programmes laying down the steps by which this is to be achieved were agreed during 1961 and the first steps taken to implement them. In furtherance of the policy of the Community to promote the co-ordination of the social policies of member countries, the *European Social Fund* has been set up to facilitate employment and mobility of labour within the Community. The first requests for its help were received in 1961: by the end of the year they amounted to \$27,000,000.

The *European Investment Bank* was set up with a capital of \$1,000,000,000, to grant loans or guarantees (1) for projects in under-developed areas; (2) for modernization, reorganization or extension of industries difficult to finance on a purely national

basis; and (3) to new industries of joint interest to several member countries.

Agriculture.—Detailed provisions for a common policy for the marketing of the Community's major products were agreed in Jan., 1962. The new arrangements came into force on July 30, that year. Free trade within the Community is to be achieved by the end of the transition period (a system of degressive levies having replaced previous national tariffs) and a system of common tariffs or variable levies is to ensure a regulation of imports from non-members. A special fund has been set up to modernize farming and improve agricultural productivity in the member countries.

Transport.—The Treaty aims to establish a common policy on transport, with common rules for international transport within the Common Market, covering road, rail and inland water transport. Rates for freight which discriminate as to the national origin or destination of goods transported are to be eliminated within the transitional period. During 1962 the Commission proposed an action programme through which this common policy is to be gradually achieved by the end of the transition period.

Restrictive Practices.—The common rules of the Community forbid any agreement or association which restrains or distorts competition within the Common Market. They embrace agreements, etc., fixing prices, regulating or controlling production, investment or technical development, and sharing markets. Exceptions are permissible in certain cases, e.g. where an adequate share of the benefits arising is passed on to the consumer or where agreements will not open the way to monopolistic practices. Detailed regulations were published in 1962, effective on Nov. 1, 1962.

Foreign Trade.—By the end of the transition period the Community is to have a common foreign trade policy. A first step to this was taken in 1961 and further action was proposed in 1962 particularly with regard to quota policy.

Association of Overseas Territories.—The overseas territories of Belgium, France, Italy and the Netherlands are associated with the Community. Their products enter the Common Market on equal terms with those of member states and each territory applies to all the other member countries any concessions made to the country with which it is specially connected. Customs duties between associated territories and member countries are being gradually removed and quantitative import restrictions progressively abolished, but territories are permitted to keep customs duties required for the development of their industries and financing of their public expenditure, under certain conditions.

A Development Fund, with a capital of \$581,250,000 for the first 5 years, has given grants for economic and social development. A new association is to come into force in 1963. Negotiations for this were undertaken in 1962 with the African states concerned.

Budget of EEC.—Contributions to the Budget of EEC were fixed in the following proportions: France, Italy and German Federal Republic, each 28 per cent.; Belgium and Netherlands, each 7.9 per cent.; Luxemburg, 0.2 per cent.

In the autumn of 1961, after consultation with members of the British Commonwealth, the United Kingdom Government made formal application for membership of the Common Market. Negotiations were still in progress in the autumn of 1962.

The Council of Ministers

The Council of Ministers, to co-ordinate the economic policies of the Community with those of

its member states, consists of one representative each from Governments of member states. The Council takes decisions either unanimously, by simple majority or by weighted majority on lines laid down in the Treaty. Votes in cases where a qualified majority is required are held as follows: France, Germany, Italy, each 4 votes; Belgium and Netherlands, each 2 votes; and Luxemburg, 1 vote. A majority normally consists of 12 votes, but in some cases requires the consent of at least four of the member states. The Council usually meets monthly, the Chairman holding office for a term of three months.

The Commission
23 Avenue de la Joyeuse Entrée,
Brussels 4.

The European Commission supervises the application of the Treaty and measures adopted under it, makes proposals to the Council of EEC, formulates opinions and makes recommendations on matters within the scope of the Treaty, takes decisions for which authority has been conferred on it and publishes annual reports, the fifth of which appeared in 1962. Members of the Commission are completely independent and neither solicit nor accept instructions from individual governments. Decisions are taken by a simple majority vote.

President, Prof. Walter Hallstein.
Vice-Presidents, Dr. Sicco L. Mansholt (Netherlands); Robert Marjolin (France); Giuseppe Caron (Italy).
Members, Lionello Levi Sandri (Italy); Henri Rochereau (France); Dr. Hans Von Der Groeben (German Federal Republic); Jean Rey (Belgium); Lambert Schaus (Luxemburg).

1. External Relations Group

Chairman, Jean Rey. *Members,* R. Marjolin; G. Caron.

Director-General, Gunter Seeliger.

Assistant Director-General, Götz Schöffler.

Directors, T. Hützen; J. Deniau; R. Faniel; W. Ernst; R. Lizzatto.

2. Economic and Financial Affairs Group

Chairman, Robert Marjolin; *Deputy Chairman,* Dr. H. Von Der Groeben. *Members,* Dr. S. L. Mansholt; L. L. Saudri.

Director-General, Franco Bobba.

Assistant Director-General, Gorrado Malavasi.

Directors, H. Steffe; L. Gleske; A. Pratic.

3. Internal Market Group

Chairman, Giuseppe Caron. *Members,* J. Rey; L. Schaus.

Director-General, P. Millet,

Assistant Director-General, Michel H. De Courcy.

Directors, V. Miuunni; A. Dubois; W. Scholz; F. Braun.

4. Competition Group

Chairman, Dr. Hans Von Der Groeben. *Members,* R. Marjolin; J. Rey.

Director-General, Pieter Verloren Van Themaat.

Assistant Director-General, Charles Van Aken.

Directors, H. Schumacher; J. Dieu; P. Nasial; A. Saclé.

5. Social Affairs Group

Chairman, Lionello Levi Sandri; *Members,* Dr. S. L. Mansholt; H. Rochereau.

Director-General, Gust De Muynck.

Assistant Director-General, Yves Lecocq.

Directors, W. Doerr; L. Lambert; J. Van Dieren-donck; J. Ribas.

6. Agriculture Group

Chairman, Dr. Sicco L. Mansholt. *Members,* H. Von Der Groeben; L. Schaus; H. Rochereau.

Director-General, Louis Georges Rabot.
Assistant Director-General, Helmut Von Verschuer.
Adviser, Mario Bandini.
Directors, M. Meyer-Burckhardt; B. Heringa;
 R. Grooten.

7. Transport Group

Chairman, Lambert Schaus; *Members*, G. Caron;
 H. Rochereau.

Director-General, Giuseppe Renzetti.
Assistant Director-General, Jacques Dousset.
Directors, G. Krauss; J. N. Mayer; A. Relnarz.

8. Overseas Development Group

Chairman, H. Rochereau. *Members*, H. Von Der
 Groeben; L. L. Sandri.

Director-General, Heinrich Hendus.
Assistant Director-General, Hans Von Stein.
Directors, Jacob Van Der Lec; Jacques Ferrandi;
 Jacques Lefebvre; Enrico Gambelli.

9. Administration Group

Chairman, The President; *Members*, The Vice
 Presidents.

Director-General, Bernard Smulders.
Assistant Director-General, Daniel Strasser.
Directors, B. Van Goeler (*Establishments*); J. Van
 Gronsvelt (*Finance*); A. Merpillat (*Domestic
 Affairs*).

10. Secretariat

Executive Secretary, Emile Noel.
Deputy Executive Secretary, Axel Herbst.

EUROPEAN ATOMIC ENERGY COMMUNITY (Euratom)

Council of Ministers, Rue Ravenstein 2, Brussels 1.
 A second treaty, arising from the Messina dis-
 cussions between the ECSC powers on additional
 means of co-operation, was signed in Rome on
 March 25, 1957, setting up the European Atomic
 Energy Community. The task of *Euratom*, defined
 in detail in the Treaty, is to create within a short
 period the technical and industrial conditions
 necessary to utilize nuclear discoveries and especially
 to produce nuclear energy on a large scale. A five-
 member commission was instituted by the Treaty,
 to promote and co-ordinate nuclear research in
 member countries and to disseminate to them all
 the information acquired. Other sections of the
 Treaty cover the establishment and growth of
 nuclear industries, the procurement, ownership
 and control of nuclear materials, matters affecting
 health and safety, including training, and external
 relations. A chairman (from member countries in
 turn) is elected to hold office for six months.

Atomic Energy Commission
 Rue Belliard 51, Brussels 4.

President, Pierre Chatenet (*France*).
Vice-President, E. Medi (*Italy*).
Members, M. de Groot (*Belgium*); Herr Kreckler
 (*German Federal Republic*); Hr. Sassen (*Nether-
 lands*).

ECONOMIC AND SOCIAL COUNCIL

An advisory body, common to EEC and *Euratom*,
 the Council consists of representatives of all
 sections of economic and social life, including
 employers' associations, trade unions and similar
 organizations. The Council consists of 24 mem-
 bers each from France, Italy and the German
 Federal Republic; 12 each from Belgium and the
 Netherlands and 5 from Luxembourg.

EUROPEAN PARLIAMENT

Secretariat: 19 Rue Beaumont, Luxembourg.

The European Parliament consist of 142 members
 elected by the national parliaments of the member
 countries—36 members each from France, Germany

and Italy, 14 each from Belgium and the Nether-
 lands and 6 from Luxemburg. Set up under the
 terms of the ECSC Treaty of 1952, its authority
 was extended by the Treaty of Rome 1957 to cover
 also the European Economic and Atomic Com-
 munities. The Parliament must be consulted on
 all major issues and can force the dismissal of the
 Commission by a vote of no-confidence. The
 Treaty provides for its direct election and a scheme
 for this was drawn up by the Parliament in May,
 1960. So far no decision on this project has been
 taken.

President, Gaetano Martino (*Italy*) (1962).

EUROPEAN COURT OF JUSTICE

12, Rue de la Côte d'Eich, Luxemburg.

The European Court superseded the Court of
 Justice of ECSC and is common to the three
 European Communities. It exists to safeguard
 the law in the interpretation and application of the
 Community treaties, to decide on the legality of
 decisions of Councils of Ministers or Commissions
 and to determine violations of the Treaties. Cases
 may be brought to it by the member States, the
 Community institutions, firms or individuals. The
 seven judges of the court are appointed by the
 member Governments in concert and hold office
 for 6 years, being eligible for re-appointment. The
 Court was inaugurated on October 7, 1958.

President, Prof. A. M. Donner (*Netherlands*).
Judges, T. R. Lecourt (*France*); M. L. Delvaux (*Bel-
 gium*); M. Ch. L. Hammes (*Luxemburg*); O. Riese
 (*German Federal Republic*); R. Rossi (*Italy*);
 A. Trabucchi (*Italy*).
Attorneys-General, L. Lagrange (*France*); M. Roemer
 (*German Federal Republic*).
Registrar, A. Van Houtte (*Belgium*).

JOINT EXECUTIVE SERVICES of the European Communities

JOINT INFORMATION SERVICE.—*Director*, Jacques-
 René Rabier. *Assistant Director*, Marlo Melani.
 There are offices of the Joint Information
 Service in Paris, Bonn, Rome, The Hague,
 London and Washington.

JOINT LEGAL SERVICE.—*Directors-General*, Michel
 Gaudet (*EEC Matters*); Robert Krawlielicki
 (*ECSC matters*); Theodor Vogelhaar (*Euratom
 matters*). *Assistant Director-General* (*EEC matters*),
 Marc Sohler.

EUROPEAN STATISTICAL OFFICE.—*Director-General*,
 Rolf Wagenführ. *Assistant Director-General*,
 Helmut Reum.

EUROPEAN FREE TRADE ASSOCIATION (EFTA)

Early in 1956 moves were made in OEEC by the
 low tariff countries in Europe—Belgium, Denmark,
 Luxembourg, the Netherlands, Sweden and Switzer-
 land—towards organization of a wide free trade
 area in Europe. Proposals were studied on a multi-
 lateral basis in 1957 and 1958 but were not accept-
 able to all parties. On May 27, 1959, Sweden
 invited Austria, Denmark, Norway, Portugal,
 Switzerland and the United Kingdom ("The
 Seven") to join with her in exploring the possi-
 bility of forming a free trade area. Discussions
 began in Stockholm in June, 1959, and a Con-
 vention for a European Free Trade Association, agreed
 by Ministers of the "Seven" on Nov. 20, 1959,
 became effective on May 3, 1960.

The Convention defines the objects of the
 Association as (1) to promote economic expansion
 in the area of the Association and in each member
 state; (2) to ensure that trade between member
 states takes place in conditions of fair competition;
 (3) to prevent significant disparity between member

states in the condition of supply of raw materials produced within the area; and (4) to contribute to the harmonious development and expansion of world trade and to the progressive removal of barriers to it.

Members agreed to reduce progressively their tariffs on imports of goods originating in the area with a view to their complete elimination by January 1, 1970. Provision was made for alterations in the timetable and, in addition to the initial 20 per cent. reduction of tariffs made on July 1, 1960, tariffs have already been reduced by two further cuts each of 10 per cent. of the original rates. Members undertook to abolish quantitative restrictions on imports of goods from the free trade area within 10 years, existing quotas being increased by

at least 20 per cent. each year. There is no common external tariff for the Association, each member country being free to fix the level of its tariffs against countries outside the area. Various rules govern trading within the area of goods manufactured wholly or in part from materials originating outside the area and fair conditions of competition—such matters as government subsidies, restrictive practices, dumping, etc. Special arrangements are in force in relation to agricultural produce and fish.

The Council of EFTA consists of one ministerial or official representative from each member country. Each state has a single vote and recommendations must normally be unanimous. Decisions of the Council are binding on member countries.

DISTANCES FROM LONDON BY AIR

A list of the distances in statute miles from London to various places abroad. Distances given are those of the shortest routes in use by the British Airways Corporations—B.O.A.C. services (O); B.E.A. services (E).

NORTH ATLANTIC TREATY ORGANIZATION

Headquarters: Porte Dauphine, Paris 16.

The North Atlantic Treaty was signed on April 4, 1949, by the Foreign Ministers of twelve nations. The twelve are Belgium, Canada, Denmark, France, Iceland, Italy, Luxemburg, the Netherlands, Norway, Portugal, the United Kingdom and United States. Greece and Turkey acceded to the Treaty in 1952 and the Federal Republic of Germany in 1955. Since April, 1952, the North Atlantic Council, principal body of the Treaty Organization, has been in continuous session in Paris. Member Governments are represented by permanent representatives, who head national delegations of advisers and experts. *Permanent U.K. Representative*, Sir Evelyn Shuckburgh, K.C.M.G., C.B. The senior military authority in NATO is the Military Committee (composed of a Chief-of-Staff of each member country), which is responsible for higher strategic direction throughout the North Atlantic Treaty area.

A Secretary-General is appointed by and is responsible to the Council. He has direct access to all

NATO agencies and to member Governments, is responsible for organizing the work of the International Secretariat and serves as Chairman. Each year a Foreign Minister is President of the Council.

Secretary-General, M. Dirk U. Stikker (Netherlands).
Deputy Secretary-General, Sig. Guldo Colonna (Italy).

Asst. Secretaries-General, R. Hooper (U.K.) (Political Affairs); François Didier-Gregh (France) (Economic and Financial); Johnson Garrett (U.S.A.) (Production, etc.); W. A. Nierenberg (U.S.A.) (Scientific).
Executive Secretary, The Lord Colclidge, C.B.E. (U.K.).

Supreme Commander, Allied Powers in Europe, Gen. Lyman L. Lemnitzer (U.S.A.).

Allied Commander, North Atlantic, Adm. Robert L. Dennison (U.S.A.).

Allied Commander, Channel, Adm. Sir Alexander Bingley, K.C.B., O.B.E. (U.K.).

RETROSPECT OF SPORT 1961-62

EUROPEAN ATHLETIC CHAMPIONSHIPS

The European Athletic Championships were first held at Turin in 1934 and continued at Paris (1938), Oslo (1946), Brussels (1950), Berne (1954), Stockholm (1958) and Belgrade (1962). At Belgrade there were 24 events for men and 12 for women.

7TH EUROPEAN CHAMPIONSHIPS HELD AT BELGRADE

September 12-16, 1962

THE DERBY, 1952-1962

For particulars of the Derby from 1780-1951 see 1921-52 editions.

The *Distance* of the Derby course at Epsom is 1½ mile. Lord Egremont won Derby in 1782, 1804, 5, 7, 26 (also, 5 Oaks); Duke of Grafton, 1802, 9, 10, 15 (also, 9 Oaks); Mr. Bowes, 1835, 43, 52, 3; Sir J. Hawley, Teddington (1851), Beadsman (1858), Musjid (1859), and Blue Gown (1868), the 1st Duke of Westminster, Bend Or (1880), Shotover (1882), Ormonde (1886), and Flying Fox (1899). Lady James Douglas was the first lady to win the Derby—War Substitute at Newmarket (1918); at Epsom, Mrs. G. B. Miller (1937). First winner was Sir Charles Bunbury's Diomed in 1780. From 1940 to 1945 a substitute Derby was run at Newmarket. By winning his 5th Derby, the late Aga Khan equalled Lord Egremont's record. He also won 2 Oaks.

CRICKET

Cricket is played under the "Laws of Cricket" and is governed by the Committee of the Marylebone Cricket Club (1787), Lord's, N.W.1. Pres.—The Lord Nugent. Sec., S. C. Griffith. Asst. Secs. J. G. Dunbar; D. B. Carr.

1962. Cricket Feats

Firsts.—1,000 runs—W. J. Stewart (Warwickshire). 100 wickets—D. Shackleton (Hampshire). 1,000 runs and 100 wickets—F. J. Titmus (Middlesex). 2,000 runs—R. E. Marshall (Hampshire). 3,000 runs—None. 200 wickets—None.

All Round.—Seven players made 1,000 runs and took 100 wickets. They were: T. E. Bailey (Essex) 1,460 runs and 125 wickets; F. J. Titmus (Middlesex) 1,238 runs and 136 wickets; R. Illingworth (Yorks.) 1,612 runs and 117 wickets; W. E. Alley (Somerset) 1,915 runs and 112 wickets; T. W. Cartwright (Warwickshire) 1,176 runs and 106 wickets; B. R. Knight (Essex) 1,689 runs and 100 wickets; J. Van Geloven (Leicestershire) 1,055 runs and 100 wickets.

High Scores.—Kent, 551 for 9 v. Leicestershire; England, 544 for 5 v. Pakistan; Worcestershire, 520 for 3 v. Somerset.

Low Scores.—Sussex, 41 and 58 v. Gloucestershire; Glamorgan, 49 and 62 v. Gloucestershire; Surrey, 61 v. Worcestershire.

Bowling Feats.—F. J. Titmus (Middlesex) 9 for 52 (in innings) v. Cambridge Univ.; D. J. Shepherd (Glamorgan) 8 for 45 (in innings) v. Somerset; C. Greetham (Somerset) 10 for 48 (in match) v. Lancashire; H. L. Jackson (Derbyshire) 13 for 73 (in match) v. Leicestershire.

Highest Individual Scores.—M. J. Horton (Worcs.) 233* v. Somerset; R. E. Marshall (Hampshire) 228* v. Pakistan; R. B. Nicholls (Glos.) 217 v. Oxford Univ.; J. H. Edrich (Surrey) 216 v. Notts.; P. B. Wight (Somerset) 215 v. Yorkshire; J. R. Gray (Hampshire) 213 v. Derbyshire; T. W. Cartwright (Warwicks.) 210 v. Middlesex; K. G. Suttle (Hampshire) 204* v. Kent; M. R. Hallam (Leics.) 200* v. Notts.; A. J. Stewart (Surrey) 200* v. Sussex; R. A. Gale (Middlesex) 200 v. Glamorgan; D. Livingstone (Hampshire) 200 v. Surrey.

* Denotes not out.

equal on points. Yorkshire have won 25 times; Surrey 16; Notts 8; Lancs 8; Middlesex 5; Kent 4; Gloucester 2; Derby 2; Warwick 2; Glamorgan 1; Hampshire 1; Notts and Lancs tied in 1879 and 1882, and Notts, Lancs and Surrey were all equal in 1889. Middlesex and Yorkshire tied in 1949 and Lancashire and Surrey tied in 1950.

Minor Counties Championship, 1962

Boys' Diving: W. Wood, 79.80 pts.

Girls' Diving: Miss M. Austen, 77.87 pts.

YACHTING

THE AMERICA'S CUP

History.—The America's Cup, originally a British trophy, was won outright by the U.S. schooner America at Cowes on August 22, 1851, and every contest since has been won by the U.S.A. There have been 17 unsuccessful attempts to take the cup out of the United States—15 by Britain and 2 by Canada. There have been 17 contests and 54 races, 48 of the races being won by the U.S.A.

Shamrock I lost to Columbia, 1899; Shamrock II lost to Columbia, 1901; Shamrock III lost to Reliance 1903; Shamrock IV lost to Resolute, 1920; Shamrock V lost to Enterprise, 1930; Endeavour lost to Rainbow, 1934; Endeavour II lost to Ranger, 1937; Sceptre lost to Columbia, 1958.

In 1962, for the first time, an Australian challenge was issued. The Royal Sydney Yacht Squadron's sloop Gretel raced against the American defender Weatherly off Newport, Rhode Island, from Sept. 15–25. Gretel became the first challenger since 1934 to win a race, but Weatherly won the series 3-1.

YACHTING, 1962

- Finn Class Championship* (Poole, June).—Finesse (R. P. Creagh-Osborne).
Universities (Seaview, July 10-12).—Cambridge University beat Oxford University.

- Devilzes-Westminster Race* (124 miles).—1, V. Handscomb and A. Chapman (Royal Canoe Club), 20 hr. 21 m. (record time); 2, J. Rayment and J. Tucker (Army Apprentices School); 3, J. Bury and R. Olson (Chippenham Senior Scouts).

THE UNIVERSITY BOAT RACE

(Putney-Mortlake, 4m. 1f. 180 yds)

Year	Winner	m. s.	Won by
1952	Oxford	20 23	Carvas (about 10 ft.)*
1953	Cambridge ...	19 54	8 lengths
1954	Oxford ...	20 23	4½ lengths
1955	Cambridge ...	19 10	16 lengths
1956	Cambridge ...	18 36	1½ lengths
1957	Cambridge ...	19 1	2 lengths
1958	Cambridge ...	18 15	3½ lengths
1959	Oxford	18 52	6 lengths
1960	Oxford	18 59	1½ lengths
1961	Cambridge ...	19 22	4½ lengths
1962	Cambridge ...	19 46	5 lengths

*This was the closest verdict ever given in the Boat Race except for the dead-heat in 1877.

Cambridge have won 60 times, Oxford 47, and there has been 1 dead-heat.

Race Mishaps.

- 1859.—Cambridge sank, Oxford won.
 1912.—Cambridge sank at 1 mile, and Oxford shortly after Hammersmith Bridge, Oxford won re-row.
 1925.—Oxford sank soon after Hammersmith Bridge and Cambridge paddled home to win.
 1951.—Oxford sank after half a mile. Race abandoned because of weather and rowing conditions. Cambridge won the re-row.

HENLEY REGATTA, 1962

- Grand Challenge Cup*.—Central Sport Club (U.S.S.R.) beat Moto Guzzi (Italy) by ½ length, 6 m. 40 s.
Ladies' Challenge Plate.—Queens' College (Cambridge) beat First and Tbird Trinity (Cambridge) by 2 lengths, 6 m. 54 s.

CYCLING, 1962

- Tour de France*.—J. Anquetil (France).
World of Britain.—E. Pokorny (Poland).
World Championships:—
Professional Sprint.—A. Maspes (Italy).
Professional Pursuit.—H. Nydam (Netherlands).
Amateur Sprint.—S. Blanchetto (Italy).
Amateur Pursuit.—H. Jensen (Denmark).
Amateur Road Race.—R. Bongioni (Italy).
Professional Road Race.—J. Stahlnski (France).
Ladies' Sprint.—V. Sarina (U.S.S.R.).
Ladies' Pursuit.—B. Burton (G.B.).
Ladies' Road Race.—M. Gaillard (Belgium).
National Championships:—
Amateur Sprint.—K. Barton.
Ladies' Sprint.—V. Rushworth.
Amateur Pursuit.—H. Jackson.
Professional Pursuit.—J. Woodburn.
Ladies' Pursuit.—J. Bowers.
Amateur Road Race.—K. Butler.
Professional Road Race.—J. Harvey.
Ladies' Road Race.—J. Bowers.
National (R.T.T.C.) Time Trial Championships:—
 25 miles.—C. McCoy, 56 m. 19 s.
 50 miles.—F. Colden, 1 hr. 55 m. 33 s.
 100 miles.—F. Colden, 3 hr. 54 m. 23 s.
 12 hours.—R. J. Wilkins, 268.65 miles.
 24 hours.—N. Carline, 471 miles.
Ladies' 25 miles.—B. Burton, 1 hr. 1 m. 51 s.
Ladies' 50 miles.—J. Kershaw, 2 hr. 9 m. 45 s.
Ladies' 100 miles.—B. Burton, 4 hr. 15 m. 39 s.

MOTOR RACING, 1962

- 24-hour Race (Le Mans)*.—1, O. Gendebien and P. Hill (Ferrari), 2,765 miles (115.25 m.p.h.); 2, P. Nohlet and J. Guichet (Ferrari), 2,724 miles (113.46 m.p.h.); 3, Elde and Beurlys (Ferrari), 2,617 miles (109 m.p.h.).

European Grand Prix (Zandvoort).—1, G. Hill (B.R.M.), 2 hr. 11 m. 2.1 s. (95.38 m.p.h.); 2, T. Taylor (Lotus) 2 hr. 11 m. 29.3 s.; 3, P. Hill (Ferrari) 2 hr. 12 m. 23.2 s.

French Grand Prix.—1, D. Gurney (Porsche) 2 hr. 7 m. 35.5 s. (101.9 m.p.h.); 2, T. Maggs (Cooper); 3, R. Ginther (B.R.M.).

Belgian Grand Prix.—1, J. Clark (Lotus) 2 hr. 7 m. 32.3 s. (131.8 m.p.h.); 2, G. Hill (B.R.M.); 3, P. Hill (Ferrari).

British Grand Prix (Aintree).—1, J. Clark (Lotus) 2 hr. 26 m. 20.8 s. (92.25 m.p.h.); 2, J. Surtees (Lola) 2 hr. 27 m. 10 s.; 3, B. McLaren (Cooper) 2 hr. 28 m. 5.6 s.

German Grand Prix.—1, G. Hill (B.R.M.) 2 hr. 38 m. 45.3 s. (80.16 m.p.h.); 2, J. Surtees (Lola) 2 hr. 38 m. 47.8 s.; 3, D. Gurney (Porsche) 2 hr. 38 m. 49.7 s.

Italian Grand Prix.—1, G. Hill (B.R.M.) 2 hr. 29 m. 8.4 s. (123.6 m.p.h.); 2, R. Ginther (B.R.M.); 3, R. Ginther (B.R.M.) 2 hr. 29 m. 38.2 s.; 3, B. McLaren (Cooper) 2 hr. 30 m. 6.2 s.

U.S.A. Grand Prix.—1, J. Clark (Lotus) 2 hr. 7 m. 13 s. (108.61 m.p.h.); G. Hill (B.R.M.) 2 hr. 7 m. 22.2 s.; 3, B. McLaren (Cooper), 2 hr. 7 m. 46 s.

Tourist Trophy (Goodwood).—1, I. Ireland (Ferrari) 2 hr. 33 m. 6.8 s. (94.05 m.p.h.); 2, G. Hill (Ferrari) 2 hr. 33 m. 10.2 s.; 3, M. Parkes (Ferrari) 2 hr. 34 m. 1 s.

MOTOR CYCLING, 1962

Senior T.T., Isle of Man.—1, G. Hocking (M.V. Agusta) 2 hr. 11 m. 13.4 s. (103.51 m.p.h.); 2, E. Boyce (Norton) (96.27 m.p.h.); 3, F. Stevens (Norton) (96.24 m.p.h.).

250 c.c. T.T. Isle of Man.—1, D. Winter (Honda) 2 hr. 20 m. 30 s. (96.68 m.p.h.); 2, J. Redman (Honda) 2 hr. 22 m. 23.6 s. (95.4 m.p.h.); 3, T. Phillis (Honda) 2 hr. 26 m. 15.6 s. (92.87 m.p.h.).

International Sidecar T.T. Isle of Man.—1, C. Vincent (B.S.A.) 1 hr. 21 m. 16.4 s. (83.57 m.p.h.); 2, O. Kolle (B.M.W.) 1 hr. 21 m. 53.8 s. (82.93 m.p.h.); 3, C. J. Seeley (Matchless), 1 hr. 22 m. 1.8 s. (82.8 m.p.h.).

Manx Grand Prix (Isle of Man).—*Senior*: 1, J. Dunphy (Norton) 2 hr. 27 m. 54.8 s. (91.83 m.p.h.); 2, P. Darvill (Norton) 2 hr. 29 m. 30.4 s. (90.86 m.p.h.); 3, D. Williams (Norton) 2 hr. 30 m. 27.6 s. (90.29 m.p.h.). *Junior*: 1, R. Dawson (A.J.S.) 2 hr. 32 m. 36 s. (89.02 m.p.h.); 2, P. Darvill (A.J.S.) 2 hr. 33 m. 18.4 s. (88.61 m.p.h.); 3, F. Fisher (Norton) 2 hr. 34 m. 17 s. (88.06 m.p.h.).

CHESS, 1962

Universities.—Oxford University beat Cambridge University 3½-2½.

British Championship (Whitby).—J. Penrose. *Ladies*. Mrs. R. M. Bruce; *Junior Under 21*, K. B. Richardson; *Boys Under 18*, P. N. Lee; *Boys Under 15*, R. Moss; *Girls*, G. Moore.

Hastings Congress.—S. Botvinnik (U.S.S.R.).
County Championships.—*Senior*, Warwickshire; *Junior*, Essex; *Correspondence*, Gloucestershire.

Clare-Benedict Tournament.—W. Germany 12½; Spain 12½; England 10; Austria 9½; Switzerland 8½; Netherlands 7.

Gloucester Cup.—England 13½; Scotland 10½; Ireland 6½; Wales 5½.

British Correspondence Championships.—(Individual). S. Milan; (Team) York.

National Club Championship.—West Ham.

SPORTS REPRESENTATIVE BODIES

- ANGLING.—National Federation of Anglers. *Hon. Sec.*, T. G. Draper, 47 Lindon Drive, Alvaston, Derby.
- ARCHERY.—Grand National Archery Society. *Sec.*, Group Capt. P. H. Bragg, Wyllies, Deaks Lane, Cuckfield, Sussex.
- ASSOCIATION FOOTBALL.—The Football Association. *Sec.*, D. Follows, M.B.E., 22 Lancaster Gate, W.2.
- ATHLETICS.—Amateur Athletic Association. *Sec.*, E. H. L. Clynes, O.B.E., 54 Torrington Place, W.C.1.
- Women's Amateur Athletic Association. *Hon. Sec.*, Miss M. Hartman, 1 Hetherington Road, Clapham, S.W.4.
- BADMINTON.—Badminton Association of England. *Sec.*, H. A. E. Scheele, 4 Madeira Avenue, Bromley, Kent.
- BASKET BALL.—Amateur Basket Ball Association. *Sec.*, K. K. Mitchell, Dept. of Physical Education, The University, Leeds, 2.
- BILLIARDS.—Billiards Association and Control Council. *Chairman*, H. A. Phillips, Maxwell House, 11 Arundel Street, W.C.2.
- BOBSLEIGH.—British Bobsleigh Association. *Hon. Sec.*, N. Barclay, 42 Ballater Street, Glasgow, C.5.
- BOWLS.—English Bowling Association. *Sec.*, E. Sussum, 2 Roseford Road, Cambridge.
- BOXING.—Amateur Boxing Association. *Sec.*, W. T. Lovett, 69 Victoria Street, S.W. 1.
- British Boxing Board of Control, 1/9 Hills Place, W.1., *Sec.*, E. J. Waltham.
- CANOEING.—British Canoe Union. *Sec.*, R. W. Baker, 147A Station Road, E.4.
- CLAY PIGEON SHOOTING.—Clay Pigeon Shooting Association. *Sec.*, A. P. Page, Eley Estate, Angel Road, N.18.
- CRICKET.—Marylebone Cricket Club, Lord's Ground, N.W.8. *Sec.*, S. C. Griffith, D.F.C., T.D.
- Women's Cricket Association. *Hon. Sec.*, Miss E. M. Riley, Corner Farm, Frittenden, nr. Cranbrook, Kent.
- CYCLING.—British Cycling Federation, 21 Blackfriars Road, S.E.1.—*Hon. Sec.*, G. T. Bassett.
- FENCING.—Amateur Fencing Association. *Sec.*, Mrs. M. A. Glen Haig, 1A Tenderden Street, W.1.
- Ladies Amateur Fencing Union. *Sec.*, Miss M. Somerville, 58A Ridgmount Gardens, W.C.1.
- GOLF.—Royal and Ancient Golf Club, St. Andrews. *Sec.*, Briz, E. Brickman, D.S.O.
- English Golf Union. *Sec.*, Capt. W. G. L. Folkard, 34 Aldridge Avenue, Edgware, Middx.
- Ladies' Golf Union, Sandilands, Sandwich Bay, Kent.
- HOCKEY.—Hockey Association. *Sec.*, W. C. Longstaff, 24 St. Mary Axe, E.C.3.
- All England Women's Hockey Association. *Sec.*, Mrs. M. Macdonald, 45 Doughty Street, W.C.1.
- LACROSSE.—English Lacrosse Union. *Sec.*, K. O. Pcahey, 92 Chelmsford Road, N.14.
- LAWN TENNIS.—Lawn Tennis Association. *Sec.*, S. B. Reay, O.B.E., Palliser Road, Barons Court, West Kensington, W.14.
- MOUNTAINEERING.—British Mountaineering Council, c/o Alpine Club, 74 South Audley Street, W.1. *Hon. Sec.*, T. H. Sinclair.
- NETBALL.—All England Netball Association. *Sec.*, Miss E. L. Sanders, 12 Rochester Road, Carshalton, Surrey.
- RACING (FLAT).—The Jockey Club, Newmarket. *Sec.*, E. W. Weatherby, 15 Cavendish Square, W.1.
- RACING (STEEPLECHASING).—The National Hunt Committee. *Secretaries*, Messrs. Weatherby & Sons, 15 Cavendish Square, W.1.
- RIFLE SHOOTING.—National Rifle Association. *Sec.*, Capt. E. K. Le Mesurier, C.B.E., M.V.O., R.N. (ret.), Bisley Camp, Brookwood, Woking, Surrey.
- National Small-bore Rifle Association. *Sec.*, A. J. Palmer, Codrington House, 113 Southwark Street, S.E.1.
- ROWING.—Amateur Rowing Association. *Hon. Sec.*, J. H. Page, O.B.E., The Tower, The Terrace, Barnes, S.W.13.
- RUGBY FIVES.—Rugby Fives Association. *Hon. Sec.*, R. A. Colville, 109 Ridgeway Drive, Bromley, Kent.
- RUGBY FOOTBALL.—The Rugby Football Union, Whitton Road, Twickenham, Middx. *Sec.*, R. E. Piscott.
- The Rugby Football League. *Sec.*, W. Fallowfield, O.B.E., 180 Chapeltown Road, Leeds, 7.
- SKATING.—National Skating Association of Great Britain. *Sec.*, E. G. Coggins, Charterhouse, E.C.1.
- SKI-ING.—Ski Club of Great Britain. *Gen. Sec.*, M. N. H. Milne, O.B.E., E.D., 118 Eaton Square, S.W.1.
- SQUASH RACKETS.—Squash Rackets Association. *Sec.*, J. H. Horry, 137 Regent Street, W.1.
- Women's Squash Rackets Association. *Hon. Sec.*, Miss H. Jones, Barnett Hill House, Womersley, nr. Guildford, Surrey.
- SWIMMING.—Amateur Swimming Association. *Hon. Sec.*, H. E. Fern, C.B.E., 64 Cannon Street, E.C.4.
- TABLE TENNIS.—English Table Tennis Association. *Sec.*, D. P. Lowen, 652 Grand Buildings, Trafalgar Square, W.C.2.
- TBOGANNING.—Luge Association of Great Britain. *Hon. Sec.*, N. Barclay, 42 Ballater Street, Glasgow C.5.
- WATER SKI-ING.—British Water Ski Federation. *Hon. Sec.*, R. C. Panton, 7 Rivermead Court, Hurlingham, S.W.6.
- WRESTLING.—British Amateur Wrestling Association. *Sec.*, A. Wishart, 60 Calabria Road, N.5.

SOME BRITISH MOUNTAINEERING CLUBS

(with name of Secretary).

- ACHILLE RATTI C.C.—Miss E. Smith, 1 Lowrey Terrace, Blackpool S.S.
- ALPINE CLUB.—J. H. Emlyn Jones, M.B.E., 74 South Audley Street, W.1.
- ASSOCIATION OF BRITISH MEMBERS OF THE SWISS ALPINE CLUB.—*Hon. Sec.*, M. Bennett, 5 Savile Close, New Malden, Surrey.
- CAIRNGORM CLUB.—J. E. Bothwell, 34 Bridge Street, Aberdeen.
- CAVE & CRAG CLUB.—D. D. Snell, 154 Station Road, Wyld Green, Sutton Coldfield.
- CEUNANT M.C.—Mrs. W. J. Green, 200 Oaktree Avenue, Bournville, Birmingham, 30.
- CLIMBERS' CLUB.—M. H. Westmacott, 26 Gordon Avenue, Stanmore, Middlesex.
- CREAGH DHU M.C.—A. Fulton, 488 Broomfield Road, Balornock, Glasgow, N.
- DERBYSHIRE PENNINE CLUB.—M. H. A. Finch, 442 Glossop Road, Sheffield 10.
- FELL & ROCK CLIMBING CLUB OF THE ENGLISH LAKE DISTRICT.—C. S. Tilly, Park House, Greatham, Co. Durham.
- GLOUCESTERSHIRE M.C.—J. Smith, 136 Leckhampton Road, Cheltenham.
- GRAMPIAN CLUB.—A. C. Gardner, 17 Albert Gardens, Broughty Ferry, Dundee.

GRITSTONE CLUB.—E. Gudgeon, 22 The Rise, Morris Lane, Leeds 5.
 INVERNESS M.C.—J. Bolton, c/o Sir William Halcrow and Partners, Beaulay Works, Teanassie, 67 Beaulay, Inverness.
 IRISH M.C. (BELFAST SECTION).—Miss D. McMaster, Biochemistry Dept., Queen's University, Northern Ireland.
 KESWICK M.C.—J. D. Oliver, 8 The Crescent, Keswick, Cumberland.
 LADIES ALPINE CLUB.—Miss M. P. Darvall, Heath House, Lyndhurst Terrace, N.W.3.
 LADIES SCOTTISH C.C.—Miss E. Leslie, 1 Woodburn Terrace, Edinburgh, 10.
 LOMOND M.C.—J. Thomson, Thurston, Alexander Street, Dumbarton.
 MIDLAND ASSOCIATION OF MOUNTAINEERS.—D. G. Smith, 160 Maidavale Crescent, Styvechale, Coventry.
 MORAY M.C.—Miss E. Soutar, 17 Petrie Crescent, Elgin.
 MOUNTAINEERING SECTION OF THE CAMPING CLUB.—G. H. Watkins, 8 Bankhurst Road, S.E.6.

MYNYDD C.C.—J. E. Burns, 23 Meadway, Bramhall, Cheshire.
 NORTHUMBRIAN M.C.—Miss D. Walden, 33 Springbank Road, Newcastle upon Tyne 2.
 PINNACLE CLUB.—Countess D. Gravina, Rose Cottage, Frittenden, nr. Cranbrook, Kent.
 RUCKSACK CLUB.—J. E. Byrom, Highfield, 3 Douglas Road, Hazel Grove, Stockport.
 SANDSTONE C.C.—G. M. Clarke, 34 High Worpel, Rayners Lane, Harrow, Middx.
 SCOTTISH M.C.—J. S. Stewart, Temple Cottage, Balmore, Torrance, by Glasgow.
 SOUTHERN M.A.—M. Foster, 28 Phineas Pett Road, Eltham, S.E.9.
 YORKSHIRE M.C.—E. A. Shepherd, 6 Station Road, Clayton, Bradford, Yorks.
 YORKSHIRE RAMBLERS' CLUB.—E. C. Downham, Bierley House, Oakenshaw, Bradford, Yorks.
 In addition, most universities, colleges and branches of the armed services have mountaineering clubs open to members of the respective University, college or service.

HOMES OF SPORT

RACING

The two most famous homes of British flat racing are Newmarket and Epsom. The former, the home of the Jockey Club and the headquarters of British racing since the days of Charles II, who paid frequent visits there, is the scene of two of the "Classics", the 2,000 and 1,000 Guineas, and of many other important races, including the Cesarewitch and the Cambridgeshire, the "Autumn Double". At Epsom, with the exception of the war years, the Derby has been run since 1780 and the Oaks since 1779. The Coronation Cup also takes place during the Derby meeting. There are many trainers' establishments at both Newmarket and Epsom. The fifth classic race, the St. Leger, is run at Doncaster in September.

Two events of long-standing social, as well as racing, significance are the Royal Ascot meeting in June and the Goodwood meeting at the end of July. The latter is the only occasion during the year at which racing takes place at Goodwood, but there are a number of meetings on Ascot Heath, including that at which the very valuable King George VI and Queen Elizabeth Stakes, an important feature in the present-day racing programme, is run.

Courses near London include Alexandra Park (Wood Green), Kempton Park (Sunbury-on-Thames), Sandown Park (Esher) and Windsor. The old-established Hurst Park course (near Hampton Court) held its last season's racing in 1962; part of it is to be built over. Among important courses in other parts of the country may be mentioned Lincoln and Manchester, the scenes of the first and last big flat races of the season, the Lincolnshire and Manchester November Handicap, respectively, and York and Chester, the homes of the Ebor Handicap and Chester Cup. Steeplechasing and hurdling under National Hunt rules also take place during the winter at many centres of flat racing.

The Grand National steeplechase is run over a distance of 4 m. 856 yds., with 30 fences, at Aintree near Liverpool. Other very important races under National Hunt rules, including the Cheltenham Gold Cup and the Champion Hurdle, take place at the National Hunt meeting at Cheltenham, while the King George VI Steeplechase at Kempton Park on Boxing Day has in recent years been very popular.

CRICKET

Test matches are now played on six English grounds—Lord's, The Oval, Trent Bridge (Nottingham), Old Trafford (Manchester), Headingley (Leeds) and Edgbaston (Birmingham). In the nor-

mal course, five Test Matches are played against visiting teams to England and take place at Lord's, the Oval and three out of the other four test-match grounds, one dropping out each season in turn.

Lord's, the headquarters of Cricket and of the M.C.C., is the third ground of the name. Thomas Lord founded his first ground in 1787, and after two moves, established it on the present site at St. John's Wood in 1814. Middlesex play almost all their home matches at Lord's, as do Surrey at the Oval at Kennington, which has been the home of Surrey cricket since 1846.

In addition to the grounds already mentioned, others of great historic interest and current importance include, in the South, the Sussex county ground at Hove and the St. Lawrence ground at Canterbury, and in the North, Bramall Lane (Sheffield) and the ground at Scarborough, where the annual end-of-season Festival has taken place since last century.

ASSOCIATION FOOTBALL

The F.A. Cup Final has been held at Wembley Stadium since 1923, on the famous occasion when the crowd invaded the ground. Since then admission to the Cup Final has been by ticket only, but the Stadium can accommodate about 100,000 spectators. Many international matches and the F.A. Amateur Cup Final also take place at Wembley.

Wembley is, however, surpassed in capacity by Hampden Park, Glasgow, where the record for paying spectators is 149,547. England v. Scotland matches take place at Wembley and Hampden Park in alternate years.

London teams, with their grounds, currently playing in First Division football are as follows: Arsenal (Highbury), Fulham (Craven Cottage), Leyton Orient (Brisbane Road, Leyton), Tottenham Hotspur (White Hart Lane) and West Ham United (Upton Park).

RUGBY FOOTBALL

The three most famous centres of Rugby Union Football in the United Kingdom, scenes of many international matches, are Twickenham, the headquarters of the Rugby Union, Cardiff Arms Park and Murrayfield (Edinburgh). The University match and the games for the Services Championship are also played at Twickenham, where, in addition, most of the Harlequins' home matches take place. Of other famous London clubs, Blackheath play at the Rectory Field, Blackheath, Richmond and London Scottish share the Richmond Athletic Ground and the London Welsh occupy

the nearby Old Deer Park Rosslyn Park, who for many years played at the latter, now have a ground of their own at Roehampton. The Wasps' ground is at Sudbury.

GOLF

The links at St. Andrews, the home of the Royal and Ancient Golf Club and the traditional centre of golf, remain the most famous in the world. Other great Scottish courses are at Muirfield, Prestwick and Troon.

The 1957 Ryder Cup match was played at Lindrick and the Professional Match Championship has many times taken place at Walton Heath in Surrey. Except for Sandwich, however, most of the major championship courses are now either in Scotland or in Lancashire or Cheshire (e.g. Hoylake, Formby, Birkdale and Royal Lytham and St. Annes). Other famous golfing centres are Rye, Burnham and Westward Ho! and in Wales, Harlech and Portbawl.

ATHLETICS

While the number of running tracks in this country is slowly increasing and well-attended meetings are held in many centres, most of the international matches and events such as the A.A.A. Championships and the University Sports take place at the White City Stadium at Shepherd's Bush. The 1958 Empire Games were held at Cardiff and the 1948 Olympic Games at Wembley.

LAWN TENNIS

The All-England Lawn Tennis Championships have been played at Wimbledon since their inception in 1877, first on the former ground at Worple Road and more recently on the present courts of the All-England Lawn Tennis Club in Church Road. Bournemouth is the venue of the British Hard Court Championships, and in recent years one of the leading Professional Tournaments in this country, the Slazenger Championships, has taken place at Devonshire Park, Eastbourne.

TENNIS, RACKETS, ETC.

The chief centre for tennis and rackets may be said to be Queen's Club in West Kensington. A number of other tennis courts are still in use, notably at Lord's, where the M.C.C. Gold and Silver Prizes are important events, Hampton Court (built by Henry VIII in 1530), Oxford, Cambridge, Canford School, Leamington and Manchester. Many

CLOSE TIMES

Wild Birds.—The *Protection of Wild Birds Act, 1954*, lays down a close season for wild birds (other than Game Birds) from February 1 to August 31 inclusive, each year. Exceptions to these dates are made for—

Capercaillie and (except Scotland) *Woodcock*, Feb. 1—Sept. 30.

Snipe, Feb. 1—Aug. 11.

Wild Duck and Wild Goose (in or over water areas), Feb. 21—Aug. 31.

Birds which may be killed or taken outside the close season (except in Scotland on Sundays, on Christmas Day or in a prescribed area) are the above and coot, curlew (other than stone curlew), bar-tailed godwit, moorhen, plover (golden or grey), common red-shank, certain wild duck (common pochard, gadwall, mallard, pintail, shoveller, teal, tufted duck, wigeon) and certain wild geese (hean, Canada, pink-footed and white-fronted).

Certain wild birds may be killed or taken at any time by authorized persons—cormorant, crow, gull (black-backed or herring), jackdaw, jay, magpie, rook, shag, sparrow, sparrowhawk, starling, stock-dove and wood pigeon; and, in Scotland only, *goosander*, red-breasted merganser and rock-dove. The sale of Wild Bird's Eggs is prohibited, except

of the leading squash rackets matches take place in the courts belonging to West End Clubs.

ROWING

Most of the leading rowing events of the year are contested on the River Thames. The Henley Regatta continues to attract the foremost oarsmen from all over the world. Apart from the Boat Race, several other important races take place either from Putney to Mortlake or in the reverse direction, including the Thames Head of the River Race and the Wingfield Sculls. The course for Doggett's Coat and Badge, instituted in 1715, possibly the oldest sporting event still regularly contested, is from London Bridge to Chelsea. The rowing events in the 1958 Empire Games took place on Lake Padarn in Wales.

YACHTING

Cowes, the headquarters of the Royal Yacht Squadron and of the Royal London Yacht Club and the scene of the great Cowes Week at the beginning of August, is still the most famous name in British yachting, but there are many other centres of the sport. Among others on or near Spithead and the Solent are Bembridge, Ryde, Yarmouth, Southampton and Hamble and, elsewhere, Burnham-on-Crouch, Poole Harbour, Weymouth, Plymouth, Falmouth and the Clyde.

POLO

In recent years, the polo grounds at Cowdray Park, Midhurst, and at Windsor have become the two most important centres of the sport in this country, though a number of other grounds exist, among which those at Woolmers Park, Hertfordshire and Cirencester may be mentioned.

OTHER SPORTS

The National Rifle Association's annual meeting at its headquarters at Bisley Camp, near Brookwood, Surrey, is the chief event in the rifle-shooting programme. Since the closing of Harringay Arena, many big boxing programmes have been staged at the Empire Pool, Wembley, and well-known provincial centres of the sport are the Liverpool Stadium and the Granby Halls, Leicester. The Greyhound Derby is run at the White City and the Waterloo Cup, the most important coursing prize, at Altrair, Lancashire.

that gulls' eggs may be sold at any time and those of the lapwing (green or black plover) from Jan. 1—April 14 inclusive.

Game Birds—In each case the dates are inclusive:—

Black Game—Dec. 11 to Aug. 19 (Aug. 31 in Somerset, Devon, and New Forest).

**Grouse*—Dec. 11 to Aug. 11.

**Partridge*—Feb. 2 to Aug. 31.

**Pheasant*—Feb. 2 to Sept. 30.

**Ptarmigan*—(Scotland only) Dec. 11 to Aug. 11.

It is also unlawful (in *England and Wales*) to kill the game marked * on a Sunday or Christmas Day.

Hunting and Ground Game.—There is no statutory close-time for fox-hunting or rabbit-shooting, nor for deer nor hares: but by an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March 1 to July 31 inclusive under a penalty of a pound. The First of November is the recognized date for the opening of the *fox-hunting* season, which continues till the following April. *Otter-hunting* lasts from mid-April to mid-September. The period for *deer-hunting* or *stalking* varies from about August 12 to October 12 for stags, and from November 10 to the end of March for hinds.

THE NOBEL PRIZES

The Nobel Prizes are awarded each year from the income of a trust fund established by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died on December 10, 1896, leaving a fortune of £1,750,000. They are awarded to those who have contributed most to the common good in the domain of (a) Physics; (b) Chemistry; (c) Physiology or Medicine; (d) Literature; (e) Peace. The first awards were made in 1901 on the fifth anniversary of Nobel's death. The awarding authorities are the Swedish Academy of Science—(a) Physics; (b) Chemistry; the Royal Caroline Institute, Stockholm—(c) Physiology or Medicine; the Swedish Academy—(d) Literature; a committee of five persons elected by the Norwegian Storting—(e) Peace. The Trust is administered by the Board of Directors of the Nobel Foundation, Stockholm. The Board consists of four members and two deputy members appointed by the awarding authorities; the Swedish Government appoints a chairman and a deputy chairman.

The nationality of prizewinners is indicated as follows: (a) Great Britain; (b) U.S.A.; (c) France; (d) Sweden; (e) Belgium; (f) U.S.S.R.; (g) Germany; (h) Netherlands; (i) Switzerland; (k) Denmark; (l) Norway; (m) Spain; (n) Poland; (o) Austria; (p) Italy; (q) India; (r) Hungary; (s) Finland; (t) Canada; (u) Chile; (v) Argentine; (w) Japan; (x) Portugal; (y) Irish Free State; (z) Republic of Ireland; (aa) South Africa; (bb) Iceland; (cc) China; (dd) Czechoslovakia; (ee) Australia; (ff) Yugoslavia. The distribution by nationalities is shown at foot of table.

For prize winners for the years 1901-1945, see earlier editions of WHITAKER'S ALMANACK.

Year	(a) PHYSICS	(b) CHEMISTRY	(c) PHYSIOLOGY OR MEDICINE	(d) LITERATURE	(e) PEACE

Most of the principal book publishers are members of The Publishers Association, whose address is 19, Bedford Square, London, W.C.1.—*President*, John Boon (Mills & Boon, Ltd.); *Secretary*, R. E. Barker.

BOOK PRODUCTION AND BOOK EXPORTS

Figures issued by The Publishers Association (based on information supplied to its Chartered Accountants by individual publishers) show a marked and continuing increase in book exports in recent years. The totals for the years 1950 to 1961 are shown below:—

Year	Total value of Books produced in U.K.	Total value of Books exported from U.K.	Year	Total value of Books produced in U.K.	Total value of Books exported from U.K.
1950	£37,158,652	£11,304,220	1956	£56,659,484	£20,870,514
1951	41,553,760	13,740,323	1957	60,456,095	22,505,440
1952	42,790,387	14,482,036	1958	63,608,654	23,817,453
1953	44,892,291	15,565,871	1959	66,945,183	25,393,060
1954	46,270,953	16,527,054	1960	75,426,683	29,833,866
1955	49,439,087	18,156,084	1961	78,911,506	31,738,057

BOOKS PUBLISHED IN GREAT BRITAIN IN 1961

This Table, from *The Bookseller* of December 30, 1961, shows the books published in 1961 with the number of new editions, translations and limited editions.

Books and pamphlets priced at less than 6d. have been omitted, as are also all Government publications except the more important issued by H.M. Stationery Office.

COPYRIGHT

The Government Department dealing with Copyright is the *Industrial Property Department, Board of Trade, 25 Southampton Bldgs., W.C.2.*

Subject to the provisions of the Copyright Act, 1956, copyright subsists automatically in every original literary, dramatic, musical and artistic work and continues to subsist until the end of the period of fifty years from the end of the calendar year in which the author died and shall then expire. No registration nor other formalities are required in order to obtain the protection of the Act. Protection is conferred not only against reproduction but also against the public performance of a work without permission. Copyright may also subsist in sound recordings, cinematograph films and television and sound broadcasts. Literary

entitled to receive free copies of books published in the United Kingdom, are the British Museum, the Bodleian Library, Oxford, University Library, Cambridge, the National Library of Wales, the National Library of Scotland and Trinity College, Dublin.

Voluntary Registration at Stationers' Hall.—Compulsory registration at Stationers' Hall terminated on Dec. 31, 1923, but in the following year the Stationers' Company established a new Register in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being 10s. for a Book, or a Fine Art; certified copies 10s. in either case. The fee for a search is 5s.

LITERATURE OF THE YEAR

British Books in the World

English was widely discussed in the literary journals as the lingua franca of the world; *The Times Literary Supplement* issued a special number, "A Language in Common," in August. This view of the English language was upheld by statistics of the book trade. During 1961, British publishers brought out 24,893 titles, of which 18,487 were new books, while 18,060 titles were issued in the United States. The Foreign Languages Publishing House of the Soviet Union announced a programme for 1962 of 91 English titles, totalling two million copies; a smaller English imprint was promised by the sponsors of the 1962 Czechoslovak Book Exhibition in London (Oct. 24–Nov 6). There has thus been little stimulus in the United Kingdom towards foreign language publishing. But British publishers and booksellers have not been indifferent to the Common Market and other outlets: at the 1962 Frankfurt International Book Fair (Sept. 20–25) Britain, with 214 exhibitors, headed the list of some 2,000 participants from 32 countries. Among West European Importers, the Federal Republic of Germany alone accounted in 1961 for £6,800,000 worth of books and periodicals, a very great part in English; while in Eastern Europe, Czechoslovakia, under a 1960 agreement with Britain, could import unlimited non-fiction works in English and novels and children's books to a quota of £310,000 during 1962. An exhibition of 2,500 books, organized by the Publishers Association of Great Britain and Northern Ireland and the Association of Czechoslovak Publishers was held in Prague (Sept. 27–Oct. 10). In December and January the British Council had mounted an exhibition of similar size in Israel; later, it sent smaller collections to Thailand and Nepal. An International School for Young Booksellers was conducted at Trinity College, Oxford (June 30–July 5). Translations of European literature were exhibited in London by the National Book League (Feb. 13–March 9).

Arguments for mass translation for export were moral rather than economic; thus a contributor to *The Times Literary Supplement* (Sept. 21) quoting the *Unesco Index Translationum* of 1960, regretted that English, the principal source-language, was the original of only about one-third of the 31,353 translations listed. He urged British publishers, experienced in Asian book-markets, to join Indian publishers in a wide translation programme. The book trade did, indeed, look towards the developing countries. A publisher was included in the delegation to the second Commonwealth Education Conference (Jan. 11–25) in New Delhi, where British support of indigenous publishing and bookselling and the Government's Low-Priced Books Scheme were welcomed. In February, the Government extended this scheme, at first limited to text books, to a number of classic reference works; they were to be sold in fifteen Asian countries from Afghanistan to Vietnam. These areas had been visited, on a fact-finding mission, by the Chairman of the Technical and Scientific Group of the Publishers Association.

Home Affairs

In December 1961 the Publishers Association advised public libraries of an estimated average increase in book prices, in the financial year ahead, of 10 per cent., due to higher costs in the trade. In the same months Sir Alan Herbert, discussing the Public Lending Right Bill (which seeks lending royalties for authors) said his publishers had agreed to use their best endeavours to prevent the sale of

his next book to any public library. An abortive motion in the House of Commons urged the Government to note that eleven books were borrowed from public libraries for every one purchased and to look sympathetically on the effect on authors and publishers. On the other side, the City Librarian of Norwich issued details of expensive and unacknowledged library research done for authors. Partisanship died down, and relations between the book trade and librarians were happier than in recent years. Librarians gave evidence for the respondents (the Publishers Association) as well as for the Registrar when the Net Book Agreement case was heard in the Restrictive Practices Court (June 25–July 27). This was the crucial event of the year for the book trade. In general, the Agreement (of 1957) provides that most classes of new books shall be retailed at net published prices, a discount of 10 per cent. being allowed to public libraries. The respondents contended that conditions in the book trade were unique, that profit margins were low and that the abrogation sought by the Registrar would be contrary to the public interest in that it would lead to such price-cutting as to close most existing (and small) retail outlets, to heighten the risk of stockholding for any retailer, and to make good books scarcer and all books dearer.

Collaterally interesting to the trade was the Report of the Royal Commission on the Press (Sept. 19) which recommended an Amalgamations Court for scrutiny of intended mergers, a stronger Press Council, and limitation of control, by sections of the press, of television contracting companies. Of interest also were four 45-minute B.B.C. television programmes, during August and September, devoted to *The New Statesman*, *The Spectator*, *Tribune* and *The Economist*. A focus of book reviewing shifted a few days earlier (Sept. 15) when *The Times* and its supplements began the move to their new and neighbouring building. In the same area, George Philip and Son, six months after celebrating the 100th edition of their "Elementary Atlas," announced in August their coming move from Fleet Street to Long Acre. Webster's of Dover Street closed their doors the same month. They had supplied writing materials for 180 years to patrician and intellectual London: Dickens was among their customers.

Festivals, Conferences, Exhibitions

The Times (Sept. 22) noted the prevalence of "entertainments which are a queer hybrid between play and public reading." Dramatic and literary forms became less distinguishable than at any time since the rise of the novel, and the screen (as with "Billy Budd") and television (as with "Saki" stories) made restrained and acceptable use of classic fiction. The theme of the Edinburgh Film Festival was "The Film and Literature." Assemblies took for granted a community of roots in art forms based on words: at the Royal Shakespeare Theatre's Summer School at Stratford-on-Avon (Aug. 22–30) linguistics, stagecraft, lyricism and the moral springs of tragedy were discussed. The Yeats Festival in Sligo (Aug. 13–15) modified movement, scenery, costume and colour, leaving verse to sustain the drama. With Beckett, Behan, Brecht, Eliot, Joyce and Shakespeare, the Dublin Theatre Festival (which opened Sept. 24) put poetic drama before spectacle. These literary offerings contested Mr. Arnold Wesker's view that the theatre is "a place where one wants to see things happening." The Yeats Festival, at least, must have comforted Professor Allardyce Nicoll. He

had warned the International Association of University Professors of English that "dramas are being currently made to supplant the living word with mere actions and meaningless noises." The International Writers' Conference in Edinburgh (Aug. 20-24) examined the commitment and responsibility of the novelist and poet. Participants included Miss Mary McCarthy, who thought the national novel was dying, Mr. Angus Wilson, who saw the 18th and 19th century English novel as a barrier to continental influence, and Mr. Henry Miller, who said that the novel had been dead for fifty years and the conference might better discuss painting. "Literary" portraits did figure in the Cheltenham Festival organized by Miss Elizabeth Jane Howard, which opened on Sept. 30 with a discussion on the crisis in morals in which Miss Carson McCullers, M.M. Joseph Heller and Romain Gary and Mr. Kingsley Amis took part. A copy of "Justine" (1791) by the Marquis de Sade was seized at London Airport (Aug. 9) by Customs officials who explained that the work had been condemned by the Courts. Two other works by the Marquis appeared among banned books on display at the Censorship session of the Edinburgh Conference. A campaign against improper literature was planned at a London meeting (Sept. 7) convened by the Catholic Teachers' Federation. In *The Sunday Telegraph* (Sept. 30) Professor C. S. Lewis said, of moral censorship, that we had either sunk beneath it or risen above it. If we abandoned it there would be reams of filth, but we need not read this and it would not last. "Four letter words," he said, "may soon be as dated as antimacassars."

Literary and Publishing Events

Dr. C. H. Dodd and Professor G. R. Driver announced (Aug. 19) that the work of their panel for the translation of the Old Testament into current English was going well. They considered the task might be complete by 1966. The 300th anniversary of the Prayer Book was marked by an exhibition, opened on Aug. 22 at the Public Record Office, of the founding and appointing documents. Mr. T. S. Eliot and others took part in correspondence in *The Times*, protesting on stylistic grounds against the possible liturgical use of the New English Bible.

The revival at the Chichester Festival Theatre of "The Chances," assumed to be by Beaumont and Fletcher, renewed uncertainty as to its authorship (Pepys considered it was by Buckingham). On July 14 Professor V. H. Galbraith said he believed Bishop Asser's *Life of Alfred* to be "absolutely phoney." Professor Dorothy Whitelock refuted this accusation on Aug. 16. A request for the opening of Shakespeare's tomb (Mr. Christmas Humphreys and others), printed in *The Times* on Aug. 28, was widely thought to be of Baconian or Marlovian inspiration. Professor Doyer Wilson wrote strongly against the proposal. The recently-discovered diary of Sir Arthur Throckmorton (which had been the subject of newspaper controversy) led to the publication in April of *Raleigh and the Throckmortons* by Dr. A. L. Rowse. On Sept. 9, the American mathematicians, Professor F. Mosteller and Mr. D. L. Wallace, said they believed they had established by computer that eleven of the disputed "Federalist" papers were written by James Madison. Viscount Samuel suggested in *The Times* (Sept. 18) that their methods be applied to the detection of "Junius." An outstanding event on more familiar ground was the N.B.L. exhibition, "A Year's Paperbacks, 1961-62" which opened on July 3. Statesmen set sound examples: Mr. Edward Heath (who attended a quick-reading course before the Common Market negotiations) read six novels of C. P. Snow while

on holiday. Mr. Selwyn Lloyd, who resigned as Chancellor of the Exchequer on July 13, relaxed the next day with King Hussell of Jordan's *Uneasy Lies the Head*. In a literary apologia (*The Times*, Sept. 27), Mr. Enoch Powell confessed that his reading was "thin but thorough," though grounded in Nietzsche, Frazer and Goethe. Mr. Iain Macleod wrote a successful biography—*Neville Chamberlain*. Other successes in this genre were Sir John Wheeler-Bennett's *John Anderson*, Dame Edith Sitwell's *The Queens and the Hive*, Jon Manchip White's *Marshal of France: the Life and Times of Maurice de Saxe* and a life of *Matthew Smith* by Francis Halliday and John Russell in which the lucidity of the prose matched the clarity of the reproduction. Perhaps *On the Contrary* by Miss Mary McCarthy was not quite an autobiography but these "articles of belief" were Miss McCarthy herself. Georges Simenon's *Pedigree* and Doris Lessing's *The Golden Notebook* were novels in form but strongly introspective. *Margin Released*, comic, curmudgeonly and shrewd, was J. B. Priestley's self-revelation in literary reminiscence. Somerset Maugham's *Looking Back* and John Wain's *Sprightly Running* sustained interest if not tension and Brendan Behan's *Island* was more Behan than geography. Eccentric studies, one uncomfortable, the other amusing in predictable form, were Boyd Alexander's study of Beckford, *England's Wealthiest Son* and Sir Osbert Sitwell's *Tales my Father Taught me*. C. V. Wedgwood's *A Revaluation: Thomas Wentworth, 1st Earl of Strafford* was a classic historical biography and Andrew Boyle's *Trenchard* a modern work in the same strain. The successes and failures of the service Lord Trenchard created were examined in *The Strategic Air Offensive against Germany, 1939-45* by Sir Charles Webster and Noble Frankland. *On the Prevention of War* by John Strachey was a sober textbook of the strategy of peace.

Social questions were examined in *The Men at the Gate* (on under-developed Southern Italy) by Ottiero Ottieri, in David Granick's *The European Executive* (capital and technocracy in settings very different from Ottieri's) and, at home, in *The Police and the Public* edited by C. H. Rolph. It discussed the policeman's uneasy place in society, his power, his professionalism, his relationship to his oath. Domestic also was Anthony Sampson's *Anatomy of Britain*: he analysed the Establishment, the Fringe, such "tribal" Institutions as Eton and the Army, and concluded that power still resides in the traditional ruling classes. In *English Country Life, 1780-1830*, E. W. Bovill presented with honesty the pleasant and the grim. Booksellers and librarians reported an informed interest in art and archaeology: Brian Knox's *Bohemia and Moravia*, Georgina Masson's *Italian Gardens*, J. Byam Shaw's *Drawings of Domenico Tiepolo* and *The Mute Stones Speak* (the story of archaeology in Italy) by Paul Mackendrick, all did well, though none was cheap or facile. There was a minor poetic revival, with new works by Dannie Abse, Alex Comfort, Robert Conquest, John Heath-Stubbs, John Holloway, C. Day Lewis, Robert Lowell and Derek Walcott. There was a re-issue of Thom Gunn's early verse, a two-volume edition (by Bernard Jones) of poems of William Barnes, and an Edward Fitzgerald selection by Joanna Richardson. Among critical biographies of poets were Lady Chorley's *Arthur Hugh Clough: the Uncommitted Mind*, Alethea Hayter's *Mrs. Browning: a Poet's Work and its Setting*. Rupert Hart-Davis exhibited in a scholarly, biographical setting *The Letters of Oscar Wilde*. K. D. Duval and Sydney Goodrich Smith (editors) celebrated the Lallans poet's 70th birthday with *Hugh MacDiarmid: a Festschrift*; a collected edition also appeared.

An established poet produced a novel—James Kirkup: *The Love of Others*. Among others which enjoyed considerable success, while they broke little new ground, were Nigel Balchin's *Seen Din by before Dawn* (his first for seven years), Storm Jameson's *The Road from the Monument*, Christopher Isherwood's *Down There on a Visit*, Anthony Powell's *The Kindly Ones*, J. B. Priestley's *The Shapes of Sleep*, John Wain's *Strike the Father Dead* and Iris Murdoch's *An Unofficial Rose*. These appeared in the earlier part of the year. Later came *Hornblower and the Hotspur* by C. S. Forester, P. G. Wodehouse's *Service with a Smile* (Blandings with some Beat dialogue), Lettice Cooper's *The Double Heart*, Harrison E. Salisbury's *The Northern Palmyra Affair*, Gerald Hanley's *Gilligan's Last Elephant*, Ernest Raymond's *The Châtelaine*, Pamela Hansford-Johnson's *An Error of Judgement* and Nicholas Monsarrat's *The Time Before This*. Neither Mr. Monsarrat nor his fellow-novelists achieved sales on the scale of *The Cruel Sea*. Review-space and acclaim gave the palm to a novel which was difficult, fantastic, Swiftian and harsh: *The Tin Drum* by the young German, Günter Grass. A children's book, *The Happy Lion's Quest* by Louise Fatio and

Roger Duvoisin, rose high in the best-seller lists.

Honours and Awards

Companions of Literature (Royal Society of Literature elections, 7 June): Mr. Aldous Huxley (novelist and essayist) and Mr. Edmund Blunden (poet); *Nobel Prize for Literature*, 1961: Dr. Ivo Andrić, first Yugoslav winner, for novels of Bosnia; *Prix Goncourt*, 1961: M. Jean Cau for novel *La Pitié de Dieu*; *Prix Femina*, 1962: M. Henri Thomas for novel *Le Pronontoire*; *James Tait Black Memorial Prizes*, 1961: Miss Jennifer Dawson for *The Ha-Ha* (fiction) and Miss M. K. Ashby for *Joseph Ashby of Tysoe* (biography); *Library Association's Children's Book Awards*, 1961: Mrs. Lucy M. Boston for *A Stranger at Green Knowe* (Carnegie Medal) and Mr. Anthony Maitland for illustrations to *Mrs. Cockle's Cat* by Philippa Pearce (Kate Greenaway Medal); *Prix des Éditeurs*, 1962: Herr Uwe Johnson for novel *Das dritte Buch über Achim*; *Italia Prize*, 1962: Miss Muriel Spark for script of *The Ballad of Peckham Rye*; *Premier Britannica Award*: Miss Shelagh Delaney for play *The Lion in Love*; *UNESCO Award for Science Writing*, 1962: Mr. Arthur Clarke.

BOOKS PUBLISHED

Among the books published between October, 1961 and October, 1962, were the following:

Biography

"Trenchard," by Andrew Boyle; "Ralgh and the Throckmortons," by A. L. Rowse; "The Queens and the Hive," by Edith Sitwell; "Thomas Cranmer," by Jasper Ridley; "John Anderson," by Sir John Wheeler-Bennett; "Regina v. Palmerston," by Brian Connell; "Tales My Father Taught Me," by Sir Osbert Sitwell; "Growing," by Leonard Woolf; "Thomas Wentworth, First Earl of Strafford," by C. V. Wedgwood; "The Prof in Two Worlds," by the Earl of Birkenhead; "The Letters of Beethoven," ed. Emily Anderson; "Nelson's Letters," ed. Geoffrey Rawson; "The Collected Letters of D. H. Lawrence," ed. Harry T. Moore; "The Letters of Oscar Wilde," ed. Rupert Hart-Davis; "Letters to T. E. Lawrence," ed. A. W. Lawrence; "Free-Born John," by Pauline Gregg; "The Memoirs of James II," trans. A. Lytton Sells; "Marshal of France," by Jon Manchpil White; "Portrait of a Patriot" (John Wilkes), by Charles Chenevix Trench; "Jemmy Twitcher," by George Martelli; "The Life of Henry Brougham to 1830," by Chester W. New; "The Rothschilds," by Frederic Morton; "The Duchess of Dino," by Phillip Ziegler; "Citizen-King," by T. E. B. Howarth; "Newman: The Pillar of the Cloud," by Meriol Trevor; "The Emperor Alexander II," by E. M. Almedingen; "Robert Adam and his Circle in Edinburgh and Rome," by John Fleming; "French Profiles: Prophets and Pioneers," by G. P. Gooch; "Ivan the Great of Moscow," by J. L. I. Fennell; "Montesquieu," by Robert Shackleton; "Adrienne," by André Maurois; "A Study of the Work of Secobohm Rowntree," by Asa Briggs; "Benito Mussolini," by Christopher Hibbert; "Citizen Hearst," by W. A. Swanberg; "The Enthusiast" (Father Ignatius), by Arthur Calder-Marshall; "Lawrence of Arabia," by Anthony Nutting; "Neville Chamberlain," by Iain Macleod; "In the Days of McKinley," by Margaret Leech; "Courage" (The Story of Sir James Dunn), by Lord Beaverbrook; "Arthur Hugh Clough: The Uncommitted Mind," by Katharine Chorley; "A Pride of Terrys," by Marguerite Steen; "Marie Stopes," by Keith Briant; "Stanley Spencer," by Maurice Collis; "My Own Master," by Adrian Bell; "Memoirs of a Public Servant," by Lord

Salter; "My Life and Music," by Artur Schnabel; "Before the Deluge," by Sir Edward Cadogan; "People and Life," by Ilya Ehrenburg; "High Tide and After," by Lord Dalton; "The Goal," by Phyllis Bottome; "Let My People Go," by Albert Luthuli; "O Dreams, O Destinations," by Phyllis Bentley; "Personal Experience, 1939-46," by Lord Casey; "A Life of One's Own," by Gerald Brenan; "The Mottled Lizard," by Elspeth Huxley; "The Early Years of Alec Waugh," by Alec Waugh; "Sprightly Running," by John Wain; "A Victorian in Orbit," by Sir Cedric Hardwicke; "My Restless Years," by Hector Bolitho.

Fiction

"Unconditional Surrender," by Evelyn Waugh; "An Unofficial Rose," by Iris Murdoch; "The Kindly Ones," by Anthony Powell; "Hornblower and the Hotspur," by C. S. Forester; "The Reivers," by William Faulkner; "When My Girl Comes Home," by V. S. Pritchett; "The Last Hours of Sandra Lee," by William Sansom; "Wonderful Clouds," by Françoise Sagan; "The Empty Canvas," by Alberto Moravia; "The Innocent Moon," by Henry Williamson; "Mid-century," by John Dos Passos; "The Golden Oriole," by H. E. Bates; "The Day of the Tortoise," by H. E. Bates; "Seen Dimly Before Dawn," by Nigel Balchin; "Lord Geoffrey's Fancy," by Alfred Duggan; "Down There on a Visit," by Christopher Isherwood; "Strike the Father Dead," by John Wain; "Island," by Aldous Huxley; "Say Nothing," by James Hanley; "Assembly," by John O'Hara; "Wilderness," by Robert Penn Warren; "Key to the Door," by Alan Sillitoe; "An Error of Judgement," by Pamela Hansford Johnson; "In the Thirties," by Edward Upward; "My Enemy's Enemy," by Kingsley Amls; "The Time Before This," by Nicholas Monsarrat; "Devil Water," by Anya Seton; "Clock Without Hands," by Carson McCullers; "The Red Poney," by Lin Yutang; "The Man-eater of Malgudi," by R. K. Narayan; "The Shapes of Sleep," by J. B. Priestley; "The Thirty-First of June," by J. B. Priestley; "Death of a Highbrow," by Frank Swinnerton; "Roll of Honour," by Eric Linklater; "Heaven Has No Favourites," by Erich Maria Remarque; "The Forgotten Smile," by Margaret Kennedy; "No Empty Hands," by Peter de Polua; "A Spirit

Rises," by Sylvia Townsend Warner; "The Road from the Monument," by Storm Jameson; "The Connecting Door," by Rayner Heppenstall; "The Woodshed," by Rayner Heppenstall; "A Place in the Sun," by Stephen McKenna; "The Barbary Light," by P. H. Newby; "I Remember! I Remember!" by Sean O'Faolain; "Scruffy," by Paul Gallico; "The Wizard Bird," by Sarah Gertrude Millin; "Franny and Zooey," by J. D. Salinger; "Gilligan's Last Elephant," by Gerald Hanley; "Atlantic Fury," by Hammond Innes; "With a Delicate Air," by Pearl S. Buck; "Crosswind," by Robert Henry; "Safety First," by Josephine Bell; "The Bull from the Sea," by Mary Renault; "Diamond," by Brian Glanville; "The Pass," by John Slimming; "The Spoilt City," by Olivia Manning; "Where the River Bends," by J. M. Scott; "The Way the Ball Bounces," by Jack Lindsay; "The Cage," by Thomas Hinde; "The Love of Others," by James Kirkup; "A Girl from Lübeck," by Bruce Marshall; "Martha in Paris," by Margery Sharp; "A World of Difference," by Stanley Price; "A Stone in the Pool," by Susan Tweedsmuir; "Three Score and Ten," by Angela Thirkell and C. A. Lejeune; "Service with a Smile," by P. G. Wodehouse; "Mayhem in Greece," by Dennis Wheatley; "Silence Observed," by Michael Innes; "The Pale Horse," by Agatha Christie.

Literature and Criticism

"Oxford Addresses on Poetry," by Robert Graves; "The Notebooks of Samuel Taylor Coleridge," Vol. II, ed. Kathleen Coburn; "The Literary Critics," by George Watson; "Essays Literary and Educational," by E. M. W. Tillyard; "Ford Madox Ford," by Richard A. Cassell; "Mrs. Browning," by Alethea Hayter; "The Art of George Eliot," by W. J. Harvey; "A Short History of English Poetry," by James Reeves; "Fact and Fiction," by Bertrand Russell; "Augustan Studies," by Geoffrey Tillotson; "Studies in Three Literatures," by M. R. Ridley; "On Moral Courage," by Sir Compton Mackenzie; "The Function of Criticism," by Yvor Winters; "An Experiment in Criticism," by C. S. Lewis; "They Asked for a Paper," by C. S. Lewis; "The Strength to Dream," by Colln Wilson; "Calm October," by Richard Church; "Wodehouse at Work," by Richard Osborne; "The Golden Labyrinth," by G. Wilson Knight.

Poetry

"Collected Poems," by Ralph Hodgson; "In the Clearing," by Robert Frost; "A Hong Kong House," by Edmund Blunden; "The Outcasts," by Edith Sitwell; "Collected Poems, 1936-61," by Roy Fuller; "Collected Poems of Hugh MacDiarmid," "Imitations," by Robert Lowell; "The Gate," by C. Day Lewis; "In the Interlude: Poems 1945-60," by Boris Pasternak; "The Penguin Book of Latin Verse," ed. Frederick Brittain; "The Oxford Book of Welsh Verse," ed. Thomas Parry; "The Landfallers," by John Holloway; "Georgian Poetry," ed. James Reeves; "Audible Silence," by Laurence Whistler; "Tares," by R. S. Thomas; "Later Poems," by Austin Clarke; "The Swans of Berwick," by Sidney Tremayne; "African Negatives," by Alan Ross; "Collected Poems," by William Barnes.

Religion and Philosophy

"Anglicanism in History and Today," by J. W. C. Wand; "The Protestant Reformation," by H. Daniel-Rops; "The Twentieth Century in Europe," by K. S. Latourette; "Letters to a Friend from Rose Macaulay," ed. Constance Babington Smith; "On the Love of God," by John McIntyre;

"The Church in an Age of Revolution," by Alec R. Vidler; "The Layman and His Conscience," by Ronald Knox; "The Church and the Nation," by Charles Smyth; "The New Man," by Thomas Merton; "Protestant Thought and Natural Science," by John Dillenberger; "Eastern Christendom," by Nicolas Zernov; "The Scrolls and Christian Origins," by Matthew Black; "The Divine Propagandist," by Lord Beaverbrook; "Anglican Devotion," by C. J. Stranks; "Conditions of Rational Inquiry," by David Polc; "Fathers of the Victorians," by Ford K. Brown; "The Humanist Frame," ed. Julian Huxley; "Between Past and Future," by Hannah Arendt; "Philosophical Papers," by J. L. Austin; "Behaviour," by D. E. Broadbent.

History

"The Fifteenth Century, 1399-1485," by E. F. Jacob; "Crossroads of Power," by Sir Lewis Namler; "What is History?" by E. H. Carr; "The Making of Victorian England," by G. Kitson Clark; "The Passing of the Whigs, 1832-1886," by Donald Southgate; "British Foreign Policy in the Second World War," by Sir Llewellyn Woodward; "The Yorkist Age," by Paul Murray Kendall; "Great Britain to 1688," by Maurice Ashley; "Elizabethan Government and Society," essays presented to Sir John Neale; "The Phoenicians," by Donald Harden; "The Byzantines," by David Talbot Rice; "The Strategy of Sea Power," by S. W. Roskill; "A Naval History of England," Vol. I, by G. J. Marcus; "The Last Bourbons of Naples," by Harold Acton; "Life in Georgian England," by E. N. Williams; "Wilkes and Liberty," by George Rude; "Scotland from 1603 to the Present Day," by George S. Pryde; "Battles of the English Civil War," by Austin Woolrych; "The Glorious First of June," by Oliver Warner; "Napoleon and the Pope," by E. E. Y. Hales; "Battles of the Crimean War," by W. Baring Pemberton; "August 1914," by Barbara W. Tuchman; "The Massacre of St. Bartholomew," by Henri Noguères; "France in Modern Times," by Gordon Wright; "Mutiny 1917," by John Williams; "1918, The Last Act," by Barrie Pitt; "The Soviet High Command, 1918-41," by John Erickson; "Civil War in Russia," by David Footman; "The Strategic Air Offensive against Germany, 1939-45," by Sir Charles Webster and Noble Frankland.

Travel and Topography

"The Blue Nile," by Alan Moorehead; "Return to Burma," by Bernard Fergusson; "To the Unknown Mountain," by Wilfrid Noyce; "Zoo Quest to Madagascar," by David Attenborough; "The Enchanted Mountains," by Robin Fedden; "Fragrant Harbour," by F. D. Ommanney; "My Ireland," by Kate O'Brien; "These Horned Islands," by James Kirkup; "Islands of the South Pacific," by Sir Harry Luke; "The Swiss Alps," by Vivian H. Green; "Ordeal by Ice," ed. Farley Mowat; "The Explorers," ed. G. R. Cronc; "The Whispering Land," by Gerald Durrell; "The Heart of the Hunter," by Laurens van der Post; "The Exploration Diaries of H. M. Stanley," ed. Richard Stanley and Alan Neame; "Mischief among the Penguins," by H. W. Tiltman; "Between Oxus and Jumna," by Aruold J. Toynebe.

General

"Anatomy of Britain," by Anthony Sampson; "The Architecture of Sir John Soane," by Dorothy Stroud; "Great Houses of Europe," ed. Sacheverell Sitwell; "The Quest for Nonsuch," by John Dent; "Victorian Taste," by John Gloag; "Mycenaeans and Minoans," by Leouard R. Palmer; "Mesopotamia and the Middle East," by Sir Leonard

Woolley; "The Tiger of Ch'in," by Leonard Cottrell; "The History of Broadcasting in the United Kingdom," Vol. I, by Asa Briggs; "Cur-tals," by Kenneth Tynan; "The Conspirators," by D. J. Goodspeed; "The Bootleggers," by Kenneth Allsop; "Kidnap," by George Waller; "The Marconi Scandal," by Frances Donaldson; "Sandhurst," by Sir John Smyth; "The Story of Sandhurst," by Hugh Thomas; "Administrative Law," by H. W. R. Wade; "The Educational System of England and Wales," by H. C. Dent; "The Crisis of Western Education," by Christopher Dawson; "In Search of Criminology," by Leon Radzinowicz; "Imphal," by Sir Geoffrey Evans and Anthony Brett-James; "Battle for Crete," by John Hall Spencer; "The Fall of Crete," by Alan

Clark; "The Battle of Arnhem," by Christopher Hibbert; "The Story of Fabian Socialism," by Margaret Cole; "Russia, America and the World," by Louis Fischer; "The Art and Practice of Diplomacy," by Sir Charles Webster; "First-Hand Report," by Sherman Adams; "Party Politics": Vol. III, "The Stuff of Politics," by Sir Ivor Jennings; "Questions in Parliament," by D. N. Chester and Nora Bowring; "Guilty Land," by Patrick van Rensburg; "The Commonwealth," by Patrick Gordon Walker; "The Last Days of the British Raj," by Leonard Mosley; "The Making of the President, 1960," by Theodore H. White; "Conversations with Stalin," by Milovan Djilas; "Six Crises," by Richard M. Nixon; "The History of the Derby Stakes," by Roger Mortimer

MUSIC AND OPERA OF 1961-62

(1961) Oct. 3. The London Philharmonic Orchestra's concert at the Festival Hall was conducted by Sir Eugene Goossens in place of Josef Krips, who was ill; Brückner's 4th Symphony was played in the version of 1878-80, and Franz Reizenstein was the soloist in the first public performance of his own second piano concerto. 7. The Leeds Triennial Festival opened with a concert in the Town Hall, in the presence of the Princess Royal, the patron. Mozart's C minor Mass and Britten's *Cantata Academica* were performed, and the concert began with the Festival Chorus and the Liverpool Philharmonic Orchestra under John Pritchard in Britten's new setting of the National Anthem for full chorus and orchestra. On Oct. 9, Alexander Goehr's specially commissioned cantata, *Sutter's Gold*, was given its first performance, and on the following evening the Dance round the Golden Calf from Schönberg's opera, *Moses and Aaron*, was heard for the first time publicly in Britain, with Peter Pears, Bernard Dickerson, Heather Harper and Janet Baker as soloists. 11. The first concert of the Royal Philharmonic Orchestra's 150th season took place at the Festival Hall, Sir Malcolm Sargent conducting. 16. At the Festival Hall, Mischa Elman played Brahms' violin concerto and Mendelssohn's E minor concerto with the London Symphony Orchestra conducted by Charles Mackerras. 21. Arthur Fiedler, the U.S. conductor, made his London debut at a Philharmonia Orchestra concert at the Festival Hall. 26. In the London Philharmonic Society's concert at the Festival Hall, Sir Adrian Boult introduced a short Elegy for voices and strings, composed by Beethoven in 1814, and never before heard in England. 29. Stravinsky conducted his own work, *Persephone*, at the Festival Hall with the B.B.C. Chorus and Orchestra.

Nov. 9. The Royal Philharmonic Orchestra gave a memorial concert to Sir Thomas Beecham at the Albert Hall. 21. The annual St. Cecilia Festival concert was held in the presence of Queen Elizabeth the Queen Mother, the Philharmonia Orchestra and Chorus taking part under Sir Adrian Boult; Sir William Walton conducted his own *Belshazzar's Feast*, and Benjamin Britten's setting of the National Anthem was heard for the first time in London. 24. In a concert at Huddersfield Town Hall, Sir Malcolm Sargent conducted the Huddersfield Choral Society and the Royal Liverpool Philharmonic Orchestra, with Richard Lewis, John Cameron and Marjorie Thomas as soloists, in the first performance of Sir William Walton's new setting of the *Gloria*, specially commissioned to celebrate the 125th anniversary of the Huddersfield Choral Society.

Dec. 7. Kodaly's first symphony was heard for the first time in London at a London Philharmonic Society's concert at the Festival Hall. 16. At the

Wigmore Hall, in the presence of Queen Elizabeth the Queen Mother, the Oriana Madrigal Society, conducted by Charles Kennedy Scott, who founded the Society in 1904, gave the last of its annual Christmas concerts.

(1962) Jan. 7. Yehudi Menuhin took part in a Beethoven concert at the Albert Hall with Sir Malcolm Sargent and the London Symphony Orchestra. 18. The first major orchestral concert in the new Guildford Cathedral was given by the Hallé Orchestra under Sir John Barbirolli. At the Festival Hall the London Philharmonic Orchestra and Choir gave a concert devoted to the works of Sir William Walton, which included the first London performance of his recent *Gloria*, and the first hearing of the revised version of his viola concerto of 1929. 29. On the centenary of the birth of Delius, the Delius Trust gave a concert of his works in the Festival Hall, in which the Royal Philharmonic Orchestra, conducted by Sir Malcolm Sargent, and the B.B.C. Chorus and Choral Society took part.

Feb. 2. The first performance in the regular repertory at Sadler's Wells of Stravinsky's *Rake's Progress* took place. 5. Artur Schnabel played with the Philharmonia Orchestra at the Festival Hall. 6. The Bach Choir's concert at the Festival Hall consisted of Delius' *Sea Drift*, in commemoration of his centenary, Walton's Coronation *Te Deum* to mark the 10th anniversary of the Queen's accession, and Janacek's *Glagolitic Mass*.

March 14. Thomas Arne's *Anticlerges*, in the bicentenary year of its first performance, was produced at St. Pancras Town Hall by the Handel Opera Society; it had not previously been given in this country since 1839. 20. Verdi's little-known opera, *I Masnadieri*, was performed as part of the St. Pancras Festival. 26. Malcolm Arnold's *Divertimento No. 2*, heard for the first time at Leeds in the previous October, received its first London performance at the Festival Hall. 27. In Delius' centenary year, the B.B.C. produced a performance, conducted by Stanford Robinson, of the composer's sixth and last opera, *Fennimore and Gerda*, completed in 1910; this was its first production in Britain. 29. The first concert of the Delius Centenary Festival took place at Bradford, the composer's birthplace, in the presence of Queen Elizabeth the Queen Mother; the Royal Philharmonic Orchestra under Rudolf Kempe took part in the performance of *Sea Drift* (with Thomas Hemsley and the Bradford Old Choral Society), *A Song of the High Hills*, *In a Summer Garden*, and the first Dance Rhapsody. On the following evening the concert was devoted to orchestral work by Delius, and the third and last of the Royal Philharmonic Orchestra's concerts was given on March 31.

April 3. At Bradford, Delius' opera, *A Village Romeo and Juliet*, last performed on the stage under Sir Thomas Beecham in 1935, was specially produced by the Sadler's Wells Opera Company. **6.** The Vienna Philharmonic Orchestra, under Herbert von Karajan, gave the first of three concerts at the Festival Hall. **10.** Delius' *Village Romeo and Juliet* was presented at Sadler's Wells.

May 7. The Philharmonia Orchestra's concert, conducted by Otto Klemperer, included a symphony in two movements by the conductor himself, written in 1960 and heard in England for the first time on this occasion; the programme also included Brahms' violin concerto, with Yehudi Menuhin as soloist. **17.** Yehudi Menuhin played in Lennox Berkeley's violin concerto, which was specially written for him, in the London Symphony Orchestra's concert at the Festival Hall; the concerto, first heard at Bath in 1961, was receiving its first London performance. **21.** The Glyndebourne opera season opened with a new centenary production of Debussy's *Pelléas et Mélisande*, with Gius Hockman, Michel Roux, Henri Gui and Denise Duval. **25.** To mark the consecration of Coventry Cathedral, a new cantata, *The Beatitudes*, by Sir Arthur Bliss, specially commissioned for the occasion, was performed at Coventry, with the composer as conductor, the Festival Choir, Jennifer Vyvyan, Richard Lewis and the B.B.C. Symphony Orchestra.

June 5. Michael Tippett's new opera, *King Priam*, was produced at Covent Garden. **12.** At Coventry the Sadler's Wells Company gave the first performance in England of Pizzetti's opera *Murder in the Cathedral*, based on T. S. Eliot's play, in an English translation by Geoffrey Dunn. **17.** Artur Rubinstein was the soloist at the Festival Hall in Mozart and Tchaikowsky piano concertos with the Philharmonia Orchestra under Carlo Maria Giulini. **20.** The Moscow Chamber Orchestra gave the first of a series of concerts at the Bath Festival. **21.** In connection with the Bath Festival, a concert was held in Wells Cathedral; Stravinsky's Mass and Carissimi's oratorio *Jephtha* were performed, and Yehudi Menuhin and the Bath Festival Orchestra took part. **22.** Mozart's unfinished C Minor Mass was sung in Southwark Cathedral by the Massachusetts Institute of Technology choir conducted by Klaus Liepmann. **26.** The Bach Choir, conducted by David Willcocks, gave the first London performance of Peter Raabe Fricker's *The Vision of Judgement* at a Festival Hall concert; the soloists were John Mitchinson and Heather Harper.

July 2. The Moscow Chamber orchestra, conducted by Rudolph Barshai, gave a concert in the Festival Hall, which included two works not previously heard in London—a concerto for chamber orchestra and organ by Pavel Bunin and the *Sinfonietta* No. 2 by the Polish composer Moisei Wainberg. The Cheltenham Festival opened with a concert by the London Symphony Orchestra under Antal Dorati. New works heard during the Festival included Alexander Goehr's violin concerto, a string quartet by Hugh Wood, a piano sonata by Anthony Gilbert, *Villanelles* for seven instruments by Gordon Rathbone Crosse, a violin sonata by Thomas Wilson, *Quincunx*, by Elisabeth Lutyens and Benjamin Frankel's second symphony. **12.** As part of the City of London Festival, a concert of chamber music was given at the Grocers' Hall by Yehudi Menuhin, Gaspar Cassado and Louis Kentner; the programme included a *Concertante à tre* for violin, cello and piano by Alan Rawsthorne, specially commissioned by the Musicians' Company.

Aug. 7. Brückner's Ninth Symphony was performed in a Promenade Concert for the first time. **19.** *Edinburgh Festival*.—The inaugural concert of the Edinburgh Festival took place in the Usher Hall, being devoted to Beethoven's *Mass in D*, with the London Symphony Orchestra, the Leeds Festival Chorus, Lorin Maazel as conductor, Galina Vishnevskaya, Marga Höfgen, Richard Lewis and Frederick Guthrie. On Aug. 20, the Belgrade Opera Company produced Borodin's *Prince Igor* in the King's Theatre, followed on Aug. 21 by *The Love of Three Oranges*, an early opera by Prokofiev, and later by Massenet's *Don Quixote*, Mussorgsky's *Khovanshchina* and Prokofiev's *The Gambler*. In the Freemasons' Hall on Aug. 22, Peter Pears and Yvonne Lefebure gave a recital of Debussy's music on the occasion of the centenary of the composer's birth. In the evening of Aug. 22, at the Usher Hall, *Songs of Life and Love*, by Luigi Nono, received its première, being performed by the London Symphony Orchestra with Richard Lewis and Dorothy Dorow as soloists. On Aug. 23, Galina Vishnevskaya gave a song recital in the Usher Hall accompanied at the piano by her husband, Mstislav Rostropovich. Falla's last work, *Atlántida*, completed by Ernesto Halffter, was given its first British performance by the London Symphony Orchestra in the Usher Hall on Aug. 24. Later in the Festival, the B.B.C. Scottish Orchestra, under Norman Del Mar, played at Leith Town Hall and the Borodin Quartet played Shostakovich's third and seventh string quartets—also in Leith Town Hall. On Aug. 29, the Polish Radio Symphony Orchestra, conducted by Jan Krenz, played Shostakovich's eighth symphony in the Usher Hall, and on Sept. 4, also in the Usher Hall, Shostakovich's most recent symphony, the twelfth, was performed by the Philharmonia Orchestra under Gennadi Rozhdestvensky. The performance of David Oistrakh's violin recital in the Usher Hall on Sept. 5 included Shostakovich's *Three Fantastic Dances*. **20.** At the Promenade Concert, Norman Del Mar conducted the Amrosian Singers and the B.B.C. Scottish Orchestra in a new choral work by Thea Musgrave—a setting of the Elizabethan poem *The Phoenix and the Turtle*.

Sept. 2. The Three Choirs Festival opened at Gloucester Cathedral with festal Evensong; settings of the *Benedicite* by Dr. Herbert Sumsion and the *Te Deum* by John Sanders were conducted by their composers. The concert in the cathedral on Sept. 5 included Vaughan Williams' *Sea Symphony*, conducted by Dr. Sumsion, with John Carol Carr and Heather Harper as soloists, Debussy's *La Demoiselle élue* and Brahms' double concerto, played by Ralph Holmes and Roban de Saram. At the afternoon programme on Sept. 6, the conducting was shared by the three cathedral organists; the concert included Britten's *Missa Brevis* for boys' voices and organ, and two organ solos by John Birch—Bach's C minor Passacaglia and Fugue and Joseph Jongen's *Sonata Eroica*. **4.** A work by Richard Strauss, *Three Hymns*, settings to words by Hölderlin, composed in 1921, was heard for the first time at a Promenade Concert. **15.** The final Promenade Concert was marked by a farewell to Paul Beard, who was retiring from the B.B.C. Symphony Orchestra. **20.** The Hastings Music Festival opened; during the Festival, the London Philharmonic Orchestra gave three concerts in the White Rock Pavilion. **25.** The Hamburg State Opera began a season at Sadler's Wells with a production by Wieland Wagner of *Lohengrin*; on the following day *Der Prinz von Homburg*, by Hans Werner Henze, was presented, and was succeeded on Sept. 27 by Berg's *Wozzeck*.

DRAMATIC SUMMARY, 1961-1962

The project for a National Theatre approached nearer realisation during the year with the announcement that the Government had approved proposals for the erection of both the theatre and an opera house on two separate sites on London's South Bank, and had agreed to make available a capital sum not exceeding £1,000,000 towards building the theatre. Sir Laurence Olivier accepted the appointment as first Director of the National Theatre and hoped it would become a source of pride to his profession. Apart from this notable decision, the most interesting features of the season occurred in the musical contributions. The ever-popular Gilbert and Sullivan operas went out of copyright on New Year's Day, and the D'Oyly Carte Company marked the occasion by presenting *The Mikado* as the first of its repertoire to be played out of copyright in England. Others of the series followed, but it was noted that the producers relied mainly on tradition for their effects. A new musical by Noel Coward, *Sail Away*, proved that this versatile playwright and composer still possessed much of his old dexterity and gift for satire, and a younger author, Lionel Bart, followed his *Oliver* with *Blitz!*, a spectacular show which sought to depict the resilience and pluck of the East End during the war. Another of the younger school of dramatists, Arnold Wesker, added to his reputation with *Chips With Everything*; a farce, *Boeing-Boeing*, adapted from the French by Beverley Cross, enjoyed a long run, and Peter Ustinov achieved another success with *Photo Finish*. New plays by Harold Pinter, William Douglas Home and John Mortimer provided an interesting contrast to an all-star revival of *The School For Scandal*, Sheridan's classic comedy. The Open Air Theatre in Regent's Park bravely continued a season despite the bad summer.

The following is a list of productions between Oct. 1, 1961, and Sept. 30, 1962:—

ADELPHI, Strand, W.C.2.—(1962) March 8. *Scapa!*, musical version of *Seagulls over Sorrento*, by Hugh Hastings (David Hughes, Pete Murray, Edward Woodward and Timothy Gray). May 8. *Blitz!*, musical by Lionel Bart (Bob Grant, Graham James, Amelia Bayntun, Grazina Frame and Toni Palmer).

ALDWYCH, Aldwych, W.C.2.—(1961). Dec. 14. Chekhov's *The Cherry Orchard* (Sir John Gielgud, Ian Holm, George Murcell, Roy Dotrice, Dame Peggy Ashcroft, Dorothy Tutin and Judi Dench). (1962) Jan. 10. Production of *As You Like It* from Royal Shakespeare Theatre, Stratford-upon-Avon (Max Adrian, Patrick Wymark, Ian Bannen, Russell Hunter, Vanessa Redgrave, Rosalind Knight and Patsy Byrne). March 19. The Royal Shakespeare Company began a season with *The Art of Seduction*, an adaptation of Laclós' *Les Liaisons Dangereuses* (Keith Michell, John Barton and Irene Worth); on March 29 the Company introduced Brecht's *The Caucasian Chalk Circle* (Hugh Griffith, Michael Flanders, Gordon Gostelon, Roy Dotrice, James Mellor, James Bree, Patsy Byrne, Cherry Morris and Patience Collier). June 18. The Royal Shakespeare Company presented Strindberg's *Playing with Fire*, translated by Michael Meyer (Kenneth Haigh and Colin Jeavons) and Harold Pinter's *The Collection* (John Ronane, Kenneth Haigh, Michael Hordern and Barbara Murray). Aug. 1. Royal Shakespeare Company in revival of John Whiting's *A Penny for a Song* (Marlus Goring, Clive Morton, Michael Gwynn, Newton Blick, James Bree, Mark Eden, Gwen Ffrangcon-Davies and Judi Dench).

APOLLO, Shaftesbury Avenue, W.1.—(1962) Feb. 20. *Boeing-Boeing*, farce adapted from the French (Patrick Cargill, David Tomlinson, Carole Shelley,

Andrée Melly, Jane Downs and Carmel McSharry). CAMBRIDGE, Earlam Street, W.C.2.—(1962) Feb. 9. *Signpost to Murder*, by Monte Boyle (Derek Farr, Cyril Raymond and Margaret Lockwood).

COMEDY, Panton Street, S.W.1.—(1961) Oct. 2. *Counterpoint*—triple bill of plays—*A Night Out*, by Harold Pinter, *Soldier from the Wars Returning*, by David Compton and *Barnstable*, by John Saunders (Brian Peck, Trevor Reid, Rodney Bews, Walter Hall, Glyn Houston, Anna Wing and Patricia Denys). Oct. 23. *Bonne Soupe*, French farce by Felicien Marceau, translated by Kitty Black (Peter Illing, James Cossins, Coral Browne and Erica Rogers). (1962) Feb. 13. *My Place*, by Elaine Dandy (Barry Foster and Diane Cilento). March 22. *Play With a Tiger*, by Doris Lessing (Alex Viespi, Siobhan McKenna and Maureen Pryor). May 17. *Little Mary Sunshine*, musical comedy by Rick Besoyan (Bernard Cribbins, Edward Bishop, Terence Cooper, Patricia Routledge and Joyce Blair). June 28. *The Genius and the Goddess*, by Aldous Huxley (George Pravda, Paul Massie and Constance Cummings). July 26. *The Promise*, American revue (Theodore J. Flicker, James Frawley, Thomas Aldrede and Joan Darling).

CRITERION, Piccadilly, W.1.—(1962) Feb. 21. *4 to the Bar*, "an after-dinner entertainment" (Jan Wallace, Bryan Blackburn, Peter Reeves and Rose Hill). July 11. *The Gimnick*, by Joseph Julian (Dave King, Donald Sutherland, Tsai Chin and Ursula Howells). Sept. 12. *Miss Pell is Missing*, comedy by Leonard Gershe (Wilfrid Hyde White, Brook Williams, Richard Briers and Amanda Reiss).

DUKE OF YORK'S, St. Martin's Lane, W.C.2.—(1962) May 16. *Everything in the Garden*, by Giles Cooper (Charles Gray and Geraldine McEwan). June 19. *The Cigarette Girl*, by William Douglas Home (Charles Heslop, Tim Seely, Diana Hodddon and Dilys Laye). July 25. *Fit to Print*, by Alastair Dunnett (Sir Donald Wolfit, Basil Henson and Charmian Eyre). Sept. 18. *Big Fish, Little Fish*, by Hugh Wheeler (Thomas Coley, Hume Cronyn, Frederick Jaeger, Frank Pettingell, Jessica Tandy and Viola Lyel).

GARRICK, Charing Cross Road, W.C.2.—(1962) Feb. 23. *Not to Worry?*, revue by Stanley Daniels (Alec McCowen, Derek Waring, Lynnette Rae and Prunella Scales). April 4. *Two Stars for Comfort*, by John Mortimer (Trevor Howard, William Fox, Esmond Knight, Patricia Healey and Isabel Dean). Sept. 19. *Rattle of a Simple Man*, by Charles Dyer (Edward Woodward, Daniel Moynihan and Sheila Hancock).

GLOBE, Shaftesbury Avenue, W.1.—(1962) May 10. *The Private Ear and The Public Eye*, two plays by Peter Shaffer (Kenneth Williams, Terry Scully, Richard Pearson and Maggie Smith).

HAYMARKET, Haymarket, S.W.1.—(1962). April 5. Sheridan's *The School for Scandal* (Sir Ralph Richardson, John Neville, Daniel Massey, Laurence Naismith, Malcolm Keen, Charles Lloyd Pack, Anna Massey, Margaret Rutherford, Meriel Forbes and Pinkie Johnstone).

HER MAJESTY'S, Haymarket, S.W.1.—(1962) Feb. 8. Sir Tyrone Guthrie's new production of *H.M.S. Pinafore* (Eric House, Harry Mossfield, Andrew Downie, Howard Glynn, Marion Studholme and Irene Byatt). *The Pirates of Penzance* was produced on Feb. 15. June 20. *Judith*, by Jean Giraudoux, adapted by Christopher Fry (Sean Connery, Barry Foster, Michael Gough, Ruth Meyers and Vivien Merchant). August 16. *Lock Up Your Daughters*, transferred from the Mermald Theatre.

LYRIC, Shaftesbury Avenue, W.1.—(1962) *March 28. Write Me a Murder*, by Frederick Knott (Brian Bedford, James Villiers, Judith Stott and Fabia Drake). *Sept. 5. Breaking Point*, by William Fairchild (Robert Ayres, Burnell Tucker, Robert Beatty, Paul Massie, John Gregson, Michael Atkinson and Derek Royle).

LYRIC, Hammersmith, W.6.—(1961) *Nov. 29. Out of my Mind*, revue (John Wood, Malcolm Clare, Gillian Lynne, Patricia Routledge and Jill Ireland), *Dec. 21. Alice Through the Looking Glass*, adapted by Felicity Douglas (Edgar Wreford, Lucinda Curtis, Moyra Fraser and Lally Bowers). (1962) *March 5. Dostoevsky's The Idiot* (Christopher Guinee, John Woodvine, Christopher Burgess, John Ringham and Zena Walker). *April 3. The Last Ally*, by James Brabazon (Tony Tanner and Sheila Allen). *May 1. All for Truth*, adaptation by P. D. Cummins of Molière's *Le Misanthrope* (John Woodvine and Zena Walker).

MERMAID, Puddle Dock, E.C.4.—(1961) *Oct. 3. Shaw's Androcles and the Lion* (Davy Kaye, Peter Prowse, Edward de Souza, Cal McCord and Jill Bennett) and *The Shewing-Up of Blanco Posnet* (Ronald Fraser and Alan MacNaughtan). *Nov. 7. The Long Sunset*, by R. C. Sherriff (Peter Prowse, Jerry Verno, Joseph O'Connor, Roy Wilson and Josephine Wilson). *Dec. 13. Adaptation of Stevenson's Treasure Island* (John Woodvine, Norman Scafe, Spike Milligan, Daniel Thorndike and Sean Scully). (1962) *Feb. 14. The Bed Bug*, by Vladimir Mayakovsky (Joss Ackland, Richard Beale and Jerry Verno). *March 20. Shaw's Arms and the Man* (David Knight, Joss Ackland, Richard Wordsworth, James Mellow, Elspeth March and Sally Smith). *April 11. Rockets in Urso Major*, by Fred Hoyle (Ian McNaughton and James Groult). *May 17. Revival of Lock Up Your Daughters*, musical adaptation of Fielding's *Rape upon Rape* (Peter Gilmore, Bernard Miles, Richard Goolden, Hy Hazell and Sally Smith). *Aug. 15. Sean O'Casey festival* began with production of *Purple Dust. Red Roses for Me* was presented on Sept. 4 and *The Plough and the Stars* on Sept. 25.

OLD VIC, Waterloo Road, S.E.1.—(1961) *Nov. 7. Aeschylus' Oresteia* (Ronald Lewis, Joss Ackland, Catherine Lacey and Yvonne Mitchell). *Nov. 21. Eugene O'Neill's Mourning becomes Electra* (Michael Goodliffe, Stephen Moore, Sonia Dresdel and Barbara Jefford). *Dec. 19. Macbeth* (Maurice Denham, Walter Hudd, Robert Eddison, David Bird, Emrys James and Maxine Audley). (1962) *Jan. 17. Twelfth Night* (Paul Daneman, Jerome Willis, David Bird, Stephen Moore, Emrys James, Jane Downs, Eileen Atkins and Jean Robinson). *March 6. Richard III* (Paul Dancman, Robert Eddison, Joseph O'Connor, Brian Spink, David Bird, Mary Kerridge and Patricia Jessel). *April 17. Julius Caesar* (Robert Eddison, Joseph O'Connor, John Gregson, Maurice Good, Emrys James, George Selway and Mary Kerridge). *May 29. The Tempest* (Alastair Sln, Kerry Gardner, George Selway, David Bird, Robert Eddison, Graham Bell and Eileen Atkins). *June 14. Bristol Old Vic Company in War and Peace*, adaptation of Tolstoy's novel. *Sept. 26. Ibsen's Peer Gynt* (Leo McKern, Wilfrid Lawson, Catherine Lacey, Dilys Hamlett and Adrienne Corri).

PHOENIX, Charing Cross Road, W.C.2.—(1962) *April 3. Look Homeward, Angel*, adapted by Kettl Frings from Thomas Wolf's novel (Andrew Cruickshank, Peter McNery, Richard Pasco, Charles Leno, Mary Ellis, Mary Miller, Jeanne Mockford, Margaret Courtenay and Margaret Canning). *May 24. The Lizard on the Rock*, by John Hall (Harry Andrews, John Laurie, Michael Coles and Siân Phillips).

PICCADILLY, Denmark Street, W.1.—(1962) *Feb. 19. Season of French plays* opened with performance of Françoise Sagan's *Les Violons, Parfois*. On *Feb. 26. Le Misanthrope* was presented, on *March 5. Marcel Achard's Jean de la Lune*, *March 12. Jean Anouilh's L'Invitation au Château*, and on *March 19. Claudel's L'Annonce fait à Marie*. *April 24. A Time to Laugh*, by Robert Crean (Robert Morley, Lyndon Brook, Frances Hyland, Ruth Gordon and Cleo Laine). *June 27. The Glad and Sorry Season*, by Irving Ravetch and Harriet Frank, jr. (George Baker and Juliet Mills).

PRINCE OF WALES, Coventry Street, W.1.—(1961) *Oct. 12. Do Re Mi*, American musical (Max Bygraves, Maggie Fitzgibbon and Jan Waters). (1962) *Feb. 27. Come Blow Your Horn*, American farce by Neil Simon (David Kossoff, Bob Monkhouse, Michael Crawford and Libby Morris).

PRINCES, Shaftesbury Avenue, W.C.2.—(1961) *Oct. 30. Polish State Jewish Theatre company* opened season. (1962) *Feb. 1. The Big Killing*, by Philip Mackie (Frank Lawton, Naunton Wayne, Leslie Phillips and Carol Coombe). *May 7. England our England*, revue by Willis Hall and Keith Waterhouse (Roy Kinnear, Murray Melvin, Barrie Ingham, Alison Leggatt and Billie Whitelaw). *Aug. 20. Gentlemen Prefer Blondes*, musical adaptation of Anita Loos' novel (Donald Stewart, Guy Middleton, Dora Bryan, Anne Hart and Bessie Love).

ROYAL COURT, Sloane Square, S.W.1.—(1961) *Oct. 24. Two plays* by Edward Albee—*The Death of Bessie Smith* and *The American Dream* (Robert Ayres, Richard Easton, Avril Elgar, Mavis Villiers and Gene Anderson). *Nov. 13. That's Us*, by Henry Chapman. *Nov. 22. The Keep*, by Gwyn Thomas (Mervyn Johns, Glyn Owen, Denys Graham and Jessie Evans). *Dec. 21. The Fire Raisers*, by Rex Frisch (Alfred Marks, Colin Blakely, James Booth, Norman Henry, Doris Hare and Ann Beach). (1962) *Jan. 24. A Midsummer Night's Dream* (Robert Lang, Colin Jeavons, Alfred Lynch, Colin Blakely and Samantha Eggar). *March 27. The Knack*, by Ann Jellicoe (Julian Glover, James Bolam, Philip Locke and Rita Tushingham). *April 27. Chips with Everything*, by Arnold Wesker (Ronald Lacey, Martin Boddey, Frank Finlay and John Kelland). *June 13. Period of Adjustment*, by Tennessee Williams (Bernard Braden, Neil McCallum and Collin Wilcox). *July 19. Plays for England*—two plays by John Osborne, *The Blood of the Bambergs* and *Under Plain Cover* (Graham Crowden, Anton Rodgers and Ann Beach). *Sept. 11. Brecht on Brecht* (Lotte Lenya).

ST. MARTIN'S, West Street, W.C.2.—(1962) *July 19. Brush with a Body*, "comedy thriller" by Maurice McLoughlin (Patrick McAllinney, Mary Merrall and Gladys Henson). *Sept. 10. Revival of Agatha Christie's Ten Little Niggers* (Robin Hunter, Garry Marsh, Roger Maxwell and Jack Melford).

SAVILLE, Shaftesbury Avenue, W.C.2.—(1961) *Dec. 21. A. A. Milne's Toad of Toad Hall* (Richard Goolden, David Evans, Wilfred Harrison and Jeremy Geidt). (1962) *April 25. Photo Finish*, by Peter Ustinov (Peter Ustinov, Paul Rogers and Diana Wynyard).

SAVOY, Strand, W.C.2.—(1961) *Dec. 11. D'Oyly Carte Company* began season of Gilbert and Sullivan operas. (1962) *March 11. The Thurbur Carnival*, entertainment based on the works of James Thurber (Tom Ewell, Denys Graham, Tom Chatto, John Cater, David Bauer, Betty Marsden, June Thody and Mary Laura Wood). *June 21. Sail Away*, musical play by Noel Coward (David Holliday, Grover Dale, Sheila Forbes and Elaine Stritch).

SCALA, Charlotte Street, W.1.—(1961) Dec. 18. *Peter Pan* (John Gregson, Anne Heywood and Jane Asher).

STRAND, Aldwych, W.C.2.—(1962) Sept. 6. *The New Men*, by C. P. Snow, adapted by Ronald Millar (Paul Daneman, Richard Pasco and Ernest Clark).

VAUDEVILLE, Strand, W.C.2.—(1961), Oct. 20. *Teresa of Avila*, by Hugh Ross Williamson (Sir Lewis Casson, Ernest Milton, Nicholas Hannen, Richard Pasco and Dame Sybil Thorndike). Dec. 6. *Critic's Choice*, American comedy by Ira Levin (Ian Carmichael, Terence Bayler, Muriel Pavlov

and Una Venning). (1962) June 12. *Arnold Wesker's Chips with Everything*, transferred from the Royal Court.

VICTORIA PALACE, Victoria Street, S.W.1.—(1962) May 19. Final performance by the Crazy Gang, May 25. *The Black and White Minstrel Show*.

WYNDHAM'S, Charing Cross Road, W.C.2.—(1961) Nov. 1. *Shaw's Heartbreak House* (Roger Livesey, Michael Denison, George Benson, Dulcie Gray, Perla Neilton and Judy Campbell). (1962) July 10. *Period of Adjustment*, by Tennessee Williams, transferred from Royal Court.

WIRELESS DEVELOPMENT AND BROADCASTING, 1961-62

THE PILKINGTON REPORT

The chief event of broadcasting news during the year under review was the report of the Pilkington Committee on the future of broadcasting, which was published on June 27.

The committee criticised the existing structure of independent television, and recommended that it should be reconstituted and reorganised so that the Independent Television Authority should itself plan the programmes and sell advertising time, proposing that the programme companies should produce and sell programme items to the Authority. By this means, the Committee felt, the reality of power would be vested in the Authority, and the commercial incentive always to aim at maximum audiences and maximum advertising revenue would be removed from programme planning and production. The Report said that so long as independent television was constituted and organised on the existing lines, it should not provide any additional services of television, but that if, after it had been reconstituted and reorganised as the Committee recommended, it proved its capacity to realise the purposes of broadcasting, it should be authorised to provide a second programme. Meanwhile the Report proposed that the B.B.C. should be authorised as soon as possible to provide a third television programme, and also proposed that there should be only one service of local sound broadcasting, which the B.B.C. should conduct, and finance out of licence revenue.

Other recommendations included the following:

That the line definition standard in Britain should be changed from 405 lines to 625 lines (the internationally agreed standard in general use throughout Europe) and that television should be developed in Bands IV and V.

That a service of colour television on 625 lines also in the ultra high frequency bands should be introduced as soon as possible.

That proposals for a service of subscription, pay-as-you-view television be rejected.

That the National Broadcasting Council for Scotland be given, in respect of the B.B.C.'s television service for Scotland, rights and duties comparable with those which it now exercises in respect of the Home Service on sound radio.

That the rights and duties of the National Broadcasting Council for Wales be similarly extended, and that in allotting the uncommitted frequencies in broadcasting Band III, the first priority should be given to separating the B.B.C.'s service to Wales from that to the English regions.

The Committee also noted the B.B.C.'s estimate that the fee for a combined sound and television licence (not including excise duty) would be £6 from July 1, 1964, and the sound only licence £1 10s., and said that it did not think that an annual charge of £6, or rather less than 4d. a day per household, would be too much to pay.

At a press conference following the publication of the report, Sir Harry Pilkington said that the

Committee expected that in 12 years' time there would be three national sound radio programmes all running for the greater part of the day, and still supplying a very large number of listeners, and in addition, about half the population would be able to receive a local sound programme of interest specifically for people living in the area served by the local station. There would be four comprehensive programmes of television with nation-wide coverage, all on 625 lines; they would be in two sets of two programmes, one pair provided by the B.B.C. and the other by commercial television, each pair planned in association. At least two of the programmes would probably offer colour for considerable periods of the day.

THE GOVERNMENT WHITE PAPER

On July 4, the Government published a memorandum on the Pilkington Report as a White Paper, which gave approval to a number of the recommendations of the Pilkington Committee.

The White Paper agreed that by 1964 the B.B.C. should launch its second television programme on 625 lines in ultra high frequency; the programme would apply first to the London area, but it was expected that it would be able to cover the whole of Britain by 1970. The way was also cleared for the development of colour television, and the B.B.C. was authorised to establish a self-contained, distinctive Welsh television service, to extend broadcasting hours, and to produce more educational programmes for adults.

No reference was made to the increased licensing fee foreshadowed by the Pilkington Committee, though the White Paper said that the Government accepted its responsibility to see that the B.B.C. could secure sufficient income to finance adequate services. The Government, while expressing the view that there would be scope at a later stage for a second I.T.A. programme, also deferred a decision on the question of the future structure of independent television raised by the Pilkington Report.

The B.B.C., commenting on the White Paper, said that it thought that the first stage in the extension of hours of network sound broadcasting could be reached in about six months' time, and also that colour would be introduced as soon as possible after the start of the second black and white television programme, though it was likely to be two years after the second service began before colour television could be provided on a mass scale. In about a year's time, the B.B.C. expected to have decided on the best colour television system. Orders for the first seven u.h.f. television transmitters would be placed very soon, and they could provide programmes for between 60 per cent. and 70 per cent. of the population by the end of 1966. For the new television service in bands IV and V, about 60 main transmitters and a number of satellite stations would be needed to cover the country,

at an estimated capital cost of £30,000,000. The Corporation would press ahead with the provision of a separate television service for Wales, which should be possible by the beginning of 1964. The B.B.C. also had plans for broadcasts to technical colleges and colleges for further education, to start in the autumn of 1962.

Mr. Carleton Greene, director of the B.B.C., amplified the last statement later in July, when he said that though some of the Corporation's plans for educational broadcasting must await the second television service, some could be provided for by an extension of the existing service and expansion in the field of adult education was also contemplated in the B.B.C. sound programmes.

A DATE FOR SECOND B.B.C. PROGRAMME

Sir Arthur Forde, chairman of the B.B.C., opening the National Radio Show at Earls Court on Aug. 22, said that although cameras of 625 lines would have to be installed, and an important series of u.h.f. tests completed, he hoped that the B.B.C.'s second television programme, on 625 lines, would be operating in the London area by the beginning of April, 1964. He also said that the change in line standard would mean a better picture, and that it opened the way for the export of British receivers, which, with the prospect of the Common Market, was to be welcomed. Sir Arthur said that much remained to be done on colour television before it could become commonplace at acceptable prices in British homes.

Several manufacturers, however, demonstrated colour television at the Radio Show itself, at which it was noted that most television sets were being produced with the new line standard in mind, receivers either being dual standard (405 or 625 line), or capable of conversion either into dual standard, or to receive 625-line u.h.f. only.

In September, the memoranda and summaries of evidence, submitted to the Pilkington Committee, were published, and the B.B.C.'s memorandum gave details of the policy which it was intended to pursue when the second television programme became available. It was hoped to provide a daily evening feature of serious commentary on the news, and with extended hours, a breakfast-time "news hour" of lighter character would also be presented. A second programme would also make possible long-term policies for drama, ballet and opera, an extension of educational broadcasts, and

more repeats, particularly of programmes of artistic merit.

WELSH TELEVISION

The I.T.A. television service provided by Wales (West and North) Television Ltd. came into operation on Sept. 15. It was stated that Welsh-speaking people in West and North Wales would for the first time be able to view programmes presented in Welsh at popular viewing times. There would be a Welsh feature between 6 p.m. and 7.30 p.m., and a further Welsh half-hour from 10.40 to 11.10 p.m. The intervening period would usually contain programmes relayed from the independent television network. The Company was the last of the 15 to which the I.T.A. had awarded contracts. It was calculated that 1,070,000 people would be able to receive the new service, and that of these about 350,000 were outside the range of any other I.T.A. station. Three transmitters were to be brought into use in due course. Only one, in Pembrokeshire, was working when the programmes began in September, but it was hoped that a second, in the Llwyn peninsula, would be ready in October, and the third, in Flintshire, by January 1963. The B.B.C.'s plans for Wales included the installation of two transmitters by the early part of 1964. These would enable it to put out programmes of local interest to Wales, amounting at first to about 12 hours a week.

EDUCATIONAL TELEVISION

The Institute for Educational Television was formed in November 1961. Its objects were stated to be: to bring together experts and teachers interested in visual aids to education, to become a reference bureau for the uses to which educational television has been put in this country and overseas, and to encourage various experiments. These would include experiments in the use of television at all stages of education; experiments in which teachers would take part in producing educational programmes, tests of the most suitable types of programme for technical and scientific studies in further education, and possibly liaison with correspondence courses in connection with professional and industrial qualifications. The institute would advise on and co-operate with experiments on closed circuit, or local low-power stations, would press for a wider choice in the times allotted to educational television, to suit the needs of apprentices and students, and would seek to persuade television set makers to develop special and economical receivers for educational purposes.

THE CATHEDRAL OF ST. MICHAEL, COVENTRY

On the night of November 14, 1940, during a heavy raid by German bombers, the 15th-century Cathedral of St. Michael, which had taken 125 years to build was, in a few hours, completely gutted by fire. The débris which confronted the people of Coventry on the following day was without precedent yet, miraculously, almost as a symbol of Christian faith, the fine tower and spire, together with the bomb-scarred perimeter walls remained standing, in later years to play an essential role in the rebirth of the cathedral under the careful direction of Sir Basil Spence. The new design, which in 1951 was declared the winner in an open architectural competition, unified the ruins of the old building with the new and, today, cleared of débris, the bare stone altar with its charred timber cross at the east end exemplifies out of burning the sacrifice and the resurrection.

Small by comparison with other cathedrals, the new building, consecrated on May 25, 1962 by the Bishop of Coventry, the Rt. Revd. Cuthbert Bardsley, in the presence of Her Majesty the Queen, is set at right angles to the ruins of the old cathedral linked to them by the entrance porch which is also in direct line with the city centre. Using the same pink-grey stone which was used in the old cathedral, the two structures, old and new, have been unified into an interdependent group. On the west, close by the entrance porch, is the Chapel of Unity, conceived as a star-shaped plan which has been likened to a "crusaders tent", to which the Germans themselves have contributed; and to the east, approached from the Lady Chapel, the Guild Chapel of Christ the Servant. Entry into the cathedral from the south porch, past Sir Jacob Epstein's cast bronze sculpture of the patron saint Archangel St. Michael, is through a great screen of glass, rising to the full height and stretching the full width of the nave. Painstakingly engraved by John Hutton in the images of saints and angels, virtually suspended from the roof, the screen presents a light and delicate division between two ages of cathedral architecture. The only window immediately apparent on entering is that lighting the baptistry. Glazed in stained glass, 80 ft. high and 40 ft. across, the design of John Piper's window is wholly abstract. The culminating effect is a triumph of colour, reds and purples predominating the top section, greens and blues the bottom, developing into a blaze of yellows at the centre, evoking the spirit of Genesis, and forming a rich background to the font, an enormous piece of natural stone brought from the Holy Land.

The simplicity of the stone altar slab underlines the glory of Graham Sutherland's tapestry, the largest ever to be attempted in one piece and beautifully woven in the works of Pinton Frères at Felletin, France. Measuring 40 ft. wide and 74 ft. high, that was commissioned not only upon its merits as a work of art, but also as an important and necessary factor in controlling the acoustics of the building. Inspired by St. John's Revelation, the tapestry depicts Christ seated in majesty, surrounded by the four beasts, symbols of the Evangelists.

The range of windows which pierce the cliff-like walls of the main body of the cathedral constitute one of the largest single commissions for stained glass ever made, and were designed by three members of the Royal College of Art—Lawrence Lee, Keith New and Geoffrey Clark. It is only possible to view these magnificent windows at one glance from the altar steps. Conceived as a progressive representation of Christian life, the left-hand side is

devoted to man's development and the right-hand group to the perfection sought in man by God. Built into the bays between the windows are panels of white Hollington stone on which are inscribed biblical texts and symbols designed and executed by Ralph Beyer. Within the nave, a canopy is raised upon slender prestressed concrete columns, cruciform in plan, the span reduced progressively towards the altar, the lowering and narrowing of the canopy creating a false perspective concentrating attention upon the focal point of the altar. The facets of the vault above, said to be inspired by the facets of a fly's eye, are formed of timber slats between ribs of reinforced concrete, spaced to permit maximum flexibility of acoustic and lighting control. To all practical purposes, the unique operation on April 28, 1962 of lowering by helicopter the 12 cwt. abstract sculptured cross in position on top of the 79 ft. high flèche marked the completion of the cathedral. The flèche itself, constructed geodetically in manganese bronze alloy, was placed in position on the roof only two days previously by the same helicopter.

FESTIVAL THEATRE, CHICHESTER

A new theatre in this country is a rarity and a new one with an arena stage is sufficiently uncommon anywhere in the world to make the Chichester Festival Theatre of particular interest.

The decision to dispense with a proscenium arch is certainly not new; nevertheless, this is the first professional theatre actually to be built in this country which provides an open stage with the audience seated around it on three sides. Perhaps the greatest advantages to be derived from the open stage form are that a larger audience can be seated closer to the stage than in a proscenium theatre, and that economically it is cheaper to build. The mechanics of operating a proscenium theatre are complicated and costly, as are the special fire and safety precautions required. The actor, also, may find it more difficult to establish a mutual relationship beyond the footlights with his audience. On the other hand, an open stage is thought to enable an actor to establish this relationship more easily, but sets him considerable problems in acting technique. Scenery, complicated assemblies of which can effectively be handled behind the proscenium, must on the open stage be of the simplest character and moved in full view of the audience.

The architects, Powell & Moya, were handed a brief calling for a theatre with an open stage at the lowest possible cost. Researches had shown that a seating capacity of between 1,300 and 1,500 was needed, at competitive prices during a summer season, if the venture was to pay its way. The architects experimented with a variety of shapes, from circular to square, before arriving at the solution of a hexagon shape in plan which gave them at the same time the best shape for seating and acoustics and an architecturally satisfying designed shape embodying simplicity and structural economy. The form of construction, evolved in collaboration with the structural engineers, Charles Weiss and Partners, gave rise to an auditorium supported on six reinforced concrete ribs, one at each corner, with three of them set far back into the building, cantilevering forward at the front of the foyer to form a covered entrance. The resulting auditorium was thus left free from obstructing columns, structural deflections in the cantilevered sections being held in tension by the roof cables bearing against a concrete ring beam at the level of the rearmost row of seats. The roof and lighting gallery are simply supported by a hexagonal ring

girder which rests on the tension cables and carries the light steel and timber roof. The steel cables span from the corners of the auditorium and cross at the centre of the hexagon, a solution which is almost Gothic in principle in its application of stability of structure and providing an effective form of decoration.

The décor is subdued. The walls in graduating shades of grey, upholstery of seats in midnight blue and carpeting in sage green blend to focus attention upon the stage, to which all lighting in the auditorium is mainly concentrated. The approach to the auditorium through a glazed foyer is at once dramatic and effective in providing a gradual transition from the parkland setting to the theatre itself. Strict economy in the use of materials, coupled with an exciting architectural shape, combine to make this one of the most challenging and perhaps unusual buildings to be erected for a long time. Certainly it will present a subject for much frank and earnest discussion in architectural and theatrical circles for some time to come.

KING'S COLLEGE, NEWCASTLE—PHYSICS LABORATORIES

Continuing the nation-wide university buildings expansion programme, these laboratories, designed by Sir Basil Spence & Partners for the University of Durham, were first commissioned in 1956 and strictly phased to meet financial requirements. The teaching block was occupied in September 1960, the research building with an additional floor in the late autumn of 1961, and the new top section of the teaching block was completed for occupation in 1962, approximately as planned.

The research block consists of standardized laboratories measuring 40 ft. × 20 ft., divided into smaller units 25 ft. × 15 ft. and 20 ft. × 15 ft., grouped around a central hall of 108 ft. × 52 ft. clear span projecting through two storeys. This is covered by a translucent glass and concrete roof measuring 94 ft. × 38 ft. and has a floor constructed to loadings recommended by the Ministry of Transport to accommodate very large and heavy apparatus.

A detailed analysis of the requirements for the laboratories has led to the arrangement of adequate supplies of water, gas, compressed air and drainage services around the perimeter walls, against which peninsular benches have been sited to give a flexible layout of serviced work places. A similar perimeter layout of trunking provides an easily variable electrical supply, running from room to room with master control switches by the doors.

The large and fully equipped auditorium seating 377 students and the lecture rooms seating 250 in the large and 160 in each of the two smaller rooms are accommodated on the ground floor and provide very extensive projection facilities.

The building is constructed on the reinforced concrete frame principle with concrete floors and post stressed beams to support the large span of the auditorium roof. Externally, the spanridal walls are of grey mosaic clad, precast slabs with the contrasting main gables covered in a very fine riven faced, black slate from Wales. Again in a contrast of colour, but not in material, the curved wall of the auditorium is faced with olive green slate from Broughton Moore, Westmorland, and the side walls with an open textured rough sawn limestone from Derbyshire. Derbydene has also been used in the entrance hall and for the commemoration stone which, in base-bedded polished form, shows to advantage the rich pattern of fossilized crinoids and brachiopods for which this stone is noted. Brick facings are Welsh brown Jacobean as already used elsewhere on other col-

lected buildings, contributing to a feeling of continuity in the overall scheme.

HALL OF RESIDENCE, BATTERSEA

The first hall of residence to be specially designed for a college of advanced technology has recently been completed by the L.C.C. architects' department to provide living accommodation for the students of the Battersea College of Technology, formerly the Battersea Polytechnic. The building, situated in Albert Bridge Road, contains study bedrooms for 196 students and with existing accommodation, residential places can now be provided for about a quarter of the college's full-time students.

The eleven storey building provides accommodation on the upper floors for 22 study bedrooms at each level, together with a centrally placed sitting area, kitchen, bathrooms, etc. There are separate rooms at ground floor level for the bursar and two assistants, and the top floor houses the staff quarters and the students' common room. A separate two-storey block was built to contain the dining room, main kitchen and a further common room, the latter in the form of a balcony overlooking the dining area.

Again, the preference for *in situ* reinforced concrete is expressed in the simple box frame structure of the main building. A timber window unit which is double glazed against heat losses, had to be set back below cill level 2 ft. from the outside of the concrete frame to provide the required fire break between floors and has contributed greatly to the overall pattern of the elevational treatment. The dining hall block, also concrete framed, with fully glazed external walls, coupled with some timber panelling and timber fascia treatment, stands in contrast, an elegant foil to the taller block.

ENFIELD CIVIC CENTRE

Designed by Eric G. Broughton, the new civic centre at Enfield is the result of an open competition held in 1957. The brief called for a scheme of two units: an administrative block consisting of an office block and council suite, and a town hall. The first stage, housing the council suite, the town clerk's department and the boiler house, with a superficial area of 29,620 sq. ft., has recently been completed at an approximate cost of £175,000. Occupying the site adjoining the shopping centre, the new building overlooks a large pool running the length of the west front facing Silver Street.

The basic design consists of two low blocks, a two storey office block to the front connected by means of an enclosed bridge at first floor level to the square council suite building behind. In essence, the accommodation within is divided horizontally into two levels, each serving a separate function and keeping circulation in its simplest form. The ground floor is quite simply a wing of offices leading off the entrance hall, with the principal level on the upper floor, containing the members' accommodation and, *via* the link bridge, the council chamber. This diversion of accommodation is visibly expressed externally in a dramatic podium of blue brick walls containing the ground floor offices, above which the projecting *piano nobile* of members' rooms is situated. Clerestory windows visually separate the two and greatly enhance the effect, with the sedate rhythm of the larger first floor windows reflected in the long pool hard up against the main wall.

Considerable importance at design stage was attached to the appearance of the building after dark. The illumination of the ground floor offices seen through the clerestory windows as a continuous band of bright light again expresses the horizontal effect and emphasises the projecting

first floor. The pool, again, heightens this effect and complements the outside lighting housed in bollards to avoid conflicting with the clerestory lighting.

WOLFSON INSTITUTE, HAMMERSMITH HOSPITAL

The Wolfson Institute is part one of a new sequence of development for the postgraduate medical school of London University. The school, which was founded in 1934, attracts students from many countries. The school is housed at Hammersmith Hospital, the site of a former Poor Law Institution which has, from time to time, been built over to reach its present congested condition.

Architects Lyons, Israel & Ellis were briefed to develop about 4,000 sq. ft. of the site which was to house three lecture theatres to seat approximately 675 persons, about 53,000 sq. ft. of laboratory accommodation, medical library and administration, staff common rooms, a dining hall for 400, doctors' club rooms and workshops for the department of Medical Engineering. In seeking a solution, the architects were faced with the problem of maintaining a roadway bisecting the site, a factor which largely dictated the final decision to build in two parts. This took form as a multi-storey laboratory block, with library and administration connected by a bridge over the road at first floor level to the lecture theatres of the Wolfson Institute containing the rest of the accommodation required. A bridge was proposed to link the laboratory block to the hospital in order that patients could more easily be transported to the lectures for purposes of demonstration under cover.

The lecture theatres themselves have been so designed as to leave plenty of room for a generous concourse which is integrated around them. The whole of the ground floor has also been left open again with a generous circulation space round the dining room area and up to first floor. The site lines within the theatres have been strictly governed to ensure that patients brought in on trolleys can be seen from all seats. In the large theatre, to achieve this and to provide entry at different levels, a platform has been divided into two sections from which rise two staircases to the upper seats. This enables the theatres to be approached at the concourse level, through a light trap leading from the main staircase on to this platform or from the secondary staircase which rises through all floors at the rear.

The detailed consideration given from inception to completion of this building is clear even to the most casual observer. The exposed face concrete comprising the bulk of the exterior shows a logical interpretation of structure, expressing externally the internal use of the building. The nature of the white cement and sand used in the exposed concrete facework indicates quite clearly that this material need no longer be regarded as the inferior of Portland stone.

FLATS FOR WESTMINSTER CITY COUNCIL

When Messrs. Stillman & Eastwick-Field were first approached in August 1957 by the Westminster City Council to design a housing scheme at Hide Place, Westminster, S.W.1., they were aware of the plans for building the now familiar thirty-five storey tower adjacent to the Tate Gallery and knew also that tall buildings were not always acceptable to town planners. The clients' interest in such a project, however, coupled with a brief to provide a density ratio of 200 persons to the acre

and the small undistinguished nature of the site itself encouraged thought in terms of a high block. The strictest economy was exercised in the layout and construction of the dwellings, and much attention was devoted to reducing the costs of maintenance and upkeep of the dwellings. Most of the flats were to be small, mainly for elderly people, but with some family flats, and it was of much concern to the architects whether a tall building would be acceptable to such tenants. Investigations, however, made at the time suggested that in general people liked living high up and were prepared to use the lifts as a means of access.

Of the building which finally emerged, rising to a height of over two hundred feet above the streets of Victoria, the client commented "Not just another block of flats". In many ways, this is true: Hide Tower, as it has been named, is a twenty-three storey building (including ground floor and two-storey roof buildings), 88 ft. by 68 ft. on plan, rising to 226 ft. from the ground and weighing 12,000 tons. It is a balanced combination of precast and *in situ* reinforced concrete—concrete being selected as, *inter alia*, the most economical method of construction. The block is founded on 24-in diameter concrete piles 60 ft. deep, so closely grouped at the centre of the plan that the pile caps form a cellular raft 5 ft. thick. The superstructure up to the second floor level is constructed in reinforced *in situ* concrete and above this level in reinforced precast concrete frame units round the perimeter. These units are tied to a central core of *in situ* reinforced concrete floor units bolted to the perimeter units and *in situ* concrete. This arrangement provides a typical floor plan of shafts and circulation area, in the middle third of the building, flanked by equal wings of flats, eight to a floor, with balconies, staircases, services—in fact, everything, built within the confines of the building line. The tower grew at the rate of one storey each week, once the experimental stages were passed, largely through the use of a travelling tower crane and the adoption of prefabrication in methods of construction.

Externally, the balconies contribute largely to the successful "solid and void" effect and the change of dwelling unit layout halfway up the building enlivens the fenestration. The broad scale and open joints of the precast concrete Norwegian quartz faced panels are marked features of the building which, together with the careful treatment devoted to the landscaping of the car park, paved with pink limestone aggregate concrete, and the garden with its sculptured concrete screens, tree planting and grassed areas, distinguish the building from many of its contemporaries.

COVENTRY STATION

Designed by W. R. Heady, Regional Architect, British Railways Midland division, under the direction of A. N. Butland, chief civil engineer, the new Coventry station, promised in 1957, had to be complete before the consecration of the cathedral. For many years there had been a pressing need to increase the number of platforms from two to four, a need accentuated by the coming electrification of the line. The track reconstruction work entailed demolition of part of the old station and, as the city expanded, so the old station became inadequate to cope with the increased passenger and parcel traffic. The basic plan was evolved in co-operation with the city architect and planning officer and provides segregated and sheltered access to the concourse for passengers, whether arriving by bus, taxi, car or on foot; also the facility for parking cars for short or long duration, with covered access to

the station. Within the station, the design seeks to provide the passenger with an easily apprehended route to and from platforms, waiting rooms, etc. The concourse, in fact, provides almost everything that the intending passenger needs, with easily read direction boards, beautifully integrated telephone booths and stamp machines, and with plenty of circulation space. As a complement to the passenger circulation, the post office and parcel traffic has a separate access handled by an overbridge of lifts.

Materials, finishes and colours are kept to a minimum. Externally in the lower buildings, partly constructed in rough textured blue-grey brickwork of varying thicknesses, contrasting panels of silver anodised aluminium curtain walling are incorporated. Overhead, the bridges of clad silver anodised metal frames, faced with double sided coloured vitreous enamelled steel panels, contrast with the roof and bridge fascias of Derbyshire stone. Within, ceiling soffits of natural Agba boarding, columns and lift housings clad with white Swedish glazed wall tiles, deep section staircase handrails in natural hardwood capping cast glass panels, stainless steel and aluminium window and door sections typify the very high standard of the interior decorations. Of particular interest is the excellent

typography, a modified form of motorway lettering designed by Jock Kinneir, which is at present unique to Coventry.

FLATTED FACTORIES

To meet the growing demand for providing, economically, small scale industrial premises for letting purposes, the borough of Brighton, in common with many other local authorities, has found it necessary to adopt the solution of flattened factories. In its Boston Street development scheme it has not only rehoused smaller industries in an area being rehabilitated, but is also seeking to accommodate those from other parts of the town who need to be rehoused. Designed in the office of the Borough Engineer and Surveyor, the building is planned to be virtually maintenance free, with a structure of in situ concrete, aluminium external curtain walling incorporating infill panels of coloured glass. The scheme comprises two similar blocks connected by a spine of vertical circulation which collectively provide space on seven floors for flexible self-contained units of about 1,250 sq. ft. minimum size range to a maximum of 9,000 sq. ft. on one floor.

SCIENCE, DISCOVERY AND INVENTION IN 1962

LONGER VOYAGES IN SPACE

Once again we have to record that the most spectacular achievements in scientific work have been in space. Not only has space been further explored by individual astronauts, but plans were in active preparation to communicate with Venus, Mars, and even Jupiter, with a view to discovering what these planets really are, and whether life in any form is to be found there.

But if the present trends of military activity in space were allowed to continue, the chances of making important scientific discoveries may be permanently destroyed, said Sir Bernard Lovell, director of Jodrell Bank. Exploration of space had already made possible unexpected discoveries, which would have been impossible when observation was limited to optical telescopes and earth-based radio telescopes. Among these were the discovery of radiation belts and of the magnetic field modulation effect of cosmic rays, and experiments such as putting needles into orbit or detonating nuclear warheads in the Van Allen belt might do irreparable damage to pure scientific research. Australia's nuclear physicist, Sir Mark Oliphant, said that tests were part of "an insane armaments race," threatening life and diverting effort which should be employed for ensuring peace. Professor Niels Bohr, the Danish nuclear physicist and Nobel prize winner, said that all scientists must concern themselves with the paramount problem of how to increase confidence between nations. "Unless there is cooperation between scientists, regardless of political and national considerations, then the existence of humanity is threatened", he declared.

By putting two men into orbit, and keeping them there for almost the length of time it would take to get to the moon and back, Russia reasserted her claim to the lead in space exploration. Major Andriyan Nikolayev, born in 1929, was launched into orbit on Vostok III on August 11, and completed 64 orbits of the earth in 94 hours 25 minutes. Lieut. Col. Papal Popovitch was sent up on Vostok IV the next day and completed 48 orbits of the earth in 70 hours 59 minutes. The spaceships carried bacteria, fruit, flies, the seeds of wheat, pine and beech trees, and other biological test objects.

Nikolayev had tiny silver electrodes in contact with his forehead and the back of his head. Brain impulses were amplified with newly developed equipment.

During their flight—at one point they were within three miles of one another—the two Russians sent messages to the earth, and talked and sang a good-night song to one another. Both of them carried out all their set exercises. Col. Popovitch tested himself for any discomfort through weightlessness by making scores of quick turns with his head, floating in the cabin and turning over and over. He still felt no discomfort. They experienced no difficulty in absorbing their food. Major Nikolayev enjoyed most drinking "the good, cold Moscow water" which he had in the ship. Colonel Popovitch enjoyed eating smoked Caspian roach. Major Nikolayev said that when he was weightless in orbit he unstrapped himself every day and left his seat. During free floating he

"simply hung in space, not touching walls or the floor". He said that to move "you can lightly push off from the wall with your finger and you will float slowly and smoothly, the movements of hands and feet preserving the coordination". It was fully possible to live and work under weightlessness.

Colonel Popovitch tried a private experiment. "I took a bottle half full of water with me. In the weightless state the water gathered round the edge of the bottle and the air collected in the middle in a little sphere. It stayed there even when I shook the bottle."

The spaceships lauded with the astronauts on board on August 15, within six minutes of each other south of Karaganda, in Kazakhstan.

The fact that the two travellers were brought down within six minutes of each other in the same area, still in their space cabins, is a striking demonstration that precision of control has been achieved in re-entry and landing as well as in launching. It may also be assumed that the Russians have also solved the problems of living and eating during days of weightlessness.

The United States sent Lieutenant-Colonel John Glenn into orbit three times round the earth on February 20 and recovered him " hale and hearty "

from the deck of the destroyer *Noa* near Puerto Rico five hours 14 minutes after his take-off from Cape Canaveral.

The nations watched on television and listened as Colonel Glenn exchanged technical information and friendly talk with his fellow astronauts at tracking stations round the globe. His heartbeats, his blood pressure, his reaction to four hours of weightlessness, his ability to move his head, to eat from special containers, and to control the attitude of the cone-shaped Mercury capsule were among the information received. He also found time to thank the citizens of Perth, Australia, for turning on their lights for him, to search the skies for views of Orion and Sirius.

A new radiation belt in the lower reaches of the Van Allen belt was formed around the earth as the result of the high altitude nuclear test conducted by the United States over the Pacific Ocean on July 9, according to Dr. James A. Van Allen, who in 1958 discovered the radiation belt named after him. The explosion knocked out three satellites, including *Ariel*, which carried British instruments. The bomb, exploded 200 miles above Johnson Island on July 9, released swarms of high energy electrons which became trapped in the earth's magnetic field. They formed a doughnut-shaped belt round the earth, near the inner part of the natural Van Allen belts whose particles are trapped by the earth's field but come from the sun, not from bombs. The electrons made the solar cells of the satellites deteriorate faster than planned, and *Ariel* was silenced for a time.

The Boeing Aircraft Company prepared a plan to send an eight-man mission to Mars in 1971. The journey would take 259 days, and the explorers would have to wait on Mars 475 days until the earth and Mars again approach each other. The target date for the return to Earth has been selected as October 21, 1973, and if living conditions and climatic environment prove excessively hostile the expedition could depart from the surface and spend the rest of the waiting period in orbit around Mars. The total cost of the expedition is estimated at £210 million.

Radio signals from Jupiter were studied by astronomers, but it is still not clear what causes them. The "size" of Jupiter as seen by a radio telescope is much larger than its appearance through an optical telescope. This suggests that the signals may be generated in huge radiation belts surrounding the planet, similar to the Van Allen radiation belts round the earth. Supporting this theory is the fact that the strength of radio signals varies in tune with events on the sun. Some days after sunspots or solar flares Jupiter's radio waves become stronger. This implies that streams of particles shot out by the sun become trapped in Jupiter's magnetic field.

Scientists at Cape Canaveral carried out a successful test firing of the giant Saturn rocket and capped it by forming an artificial cloud of ice 65 miles out in space. Observers were temporarily blinded by its brilliance in the light of the sun. The 463-ton rocket, 162 ft. long, believed to be the largest and most powerful in the world, rose off its launching pad belching huge sheets of flame from eight long engines developing 1,300,000 lb. of thrust—the equivalent of 30 million horse-power. The Saturn is powerful enough to put a 10-ton payload into orbit around the earth.

In a discussion at the British Association it was stated that the first British earth satellite had yielded a valuable stream of information. It had been possible to obtain the temperature profile of the atmosphere at different latitudes above the earth, and from this to confirm the surprising fact that

the upper atmosphere (about 500 miles up) is hotter above the Arctic than above the Equator. Evidence showed how the first appearance of the sun above the horizon creates a flush of fast-moving electrons. The effect of these is to simulate the effects of a very high temperature, exceeding 2,000 degrees centigrade, in the upper atmosphere, though in several hours this returns to the normal but still exceedingly high value of more than 1,000 degrees.

Transatlantic television is at last a reality. On July 12 the Telstar communications satellite was launched from Cape Canaveral. It is a three-foot sphere tricked out with platinum, sapphire and gold plate, and filled with pink plastic foam. It weighs 170 lb., and its outer surface is formed by 72 flat facets. Most of these facets contain solar cells to generate electricity from sunlight. Some facets house a mirror to catch the sun in space and reflect a bright flash to earth to aid tracking. The electronic equipment is housed inside a 20-in. canister suspended in the sphere on nylon cords and bedded in pink plastic foam to absorb vibration and shock. It is said to be the most powerful receiver, transmitter and amplifier for its size and weight in the world. It could relay 60 simultaneous two-way telephone conversations, 600 one-way voice channels or a one-way television programme. Telstar's egg-shaped orbit was tilted at 45 degrees to the Equator, its nearest point 500 miles and its furthest point 3,000 miles above the earth, which it was proposed to circle every two hours 40 minutes. Besides its relay equipment, Telstar contains devices which enable it to be switched on and off by radio command from the earth, and instruments to monitor both radiation in space and its own innards. This is one of the most important parts of the Telstar experiment, because radiations in space are for electronic engineers what moisture and smog are for civil engineers on earth. Both make vital materials gradually deteriorate. Pictures transmitted from the United States by way of Telstar, in orbit high over the Atlantic were received well in Europe. The French receiving and transmitting station, near Lannion on the north Brittany coast, succeeded first in resolving the feeble signals which provided excellent pictures. The Post Office station at Goonhilly, in Cornwall (the £800,000 ground station built by the G.P.O. specially for this project) was less successful at first: only a brief glimpse across the ocean was given to British television viewers at the end of the sixth orbit early in the morning. Modifications carried out at Goonhilly allowed a highly successful television exchange across the Atlantic to be achieved on the thirteenth orbit of Telstar. Once the equipment had settled down clean-cut, steady pictures were displayed on British screens. Half-way through the experimental transmission the circuit was switched over and for the first time pictures were sent in the opposite direction—east to west from Paris to the United States. They were also seen and heard splendidly in Britain.

The General Post Office announced that the first colour television transmissions from the United States by way of the Telstar satellite were received at Goonhilly. The transmissions in both directions consisted of still pictures of the type normally used for assessing colour transmission quality.

In the first public demonstration of Telstar multi-channel telephony journalists in London talked for five minutes at a time with opposite numbers in New York. Reception was clear and the opportunity was taken by *The Times* New York correspondent to transmit the first news message by satellite. The message was carried by landline from New York to Andover, Maine, and by

microwave frequencies from Maine to Telstar, where it was amplified 10,000 million times and relayed to Goonhilly, and from there by landline to London. The front page of the *New York Times* was sent into space and back in one minute via the Telstar communications satellite. Seven pages were reduced photographically to four by five inches in size, and then printed in rows. They were then scanned by a high-speed facsimile transmitter which sent radio signals to Telstar, and the satellite returned them to a receiving drum. A newspaper printed in New York could thus be reproduced by facsimile almost anywhere in the world. Pages could be photographically enlarged to newspaper size and printed within 15 minutes after the reproduction was received.

Venus Mars and Saturn received considerable attention from astronomical observers. The United States launched a Venus probe Mariner 1 from Cape Canaveral on July 22. It weighed 446 lb., and was expected to reach the vicinity of Venus in 139 days, and to fly within 10,000 miles of the planet to scan the mysterious clouds in which Venus is swathed. But the missile went off its course after five minutes' flight, and the experiment was abandoned. Mariner II, identical to Mariner I, was launched on August 27. The course of the probe was altered later by a signal across 1,500,000 miles of space. Scientists at Pasadena said that if their optimism was borne out Mariner should pass within 9,000 miles of Venus on December 14. In addition to the apparatus designed to analyse the dense clouds which surround Venus and make electromagnetic studies nearly impossible, the probe carries instruments intended to measure the intensity and distribution of charged particles between earth and the planet, the density and direction of cosmic dust, the intensity of low energy protons from the sun, and changes in the magnetic field of outer space.

AFRICA'S PAST: OCEANIC CLUES.—The Admiralty survey ship H.M.S. Owen, completed an eight months' cruise of 35,000 miles studying the Indian Ocean bed as part of Britain's contribution to the International Indian Ocean Expedition. Mr. B. C. Browne, lecturer in experimental geophysics at Trinity College, Cambridge, and leader of the expedition, said that the magnetic soundings taken off the east coast of Africa had revealed that a large section stretching 2,000 miles from Madagascar to Socotra had probably subsided into the sea 50 million to 100 million years ago. There was no evidence of a continental shelf—an area of rock and sediment often stretching 200 miles out to sea that normally lies not far below the surface around large land masses. Underneath a thick layer of sediment, rocks similar in composition and age to those of the African mainland, sloping continuously to the depths of the Indian Ocean, were found. The absence of a continental shelf, which takes many millions of years to form, led to the opinion that this part of the coast has not been as stable as it was thought to be. The expedition returned with six of the world's largest coconuts, thought by the natives to be an aphrodisiac. Weighing 25 lb. each, the coconuts are found only on the island of Praslin, in the Seychelles, and they have never been successfully transplanted. It is hoped to grow them in the botanical gardens at Cambridge.

ANGLO-COLOMBIAN EXPEDITION.—Members of the Anglo-Colombian expedition, studying Indian tribes in remote areas of South America went hare-foot for a month in the jungle after losing most of their equipment, cameras and medical supplies valued at \$2,000, when their native canoe collapsed

in the rapids. Nevertheless the expedition completed an important scientific record of primitive people in Amazonia. They also recorded many hours of music among the Noanama, a riverside group of Indians living in stilted houses in the Choco, on the Pacific seaboard of Colombia, and the primitive Tucano, a tribe living in large communal houses, which hunts with blow pipe and poisoned arrow. To reach the Choco's habitat on the Rio Piraparana, in north-western Amazonia, the expedition made a three months' canoe journey over 800 river miles carrying the vessels and equipment over dried out river beds for three weeks and later crossing 30 rapids. Success was achieved among the Motilon Indians, near the Venezuelan frontier, a warlike people using a musical bow and a human bone flute; and on a visit to the Cuna tribe near Darien, on the Panamanian frontier, where the women wear gold nose rings and the men play pan-pipe music reminiscent of bagpipes. Mr. Brian Moser, geologist and geographer, of Chelsea, who first went out to Colombia with a Cambridge University expedition in 1959, said he found traces of gold and other minerals, particularly in the Rio Apaporis, near the Brazilian frontier.

ANTIQUES FOUND IN THE THAMES.—In dredging part of the Thames in 1961 the Thames Conservancy raised 170,000 cubic yards of mud and gravel, in which were found 24 objects of antiquarian value. An Early Iron Age sword was remarkable in that it still had the ornamental bronze chape of the scabbard remaining at the end of the blade. The chape was cleaned at the Reading Museum and can be seen now as a fine piece of artistic metalwork that is accounted one of the most superb additions to the collection. The Reading Museum has now become of national significance as a major contribution to the study of Dark Age and pre-historic metalwork. It includes 33 examples of Bronze Age metalwork, 28 Saxon-Viking spearheads, four Saxon single-edged swords or scramasaxes, five Iron Age spearheads and five Iron Age swords. The finds of 1961 owe something of their richness to much of the dredging near Day's Lock at Little Wittenham, near such ancient routes as the Icknield Way and the Ridgeway, and the Roman road from Silchester to Dorchester. The neighbourhood of Reading has from time to time enriched the collection with Saxon-Viking weapons that were probably associated with the raids of the Danes on this town. A bronze spur of the thirteenth century, dredged up near Kingston in 1932, is in almost perfect condition.

ARACHNID GALLERY.—Scorpions, spiders and mites are not everyone's favourite creatures, but they are astonishing in their structure, habits, and numbers. The new Arachnid Gallery at the Natural History Museum, South Kensington, provides a most interesting exposition of their classification and ways of life. These animals are mostly small (though the largest species of spider, the South American *Theraphosa leblondi*, is nine inches across, including the legs). They do not make satisfactory museum exhibits. So the place of actual specimens is taken by large scale models, made by Mr. David Macer Wright. In other cases the exhibit is a drawing, showing the extraordinary courtship of a pair of spiders, in which the male presents the female with a fly rolled up in a ball of silk. Spiders' webs, and the six glands with which spiders spin their different kinds of silk (those for the web, for swathing insects, for the drag-line which a spider leaves behind it as it moves) are the subjects of other exhibits. Further sections

illustrate the grotesque courtship dance of scorpions and the economic effects of mites, including the "red spider" of fruit trees. The arachnids, insects, crustaceans, &c., inhabiting soil, and the immense numbers in which some of them exist, is another theme illustrated. A square yard of forest floor is inhabited by 320,000 mites, 25 spiders, and 140 woodlice.

ARCHAEOLOGISTS' APPEAL.—An appeal was launched by the Council for British Archaeologists to raise £3,000 a year for a research programme in the Welland valley, on the borders of Northamptonshire and Lincolnshire. Archaeological sites of high importance have been revealed by air photography, and are rapidly being destroyed by gravel-digging. The increased use of air photography in archaeological surveying has shown that the gravel terraces of the major river valleys were favoured for settlement from Neolithic times onwards because of their good drainage and lighter vegetation. Many periods are represented in the Welland valley, where the monuments include Neolithic sacred sites of "henge" type, Bronze Age barrows, and settlement sites of the Iron Age and Saxon periods. Often there are no traces on the ground but, from the air, ditches, pit alignments, and even the post-holes of dwellings show up as soil marks. There has always been a serious lack of "settlement archaeology" in Britain. Modern techniques are making the excavation of such sites extremely worth while, and the Welland valley project is expected to produce information of the highest importance for most periods.

ARCHAEOLOGY BY TELEVISION.—Closed circuit television was used in archaeological excavations at the pre-historic Wilsford shaft, less than a mile from Stonehenge. Excavations reached a depth of almost 100 ft. in the 6 ft. diameter shaft in which a piece of Bronze Age rope and other relics were found. A closed circuit television camera at the bottom of the shaft and a television receiver in a hut at ground level maintained visual contact between the operators down the shaft and the team above ground. The system enabled the supervisor to make limited decisions on situations below without descending the shaft. It was also possible to take immediate photographs from the receiver screen of finds in inaccessible positions. A possible date for the shaft has been put at 1500 B.C. Marks on the walls suggest that it was dug with antler picks and bronze axes.

ASIAN HIGHWAY.—The day when it will be possible to motor from the English Channel to the China Sea has been brought a little nearer by a resolution adopted in a United Nations Economic Commission requesting aid from various countries in carrying out the Asian Highway project. The sponsors were Afghanistan, Burma, Cambodia, Ceylon, Malaya, India, Indonesia, Iran, Laos, Nepal, Pakistan, South Vietnam, Siam, and Singapore. All but 500 miles of roadway exist along the Asian Highway's projected 50,000-mile route through 12 countries from Teheran to Singapore and Saigon, with ferry connexions to Ceylon and Indonesia. The countries traversed are Iran, Afghanistan, East and West Pakistan, India, Nepal, Burma, Siam, Malaya, Laos, Cambodia and Vietnam. It is a matter first of constructing the missing links and then of bringing 400 miles of sub-standard roadway up to the minimum standard agreed upon. A technical reconnaissance survey has been carried out between Calcutta and Bangkok. It recommended that to close the existing gaps in the route as rapidly as

possible additional mechanical equipment should be provided for the Indian Government, and a pre-investment survey carried out—at a cost of \$1,700,000 (£607,000)—of bridges in East Pakistan and of the work on the highways and bridges of Burma.

ATLAS OF BRITISH PLANTS.—The completion of the 12 years' task of compiling an atlas showing the distribution of 1,600 British plants was celebrated by the Botanical Society of the British Isles in London. The project is thought to be the first occasion that maps marked with dots—representing the occurrence of a particular plant in one of the 10-kilometre squares of the Ordnance Survey—have been produced mechanically from punched cards. Most of the records came from 250 botanists, but another 1,250 contributed useful information and more than 3,000 made offers of help. The immediate result was a total of 1,500,000 individual records. The atlas is expected to be mainly useful to guide ideas on geology, height above sea level, temperature and rainfall that may limit the distribution of particular plants. A number of overlays have been prepared to enable quick comparisons to be made. The idea of the survey came from Professor A. R. Clapham, F.R.S., of Sheffield University, and the directors have been in turn Dr. S. M. Walters and Dr. F. H. Perring, working in the Department of Botany at Cambridge. The society has been supported in the project by the Nuffield Foundation, the Nature Conservancy, the British Ecological Society and the Royal Irish Academy.

BIRD MIGRATION.—The mystery of bird migration is yielding slowly to intensive modern research. Dr. David Lack, F.R.S., of Oxford, has used radar in studying the effect of weather on migration across the North Sea and out of East Anglia. Radar scanners can pick up, by night and day, any birds flying within a radius of 60 miles. With this aid he found that birds were flying in and out every month including the supposedly dead ones of midsummer and midwinter. Three main streams of migrants pass through Norfolk: an east-west stream to and from Holland and Central Europe, a north-east south-west stream to and from Scandinavia, and a north-south stream to and from northern Britain. In the autumn the direction of the wind is the most important factor affecting these North Sea migrants. Birds set out from the Continent with a following wind, or with only a light contrary wind. In winter, hard-weather movements of lapwings and skylarks are undertaken with the wind behind them, usually from the north or east, and when the wind turns round to the warmer south or west the birds return with it. In spring, the birds fly back from their British winter quarters to their breeding grounds. This may often involve them in flying through the unsettled weather associated with the arrival of warm air from the Atlantic. Further work on this interesting subject was done by Dr. Geoffrey Matthews, of the Wildfowl Trust, in experiments to Mallard caught at Slimbridge and the Severn estuary. He found that Mallards, when taken away from home and released, always start off by flying north-west. He checked their flight direction at night by fixing lighted rings to their legs. By playing about with the birds' time sense, so that they thought the time was 6 or 12 hours earlier or later than it actually was, Dr. Matthews showed that they were orienting themselves either by the sun or the stars. Cloudy weather had them fuddled and scattering at random. Bright moonlight confused them by making the stars harder to

sec. If no stars could be seen the Mallard orientated themselves by the moon.

BIRDS OBSERVED BY RADAR.—Mr. E. Eastwood, in a discourse at the Royal Institution, said that radar had reversed the situation where ornithologists knew more about orientation than navigation. Now they knew more about navigation than orientation. A by-product of the war had been radar observation of bird movements. At Bushy Hill Experimental Radar Station a Marconi research department studied birds. "Pin-points" or "angels" on the radar screen were a potential hazard in observations of military and civil aircraft, and so their flow patterns were studied. It had been found that all birds are angels; all angels are not birds. About eight birds in flight appear as an angel. More birds fly by night than by day. Birds could reach 70 knots with a following wind. In autumn he tracked a predominantly south-west immigration of winter visitors from northern Europe, coasting along Belgium. They crossed the North Sea and English Channel from headlands, and penetrated inland immediately on arrival. In hard weather, commuters cross over to France. The main direction of movement is reversed in the spring. In his work on starling roosts he saw "ring angels" at sunrise. Sometimes as many as 18 rings, with periodicity about three minutes, radiated on his screen. At sunset angels converged on the same points. By correlating field and radar observations he proved that the rings were caused by thousands of starlings dispersing from roosts.

BRILLE WRITING MACHINE.—A Braille writing machine which simplifies the process of writing in Braille was developed by the Royal National Institute for the Blind. Unlike previous machines, it makes use of both sides of the paper. For the deaf-blind, an optional extra is an end-of-line warning which gives a sensory indication instead of the normal bell.

BRAIN INJECTIONS.—By injecting the brains of animals with ordinary bodily substances, scientists have found that they can produce symptoms exactly like those of many mental illnesses. For centuries men have been puzzled by the distressing distortions of posture, movement, habits and moods in patients with severe mental illness. Comparisons were made with the effect of certain poisons. But there was one stumbling block—the "blood-brain barrier", which prevents drugs or natural substances injected into the body from passing easily into the brain. In recent years, workers at the National Institute for Medical Research have developed methods of introducing substances directly into the brain, and have thus opened up this whole field of investigation. Their studies have not only thrown light on the normal function of different parts of the brain, but have also shown that transient symptoms similar to those of certain mental illnesses or of epilepsy can be observed in animals when various substances which are produced naturally in the body gain access to the brain in sufficient concentrations. One of the most striking facts revealed was that the symptoms produced by injection of a substance into the brain were often quite different from those produced by injection into the body or given by mouth.

BREATHING SET FOR MINES.—A breathing apparatus that will allow rescue teams in mines to work more actively was developed by the Safety in Mines Research Establishment, Sheffield. All forms of breathing equipment in use in mines have the disadvantage that, after being worn

for a time, they supply air at a higher temperature than the surroundings—which in a mine may be uncomfortably hot and humid. The new equipment uses a slow release of liquid oxygen to top up recycled air, and provides air that is dry and cooler than the surroundings. A further advantage claimed is that the pressure to be overcome in breathing is only about a third as much as in the better of two British types. Resistance to breathing has been found to lessen the rate at which a man will work. The breathing machine is worked by two pumps. One blows in artificial "exhaled air"; the other "inhales" the fresh air that the breathing apparatus supplies. Tests in Belgium were carried out in a chamber at a temperature of 102°F, accompanied by uncomfortably high humidity, and the subjects, using the new equipment, were able to walk at a modest pace for two hours. The equipment has been named Simbal (short for safety in mines breathing apparatus, liquid). Fully charged with oxygen, it weighs 33 lb. It is carried on the back like a small rucksack.

BRITISH ASSOCIATION.—The British Association for the Advancement of Science held its 124th annual meeting at Manchester on August 29-September 5, under the presidency of Sir John Cockcroft, O.M., F.R.S., Master of Churchill College, Cambridge.

The subject of his presidential address was "Investment in Science". Although we could be excited by the prospects of landing on the Moon or Mars and collecting scientific information about their terrain and atmospheres and any evidence of life, he said there is no doubt that these ventures are being undertaken mainly for prestige reasons and as an instrument of power politics. So far we had been fortunate in not being tempted to enter the field of space travel as distinct from space research. The United States was spending between two and three billion dollars a year on the programme of landing a man on the Moon, and the Russians were probably spending an equivalent sum. He thought such ventures may seriously distort the pattern of scientific development through the diversion of large numbers of engineers and scientists to these objectives. When we remembered the statement by Paul Hoffman, director of the United Nations Special Fund, that a contribution of two billion dollars a year to under-developed countries was required to increase the *per capita* income of those countries by 25 per cent in a decade we must sadly conclude that world priorities have gone badly wrong. The United States National Science Foundation predicted that in their country investment in basic research in the universities alone would increase from 900 million dollars this year to 2,700 million dollars in 1970. If we wished to maintain our position in the highly technological world we needed not only to double the proportion of our gross national product (now about 0.2 per cent) devoted to basic research during the next decade, but to devote much greater applied research effort to the development of new products and new industries and less in maintaining the position we held in the past. The development of bombs which could destroy by heat alone everything within a radius of 20 to 30 miles below the point of burst had carried the world still farther along the road to destruction. The dangers are so obvious that scientists and professional people who have special knowledge should make whatever contributions they can to solve the technical problems of the controlled and complete disarmament which was now the declared objective of the United States, Russia, and the British Commonwealth. We must realize that the difficulties in achieving dis-

armament are political and not technological, and, if there was a real will by all major powers to disarm, it could be achieved, releasing enormous resources for diversion to urgent needs of our own country and less fortunate countries. The study of elementary particles was likely to continue in the forefront of physics for several decades, and there was good reason for maintaining our present heavy investment in this branch of science. The combined efforts of the radio and optical astronomers had within the past two years identified a far distant galaxy whose light and radio waves have taken between five and six billion years to reach us. There was evidently still scope to reach farther out into the boundaries of the universe. Optical astronomers were also moving out into space to avoid the interference to their measurements by the absorption of ultra-violet and X-rays in the atmosphere, so there would soon be an 8 in. diameter telescope circling the Moon, and later a 50 in. diameter telescope circling the earth in a 24-hour orbit, stabilized to a second or so of arc and transmitting information back to earthbound astronomers by telemetric signals. Astronomy, reckoning its budgets in thousands a year, had now combined with space science to rival nuclear physics, with budgets in this country soon likely to approach £5m. a year, and like nuclear physics driven by economic necessity to collaboration with the United States and western Europe. While pure basic research provided the essential pool of knowledge from which practical developments followed, objective basic research, searching for applications of new knowledge and followed by applied research devoted to a specific project were among the principal promoters of economic growth today. So investment in such research should be regarded as of comparable importance to investment in plant and buildings. One of the important problems facing us today was whether the organization of applied research could be improved, and, in particular, whether Government help to industrial research could be improved in effectiveness. We had a good deal to learn from American organizations which had a consistent record of success in developing new products by objective basic research and applied research.

The presidents of sections and the subjects of their addresses were—Mathematics and Physics, Sir Basil Schonland, F.R.S., "Lightning and the long spark"; Chemistry, Prof. R. D. Haworth, F.R.S., "Chemistry of the tannins"; Geology, Prof. F. W. Shotton, F.R.S., "Britain in the Pleistocene period"; Zoology, Prof. O. E. Lowenstam, F.R.S., "The study of sensory function"; Geography, Mr. L. P. Kirwan, "Nubia: an African frontier region"; Economics, Mr. W. B. Reddaway, "Undeveloped countries"; Engineering, Prof. D. G. Christoperson, F.R.S., "Exploitation of engineering research"; Anthropology, Mr. Adrian Digby, "Material culture of primitive peoples"; Physiology and Biochemistry, Prof. R. A. Morton, F.R.S., "Lipid co-factors in biochemistry"; Psychology, Mr. D. McMahon, "Identification and use of talent"; Botany, Prof. W. O. James, F.R.S., "Plant respiration and microstructure of plant cells"; Forestry, Mr. M. V. Edwards, "Modern British forestry"; Education, Mr. Percy Wilson, "Unity of knowledge"; Agriculture, Earl De La Warr, P.C., "Science and hunger."

The annual meeting will be held in Aberdeen from August 28 to September 4, 1963, under the presidency of Sir Eric Ashby, Master of Clare College, Cambridge, the distinguished botanist. The annual meeting in 1964 will be held at Southampton.

BRONZE AGE POTTERY.—Mr. D. L. Clarke, of Peterhouse, Cambridge, has brought the British Bronze Age within the scope of the electronic "brain" by making use of the matrix analysis technique. The subject involved is Bronze Age pottery, particularly that of the Beaker Folk, who came from the continental coast between Calais and the Elbe. Their main impact (about 2000–1500 B.C.) was on the southern and eastern British coasts, as far north as Aberdeen. The main concentrations of Beaker finds are in Wiltshire, the Fenland, the Yorkshire Wolds and the Aberdeen area. The matrix method is a form of multi-factorial analysis, used to survey all the many traits which make up the character of the pots, and sort them into the recurrent groupings of ceramic types. The computer can perform the mathematical feats involved in a few minutes: to work them out by hand might take months or years. The electronic brain will sort all information fed into it, whether the archaeologist regards it as important or not, and will reject the traits which are numerically insignificant for a whole series of pots. Turned upon an entire culture, it can digest the various aspects of it at once—pottery types, flint implements, metal objects, house types, burial practices and the rest—and produce a diagram summarizing the cultural entity. Mr. Clarke's work supports the view that the long-necked beaker is a specifically British type, an initial phase of widespread settlement, on which a provincialism became superimposed, as various groups became geographically isolated.

BYRD STATION IN ANTARCTICA.—The American New Byrd Station (named after the late Admiral Richard Byrd) has been completed in the Antarctic 5,000 ft. high on the ice-cap and 600 miles from the South Pole. This base replaces the old one about six miles away, which has been crushed under five years' accumulation of ice and snow. There, the roofs had to be shored up, even steel girders were twisted and bent, while erosion from waste water also contributed to the dangerous condition of the station.

Branching out from one main tunnel of the Byrd Station beneath the snow, are seven others, all up to 33 ft. deep and up to 36 ft. wide. They are roofed with sections of curved corrugated steel, covered with snow, and where necessary, lined and partitioned to become living quarters, offices, laboratories, workshops, and recreational rooms. Above the snow there will be an aurora-dome building, a balloon-release building, and a radar tracking station. By 1965, it is hoped to have a nuclear power plant in operation generating electricity. The new base was built six miles away from the old one in order to secure uncontaminated snow needed for tunnel construction. The key equipment in these tunneling operations was the "Snowmilers," two trench cutting machines made in Switzerland. Two revolving drums open a swathe from 4 ft. deep to 9 ft. wide, carry the removed snow upwards and outwards through two chutes, and from a distance the whole procedure looks like an erupting geyser. The scientific research carried on there will yield aid to the United States space programme, weather forecasting for the Southern Hemisphere, and to the better understanding of earthquakes.

CAMBRIDGE: EARLIER ORIGIN.—Archaeologists have thought that the origins of Cambridge date back to about 70 A.D., but excavations on a 25-acre market garden site in the city have uncovered the remains of a 2000-year-old Belgic village. Dr. John Alexander, who led the work, stated that in addition to the Belgic remains a town street and

ditches of the Roman period (first to fourth century A.D.) had been discovered, with pottery, coins, and brooches. Even more interesting was the finding of circular enclosures and pits of late Saxon date. This is the first time that undisturbed Saxon remains have been discovered in Cambridge.

CENTIGRADE SCALE ADOPTED.—From Monday, January 15, 1962, temperatures in weather reports and forecasts issued by the Meteorological Office, and broadcast on radio and television, were expressed in the Centigrade Scale. The Air Ministry stated that for the time being both Fahrenheit and Centigrade Scales would be used, but that as the public became accustomed to Centigrade it would be given more prominence and the Fahrenheit scale would be dropped. Centigrade was adopted by the Meteorological Office on January 1, 1961, for their own internal and international work. In common with scientists at home and abroad they call it Celsius, the name adopted by international agreement. The change-over was opposed in certain quarters, but the Air Ministry said that it was made after consultation with the British Association for the Advancement of Science, the Medical Research Council, the Agricultural Research Council, the Institution of Civil Engineers, the Institution of Electrical Engineers and the Central Electricity Generating Board.

CHANNEL BRIDGE OR TUNNEL.—No definite decision has been made on the proposals for a Channel tunnel or a Channel bridge. Meanwhile a survey of the Channel sea bed has been made by the ship *Ivanhoe* on the line of the proposed tunnel, between the cliffs of Dover and the flat French shore at Sangatte. Its object is to discover the nature of the sea bed and what the engineers would have to cope with in excavating a trench in which the tubular sections of the tunnel would be buried. Richard Costain Ltd. envisage a tunnel on the immersed tube principle, which, in America, has successfully stood the test of experience. Not in any part of the world has a tunnel been built by the immersed tube method that is near as long as the Channel tunnel would be. Three lines were surveyed—the main, or central line and one on each side of it at a distance of 150 ft., a method which allows for adjustments in the tunnel line if wrecks are met with on the sea bed. A two-range Decca survey system was used along the route. It comprised two 100 ft. transmitting masts, one north of Dover on the cliff top and the other near Dungeness. A receiver in the *Ivanhoe* converted the continuous emanations from these transmitters into two ranges that are plotted on to a prepared sheet for giving an accurate position. Information from the receiver was fed into a track plotter on the paper of which the tunnel route is drawn. A Kelvin Hughes hydrographic echo sounder was used for the sounding profile and it is claimed that a continuous record of depths accurate to within three inches can be obtained. Another device was a hydroprod, familiarly known as a "thumper". When towed astern in a glass fibre dinghy it transmits a powerful sound impulse which penetrates the sub-surface strata of the sea bed, the return echo recording the depths of the different layers of sea bed material. A magnetometer recorded magnetic fields and, towed astern over the route, indicated steel wrecks or obstructions.

Details of the scheme for a cross-Channel bridge, 21 miles long and costing £210m., were given by M. Jules Moch, former Prime Minister of France, and now chairman of the Channel Bridge Survey Company. M. Moch stated that the project would provide six roadways, two emergency lanes

for road traffic, and two railway tracks. It would be a steel structure 118 ft. wide, 230 ft. above the sea, and would rest on 164 concrete piers. It would take six years to complete. The company had successfully tried wind deflectors in a wind tunnel. If the wind were blowing at 100 m.p.h. outside the bridge it would be reduced to only 20 m.p.h. on the bridge. The bridge would be equipped with radar and other apparatus which would enable ships to locate it easily. The approaches to the bridge in England and France are located on cliffs 230 ft. high. This is exactly the free height required for the highest spans. The bridge would therefore be horizontal without any gradient. Automobiles and trains would travel 21 miles in a straight line without any uphill or downhill slope. It is calculated that traffic on the bridge could reach 6,000 vehicles an hour. Crossing the bridge would take less than half an hour. French Channel beaches would be less than three hours by road from London, with Paris and Brussels reached in five hours.

COAL DEEPLY BURIED.—Coalmining in Kentucky has produced the largest mobile land machine ever built—a stripping shovel the height of a 20-storey building, that can in one bite dig out 200 tons of the soil and rock overlying the coal seams. Only with a machine of this size that removes more than 100,000 cubic yards a day can the deeply buried coal be worked economically. The shovel started work at the Sinclair mine of Peabody Coal Company, St. Louis. It took 11 months to erect. Its working weight of more than 18 million pounds is carried on eight caterpillar tracks. The machine is controlled by one man using two hand levers and two foot pedals. Working in his cab five storeys above ground level, the operator can extend the shovel to a reach of 460 ft. Each load of 200 tons can be accelerated from still to 25 m.p.h. in eight seconds, and decelerated from top speed to stop in four seconds. To work with the new shovel Peabody Coal Company has bought two rotary drills, which drill 15 in. holes for explosive charges that blast the rock and soil loose for the shovel to dig. The rate of drilling is 150 feet of rock in 15 minutes.

CHRISTIAN HOUSEHOLD OF 4TH CENTURY.—A fourth century site of Roman occupation at Shaken Oak Farm, between Wilcote and North Leigh, Oxfordshire, was excavated by Mr. Conant Brodribb and Dr. A. Hands, archaeologists, who found there evidence that a Christian household may have been slaughtered by invaders or marauders. They uncovered several skeletons, all lying with their feet to the east in the Christian manner. There were three almost intact, and the legs of another, all lying flat on their backs. There was no other sign of Christianity on the site, as there was at Lullingstone in Kent, nor had the bodies been buried, though they seem to have been deliberately laid out. The presence of plaster and slates in and among the skeletons indicated that the building had collapsed. The date of the building was given as about A.D. 400, and it was on the site of a smaller house dating from the earliest, A.D. 150. An important find was a small bronze bull's head in Celtic style, 2½ in. high, found in association with a coin of Arcadius—an emperor (374-403) of the Eastern Empire—in a flue of a stone channelled heating system.

CONTINENTAL DRIFT.—A new theory of the drifting of continents on the surface of the earth during the last 200 m. years was put forward by Professor Keith Runcorn, of Durham University.

His starting point is that over long periods of time the outer rock layers of the earth may be considered to be floating more or less at equilibrium on the basal rocks of the mantle of the earth. The present tendency for Scandinavia to rise out of the northern seas is a consequence of the comparatively recent (within 10,000 years) disappearance of an ice-sheet, whose effect would have been to depress the region further into the basal rocks. The novelty in the new theory is to assume that great upwelling movements of material also take place within the substance of the earth as liquids move about in vessels heated unevenly from below. Professor Runcorn argues that these upwelling currents are a necessary feature of an earth in which the capacity of rocks for conducting heat is not great enough to provide a stable connection between the hot and deep interior of the earth and the cooler rocks of the outer mantle. The drift of the continents in the last 200 m. years is connected with a change in that interval from one pattern of convection to another. The positions of the continents in antiquity are inferred from measurements of the magnetism of rocks collected from different places. By this test Australia used to be at the South Pole and has drifted by 6,000 km in the last 250 m. years. In 200 m. years America has moved westward from Europe by 2000 km (half the distance across the Atlantic), while India has moved northwards by 6,000 km in the last 150 m. years. His theory provides an understanding of geological mountain building, and of certain anomalies in the uniformity of gravitational forces over the surface of the earth as in the ocean deep off the East Indies. It also accounts for the change from one pattern of convection to another 200 m. years ago. This springs from an argument about the nature of the molten core of the earth which is thought to consist of molten iron. Convection within the body of the earth is suggested as one means by which iron might be concentrated at the centre of the earth, in preference to the less dense siliceous materials.

COOKING STEAK WITHOUT HEAT.—Dr. Willard F. Libby, director of the University of California's Institute of Geophysics and Planetary Physics, announced the result of his experiments in cooking steak without heat under intense pressure. Explaining extremely high pressures on various materials, he said that the results indicated that at even higher pressure a new form of fast chemical reaction could occur.

In the case of the steak, it had been subjected at room temperature to a pressure of 10,000 atmospheres, or 147,000 lb. a square inch in an hydraulic press. In 10 minutes it had become like a cooked steak, and, although cold, it was completely free of bacteria and was as tasty as cold cooked steak. The technique pointed the way to achieving high-speed chemical reactions.

COOL BREEZES FOR STEELMEN.—Stepping on and off a stool in a hot room padded with electric blankets, two Oxford scientists, Dr. Hellon and Mr. G. W. Crockford, in an experiment to improve the output in the steel industry, tried out a suit that allows cooling breezes over the body, including the soles of the feet. The suit, and the special boots used are plugged into a compressed air system and would be worn by men at work on hot open-hearth furnaces. Bricklayers at Port Talbot feared for their health if they switched from work on hot to cold furnaces without baving time to cool themselves. One man said he had scorched clothing to show the intense heat in which they sometimes work. The room where the scientists experimented has a radiant

temperature of 160°C to simulate the heat of a furnace. They stepped 12 times a minute on and off a foot-high stool. After 25 minutes they had a five minutes' break before resuming. Without protective clothing they would have been able to do the test for only two or three minutes at a time. The suit is of porous material; foam plastic is sandwiched between two layers of fabric. Before the air inside grows too hot it percolates through the material and is replaced.

CREATURE NEITHER MAN NOR APE.—Dr. Louis Leakey, the British anthropologist, disclosed at a conference in Washington that he had found remains about 14 million years old of a creature which fills one more of the important and major gaps in our study of human evolution. The creature, which was like neither present-day man nor like an ape, was discovered on a fruit farm at Fort Ternan, about 40 miles west of Kisumu in Kenya on the shores of Lake Victoria. Two halves of the jaw and one lower tooth of the creature, which he nick-named "The Treasure", have been found in fossil soil between two layers of volcanic rock. Scientists at the University of California, using the potassium-argon process, certified the rock as being about 14 million years old. Dr. Leakey was reticent about the exact relationship between the creature now discovered and man. A significant feature about it was the small canine tooth, which, as in man, did not project more than a fraction below the level of its other teeth. Its lower molar was low-crowned, and thus structurally more like the molars of man than of apes, and it also had a depression on the cheek bone below the eye—"the kind of hollow found in man but never in apes." It was not a man but something heading very strongly in that direction; it was closer to a hominid, which strain eventually became man, than a pongid, the strain of apes. He did not agree with those who described the latest find as even more important than the Zinjanthropus, the earliest tool-making man. He had no doubt that it was in Central Africa that man was born.

DARWIN'S ORIGINAL IDEAS. The view that Darwin, writing his autobiography at the age of 67, had given a misleading account of the origins of his ideas on evolution and natural selection was developed by Sir Gavin de Beer, F.R.S., director of the British Museum (Natural History) in the Wilkins lecture of the Royal Society. Study of manuscripts written shortly before and after the return of H.M.S. Beagle, showed that Darwin's first scheme for evolution was based on three premises—none of them natural selection—and that he changed his opinion on each. His three original premises were that variation resulted inevitably and exclusively from sexual reproduction, that it was quashed by interbreeding, but that isolated pairs could produce varieties that were incipient new species. The last of these premises he later reversed completely, realizing that large populations provided the greatest scope for variation. Before October 2, 1838, when he closed a notebook, he had written that variations that were "slightly favoured will get the upper hand"—which is the basis of evolution by natural selection. On October 3—the day after closing the notebook—he began to read Malthus's *Essay on Population* and "saw at once how to apply this principle". The idea and its relevance to evolution were his own.

DEAF CHILDREN LEARN TO SPEAK.—Research in the last few years with deaf children has led to an increase in their speech and understanding com-

parable to that of normal children, said Lady Ewing, speaking to the British Association. Both Lady Ewing and her husband, Professor Sir Alexander Ewing, who also gave a paper, are concerned with deaf children. Research on the brain mechanisms of hearing and speech has shown much more clearly the needs of babies who suffer from brain injuries during or soon after birth. In a research group of 72 very young children some have been able to acquire near normal quality of voice and articulation. Part of the new method is the use of powerful hearing aids which enable children who would never otherwise have done so, to hear their own voices. All except 11 of the children, who at their first test could not hear any sound, now listen with pleasure to singing and to certain musical toys. Most of the work with these severely handicapped children is being done in the children's own homes and parents are being encouraged to admit that they have a handicapped child, and to learn special skills and to devote extra time to the care of their deaf child.

DIAMONDS CUT BY LIGHT.—The General Electric Company of New York successfully drilled holes in industrial diamonds with a high energy beam of light. The operation was conducted by means of a ruby optical maser, which, the company believes, as a result of its experiments at its laboratory in Schenectady, is capable of drilling through any material known to man. The surface of the diamond exposed to the high energy light vaporized instantaneously, and a hole 0.02 in. in diameter was cut in a diamond 0.25 in. in diameter in 0.0002 seconds. The impact of the light on the diamond had the appearance and sound of an explosion. The heat generated by the light must be much greater than 3,500°C, since that is the heat at which a diamond evaporates. Analysis of the diamonds after drilling did not reveal any structural damage as a result of the experiments.

DIVER'S PENNY-SIZE TELEPHONE.—An underwater telephone about the size of a penny was developed by the Admiralty Experimental Diving Unit for use in diving apparatus. The telephone, based on the bone-conductor type of deaf aid, works by transmitting and receiving vibrations in the bones of the head caused by speech. The transmitter-receiver can be worn inside the swimmer's rubber hood, where it is kept firmly pressed against his forehead or behind his ear.

DOVER CASTLE NOT OF SAXON ORIGIN.—Excavations at Dover Castle have disproved the belief that the earthworks around the portion on which stands the church of St. Mary-In-Castro were of Saxon origin. A Ministry of Works announcement said: that the Saxon Earthworks had been the name given to them ever since it was first concluded that here was the spot on which King Harold—the last of the Saxon kings—carried out his obligation to William of Normandy to provide an effective defence position at Dover. Not only had the excavation revealed Iron Age settlement under that part of the castle but had established that the subsequent build-up of the earthworks is of an era following the Saxon period. Harold's activities had nothing to do with the Saxon earthworks. The Ministry's archaeological team, led by Mr. Martin Bidde, found at the lowest level, in otherwise undisturbed soil, pits, a gully and floor levels from which fragments of iron age pottery of the first centuries B.C. and A.D. were recovered. In the latest of the iron age levels were fragments of Roman tiles. These, it is assumed, were remnants of the material used to build the Pharos—the Roman lighthouse close by

the Saxon church—and their position indicates that the lighthouse was probably built in the First Century A.D. Between the Iron Age levels and the earliest evidence of an earthen rampart was the most unexpected find—a burial ground. As the 13 graves uncovered are orientated west-east, it is presumed to have been a Christian cemetery associated with the Saxon church which stands 100 ft. to the north. Traces of the coffins and scraps of early medieval pottery in the graves, show that the burials were of the Saxon period or slightly later.

EARTHQUAKE IN PERSIA.—An earthquake devastated North-western Persia on the night of September 1. Whole villages were destroyed in what was described as Persia's worst disaster of the century. The area affected covers 13,600 square miles, about one-quarter of the size of England and Wales. The main tremor occurred at 7.20 p.m. G.M.T. and shocks were felt throughout the night. The heaviest shock was in an area bounded by Hamadan, Qazvin, and Saveh. The shock was also felt south of Teheran at Kashan, north on the Caspian coast, and in Azerbaijan. At least 4,500 were killed in two villages alone. Teheran Radio said 3,000 perished in Daresfahan, a village of 4,000 inhabitants near Qazvin, and 1,500 people died at Avaj between Qazvin and Hamadan. The number of dead and injured was put at 20,000. Some villages look as if they have been ploughed over by gigantic tractors. Around Saveh 15 flourishing villages almost completely disappeared and mass burials were arranged to prevent the outbreak of epidemics. Altogether more than 100 villages were totally destroyed with a majority of the population killed or injured. Severe shocks hit the entire route of the Trans-Iranian railway, with the exception of the north-eastern province of Khurasan and the oil-rich province of Khuzistan in the south-west. Rail services from Teheran to the earthquake areas were halted while lines were checked for damage. A series of earthquakes in the last five years has killed or injured 7,000 Persians. In 1957 3,000 were killed in two earthquakes, in July and December. An earthquake in south Persia in April, 1960, killed or injured 3,500. Earlier tremors included one in the Shahrud area near the Caspian Sea in February, 1953, in which 1,000 died.

ELECTRIC INHALER OF DUST.—With the help of a machine that inhales air through its mouth, more may be learned about the causes of late summer asthma. The machine is on the roof of the National Museum of Wales, Cardiff. Its object is to catch spores—tiny reproductive particles released into the atmosphere by plants. Hay fever is caused by people inhaling plant particles says Mr. H. A. Hyde, Keeper of Botany at the museum. Asthma is also due in some cases to inhaling plant dust. For a long time the particles were trapped on an ordinary glass slide, coated with adhesive and placed under a shelter. The new machine enables a more complete bag of spores to be caught and noted with greater accuracy. In particular it has revealed more about fungus spores in the atmosphere. An electrically driven pump sucks air into the machine and the spores that come with it are trapped on a plate behind its mouth. Once the most abundant kind has been identified the aim would be to produce an extract. One suggestion is that the source plant might be cultivated as mushrooms and moulds are.

ELECTRONIC BRAIN.—An electronic brain, smaller than a man's head, and said to be capable of working many times faster than other computers, was designed in the Cambridge University mathe-

mathematical laboratory by Mr. Neil Wiseman, chief engineer. The machine can produce 500 million basic decisions in a second. It may replace machines that occupy as much space as a large living-room. Most existing computers, he states, take longer to sort out the necessary data about weather than it takes the weather to arrive. There are many problems in industry and other fields that could be fed into this machine and answered. The answers may take a year or more to reach. Today some computers cost over £2m. This smaller type will reduce the cost considerably. It could be used for air traffic control, road and rail traffic, and the translation of languages. The first problem, he said, that could be answered with the use of computers is the rail traffic. In America there are several thousand computers. In this country there is only a small number. The machine functions by means of devices called tunnel diodes, which replace valves and transistors.

ELEPHANT HOUSE AT THE ZOO.—The Zoological Society issued details of the new elephant house to be built at the London Zoo as part of the long-term replanning and rebuilding programme. It is to occupy the site of the antelope-house in the main gardens, and work on it will begin when the antelopes have been moved to new quarters now on the canal bank. The architects for the elephant house are Sir Hugh Casson, Neville Conder and Partners, who have designed a building in a group of trees, with a cluster of funnel-shaped roof lights sheathed in copper and composed of linked circular pavilions surrounding a public arena. The building will house four elephants and four rhinoceroses in paired pens, each with access to tick-bay pens and to moated outside paddocks. There will be a washing-pool visible to the public.

FOOD FOR THE HUNGRY NOT ENOUGH.—Lord De La Warr, in an address on "Science and Hunger," to the British Association, said that Western food surpluses could not make any effective contribution to relieving food shortages in underdeveloped areas. Surplus dried milk or any other commodity might build up the strength of a community while it was learning to look after its own cows or after some period of crisis, but to leave an area dependent on surpluses, especially when we knew that the moment we needed them ourselves we should cut off the supply, was nearer to an act of cynicism than to genuine charity. When the crumbs cease to fall from the rich man's table, the beneficiaries are not only as hungry, but as helpless, as they were before. There was only one sure foundation for the life of communities and that was the ability to support themselves. We could give them ability by training schemes, by technical advice, and by buying the underdeveloped countries' products to build up their standard of wealth.

GILBERTINE PRIORY DISCOVERIES.—A trial excavation on the site of the Gilbertine Priory at Haverholme, near Sleaford, was completed. For many years stonework and tiles have been turned up by the plough, and deep ploughing has brought increasing quantities to the surface. The excavation showed that ploughing was progressively destroying walls and floor levels, but these had in many cases been extensively robbed, presumably at the Dissolution, of all stonework with a reuse value. The finds included great quantities of pottery, from the thirteenth to the sixteenth century, two coins of the fourteenth century, carbonized grain and fruit stones, and an ornamented bone pin. The Gilbertine Order was purely English, and was founded about 1139 by Gilbert, rector of Sempringham and

Terrington, in answer to the desire of seven maidens of Sempringham to lead a strictly religious life. The monastic revival of the twelfth century led to a rapid expansion of the order, and chaplains became necessary. Any necessary business between the nuns and the canons could only be done at a window, and even Mass was sung with a wall interposed between them. The nuns could talk with their parents or others, in the presence of witnesses, at a window "as long as a finger and as broad as a thumb and bound with iron". Although there were 26 Gilbertine foundations in England, few traces of the buildings now remain. The only previous excavation, at Watton Priory, Yorkshire, between 1893 and 1895, provided information about structural details, but left much unsolved.

HIPPOPOTAMUS TRANQUILLIZED.—Fifi, a savage hippopotamus at Whipsnade, became sweet-tempered after a course of tranquillizers. She was not only pregnant but hysterical and violently aggressive, charged her keeper at every opportunity, was aggressive to her mate, Neville, and nearly wrecked her accommodation in distress when he was taken away from her. When he returned she attacked him so violently that he became paralysed and died. At this stage the tranquillization of Fifi became a necessity. It was a large-scale psychiatric and obstetric emergency, in more ways than one. Nobody could approach Fifi to give her an ordinary injection and projectile syringes were excluded because of the noise of the gun. Oral administration was the only way. Fifi weighed 5,000 lb., so a daily dose about 50 times the strength of a human dose was given. The powdered drug, promazine hydrochloride, was mixed with Fifi's evening meal. She readily ate up her medicated suppers, and the immediate effect was that she allowed Neville's body to be removed without protest. The birth of her infant brought on more aggression, but an increase in the dose of promazine hydrochloride counteracted this, and she reared her calf without becoming noticeably jumpy. The happy ending of the story was that Fifi's entry into the outside paddock was uneventful, and she and her infant took to the water quite quietly.

HISTORY OF SCIENCE.—The University of London established a chair of the history of science and technology tenable at the Imperial College of Science and Technology. There is no exactly similar chair in any British university, though there are chairs in the history and philosophy of science. This new chair is regarded at the Imperial College in South Kensington as a step forward in their own attack on the problem of broadening the education of scientists and technologists and preventing excessive specialization. The aim will be to teach scientists and engineers, rather than students of history, to become familiar with the background of major discoveries and inventions. The department will provide post-graduate courses, both full-time and part-time.

IGUANODON WAS TWO DINOSAURS.—British Museum experts have admitted that two "comparatively small" dinosaurs strolling together 100 million years ago deluded them into believing the footprints left were those of a single and much bigger creature—an iguanodon. When found stretching 26 ft. across a quarry floor at Langton Matravers, Dorset, the prints were hailed as the longest and finest set of iguanodon prints ever uncovered in Britain. But Dr. Alan Charig, curator of fossil reptiles at the Museum, said that in another

part of the quarry there had been discovered what they thought were the same two lines of prints emerging from a wall of rock farther on. They were diverging at a quite considerable angle. After more thorough investigation they were now satisfied that the prints were made by two smaller type of dinosaur. Quarrymen in the district who had found other similar prints had noted that they were always going westwards—as were the latest finds. That supported a theory that the Purbeckes were a barren area across which the creatures were migrating to better feeding grounds.

INTERNATIONAL WORLD MAP.—Geographers from 38 western and neutral countries assembled at Bonn for a United Nations conference on an international world map on the scale of one to one million. The purpose of the conference was to modernize the basic cartographical principles for a world series of maps laid down at international conferences between 1909 and 1913. The series is intended to provide the basic information which other more detailed maps can supplement. The original scheme foresaw 2,000 sheets at the scale of 16 miles to the inch covering the whole world. Only 700 have been completed, and many of these are now out-dated by the developments in the political, economic, and communications fields since the First World War. Among the chief matters agreed were sheet standardization (making suitable allowances for frontiers and islands), universal markings for places, roads and railways, and adoption markings for oil pipelines and power transmission lines. The British delegation, led by Mr. W. D. C. Wiggins, deputy head of overseas surveys of the Department of Technical Co-operation, fell into line with a widely supported proposal made by the French to adopt for the world map the continental relief system, measured in metres.

INVISIBLE AURORA.—Further information about normally invisible auroral displays south of the Arctic Circle was given by the National Bureau of Standards in the United States. New kinds of auroral display were discovered unexpectedly during the International Geophysical Year. They differ markedly from the more familiar displays by consisting of light of a single pure colour in the red region of the spectrum. This colour is associated with an electrically ionised form of oxygen atoms, and it is supposed that such atoms in the high atmosphere are the immediate source of the light. It is not visible to the human eye, mainly because it is comparatively faint and it occurs in a region of the spectrum in which the human eye is not particularly sensitive. Another feature of these displays is that they do not flicker off and on as do the visible Northern Lights. The red aurora appear to form much broader bands (up to several hundreds of miles across) round the earth, and it is surmised that they form continuous belts.

ISLAND REDISCOVERED.—The island of Menuthias, mentioned in the oldest sailing guide to the East African coast, was identified as the Tanganyikan island of Mafia, 15 miles out in the Indian Ocean. The waters off Mafia are believed to be one of the world's largest and finest unexplored game fishing grounds. Historians have had doubts about the location of Menuthias, but Mr. Swai, Minister of Commerce and Industry in Tanganyika, suggests that the island, where tourists came from the Mediterranean area 1,400 years before America was discovered, must be Mafia. From being called Menuthias 2,000 years ago, it came to be called, 300 or 400 years ago, Menfin: it is now Mafia.

JAPANESE MONKEY SOCIETY.—A few years ago a study group was formed at Kyoto University for research into the habits of the Primates, and a start was made with the only Japanese monkey, the red-faced species of macaque. A troop was induced by sweet potatoes and barley to concentrate in one place, from which observation was easy. Mr. Itani Jun'ichiro reports that the method was then applied to other troops, and that a highly organized society was revealed, the most remarkable feature of which was its firm and peacefully enforced social structure. At the centre is the leading male, with a few other leaders, and all the females and infants. Round this is a ring of sub-leaders, and outside that a periphery of males of still lower status. As between one male and another there is a complete chain of superiority and inferiority, so that the observers of one troop were able to place thirty individual males in their correct order of superiority. In that troop the leader class had six members, the sub-leader class ten, and the periphery males class twenty-eight. This chain of superiority is not based on physical strength alone, or perhaps not even mainly on strength. Mr. Jun'ichiro records that the number-one leader of the troop principally observed, a very eminent monkey he calls Jupiter was in his last years physically feeble, but retained the leadership for some reason other than the strength of his teeth and arms. When he died he was succeeded, without fuss, by the troop's second leader. In this Japanese monkey society relative personal superiority is acknowledged and enforced without fighting. If an orange is rolled between two males the dominant male will pick it up and the other will make no attempt to snatch it. If by mistake an inferior male, in the presence of his superior, takes an orange, he, as it were, apologizes by making a gesture of submission. Moreover, relative social position can be reversed, by the transference of this ceremony from one male to the other, without anger or recrimination.

LOCUST LEARNING.—In a symposium of zoologists at the British Association it was stated that a species (human beings) which can only tell the way the wind is blowing by wetting an index finger and holding it up to air must necessarily covet the tiny hairs on the top of a locust's head which arithmetically provide an indication of the creature's air speed. Locusts have been investigated with special care because of their economic importance as pests in tropical countries, said the director of the anti-locust research centre, Dr. P. T. Haskell. Female locusts find their way to the males—who sing to announce their presence—by means of auditory organs on each side of the body which automatically regulate the activity of leg muscles. The result is that a female locust will be inevitably impelled towards a singing male as if she were an automaton. If she should deviate from the straightest path, the muscles on one side will stop working to bring her back on course.

MAGNET IN SHOE IN THE ALPS.—Every year avalanches kill many skiers and climbers in the Swiss Alps. But there are now hopes that this toll may be cut down by a new system of locating buried victims who are often carried a long way under the snow and ice. A metal sounding rod used to be the best means of locating a buried person. It was a great step forward when dogs were trained to smell out buried persons, and there are now more than 100 avalanche dogs which are taken to the scene of the accident by car, helicopter or aircraft. The Swiss Institute of Alpine Research tested a new location system. It depends on a magnetometer. A detector is carried at the end of a long pole and

connected by a wire with a recording instrument. This can detect under the snow the presence of a man wearing a small magnet at a distance of 30 yards. Using the magnetometer, Alpine troops taking part in the test found colleagues under 9 ft. of snow in record time. It remains, however, to supply all skiers and climbers with a magnet. A shoe has already been made with a magnet in its sole.

MAN-POWERED AIRCRAFT.—A flight of over half a mile was achieved by muscle alone by Mr. J. C. Wimpenny, in the Hatfield Man-powered Aircraft Club's machine, the Puffin. The Puffin was airborne for 993 yards over level ground, attaining a maximum height of 8 ft. and an average height of about 5 ft. The average speed was 19.5 m.p.h. The Puffin, which is built of spruce and balsa wood, was designed by Mr. Wimpenny. It has a wing span of 84 ft. and its empty weight is only 110 lb. Power to the rear-mounted two bladed "pusher" propeller is transmitted by a cycle pedal arrangement.

MANX CAT BREEDING.—The Government of the Isle of Man has established a cat farm to safeguard the disappearing race of "rumpies," the tail-less Manx cats famous throughout the world. At the Board of Agriculture and Fisheries' farm at Knockaloe, Peel, 13 cats and three kittens were involved in first experiments to breed out-mis markings. The Government veterinary officer said: "We have established the cattery to preserve the breed and to maintain a nucleus of cats for the tourists who have seen pictures of them on posters. Manx cats are outnumbered on the island by cats with tails, and there was a distinct possibility that the breed would disappear. The Manx cats are perhaps more popular abroad than in the island and make regular appearances at cat shows in America." The lack of a tail was an abnormality which in some cases caused partial paralysis of the cat's back legs. It was a mutation transmitted for at least two hundred years. The history of the breed is unknown and the earliest known written reference to it is in a Manx dictionary of 1835, which lists "Stubbin—a cat without a tail." Inquiries on buying kittens from the farm have been received from Canada, Ireland, France, and Ethiopia.

MAPPING THE POLAR SHELF.—Dr. E. E. F. Roots, Coordinator of the Polar Continental Shelf Project, outlined to the Royal Geographical Society the scientific and technical results since the first field party left for the Arctic in March 1959. The area ultimately to be investigated extends from Alaska to Greenland, about 1,600 miles with an undefined distance out to sea. By early May 1960 about 70 men were in the field. New techniques were developed for hydrographic sounding of the surface of the pack ice with equipment light enough to be carried in helicopters. An aeromagnetic survey measured the magnetic intensity of the rocks beneath, by aircraft flying at 1,000 ft. In a condition of "whiteout", with the horizon invisible in the latter part of May, after the sky had been obscured and before the snow had disappeared from the land and sea ice, the effect was like that of being perched on a pedestal in space. The hydrographic surveys had begun to outline a continental shelf 75 to 100 miles wide with a deeply buried, undulating surface and an abrupt break to a regular continental slope. The shelf was mainly 500 yards to 600 yards below sea level. The top 250 metres of water had a temperature below 0.0°C, with the coldest water at the surface in winter and sinking to a depth of 20 to 30 metres

in summer, where it did not warm above 1.5°C. Below 250 and down to about 900 metres the water was above 0°C, and identical with the water of the North Atlantic. Below this depth the temperature fell slightly to about minus 0.5°C at the bottom. A project followed closely by the oil industry had been designed to investigate the geological structures in the great basin of sedimentary rocks under the western Queen Elizabeth Islands. This basin was an important feature of the area that would contain any oil deposits to be found in the Arctic islands. The seismic work to date suggested that the basin may contain more than 10,000 metres of sediments in the middle with a well-defined lip at the inner edge of the continental shelf. The paucity of vegetation on the western Queen Elizabeth Islands was remarkable. The islands were close to being a frigid desert today. The flora appeared to have been reduced in cold periods about 3,000 and 1,000 years ago.

MINING WITHOUT A MINER.—The Collins miner, a revolutionary new machine to operate in thin seams without a man at the coalface, was demonstrated at the Coal Board's central engineering establishment at Swadlincote. The machine, invented by Mr. H. E. Collins, Coal Board member for production, consists of a train of special vehicles running on rails into an underground roadway. A remote-controlled boring machine is launched into the seam and thrusts forward like a mole, feeding the cut back to an extending conveyor belt which is drawn into the seam behind it. Control of the machine is in the hands of one man who sits in a control cab like an aircraft cockpit. The equipment will allow millions of tons of coal to be extracted from seams at present uneconomic. Lord Robens, chairman of the National Coal Board, said that the machine would be capable of development for use in thick coal seams. Operationally it is expected that a team of six men on one machine would be able to produce 350 tons of coal a shift—about 1,000 tons a day with three shifts and 18 to 20 men. This represents the output of 300 men with conventional equipment. Using the new method, coal would have no difficulty in competing with oil, he said.

MONT BLANC ROAD TUNNEL LINK-UP.—The last 10 ft. of rock separating France and Italy in the 7½-mile tunnel beneath Mont Blanc was blasted away on August 14 with a 660 lb. charge of explosive. Workers from both sides scrambled across the debris to fall into each other's arms in congratulation and excitement. In a ceremony 400 yards from the rock face, M. Edmond Giscard d'Estaing, chairman of the French tunnel company, spoke words of remembrance for the workers killed in the venture (five on the French side) before pressing a button for the final detonation. Four French engineers achieved the first traversing by motor of the tunnel from Chamonix to Entrèves, in Italy, and back. Much work remains to be done, however, before the tunnel, begun in mid-1959, can be opened to traffic in 1964. The concreting has to be completed, the roads built, the great ventilation systems installed, the scale of tolls fixed. When ready the tunnel will offer an all-the-year motor route from Paris to Rome 130 miles shorter than is at present available. It will have two traffic lanes—one in each direction—and two pedestrian pavements; and with a speed limit of 30 miles an hour, no more than 400 vehicles an hour are expected to pass through. The Mont Blanc road tunnel will be an essential part of a network of roads conceived for Europe rather than for individual countries. It will draw traffic not

only from threequarters of France but from the Low Countries, West Germany, and Scandinavia. The 3.7 mile highway tunnel between Italy and Switzerland under the Great St. Bernard, at a height that can be kept open all the year, was pierced in April. Other road tunnels are being planned for the Brenner and the St. Gothard.

MOON REFLECTION TESTS.—Scientists at the Massachusetts Institute of Technology successfully directed a beam of light at the surface of the moon, and received its reflection back on earth $2\frac{1}{2}$ sec. later. The experiment was carried out on May 9 and repeated on the following evening. It might have been possible for observers on earth to see the reflected light as a faint red glow as it penetrated the dust of the earth's atmosphere. The beam, a big-energy red light, was discharged at the moon by means of a ruby optical maser, and was so concentrated that it was estimated to hit within a two-mile radius on the moon's surface. Because the moon is such a poor reflector, only a small portion of the light was received in the scientists' 48 in. telescope. It is hoped that ultimately by means of an optical maser, power may be delivered over vast distances to orbiting satellites. The word "maser" is compounded from "molecular amplification by stimulated emission radiation", and a similar device of this kind was used in the United States for drilling a hole in diamonds with a beam of light. Messages were sent from England to Australia by way of the moon. They consisted of telegraph and teletprinter signals, and the first message was "Jodrell Bank testing. The quick brown fox jumps over the moon." The 250 ft. radio-telescope was used for the outward transmission, and the signal was received at Sydney by a new 60 ft. radio-telescope. Sir Bernard Lovell said the communication *via* the moon can be made between any two points on the earth's surface and the only equipment needed is terminal equipment. Communication *via* the moon is much cheaper than *via* artificial satellite.

MOST COSTLY SHIP IN THE WORLD.—The U.S.S. *Enterprise*, commissioned in December 1961, is the most expensive ship in the world. Driven by eight atomic reactors, she is a fifth of a mile long, can cruise nearly 500,000 miles without refuelling, and carries six squadrons of aircraft. Costing nearly £180 m., she displaces 83,350 tons, has steam catapults which could drive a family car a mile and a half into the air, can launch an aircraft every 15 seconds, has 7 galleys cooking 12 tons of food a day, 3 barber's shops, 6 stores, 3 soda fountains, a library of 5,000 books, and a complement of 4,200 men, 400 officers and 2 chaplains. Each anchor weighs 30 tons and the cable locker is as big as a ballroom. The *Enterprise* will depend for protection on her own aircraft and on escorts. She carries no defensive weapons. Built-in hoses can sluice down her flight deck to wash away contamination from "atomic near-misses." An atomic direct bit would be the end of her.

MOUNT MCKINLEY CONQUERED.—Two Royal Marines officers and an R.A.F. technician, all members of a joint Services' expedition to Alaska, conquered Mount McKinley, 20,320 ft., the highest peak on the North American continent. Major M. Banks, aged 35 (the Polar medallist and Himalayan mountaineer) with Lieutenant H. Wiltshire, aged 23, both Royal Marines, and Chief Technician J. Hinde, aged 34, of the R.A.F., reached the summit after a hard struggle against bad weather. The temperature on the peak is below zero, and special equipment had to be provided. This included plastic foam mattresses to insulate the explorers against the cold when camping and

"vapour barrier" boots with cellular rubber soles said to have the same effect as keeping the feet in vacuum flasks. The Naval Victualling Department devised a special ration, light and dry, to avoid freezing. Experimental foods included dehydrated cod, mushrooms, and chicken.

NEOLITHIC SITES IN CHINA.—Excavations by Chinese archaeologists on the outskirts of Shanghai revealed the sites of nine settlements believed to be nearly 3,000 years old, as well as more than 50 late Neolithic age tombs and many relics of the late Neolithic and Bronze ages. One of the sites, an ancient village in Chingpu county, is divided into three layers, the topmost containing deposits from 722 B.C. to 431 B.C. and the later period of warring states preceding the First Empire. Many bone arrowheads and pottery pellets used in hunting were found in the tombs, with stone spades for farming and pottery wheels for spinning. The finds also included pottery jars with geometric patterns, greenish glazed bowls, and other vessels. In the largest excavation, only 14 miles from Shanghai, 560 objects were unearthed, including pottery and jade ornaments, a bronze knife, and other small bronze objects. The shape and impressed decoration of some of the pottery resembled bronzes of the Shang and Chou dynasties (about 1700 B.C. to 249 B.C.). The new regime has given great impetus to archaeology. Previous discoveries included a Neolithic settlement in Shensi, whose foundations were carefully preserved, while excavations unearthed the palaces and market place of Changan, capital during the T'ang dynasty (A.D. 618 to 906), one of the most powerful and most cultivated periods in China's history, when Changan was one of the world's most splendid and populous cities, with contacts extending from Japan to Iran and farther west. Changan had a circumference of 26 miles, including an outer city with 12 gates, an imperial city in the northern part, and a palace proper, and inside the city was a large market place.

NEW HERBARIUM FOR EDINBURGH.—A new herbarium and library is to be constructed by the Ministry of Works at the Royal Botanic Garden, Edinburgh. It will be a three-storey building and will provide better accommodation for important scientific work carried out at the garden. The site is at the rear of the existing laboratory building. The library will be on the ground floor, the herbarium and laboratories on the first and second floors. It will take about 18 months to erect and should be ready for occupation early in 1964. The herbarium contains a collection of about two million dried botanical specimens used in naming and classifying plants, and the library one of the best collections of botanical literature in Britain.

NEW "LIVING FOSSIL" DISCOVERED.—A living representative of a group of animals only known from palaeozoic fossils has been discovered by Professor H. Barraclough Fell, of the Victoria University of Wellington, New Zealand. These Somasteroids were thought to have died out in the Ordovician period about 400 m. years ago. They were the ancestors of the modern starfishes and brittle-stars. The interest of the new discovery is that the structure of the skeleton proves to be intermediate between the frond-like pattern in the arms of sea-lilies and the mosaic-like pattern in sea-stars. It is now possible to deduce how the sea-stars evolved from sea-lily ancestors. The living somasteroid, believed to be very rare, inhabits the seas of tropical west America. The only specimens so far discovered were taken from west Mexico. The species, *Platasteria latiradiata*,

was first described by J. E. Gray 90 years ago. Professor Fell concluded from theoretical studies that there was a distinct possibility that the species might be a surviving somasteroid. With the co-operation of Miss Ailsa M. Clark, curator of echinoderms at the British Museum, enough material was obtained to enable him to confirm the somasteroid nature of the animal.

NOISE IN HOSPITALS.—It is becoming increasingly recognized that noise is an evil affecting our health, and ought to be abolished wherever possible. Little noises irritate hospital patients most, according to a survey by King Edwards Hospital Fund for London—the squeaking trolley wheels, dripping taps and whispering of nurses at night. Trains beneath ward windows or the roar of aircraft are accepted. Acting on the results of the survey, the fund launched a campaign to reduce noise in hospitals. It is based on nine posters designed by the cartoonist Fougasse; a million are to be distributed among hospitals by the Ministry of Health. The services of Fougasse were given free. One of the noises complained of by patients who took part in the survey was the chimes of Big Ben, a point mentioned at the inauguration of the campaign by Miss Pitt, Parliamentary Secretary, Ministry of Health. “I have a very small room in the shadow of Big Ben”, she said, “and I do not notice the chiming. But I can understand that patients in hospitals find such noises disconcerting and that they can have an effect on their recovery.” In 1859 Florence Nightingale said that “the fidget of silk and crinoline, the rattling of keys, the creaking of stays and shoes, will do a patient more harm than all the medicines in the world will do him good”.

PINCHED LIGHTNING.—What is believed to be the first photograph of a “pinched” lightning discharge was obtained by B. T. Matthias and S. J. Buchsbaum, of the Bell Telephone Laboratories, New Jersey. They state that the picture was taken through window glass at an estimated distance of between 200 and 1,000 metres during the approach of a severe thunderstorm at Los Alamos, New Mexico, late in August, 1961, as part of a colour film record. Six frames were exposed for 15 minutes each; one caught an ordinary lightning stroke, another the “pinched” discharge, and the other four were blank. The thickness of the discharge is estimated at between one and five metres.

POPULATION: WARNING OF INCREASE.—Birth control is unlikely to prevent a frightening increase in the world's population, Sir George Allen, secretary of the British Association, said at a conference of the National Council of Women in London. The world's population was about 3,000 m. of whom some 2,000 m. were undernourished. While ultimately birth-control measures must be introduced there was no reason to believe that this would have a significant effect in controlling population. We were faced with a major and frightening increase in world population during the next 30 or 40 years. The diet of two-thirds of the world's population was below 2,200 calories a day, and for about 1,000 m. people it was below 2,000. It was impossible for a person to have the energy to do a reasonable day's work on such diets.

The average income in the west was probably about £500 a year, but in many underdeveloped countries it was about £30 a year. The gap could be narrowed only by scientific and technological development, which must be started at once. Professor J. Yudkin, who occupies the chair of nutrition at London University, told the conference that a dinner of snake cutlet or polar bear liver was as good

as roast beef. The important thing was to get variety. There are people who eat snakes and grasshoppers and caterpillars. They no doubt think that cornflakes for breakfast are quite appalling. If we are to improve the nutrition of the world and obtain freedom from hunger we shall often be faced with the situation of getting people not only to eat more food but different sorts of food.

POWDERED COAL BY PIPELINE.—A pipeline operation to carry powdered coal suspended in water over long distances proved successful on a laboratory scale, according to Mr. W. C. Whitaker, manager of the Coal Operators' Association of western Canada. Tests were conducted for two years by the research council of Alberta, which is trying to find some method whereby a transcontinental pipeline could be employed for the large-scale movement of western Canadian coal to the eastern market. Estimates say that lines in existence could move more than 20 m. tons a year. Scientists believe that the coal could be carried in three forms: a fairly diluted solution for eastern Canadian thermo generating stations; as coking coal easily carried to the west coast; in heavy concentration to provide an injection fuel for blast furnaces. The first two types would require separation of the ingredients at the end of the line.

QUIET SUN YEAR.—Scientific preparations were discussed in Paris for the International Year of the Quiet Sun, which is expected to open in April, 1964, or possibly a few months earlier. At this period sunspot activity, which moves in an 11-year cycle, will be at its minimum, and the object is to complement observations taken during the International Geophysical Year (1958) when sunspots were at their maximum or “noisiest.” Observations of the quiet sun have their bearing on weather forecasting and radio communications. Delegates from 24 countries, among them scientists of Russia and the United States, took part in the Paris discussions. Professor W. J. G. Benyon, of the University College of Wales, Aberystwyth, explained that it was essential, if full use were to be made of I.G.Y. results, to have a set of similar observations at sunspot minimum. It was difficult to predict just when this would occur, since in 1961 sunspots had been diminishing much more rapidly than expected. Observations would be made throughout the world of the Aurora and airglow, the ionosphere, cosmic rays, solar activity and many related subjects. Professor N. Pushkov, a Russian delegate, said it would be useful to have observatories in small countries of the equatorial regions or in South America. Most I.G.Y. observations had been from the ground, but investigations of space by satellites would now be routine work.

RADIO TELESCOPES: TWO MORE.—The Department of Scientific and Industrial Research made a grant of £466,000 to Professor Martin Ryle, Cambridge University, for a triple paraholoidal radio telescope; a grant of £236,000 to Sir Bernard Lovell for a fully steerable radio telescope at Jodrell Bank; and a grant of £450,000 to the Scottish Universities for a low-energy nuclear reactor. Professor Lovell's new instrument—known as Mark II—will be used with the existing 250 ft. telescope at Jodrell Bank, as an interferometer system to determine the position of astronomical radio sources with greater accuracy. It will have an oval bowl measuring 125 ft. by 85 ft., and will be constructed about 600 yards from the existing telescope by Mr. H. C. Husband, who built the 250 ft. telescope, at the cost of £700,000. The Cambridge telescope will consist of two fixed and one rail-mounted para-

boloidal aeriels each of 52 ft. diameter. It will be used to examine the intensity distribution of radio sources in a limited part of the sky with greater sensitivity than is possible with the existing aerial array. Professor Ryle said he hoped they would be able to see much farther out into space eventually. The Scottish reactor will be shared by the Aberdeen, Edinburgh, Glasgow, and St. Andrews Universities, and by the Royal College of Science and Technology, Glasgow. It will be built on the site of the National Engineering Laboratory at East Kilbride. The main part of the scientific programme will be the production of short-lived radioisotopes for research in chemistry, metallurgy, biology, and medicine. The reactor will also provide teaching and training facilities for engineers and physicists in reactor technology.

RAILWAY INSIDE JUNGFRAU.—A £2,500,000 scheme for a spiral railway line inside the Jungfrau peak was worked out by engineers for the Jungfrau Railway. The present terminus at Jungfraujoch was opened 50 years ago. Work on the new scheme will extend the line from the present station at 11,333 ft. to a point 200 ft. below the summit, which is 13,642 ft. It will need up to five years to build the tunnel through solid rock rising 2,000 ft., and will cost 30 m. Swiss francs. The current value of the present system, including two power stations, is officially described as 20 m. Swiss francs. To build the extension would carry out the wishes of the original Jungfrau Railway designer, Adolf Greyer-Zeller, who died in 1899, but photometry and other devices have since proved that had his scheme been completed the railway would have emerged twice from the side of the mountain. Under the present scheme nothing will be visible on the surface to spoil the Jungfrau peak, but below ground there will be a station house with a lift descending 200 ft. to the terminus.

REARING 500,000 FISH ASHORE.—Because of successful experiments during the past years, biologists of the fisheries laboratories at Lowestoft are hoping to rear 500,000 fish ashore to see if man can augment stocks in the North Sea. "We have established the technique of rearing on a small scale", Dr. H. A. Cole, director of fishery research, stated. "To make any impression on the North Sea would require thousands of millions of fish, but if this pilot scheme gets going we shall start by rearing 500,000 and concentrate on smaller areas such as bays and coastal inlets. It has been suggested that plaice might be reared ashore in sufficient numbers to augment the stocks in the North Sea, but the stock of mature fish in the southern part alone must be about 300 m." The work was begun at Lowestoft and continued at the Port Erin centre in the Isle of Man. There has been perfected a technique for rearing plaice to a size well beyond the vulnerable early stage when they are more likely to fall prey to their hereditary enemies and mortality in their natural habitat is high. Once old enough they are better able to fend for themselves, move out to deeper water and live mostly on the bottom of the sea, where a principal enemy is then probably man.

RHEUMATISM RESEARCH.—An International rheumatism research institute costing between £100,000 and £200,000, is to be established in London. The scheme follows an offer made to the Charing Cross Hospital group by Mr. Terence Kennedy, American author, and his wife, who is the sister of Sir Simon Marks, to pay the cost of building and equipment. The institute will have a resident research chemist and a permanent research staff. Mr.

Kennedy and his wife had always been interested in rheumatism and had read of the millions of man hours lost because of the disease. It was brought nearer to home when his own doctor was stricken by it and had to walk with the aid of two sticks.

Grants totalling £150,000 for research into rheumatism were announced by the Empire Rheumatism Council. The International Research Institute of Rheumatology to be built by the Charing Cross Hospital group is to receive £100,000 spread over five years, and £50,000 will go to the Middlesex Hospital. Rheumatism was the Cinderella of medicine when the council was created in 1936, said Dr. W. S. C. Copeman, the chairman of the Council. Today thousands of sufferers were able to walk and lead useful lives. Nearly 1,500,000 people suffered from rheumatoid arthritis; osteoarthritis affected 3,750,000 over the age of 65, and spondylitis and gout each about 120,000 people. Mr. A. L. Stock, one of the Council's industrial advisers, stated that arthritis and other forms of rheumatism cost Britain over 26 million working days a year. A building for research into rheumatism has been erected at the Northern General Hospital, Edinburgh. The Empire Rheumatism Council has made a grant of £16,000 to cover the cost and also giving money to pay for staff and materials. Dr. J. J. R. Duthie, director of the rheumatic unit, said that there were many materials, including plastics, that were strong and light, and devices which would be an improvement on metal and leather ones. Traditional materials and the form in which they were used were often more an encumbrance than a help. (See WHITAKER'S ALMANACK, 1962.)

ROAD ACROSS CANADA.—A 12-car procession travelled 4,860 miles across Canada from Newfoundland to Victoria, to mark the opening of the Trans-Canada Highway. The Trans-Canada Highway Act was passed by the Dominion Parliament in 1949. Some 8700 m. (about £233 m.) was committed to construction and the final cost will be \$1,000 m. (about £333 m.), the money being provided by federal and provincial governments. It runs across peat bog in Newfoundland, along the St. Lawrence River, across the Plains of Abraham, and around the Great Lakes. Engineers estimate that 400 m. cubic yards of earth and rock weighing 800 m. tons have been moved. About 1,500,000 ft. of culverts, 12 m. tons of paving and 600 bridges were required, and more than 11,500,000 man-days of employment put in. Specifications for the highway required a right-of-way of a minimum of 100 ft. in width, a maximum curvature of six degrees, a maximum gradient of 6 per cent and a minimum vertical sight distance of 600 ft. with pavement width at a minimum of 22 ft. The highway engineers were satisfied that the official opening ceremony should be in Rogers Pass, where they encountered massive difficulties in building the road along the sides of mountains. The danger from heavy snow was removed by steel and concrete snowsheds erected over the highway in avalanche areas and earth mounds called "dragon's teeth", built on the principle of obstacles used against tanks, which brake avalanches and build up piles of snow to add to the defences. Explosives to start controlled avalanches and systems of benches to catch snow slides were also used.

ROCK-BREAKING BY ELECTRICITY.—A method of shattering rock with electric current was developed by the General Electric Company in America in collaboration with the Montana School of Mines. Electric contacts are clamped to the rock, and high-energy radio-frequency power applied. This opens up an electricity conducting path in the

water trapped in the rock, through which a pulse of ordinary direct electric current is then passed. This current produces intense local heating, and the rock expands and cracks and is shattered into smaller pieces. The technique can be used in underground and opencast mines, in earth-moving operations and certain ore-crushing processes. Blasting operations in mines may leave large blocks of rock too big to remove whole. Holes have to be bored in them, explosive charges laid, miners evacuated to a safe place, the charge detonated and the resulting rubble cleared. With the electric method, such large blocks could be quickly and easily shattered without any drilling or need for evacuation. The process is stated to work with metal-bearing ores, and with granite and other hard rocks normally considered to be non-conductors of electricity.

ROMAN REMAINS AT YORK.—An inventory of the Roman remains in the city of York (Eboracum) has been compiled by the Royal Commission on the Ancient and Historical Monuments and Constructions of England. The commission have recorded the remains of 61 monuments (including the legionary fortress with its defences, streets and internal buildings as one monument), described 154 Roman inscriptions, sculptured stones and architectural fragments and listed some 500 Roman burials. They recommend as especially worthy of preservation the remains of second to fourth-century defences standing and visible at the east, west and south angles of the legionary fortress and including the multi-angular tower and east angle tower; the basement of the bath house under the Mail Coach Inn in St. Sampson's Square; the practice camps outside the city but closely associated with the fortress; the remains of Roman walls beneath the church of St. Mary Bishophill Senior; and the vaulted tomb chamber on the Mount. The list is restricted to visible monuments.

RUBBER AND AIR SHIP FENDER.—Successful demonstrations of a new type of ship's fender were carried out in Dover Harbour by the Department of Scientific and Industrial Research. The fender consists of a flexible cylinder of fabric-reinforced rubber closed by a dome at the top but open to the water at the bottom, and floating upright against a jetty. When the fender is uncompressed the pressure of the air under the dome is in excess of atmospheric pressure, weights hanging at the bottom of the cylinder giving the fender its initial stiffness. When the fender is compressed by a moving ship the pressure of the air rises; the water level inside the fender is pushed downwards, while the area of the fender in contact with the ship increases. Tankers of 40,000 tons are expected to need only two fenders—one at bow and one at stern.

SAHARA GAS FOR HOME USE.—Gas from the Sahara for British industry and housewives moved a stage nearer with the announcement by the Gas Council that contracts had been placed for building 325 miles of steel pipeline. The distribution system is expected to cost £9 millions. The main pipeline, 18 in. outside diameter, will stretch 200 miles from Canvey Island to a terminal near Leeds, and branches from the direct route to eight of the 12 area gas boards will add another 125 miles. The system will distribute 90 million cubic feet of gas a day at a calorific value of double the heating value of "town gas." This will make it suitable either as an enricher of low calorific value gases or for re-forming to the heating value at which town gas is distributed. The gas originates

at Hassi Er R'Mel, which until 1953 was a haunt of nomads. It will be conveyed by pipeline to Port Arzew on the Mediterranean, where it will be liquefied, reducing the space it occupies to one six hundredth of its original volume. Specially constructed vessels will bring the frozen, liquefied gas to Canvey Island. After regasification it will go by pipeline to the boards, and thence to kitchen stoves, fires and factories.

SEA WATER FOR DRINKING.—Scientists who have studied the problem are agreed that some parts of Britain will have to get their drinking water from the sea. In Kuwait half a million people have no other supply than purified sea water. Guernsey, with a rock formation that collects little rainfall but with the need of a guaranteed supply of water for its tomato crop, has a distillation plant that supplies half a million gallons daily. More plants are being installed on the west coast of the United States where water is taken from the ground a thousand times faster than it is replaced by rainfall. The cost of the water is high, usually between six and eight shillings a thousand gallons, but it can be reduced if the distillation plant is used in conjunction with the generation of electricity. G. and J. Weir, of Glasgow, the world's largest producer of sea water conversion equipment, planned a combined distillation and generating plant for the Canary Islands that will produce pure water for 3s. a thousand gallons. Part of the low pressure steam from the turbines is used as energy to convert the sea water.

SOLAR RAYS IN INDUSTRY.—A problem on which scientists have been engaged for many years is the using of solar power to meet the needs of mankind. At the Negev Institute for Arid Zone Research, Beersheba, Israel, Dr. Harry Tabor has perfected a solar steam plant for use in industry. It is a simple collector with a cylindrical parabolic mirror three hundred square metres in area mounted on an east-west horizontal axis. A photo-electric device moves the mirror into a favourable position to the sun, adjusting it continuously so that a concentration factor of 16 is obtained. The mirror is not of glass but of super purity anodised aluminium. Dr. Tabor has also designed a solar steam plant for use at an insecticide factory. It works by means of flat-plate roof collectors, without the use of mirrors. The operating temperature of the heat collectors is raised by coating the absorbing surface with a thin metallic oxide film. Another Tabor steam plant for use in industry combines the two principles of solar reflection and solar absorption. It consists of curved rectangular mirrors placed at ground level, tilted slightly to catch the sun's rays. The mirrors reflect the rays upwards on to black-surfaced absorber plates fixed six feet overhead. Behind the absorber plates a liquid with a low boiling point is heated to produce steam.

SOUTH ATLANTIC ERUPTION.—A vast volcanic eruption under water in the South Sandwich Island group, about 500 miles from the Antarctic Circle, was reported to the Admiralty by H.M.S. *Protector*, the Royal Navy ice patrol ship. Some of her machinery was put out of action when hundreds of small pieces of floating pumice stone were sucked into water intakes. Thousands of square miles of the Scotia Sea and the South Atlantic just outside the Antarctic Circle were covered with streams of pumice dust. Pieces of pumice—some of them 3 ft. across—were floating to the surface up to 20 miles from the maximum area of concentration, 15 miles north-east of

Zavodovski Island. The floating matter smelled strongly of sulphur. Water colour varied between muddy green and bright turquoise. When the *Protector* approached Zavodovski Island large clouds of steam were rising and a "moderate eruption" was taking place. The majority of the pumice stone thrown up was floating on the surface, but pea-size pieces were suspended in about 15 ft. of water. These caused the stoppage of the ship's evaporators, turbo-generators and other machinery. Some of the eruptions took place in 324 fathoms of water. Because of the presence of so much floating matter, the *Protector* was unable to remain in the area, and had to steam on into the South Atlantic after collecting large quantities of samples for analysis.

SUBMARINES UNDER NORTH POLE.—Two United States submarines, which entered the Arctic from opposite ends, surfaced at the North Pole on August 2. They landed men on the ice and the crew took "a walk around the world" at the geographic North Pole. The two ships conducted anti-submarine warfare exercises under the ice cap, collected scientific information, and established a new year-round submarine channel between Greenland and Ellesmere Island.

SUN CAMERA IN AUSTRALIA.—A radio heliograph, a giant camera for taking detailed pictures of the sun, is being built under the auspices of Australia's Scientific and Industrial Research Organization. The instrument will consist of 100 saucer-shaped aerials, each 42 ft. across, arranged in a circle two miles wide. It is hoped to give more information about the solar explosions and storms, which disrupt world radio communications, and produce cosmic rays which could be a danger to space travellers. Astronomers of this Research Organization have done much original work on radio emission from the sun. One of their radio telescopes is used to scan the sun with a pencil beam only three minutes of an arc wide and a picture of the sun in terms of this wavelength is being built up. Another type of equipment has been used to follow the rapid changes in frequency which occur during various "radio bursts"—localized and greatly increased sources of radio emission.

SUN STUDY UNDERGROUND.—What is said to be the world's largest telescope for studying the sun has been erected on Kitt Peak, Arizona, a mountain once sacred to the Indians. It consists of a shaft nearly 150 ft. long sloping diagonally underground. A flat 80 in. mirror above ground reflects light from the sun down the shaft to a 60 in. parabolic mirror below ground. This reflects it again, via another 48 in. flat mirror, to an underground observing room hollowed out of the mountain. In this room, scientists will study an image of the sun almost a yard in diameter. Kitt Peak was chosen because the height, 7,000 ft., and the dry air combine to offer excellent astronomical viewing conditions. The new instrument is expected to give more detailed view of the sun than has ever been obtained and tell more about solar flares and sunspots—matters of great interest to space travellers and radio engineers.

THUNDERCLOUD ELECTRICITY.—A new theory of thunder and lightning was explained to the British Association by Dr. B. G. Mason, of the Imperial College, London. On this view, the origin of a thundercloud is the moisture carried up in a great upward rush of hot air, itself perhaps produced by the heating of the surface of the earth on hot days. In some circumstances the speed of these upward

winds could be 60 m.p.h., while Sir Basil Schonland calculated that in the formation of a thundercloud the energy produced by the column of air could be the equivalent of the electricity production of a power station three times the size of that at Battersea. With its rapid movement upwards the air is rapidly cooled and moisture settles out as drops of water. The cooling is so rapid that water droplets can be cooled below freezing point while still remaining liquid, but, when the temperature reaches 40 deg. C. below zero, hailstones are formed. The upper reaches of a thundercloud consist of suspensions of hailstones by the upward rush of air. The larger of these fall down and collect water droplets, forming larger hailstones which frequently shatter and negative electricity is carried away with the outer fragments. It is finally carried upwards to the top of the thundercloud. Dr. Mason said that his theory would account for the thunder and lightning produced by cold thunderclouds but it remained to be seen how the frequent lightning flashes associated with warm clouds could be understood. The inference is that, in the first strike of lightning flashes to the ground, there must be a narrow tube of air which is heated to a high temperature of 10,000 deg. or more and made incandescent and electrically conducting. The speed with which lightning reached the ground in the first strike could be as great as 2,000 km. a second, Sir Basil said.

URANIUM IN SWITZERLAND.—Professor Hermann Vogel, the Basle geologist, who has been surveying the Swiss Alps for many years, discovered uranium deposits, believed to total nearly 1,000 tons. The deposits are in the sandstone mountains of the Emmen Tal west of Langnau between the Emme and Ilfis rivers where the mountains are from 1,900 to 4,000 ft. high. Dr. Vogel examined a number of samples which showed the proportion of uranium to be at least 60 to 950 grammes a ton of coal. The uranium is contained in a layer of coal estimated to exceed 3 m. tons, the richest in the country. Though mines are not easy to work in the mountains and involve heavy boring and transport expenses, it is believed that with modern technical means both the uranium and coal deposits of the Emme will prove profitable.

WAVE TRAPS TO CALM THE SEA.—A "wave trap," which could lead to the development of portable breakwaters and artificial harbours has been invented in the laboratories of the United States Rubber Company. It consists of vertical panels or curtains of rubber-coated fabric hanging from plastic foam-rubber floats which ride on the water. A complete system consists of three or more parallel rows of these panels, the whole assembly being held in place by moorings at the seaward and shore-based ends and by connecting lines between the panels. The idea was developed after studying the calming effect of seaweed on ocean waves. A floating structure was built of fabric and plastic which would act much as seaweed does in calming the waves without exerting too much lateral drag, thus enabling the structure to be anchored easily. Tested in tanks with artificial storm effects, the wave traps reduced 3 ft. high waves to a few inches, or eliminated them completely. Larger devices could quell waves of 10 ft. or higher. Potential uses for the invention include protecting ocean, lake, and river shores from erosion by wave action; creating calm expanses at sea for diving, rescue, and refuelling operations; building "harbours" for military purposes; protecting off-shore (underwater) oil rigs and observation towers; and developing "marinas" for yachts and pleasure craft.

NATIONAL NATURE RESERVES

Up to August 31, 1962, 97 nature reserves covering 187,107 acres had been declared by the Nature Conservancy and additions to existing Reserves had also been made. Permits are required for access to the reserves marked* and for access to some parts of the reserves marked†. The year shown in each case is that of first declaration of the reserve.

ENGLAND AND WALES

Anglesey.—*Newborough Warren-Yllys Llanddwin* (1955).† 1,565 acres on the southern extremity of Anglesey. Contains 11 miles of foreshore and extensive sand dunes up to 1½ miles inland. All stages of plant colonization are represented. Of considerable geological and ornithological interest.

Bedfordshire.—*Knocking Hoe* (1958).* 22 acres. Small relic of a particular type of close-grazed chalk downland turf.

Berkshire.—*Cothill* (1956).* 4 acres, 5 miles S.W. of Oxford. Shows succession from open water through various swamp associations to woodland of alder, birch, ash, etc.

Breconshire.—*Craig Cerrig Gleistad* (1957).* 698 acres, 6 miles S.E. of Brecon. Two old red sandstone crags supporting Arctic-Alpine plants at southernmost limit of their distribution in Britain. *Craig-y Cilau* (1959).† 157 acres, 2½ miles S.W. of Crickhowell. Carboniferous Limestone outcrop of botanical interest. Includes a variety of rare trees. The Agen Allwedd Cave system, extending 8-9 miles and containing features of scientific interest is entered from this Reserve. *Cwm Clydach* (1962). 50 acres of beech woods. *Nant Irfon* (1962).* 216 acres, 5 miles N. of Llanwrtyd Wells. Includes uncoppiced sessile oak wood, a breeding ground for the Pied Flycatcher. Open parts of the Reserve support Red Grouse, Dunlin and Golden Plover.

Caernarvonshire.—*Coed Dolgarrog* (1959).† 170 acres, 7 miles S. of Conway. Example of an oak wood on N.E. side of Snowdonia, with many trees intermediate in kind between the Sessile and Pedunculate Oak. Also includes the Alder Woodlands. *Coed Gorswen* (1959).† 33 acres, 4 miles S. of Conway. Good example of a lowland oak wood, with numbers of elm, ash and alder. Interesting ground flora. *Coed Tremadoc* (1957).* 49 acres, 1½ miles N.E. of Portmadoc. Survival of oak woodland clothing precipitous cliff faces and screes below them. Bird life of crags includes the raven and peregrine falcon. *Cwm Glas Crafnant* (1960).† 38 acres, 1½ miles N.E. of Capel Curig. A rocky hill of Ilme-rich volcanic ash, partly wooded with ash, hazel and hawthorn. *Cwm Idwal* (1954).* 984 acres, 5 miles W. of Capel Curig and within the Snowdonia National Park. Wide variety of Ordovician volcanic rocks with interesting Arctic-Alpine flora. Examples of glacial moraines.

Cardiganshire.—*Coed Rheidol* (1956).† 107 acres, 10 miles E.S.E. of Aberystwyth. Examples of moist, mossy sessile oak woodlands, with a rich flora and fauna. *Cors Tregaron* (1955).† 1,842 acres, 12 miles, S.E. of Aberystwyth. One of the best examples of a raised bog. Houses a variety of duck and is the main roosting area in England and Wales of the Greenland Whitefronted Goose.

Carmarthenshire.—*Allt Rhyd-y-Groes* (1959).† 9 miles N. of Llandovery. Sessile oak wood, with typical woodland flora and some uncommon mosses and liverworts.

Cheshire.—*Rostherne Mere* (1961).* 327 acres, 3 miles N. of Knutsford. Important as a winter resort for wildfowl—mallard and teal, shoveller, wigeon, pochard, tufted duck and others. Breeding ground for many aquatic birds. *Wyburny Moss* (1955).* 27 acres, 3½ miles S. of Crewe. Example of "schwingmoor" bog, with interesting flora.

Mixed wood at eastern end contains a variety of insects.

Devonshire.—*Axmouth-Lyme Regis Undercliffs* (1955).† 794 acres, between Seaton and Lyme Regis. A classical example of a major landslip. *Yarner Wood* (1952).* 360 acres, 3 miles W. of Bovey Tracey. Oak Woodland rising to about 1,000 feet above sea level.

Dorset.—*Ame* (1954).* 9 acres, 3 miles E. of Wareham. Shows a transition from salt marsh to birch-pine-oak woodland. *Hartland Moor* (1954).* 214 acres, 2 miles S.E. of Wareham. Dorset Heath and other rare bog plants. *Morden Bog* (1956).* 367 acres, 3 miles N. of Wareham. Example of Southern Heathland and valley bog. Variety of habitats ranging from old pine wood to open heath.

Essex.—*Hales Wood* (1955).* 20 acres, 2½ miles N.E. of Saffron Walden. Example of oak-ash woodland on chalky boulder-clay.

Glamorgan.—*Gower Coast* (1958). 116 acres. Magnificent stretch of limestone cliffs; rich flora and interesting bird life on cliffs and ledges of Worms Head.

Hampshire.—*Old Winchester Hill* (1954). 140 acres, 11 miles S.E. of Winchester. Rough chalk grassland with yew and other chalk-loving trees.

Hertfordshire.—*Tring Reservoirs* (1955).† 49 acres, 1 mile N. of Tring. Important sites for the observation of breeding and migratory birds. Also a habitat for rare plants.

Huntingdonshire.—*Holme Fen* (1952).* 640 acres, 6 miles S. of Peterborough. Adjoins the site of Whittlesey Mere, drained in 1851. Raised bog flora with uncommon plants and insects. *Monks' Wood* (1953-54).* 387 acres, 6 miles N.N.W. of Huntingdon. Example of woodlands on Oxford clay. *Woodwalton Fen* (1954).* 514 acres, 8 miles S.S.E. of Peterborough, 3 miles W. of Ramsey. Rich in aquatic plants and their associated insects.

Kent.—*Blean Woods* (1953).† 81 acres, 3 miles N.W. of Canterbury. Sessile oak, with hazel and hornbeam, coppice chestnut and birch, and a variety of uncommon insects. Important for presence of Heath Fritillary butterfly. *Ham Street Woods* (1953).* 240 acres, 5 miles S. of Ashford. Characteristic flora and insect fauna of coppice-with-standards woodland. *High Halstow* (1957).† 131 acres, 6 miles N.E. of Rochester. Includes Northwood Hill, site of the largest heronry in England. *Swanscombe Skull Site* (1954). 5 acres, 4 miles E. of Dartford. Famous for the discovery in 1935-36 and in 1955 of parts of a human skull thought to be closely ancestral to modern man and the earliest known in Europe. *Wye and Crundale Downs* (1961).† 123 acres, 5 miles N.E. of Ashford. Chalk downland, scrub and woodland. The Lady Orchard, Man Orchard and Fly Orchard are found here. Home of several rare insects. Tumuli on crest of the downs. The Devil's Kneading Trough a steep-sided valley cuts into the downs on this Reserve.

Lancashire.—*Blelham Bog* (1954). 5 acres, 2½ miles S.S.W. of Ambleside. Example of development of sphagnum bog from wet willow woodland. *North Fen* (1955). 4 acres, 4 miles S.S.W. of Ambleside. Example of vegetational succession of open water, rich in mineral salts, to fen, carr and bog. Mainly woodland, with signs of sphagnum bog development. *Roudsea Wood* (1955).† 287 acres, 5 miles N.W. of Grange-over-Sands. Varied woodland, notably yew on lime-

stone and oak on a ridge of slate. *Rusland Moss* (1958).* 30 acres, between Coniston and Windermere. A raised bog, only 20 feet above sea level, with characteristic bog plants and animals.

Merionethshire.—*Cader Idris* (1955).† 969 acres, 2-4 miles S. of Dolgellau. Variety of Ordovician volcanic lavas with intrusive igneous rocks, interbedded with fossiliferous mudstones and slates. *Coed Camlyn* (1959).* 57 acres, $\frac{1}{2}$ mile S. of Maentwrog. A good example of sessile oak wood under rather high rainfall. *Coed Cymerau* (1962). 65 acres. Sessile oakwood on acid soil. *Coed Ganllwyd* (1962). 61 acres, 5 miles N. of Dolgellau. Includes the gorge of Rhaiadr Du. Extreme humidity has resulted in an abundance of ferns, mosses and liverworts including rare species. *Coed-y-Rhyseu* (1961).* 52 acres, on W. side of L. Trawsfynydd. Mixed woodland growing in conditions of very heavy rainfall and high humidity. *Morfa Dyffryn* (1962).† 500 acres of coastal dunes near Harlech. Example of both mobile and fixed dunes, with rich and varied vegetation. *Morfa Harlech* (1958).* 1,214 acres, N.W. of Harlech. Extensive system of acidic and lime-rich dunes, estuarine salt-marshes, freshwater swamps and pools, of great biological interest. *Rhinog* (1959). 991 acres, 5 miles E. of Harlech. Covers two areas of mountain terrain, including Rhinog Fawr (2,362 feet) and Rhinog Fach (2,330 feet). Rare ecological and physiographical features.

Norfolk.—*Bure Marshes* (1958).* 1,019 acres, 9 miles N. of Norwich. Rich in aquatic and marsh plants and habitat of Broadland mammals, including otter. *Hickling Broad* (1958).† 1,204 acres, 10 miles N.W. of Gt. Yarmouth. The rich flora supports some notable insects, including the Swallowtail Butterfly. Breeding ground for Harrier, Bearded Tit, Bittern, duck and other interesting birds. *Scot Head* (1954).† 1,821 acres, 3 miles N. of Burnham Market. Famous for its bird life, including a breeding colony of terns and winter population of Brent Geese, and of interest to students of coastal evolution. *Weeting Heath* (1958).* 338 acres, $1\frac{1}{2}$ miles W. of Brandon. Contains a wide range of Breckland Heath types of vegetation and typical Breckland bird life, including the Stone Curlew, Wheatear and Ringed Plover. *Winterton Dunes* (1956).† 259 acres, 8 miles N. of Yarmouth. A wide range of heath, bog and dune habitats of special zoological interest.

Northumberland.—*Coom Rige Moss* (1960).* 88 acres, 10 miles W. of Bellingham. An example of relatively undamaged blanket bog, with an actively growing sphagnum cover.

Oxfordshire.—*Aston Rowant* (1958).† 70 acres, 2 miles N.W. of Stokenchurch. Displays stages in ecological succession from previously open chalk grassland to scrub and woodland. *Wyckwood* (1955).* 647 acres, 7 miles W. of Woodstock. Mixed woodland, chiefly oak standards and high scrub, on a wide range of soils, with a series of shallow lakes in the valleys.

Pembrokeshire.—*Skomer Island* (1959).† 722 acres, off the Pembrokeshire coast. Great numbers of seabirds breed on Skomer, including the Manx Shearwater, Puffin, Guillemot and Razorbill. There is also a breeding colony of the Grey Seal.

Soke of Peterborough.—*Castor Hauglands* (1954).† 221 acres, 5 miles N.W. of Peterborough. Heath and woodland on Oolitic Limestone and calcareous clays, with a wide range of plant life.

Somerset.—*Eridgwater Bay* (1954).† 6,076 acres, 10 miles S.S.W. of Weston-super-Mare. Protected area for wildfowl. *Rodney Stoke* (1957).† 86 acres, 2 miles S.E. of Cheddar. Example of a

Mendip Ashwood. Fauna includes Badger, Buzard and many species of mollusc. *Shapwick Heath* (1961).* 484 acres, 4 miles W. of Glastonbury. Remnant of formerly extensive raised bog, with wide range of flora and fauna. Peat diggings here have uncovered many archaeological remains of Neolithic, Bronze Age, Iron Age and Romano-British dates.

Suffolk.—*Cavenham Heath* (1952).† 208 acres. Typical heathland with some low-lying areas of wet heath, fen and carr. *Orfordness-Havergate* (1954).† 514 acres, 1 mile S. of Orford. Important bird sanctuary, famous in post-war years as the site to which the Avocet has returned. *Thetford Heath* (1958).* 225 acres, $2\frac{1}{2}$ miles S.W. of Thetford. Breckland birds are well represented. Of outstanding interest are fine examples of fossil "stone stripes". *Westleton Heath* (1956).† 117 acres, 2 miles S.W. of Dunwich. A good example of characteristic East Suffolk heathland, dry sand and shingle soil of low fertility mainly covered with heather, bracken and birch.

Sussex.—*Kingley Vale* (1952). 230 acres, 4 miles N.W. of Chichester. Displays all stages of yew wood development. *Lullington Heath* (1956).† 155 acres, 4 miles N.E. of Seaford. Unploughed chalk heath with an interesting flora.

Westmorland.—*Moor House* (1952).† 10,000 acres. Centre for research on high-altitude climate, bog growth, peat erosion, effects of grazing and burning and re-establishment of high-altitude woodlands.

Wiltshire.—*Fyfield Down* (1956).† 612 acres, 3 miles W.N.W. of Marlborough. High chalk downland rich in Sarsen stones.

Worcestershire.—*Wren's Nest* (1956). 74 acres. Dudley. A classical exposure of Upper Silurian rocks with unique preservation of fossil fauna. Over 300 species of marine life at the time of deposition of the strata—about 425 million years ago—have been identified.

Yorkshire.—*Ling Gill* (1958). 12 acres. Small wooded ravine cut into the limestone, mainly ash and hazel. Rich ground flora.

SCOTLAND

Aberdeenshire.—*Sands of Forvie* (1959).* 1,774 acres, near Newburgh. A broad foreshore backed by a line of dunes, passing inland to dune heath and rough pasture. A wide variety of flowering plant species has been recorded. Breeding ground for Eider, Shoveler, Shelduck, Red Grouse, Tern and Fulmar.

Angus.—*Caenlochan* (1961).* 8,991 acres in Angus, Perthshire and Aberdeenshire. Of botanical interest for lime-rich plant habitats and locally dry climate. Animals found include Red Deer, Ptarmigan and Golden Eagle.

Bute.—*Glen Dionhan* (1956). 24 acres in N.W. Arran. A steep-sided post-glacial gorge between Meall nan Damh (1,870 ft.) and Ben Bhiorach (1,572 ft.). Two rare local Whitebeams are found, intermixed with Rowan.

Dumfries.—*Caclaverock* (1957).† 13,514 acres. Salt marsh and foreshore or mud between the R. Nith and the Lochan Water. Noted winter haunt for wildfowl, particularly Barnacle Geese. *Tynron Juniper Wood* (1958). 12 acres. A dense growth of juniper up to about 10 ft. high, unmatched in South of Scotland.

Fife.—*Isle of May* (1956). 140 acres at the mouth of the Firth of Forth. Notable bird migration research has been carried on here since 1907. A Bird Observatory and Field Station was set up in 1947. *Morton Lochs* (1952).† 59 acres, 7 miles N.N.W. of St. Andrews. Artificial lochs on a main migration route of wildfowl and waders. *Tent-*

muir Point (1954). 92 acres, 7 miles N. of St. Andrews. Area for the study of coastal accretion and plant colonization.

Inverness-shire.—*Cairngorms* (1954).† 39,689 acres, in Inverness and Aberdeenshire. Flora includes the native Scots Pine, Juniper and Birchwoods, moorland vegetation and arctic-alpine plants. Fauna includes Wild Cat, Red and Roe Deer, Ptarmigan, Dotterel, Crested Tit, Scottish Crossbill and Golden Eagle. *Craigellachie* (1960). 642 acres, W. of Aviemore. Includes an expanse of birchwoods on steep slopes and moorlands rising to over 1,700 ft. In an interesting insect fauna, rare moths are found. *Loch Druidibeg* (1958)* 2,577 acres, on S. Uist. Surviving ancestral breeding ground of the native Grey Lag Goose. Shallow coastal waters support a rich aquatic flora. *Rhum* (1957).† 26,400 acres, 7 miles S. of Skye. Includes small mountains of volcanic origin, composed of rare ultra basic rocks. Main centre for study of the Red Deer. *St. Kilda* (1957). 2,107 acres, 45 miles west of the Outer Hebrides. Rich vegetation on cliffs rising to nearly 1,400 ft. Immense clusters of Sea bird colonies, including Gannet, Fulmar and Puffin.

Kirkcudbright.—*Kirkconnell Flow* (1959)* 383 acres, 4 miles S. of Dumfries. Variety of vegetation types, including Scots Pine and Birch scrub. Small remnant areas of raised bog. *Silver Flowe* (1956). 472 acres, 12 miles N.N.W. of New Galloway. A series of seven raised bogs, undrained and virtually undisturbed.

Perthshire.—*Ben Lui* (1961). 925 acres, S.W. of Tyndrum. Renowned for rich montane flora. The mountain is formed of contrasting rock types of the Dalradian Series. *Rannoch Moor* (1958). 3,704 acres, N.E. corner of the Moor. An example of shallow, high altitude blanket bog, with flora of considerable interest.

Ross and Cromarty.—*Beinn Eighe* (1951). 10,450 acres, 45 miles W.N.W. of Inverness. Acquired for preservation and study of the fairly

large remnant of Caledonian Pinewood. *Inverpolly* (1961)* 26,791 acres on the N.W. Coast of the county. The Reserve includes three summits over 2,000 ft and Loch Sionascaig and a wide diversity of habitats. Wild Cat, Pine Marten and some Red Deer and Golden Eagles are found. Relics of primitive birch-hazel woodland. *North Rona and Sula Sgeir* (1956). 320 acres, islands 44 miles N.W. of Cape Wrath. Home of the Atlantic Grey Seal and believed to hold about half the world's population of this seal. *Rassal Ashwood* (1956). 202 acres in Wester Ross near the head of Loch Kishorn. Example of ashwood growing on limestone pavement.

Stirlingshire.—*Clairinsh* (1958). 15 acres. An island in the southern part of Loch Lomond. Oakwood, largely retaining mixed age composition.

Sutherland.—*Inchnadamph* (1956)* 3,200 acres. Includes the Karst type of limestone country with sink holes, underground streams and caves. *Invernaver* (1960). 1,363 acres in N. of Sutherland, near mouth of R. Naver. Contains a wide variety of habitats, including those on blown shell sand, with notable boreal plant communities and unusual development of Juniper scrub on peat. *Strathly Bog* (1960). 120 acres. Low-lying blanket bog, with a rich assemblage of bog plants.

Zetland.—*Haaf Gruney* (1959). 44 acres. A small uninhabited island between Feltar and Unst. Breeding ground for Storm Petrel, Black Guillemot and Fulmar. *Hermaness* (1955). 2,383 acres, N.W. of Unst. Important breeding station of the Great Skua, Arctic Skua, Red-throated Diver and other seabirds. Large gannetry and colonies of Kittiwake and Puffin. The Reserve includes Muckle Flugga and Outstack. *Noss* (1955). 774 acres, 4 miles E. of Lerwick. Important nesting-place for seabirds on the cliffs and moorland. Geologically, Noss exhibits striking erosion in sandstone and flagstones of Old Red Sandstone Age.

THE NATIONAL PARKS

The ten National Parks described below in their order of designation have been established in England and Wales—the legislation noted on p. 408 does not apply to Scotland. These areas are not public property and visitors are not free to wander over private land within the Park boundaries. They have been marked out for special planning care aimed at two prime purposes: to preserve and enhance their natural beauty, and to promote their enjoyment by the public.

Peak District National Park (542 sq. miles).—Mainly in Derbyshire but extending into Staffordshire, Cheshire, the West Riding of Yorkshire and the City of Sheffield. In the south and east are limestone uplands, and finely wooded dales with swift, clear rivers and unspoilt stone villages. Northwards, moorlands, edged by gritstone crags, attract hill walkers and climbers. There are information centres at Edale and at Buxton (just outside the Park) and an information caravan tours the Park.

Lake District National Park (866 sq. miles).—In Cumberland, Lancashire and Westmorland. Spectacular mountain scenery with wooded lower slopes enhanced by lakes and tarns. The area includes England's highest mountains (Scafell Pike, Helvellyn and Skiddaw) and largest lakes. Walking and rock-climbing are the principal recreations, but there are fishing, swimming, sailing, boating and winter sports as well. There is an information room in the public library at Windermere.

Snowdonia National Park (845 sq. miles).—In Caernarvonshire and Merioneth and a small section of Denbighshire in North Wales. A wild mountainous region, traversed by high passes, offering some of the finest rock-climbing and mountain walking for both beginner and expert. The main

valleys, often finely wooded, hold a lake (or llyn) and are watered by rivers with cascading falls. There are information centres at Dolgellau, Llanrwst and Tremadoc.

Dartmoor National Park (365 sq. miles).—In Devon, the highest area of high moorland in southern England, famous for its granite "tors" often weathered into fantastic shapes. Fine hanging oak woods adorn the river valleys which lead up into the Moor. The Park is rich in prehistoric relics and offers fine walking and riding.

Pembrokeshire Coast National Park (225 sq. miles).—A spectacular section of Britain's coastline, where rocky cliffs alternate with bays and sandy coves. In the north is Mynydd Presely, abounding in prehistoric relics. The Park includes the fine estuary of Milford Haven, Tenby, the Cathedral of St. David's, and Carew and other Norman castles.

North York Moors National Park (553 sq. miles).—In the North Riding of Yorkshire, the Park stretches from the Hambleton Hills in the west to the coastline above Scarborough. On the coast sheltered bays and sandy beaches alternate with headlands harbouring villages such as Staithes and Robin Hood's Bay. The heart of the Park offers tracts of open moorland, intersected by beautiful wooded valleys. Mount Grace Priory and the

abbeys of Rievaulx and Byland are within the Park.

Yorkshire Dales National Park (680 sq. miles).—An area of upland moors, cut by deep valleys, in the North and West Ridings of Yorkshire, the Park includes some of the finest limestone scenery in Britain: Kilnsey Crag in Wharfedale, Gordale Scar, and Malham Cove in Malhamdale. In the Park also are Swaledale and Wensleydale, the three peaks of Ingleborough, Wharfedale and Pen-y-Ghent, and many relics of the past such as the Roman fort at Bainbridge and Bolton Abbey in Roforfedale.

Exmoor National Park (265 sq. miles).—Mainly in Somerset but extending into Devonshire, this is a moorland plateau surrounded by finely wooded combes. The well-known coastline between Minehead and Combe Martin Bay is exceptionally beautiful. In the east are the Brendon Hills. There is an information centre at Minehead.

Northumberland National Park (398 sq. miles).—A region of hills and moorland, stretching from Hadrian's Roman Wall in the south to the Cheviot Hills on the Scottish Border. The area is rich in historical interest. An information office covers the National Park.

Brecon Beacons National Park (515 sq. miles).—The most recent National Park, established in 1957, is centred on "The Beacons" with its three peaks: Corn Du, Crybyn and Pen-y-Fan, rising nearly to 3,000 feet. Bounded in the east by the Black Mountain in Monmouthshire; its western boundary rests on Carmarthenshire's Black Mountains above Abergavenny. The Usk valley, Llangorse Lake, Brecon Cathedral, Carreg Cennen Castle and Llanthony Abbey are all within the Park. There is an information centre at Brecon.

AREAS OF OUTSTANDING BEAUTY

Generally these are smaller in extent than the National Parks, no special arrangements for their administration being laid down, and there is no special provision for the development of facilities for open-air recreation. The areas so far designated are:—

Gower (73 sq. miles).—Partly in the County of Glamorgan and partly in Swansea, South Wales, the area is known for its beautiful coastline, its rocky limestone cliffs, sandy bays and coves and for its wooded ravines stretching inland.

Quantock Hills (38 sq. miles).—The main feature of this area in Somerset is the range of red sandstone hills rising to a height of 1,260 feet at Will's Neck above Crow Combe.

Lleyn (60 sq. miles).—An isolated peninsula in North Wales of unique character, still largely unspoilt by the hand of man.

Surrey Hills (160 sq. miles).—The Hog's Back and the ridge of the North Downs from Guildford to

Tisbury in the east are within this area, as are Leith Hill, Hindhead Common, the Devil's Punch Bowl; the well-known villages of Abinger, Shere, Hambledon and Chiddingfold; Box Hill and Frensham Ponds.

Dorset (400 sq. miles).—This is the largest area so far designated. It includes the whole of the coastline between Lyme Regis and Poole, with the Isle of Portland and Weymouth omitted, and stretches inland to include the Purbeck Hills and the downs, heaths and wooded valleys of the Hardy country.

Northumberland Coast (50 sq. miles).—Low cliffs and rocky headlands with active fishing villages comprise this area which stretches from just south of Berwick to Amble. It includes Holy Island, with the oldest monastic ruins in the country; the Farne Islands, and the great castles of Bamburgh, Dunstanburgh and Warkworth.

Cannock Chase (26 sq. miles).—This is an area of high heathland in Staffordshire, relieved by varied scenery in which parklands adjoin farms, woodlands and pleasant villages. Deer continue to roam over the Chase.

Shropshire Hills (300 sq. miles).—This area includes the fine landscape around Church Stretton, with Caer Caradoc, the Long Mynd, the Stiperstones, and the long ridge of Wenlock Edge from which it extends north-east to the Wrekin and the Ercall.

Malvern Hills (40 sq. miles).—The area embodies the whole range of the Malvern Hills in the counties of Gloucester, Hereford and Worcester. Such well-known features as the Worcestershire Beacon, North Hill, the Herefordshire Beacon, and Midsummer Hill, a National Trust property, are within the area.

Cornwall (360 sq. miles).—Comprising a number of separate areas including Bodmin Moor and some of the finest and best-known coastal scenery in Britain. Most of the Land's End peninsula; the coast between St. Michaels Mount and St. Austell with Falmouth omitted; the Fowey Estuary and Rame Head are all included; in north Cornwall most of the coast to Bedruthan Steps, north of Newquay, and between Perranporth and Godrevy Towns.

North Devon (66 sq. miles).—Comprising three sections of fine coastline—the whole of the Hartland peninsula; from Bideford Bar to the western limits of Ilfracombe, and from east of Ilfracombe to the boundary of the Exmoor National Park. Clovelly, Braunton Burrows, Woolacombe and Combe Martin are all included.

South Devon (128 sq. miles).—It includes the magnificent coast between Bolt Head and Bolt Tail, a National Trust property; Salcombe, Slapton Sands and Dartmouth, and the four estuaries and valleys of the Yealm, Erme, Avon and Dart.

TEMPERATURE AND RAINFALL RECORDS

GENERAL: The *maximum shade temperature* of the air on record is 136° F. at Azizia (Uzzizia) in Tripoli on Sept. 13, 1922; the *extreme lowest recorded temperature* is in Antarctica *e.g.*—125° F. at Vostok on Aug. 25, 1958. In the upper air temperatures as low as —143° F. have been recorded—*e.g.* over Halley Bay on Aug. 9, 1959 at about 27 kms.

The *wettest place* in the world is considered to be the neighbourhood of Cherrapunji in Assam where annual averages exceeding 400 inches have been obtained, of which 90 per cent, usually falls in the six months April to September, and annual totals have reached 670 inches.

U.K.: The *maximum shade temperature* recorded in the air at 4 feet above the ground is 100° F. at Greenwich Observatory (Aug. 9, 1911).

The *lowest shade temperatures* are —17° F. at Braemar (Feb. 11, 1895) and —16° F. at Kelso (Dec. 3, 1879).

The *greatest rainfall* recorded in a day was at Martinstown, near Dorchester, 11.00 inches in the 24 hours commencing 9 a.m. (July 18, 1955). *Annual totals* exceeding 240 inches were recorded at The Sty, Borrowdale, in 1872, 1923, 1928 and 1954; at Ben Nevis Observatory in 1898 and at Llyn Llydaw, Snowdon, in 1909. The *smallest annual total* is 9.29 inches at Margate in 1921 and the *largest* may be regarded as 257 inches at Sprinkling Tarn in 1954.

WEATHER IN THE UNITED KINGDOM, 1961-1962

(1961) August.—Generally cool weather continued from July until the end of August, when sunny warm weather predominated. North-west winds over the British Isles during the 1st and 2nd brought sunny periods, with showers and local thunderstorms, especially in parts of the south of England, 1 in. of rain falling in 30 mins. locally in Devon. Rains, associated with a depression to the north, were widespread on the 3rd, giving 3½ in. in 6 hours locally in Westmorland. The 4th to 5th was generally showery with prolonged rain in southern England on the 4th and 5th. Air temperature fell to 30°F. on the 5th at Grizedale (Lancashire). On the 8th wind reached gale force in most districts, with widespread rains, which exceeded 2 in. in parts of Scotland, followed by serious flooding, especially in the Glasgow area. Heavy rain occurred on the 10th in the south-west, exceeding 3 in. in parts of Somerset, and on the 11th in eastern England. The 12th was generally fine and sunny. Cool north-westerly winds, with cloudy periods, prevailed until the 20th, followed by westerly winds and periods of rain mainly in the west, from the 21st to 26th. Rain was widespread in Scotland and Northern Ireland on the 27th, but fine warm weather prevailed over southern England. The remainder of the month was generally fine and warm with southerly winds, although sea fog affected coastal districts in the south-west. The 29th was unusually warm, temperatures reaching 86°F. in many places in England, and 89°F. at Pershore (Worcester) and Abingdon (Berkshire). The total rainfall was less than half the 1916-1950 average in parts of the south-east of England, but more than 150 per cent. in the west of Scotland and in the Peak District. Temperatures were generally somewhat below the 1921-50 average. Sunshine totals exceeded the 1921-50 average, except in Northern Ireland.

September.—The weather was generally mild, with severe gales, especially on the 15th-16th over England and Wales, the 16th-17th over Scotland and over Ireland, especially the north-west, where widespread damage to forestry plantations and cereal crops occurred. During the first two days temperatures exceeded 80°F. over much of central and southern England, reaching 88°F. at Jersey and 89°F. at Gatwick (Surrey). Thunderstorms developed on the afternoon of the 2nd in Scotland and Northern Ireland, extending to parts of northern England during the following day. At Manchester Airport 1.39 in. of rain fell in an hour during the morning of the 3rd. Heavy rain also occurred in southern England on the 3rd, with 3.70 in. at Sandown, Isle of Wight. By the 5th a belt of rain spread south-eastwards across the country and there were local thunderstorms on the 6th. Fine, sunny weather prevailed during the 7th-9th, but rain reached western districts on the 9th. The 10th was generally dull. Two West Indian hurricanes, travelling to the east Atlantic as intense depressions, brought widespread stormy weather and frequent rains from the 12th-16th. Rain was heavy in the north-west of England and Wales on the 12th and in southern England on the 13th. Gusts exceeded 104 m.p.h. at Ballykelly (Northern Ireland) and at Tiree on the 16th. More settled weather prevailed from the 17th-26th, with little rain; sunny weather on the 18th and frequent fog, which persisted throughout the 23rd in many areas. Night temperatures fell to 20°F. in North Wales on the 25th and slight snow occurred in northern Scotland on the 26th. Widespread gales and rain prevailed in the north-west on the 28th and there was rain over much of the country during the last two days.

Rainfall totals generally exceeded the average, with more than 150 per cent. in parts of the south-west and extreme south-east of England. Temperatures were generally about 2°F. above the average. Sunshine totals exceeded the average in the north-west, but were less than usual for September in eastern England.

October.—Mild weather predominated during the month, the second half being cyclonic and stormy. The first two days were generally mild and sunny, air temperature at Lissiemouth, in Nairn, reaching 68°F. Fog developed in central and eastern England in the early morning of the 2nd but cleared by mid-day. The next four days brought widespread and heavy rains with flooding in parts of southern England on the 6th, while structural damage was caused locally by tornadoes near Penzance and Bournemouth. South-west winds predominated from the 8th to 11th with further rains and local flooding. Temperatures on the 10th reached 70°F. over much of the east Midlands, East Anglia and Kent. Dry sunny weather with light winds prevailed from the 12th to 15th, apart from early morning fog, which persisted all day on the 15th in the south Midlands and south-east England. With freshening winds from the north-west the fog cleared, giving showery periods alternating with sunshine. During the night, 16th-17th, heavy rain occurred in the west, with more than 2 in. in Snowdonia and parts of Lancashire. The next three days were generally cool with mainly northerly winds, and snow or sleet on the Pennines on the 18th. Winds from the south-west then predominated until the 27th, reaching gale force locally each day from the 17th to 25th, and continuing in southern England until the 27th, with frequent rains and scattered thunderstorms. The 28th and 29th were mainly dry and sunny, apart from fog especially at night. The last two days of the month were unsettled with strong winds in the north. Air temperatures fell to 25°F. near Norwich on the 29th and in Aberdeenshire on the 30th. The total rainfall exceeded the average over the greater part of the country. Mean temperature exceeded the average for the fifth consecutive October. Sunshine totals were about 150 per cent. of average locally in the Midlands.

November.—The month was generally rather cool, but sunny and mainly drier than usual. On the 1st temperatures reached 63°F. in parts of the south-east and south-west of England, with 64°F. at Exeter, although rain occurred in most districts. Cool northerly winds spread over the British Isles from the 2nd to 4th, with sunny periods and snow as far south as eastern England on the 4th. On this day Kew (Surrey) recorded the sunniest November day on record there. Milder weather with south-westerly winds and occasional rain and drizzle predominated until the 8th. Night fog occurred widely from the 6th to 10th and thunderstorms developed locally during the 8th to 11th. More than 1 in. of rain fell in parts of Hampshire and Dorset on the 10th. From the 11th to 15th winds reached gale force in many parts of southern England. From the 16th to 22nd high pressure prevailed over the country with quiet, mainly dry weather and fog and frost at night, the fog persisting all day locally on the 22nd. With freshening winds from the west good sunny periods occurred, but scattered showers became frequent on the 24th to 25th, falling as snow in parts of Scotland. Fog and frost were widespread during the night 26th to 27th and in some persistently foggy areas temperatures remained below freezing point all day. Air tem-

perature fell to 17°F. for the 26th at Rugby and to 10°F. on the 28th in Aberdeenshire. Unsettled weather prevailed during the last two days, with rain at times and sleet or snow in the north. Total rainfall was less than half the average over much of the country with about 25 per cent. around Lyme Bay. At Ross-on-Wye it was the coldest November since that of 1952. Sunshine totals were much above average in north-west England and northern Scotland, but below in south-west England.

December.—Cold weather predominated, especially during the latter half of the month, although sunshine generally exceeded the average. During the first week cold northerly winds spread to most of the country, but southern England was mild and wet on the 1st and again on the 3rd. On the 4th-5th most coastal districts experienced gales, while rain occurred in the south and prolonged snow in Scotland. Over the higher ground in the Midlands and north snow lay 4-6 in. deep by the 7th or 8th. The 7th was generally fine and sunny but on the 8th snow occurred in the Midlands and north. With warm moist air from the south-west on the 9th and 10th fog became widespread. The next few days continued generally mild, dull and wet. Temperatures reached 60°F. on the North Wales coast on the 10th, in parts of Devon on the 11th and in the London area on the 12th. By the 14th quiet, mainly dry, weather prevailed, with increasing frost and fog. Night frost was severe in many places, temperature falling to 18°F. on several mornings and remaining below freezing point all day in persistently foggy areas. Fog was dense in eastern England on the 15th, in south Scotland on the 17th and extended over nearly the whole of England and southern Scotland on the 21st. Winds from the east on the 22d mainly cleared the

fog. Cold sunny weather persisted until the 28th, with temperatures falling to below freezing point over much of the country. The Christmas period was one of the coldest this century, temperatures falling to 9°F. at Edinburgh on the early morning of the 27th. Temperatures remained below freezing over much of the country throughout the 28th. Milder air reached southern England on the 29th, giving temperatures of 50°F. in parts of Cornwall. On the 31st heavy falls of snow occurred in south and central England, level snow lying 1 ft. deep on higher ground. Temperatures on the 31st fell to -15°F. at Grantown-on-Spey, in Nairn, and 1°F. at Kielder Castle, in Northumberland. The total rainfall was less than half the average in Ross-shire, but more than 150 per cent. in the London area and east Midlands. The mean temperature over Great Britain was lower than in any December since that of 1950. Over England and Wales it was the sunniest December since those of 1948 and 1946.

Year 1961.—For the year as a whole temperature, rainfall and sunshine were all fairly close to the average. The period of three months, February to April, was the mildest late winter and early spring over England and Wales this century; over Scotland only the similar period of 1945 was milder. The autumn months of September and October were also much milder than usual, although not as mild as that of 1959. Over Great Britain January, May, July, August and December all gave mean temperatures below average, but the deficiencies in these months did not quite outweigh the excesses in the other months of the year. The warmest month of the year was generally August with December the coldest. The warmest days were July 1 and August 29 when temperatures reached about 90°F.

in southern England. The lowest temperatures occurred on the night of December 31; at Northolt the temperature of 3°F. was the lowest air temperature recorded in the London area since 1867. The rainfall exceeded 120 per cent. of average in the Western Highlands of Scotland, while there was less than 90 per cent. in much of eastern Scotland, the Midlands and around the Severn Estuary. Over England and Wales the total July 1960 to February 1961 amounted to 39.0 in., more than previously recorded in similar periods. During the summer half-year of 1961 the rainfall over Great Britain was rather less than average. The sunniest month of the year was June over England and Wales, and May over Scotland. England and Wales recorded rather more than the average sunshine, Scotland about average and Northern Ireland rather less. Outstanding features of the weather of 1961 were the mild February to April; the 30 days without measurable rain in parts of southern England from late February to late March; the widespread and severe gales e.g. on Jan. 27, Feb. 26-27, Mar. 26, July 13, Sept. 16-17, Oct. 17-25; the minor tornadoes on Feb. 25 in Buckinghamshire and on Oct. 6 in parts of Cornwall, Norfolk, and Worcester; the frosts of May 26-29 causing some crop damage in central and southern England; the cold weather and snow during the Christmas period. The largest totals of bright sunshine, in hours, included:—Jersey 2041; Shanklin 2001; Guernsey 1998; Eastbourne 1980 and Littlehampton 1911.

(1962) January.—Weather was cold during the first few days but subsequently mainly mild, sunny and stormy. Over much of the country snow lay 6-8 in. deep on the 1st and temperatures remained below freezing during the 1st and 2nd. Weather continued dry, cold and sunny, but with fog patches. Milder air reached Scotland on the 4th and most of the country by the 6th, when temperatures in the south-west rose to 54°F. and widespread rain cleared the remaining snow. Gales were widespread on the 8th and from the 11th to 16th, with a gust of 104 m.p.h. at Hartland Point on the 11th, and heavy falls of snow in the north and east of Scotland and northern England on the 12th. The 14th was generally sunny and the 15th generally wet, with over 3 in. in parts of western Scotland. On the night of the 16th a small tornado caused damage at Egremont, Cumberland. After the 16th quieter weather, with sunny spells, predominated, but heavy rain and gales returned on the 21st. Thundery showers occurred on the 22nd and warm front rain on the 23rd-24th. Subsequently weather became cloudy and mild in the south and north-west, but brighter elsewhere with frost and fog at night, fog persisting in many industrial areas during the 27th and 28th. The 29th was generally colder with winds from the east and snow fell over much of the country on the 30th. Total rainfall exceeded 150 per cent. in parts of the west of Great Britain, mean temperature was slightly above average in most districts and sunshine exceeded twice the average locally in the Midlands and London area.

February brought stormy periods; sunshine appreciably above average in western and central districts; temperatures mostly above average, except during the last week. On the 1st south-westerly winds prevailed with sunny weather in the south. On the 3rd heavy rain occurred, with hill and coast fog, and snow and gales in the north. The 5th was generally sunny; on the 6th heavy rain occurred in the north; the 7th was showery and brighter; the 8th to 10th generally cloudy and mild, with 50°F. at Stonehaven (Kincardine). Stormy weather prevailed from the 11th to 16th with gusts

of 122 m.p.h. at Lowther Hill (Lanarkshire) on the 11th, 113 m.p.h. at Stornoway on the 12th and 119 m.p.h. at Lowther Hill on the 16th. Structural damage occurred on the 16th with strong north-west winds on the eastern side of the Pennines. At Sheffield, where a gust of 95 m.p.h. was recorded, a major disaster occurred, some two-thirds of the houses suffering some damage. Milder weather spread from the south-west on the 18th; the 19th and 20th were generally quiet and dull. Temperature reached 59°F. at Cockle Park (Northumberland) on the 20th. For the remainder of the month easterly winds prevailed, with gales on the 26th and 27th along the south coast and frequent snow showers in the east; snow lying up to 4 inches deep in parts of Lincolnshire. On the morning of the 28th snow lay more than 2 in. deep in parts of Scilly, Guernsey and Jersey, an unusual event there.

March.—Over England and Wales it was the coldest March this century, and over Scotland the coldest since that of 1947. At Ross-on-Wye it was the coldest since 1883. The weather until the 25th was predominantly anticyclonic with northerly winds. By the 4th snow lay up to 4 in. deep in parts of England, Wales and the Channel Islands, and up to 2 ft. deep in the Cairngorms. With lighter winds air-frost was widespread on the 5th-6th. Fog developed in places on the 6th and temperature fell to 2°F. in Aberdeenshire. On the 7th south-easterly gales spread to southern England and Wales, causing serious damage to sea-walls and flooding, especially near Penzance and Tenby. The 8th and 9th were milder, except in the north, but by the 10th and 11th cold north-easterly winds spread over the country, with sleet and snow showers and widespread night frosts, which lasted for several days. The 15th brought heavy rain to Devon and Cornwall, while the east remained bright and cold. The 16th and 17th were more generally dry and sunny. By the 18th north-easterly winds returned with light wintry showers and bright, cold weather. The last six days of the month were milder with depressions crossing the country from the Atlantic, giving more general rains and local thunderstorms on the 26th and 27th. Temperature rose to 60°F. on the 29th in Hertfordshire. Total rainfall was generally below average, but exceeded average both in the south of England and Wales and in the north of Scotland, with twice the average in Aberdeenshire. Sunshine totals rather exceeded the average in most districts.

April.—The changeable stormy weather of late March continued until April 11. Depressions from the Atlantic brought local gales, occasional snow, sleet or hail showers, and heavy widespread rains, especially on the 2nd, 4th, 7th and 10th. Subsequently an anticyclone became established to the north of Scotland and north-easterly winds spread over the British Isles. The 13th and 14th were generally cool and sunny with over 12 hrs. sunshine in north-western districts. As the anticyclone moved to southern Scandinavia on the 15th winds became more easterly, with cool cloudy weather in the east, but much sunshine in western Scotland. Temperature fell to 18°F. on both the 14th and 15th at Logie Coldstone, Aberdeenshire. By the evening of the 16th rain from the continent spread to most of the country and warm southerly winds brought temperatures of 60°F. to parts of south-east England and the Midlands. Changeable weather predominated from the 18th to 21st. The 21st, Easter Saturday, was generally wet with heavy rain at times. Warm sunny weather prevailed over much of the country on Easter Sunday and Monday. Temperatures reached 70°F. in places, 73°F. being recorded at Southampton on the 26th. Sea fog developed in the English

Channel and Irish Sea. By the 27th north-easterly winds became re-established; the sea fog dispersed; cool cloudy weather prevailed in eastern districts with much sunshine in western and northern districts. Stornoway recorded 230 hrs. of bright sunshine, giving the sunniest April since records began there in 1880. The total rainfall was less than half the average in parts of Inverness-shire and Perthshire, and more than 175 per cent of average in parts of central Wales, north-west England and in Rcxburgh.

May.—Easterly winds prevailed over most of the country during the first three days of the month, with cool cloudy weather in the east but considerable sunshine in the west. On the 1st Paisley recorded 70°F., the highest temperature of the month in Scotland, while at Santon Downham, Norfolk, temperature fell to 22°F., the lowest for the month in England and Wales. Cyclonic weather prevailed from the 3rd to 11th, with widespread rain and fog on the 5th, and local thunderstorms on the 7th to 11th. Temperature reached 70°F. at Herne Bay, Kent, on the 7th. By the 12th an anticyclone became established off the south-west of Ireland and occasional rains alternated with sunny periods with winds mainly from the north. Unsettled cyclonic weather prevailed from the 16th to 22nd. On the 16th winds reached gale force over much of Scotland and northern England, a gust of 100 m.p.h. being recorded at Benbecula, in the Outer Hebrides. Depressions from the Atlantic brought widespread rains on the 16th, 18th and 20th, and thunderstorms on the 19th and 21st. Flooding occurred in the Midlands. From the 24th until the end of the month an anticyclone was situated to the west or north-west of the country. Winds were mainly from the north, with thundery rains in the east and south, but sunny periods in the west. Mean temperatures were below average for the third successive month. May was notable for relatively low day maximum temperatures, especially in south-east England. Rainfall totals exceeded 250 per cent. of average in parts of Ross-shire, but were less than 75 per cent. of average in parts of coastal districts of Scotland, the east Midlands and southern England.

June.—In most parts of the country the weather of the month was cooler, drier and sunnier than usual. During the first week cold northerly winds continued in most districts, with long sunny periods and fairly widespread ground frost at night and local air frost on the 1st to 4th. Air temperature fell to 22°F. near Norwich on the 1st and 3rd and to 26°F. in Lanarkshire on the 1st. By the 5th warmer weather spread to most of the country, but with easterly winds in south-east England temperatures there remained below average. The fine sunny spell continued until the 9th (Whit Saturday) when some rain occurred in Scotland and thunderstorms developed in south-east England. Whit Sunday was generally dry and sunny with northerly winds. The Bank Holiday Monday was dull,

with rain spreading to most areas. Subsequently rain occurred in many northern districts, while southern England remained dry and sunny. The 16th and 17th were dry and sunny nearly everywhere. The 18th to 24th brought stormy weather with gales and heavy rain in the north. Early morning fog was widespread in the English Channel, Irish Sea, Midlands and south-west England on the 20th to 21st. On the night, 23rd to 24th, gales were severe in Scotland and northern England, a gust of 97 m.p.h. being recorded at Lowther Hill, Lanarkshire. Northerly winds prevailed again from the 26th, with temperatures well below average in the north. Air frost occurred locally in Scotland on the 27th. The total rainfall was less than 25 per cent. of average over much of the south-eastern half of England. Mean temperature was about average in Scotland, but over England and Wales it was below average for the fourth consecutive month. Sunshine totals exceeded average in the east of Scotland and over much of England and Wales, especially the south-west. Over Scotland, as a whole, both June and May were less sunny than April.

July.—The weather was generally cooler, drier and less sunny than usual. An anticyclone, initially to the west of the British Isles, maintained north-westerly winds, although the 2nd was sunny and warm in the south. As winds became more northerly, with dull and showery weather, temperatures fell sharply and London experienced on the 4th one of the coolest July days for 14 years. At Alwen, North Wales, temperature fell to 30°F. on the 6th. As the anticyclone moved across the country sunny dry weather prevailed, especially in the south. A depression moving eastwards brought thundery rains on the 9th to 11th, resulting in flooding in parts of central and southern England. The 13th was generally sunny but another depression brought widespread rains and thunderstorms on the 14th, followed by a few mainly dry and sunny days. With south-westerly winds, rain again spread in from the west on the 18th and 20th to 21st. The 22nd was sunny in the south and on the 23rd sunshine was more widespread. Associated with a depression moving across northern France, thunderstorms occurred in southern England on the 25th and 26th, giving heavy rains in south-east England on the 26th with local flooding. On the 25th temperature rose to 81°F. at Cannington, Somerset. The 27th to 29th was mainly dry as a ridge of high pressure moved across the country, but a depression to the north brought widespread rain on the 30th. The 31st was generally fine, but thundery rains occurred in the north. While the total rainfall was less than average over most of the country, the London area received 150 per cent. Mean temperature over England and Wales was below average in each month from March to July, and this period ranks as the coolest experienced this century.

PUBLIC HOLIDAYS

BANK HOLIDAYS IN ENGLAND, WALES, NORTHERN IRELAND AND THE CHANNEL ISLANDS ARE:—Easter Monday, Whit Monday, first Monday in August and first week-day after Christmas (Boxing Day).

Banks are also closed on Good Friday and Christmas Day.

The Stock Exchange is closed on Bank Holidays, Good Friday and Christmas Day; and on Saturdays throughout the Year.

Custom House and Docks, as Banks; with the Queen's Birthday (when decreed).

Excise and Stamp Offices, as Banks; with Whit Tuesday and Coronation Day, if and when decreed.

Law Offices.—Good Friday, Easter Monday and Tuesday, Whit Monday, Christmas Day, and first week-day after Christmas.

BANK HOLIDAYS IN SCOTLAND ARE:—New Year's Day, first Monday in May and first Monday in August.

Banks in Scotland are also closed on Good Friday and Christmas Day. There are also Spring and Autumn holidays in most Scottish cities and towns.

*Scotland has special Term (Quarter) Days:—*Candlemas, Feb. 2; Whit Sunday, May 15 (Fixed date); Lammas, Aug. 1; and Martinmas, Nov. 11; *the Removal Terms are* May 28 and Nov. 28.

TEMPERATURE AND SUNSHINE

AT VARIOUS PLACES IN GREAT BRITAIN

Mean Temperature of the air (° C.) and Bright Sunshine (as mean hours per day) at representative British Health Resorts and Towns during the year July, 1961, to June, 1962, and the calendar year 1961. Also height of Climatological Station above mean sea level, altitude being given in feet. Fuller details of the weather are given in the *Monthly Weather Report* published by the Meteorological Office.

THE BRITISH COUNCIL

65 Davies Street, W.1

The British Council was established in 1934 to promote abroad a wider knowledge of the United Kingdom and of the English language, and to develop closer cultural relations between the United Kingdom and other countries. Most of the Council's funds are derived from grants voted by Parliament. Grants for 1962-63 amounted to £7,466,000.

The Council's activities include the promotion of English language teaching and British studies in universities, training colleges and schools abroad, maintenance and expansion of British libraries and cultural centres, Anglophile societies and British schools abroad; the fostering of personal contacts between British and overseas people, especially in the educational, scientific and professional fields. Scholarships and bursaries for study in this country of British institutions, methods and achievements are granted to overseas graduates and others.

In June, 1962, the Council had staffs at work in most European countries, in many Latin-American Republics, in most countries of the Middle East and

North Africa, in Burma, Indonesia, Japan, Nepal, Thailand and Viet-Nam, in Canada, Australia, India, Pakistan, Ceylon, Ghana, Malaya, Nigeria, Cyprus, Sierra Leone, Tanganyika, and in most British colonies. It promotes cultural relations with the Soviet Union, primarily by sponsoring visits in both directions by professional groups.

The Council maintains centres in the United Kingdom, mainly in university cities, to provide services for students, professional visitors, holders of U.N. and Colombo Plan awards and others from overseas. It makes available Welfare Services and leisure-time facilities to all full-time overseas Students in the U.K., and also provides certain Special Services, including reception on arrival and help with accommodation, for Students of nearly all Commonwealth countries and territories and certain foreign countries.

President, General Sir Ronald Adam, Bt., G.C.B., D.S.O., O.B.E.

Chairman, The Lord Bridges, P.C., G.C.B., G.C.V.O., M.C., F.R.S.

Director-General, Sir Paul Sinker, K.C.M.G., C.B.

THE PRESS COUNCIL

In April, 1947, a Royal Commission was appointed to enquire into the control, management and ownership, etc., of the Press and news agencies and to make recommendations thereon. The Commission, in its report of June, 1949, recommended *inter alia* that a voluntary Press Council be formed.

A constitution ultimately set up provided for the establishment of such a council on July 1, 1953. The objects of the Council were stated in the constitution to be (1) to preserve the established freedom of the British Press; (2) to maintain the character of the British Press in accordance with the highest professional and commercial standards; (3) to keep under review any developments likely to restrict the supply of information of public interest and importance; (4) to promote and encourage methods of recruitment, education and training of journalists; (5) to promote a proper functional relation among all sections of the profession; (6) to promote technical and other research; (7) to study developments in the Press which may tend towards greater concentration or monopoly; (8) to publish periodical reports recording its own work and reviewing from time to time the various developments in the Press and the factors affecting them.

The membership of the Council is composed of 15 editorial representatives (3 national newspaper editors, 2 provincial newspaper editors elected by editors of newspapers in membership of the Newspaper Society, 2 provincial newspaper editors nominated by the Guild of British Newspaper Editors, 1 Scottish newspaper editor, 4 editorial representatives nominated by the National Union of Journalists and 3 editorial representatives nominated by the Institute of Journalists) and 10 managerial representatives (4 nominated by the Newspaper Proprietors Association, 4 nominated by the Newspaper Society, 1 nominated by the Scottish Daily Newspaper Society and 1 nominated by the Scottish Newspaper Proprietors Association).

Chairman, G. Murray, C.B.E.

Vice-Chairman, H. Bate.

Members, K. Brown; S. Campbell; M. Chapman-Walker, C.B.E., M.V.O.; E. M. Clayton; A. Dunnett; C. Eade; M. Edmunds; G. R. French; C. D. Hamilton; C. Hamnett; F. M. Johnston; J. G. Jones; A. M. Lee; A. Lofts; G. Newton; R. J. Erskine Orr; B. Pook; G. Reed; E. T. Symons; D. Greenslade; C. A. Ramsden.

Secretary, Col. W. C. Clissitt, T.D., 1 Bell Yard, Fleet Street, W.C.2.

36 Smith Square, S.W.1.
- The British Employers' Confederation was established in 1919. Its membership consists of 52 national employers' organizations which deal with labour questions in most of the principal industries, other than the nationalized industries.
President, E. J. Hunter, C.B.E.
Director, Sir George Pollock, Q.C.
Gen. Sec., F. J. C. Honey, C.B.E.
- FEDERATION OF BRITISH INDUSTRIES
21, Tothill Street, S.W.1.
- The Federation of British Industries was founded in 1910, and in 1923 was granted a Royal Charter. In the Charter, the F.B.I. is defined as an association of manufacturers founded for the "encouragement, promotion and protection of British Industries of all kinds."
- The membership consists of individual firms engaged in productive industry (excluding the nationalized industries) and trade associations. More than 8,000 firms and 300 trade associations (representing about 40,000 firms) are members. The Federation has 12 regional and district offices and has representatives in 140 centres overseas.
President, C. E. Harrison.
Director-General, Sir Norman Kipping, K.B.E.
Secretary, J. Gough.
- NATIONAL ASSOCIATION OF BRITISH MANUFACTURERS
6, Holborn Viaduct, E.C.1.
- The National Association of British Manufacturers (formerly the National Union of Manufacturers) is a national organization representing manufacturing industry. Formed in 1915, its membership (restricted to manufacturers) now totals over 5,000 individual firms with 60 affiliated trade associations. It is regarded both by Government and by industry as the national representative of medium-sized and smaller firms in particular. It has no party-political affiliations. There are branches in London, Birmingham, Manchester, Liverpool, Nottingham, Leeds, Newcastle, Glasgow, Cardiff and Northern Ireland.
President, Col. E. R. Mayer, T.D.
Director, H. J. Gray, C.M.G.

TRADES UNION CONGRESS (T.U.C.)

Congress House, 23-28 Great Russell Street, W.C.1

[Museum: 4030]

The Trades Union Congress, founded in 1868, is a voluntary association of Trade Unions, the primary purpose of which is to enable the representatives of unions to meet annually to consider matters of common concern to their members. The Congress has met annually since 1871 (with the exception of 1914) and in recent years has met normally on the first Monday in September, its sessions extending through the succeeding four days. Congress is constituted by delegates of the affiliated unions on the basis of one delegate for every 5,000 members, or fraction thereof, on whose behalf affiliation fees are paid. Affiliated unions (in 1961-62) totalled 183 with an aggregate membership of 8,312,875.

The main business of the annual Congress is to consider the report of its General Council dealing with the activities of the Congress year, along with resolutions from affiliated societies on questions of policy and organization. Although 184 trade union organizations are affiliated to Congress, some of these, especially in cotton, are themselves federal bodies including in total 150 more unions. Only two British unions with large membership are not affiliated to the T.U.C.

One of the important responsibilities of the annual Congress is, to elect a General Council to keep watch on all industrial movements, legislation affecting labour and all matters touching the interest of the Trade Union Movement, with authority to promote common action on general questions, and to assist Trade Unions in the work of organization. The General Council is elected by Congress and is composed of 35 members (33 representing 18 trade groups and two representing women workers). Following is a list of these trade groups with the aggregate membership of unions in each group (the woman membership included in the total being shown separately), and with the number of representatives each group is entitled to have on the General Council:—

Trade Group (with representation)	Membership	
	Total	Women
Mining and Quarrying (3)	582,945	49
Railways (3).....	456,300	27,859
Transport (other) (3).....	1,438,150	160,596
Shipbuilding.....	130,979	—
Engineering, Founding and Vehicle Building (3)....	1,652,384	108,023
Iron and Steel and Minor Metal Trades (2).....	217,485	7,867
Building, Woodworking and Furnishing (2).....	536,605	14,244
Printing and Paper (1)....	347,107	78,163
Cotton (2).....	110,966	78,613
Textiles (other) (1).....	92,260	37,776
Clothing (1).....	164,627	127,309
Leather and Boot and Shoe (1).....	102,183	44,671
Glass, Pottery, Food, Chemicals, etc. (2).....	470,058	207,119
Agriculture (1).....	135,000	7,500
Public Employees (1).....	299,082	131,829
Civil Service (2).....	497,345	162,578
Non-Manual (1).....	286,679	85,395
General Workers (3).....	792,720	172,322
TOTAL.....	8,312,875	1,451,923

ing disputes and differences between affiliated organizations; such matters being dealt with by a Disputes Committee of the General Council which investigates matters referred to it and issues its findings thereon, which are invariably accepted by the parties to the dispute. The General Council has power also, if there appears to be justification, to institute an investigation into the conduct of any affiliated organization on the ground that its activities are detrimental to the interests of the Trade Union Movement or contrary to the declared principles and policy of the Congress; but membership of the Congress is voluntary and Unions retain full control of their own affairs, and a penalty of suspension from membership of the Congress or exclusion from membership is the only measure that can be taken to enforce Congress decisions. Through the General Council the Trade Union Movement maintains organic relations with the Government and Government Departments, and with a large number of outside bodies. A major instrument for Government relations is the National Joint Advisory Council which functions on the Cabinet level; in this body the British Employers' Confederation and the Boards of nationalized industries are represented along with the T.U.C. for purposes of consultation and advice on matters of governmental policy and administration, affecting industry. The same bodies, together with the chairmen of the eleven Regional Boards for Industry and representatives of the Federation of British Industries, National Association of British Manufacturers and Association of British Chambers of Commerce, serve on the National Production Advisory Council on Industry which meets under the chairmanship of the Chancellor of the Exchequer, who is accompanied by Ministers of Departments concerned with aspects of production, to advise the government on production questions. The General Council is represented on the National Economic Development Council, established to examine problems associated with faster economic growth. Under the chairmanship of the Chancellor of the Exchequer, the Council includes the Minister of Labour, President of the Board of Trade, representatives of public and private industry and independent members. The General Council nominates members to serve on numerous other bodies, e.g. the National Savings Committee, National Insurance Advisory Committee, British Productivity Council, Consumers' Councils for the nationalized industries and numerous educational and miscellaneous bodies.

Chairman (1962-63), F. Hayday.
General Secretary, G. Woodcock, C.B.E.
Assistant General Secretary, V. Feather, C.B.E.

SCOTTISH TRADES UNION CONGRESS

12, Woodlands Terrace, Glasgow, C.7.

*Chairman (1962-63), D. M. Lander, B.E.M.**General Secretary, G. Middleton, C.B.E.*

The Scottish Trades Union Congress was established in 1897 and it is pointed out that it is in no way a competitor of the British Congress, nor does it "justify its existence on strictly nationalist lines." Its objects are parallel to those of the T.U.C., with which it works in the closest co-operation.

In 1962 the Congress had 90 affiliated Unions and 43 Trades Councils with a membership of 786,833. The Annual Congress is held in April and a General Council of twelve members is elected.

Among the powers vested in it by consent of the Unions in Congress is the responsibility of adjust-

TRADE UNIONS

A list of the 183 Trade Unions affiliated to the Trades Union Congress in 1961-62. The number of members of each Union is shown in parenthesis.

- METAL WORKERS AND ALLIED TRADES, ASSOCIATED (407).—*Sec.*, V. M. Robus, 347 Garratt Lane, Earlsfield, S.W.18.
- MILITARY AND ORCHESTRAL MUSICAL INSTRUMENT MAKERS' TRADE SOCIETY (161).—*Sec.*, D. J. Lofthouse, 58 High Oaks, St. Albans, Herts.
- MINERWORKERS, NATIONAL UNION OF (545,329).—*Sec.*, W. Paynter, 222 Euston Road, N.W.1.
- MINISTRY OF LABOUR STAFF ASSOCIATION (10,751).—*Sec.*, J. L. Tindall, 22 St. George's Drive, S.W.1.
- MONOTYPE CASTERS AND TYPEFOUNDERS' SOCIETY, THE (913).—*Sec.*, L. H. Cline, 80 Blackfriars Road, S.E.1.
- MOULDERS AND FOUNDRY WORKERS' ASSOCIATED SOCIETY (376).—*Sec.*, D. Davies, 47 Coronation Road, Llanelly, Carmarthenshire.
- MOULDERS AND KINDRED INDUSTRIES TRADE UNION, AMALGAMATED (2,500).—*Sec.*, J. Banks, 2 Hamer Avenue, Blackburn.
- MUSICIANS' UNION (29,009).—*Gen. Sec.*, H. Ratcliffe, 29 Catherine Place, Buckingham Gate, S.W.1.
- NATIONAL COAL BOARD LABOUR STAFF ASSOCIATION (406).—*Sec.*, D. H. Taylor, Woodlyn, The Park, Mansfield, Notts.
- PACKING CASE MAKERS (WOOD AND TIN), BOX MAKERS, SAWYERS, AND MILLWORKERS, THE NATIONAL UNION OF (3,928).—*Sec.*, S. G. Reading, 95 Farringdon Road, E.C.1.
- PAINTERS AND DECORATORS, AMALGAMATED SOCIETY OF (64,836).—*Sec.*, A. G. Austin, 4 Camp Street, Lower Broughton, Salford 7, Lancs.
- PAINTERS' SOCIETY, SCOTTISH (12,112).—*Sec.*, A. Black, 6 Fitzroy Place, Sauchiehall Street, Glasgow.
- PATTERNMAKERS' ASSOCIATION, UNITED (15,532).—*Sec.*, W. B. Beard, O.B.E., 15 Cleve Road, W. Hampstead, N.W.6.
- PLASTERERS, THE NATIONAL ASSOCIATION OF OPERATIVE (12,489).—*Sec.*, A. Dunne, 1016 Harrow Road, Wembley, Middx.
- PLUMBING TRADES UNION (55,658).—*Sec.*, H. Kelly, O.B.E., 15 Abbeville Road, Clapham, S.W.4.
- POST OFFICE CONTROLLING OFFICERS, ASSOCIATION OF (13,327).—*Sec.*, S. A. R. Seaton, 33 Barbican, E.C.1.
- POST OFFICE ENGINEERING UNION (76,171).—*Sec.*, C. G. P. Smith, Greystoke House, Hanger Lane, Ealing, W.5.
- POST OFFICE WORKERS, UNION OF (174,354).—*Sec.*, R. Smith, U.P.W. House, Crescent Lane, Clapham Common, S.W.4.
- POTTERY WORKERS, NATIONAL SOCIETY OF (22,612).—*Sec.*, H. Hewitt, O.B.E., 5 Hillcrest Street, Hanley, Stoke-on-Trent.
- POWER LOOM CARPET WEAVERS AND TEXTILE WORKERS' ASSOCIATION (4,750).—*Sec.*, C. S. Yarsley, Callows Lane, Kidderminster.
- POWER LOOM OVERLOOKERS, YORKSHIRE ASSOCIATION OF (1,794).—*Sec.*, E. D. Sleeman, Textile Hall, Westgate, Bradford.
- POWER LOOM TENTERS, SCOTTISH UNION OF (500).—*Sec.*, R. Macbeth, 29 Kinghorne Road, Dundee.
- PRESS TELEGRAPHISTS, NATIONAL UNION OF (1,525).—*Sec.*, M. A. Clayton, 145 Fleet Street, E.C.4.
- PRINT BLOCK ROLLER AND STAMP CUTTERS' SOCIETY (408).—*Sec.*, S. E. Ramsden, 18 Printon Avenue, Blackley, Manchester, 9.
- PRINTERS AND ASSISTANTS, THE NATIONAL SOCIETY OF OPERATIVE (44,540).—*Gen. Sec.*, R. W. Brighnshaw, 13-16 Borough Road, S.E.1.
- PRINTING, BOOKBINDING AND PAPER WORKERS, THE NATIONAL UNION OF (162,952).—*Gen. Sec.*, T. J. Smith, 74 Nightingale Lane, S.W.12.
- PROFESSIONAL FOOTBALLERS' AND TRAINERS' ASSOCIATION (2,096).—*Sec.*, C. Lloyd, 104 Corn Exchange Buildings, Cathedral Street, Manchester 4.
- PUBLIC EMPLOYEES, NATIONAL UNION OF (215,000).—*Sec.*, S. Hill, 8 Aberdeen Terrace, Blackheath, S.E.3.
- RADIO OFFICERS' UNION (3 854).—*Sec.* H. O'Neill, O.B.E., 4-6 Branfil Road, Upminster, Essex.
- RAILWAYMEN, NATIONAL UNION OF (317,036).—*Sec.*, S. F. Greene, Unity House, Euston Road, N.W.1.
- RETAIL BOOK, STATIONERY AND ALLIED TRADES EMPLOYEES' ASSOCIATION, THE (3,243).—*Sec.*, A. T. Johnson, 152-3 Temple Chambers, Temple Avenue, E.C.4.
- ROLL TURNERS' TRADE SOCIETY, BRITISH (1,091).—*Sec.*, G. Prentice, 21 Park Road, Beilshill, Lanarkshire.
- RUBBER WORKERS OF GREAT BRITAIN, THE UNITED (3,100).—*Sec.*, L. Walsh, 57 Ardwick Green North, Manchester, 12.
- SAILMAKERS, AMALGAMATED UNION OF (165).—*Sec.*, J. Pye, 58 Winskill Road, Liverpool, 11.
- SALT AND CHEMICAL INDUSTRIES ALLIED WORKERS' UNION, MID-CHESHIRE (1,801).—*Sec.*, R. M. Moss, Central Passage, Witton Street, Northwich.
- SALT WORKERS, ALKALI WORKERS, MECHANIC AND GENERAL LABOURERS, FEDERATION OF TRADE UNIONS OF (1,565).—*Sec.*, G. Miles, 30 Granville Square, Winsford, Cheshire.
- SAWMAKERS' PROTECTION SOCIETY, SHEFFIELD (378).—*Sec.*, H. Lambert, 46 Archer Lane, Sheffield, 7.
- SCALEMAKERS, NATIONAL UNION OF (2,608).—*Sec.*, H. Bending, 33-4 Temple Chambers, Temple Avenue, E.C.4.
- SCIENTIFIC WORKERS, THE ASSOCIATION OF (14,256).—*Sec.*, J. K. Dutton, 15 Half Moon Street, W.1.
- SCREW, NUT, BOLT AND RIVET TRADE SOCIETY (2,100).—*Sec.*, H. Cater, 368 Dudley Road, Birmingham, 18.
- SEAMEN, NATIONAL UNION OF (62,500).—*Gen. Sec.* W. Hogarth, Maritime House, Old Town, Clapham, S.W.4.
- SHALE MINERS AND OIL WORKERS, NATIONAL UNION OF (1,409).—*Sec.*, J. Heaney, 11 Drumshoreland Road, Pumpherton, Mid Calder, Midlothian.
- SHEET METAL WORKERS AND COPPERSMITHS, NATIONAL UNION OF (50,306).—*Gen. Sec.*, L. W. Buck, 75-77 West Heath Road, N.W.3.
- SHEET METAL WORKERS' SOCIETY, BIRMINGHAM AND MIDLAND (8,680).—*Sec.*, A. E. Cooper, 131 Bromsgrove Street, Birmingham, 5.
- SHIPCONSTRUCTORS AND SHIPWRIGHTS' ASSOCIATION (22,256).—*Sec.*, A. Williams, 8 Eldon Square, Newcastle-upon-Tyne, 1.
- SHOP, DISTRIBUTIVE AND ALLIED WORKERS, UNION OF (351,371).—*Sec.*, A. W. Allen, 188 Wilmslow Road, Fallowfield, Manchester 14.
- SHUTTLEMAKERS, SOCIETY OF (272).—*Sec.*, S. Brown, 6 Moyse Avenue, Walshaw, Bury.
- SIGN AND DISPLAY TRADES UNION (2,930), Sutton House, 2-4 Homerton High Street, E.9.—*Gen. Sec.*, A. C. Torode.
- SILK WORKERS AND TEXTILE TRADES ASSOCIATION, NATIONAL (3,017).—*Gen. Sec.*, T. Molloy, 59 Park Green, Macclesfield, Cheshire.
- SLATERS, TILERS AND ROOFING OPERATIVES SOCIETY, AMALGAMATED (2,012).—*Gen. Sec.*, L. Poupard, 430 Holderness Road, Hull.

- SPINNERS AND TWINERS, THE AMALGAMATED ASSOCIATION OF OPERATIVE COTTON (6,417).—*Sec.*, J. W. Whitworth, 115 Newton Street, Manchester.
- SPRING TRAPMAKERS' SOCIETY (90).—*Sec.*, J. Martin, Bellamy House, Wilkes Street, Willenhall, Staffs.
- STOVE GRATE AND GENERAL METAL WORKERS, THE NATIONAL UNION OF (5,424).—*Sec.*, J. Higham, M.B.E., Stove Grate Offices, Imperial Bldgs., High Street, Rotherham.
- STREET MASONS, PAVIORS AND ROAD MAKERS, NATIONAL SOCIETY OF (1,400).—*Sec.*, W. Armitage, Kingston House, 1 Kingston Grove, Woodhouse Lane, Leeds, 2.
- SUPERVISORY STAFFS, EXECUTIVES AND TECHNICIANS, ASSOCIATION OF (26,826).—*Gen. Sec.*, C. Jenkins, Sutton House, Homerton High Street, Hackney, E.9.
- TAILORS AND GARMENT WORKERS, NATIONAL UNION OF (115,013).—*Sec.*, J. E. Newton, 41 Portman Square, W.1.
- TECHNICAL CIVIL SERVANTS, SOCIETY OF (9,734).—*Sec.*, C. Cooper, 372 Wandsworth Road, S.W.8.
- TEXTILE CRAFTSMEN, YORKSHIRE SOCIETY OF (1,228).—*Sec.*, C. Hall, Textile Hall, Westgate, Bradford, 1.
- TEXTILE DAYMEN'S AND CLOTH PATTERN MAKERS ASSOCIATION (126).—*Sec.*, J. Halby, 18 Airedale Crescent, Bradford 3.
- TEXTILE WAREHOUSEMEN, AMALGAMATED (5,500).—*Sec.*, T. Ashe, 6 The Rock, Bury.
- TEXTILE WORKERS AND KINDRED TRADES, AMALGAMATED SOCIETY OF (5,800).—*Sec.*, H. Lisle, "Foxlowe," Market Place, Leek, Staffs.
- THEATRICAL AND KINE EMPLOYERS, THE NATIONAL ASSOCIATION OF (20,531).—*Sec.*, Sir Tom O'Brien, 17 Waterloo Place, S.W.1.
- TOBACCO WORKERS' UNION, THE (15,881).—*Sec.*, P. Belcher, 218 Upper Street, Islington, N.1.
- TRANSPORT AND GENERAL WORKERS' UNION (1,318 274).—*Sec.*, F. Cousins, Transport House, Smith Square, S.W.1.
- TRANSPORT SALARIED STAFFS' ASSOCIATION (87,079).—*Gen. Sec.*, W. J. P. Webber, C.B.E., Walkden House, 10 Melton Street, N.W.1.
- TRANSPORT WORKERS ASSOCIATION OF ENGLAND, THE UNITED ROAD (10,000).—*Sec.*, J. Davies, 28 Hathersage Road, Chorlton-on-Medlock, Manchester 13.
- TYPOGRAPHICAL ASSOCIATION (59,057).—*Sec.*, I. M. Bonfield, "Beechwood," Oak Drive, Fallowfield, Manchester, 4.
- TYPOGRAPHICAL ASSOCIATION, SCOTTISH (7,458).—*Sec.*, P. Whigham, 136 West Regent Street, Glasgow, C.2.
- TYPOGRAPHICAL SOCIETY, LONDON (20,014).—*Sec.*, R. Willis, 3-7 New Street Square, E.C.4.
- VARIETY ARTISTES' FEDERATION (3,093).—*Sec.*, R. W. Swinson, M.B.E., 18 Charing Cross Road, W.C.2.
- VEHICLE BUILDERS, NATIONAL UNION OF (65,667).—*Gen. Sec.*, A. Roberts, 44 Hathersage Road, Oxford Road, Manchester, 13.
- WALL PAPER WORKERS' UNION (3,000).—*Sec.*, C. Heap, O.B.E., 223 Bury New Road, Whitefield, Manchester.
- WARDRESSERS, TWISTERS AND KINDRED TRADES ASSOCIATIONS, LEEDS AND DISTRICT (156).—*Sec.*, B. Jowett, 34 Green Hill Drive, Bramley, Leeds 13.
- WATERMEN, LIGHTERMEN, TUGMEN AND BARGE-MEN'S UNION (4,450).—*Sec.*, W. A. Lindley, 33 East India Dock Road, E.14.
- WATERPROOF GARMENT WORKERS' TRADE UNION, THE (2,191).—*Sec.*, F. C. Henry, M.B.E., 88a Miller Street, Manchester, 4.
- WEAVERS' AND WOOLLEN TEXTILE WORKERS' ASSOCIATION, SADDLEWORTH AND DISTRICT (1,709).—*Sec.*, F. G. Battey, 4 Grains Road, Delph nr. Oldham.
- WEAVERS' ASSOCIATION, AMALGAMATED (52,335).—*Gen. Sec.*, L. T. Wright, Chronicle Buildings, 74 Corporation Street, Manchester, 4.
- WIRE DRAWERS AND KINDRED WORKERS, THE AMALGAMATED SOCIETY OF (12,607).—*Sec.*, R. Birtwhistle, 21 Stirling Chambers, Campo Lane, Sheffield, 1.
- WOOD-CUTTING MACHINISTS, AMALGAMATED SOCIETY OF (27,088).—*Sec.*, C. Stewart, 8 Fairfield Street, Manchester 1.
- WOODWORKERS, AMALGAMATED SOCIETY OF (193,851).—*Sec.*, G. F. Smith, 9-11 Macaulay Road, S.W.4.
- WOOL SHEAR WORKERS' TRADE UNION, SHEFFIELD (56).—*Sec.*, J. Billard, 19 Rivelin Park Drive, Sheffield 6.
- WOOL SORTERS' SOCIETY, NATIONAL (2,110).—*Sec.*, N. Newton, 40 Little Horton Lane, Bradford, 5.
- WOOL YARN AND WAREHOUSE WORKERS' UNION (520).—*Sec.*, B. W. Berry, Textile Hall, Westgate, Bradford.

INDUSTRIAL RESEARCH ASSOCIATIONS

A notable development in modern industry is the growth in numbers and importance of Industrial Research Associations and their increasing influence on the scientific and economic life of the country. The total expenditure of these Associations in 1961 was about £8,350,000 per annum, of which £1,970,000 was provided by the Department of Scientific and Industrial Research and the remainder by subscriptions of individual members.

The Government Scheme for Co-operative Industrial Research was launched by the Department of Scientific and Industrial Research in 1918. Its aim was to stimulate the industries of the United Kingdom to undertake co-operative research as a means of increasing their efficiency.

Research Associations formed under this scheme are registered companies, limited by guarantee of a nominal sum and working without the division of profits in the form of dividends. To assist the formation of such Associations the Board of Trade and the Department of Scientific and Industrial Research have drawn up a model Memorandum and Articles of Association, to which Research Associations under the scheme conform in all essential points.

The income of the Research Associations is derived from subscriptions from their individual members, supplemented in most cases by substantial grants from the Government, through the Department of Scientific and Industrial Research.

The Research Associations are autonomous bodies free to determine their own policy for the development of their research programmes and the use to be made of the results of their research. Membership is open to any British firm in the particular industry, subject to the approval of the Councils of the Research Associations.

There are now 44 Research Associations and 8 other organizations in receipt of grants from the Department. They cover most of the principal industries of the country, as follows:—

Baking.

BRITISH BAKING INDUSTRIES RESEARCH ASSOCIATION, Baking Industries Research Station, Chorleywood, Herts.—*Dir.*, G. A. H. Elton, D.Sc., Ph.D.

Boots and Shoes.

BRITISH BOOT, SHOE AND ALLIED TRADES RESEARCH ASSOCIATION, Satra House, Rockingham Road, Kettering, Northants.—*Dir.*, H. Bradley, C.B.E.

Brushes.

BRITISH BRUSH MANUFACTURERS' RESEARCH ASSOCIATION, 80 Coleman Street, E.C.2.—*Dir.*, F. Kidd.

Cast Iron.

BRITISH CAST IRON RESEARCH ASSOCIATION, Bordesley Hall, Alvechurch, Birmingham.—*Dir.*, H. Morrogh.

Ceramics.

BRITISH CERAMIC RESEARCH ASSOCIATION Queen's Road, Penkhull, Stoke-on-Trent.—*Dir.*, N. F. Astbury, Sc.D.

Coal Utilization.

BRITISH COAL UTILISATION RESEARCH ASSOCIATION, Randalls Road, Leatherhead, Surrey.—*Dir.-Gen.*, D. Hicks.

Coke.

BRITISH COKE RESEARCH ASSOCIATION, Coke Research Centre, Chesterfield, Derbyshire.—*Dir.*, G. W. Lee.

Cotton, Silk, etc.

COTTON SILK AND MAN-MADE FIBRES RESEARCH ASSOCIATION, Shirley Institute, Didsbury, Manchester, 20.—*Dir.*, D. W. Hill, D.Sc., Ph.D.

Cutlery.

CUTLERY RESEARCH COUNCIL, Hoyle Street, Sheffield, 3.—*Superintendent of Research*, E. A. Oldfield.

Drop Forging

DROP FORGING RESEARCH ASSOCIATION, Hoyle Street, Sheffield, 3.—*Director*, R. H. R. Lane, Ph.D.

Electrical.

BRITISH ELECTRICAL AND ALLIED INDUSTRIES RESEARCH ASSOCIATION, Cleve Road, Leatherhead, Surrey.—*Dir.*, H. G. Taylor, D.Sc.

Felt.

BRITISH HAT AND ALLIED FELTMAKERS RESEARCH ASSOCIATION, Stanley House, Manchester Road, Fairfield, Droylsden, Manchester.—*Dir.*, T. Barr, Ph.D.

Files.

FILE RESEARCH COUNCIL, Hoyle Street, Sheffield, 3.—*Superintendent*, R. H. Hancock.

Flour Milling.

RESEARCH ASSOCIATION OF BRITISH FLOUR-MILLERS, Cereals Research Station, Old London Road, St. Albans, Herts.—*Dir.*, T. Moran, C.B.E., D.Sc., Ph.D.

Food Manufacture.

BRITISH FOOD MANUFACTURING INDUSTRIES RESEARCH ASSOCIATION, Randalls Road, Leatherhead, Surrey.—*Dir.*, C. L. Cutting, Ph.D.

Fruit and Vegetable Canning.

FRUIT AND VEGETABLE CANNING AND QUICK FREEZING RESEARCH ASSOCIATION, Chipping Campden, Glos.—*Dir.*, W. B. Adam.

Furniture.

FURNITURE INDUSTRY RESEARCH ASSOCIATION, 11 Adelphi Terrace, Robert Street, W.C.2.—*Dir.*, J. C. Pritchard, O.B.E.

Gelatine and Glue.

BRITISH GELATINE AND GLUE RESEARCH ASSOCIATION, 2a Dalmeny Avenue, Holloway, N.7.—*Dir.*, D. A. Sutton, Ph.D.

Glass.

BRITISH GLASS INDUSTRY RESEARCH ASSOCIATION, Northumberland Road, Sheffield 10.—*Dir.*, R. G. Newton, Ph.D.

Heating and Ventilating.

HEATING AND VENTILATING RESEARCH ASSOCIATION, Old Bracknell Lane, Bracknell, Berks.—*Dir.*, N. S. Billington.

Hosiery.

HOSIERY AND ALLIED TRADES RESEARCH ASSOCIATION, Thorneywood, Gregory Boulevard, Nottingham.—*Dir.*, W. A. Dutton.

Hydromechanics.

BRITISH HYDROMECHANICS RESEARCH ASSOCIATION, South Road, Temple Fields, Harlow, Essex.—*Dir.*, L. E. Prosser.

Industrial Biology

BRITISH INDUSTRIAL BIOLOGICAL RESEARCH ASSOCIATION, Radnor House, 93-97 Regent Street, S.W.1.—*Dir.*, L. Golberg, D.Sc.

Industrial Psychology.

NATIONAL INSTITUTE OF INDUSTRIAL PSYCHOLOGY, 14 Welbeck Street, W.1.—*Dir.*, C. B. Frisby, Ph.D.

I.C. Engines.

BRITISH INTERNAL COMBUSTION ENGINE RESEARCH ASSOCIATION, 111-112 Buckingham Avenue, Trading Estate, Slough.—*Dir.*, W. P. Mansfield, Ph.D.

Iron and Steel.

BRITISH IRON AND STEEL RESEARCH ASSOCIATION, 11 Park Lane, W.1.—*Dir.*, Sir Charles Goodeve, O.B.E., D.Sc., F.R.S.

- Jute.*
BRITISH JUTE TRADE RESEARCH ASSOCIATION, Kinnoull Road, Kingsway West, Dundee, Scotland.—*Dir.*, H. P. Stout, Ph.D.
- Lace*
LACE RESEARCH ASSOCIATION, Glaisdale Drive West, Billborough, Nottingham.—*Dir.*, J. C. MacCallum, O.B.E.
- Laundering.*
BRITISH LAUNDERERS' RESEARCH ASSOCIATION, The Laboratories, Hill View Gardens, Hendon, N.W.4.—*Dir.*, J. Leicester.
- Leather.*
BRITISH LEATHER MANUFACTURERS' RESEARCH ASSOCIATION, Milton Park, Egham, Surrey.—*Dir.*, K. W. Pepper D.Sc.
- Lime.*
CHALK LIME AND ALLIED INDUSTRIES RESEARCH ASSOCIATION, Laboratories, Church Street, Welwyn, Herts.—*Dir.*, G. E. Bessey.
- Linen.*
LINEN INDUSTRY RESEARCH ASSOCIATION, Research Institute, Lambeg, Lisburn, Co. Antrim.—*Dir.*, D. A. Derrett-Smith.
- Machine Tools*
MACHINE TOOL INDUSTRY RESEARCH ASSOCIATION, 163 Kingsway, Manchester, 19.—*Dir.*, A. E. De Barr.
- Motor Vehicles*
MOTOR INDUSTRY RESEARCH ASSOCIATION, Lindley, nr. Nuneaton, Warwickshire.—*Dir.*, A. Fogg, D.Sc.
- Non-Ferrous Metals.*
BRITISH NON-FERROUS METALS RESEARCH ASSOCIATION, Euston Street, N.W.1.—*Dir.*, G. L. Bailey, C.B.E.
- Paint.*
RESEARCH ASSOCIATION OF BRITISH PAINT, COLOUR AND VARNISH MANUFACTURERS, Paint Research Station, Waldegrave Road, Teddington, Middlesex.—*Dir.*, L. Valentine, Ph.D.
- Paper.*
BRITISH PAPER AND BOARD INDUSTRY RESEARCH ASSOCIATION, St. Winfred's Laboratories, Welcomes Road, Kenley, Surrey.—*Dir.*, N. R. Hood, O.B.E., Ph.D.
- Printing and Packaging.*
PRINTING, PACKAGING AND ALLIED TRADES RESEARCH ASSOCIATION, Patra House, Randalls Road, Leatherhead, Surrey.—*Dir.*, V. G. W. Harrison, Ph.D.
- Production Engineering.*
PRODUCTION ENGINEERING RESEARCH ASSOCIATION OF GREAT BRITAIN, Melton Mowbray, Leics.—*Dir.*, D. F. Galloway, Ph.D.
- Rubber and Plastics.*
RUBBER AND PLASTICS RESEARCH ASSOCIATION OF GREAT BRITAIN, Shawbury, Shrewsbury, Shropshire.—*Dir.*, W. F. Watson, D.Sc., Ph.D.
- Scientific Instruments.*
BRITISH SCIENTIFIC INSTRUMENT RESEARCH ASSOCIATION, South Hill, Chislehurst, Kent.—*Dir.*, J. Thomson, D.Sc., Ph.D.
- Ships*
BRITISH SHIP RESEARCH ASSOCIATION, Prince Consort House, 27-29 Albert Embankment, S.E.1.—*Dir.*, Sir Victor Shephard, K.C.B.
- Springs.*
COIL SPRING FEDERATION RESEARCH ORGANISATION, Donecaster Street, Sbeffield, 3.—*Dir.*, R. Haynes.
- Steel Castings.*
BRITISH STEEL CASTINGS RESEARCH ASSOCIATION, East Bank Road, Sbeffield, 2.—*Dir.*, A. H. Sully, Ph.D.
- Tar.*
COAL TAR RESEARCH ASSOCIATION, Oxford Road, Gomersal, nr. Leeds.—*Dir.*, D. McNeil, Ph.D.
- Timber*
TIMBER RESEARCH AND DEVELOPMENT ASSOCIATION, 21 College Hill, E.C.4.—*Dir.*, J. S. McBride.
- Water*
WATER RESEARCH ASSOCIATION, Ferry Lane, Medmenham, Marlow, Bucks.—*Dir.*, R. G. Allen, Ph.D.
- Welding.*
BRITISH WELDING RESEARCH ASSOCIATION, 19 Fitzroy Square, W.1.—*Dir.*, R. Week, Ph.D.
- Whiting.*
RESEARCH COUNCIL OF THE BRITISH WHITING FEDERATION, The Hall, 30 Church Street, Welwyn, Herts.—*Dir.*, D. C. Soul.
- Wool.*
WOOL INDUSTRIES RESEARCH ASSOCIATION, Torrington, Headingley Lane, Leeds, 6.—*Dir.*, A. B. D. Cassie, C.B.E., D.Sc., Ph.D.

AGRICULTURAL RESEARCH INSTITUTES AND UNITS

The following research institutes are under the direct control of the Agricultural Research Council (see p. 361):—

- Field Station, Compton, near Newbury, Berks.—*Director*, W. S. Gordon, C.B.E., Ph.D., M.R.C.V.S., F.R.S.E.
- Unit of Insect Physiology, Department of Zoology, Cambridge.—*Director*, Prof. V. B. Wigglesworth, C.B.E., M.D., F.R.S.
- Institute of Animal Physiology, Abraham Hall, Babraham, Cambs.—*Director*, J. H. Gaddum, M.A., Sc.D., M.R.C.S., L.R.C.P., F.R.S., F.R.S.E.
- Animal Breeding Research Organisation, Glenbourn, 6 South Oswald Road, Edinburgh, 9.—*Director*, H. P. Donald, D.Sc., Ph.D., F.R.S.E.
- Poultry Research Centre, King's Buildings, West Mains Road, Edinburgh, 9.—*Director*, T. C. Carter, O.B.E., D.Sc., F.R.S.E.
- Unit of Experimental Agronomy, Department of Agriculture, University of Oxford.—*Hon. Director*, Prof. G. E. Blakeman, F.R.S.
- Unit of Biometrical Genetics, Department of Genetics, University of Birmingham.—*Hon. Director*, Prof. K. Mather, C.B.E., D.Sc., Ph.D., F.R.S.
- Unit of Microbiology, Department of Microbiology, The University, Sheffield, 10.—*Hon. Director*, Prof. S. R. Eldsen, Ph.D.
- Unit of Soil Physics, School of Agriculture, Cambridge.—*Director*, E. C. Childs, Sc.D., Ph.D.
- Unit of Embryology, Univ. College of N. Wales, Bangor.—*Hon. Director*, Prof. F. W. Rogers Brambell, D.Sc., Ph.D., F.R.S.
- Unit of Statistics, University of Aberdeen.—*Director*, D. J. Finney, Sc.D., F.R.S., F.R.S.E.
- Statistics Group, School of Agriculture, Cambridge.—*Officer-in-Charge*, R. C. Campbell, M.A., Ph.D.
- Unit of Reproductive Physiology and Biochemistry, Molteno Institute, Cambridge.—*Director*, T. R. R. Mann, C.B.E., M.D., Sc.D., Ph.D., F.R.S.
- Unit of Animal Genetics, University of Edinburgh, King's Buildings, West Mains Road, Edinburgh, 9.—*Hon. Director*, Prof. C. H. Waddington, C.B.E., Sc.D., F.R.S.
- Radiobiological Laboratory, Letcombe Regis, Wantage, Berks.—*Director*, R. Scott Russell, M.Sc., Ph.D.
- Unit of Plant Growth Substances and Systemic Fungicides, Wye College, Ashford, Kent.—*Hon. Director*, Prof. R. L. Wain, D.Sc., Ph.D., F.R.S.
- Virus Research Unit, Huntingdon Road, Cambridge.—*Director*, R. Markham, M.A., Ph.D., F.R.S.

Ditton Laboratory, Larkfield, Maidstone.—*Director*, R. G. Tomkins, M.A., Ph.D.
 Covent Garden Laboratory, Inveresk House, 346 Strand, W.C.1.—*Officer-in-Charge*, J. C. Fidler, Ph.D.
 Low Temperature Research Station, Downing Street, Cambridge.—*Director*, E. Bate-Smith, M.Sc., Ph.D.
 Pest Infestation Laboratory, London Road, Slough, Bucks.—*Director*, G. V. B. Herford, C.B.E., M.Sc.
 Unit of Plant Physiology, Imperial College of Science and Technology, Prince Consort Road, S.W.7.—*Director*, Prof. Helen K. Porter, D.Sc., F.R.S.
 Unit of Plant Morphogenesis and Nutrition, Wye College, Ashford, Kent.—*Director*, F. J. Richards, D.Sc., F.R.S.
 Weed Research Organization, Begbroke Hill, Kidlington, nr. Oxford.—*Director*, E. K. Woodford, O.B.E., M.Sc., Ph.D.
 Farm Buildings Research Unit, Wrest Park Lodge, Silsoe, Beds.—*Hon. Director*, W. H. Cashmore, C.B.E., B.A.

GRANT-AIDED RESEARCH INSTITUTES

In addition to the above there are other institutes which, while retaining their own individuality, are financed wholly or in the main by grants made from Government funds. Most of these Institutes have governing bodies of their own to which they are directly responsible. The maintenance grants for Institutes in England and Wales are met from funds voted by Parliament and administered by the Agricultural Research Council; the Scottish Institutes are borne on the vote of the Department of Agriculture for Scotland. These Departments seek the advice of the Agricultural Research Council in the consideration of research programmes and estimates.

(a) Research affecting Plants and Soils

Soil Science and Plant Pathology

Rothamsted Experimental Station, Harpenden, Herts.—*Director*, F. C. Bawden, M.A., F.R.S.
 Macaulay Institute for Soil Research, Craigiebuckler, Aberdeen.—*Director*, Prof. A. B. Stewart, C.B.E., M.A., B.Sc., Ph.D., F.R.I.C.

Plant Breeding

Hop Research Centre, Wye College, Ashford, Kent.—*Officer-in-Charge*, H. S. Darling, B.Sc., Ph.D.
 Plant Breeding Institute, Maris Lane, Trumpington, Cambridge.—*Director*, G. D. H. Bell, B.Sc., Ph.D.
 Welsh Plant Breeding Station, Plas Gogerddan, Nr. Aberystwyth.—*Director*, Prof. P. T. Thomas, B.Sc., Ph.D.
 Scottish Plant Breeding Station, Pentlandsfield, Roslin, Midlothian.—*Director*, J. W. Gregor, C.B.E., D.Sc., Ph.D., F.L.S.

Horticulture

John Innes Institute, Bayfordbury, Hertford.—*Director*, K. S. Dodds, D.Sc., Ph.D.

East Malling Research Station, Nr. Maidstone, Kent.—*Director*, F. R. Tubbs, C.B.E., M.Sc., Ph.D.
 Agricultural and Horticultural Research Station, Long Ashton, Bristol.—*Director*, Prof. H. G. H. Kearns, O.B.E., B.Sc., Ph.D.
 Scottish Horticultural Research Institute, Mylnefield, Invergowrie, Dundee.—*Director*, T. Swarbrick, M.Sc., Ph.D.

Vegetables

National Vegetable Research Station, Wellesbourne, Warwickshire.—*Director*, J. Philp, Ph.D., F.L.S.

Grassland

Grassland Research Institute, Hurley, nr. Maidenhead, Berks.—*Director*, William Davies, D.Sc.

Glasshouse Crops

Glasshouse Crops Research Institute, Worthing Road, Rustington, Littlehampton, Sussex.—*Director*, F. W. Toovey, O.B.E., B.Sc.

(b) Research affecting Animals

Animal Diseases

Animal Diseases Research Association, Moredun Institute, Gilmerton, Edinburgh, 9.—*Director*, J. T. Stamp, D.Sc., M.R.C.V.S., F.R.S.E.
 Research Institute (Animal Virus Diseases), Pirbright, Surrey.—*Director*, I. A. Galloway, D.Sc., M.R.C.V.S.

Hill Farming

Hill Farming Research Organisation, 48 Palmerston Place, Edinburgh, 12.—*Director*, A. R. Wannop, O.B.E., F.R.S.E.

Dairying

National Institute for Research in Dairying, Shinfield, nr. Reading.—*Director*, Prof. R. G. Baskett, O.B.E., M.Sc.
 Hannah Dairy Research Institute, Kirkhill, Ayr.—*Director*, J. A. B. Smith, C.B.E., D.Sc., Ph.D., F.R.S.E.

Nutrition

Rowett Research Institute, Bucksburn, Aberdeen.—*Director*, D. P. Cuthbertson, C.B.E., M.D., D.Sc., F.R.S.E.

Poultry

Houghton Poultry Research Station,* Houghton Grange, Huntingdon.—*Director*, R. F. Gordon, D.Sc., M.R.C.V.S.

(c) Research on Agricultural Engineering

National Institute of Agricultural Engineering, Wrest Park, Silsoe, Beds.—*Director*, W. H. Cashmore, C.B.E., B.A.
 National Institute of Agricultural Engineering, Scottish Station, Howden, Mid-Calder, Midlothian.—*Director*, W. J. West, B.A.

* Financed jointly by the Agricultural Research Council and the Animal Health Trust.

AGRICULTURAL MARKETING SCHEMES

Schemes to regulate and promote the marketing at home of certain agricultural products have been in operation since 1932. In the case of milk, eggs, potatoes and wool the marketing board set up under the scheme administers on behalf of the Ministry of Agriculture, Fisheries and Food the system of prices guaranteed to producers.

Hops Marketing Board (1932)

Central Buildings, Southwark Street, S.E.1
 Hops in England may be sold only to or through

the agency of the Hops Marketing Board, which adjusts the supply to each year's estimated demand by the allocation of quotas. Unless exempt from registration, producers who wish to sell their hops are required to register with the Board.
Chairman, S. R. Allsopp, C.B.E.
Secretary, J. G. Borrett.

Milk Marketing Board (1933)

Thames Ditton, Surrey
 The Milk Marketing Board has powers to regu-

late the sale of milk by producers in *England and Wales*. Milk produced for sale by wholesale must be sold to the Board under contract and producers who wish to sell milk by retail direct to consumers may do so under retail licence from the Board.

The Board determines the market to which the producer's milk is to be sent and arranges for its collection from the producer and delivery to that market. Transport charges are deducted from the price the producer receives. Prices are provisionally fixed in advance for 12 months on the basis of the guaranteed price for milk determined in March of each year.

The Board provides a scheme of National Milk Records (recording milk yield and butterfat content) and an Artificial Insemination Service at centres throughout England and Wales.

Chairman, W. R. Trebane.
Secretary, H. Cooke.

British Wool Marketing Board (1950)

Templar House, 81-87 High Holborn, W.C.1

Producers of wool who have 5 sheep or more aged over 4 months and who wish to sell their wool, are required to register with the Board, which buys all home-grown fleece wool in the *United Kingdom*. Payment for the wool is made on behalf of the Board by merchants under contract.

Chairman, H. C. Falconer, C.B.E.
Secretary, S. R. Blackley, M.B.E.

Tomato and Cucumber Marketing Board (1950)

10 Stanhope Gate, W.1

The Board is concerned with improving the marketing of tomatoes and cucumbers grown in *Great Britain* and has limited regulatory powers relating to their sale. It provides daily market intelligence services and statistical and other information. Producers who wish to sell their tomatoes and cucumbers are required to register with the Board, unless exempted.

Chairman, K. D. Ripley.
Secretary, Miss E. M. Garwood.

Potato Marketing Board (1955)

50 Hans Crescent, S.W.1

The Board has power to control potato acreage on farms and to help to ensure the orderly marketing of crops, e.g. it prescribes minimum sizes for potatoes sold for human consumption. The Board implements the guarantee for potatoes to growers in *Great Britain*, receiving on their behalf deficiency payments made by the Government.

Any person planting one acre or more of potatoes must register with the Board if he intends to sell any part of his crop and must pay an annual contribution to the Board's operating costs. A registered producer may sell potatoes for human consumption only to or through persons approved by the Board. Potatoes sold before August 1 in the year of harvesting are excluded from the guaranteed price arrangements and are deemed to be new potatoes.

Chairman, J. E. Rennie, C.B.E.
Secretary, A. J. D. Howells.

British Egg Marketing Board (1957)

Wingate House, 93-107 Shaftesbury Avenue, W.1

Shell eggs are bought from registered producers by packing stations as agents of the Board. Payment to producers is made on behalf of the Board by packing stations and prices paid must not be less than the minima announced by the Board. Producers with more than 50 head of poultry over the age of 6 months must register with the Board. Other producers, who wish to sell their eggs to the Board, must also register. Registered producers may sell their eggs to retailers under licence from the Board and direct to consumers without a licence.

Chairman, W. J. Welford, M.B.E.
Registrar, A. H. R. Sellar.

Pig Industry Development Authority (1957)

PIDA House, Ridgmount Street, W.C.1

Constituted under the Agriculture Act, 1957, the Authority has responsibilities for promoting technical development in the pig industry. It is responsible for pig recording and the Premium Boar Scheme. Details of these schemes are obtainable from the above address.

Chairman, Sir Richard Verdin, O.B.E., T.D.
Chief Officer, G. R. Oak, C.B.

British Sugar Corporation Ltd. (1936)

134 Piccadilly, W.1

Sugar beet is grown under contracts made each year between farmers and the Corporation. The acreage for which the Corporation may enter into contracts and the prices (related to sugar content) which it shall pay are determined by the Government annually. A statutory scheme for research and education is financed by a levy imposed equally on sugar beet growers and the Corporation, the latter maintaining an agricultural organization to disseminate the results attained under the research scheme as rapidly as possible.

Chairman, Sir Edmund Bacon, Bt., O.B.E., T.D.
Secretary, A. J. F. Brown.

THE PERIODS OF ENGLISH ARCHITECTURE

<i>Date</i>	<i>Style</i>
I. Before 55 B.C.	Ancient British.
II. 55 B.C. to A.D. 420.	Roman Period.

Price 42s. net.

THE LONDON CLEARING BANKS

COMMITTEE OF LONDON CLEARING BANKERS
(1821), 10 Lombard Street, E.C.3.

The Committee consists of the Chairmen of the eleven Clearing Banks listed in the Almanack (see pp. 1101-6) and meets regularly to discuss matters of common interest. It is the body through which the Bank of England communicates official policy to the banks and through which the banks may present their views to the Bank of England and the Treasury. The Committee controls the London Bankers' Clearing House.

Secretary, R. H. Barkshire.
Asst. Secretaries, M. C. Swift, M.C.; G. B. Scrine.

BANKERS' CLEARING HOUSE

10 Lombard Street, E.C.3.

This is the organization through which the Clearing Banks and the Bank of England exchange cheques drawn on each other and settle their indebtedness to one another. The clearing system came into being in London during the second half of the eighteenth century, and has served as a pattern for the Clearing Houses that have been established since throughout the world.

To obtain payment for any cheque received from a customer for his credit, a banker must present it for payment to the bank on which it is drawn, and the Bankers' Clearing House affords a quick and efficient means of doing this. On an average day almost 1,500,000 cheques, etc., are exchanged and paid for by the eleven Clearing Banks and the

Bank of England on behalf of their branches, throughout England and Wales, which number over 10,000. Although, on an average day, the value of items exchanged may approach £700-millions in total, the member banks settle their net indebtedness only, each either paying or receiving through the Clearing House the net balance arising from the day's work.

At present two clearings operate, generally, each business day. Cheques drawn on, and paid into, any of the eighty-odd specified Town Clearing branches may be passed through the Town Clearing either at the morning session or, if the amount is £500 or over (£5,000 or over on Saturdays), at the afternoon session. All other cheques must be passed through the General Clearing each morning. Since April, 1960, a Credit Clearing has been operated, through which the member banks exchange, and pay for, credit items in respect of monetary transfers between their customers.

At the end of each business day each member bank works out the net balance resulting from its transactions in that day's Town Clearing, the previous day's General (cheque) Clearing and Credit Clearing, and such differences as need to be adjusted. This net balance is either credited to or deducted from the bank's own account at the Bank of England.

Chief Inspector, C. C. Hobday.

Deputy Inspector, E. A. Young.

YORKSHIRE BANK LIMITED (1911), 56-58 Cheapside, E.C.2 (2 Infirmary Street, Leeds). Capital, £2,750,000 (Capital paid up 2,250,000, £1 Shares fully paid); Reserve Fund, £2,250,000; Deposits, 30/6/62, £109,647,923. (156 Branches.)

INDUSTRIAL AND COMMERCIAL FINANCE CORPORATION LIMITED

Piercy House, Copthall Avenue, E.C.2.

[National: 8621-5]

Founded in 1945 by the English and Scottish joint-stock Banks, and the Bank of England, as a contribution to post-war reconstruction, with initial resources of £45,000,000, since enlarged by a series of debenture issues to more than £50,000,000. I.C.F.C. is independently managed and is not Government subsidized. It was formed for the specific purpose of providing long-term loan capital and share capital to small and medium sized businesses in Great Britain with no ready access to the capital market. In 17 years it has provided £80,000,000 to more than 1,000 businesses engaged in 52 industries and trades. Since 1951, branches have been established in Birmingham, Bristol, Cardiff, Edinburgh, Glasgow, Leeds, Leicester and Manchester.

Facilities, which range from £5,000 to £200,000 or more, are provided in the form of long-term loans and share capital. For its own

requirements, and to assist its customers, I.C.F.C. has an Industrial Department comprising engineers skilled in present-day production methods, and a staff of accountants versed in modern accounting and costing techniques. Rates, which vary with the security available and the inherent soundness and prospects of the business, are in line with the market rates current for long-term capital. The rate quoted in a particular case is generally fixed for the entire period of the loan, and is charged on the outstanding amount only. A small inclusive negotiation fee is charged on acceptance of an offer, out of which the Corporation pays its own investigation and legal costs. Facilities offered are of particular interest to private companies who wish to preserve their private status, or are not well situated to float, and to growing companies with good prospects.

Chairman, The Lord Piercy, C.B.E.

General Managers, L. V. D. Tindale; A. R. English. Secretary, S. V. Warren.

SAVINGS BANKS

Post Office Savings Bank.—On Dec. 31, 1961, there were approximately 22,161,000 active deposit accounts in the Post Office Savings Bank, with the sum of £1,736,590,000 due to depositors. On December 31, 1961, Government Stock and Bonds to the amount of £1,035,072,000 stood to the credit of holders in the Post Office Savings Bank Section of the Post Office Register. Interest on Post Office Savings Bank deposits is allowed at 2½ per cent. per annum. A depositor may have more than one account but may not deposit more than a total of £5,000 in all accounts in his name, with certain exceptions for trust and trustee accounts.

In 1960 the Average Amount due to each Depositor in Active Accounts was £79 15s. 3d.

Trustee Savings Banks were started in the early years of the 19th century by public-spirited men who recognized the importance of individual thrift to the well-being of the community.

On Nov. 20, 1961, there were 9,251,280 active accounts in the Trustee Savings Banks. The total assets of the Banks amounted to £1,620,534,960 which comprised £1,401,375,057 due to depositors in the Ordinary and Special Investment Departments, £196,122,229 Stocks and Bonds held for depositors and £23,037,704 representing the

accumulated surplus of the individual Trustee Savings Banks throughout the country. Information about these Banks and their offices, numbering 1,349 (principal and subordinate) in November, 1961, can be obtained from the *Trustee Savings Bank Association*, 22 Manchester Square, W.1.—*Chairman*, Sir Kenneth Stewart, Bt., G.B.E.; *Secretary*, R. T. H. Scott, M.B.E.

PREMIUM SAVINGS BONDS

One of the most popular forms of saving in the United Kingdom is through Premium Savings Bonds. These bonds are a United Kingdom Government security and were first introduced on November 1, 1956. Instead of earning interest, however, each bond offers to its holder the chance of winning a money prize in a monthly draw. Bonds are issued in values ranging from £1 to £500 and each £1 buys one bond, which has one chance in the monthly draw. Bonds are sold only to individuals, not to groups or corporate bodies. No more than 800 bonds can be held by any one person. The bonds are sold at Post Offices, Banks and Trustee Savings Banks. Holders may

redeem bonds at any time by completing a form which is available at Post Offices and Banks.

Prizes are paid from a fund formed by the interest, at present 4½ per cent., carried into the draw by each eligible bond. A bond becomes eligible for the draw three clear calendar months following the month of purchase and goes into every subsequent draw whether or not it has won a prize. Prizes range in value from £5,000 to £25, the winning numbers being selected by the electronic random number indicator equipment—usually called "ERNIE." Winning numbers are printed monthly in the *London Gazette*. Bonds are eligible for inclusion in 12 monthly draws following the death of the holder. These terms also apply to bonds purchased before August 1, 1960 (Series "A").

It is estimated that by the end of May, 1962, bonds to the value of £453,800,000 had been sold. Of these £95,800,000 had been cashed, leaving £358,000,000 still invested. After the 61st draw in June, 1962, more than 1,257,000 prizes had been distributed since the draws started. These prizes had a total value of £49,103,350.

NATIONAL SAVINGS CERTIFICATES

The amount, including accrued interest, remaining to the credit of investors in National Savings Certificates on March 31, 1962, was approximately £2,654,400,000. In 1961-62, £173,900,000 was subscribed and £190,000,000 (excluding interest) was repaid.

Note.—Certificates may be bought in denominations of 1, 2, 3, 4, 5, 10, 20, 50, 100 and 200 15s. units.

THE NATIONAL BUILDINGS RECORD

Fielden House, 10 Great College Street, S.W.1.

The National Buildings Record is an organization established in 1941 under the direction of an Advisory Council. It is supported by an annual grant from the Treasury, and its functions are:

- To maintain a library of photographs and measured drawings of English and Welsh architecture which is open to the public for consultation and study. There are over 525,000 photographs.
- To supply copies of photographs where nega-

tives are available. There are approximately 300,000 negatives.

To prepare and acquire additional records which are constantly being added to the library.

To maintain an index of architectural records (photographs, measured drawings, sketches, and engravings) in public and private possession.

Chairman of Advisory Council, Sir James Mann, K.C.V.O., Hon. V.P.S.A., F.B.A.
Secretary, Cecil Farthing, F.S.A.

LIFE ASSURANCE AND FIRE AND GENERAL INSURANCE

LIFE ASSURANCE

THE list on the following two pages contains the names of all the more important British Life offices, and of Commonwealth companies (marked C), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked (O) in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches. Those having an Industrial branch are indicated by letter (I).

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended December 31, 1961.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risks.

EXPENSES.—The expenses of a Life office include in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 16½%, of which about 5½% is expended on commission and 11% on other

expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policy holder through reduced premium being equivalent to an immediate cash bonus.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is before deduction of Income Tax except where marked (N)—net.

VALUATIONS.—The Board of Trade require valuation returns by the companies and the last columns of the table show the basis on which valuations are made. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table (various tables are used), and that interest will be earned at a certain rate. If a company assumes that it will earn a high rate of interest in the future the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The lower the rate of interest assumed the more stringent is the valuation. The foregoing remarks, however, do not apply in the case of an office which has adopted a Bonus Reserve Valuation.

FIRE INSURANCE RATES

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity *zs. 6d.*

Household goods therein, usually *zs.*

A number of companies issue "comprehensive" policies embracing in one contract all risks incidental to private houses and contents.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from *zs.*

Stock and Utensils in trade fixtures, and household furniture in such shops and warehouses, from *zs.*

Most fire insurance companies transact accident (including Motor) and miscellaneous business,

and if a strong company be selected it will probably be found to the advantage of an insurer that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. The "comprehensive" policies, previously referred to, combine in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, etc., and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of 5s. per £100 of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate, but can be included under the same policy, if desired. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

NOTE.—As Insurance is highly technical, particularly where business risks are involved, the advice and assistance of a qualified Insurance Broker can be utilized with considerable advantage.

Life Premium Income—Figures exclude consideration for Annuities except those marked *

C—Commonwealth Office. † 1960 figures.

* Scottish Prov.—With 2½% net premiums.

* Sentinel—Year ending March 31, 1961.

* Standard—Year ending Nov. 15, 1961. With select net premiums.

* Sun Life of Canada—Company now owned entirely by Policyholders.

* Teachers—year ending Sept. 30, 1960.

* Western Australian—Year ending June 30, 1961.

* Avon-Life Dept., est. Jan. 1954.

* Eagle Star—Including funds of acquired businesses.

* Ecclesiastical—Year ending Feb. 28, 1962.

* Friends Prov. & Cent.—Discounting 2½% net premis.

* Midland Employers—Life Dept., est. Jan. 1947.

* Nat. Mut. of Austral. Year ending Sept. 30, 1961.

* Pioneer—Year ending March 31, 1962.

* Royal—Including figures of associated companies.

LIFE ASSURANCES IN FORCE

British Life Assurance Statistics show that 10,900,000 ordinary assurance policies to the amount of £10,400,000,000 were in force at the end of 1961, with total yearly premiums of £312,000,000. The 1961 figures include for the first time the Ordinary Branch business of Friendly Societies.

ENDOWMENT ASSURANCES.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realization of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-

earning capacity—see first page of Life Assurance.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death together with any Bonuses attaching under a "with profit" Policy.

The following table shows the annual premiums, for various ages at entry, charged by the offices named, to secure £100 at the end of 15, 20 and 25 years, or at death, if previous, with profits.

MALE LIVES (lower premiums are quoted by many offices for female lives)

SUM ASSURED PAYABLE AT DEATH, OR AT THE END OF

Co-operative Societies—Great Britain

Industrial and Provident Societies Acts, 1893-1961

During the 10 years ended 1961 Co-operative Retail Trading Societies (almost all General Supply Stores) expanded their membership and assets by 21 per cent. as shown by the following particulars covering the 626 societies on the register at the end of 1961 and 1,109 societies in 1951:

Year	Number of Members	Share Capital	Sales	Surplus on Year's Working	Interest on Shares	Dividends on Sales	Total Assets
1961	12,832,000	£,000's 254,852	£,000's 1,018,550	£,000's 60,042	£,000's 7,502	£,000's 46,543	£,000's 489,641
1951	10,745,000	222,154	649,772	48,860	6,010	38,169	397,488

In addition, 155 Co-operative Wholesale and Productive Trading Societies (with a total membership of 23,000) were on the register at the end of 1961. The total figures for these societies are dominated by those of the two main Wholesale Trading Societies (with their "Joint" undertakings) whose combined sales for 1961 amounted to £557,000,000, their assets at the end of the year totalling £184,000,000.

Friendly Societies—Great Britain

Acts 1896-1958

In spite of the expansion of *Compulsory* "Health" insurance since the introduction of the *State* scheme in 1912 and its extension in 1948, the *Voluntary* business of Friendly Societies registered under the Friendly Societies Act, 1896, still continues on a large scale, as shown by the following comparative totals—those in ordinary type relate to registered Friendly Societies proper (embracing both "Centralized" societies and "Orders with Branches"); those in *italics* "Collecting" societies which, although registered under the Friendly Societies Acts, are subject also to the special provisions of the Industrial Assurance Acts:—

End of Year	No. of Societies on Register		Members- hip	Assurances or Policies	Total Funds	
					Thousands	£,000's
1960.....	10,814	91	6,036	32,266	250,310	318,086
1938.....	19,600	149	8,491	25,733	151,613	84,837
1913.....	25,475	71	6,783	7,481	51,489	11,165

Although recent years have seen the growth of societies registered for such specific purposes as the provision of institutional treatment or assuring annuities and pensions, most friendly societies continue to provide the customary benefits in sickness and at death. During 1960 Friendly Societies proper paid out £5,446,000 in sickness benefit and £2,069,000 in death benefit while payments on death claims by collecting societies amounted to £9,885,000.

Many societies still operate mainly on the old system of accumulating funds on a mutual basis. Others, usually termed deposit societies, allocate all or the greater part of their funds annually to the individual credit of the members to be withdrawn

by them as the rules provide. Apart from the National Deposit Society's method of a uniform contribution throughout membership there are several systems operated on individual account lines, one of which (known as the "Holloway" principle) is worked by a contribution increasing with each year of attained age after the member reaches age 30 up to age 65.

The membership and funds figures—as at the end of 1960—set out below indicate the strength of several leading old established societies, including the three largest Orders which operate through registered districts and branches subject to a central body:—

FRIENDLY SOCS.—Name with (in brackets) Year Established	Membership	Total Funds
National Deposit Friendly Society (1868).....	581,000	£ 24,221,000
Hearts of Oak Benefit Society (1842).....	574,000	18,046,000
Independent Order of Odd Fellows, Manchester Unity (1810).....	410,000	28,125,000
Ancient Order of Foresters (1834).....	325,000	19,956,000
Independent Order of Rechabites, Salford Unity (1825).....	187,000	7,021,000

COLLECTING SOCS.—Name and Year Established	No. of Assurances Premium Paying	Prce Paid-up	Total Funds
Liverpool Victoria Friendly Society (1843).....	12,338,000	4,077,000	£ 177,345,000
Royal Liver Friendly Society (1850).....	7,501,000	2,064,000	90,505,000
Scottish Legal Life Assurance Society (1852).....	2,584,000	925,000	23,858,000

The present National Insurance scheme with its provision of "cradle to the grave" benefits has had serious repercussions on the Voluntary Friendly Societies. From the end of 1937 to the end of 1947 total membership rose from 8,341,000 to 8,608,000, an increase of 3 per cent., but during the next ten years it fell by 27 per cent. to 6,277,000. There are, however, signs that the decline in membership is now being arrested.

When the modest scheme of 1912 was introduced some people doubted the Voluntary Friendly Societies' ability to survive for long, and yet they continued to grow in the face of keen competition, although their remarkable expansion naturally brought many societies up to a point where they found it increasingly difficult to maintain a sufficient inflow of new, young entrants to replace membership losses due to death and other causes. In recent years, too, many of the older (non-deposit type) societies have had to introduce more attractive tables to cater for the growing preference amongst members for a curtailed (instead of whole-life) sickness insurance to enable a margin

of contributions to accumulate to their credit as an increasing cash endowment payable in full at age 65, or in the event of prior death, with the option of drawing on the credit from time to time if the member is in need, subject to certain conditions, including the retention of a specified minimum sum in the member's account.

In considering how far the general body of members comprising the Friendly Societies movement can afford to continue their voluntary insurances along with their higher State scheme contributions in future, it must not be overlooked that present-day wage levels are substantially higher for all classes of workers than before the war and the Government has declared that continued Voluntary insurance to supplement State benefits, wherever one's means permit, should be encouraged.

Moreover, in addition to the widespread branch units of the better known "Orders," there are numerous small independent societies whose membership is maintained more easily than in the large societies, by age-long custom of family and local

ties within their own locality, and there still exist a few such societies whose formation dates back far beyond any "Friendly Society" legislation. In fact, long before the term "Friendly Society" came into use, the seeds of Voluntary mutual insurance had been sown in the ancient religious and trade "Guilds." As is evident from the many extant parchment returns detailing their rules and possessions under a decree of Richard II, Guilds had become widespread in Britain by the 14th century. By then, the purely charitable character of the original Guilds had largely changed with the emergence of numerous small institutions adopting primitive mutual insurance methods of a regular flat rate contribution in order to obtain relief when sick or in old age and a payment to the widow in the event of death.

The present register of Friendly Societies includes several societies which have been in existence for upwards of 200 years, the four earliest all operating in Scotland, the oldest being the "Incorporation of Carters in Leith" established as long ago as 1555. The three oldest in England were all formed in London—the "Norman Society" (estd. 1703), the "Society of Lintot" (estd. 1708) and the "Society for the Mutual Help of Swiss in London" (estd. 1703), the first two of these having been formed by Huguenot refugees from the Protestant persecution under Louis XIV.

The first Act for the encouragement and pro-

tection of "Friendly Societies" in this country was not passed until 1793, but various amending Acts were put on the Statute Book during the next century as the result of the recommendations of successive Select Committees (including a Royal Commission in 1871). For example, it was not until the 1829 Act that all registered Friendly Societies were required to keep proper records of individual sickness and mortality amongst their members, which data enabled the construction of standard actuarial tables showing the expected (average) duration of sickness at successive ages, and also (with data from the Census) the corresponding mortality rates.

The rules and other documents of societies deposited with local justices passed into the custody of the Registrar following the Act of 1846 and are of considerable interest to social historians. Those relating to some societies no longer on the register have been transferred to the Public Record Office for permanent preservation.

The present consolidating Act of 1896 allows various specific classes other than "Friendly Societies" to be registered thereunder, but exemption from income tax (irrespective of the extent of interest income) is enjoyed only by registered "Friendly Societies."

The Friendly Societies Act, 1955, extended the purposes for which societies may be registered under the Acts, and authorized societies to invest their surplus funds in other registered societies.

Building Societies—Great Britain

Act 1962.

Building Societies are, with few exceptions, associations incorporated with limited liability under the Building Societies Act. All Building Societies are required to register their rules and file their accounts with the Registry of Friendly Societies. The following particulars showing the growth of Building Societies (as also that of Co-operative and Friendly Societies tabulated on pp. 1130 and 1131) are based on the Chief Registrar's Annual Reports. The Editor is also indebted to the publishers of the "Building Societies Year Book" for details of individual societies from which the second table hereunder has been compiled.

The building societies movement has played a considerable part in the expansion of home ownership since the war. Between 1946 and 1958 building societies advanced nearly £4,000,000,000 on mortgage, the bulk of it to assist owner-occupiers to buy their homes.

The progress of the building society movement over the past twenty years and the tendency to concentration in a smaller number of larger societies is illustrated by the following figures:—

	1941	1951	1961
Number of Societies.....	947	807	706
Total Assets.....	£749m	£1,357m	£3,436m
Average per society of total assets.....	£79m	£1,68m	£4.87m

Advances on mortgage during 1961 totalled £546,000,000 which was £14,000,000 less than the previous year's record figure.

Shareholders and depositors added £620,000,000

to their accounts during 1961 while £522,000,000 was withdrawn from these accounts. The total assets increased to £3,436,000,000. Of this total, mortgage balances represented 83 per cent., the remainder consisting chiefly of investments in Government securities and cash. Reserves and profit balances represented 4.4 per cent. of the total assets.

For the year 1961 interest received by societies from borrowers amounted to £173,000,000. Interest payments to shareholders and depositors totalled £107,000,000. Management costs, at £20,000,000 for 1961, averaged only about 1½d. per £1 of the mean mortgage assets. Of this total advertising accounted for 7 per cent. and commission and agency fees 11 per cent.

The rate of interest usually charged on mortgage advances to owner-occupiers is 6½ per cent. Interest rates paid on share and deposit accounts are usually 3½ and 3¼ per cent. respectively (income tax on both share and deposit interest being paid by the societies).

Section 1 of the House Purchase and Housing Act, 1959, empowered the Chief Registrar to designate building societies for the purposes of the section. Societies that had been designated up to the time of going to press are marked "D" in the list which follows. Deposits in a designated building society rank as "narrower-range investments requiring advice" and shares in such a society as "wider-range investments" under the First Schedule to the Trustee Investments Act, 1961.

The Building Societies Act, 1962, which came into operation on October 1, 1962, consolidates into one statute the greater part of the existing enactments relating to building societies. The Act consists of eight parts with 135 sections and ten schedules. It deals first with the constitution of societies, including establishment and incorporation, membership, unions and transfers of engagements. It then proceeds to Advances on Mortgage

bringing together provisions from the 1939 Act and those of the 1960 Act which placed restrictions on "special advances" (that is advances to bodies corporate or exceeding £5,000). Part III deals with Borrowing Powers and Depositors.

Part IV sets out the various powers of control exercisable by the Chief Registrar. Section 11 of the Prevention of Fraud (Investments) Act, 1958, under which the Registrar had prohibited certain societies from inviting investments was repealed by the 1960 Act (but without prejudice to any order currently in force) and the Chief Registrar was empowered to direct that a building society shall not advertise at all or to give directions to a particular society as to the matter included in its advertisements. In addition he may make an order prohibiting a building society from accepting further investments. The Chief Registrar's Report to Parliament for 1961 disclosed that at the end of that year 17 orders under the 1958 Act were still in force while 3 orders had been made under the 1960 Act prohibiting the acceptance of further investments.

Matters of internal administration of societies

regulated by Parts V and VI of the 1962 Act include the keeping of books of account and register of members, the preparation of annual accounts in a form prescribed by the Chief Registrar, the qualifications, appointment and removal of auditors, the form and content of directors' and auditors' reports, the right of members to receive copies of the accounts and reports, the calling and conduct of general meetings and the duties of directors. Part VII deals with winding up and dissolution while Part VIII contains a variety of miscellaneous and supplementary provisions.

The standard rules for meetings of building societies formerly contained in the Fifth Schedule to the 1960 Act are now to be found in the Ninth Schedule of the 1962 Act. In his Report referred to above, the Chief Registrar drew attention to the fact that some 300 societies had failed to alter their rules in accordance with the 1960 Act before December 31, 1961, with the result that the regulations governing their meetings are now to be found partly in their rule books and partly in the Schedule to an Act of Parliament.

BUILDING SOCIETIES, GREAT BRITAIN, 1961—with 1960 totals in italics.

MORTGAGE REPAYMENT TABLE

Calendar monthly subscriptions required to pay off principal and interest of mortgages at $6\frac{1}{2}$ per cent. interest* over various periods of years. Intermediate amounts can be determined by addition of subscription rates, e.g., Calendar monthly subscription for a mortgage of £3,200 over 20 years—£22 15s. + £1 10s. 4d. = £24 5s. 4d.

* Most of the Building Societies were charging $6\frac{1}{2}$ per cent. on mortgages to owner-occupiers in 1962.

NATIONAL HEALTH SERVICE

The National Health Service was inaugurated on July 5, 1948, by the Minister of Health under the *National Health Service Act, 1946*, "to promote the establishment in England and Wales of a comprehensive Health Service designed to secure improvement in the mental and physical health of the people of England and Wales and the prevention, diagnosis and treatment of illness." There are separate Acts for Scotland and Northern Ireland, where the Health Services are run over very similar lines. The Minister of Health is responsible to Parliament for seeing that Health Services of all kinds of the highest possible quality are available to all who need them. He is advised by the Central Health Services Council (and certain Standing Advisory Committees dealing with special subjects), which he appoints after consultation with the various interested bodies.

The National Health Service which covers a comprehensive range of hospital, specialist, practitioner (medical, dental, ophthalmic), pharmaceutical, appliance and local authority services, is available to every man, woman and child in the country. Everyone resident in the country is entitled to use the Service as a whole or any complete part of it. No insurance qualification is necessary. Most of the cost of running the Service is met by the Exchequer—that is from taxes. Other sources of finance are: (i) the weekly National Health Service contributions (since September, 1957), which are estimated to produce about £147,000,000, approximately $\frac{1}{4}$ th of the total cost of the Service in 1962-63. (For convenience these are collected with the National Insurance contribution in a single combined weekly stamp); (ii) local taxation, which pays for about half the cost of local health authority services; (iii) partial charges to patients for prescription items, spectacles, dentures and dental treatment, appliances, amenity beds in hospital; (iv) superannuation contributions.

Details of the way in which the National Health Service is organized, and of the services provided by its main branches are described in the following paragraphs.

THE HEALTH SERVICES

Family Doctor Service

In England and Wales the Family Doctor Service is organized by 138 Executive Councils which also organize the Dental, Pharmaceutical and Supplementary Eye Services for their areas. There is an Executive Council for each County and County Borough area, but in some cases one Council covers two areas. Members, who serve voluntarily, are appointed by local doctors, dentists and pharmacists (12), the Local Health Authority (8) and the Minister of Health (5). Any doctor may take part in the Family Doctor Scheme, provided the area in which he wishes to practise has not already an adequate number of doctors, and about 22,000 general practitioners do so. They may at the same time have private fee-paying patients. Health Service doctors are paid on a capitation basis, i.e. an annual fee in respect of each patient accepted.

Everyone aged 16 or over can choose his doctor (parents or guardians choose for children under 16) and the doctor is also free to accept a person or not as he chooses. A person may change his doctor if he wishes, either at once if he has changed his address or obtained permission of the doctor on whose list he is, or by informing the local Executive Council (in which case a delay of about 14 days is usual). When people are away from home they can still use the Family Doctor Service if they ask to be treated as "temporary residents," and in an emergency, if a person's own doctor is not available, any doctor in the service will give treatment and advice.

Patients are treated either in the doctor's surgery or when necessary, at home. Doctors may prescribe for their patients all drugs and medicines which are medically necessary for their treatment and also a certain number of surgical appliances (the more elaborate being provided through the hospitals).

Drugs, Medicines and Appliances.—The number of chemists (including drug stores and appliance suppliers) in England and Wales, within the National Health Service at December 31, 1961, was 15,631. 205,016,327 prescriptions were dispensed in 1961. Since March 1, 1961, there has been a charge of 2s. in respect of each item on a prescription form made out by the family doctor and presented for dispensing, except for elastic hosiery for which the charge is 5s. or 10s. for each article. In those country areas where the doctor does his own dispensing, the charge is collected by the doctor.

Dental Service

Dentists, like doctors, may take part in the Service and may also have private patients. About

10,450 of the dentists available for general practice have joined the National Health Service. They are responsible to the Executive Councils in whose areas they provide services.

Patients are free to go to any dentist taking part in the Service and willing to accept them, and do not require to register with any particular dentist. Dentists receive payment for items of treatment for individual patients, instead of the capitation fee received by doctors. There is no need for the patient to obtain a recommendation before seeking dental treatment. The dentist is able to carry out at once all normal conservative treatment (e.g. fillings), provision of dentures in some cases, emergency treatment and ordinary denture repairs; he seeks prior approval from the Dental Estimates Board before undertaking treatment when it involves the extraction of teeth and the provision of dentures (in some cases); extensive and prolonged treatment of the gums; inlays; crowns (in some cases); special appliances and oral surgery and certain other items.

A dentist may, with the approval of the Dental Estimates Board, charge his patient a prescribed sum for such types of treatment as crowns, inlays or metal dentures where these are not clinically necessary, if the patient wishes to have them. Where a denture supplied under the Service has to be replaced because of loss or damage the whole or part of the cost may be charged to the patient if he has been careless. In May, 1951, charges were introduced for dentures; these were increased in May, 1961, to £2 5s.—£2 15s. for the supply of one denture or up to £5 for a set. In June, 1952, a charge of £1, or the full cost of any treatment if less than £1, was introduced. No charge is made for the clinical examination of a patient's mouth. Expectant mothers or mothers who have had a child during the preceding twelve months, children under 16; or 16 or over, but still in full-time attendance at school, do not pay charges. Other patients between 16 and 20 years of age pay charges for dentures only.

Supplementary Ophthalmic Service

Supplementary Ophthalmic Services which are run by the Executive Councils, form part of the Eye Services available under the National Health Service, and provide for the testing of sight and supply of glasses only. Any ophthalmic medical practitioner or ophthalmic optician who has joined the Service may be consulted. The first time a person uses the Service he must obtain a recommendation from his doctor that his sight needs testing. After this he can use the Service direct without first obtaining a note from his doctor.

Until 1951 there were no charges under the Supplementary Ophthalmic Service except, in certain cases, for the renewal or repair of glasses or where the patient chose a more expensive spectacle frame than one of the standard frames available free, or asked to be supplied with special lenses where only flat lenses were necessary. In May, 1951, charges to patients of 20s. for each lens, plus the actual cost of the frames, were introduced. As from May 16, 1961, charges to patients have been increased to 22s. 6d. for each single-vision lens or 20s. for each bi-focal lens. As hitherto, children's glasses in the standard type of children's frame remain free of charge. As from May, 1961, schoolchildren aged 10 years or over may be supplied with lenses without charge if any other type of N.H.S. frame is used; the charge for the frame must then be paid.

Hospitals and Specialists

On July 5, 1948, ownership of 2,688 out of 3,040 voluntary and municipal hospitals in England and Wales was vested in the Minister of Health. The Minister has a duty to provide hospital accommodation and specialist services to such an extent as he considers necessary to meet all reasonable requirements for the treatment of the acutely ill, maternity cases, the chronic sick and those suffering from tuberculosis or infectious diseases as well as the mentally disordered. Convalescent treatment is also provided for those who need it and surgical and medical appliances are supplied in appropriate cases.

In the main, this part of the Service is organized by 15 Regional Hospital Boards (see Index); in 14 of these regions there is a University having a teaching hospital or medical school. Hospitals are administered on behalf of the Boards by 38 Hospital Management Committees. The only hospitals in the Service outside the Regional Boards' immediate responsibility are the teaching hospitals which provide facilities for undergraduate and post-graduate medical or dental education and which are administered by Boards of Governors. There are 26 Boards of Governors in London and 10 in the rest of the country.

Specialists and consultants who take part in the Service (and nearly all of them are doing so) hold hospital appointments. They can take up whole-time or part-time service and those who have part-time appointments can still accept fee-paying patients outside the Service.

Certain hospitals have accommodation in small wards or single rooms which, if not required for patients who need privacy for medical reasons, may be made available to patients who desire it as an amenity. Amenity bed charges are fixed under Regulations and are at present 12s. or 24s. per day. In such a case the patient pays nothing for the cost of treatment or the normal cost of maintenance. In some hospitals a number of pay-beds has been placed at the disposal of part-time specialists taking part in the Service for use by private patients who agree to pay full hospital maintenance costs, and (usually) private fees to the specialist as well. The fees that may be charged by specialists to patients occupying private pay-beds are normally restricted to 75 guineas to cover everything. For exceptionally long or complicated treatment this limit may be raised to 125 guineas and special arrangements may be made in a limited proportion of pay-beds for patient and doctor to agree to fees outside these limits.

Arrangements to obtain the service or advice of a hospital specialist are made by the patient's family doctor as in the past. A specialist usually sees a patient at the hospital or clinic at which he works, but arrangements will be made for the specialist to

visit the patient at home if he is unable, for medical reasons, to be taken to hospital. No charges are made to National Health Service in-patients (except for amenity beds as above or dentures or glasses of a special type supplied at the patient's request), but a charge of 2s. is made to out-patients for each item on a prescription form for drugs and medicines (unless administered at hospitals). Exemptions from this charge are made in the case of patients receiving National Assistance or their dependants; war pensioners receiving medicines for their accepted disability; and patients attending V.D. clinics who receive medicines as part of their treatment. Also hospital out-patients have to pay fixed charges for elastic hosiery, surgical abdominal supports, surgical footwear (and healing and soling repairs), dentures, glasses and wigs. Exceptions are made in the case of a child under 16 years of age or at full-time attendance at school, to National Assistance recipients and their dependants and to war pensioners in respect of their accepted war disabilities.

There are at present 80 hospitals providing distribution centres where hearing aids can be obtained after recommendation by a specialist.

Local Health Authority Services

The Local Health Services, mainly concerned with the care of patients in their own homes, are the responsibility of the major local authorities—County Councils and County Borough Councils. There are 146 Local Health Authorities in England and Wales and 29 other authorities exercise delegated health and welfare functions.

Local Health Services provide such services as midwifery; ante-natal, post-natal and Infant welfare clinics, and priority dental services where practicable for expectant and nursing mothers and young children; health visiting; home nursing; ambulances; provision of domestic help on health grounds; special care and after-care of the sick; health education; local mental health services; and also vaccination and immunization. The provision of Health Centres is also a Local Health Authority responsibility in England and Wales. In Scotland such centres are the responsibility of the Scottish Home and Health Department.

All these services are free of charge except for domestic help and, in certain cases, provision of residential accommodation, meals, nursing requisites, bedding, etc., for which a charge may be made according to means. Since June, 1952, Local Health Authorities have also had power to make charges for the use of day nurseries. The Local Health Authorities may only charge what is reasonable, having regard to the means of the users.

50	3.4371	5.5849	9.0326	11.4674	14.5420	18.4202

When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year less £1, must be taken. Thus, for £1 at 2½ per cent. for 25 years, take 26 years, £36.012, and deduct £1—£35.012.

WIND FORCE MEASURES

The Beaufort Scale of wind force has been accepted internationally and is used in communicating weather conditions. Devised originally by Admiral Sir Francis Beaufort in 1805, it now consists of these numbers 0-17, each representing certain strength or velocity of wind.

Scale No.	Wind Force	M.p.h.	Knots	Scale No.	Wind Force.	M.p.h.	Knots
0	Calm	—	—	9	Strong gale	47-54	41-47
1	Slight air	1-3	1-3	10	Whole gale	55-63	48-55
2	Slight breeze	4-7	4-6	11	Storm	64-73	56-63
3	Gentle breeze	8-12	7-10	12	Hurricane	73-82	64-71
4	Moderate breeze	13-18	11-16	13	—	83-92	72-80
5	Fresh breeze	19-24	17-21	14	—	93-103	81-89
6	Strong breeze	25-31	22-27	15	—	104-114	90-99
7	High wind	32-38	28-33	16	—	115-125	100-108
8	Gale	39-46	34-41	17	—	126-136	109-118

LIGHTHOUSES

In 1960-61 the income of the General Lighthouse Fund was £4,786,867, made up of £4,653,127 United Kingdom Light Dues, £41 Bahamas Light Dues, £1 Sombrero Light Dues, £48 Basses Light Dues, £133,650 Miscellaneous Receipts. Expenditure during the year totalled £3,547,154 made up of £3,424,978 in respect of maintenance and operation of lighthouses, etc., under the control of the three General Lighthouse Authorities (*Trinity House, Commissioners of Northern Lighthouses, and Commissioners of Irish Lights*), £92,614 in respect of Lighthouses Abroad and £29,562 miscellaneous expenditure, including the cost of collecting dues. The surplus of £1,239,713 was carried to the Net Revenue Account. In September 1940, United Kingdom Light Dues were increased from 150 per cent. of the statutory rates laid down in the Merchant Shipping Act, 1894, to 200 per cent., and in March, 1942, to 300 per cent. The dues were reduced to 200 per cent. in January, 1946, but general increases in costs and expenditure on renewals and replacements necessitated increases up to 460 per cent. in April, 1956. As a consequence of the United Kingdom's adherence to the Convention on the Territorial Seas and Contiguous Zones, the Orders in Council under which Colonial Light Dues were collected were revoked with effect from March 25, 1960.

LONDON RAILWAY STATIONS AND SYSTEMS

London Midland Region

EUSTON, off Euston Road.—For trains to Birmingham (New Street), Rugby, Stafford, Crewe, North Wales, Manchester, Liverpool, Warrington, Carlisle, and Scotland *via* old London and North-Western route. Also short-distance trains to Watford, etc.

ST. PANCRAS, Euston Road.—For trains to Bedford, Leicester, Derby, Nottingham, Sbeffield, etc. and to Scotland *via* old Midland route. Also short-distance trains to St. Albans, Luton, etc. Boat-trains for Tilbury leave from St. Pancras.

BROAD STREET.—City terminus of the former North London line to Richmond *via* Willesden Junction and for trains to Watford.

MARYLEBONE.—For trains to Rugby, Leicester and Nottingham and for some shorter-distance trains, e.g. to Harrow, High Wycombe and Aylesbury (see also Metropolitan Line).

Eastern Region

KING'S CROSS.—For trains to Peterborough, Grantham, Doncaster, York, Darlington, Durham, Newcastle and Edinburgh *via* old London and North-Eastern route; Lincolnshire and East Riding. Also short distance trains to parts of Hertfordshire.

LIVERPOOL STREET, City.—For trains to East Anglia—Chelmsford, Colchester, Ipswich, Norwich, Cromer, Yarmouth, etc.; boat-trains to Harwich. Also short-distance trains to outer N.E. London suburbs and to most parts of Essex.

FENCHURCH STREET, City.—Is terminus for the Tilbury and Southend Line.

Western Region

PADDINGTON, Praed Street, W.2.—For trains to Reading, Swindon, Bristol, Taunton, Exeter, Plymouth, Penzance, Newport, Cardiff, Swansea and other parts of South Wales, Cheltenham, Gloucester, Oxford, Worcester and Hereford, Birmingham (Snow Hill), Wolverhampton, Chester and Birkenhead. Also short-distance trains to parts of Middlesex and Thames Valley.

Southern Region

VICTORIA, end of Victoria Street, S.W.1.—Boat trains for Dover, Folkestone and Newhaven. Trains to Kent and Sussex coast. Short-distance trains to many parts of Kent and Surrey.

WATERLOO, Waterloo Road, S.E.1.—Trains to Southampton, Portsmouth (for Isle of Wight), Lymington (for Isle of Wight), Bournemouth, Basingstoke, Winchester, Salisbury, Exeter, Ilfracombe and Bude. Short-distance trains to many parts of Surrey, Middlesex and Thames Valley.

LONDON BRIDGE, south of London Bridge, S.E.1.—Trains to South Coast and many short-distance trains on Southern Electric system.

CHARING CROSS.—Trains to all parts of Kent and East Sussex and many short-distance trains.

CANNON STREET, City.—City terminus for trains covering largely same routes as Charing Cross.

HOLBORN VIADUCT, City.—Used mostly for short-distance trains to South London and parts of Kent. **BLACKFRIARS** is on the Holborn Viaduct Line, but is a terminus for some trains.

LONDON TRANSPORT UNDERGROUND SYSTEM

Bakerloo Line

Elephant and Castle,* Lambeth North, Waterloo,* Charing Cross,* Trafalgar Square, Piccadilly Circus,* Oxford Circus,* Regent's Park, Baker Street*—then *Stammore Branch* (St. John's Wood, Swiss Cottage, Finchley Road,* West Hampstead, Kilburn, Willesden Green, Dollis Hill, Neasden, Wembley Park,* Kingsbury, Queensbury, Canons

Park, Stanmore) or *Watford Branch* (Marylebone, Edgware Road,* Paddington,* Warwick Avenue, Maida Vale, Kilburn Park, Queen's Park, Kensal Green, Willesden Junction, Harlesden, Stonebridge Park, Wembley Central, North Wembley, South Kenton, Kenton, Harrow and Wealdstone, Headstone Lane, Hatch End, Carpenders Park, Bushey and Oxhey, Watford High Street, Watford Junction).

Central Line

From Ruislip.—West Ruislip, Ruislip Gardens, South Ruislip, Northolt, Greenford, Perivale, Hanger Lane.

From Ealing.—Ealing Broadway, West Acton.

Theu (both branches) North Acton, East Acton, White City, Shepherd's Bush, Holland Park, Notting Hill Gate,* Queensway, Lancaster Gate, Marble Arch, Bond Street, Oxford Circus,* Tottenham Court Road,* Holborn,* Chancery Lane, St. Paul's, Bank,* Liverpool Street,* Bethnal Green, Mile End,* Stratford, Leyton, Leytonstone.

Then Hainault Branch *via* Wanstead (Wanstead, Redbridge, Gants Hill, Newbury Park, Barking-side, Fairlop, Hainault).

Or Epping Branch (Snaresbrook, South Woodford, Woodford, Buckhurst Hill, Loughton, Debden, Theydon Bois, Epping, North Weald, Blake Hall, Ongar). Change at Woodford for Roding Valley, Chigwell, Grange Hill and Hainault.

Circle Line

Charing Cross,* Westminster, St. James's Park, Victoria, Sloane Square, South Kensington,* Gloucester Road,* High Street Kensington, Notting Hill Gate,* Bayswater, Paddington,* Edgware Road,* Baker Street,* Great Portland Street, Euston Square, King's Cross and St. Pancras,* Farringdon, Aldersgate, Moorgate,* Liverpool Street,* Aldgate, Tower Hill, Monument,* Cannon Street, Mansion House, Blackfriars, Temple, Charing Cross.*

District Line

Uminster, Uminster Bridge, Hornchurch, Elm Park, Dagenham East, Dagenham Heathway, Becontree, Upney, Barking, East Ham, Upton Park, Plaistow, West Ham, Bromley, Bow Road, Mile End,* Stepney Green, Whitechapel,* Aldgate East, Tower Hill (for Tower Hill—Gloucester Road and Edgware Road, see Circle Line), Earl's Court.* Change at Earl's Court for Kensington (Olympia).

Then Wimbledon Branch.—West Brompton, Fulham Broadway, Parsons Green, Putney Bridge, East Putney, Southfields, Wimbledon Park, Wimbledon.

Or Richmond, Hounslow or Ealing Branches. Common as far as Turnham Green *via* West Kensington, Barons Court, Hammersmith,* Ravenscourt Park, Stamford Brook.

Richmond Branch.—Gunnersbury, Kew Gardens, Richmond.

Hounslow Branch.—Chiswick Park, Acton Town,* then as Piccadilly Line.

Ealing Branch.—Chiswick Park, Acton Town,* Ealing Common,* Ealing Broadway.

Metropolitan Line

From Barking as District to Aldgate East, then as Circle Line, Liverpool Street—Baker Street *via* King's Cross. Change at Whitechapel for Shore-ditch and for Shadwell, Wapping, Rotherhithe, Surrey Docks and New Cross or New Cross Gate. From Baker Street—Hammersmith Branch.—

* Interchange Stations.

Edgware Road,* Paddington,* Royal Oak, Westbourne Park, Ladbroke Grove, Latimer Road, Shepherd's Bush, Goldhawk Road, Hammersmith.*

Or Uxbridge, Watford and Amersham Branches, Common as far as Harrow-on-the-Hill (Finchley Road,* Wembley Park,* Preston Road, Northwick Park.

(Uxbridge Branch—West Harrow, Rayners Lane,* then as Piccadilly Line.)

Watford and Amersham Branches.—Common as far as Moor Park via North Harrow, Pinner, Northwood Hills, Northwood.

Then Croxley and Watford.

Or Rickmansworth, Chorley Wood, Chalfont and Latimer, Amersham. Change at Chalfont and Latimer for Chesham.

Northern Line

Morden, South Wimbledon, Collier's Wood, Tooting Broadway, Tooting Bec, Balham, Clapham South, Clapham Common, Clapham North, Stockwell, Oval, Kennington.

Then City Branch—Elephant and Castle,* Borough, London Bridge, Bank,* Moorgate,* Old Street,* Angel, King's Cross and St. Pancras,* Euston—Camden Town,* *see below*. (Change at Moorgate for *Northern City Line*—Old Street,* Essex Road, Highbury and Islington, Drayton Park and Finsbury Park.*)

Or West End Branch—Waterloo,* Charing Cross,* Strand, Leicester Square,* Tottenham

Court Road,* Goodge Street, Warren Street, Euston, Mornington Crescent, Camden Town.

Then Edgware Branch—Chalk Farm, Belsize Park, Hampstead, Golders Green, Brent, Hendon Central, Colindale, Burnt Oak, Edgware.

Or Barnet and Mill Hill East Branches.—Kentish Town, Tufnell Park, Archway, Highgate, East Finchley, Finchley Central, West Finchley, Woodside Park, Totteridge, High Barnet. (Mill Hill East trains diverge after Finchley Central.)

Piccadilly Line

Cockfosters, Oakwood, Southgate, Arnos Grove, Bounds Green, Wood Green, Turnpike Lane, Manor House, Finsbury Park,* Arsenal, Holloway Road, Caledonian Road, King's Cross and St. Pancras,* Russell Square, Holborn,* Covent Garden, Leicester Square,* Piccadilly Circus,* Green Park, Hyde Park Corner, Knightsbridge, South Kensington,* Gloucester Road,* Earsl Court,* Barons Court, Hammersmith,* Acton Town *

AERODROMES AND AIRPORTS

A list of 167 aerodromes in the United Kingdom, Isle of Man, the Channel Islands, etc., available to civil aircraft, showing the class of aerodrome and the length in feet of the longest runway, grass or beach landing strip. Civil Aircraft are not permitted to land at aerodromes in U.K. other than those listed below, except in cases of genuine emergency in flight or where special permission has been obtained from the appropriate authority.

S=Airfield owned or controlled by the Ministry of Aviation; airports available for International air services are also shown in bold type (22).

J=Aerodrome licensed for joint use of Royal Air Force, Royal Navy and civil aircraft (56).

M=Municipal aerodrome, owned or controlled by the local authority (22).

Pu.=Aerodrome licensed for public use (30).

U=Unlicensed aerodrome; *available with prior permission to civil aircraft (18).

Priv.=Aerodrome licensed for private use (42).

C=Aerodrome or airport with Customs and Immigration facilities, continuously or on call.

H=Helicopter Station only.

Cost of the State Airports

Under the Civil Aviation Act, 1946, 21 civil airports are operated by the Ministry of Aviation. They include the three major international airports, London (Heathrow), London (Gatwick) and Prestwick; and ten other airports which either cater in part for international traffic or are locally important—Aberdeen, Belfast, Bournemouth, Cardiff, Edinburgh, Inverness, Isles of Scilly, Land's End, Renfrew and Stansted. The remainder are used by air services operated to meet the need for air communication in the Scottish highlands and islands—Benbecula, Islay, Kirkwall, Machrihanish, Stornoway, Sumburgh, Tiree and Wick. Following are brief details of revenue and expenditure of the state airports in 1960-61. Assets (land, runways and aprons, buildings, plant, services and equipment) were valued at £46,113,061 on March 31, 1961.

Airport	Revenue	Expenditure	Net Cost, 1960-61
London (Heathrow).....	£6,082,920	£6,163,321	£80,401
London (Gatwick).....	431,018	1,506,785	1,075,767
Prestwick.....	959,220	1,190,999	231,779
Scottish airports operated to meet social needs.....	83,682	608,495	524,813
Other United Kingdom airports*.....	1,201,434	3,140,619	1,939,185
ALL STATE AIRPORTS.....	£8,758,274	£12,610,219	£3,851,945

* The ten airports mentioned above, together with Liverpool (now operated by the Liverpool Corporation) up to December 31, 1960, Blackpool (now operated by the Blackpool Corporation) and Southampton (now privately owned). Edinburgh Airport was taken over by the Ministry of Aviation on July 1, 1960 and the figures in the table above include revenue and expenditure from that date.

AIRLINES

STATE AIRLINES

In 1961 the United Kingdom Airways Corporation, British European Airways and British Overseas Airways, together with companies operating scheduled services, flew respectively 39,287,000, 59,026,000 and 17,302,000 aircraft miles, and carried 4,355,000, 844,000 and 1,637,000 passengers. Passenger miles flown were 1,538,888,000, 2,621,173,000 and 349,392,000 respectively. Total freight and mail ton-miles flown were 22,906,000, 85,956,000 and 17,844,000 respectively.

INDEPENDENT AIRLINES

The following are among air transport companies operating independently in and from the United Kingdom in 1962.

BRITISH UNITED AIRWAYS, Portland House, Victoria Street, S.W.1. Associated with Channel Air Bridge, Silver City Airways, Jersey Airlines, Morton Air Services, Airwork International, Aviator Traders (Engineering), Airwork Services, etc.—all owned by Air Holdings Ltd. Scheduled passenger and vehicle-ferry services to East, West and Central Africa, Canary Islands, Gibraltar, Malaga, Rotterdam, Basle, Geneva, Strasbourg, Le Touquet, Calais, Ostend, etc., within U.K. and contract services worldwide. Helicopter operations; engineering and specialized services; aeronautical training. (Bristol *Britannia*; Vickers *Viscount*; Douglas DC6 and DC4, Handley Page *Dart Herald*, Carvair and Bristol 170, etc.).

BRITISH UNITED AIR FERRIES, Portland House, Victoria Street, S.W.1.—Scheduled services, passengers, vehicles and freight; Southend to Calais, Ostend, Rotterdam, Basle, Geneva and Strasbourg. Passenger and Freight Charter: Livestock Carriage. (ATL 98 *Carvair*, 3; Bristol *Freighter*, 9).

CUNARD EAGLE AIRWAYS LTD., 15 Lower Regent Street, S.W.1.—Scheduled passenger and freight services; London-Bermuda, Nassau, Jamaica, Miami; London-Dinard, Luxemburg, Innsbruck, La Baule, Pisa, Rimini and Perpignan; Manchester-Bergen; Birmingham-Palma. (Boeing 707, 2; Bristol *Britannia*, 2; Vickers *Viscount*, 4; Douglas DC6C, 5).

DERBY AVIATION LTD., 78 Buckingham Gate, S.W.1.—Scheduled services: Derby to Belfast, Cork, Glasgow, Dublin Channel Islds., I.O.M. and Ostend; Birmingham, Cambridge, Gloucester, Cheltenham, Luton, Northampton-Channel Islds.; Bristol and Cardiff-Luxemburg, Nice, Palma, Perpignan and Ostend; Carlisle-Jersey (21 aircraft).

FAIREY AIR SURVEYS LTD., White Waltham Aerodrome, nr. Maidenhead, Berks. Photography. (*Dakota*, D.H. *Dove*, D.H. *Rapide*, 5).

HUNTING SURVEYS LTD., 6 Elstree Way, Boreham Wood, Herts.—Air and ground survey; Photogrammetric mapping; Geophysics; Geology, etc. (*Pruce*, *Dakota*, D.H. *Rapide*, *Autocar*, 8).

JERSEY AIRLINES LTD., States Airport, Jersey, C.I.—Scheduled services: Jersey-London, Southampton, Bournemouth, Plymouth, Coventry, Exeter, Dublin, Belfast, Cork, Manchester, Paris, Dinard, St. Brieuc, Amsterdam, Cherbourg, Quimper. (D.H. *Heron*, 4; Douglas *Dakmaster*, 6; Handley Page *Dart Herald*, 4).

MANX AIRLINES LTD., Ronaldsway Airport, Ballasalla, I.O.M.—Scheduled services in U.K.; Freight; Charter; Ambulance. (Bristol *Wayfarer*, 2; *Dakota*, 4).

MERCURY AIRLINES LTD., 22 Broad Street, St. Helier, Jersey.—Passenger and freight charter and scheduled services from Manchester. (D.H. *Heron* 1B, 2).

MERIDIAN AIRMAPS LTD., Shoreham Airport, Sussex.—Vertical and oblique aerial photography; Photogrammetric, geophysical and geological surveys; Architectural and terrain models.

SILVER CITY AIRWAYS LTD., 62 Brompton Road, S.W.3.—Vehicle ferries, passenger, freight and communications; Le Touquet, Calais, Ostend, Cherbourg, Deauville and Belfast. (Bristol Mk. 32 *Super freighter* and Mk. 22 *Freighter*, 14; Douglas *Dakota*, 6.) **NORTHERN DIVISION**, Woolsington Airport, Newcastle.—Scheduled services: Blackpool to Belfast, Isle of Man, Jersey and Ostend; Newcastle to Amsterdam, Blackpool, Düsseldorf, Isle of Man, Leeds. (Bristol *Wayfarer*, 4; Douglas *Dakota*, 3).

SKYWAYS LTD., 7 Berkeley Street, W.1.—Scheduled pass. services to Paris, Lyons, Tours; Vichy/Montpellier; Tunis-Malta. Pass. and freight charter. (*Constellation*, 4; Avro *York*, 5; DC3, 6).

UNITED KINGDOM AIRBORNE TRADE

The following table illustrates the steady rise during the past five years in the proportion of United Kingdom trade carried by air.

Year	Imports			Exports			Re-Exports		
	Total	Airborne		Total	Airborne		Total	Airborne	
	£'000,000	£'000,000	% of Total	£'000,000	£'000,000	% of Total	£'000,000	£'000,000	% of Total
1957.....	4,043.7	86.3	2.1	3,295.0	108.0	3.3	129.8	21.8	16.8

NATIONAL INSURANCE AND ASSISTANCE

For Combined Contributions, see p. 1146.

The State insurance and assistance schemes in force since July 5, 1948, comprise schemes of national insurance and industrial injuries insurance, national assistance and non-contributory old age pensions, and family allowances. The two insurance schemes and the family allowances scheme are administered by the Ministry of Pensions and National Insurance, and the national assistance scheme and non-contributory old age pensions by the National Assistance Board.

NATIONAL INSURANCE

The National Insurance Scheme operates under the National Insurance Act, 1946, as amended by the National Insurance Acts of 1949, 1951, 1953, 1954, 1955, 1956, 1957, 1959 and 1960, the National Insurance (No. 2) Act, 1957, the Family Allowances and National Insurance Acts, 1952, 1956, 1959 and 1961, and the National Health Service Contributions Acts, 1957 and 1961, and Regulations made under these Acts.

From April, 1961, the National Insurance Act, 1959, extended the existing flat-rate scheme by providing, for employed persons over 18, a system of contributions graduated according to earnings, with related graduated additions to retirement pensions. Employees with equivalent occupational pension rights may be contracted out of this graduated part of the scheme. Provision was also made for higher Exchequer supplements, and for four quinquennial increases in contribution rates beginning in 1965.

The National Insurance Act, 1960, amended the amounts of flat-rate contributions and benefits payable under the scheme from April, 1951.

INSURED PERSONS AND CONTRIBUTIONS

Subject to certain statutory exceptions, every person living in Great Britain who is over school leaving age and under pension age becomes insured under the Acts.

There are three classes of insured persons namely:

- (a) Class 1. Employed persons, i.e. persons who work for an employer under a contract of service or are paid apprentices.
- (b) Class 2. Self-employed persons, i.e. persons gainfully occupied but not working under the control of an employer.
- (c) Class 3. Non-employed persons, i.e. persons who are not gainfully occupied.

The estimated number of persons in respect of whom contributions were payable in 1960 was as follows: employed, 22.5 million; self-employed, 1.4 million; non-employed, 0.3 million.

National Insurance contributions are payable by insured persons, by employers of employed persons, and out of moneys provided by Parliament (see p. 1146).

The ordinary flat-rate contributions are usually paid by means of stamps on a single insurance card; the stamp also covers the National Health Service contribution and, in the case of employed persons, the Industrial Injuries contribution.

Since April, 1961, employed persons over age 18 earning more than £9 in any week (who are not contracted out as members of approved occupational pension schemes) and their employers have paid, in addition to the flat rate contribution covering earnings up to £9 a week, a graduated contribution for earnings over £9 and up to £15 a week. People in class 1 who are contracted out pay a higher flat-rate contribution (see pp. 1142, 1146).

Regulations made under the Acts give married women and widows, upon certain conditions, the choice whether to pay the National Insurance flat-rate contribution or not.

Men aged 70 and over and women aged 65 and over in classes (1) and (2) pay no National Insurance contribution. Men aged 65 to 70 and women aged 60 to 65 in these classes, with certain exceptions, are liable to pay contributions, including any graduated contributions, if they have not retired from regular employment. Normally no contributions are payable by men over 65 or women over 60 in class (3).

Regulations state the cases in which insured persons may be excepted from paying National Insurance contributions, and the conditions upon which contributions are credited to persons who are excepted.

From April, 1961, the yearly Exchequer contribution, subject to a minimum of £170 million a year, is equal to one-quarter of the national insurance portion of the contributions paid by employers and employed persons (excluding graduated contributions) and one-third of the national insurance portion of self-employed and non-employed contributions.

BENEFITS

The Acts give the following benefits:

- Unemployment benefit.
- Sickness benefit.
- Maternity benefits, including maternity grant, home confinement grant and maternity allowance.
- Widow's benefits, including widow's allowance, widowed mother's allowance and widow's pension.
- Child's special allowance.
- Guardian's allowance.
- Retirement pension.
- Death grant.

The benefits available to the various classes of insured persons are as follows:

Employed persons....	All benefits.
Self-employed persons.	All benefits <i>except</i> unemployment benefit.
Non-employed persons	All benefits <i>except</i> unemployment and sickness benefits and maternity allowance.

There is one system of adjudication on all claims for benefit under the Acts; with certain exceptions, questions as to the right to benefit are decided by independent statutory authorities, consisting of insurance officers, local tribunals and the Commissioner and Deputy Commissioners.

UNEMPLOYMENT BENEFIT

The standard weekly rates of benefit are as follows:

	s.	d.
Man, single woman or widow over 18...	57	6
Married woman over 18: ordinary rate	39	0
If maintaining an invalid husband, or if separated from her husband and not receiving 18s. 6d. a week or more from him towards her maintenance.....	57	6
Person under 18: ordinary rate.....	32	6
If entitled to an increase of benefit in respect of a child or adult dependant.	57	6

	s.	d.
Increase of benefit for only child or elder or eldest child (where payable)	17	6
Increase of benefit for each additional child (where payable)	9	6
Increase of benefit for adult dependant (where payable)	35	0

Normal Contribution Conditions.—The claimant must have paid 26 Class 1 contributions since July 5, 1948, and, to be entitled to benefit at the standard rate during a benefit year, must have paid or had credited 50 Class 1 contributions during the preceding contribution year.

Waiting Period.—Benefit is not payable for the first three days of a spell of unemployment or sickness unless the claimant has twelve days or more of unemployment or sickness within a period of 13 weeks beginning with the first of these days. Odd days of unemployment or sickness count for benefit only where any two or more of them fall within a period of six consecutive days, excluding Sundays, and such spells of two or more days are treated as "linked up" if not separated by more than 13 weeks.

Duration of Benefit.—A claimant can draw in respect of any period of interruption of employment 180 days of unemployment benefit, together with additional days of benefit, assessed on his record of contributions and benefit.

Requalification for Benefit.—A person who has exhausted his standard benefit, including any additional days, requalifies therefor when he has paid 13 Class 1 contributions.

Disqualifications.—As in the former scheme, there are disqualifications for receiving benefit, e.g. for a period not exceeding six weeks if a person has lost his employment through his misconduct, or has voluntarily left his employment without just cause, or has, without good cause, refused an offer of suitable employment.

Numbers Unemployed.—During the year 1961 the average number of persons registered as unemployed in Great Britain was 340,700. On November 7, 1960, 177,000 persons were receiving unemployment benefit.

SICKNESS BENEFIT

Standard Rates of Benefit.—Same as for unemployment benefit.

Normal Contribution Conditions.—Same as for unemployment benefit, except that Class 2 as well as Class 1 contributions are counted.

Waiting Period.—Same as for unemployment benefit. Days of sickness are "linked up" with days of unemployment falling within the same period of 13 weeks.

Duration of Benefit.—A person who has paid 156 Class 1 or Class 2 contributions receives sickness benefit of unlimited duration. If he has paid less than 156 such contributions, benefit is limited to 312 days (one year); but he will requalify for benefit when he has paid contributions for 13 weeks.

Disqualifications.—Regulations provide for disqualification of a person for receiving sickness benefit for a period not exceeding six weeks if he has become incapable of work through his own misconduct, or if he fails without good cause to attend for or submit himself to prescribed medical or other examination or treatment, or if he acts in a way which would retard his recovery.

Number of Claims.—During 1960, 8,319,000 new claims for sickness benefit were received. The number of claimants incapacitated owing to sickness varied during the year from 804,000 in August to 1,013,000 in February.

MATERNITY BENEFITS

The National Insurance Act, 1953, made changes in the structure of maternity benefits provided by the principal Act.

Maternity Grant.—A cash grant of £14 is payable on the mother's own insurance or on her husband's. Extra grants are payable, in certain circumstances, if more than one child is born. The normal contribution conditions for this grant are (i) that the mother or her husband has paid not less than 26 contributions of any class since his or her entry into insurance, and (ii) that not less than 26 contributions of any class have been paid by or credited to that person during the previous contribution year, or the mother has satisfied the contribution conditions for a maternity allowance at the standard rate or at a reduced rate.

Home Confinement Grant.—An additional grant of £6 is payable to women who are confined at home or elsewhere at their own expense.

Maternity Allowance.—A woman who is gainfully occupied receives in addition a maternity allowance of 57s. 6d. a week normally for 18 weeks beginning eleven weeks before the expected week of confinement, provided that she abstains from work. The rate of allowance is increased where the woman has dependants. The normal contribution conditions for this benefit are (i) that the claimant has paid or had credited 50 Class 1 or 2 contributions during the 52 weeks ending 13 weeks before the expected week of confinement; and (ii) that in the same 52 weeks at least 26 Class 1 or 2 contributions have been paid.

During 1960 maternity grants were paid for about 843,000 births; in addition, the home confinement grant was paid in about 325,000 cases, and about 188,000 women received weekly maternity allowances.

WIDOW'S BENEFITS

This benefit in any of its three forms is payable to the widow of any class of insured person. The normal contribution conditions to be satisfied by the husband are (a) that he had paid not less than 156 contributions of any class since his last entry into insurance (104 if he was married before July 5, 1948, and insured from before September 30, 1946), and (b) that the yearly average of the contributions paid by or credited to him since his insurance started was not less than 50.

Widow's Allowance.—A woman who at her husband's death is under 60, or, if the husband had not qualified for a retirement pension, is over 60, receives (during the first 13 weeks of widowhood) a cash allowance usually of 80s. a week, with an increase of 25s. for the first or only child and 17s. for each other child.

Widowed Mother's Allowance.—When the 13 weeks of widow's allowance have elapsed, a widow who is left with one or more dependent children receives a cash allowance usually of 82s. 6d. a week so long as she has a child of qualifying age, and in addition 17s. a week for each child other than the first. A widowed mother's personal allowance, usually 57s. 6d. a week, is payable to widows who have living with them a child under 18 who has left school and is not an apprentice.

Widow's Pension.—A widow who is under pensionable age or, being over 60 and not yet 65, has not retired from regular employment, receives a widow's pension usually of 57s. 6d. a week (i) when widow's allowance ends, if she was over 50 at the time of her husband's death and had been married for not less than three years; or, (ii) when her widowed mother's allowance comes to an end, if she is then over 50 (40 if widowed before February

4, 1957) and not less than three years have elapsed since marriage.

Widow's benefit of any form ceases upon re-marriage. A 57s. 6d. widow's pension is reduced by sixpence for each shilling of any net earnings in excess of 70s. and a further sixpence for each shilling of net earnings in excess of 90s. A widowed mother's allowance is reduced by sixpence for each shilling of any net earnings in excess of 100s. and a further sixpence for each shilling of net earnings in excess of 120s.; but it must not be reduced in any week by more than 57s. 6d.

If a woman, who was married before July 5, 1943, to a man insured under the old scheme immediately before that date does not qualify for widow's benefit under the new scheme, she may qualify for a widow's basic pension, usually of 10s. a week.

At the end of 1960, about 543,000 widows were receiving widowed mother's allowance, widow's pension or widow's 10s. pension, and about 22,000 widow's allowances were current.

CHILD'S SPECIAL ALLOWANCE

The National Insurance Act, 1957, provides for a special allowance for a woman whose marriage has been dissolved or annulled and who has not re-married, to be payable on the ex-husband's death if the woman has in her family a child to whose maintenance the ex-husband had before his death been contributing at least 5s. a week in cash or its equivalent. The allowance is 25s. a week for the first or only child plus 17s. for each other child in addition to Family Allowances. The contribution conditions for the allowance are substantially the same as for widow's benefit.

GUARDIAN'S ALLOWANCE

Where the parents of a child are dead, and one at least of them was an insured person, any person who has the child in his family receives a guardian's allowance of 32s. 6d. a week while the child is of school age. At the end of 1960 about 5,600 allowances were being paid.

RETIREMENT PENSIONS

A flat-rate retirement pension is payable for life to an insured person who (a) is over pension age (65 for a man and 60 for a woman), (b) has retired from regular employment, and (c) has paid the prescribed number of contributions. Men aged 70 and over and women aged 65 and over are not required to satisfy condition (b).

The standard flat-rate pension is 57s. 6d. a week, plus 35s. for a dependent wife, plus 17s. 6d. for the first or only child and 9s. 6d. for each other child.

Where the insured person postpones retirement beyond minimum pension age, the weekly rate of pension is increased, when he or she finally retires or reaches the age of 70 (65 for women), in respect of contributions paid as an employed or self-employed person during the five years after reaching minimum pension age. After Aug. 2, 1959, the increment to pension is 1s. for every 12 contributions. A retirement pensioner between the ages of 65 and 70 (60 and 65 for women) can choose to be treated as not retired and thus earn pension increments by temporarily forgoing his pension and paying contributions during employment or self-employment.

A man aged 65 to 70 (or a woman aged 60 to 65) who has qualified for pension will have it reduced by sixpence for each shilling of net earnings in excess of 70s. and a further sixpence for each shilling of net earnings in excess of 90s.

The Normal Contribution Conditions are (a) that 156 contributions of any class have been paid (104 if insurance began before September 30, 1946), and (b) that the yearly average of contributions paid or credited is not less than 50.

Special Provisions as to Women.—Subject to certain conditions, a married woman on reaching 60 or a woman on marriage after that age receives by virtue of her husband's insurance a retirement pension of 35s. a week. A widow over the age of 60 when her husband dies will usually qualify for a retirement pension of 57s. 6d. a week from her husband's insurance instead of a widow's pension. A retirement pension payable to a woman by virtue of her husband's insurance is increased by 6d. during his lifetime and 1s. on widowhood for every 12 contributions paid by the husband after Aug. 2, 1959, as an employed or self-employed person while he is over 65 and under 70 and she is over 60, and her pension in widowhood is increased by 6d. for every 12 of these contributions paid by him on or after December 25, 1961, while she is under 60. A widow who qualifies for retirement pension on her own insurance can receive, in addition to any increments she may earn by deferring her own retirement and paying contributions beyond age 60, half of all the 1s. increments which her husband earns by deferring retirement and paying contributions on or after December 25, 1961. The pension of a woman under 65 is reduced by sixpence for each shilling of her net earnings in excess of 70s. and a further sixpence for each shilling of her net earnings in excess of 90s.

Unemployment and sickness benefit is payable to men between 65 and 70 and women between 60 and 65 who have not retired from regular employment at the same rate as the retirement pension they would have been entitled to had they retired from regular employment.

At the end of 1960 retirement pensions, or contributory old age pensions under the old Acts, were being paid to approximately 5,563,000 persons, about 116,000 more than a year earlier.

THE GRADUATED PENSION SCHEME

From April, 1961, when the new graduated pension scheme came into operation under the National Insurance Act, 1959, National Insurance contributions and retirement pensions are graduated, within specified limits, according to earnings. The scheme does not apply to employed persons under 18, or to self-employed or non-employed persons (see p. 1146).

Graduated contributions.—Employed persons over 18 (including men over 65 and under 70, and women over 60 and under 65, who have not retired), unless contracted out as members of occupational pension schemes satisfying certain conditions, pay a weekly flat-rate contribution covering earnings up to £9 a week, plus a graduated contribution on all earnings over £9 and up to £15 a week.

As from July 3, 1961, the flat-rate contribution, which includes the separate National Health Service and Industrial Injuries contributions, is 19s. 2d. for an employed man (of which the employee pays 10s. 7d. and the employer 8s. 7d.) and 16s. for an employed woman (of which the employee pays 8s. 8d. and the employer 7s. 4d.) (see p. 1146).

During the period up to April, 1965, on earnings above £9 and up to £15 a week the graduated contribution will be 8½ per cent. of earnings, divided equally between employer and employee. On earnings above £15 a week the graduated contribution is the same as on earnings of £15 a week, viz., 10s. 2d., divided equally between employer and employee (see p. 1146).

The graduated contribution is the same for men and women. Employed married women, and widows receiving certain benefits, are still able to choose not to pay the flat-rate contribution (other than the 4*d.* Industrial Injuries contribution), but, unless contracted out, they pay their share of the graduated contribution on their earnings between £9 and £15 a week.

² The graduated contributions are in general payable on the gross earnings (including overtime pay, bonus, etc.) received in each week (or month, etc.) taken separately, and not on the cumulative total over the year (see Leaflet N.I. 116, obtainable at Pensions and National Insurance Offices).

Contracted-out employees (whatever their earnings) and their employers pay flat-rate contributions which, in the case of employees aged 18 and over, are higher than those payable by employees who are not contracted out (see p. 1146).

The flat-rate contributions are usually paid by means of a combined weekly stamp. The graduated contributions are collected through the P.A.Y.E. system, in association with income tax (see Leaflet N.I. 116).

The National Insurance Act, 1959, provides for increases in the flat-rate contributions and the graduated contributions in April, 1965, and at five-yearly intervals thereafter up to April, 1980.

The graduated pension.—The graduated addition to the flat-rate retirement pension for each contributor is at the rate of 6*d.* a week for each unit of graduated contributions paid by him or her since the start of the new scheme. A unit of contributions during the period from April, 1961, to April, 1965, will be £7*s.* 10*s.* for men, and £9 for women, of graduated contributions paid by the employee. A widow over age 60 gets a graduated addition to her flat-rate retirement pension equal to half of any graduated addition earned by her late husband, plus any addition earned by her own graduated contributions.

Graduated additions are subject to the usual condition of retirement and initially are subject to the same earnings rules as the flat-rate retirement pension (see p. 1141). Persons who defer retirement will continue to pay graduated contributions until they retire or reach 70 (65 for women) whether retired or not, when they will qualify for graduated additions to pension in respect of graduated contributions they have paid. In addition, half of the graduated additions they have forgone by deferring retirement will be treated as extra graduated contributions paid by them and will count towards further graduated pension (see Leaflet N.I. 112).

Contracting out.—Adult employees who have retirement pension rights in an occupational pension scheme can be contracted out of the graduated part of National Insurance retirement pensions if the following conditions are satisfied:

- (1) the occupational scheme is financially sound;
- (2) it provides the employees contracted out with retirement pension rights at least equal to the maximum graduated pension that could have been earned in the State scheme for a corresponding period of service up to age 65 (women 60);
- (3) pension rights at least up to this amount are preserved should the employee change his job (see Leaflet N.I. 114).

To be contracted out, an employee must be in an employment covered by a Certificate of Non-participation issued to his employer by the Registrar of Non-participating Employments. In general, the application for a certificate must come from the employer. An employer who wishes to

contract out all or particular groups of employees must first give notice to the employees and others concerned (e.g. trustees, insurers, committee of management) and allow a period for consultation, and the Registrar can defer the issue of a certificate to allow time for further consultation. There is a right of appeal to the Adjudicator against a refusal by the Registrar to issue a certificate.

If an application was not made in sufficient time before the new scheme came into force, graduated contributions will be payable from April, 1961, until a certificate is issued and takes effect. It is open to an employer to seek the Registrar's advice as to whether a pension scheme is suitable for contracting out before a formal application is made. A leaflet R 1, which explains the arrangements for contracting out and for modifying schemes for the purpose of satisfying the contracting out conditions can be obtained from the Registrar of Non-participating Employments, Government Buildings, Monk Street, London, S.W.1.

Up to April 1, 1961, about 28,000 certificates of non-participation, covering some 3½ million men and over ½ million women, had been issued.

DEATH GRANT

A death grant is payable on the death of an insured person or of his wife, child or widow or, if the insured person is a woman, of her husband, child or widower. The normal grant (since Feb. 3, 1958) is for an adult £25, a child aged 6–17 £18 15*s.*, a child aged 3–5 £12 10*s.*, a child under 3 £7 10*s.* For the deaths of people who on July 5, 1948, were between 55 and 65 (men) or between 50 and 60 (women) the grant is £12 10*s.*

The normal contribution conditions for death grant are that (a) not less than 26 contributions of any class have been paid by or credited to the deceased or the person by virtue of whose insurance the grant is claimed since July 5, 1948, and (b) either not less than 45 contributions of any class have been paid by or credited to him in the previous contribution year, or the yearly average of the contributions paid or credited since July 5, 1948 (or 16th birthday if later) is not less than 45. No grant is payable for deaths of persons already over pension age on July 5, 1948. For deaths in 1959 about 287,000 grants were awarded.

The grant is paid to the deceased person's executors or administrators, if any; otherwise it is paid to the person who meets the funeral expenses or to the next of kin.

FINANCE

Under the Act of 1946 two funds are set up, viz. the National Insurance Fund, and the National Insurance (Reserve) Fund. The income from contributions, Exchequer grants and interest from both funds are paid into the National Insurance Fund, and payments are made out of the Fund to meet the cost of benefits and administration. Under the National Health Service Contributions Act, 1957, payments hitherto made from the Fund towards the cost of the National Health Service, which were equivalent to 10*d.* out of each total weekly National Insurance contribution for men, 8*d.* for women, and 6*d.* for boys and girls, were discontinued; consequential reductions were made in the rates of National Insurance contributions, and provision was made for separate National Health Service contributions, yielding twice the amount of the payments previously made from the National Insurance Fund to the National Health Service, to be collected in conjunction with the National Insurance contributions. Increases in the rates of National Health Service contributions under the National Health Service Contributions Acts, 1958 and 1961, took effect as from July 7, 1958 and July 3, 1961, respectively. (See p. 1146).

Approximate receipts and payments of the National Insurance Fund for the year ended March 31, 1961, were as follows:—

Receipts		£'000
Balance, April 1, 1960.....		305,504
Contributions from employers and insured persons.....	713,005	
Exchequer contribution.....	170,000	
Income from investments.....	14,896	
Transfer from the Reserve Fund of income from investments, etc.....	38,704	
Other receipts.....	391	
		<u>1,242,500</u>
Payments		£'000
Benefit:—	£'000	£'000
Unemployment benefit..	30,177	
Sickness benefit.....	125,000	
Maternity benefit.....	20,600	
Widow's benefit.....	65,500	
Guardian's allowance....	420	
Child's special allowance	11	
Retirement pension.....	676,949	
Death grant.....	5,806	
		<u>934,463</u>
Administration expenses.....	38,136	
Other payments.....	5,572	
Balance, March 31, 1961.....	264,329	
		<u>1,242,500</u>

The changes in the rates of contributions and benefits and of Exchequer supplement introduced by the National Health Service Contributions Act, 1957, and the National Insurance (No. 2) Act, 1957, continued in effect during 1960-61. Payments exceeded receipts during the year by £41.2 million. Compared with 1959-60, receipts increased by £6.2 million and payments by £14.8 million. Benefit payments showed a net increase of £17.8 million over 1959-60, despite a decrease of £11.7 million in payments of unemployment benefit.

The balance in the Reserve Fund at March 31, 1961, was £1,167.9 million.

The Government Actuary estimated in November, 1960, that the financial provisions of the National Insurance Act, 1960, should, on the Government's assumptions about future trends in unemployment, earnings, etc. produce small surpluses in the period 1961-66 and again from 1976 onwards, but small deficits in the period 1966-76.

INDUSTRIAL INJURIES INSURANCE

The National Insurance (Industrial Injuries) Act, 1946, substituted for the Workmen's Compensation Acts, 1925 to 1945, a system of insurance against personal injury caused by accident arising out of and in the course of a person's employment and against prescribed diseases and injuries due to the nature of a person's employment. The scheme, which insures against personal injury caused and prescribed diseases and injuries developed on or after July 5, 1948, operates under the Act of 1946, as amended by the National Insurance (Industrial Injuries) Acts, 1948 and 1953, the National Insurance Acts, 1951, 1954, 1957 and 1960, the National Insurance (No. 2) Act, 1957, and the Family Allowances and National Insurance Acts, 1952, 1956, 1959 and 1961, and Regulations made by the Minister under those Acts. Lower rates of contributions and higher rates or amounts of benefits took effect, under the National Insurance Act, 1960, in April 1961.

The Workmen's Compensation Acts, including the Workmen's Compensation (Temporary Increases) Act, 1943, (which is now made permanent) continue to apply, subject to certain

amendments, to cases arising before the new scheme started.

The Workmen's Compensation (Supplementation) Scheme, 1951, which came into operation on July 11, 1951, provides for the payment out of the Industrial Injuries Fund of allowances supplementing workmen's compensation where the accident or disease happened before 1924.

The Pneumoconiosis and Byssinosis Benefit Scheme, 1952, provides for payment of benefits out of the Industrial Injuries Fund for those totally disabled by pneumoconiosis or byssinosis, and for dependants of those who died from one of those diseases, after December 31, 1949, if they are not covered by either the Workmen's Compensation Acts or the Industrial Injuries Acts. This Scheme was extended by the Amendment Scheme, 1954, to cases of partial disablement as a result of either disease, and was further amended by the Amendment Schemes, 1957 and 1958.

The Industrial Diseases (Miscellaneous) Benefit Scheme, 1954, provides for payment of benefit out of the Industrial Injuries Fund to or in respect of certain persons who are disabled or die or have died after December 31, 1949, as a result of certain malignant and other diseases due to occupational exposure to carcinogens, in cases where neither workmen's compensation nor benefit under the Industrial Injuries Act is payable.

Under the Workmen's Compensation and Benefit (Supplementation) Act, 1956, as amended by the Family Allowances and National Insurance Act, 1961, a supplementary benefit of 32s. 6d. a week became payable out of the Industrial Injuries Fund to the classes of totally disabled persons mentioned in the 1956 Act who are receiving workmen's compensation.

INSURED PERSONS

The persons covered by the Industrial Injuries scheme correspond closely to the class of "employed persons" under the National Insurance Act, 1946 (excluding members of the Forces), and numbered in 1960 22½ million, of whom rather more than one-third were women.

CONTRIBUTIONS

Contributions are payable by insured persons and their employers, unless exempted, and the Exchequer contributes an amount equal to one-fifth of the combined contributions of insured persons and employers.

The normal weekly rates of contributions payable by insured persons and employers respectively are 7d. and 8d. for men over 18, 4d. and 5d. for women over 18, 4d. and 4d. for boys under 18, and 2d. and 3d. for girls under 18. Normally contributions are paid by means of stamps on a single insurance card, the same stamp also covering the flat-rate National Insurance and the National Health Service contributions.

There are no contribution conditions for the payment of benefits. Persons employed in insurable employment are covered from the time of starting work, but if employed while of school age pay no contributions.

BENEFITS

Injury Benefit is payable for not more than the first 26 weeks of incapacity; no payment is made for the first three days unless there are a further nine days of incapacity within the injury benefit period. Benefit is payable to persons over 18 and to juveniles with dependant's allowances, at the weekly rate of 97s. 6d. (days being paid for at one-sixth of the weekly rate), plus 35s. for one adult dependant, plus 17s. 6d. for the first or only child and 9s. 6d. for each other child. Juveniles not entitled to a child or adult dependant's allowance

receive benefit at half the adult rate if under 17 and at three-quarters the adult rate if 17 and under 18.

Disablement Benefit is payable if at or after the end of the injury benefit period the insured person suffers from loss of physical or mental faculty such that the resulting disablement is assessed at not less than one per cent. (In cases of pneumoconiosis and byssinosis disablement benefit is paid from the start without a period of injury benefit.) The amount of disablement benefit varies according to the degree of disablement (in the form of a percentage) assessed by a medical board or medical appeal tribunal by reference to the claimant's disabilities (incurred as a result of the loss of faculty) as compared with a normal person of the same age and sex. In cases of disablement of less than 20 per cent., benefit normally takes the form of a gratuity paid according to a prescribed scale, but not exceeding £320. Where the degree of disablement is 20 per cent. or more, the benefit is a weekly pension payable either for a limited period or for life according to the following scale:

Degree of disablement	Weekly Rate	
	s.	d.
100 per cent	97	6
50 " "	87	9
£0 " "	78	0
70 " "	68	3
60 " "	58	6
50 " "	48	9
40 " "	39	0
30 " "	29	3
20 " "	19	6

These are basic rates applicable to adults and to juveniles entitled to an increase for a child or adult dependant; other juveniles receive one-half the adult rate if under 17, and three-quarters of the adult rate if 17 and under 18.

Basic rates of pension are not related to the pensioner's loss of earning power, and are payable whether he is in work or not. Upon prescribed conditions, however, pension is supplemented for unemployability and in cases of special hardship. There is provision also for increases of pension during approved hospital treatment or if the pensioner requires constant attendance. An increase of 35s. for an adult dependant and of 17s. 6d. for the first or only child and 9s. 6d. for each other child is also payable where the pensioner is either entitled to an unemployability supplement or receiving approved hospital treatment. Subject to certain exceptions, a pensioner who is not in receipt of unemployability supplement can draw other national insurance benefits in full in addition to disablement pension.

Death Benefit, in the form of a pension, a gratuity or a weekly allowance for a limited period, available for widows and other dependants in fatal cases, depends in amount upon their relationship to the deceased and their circumstances at the time of death and not upon the deceased's earnings. A widow who was living with her husband at the time of his death receives a pension of 80s. a week for the first 13 weeks and thereafter of 64s. or 20s. a week according to circumstances, plus 25s. for the first or only child and 17s. for each other child.

Regulations impose certain obligations on claimants and beneficiaries and on employers, including, in the case of the former, that of submitting to medical examination and treatment and attending courses of vocational training or rehabilitation approved by the Ministry of Labour.

Industrial Diseases, etc.—The Act of 1946 extends insurance to prescribed industrial diseases and prescribed personal injuries not caused by accident, which are due to the nature of an insured person's employment and developed on or after July 5, 1948.

Determination of Questions and Claims.—Provision is made for the determination of certain questions (e.g., as to insurability and liability to contribute) by the Minister, and of "disablement questions" by a medical board (or a single doctor) or medical appeal tribunal or, on appeal on a point of law, by the Industrial Injuries Commissioner, subject to leave. Claims for benefit and certain questions arising in connection with a claim for or award of benefit (e.g., whether the accident arose out of and in the course of the employment) are determined by an insurance officer appointed by the Minister, or a local appeal tribunal consisting of a chairman appointed by the Minister and equal numbers of members representing employers and insured persons, or, on appeal, by the Commissioner.

About three-quarters of a million new awards of injury benefit are made each year. The number of awards of disablement benefit and of special hardship allowance has increased year by year. The number of disablement pensions in payment rose during the year ended October 31, 1960, from 164,400 to 172,800; of those in payment at the end of the period 47,500 were in respect of pneumoconiosis. During the same year the number of special hardship allowances in payment increased from 101,400 to 107,700. The annual number of awards of death benefit slightly exceeds 2,000; at the end of 1960, about 19,500 widows' pensions and 14,300 allowances to dependent children were in payment.

FINANCE

Contributions from employers, insured persons and the Exchequer are paid into, and benefits and administrative expenses are paid out of, a fund established under the Act of 1946, viz., the Industrial Injuries Fund.

Receipts, 1960-61		£'000
Balance, April 1, 1960	237,687
Contributions from employers and insured persons	65,473
Exchequer contribution	13,000
Income from investments	10,956
Other receipts	7
		<u>327,123</u>
Payments, 1960-61		£'000
Benefit:—		
Injury	17,098
Disablement (a)	27,553
Death (a)	3,260
Other benefits (b)	1,133
		<u>49,044</u>
Administration expenses	6,787
Other payments	22
Balance, March 31, 1961	271,270
		<u>327,123</u>

(a) Division estimated. (b) Allowances paid under the Workmen's Compensation (Supplementation) Scheme, 1951, allowances and death benefit paid under the Pneumoconiosis and Byssinosis Benefit Scheme, 1952, as amended by the Pneumoconiosis and Byssinosis Benefit Amendment Scheme, 1954, or under the Industrial Diseases (Miscellaneous) Benefit Scheme, 1954, and allowances paid under the Workmen's Compensation and Benefit (Supplementation) Act, 1956.

As the Industrial Injuries scheme in general applies to cases arising after July 4, 1948, expenditure on benefits will not reach maturity for many years.

NATIONAL ASSISTANCE

The National Assistance Act, 1948, was designed, from July 5, 1948, to substitute for certain existing services provided by the State or by local authorities a unified State service of financial assistance accord-

ing to need. The service is administered by the National Assistance Board, the ultimate responsibility to Parliament resting with the Minister of Pensions and National Insurance.

Application for assistance may be made by any person aged 16 or over who is not in full-time work and is in need, including a person who needs assistance in supplementation of a pension or insurance benefit. The National Assistance Acts, 1948 and 1959, and the National Assistance (Determination of Need) Regulations, 1948, as amended, lay down how the need of an applicant shall be determined, and for this purpose how his requirements and resources shall be computed.

The scale rates for requirements other than rent, prescribed by the amending Regulations which came into operation on September 24, 1962, are as follows:

	Ordinary	Special (a)
	<i>s. d.</i>	<i>s. d.</i>
Husband and wife.....	95 6	120 0 (b)
Single householder.....	57 6	
Other persons:—		
Aged 21 or over.....	51 6	82 0
Aged 18–20.....	40 0	60 0
Aged 16–17.....	34 0	50 0
Aged 11–15.....	25 6	25 6
Aged 5–10.....	21 0	21 0
Aged under 5.....	18 0	18 0

(a) For blind and certain tuberculous persons.

(b) 136s. when both husband and wife are in the special classes.

The amount to be added for rent, if the applicant, or his wife or her husband, is a householder, or if the applicant is living alone, will be the net rent payable, or such a part thereof as is reasonable in the circumstances. If an applicant over the age of 18 is a member of a household but is not himself the householder, the amount to be added for rent will be a reasonable share of the rent payable by the householder, subject to a minimum addition of 2s. 6d. a week and a maximum of 15s. a week.

The rules for the computation of resources contain provisions for the treatment of capital and earnings and certain statutory disregards.

The amount to be paid by way of assistance is settled by the local officer of the Board; an applicant who is dissatisfied with the amount granted has a right of appeal to the local Appeal Tribunal, whose decision is final.

On July 5, 1948, national assistance had to be given to some 800,000 persons who had previously been receiving unemployment assistance (31,000), supplementary pensions (512,000), outdoor relief (200,000), blind domiciliary assistance (40,000), or tuberculosis treatment allowances (20,000). The number of weekly assistance allowances in payment rose from 1,011,000 at the end of 1948 to 1,810,000 in February, 1955. By the end of September, 1955, the number had fallen to 1,595,000, due mainly to the increase in benefit rates under the National Insurance Act, 1954. Subsequently, the number fluctuated, but during 1959 and 1960 there was an increase of 208,000. At the end of 1961 the number was 1,844,000, when the needs of 2,608,000 persons were being provided for wholly or in part. At the end of 1961 about 131,000 recipients were registered at the Employment Exchange; most of the rest were old, sick or otherwise incapable of work. More than two-thirds of the allowances were paid in supplementation of insurance pensions and benefits. During 1961 the Board also made single payments amounting to £5,737,000. In addition, assistance amounting to £3,393,000 was given to

meet charges raised under the National Health Service for prescriptions, spectacles, dentures and dental treatment, and surgical appliances.

The total net expenditure of the Board during 1961 was about £184,766,000, as compared with £187,521,000 in 1960 and £60,760,000 in 1948. Included in the figure for 1961 were payments of national assistance £163,200,000 and payments of non-contributory old age pensions £9,200,000.

NON-CONTRIBUTORY OLD AGE PENSIONS

The maximum non-contributory old age pension payable under the Old Age Pensions Act, 1936, to persons aged 70 and over, and under the Blind Persons Act, 1938, to blind persons aged 40 and over, was increased in October, 1946, from 10s. a week to 26s. a week for single persons of either sex and married men and 16s. a week for married women. Pension was payable at the maximum rate where the yearly means calculated in accordance with the provisions of the Act, did not exceed £26 5s. 0d. Where the yearly means were between £26 5s. 0d. and £89 5s. 0d. pension was payable at rates varying from 24s. (16s. for married women) to 2s. Where the yearly means exceeded £89 5s. 0d., no pension was payable. As from Jan. 27, 1958, when, under the National Insurance (No. 2) Act, 1957, the issue of weekly tobacco tokens to pensioners ceased, non-contributory pensions were increased by an amount equal to the current value of the tokens, i.e., 2s. 4d.

The National Assistance Act, 1948, which charged the National Assistance Board with the administration of non-contributory old age pensions, assimilated the pensions procedure to the national assistance procedure, and the Board has power to supplement old age pensions by national assistance in case of need.

The number of pensions in payment fell from 453,000 at the end of 1948 to 157,000 at the end of 1960, and declined further to 135,000 by the end of 1961. At the latter date, pensions were supplemented by national assistance in 98,000 cases. The award of new non-contributory pensions (other than to blind persons) has now been brought to an end by the provisions of section 74 of the National Insurance Act, 1946, under which sighted persons do not qualify unless they reached the age of 70 before September 30, 1961.

FAMILY ALLOWANCES

The Family Allowances Act, 1945, which was brought into operation from August 6, 1946, provided for a payment by the Minister of National Insurance out of moneys provided by Parliament of an allowance of 8s. a week for each child in a family other than the elder or eldest. From September 2, 1952, under the Family Allowances and National Insurance Act, 1952, the allowance was increased to 8s. From October 2, 1956, under the Family Allowances and National Insurance Act, 1956, the allowance for the third and each younger child was increased to 10s. The allowance is payable (through the Post Office) while a child is of school age or, if handicapped, under 16, and up to the age of eighteen years if he or she is undergoing full-time instruction in a school or is an apprentice. Claim forms for allowances can be obtained at any post office or local Pensions and National Insurance Office. Claims are decided by the National Insurance adjudication authorities.

At the end of January 1960, about 5,589,000 allowances were in payment for over 3½ million families. It is estimated that in 1960 just over £130 million was paid in allowances (excluding administrative expenses), as compared with £63 million in 1951 and £126½ million in 1959.

COMBINED WEEKLY FLAT-RATE CONTRIBUTIONS

From July 3, 1961, the main combined weekly flat-rate contributions for National Insurance, the National Health Service and, in the case of employed persons, Industrial Injuries Insurance, paid by means of stamps on a single insurance card, are as follows:—

	Employees contracted out			Employees not contracted out			Self-employed persons	Non-employed persons
	Employee	Employer	Total	Em- ployee	Em- ployer	Total		
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>
Men 18 and over....	12 2	9 10	22 0	10 7	8 7	19 2	14 2	11 5
Women 18 and over	9 6	7 9	17 3	8 8	7 4	16 0	11 6	8 9
Boys under 18.....	} FLAT-RATE CONTRIBUTIONS {			6 9	5 10	12 7	7 11	6 4
Girls under 18.....				5 7	4 8	10 3	6 9	5 3

Further details of the various contributions including the special rates for certain employed married women, widows and people over pension age are given in Leaflet N.I. 123, available at all local Pensions and National Insurance Offices.

GRADUATED NATIONAL INSURANCE CONTRIBUTIONS (see pp. 1141-1142)

Employed men and women aged 18 or over who are not contracted out of the graduated pension scheme pay in addition to the ordinary flat-rate contribution a graduated contribution (collected in association with P.A.Y.E. income tax). This amounts to approximately 4½ per cent. of that part of their pay between £9 and £15, and ranges from 1d. a week by employees earning £9 os. 1d. to £9 4s. 11d. a week to 5s. 1d. a week by employees earning £15 a week or more. The employer pays the same amount.

Examples of the graduated contributions payable for weekly paid employees are given below:

Total Weekly Pay	Employee	Employer	Total	Total Weekly Pay	Employee	Employer	Total
£9 or less.....	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	£13 to £13 4s. 11d.	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>

£12 to £12 4s. 11d.	2 8	2 8	5 4		5 1	5 1	10 2

Fuller details are given in Leaflet N.I. 111, available at local Pensions and National Insurance Offices.

Legal Notes

ADOPTION OF CHILDREN

In England and Wales the adoption of children is regulated mainly by the Adoption of Children Acts, 1926 to 1949, and the Adoption Act, 1958. An order of court is necessary to legalize the adoption. Adoption puts the child adopted practically on the same footing as a child born to the adopter in lawful wedlock, in all matters of custody, education and maintenance; further, it is provided by the Act of 1958 that an adopted child shall be treated as the child of the adopter (and not the child of its natural parents) for the purpose of the devolution of property on an intestacy occurring, or under any disposition made, after the date of the adoption order. Applications are made to the High Court (Chancery), County Court, or Magistrates Court. Orders will not usually be made for a man to be sole adopter of a girl, and the applicant must be either:—

- (a) Twenty-five years of age or over; or
- (b) Twenty-one years of age or over and a relative (as defined in the Act of 1958) of the infant; or
- (c) the mother or father of the infant.

Two spouses may jointly adopt an infant, but unless one of them is the mother or father of the infant, condition (a) or (b) above must be satisfied in respect of one of the applicants and the other spouse must have attained the age of twenty-one.

The consent of the child's parents or guardian is required before an adoption order will be made, but in certain circumstances (e.g., where the parent or guardian has ill-treated or neglected the child) the Court may dispense with this consent. Since the 1949 Act, marriage between the adopter and the adoptee is prohibited, but marriages of that kind, solemnized before the passing of the Act, are not thereby invalidated.

The 1958 Act places restrictions on societies which make arrangements for the adoption of children.

Scotland.—The Adoption of Children (Scotland) Acts, 1930 to 1949, and the Adoption Act, 1958, cover the law relating to the adoption of children in Scotland, where an Adopted Children Register is maintained. Applications are made to the Court of Session, or the Sheriff Court within whose jurisdiction either the applicant or the child resides at the date of application. The Adoption Act, 1958, which is a consolidating Act, also applies, with modifications, to Scotland, and reference is also made to the Adoption Act, 1960 which amends the law with respect to revocation of adoption orders. Owing to divergence of the laws of England and Scotland there is not, however, complete uniformity in this branch of the law in both countries. Thus, in regard to property rights, an adopted child in Scotland remains a member of the family of his actual parents, and an adoption order does not deprive him of any legal rights competent to him in the estate of his parents, nor are any rights conferred on him as the child of the adopter.

All adoptions in Great Britain are registered in the Registers of Adopted Children kept by the Registrars General in London and Edinburgh respectively. Certificates from these registers, including short certificates which contain no reference to adoptions, can be obtained on conditions similar to those relating to birth certificates. (See below.)

BIRTHS (REGISTRATION)

When a birth takes place, personal information of it must be given to the Registrar of Births and Deaths for the sub-district in which the birth occurred, and the register signed in his presence, by one of the following persons:—

1. The father or mother of the child. If they fail;
2. the occupier of the house in which the birth happened;
3. a person present at the birth; or,
4. the person having charge of the child.

The duty of attending to the registration therefore rests firstly on the parents. The mother is responsible for the registration of the birth of an illegitimate child. The registration is required to be made within 42 days (*Scotland* 21 days) of the birth. Failure to do this, without reasonable cause, involves liability to a penalty of forty shillings (in *Scotland* the penalty is £1). The registration of a birth will be free when it takes place within 42 days (in *Scotland* 21 days). In England or Wales, the Informant, instead of attending before the registrar of the sub-district where the birth occurred, may make a declaration of the particulars required to be registered in the presence of any registrar. The fee payable for this is 3s. 0d. There are special provisions relating to late registration. Under the Public Health Act, 1936, and the Public Health (London) Act, 1936, notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. *This is in addition to the registration already mentioned.*

A "Stillbirth" must be registered and a certificate signed by the doctor or midwife who was present at the birth or has examined the body of the child must be produced to the registrar. The certificate must, where possible, state the cause of death and the estimated duration of the pregnancy.

The re-registration of the birth of a person legitimated by the subsequent marriage of the parents is provided for in the Births and Deaths Registration Act, 1953. In *Scotland* re-registration of a child legitimated *per subsequens matrimonium* or whose birth entry is affected by a Decree of Court respecting status or paternity is provided for by the Registration of Births, etc. (*Scotland*), Amendment Act, 1934.

Birth at Sea: The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

Birth Abroad: Consular Officers are authorized to register births of British subjects occurring abroad. Certificates are procurable in due course at Registrar General's office, London.

The registration of births occurring out of the United Kingdom among members of the armed forces, or occurring on board H.M. ships and aircraft, is provided for by the Registration of Births, Deaths and Marriages (Special Provisions) Act 1957, applicable also to *Scotland*.

CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS

England and Wales.—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 5s. 3d., viz., 1s. 6d. for search, and 3s. 9d. for the certificate. (When application is made by post the charges are 10s.) They can also be obtained from the Superintendent Registrar having the legal custody of the register containing the entry of which a certificate is required. Certificates of marriages can also be

obtained from the incumbent of the church in which the marriage took place (the customary fee being 3s. 9d.); or from the Nonconformist minister (or other "authorized person") where the marriage takes place in a registered building (See *post* under Marriage).

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament, and under Births and Deaths Registration Act, 1953, a modified form of hirth certificate, showing the names, sex and date of hirth and certain other particulars, but not the parentage, may be obtained from the Registrar General, or the appropriate Superintendent Registrar or Registrar, on payment of a fee of 9d. (inclusive of search) and on furnishing certain particulars.

English Registers.—Records of births, deaths and marriages registered in England and Wales since 1837 are kept at the General Register Office, Somerset House. *The Society of Genealogists*, 37 Harrington Gardens, S.W.7, possesses many records of Baptisms, Marriages and Deaths prior to 1837, including copies, in whole or in part, of about 4,000 Parish Registers.

Scottish Registers of Births, Deaths and Marriages.—Certificates of hirths, deaths or marriages registered from 1855 when compulsory registration commenced in Scotland can be obtained personally at the General Registry Office, New Register House, Edinburgh, or from the appropriate local Registrar, on payment of the fee of 5s. 3d., viz.:—1s. 6d. for search and 3s. 9d. for the certificate; postal application since 1 March, 1962—inclusive fee 10s. Certificates are issued at reduced rates for specified purposes as in England & Wales and similar provision exists for abbreviated birth certificates (see 9d).

There are also available at the General Registry Office old parish registers of date prior to 1855, which were formerly kept under the administration of the Established Church of Scotland. An extract of an entry in these registers may be obtained at the fee of 5s. 3d. A fee of 20s. is payable for a general search of all the Scottish registers.

BRITISH NATIONALITY AND CITIZENSHIP OF THE UNITED KINGDOM AND COLONIES

General.—The law as to British Nationality is now to be found mainly in the British Nationality Act, 1948, which came into force on Jan. 1, 1949. The Act introduces a new term, "citizenship." Every person who under the Act is a citizen of the United Kingdom and Colonies, or any citizen (by virtue of legislation in that country) of Canada, Australia, New Zealand, India, Pakistan, Ghana, the Federation of Malaya, Nigeria, Sierra Leone, or Tanganyika (hereafter referred to as "the Dominions") has by virtue of that citizenship the status of a British subject, and may be known either as a British Subject or as a Commonwealth citizen. Under s. 2 of the Newfoundland (Consequential Provisions) Act, 1950, potential citizens of Newfoundland under the British Nationality Act, 1948, are deemed to have been potential citizens of Canada.

Nationality before Jan. 1, 1949, was determined mainly by the British Nationality and Status of Alien Acts, 1914-1943, though these Acts did not affect the status of any person born before Jan. 1, 1915.

Retention of nationality by persons born in or who are citizens of Eire (now by virtue of the Ireland Act, 1949, styled the Republic of Ireland).

By the Ireland Act, 1949, a person who was born before Dec. 6, 1922, in what is now the Republic of Ireland (Eire) and was a British subject immediately before Jan. 1, 1949, is not deemed to have ceased to be a British subject unless either (i) he was domiciled in the Irish Free State on

Dec. 6, 1922, or (ii) was on or after April 10, 1935, and before Jan. 1, 1949, permanently resident there, or (iii) had before Jan. 1, 1949, been registered as a citizen of Eire under the laws of that country.

In addition by the British Nationality Act, 1948, any citizen of Eire who immediately before Jan. 1, 1949, was also a British subject can retain that status by submitting at any time a claim to the Home Secretary on any of the following grounds: (a) he has been in the service of the United Kingdom government; (b) he holds a British passport issued in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory; (c) he has associations by way of descent, residence or otherwise with any such place; or on complying with similar legislation in any of the "Dominions."

Citizenship of the United Kingdom and Colonies.

In the majority of cases, a person who is a British subject becomes also a "citizen," either of one of the "Dominions" by virtue of legislation in that country, or of the United Kingdom and Colonies under the 1948 Act. In the latter case, citizenship is acquired by:—

1. *Birth* on or after Jan. 1, 1949, in the United Kingdom and Colonies (which term does not include the "Dominions"), except

(a) children born to non-citizen fathers enjoying diplomatic immunity from suit or legal process;

(b) children born to fathers who are enemy aliens in enemy occupied territory.

2. *Descent*, if the father was a citizen by birth. If the father was a citizen by descent only, the child acquires citizenship by descent if either:—

(a) the child is or his father was born in a protectorate, protected state, mandated territory or trust territory, or in a foreign country where Her Majesty then had jurisdiction over British subjects; or

(b) the hirth (occurring elsewhere than (a)) is registered at a United Kingdom consulate within one year; or

(c) the father is at the time of hirth in the service of the Crown under Her Majesty's United Kingdom government; or

(d) the child is born in one of the "Dominions" in which a citizenship law has then taken effect and does not become a citizen thereof by birth.

3. *Registration* by the Home Secretary upon application by:—

(a) a citizen of one of the "Dominions" or of the Republic of Ireland who can show that he has been (a) ordinarily resident in the United Kingdom; or (b) in Crown service under Her Majesty's Government in the United Kingdom; or (c) partly the one and partly the other throughout the period of five years ending with the date of his application, or such shorter period so ending as the Home Secretary may in the special circumstances of any particular case accept; or, in certain circumstances, if he is serving under an international organization of which the United Kingdom Government is a member, or is in the employment of a body established in the United Kingdom;

(b) a woman married to a United Kingdom, etc. citizen. If she is a British protected person or an alien she must take an oath of allegiance. (A woman who marries on or after Jan. 1, 1949, does not by virtue of that marriage acquire citizenship.)

A minor child of a citizen can be registered upon application being made by his parent or guardian.

A person in respect of whom a recommendation for deportation or a deportation order is in force under the Commonwealth Immigrants Act, 1962, is not entitled to be registered, although the Home Secretary may register such a person.

4. *Naturalization*.—In order to be eligible for a certificate of naturalization an alien must:—

- (a) during the eight years preceding his application have resided for not less than five years (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) in the United Kingdom or in any colony, protectorate, United Kingdom mandated or trust territory, or have been for five years in the service of the Crown; and
- (b) be of good character and have a sufficient knowledge of the English language; and
- (c) intend to reside in the United Kingdom or any colony, etc., or to enter or continue in the service of the Crown or in the service of certain organizations.

A British protected person who satisfies (b) and (c) above can apply for naturalization if he can show that he has been (a) ordinarily resident in the United Kingdom; or (b) in Crown service under Her Majesty's Government in the United Kingdom; or (c) partly the one and partly the other throughout the period of five years ending with the date of his application, or such shorter period as the Home Secretary may in a particular case accept.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization are supplied with the form of application which may be obtained from H.M. Stationery Office.

5. *Incorporation of Territory* when citizenship is granted to such persons as are specified by Order in Council.

6. *Transitional Provisions*, which confer citizenship on a person who was a British subject immediately before Jan. 1, 1949, if either:—

- (i) (a) he would, if born after that date, have qualified for citizenship by birth; or
- (b) he is a person naturalized in the United Kingdom and Colonies; or
- (c) he became a British subject by reason of annexation of territory which on Jan. 1, 1949, was included in the United Kingdom and Colonies; or
- (ii) at the time of his birth his father was a British subject and possessed any of the above qualifications; or
- (iii) he was born within territory comprised on Jan. 1, 1949, in a protectorate, protected state or United Kingdom trust territory; or
- (iv) he was not on that date a citizen or potential citizen of one of the "Dominions"; or
- (v) being a woman, had before Jan. 1, 1949, been married to a man who becomes, or would but for his death have become, a citizen.

A British subject who is merely a potential citizen of one of the "Dominions" continues as a British subject without citizenship until he becomes a citizen of such "Dominion" or of the Republic of Ireland, or an alien. If none of these has happened at the date when a citizenship law is passed in the country of which he is potentially a citizen, he becomes a citizen by descent of the United Kingdom and Colonies.

A woman who lost British nationality by reason of marriage to an alien regained it on Jan. 1, 1949.

By the Adoption Act, 1958, an adopted child

becomes a citizen of the United Kingdom and Colonies as from the date of the adoption order if the adopter or, in the case of a joint adoption, the male adopter, is a citizen of the United Kingdom and Colonies.

Citizenship of the United Kingdom and Colonies can be lost:—

- (i) by declaration in the prescribed manner by a person who is also a citizen of a "Dominion" or of the Republic of Ireland or a national of a foreign country. The Home Secretary can withhold registration of the declaration in time of war;
- (ii) where the Home Secretary is satisfied that citizenship by registration or naturalization was obtained by fraud, false representation, etc.;
- (iii) by the Home Secretary depriving a naturalized person of citizenship if such person has:—
 - (a) shown himself by act or speech to be disloyal or disaffected towards Her Majesty; or
 - (b) in time of war, traded with the enemy; or
 - (c) within five years after becoming naturalized, been sentenced in any country to a term of twelve months' imprisonment; or
 - (d) continuously resided in foreign countries for seven years, and during that period has neither at any time been in the service of the Crown or of certain international organizations, nor registered annually at a United Kingdom consulate his intention to retain citizenship;

and the Home Secretary is satisfied that it is not conducive to the public good that such person should retain his citizenship;

- (iv) where a naturalized person is deprived of citizenship of a "Dominion" or of the Republic of Ireland, the Home Secretary can also deprive him of citizenship of the United Kingdom and Colonies.
- (v) Under sect. 2 of the British Nationality Act, 1958, which contains special provisions with regard to citizens of Ghana.
- (vi) Under sect. 4 of the Cyprus Act, 1960, which contains special provisions with regard to Cyprus.
- (vii) Under sect. 2 of the Nigeria Independence Act, 1960, which contains special provisions with regard to Nigeria.
- (viii) Under sect. 2 of the Sierra Leone Independence Act, 1961, which contains special provisions with regard to Sierra Leone.
- (ix) Under sect. 2 of the Tanganyika Independence Act, 1961, which contains special provisions with regard to Tanganyika.

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but he may not hold public office, exercise the franchise or own a British ship or aircraft. The Republic of Ireland Act, 1949, declares that the Republic, though not part of H.M. Dominions, is not a foreign country, and any reference in an Act of Parliament to foreigners, aliens, foreign countries, etc., shall be construed accordingly.

CROWN—PROCEEDINGS AGAINST

Before 1947 proceedings against the Crown were generally possible only by a procedure known as a petition of right, which placed the litigant at a considerable disadvantage and which was not normally

available at all in cases of tort (i.e., civil wrongs other than breach of contract). Thus, no proceedings would normally lie against the Government if a subject were injured by the negligent driving of a Government vehicle (although the driver could be sued) or if a Government employee were injured by the defective condition of the Crown premises on which he worked. Now, however, by the Crown Proceedings Act, 1947, which came into operation on Jan. 1, 1948, the Crown, in its public capacity, is largely placed in the same position as a subject, although some procedural disadvantages remain. Among exceptions to the Act are the following: (a) No action lies in tort against the Crown or the individual Crown servant for anything done or omitted to be done in relation to any postal packet or telephone communication, except for loss of a registered in and postal packet (in which case the action must be brought within one year of posting), not being a telegram. (b) The Crown and any member of the armed forces are immune from liability in tort in respect of death of or personal injury to, another member of the armed forces on duty, provided that the death or injury is attributable to service for purposes of pension.

Scotland.—The Act extends to Scotland and has the effect of bringing the practice of the two countries as closely together as the different legal systems will permit. While formerly actions against the Crown, when permissible, were confined to the Court of Session, proceedings may now be brought in the Sheriff Court. The Lord Advocate is the proper defender in proceedings against the Crown.

The Act lays down that arrestment of money in the hands of the Crown or of a Government Department is competent in any case where arrestment in the hands of a subject would have been competent, but an exception is made in respect of Post Office Savings Bank deposits. On the other hand, the former rule that the wages and salaries of the servants of the Crown are not arrestable remains unaltered.

DEATHS, BURIAL AND CREMATION

DEATHS

(For Certificates, see under BIRTHS)

In England and Wales.—When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons:—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the disposal of the body. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar. If the deceased was attended during his last illness by a registered medical practitioner, a certificate of cause of death must be sent by the doctor to the registrar. The doctor must give to the informant of the death a written notice of the signing of the certificate, which must be delivered to the registrar. It is essential that a certificate for disposal should be obtained from the registrar before the funeral and delivered to the clergyman or other person in charge of the churchyard or cemetery. No fee is chargeable for this certificate. If the death is not registered within five days (or fourteen days if written notice of the occurrence

of the death is sent to him) the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods. After twelve months no death can be registered without the Registrar General's consent and on payment of fees amounting to fifteen shillings.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered or received notice of the death, or (2) until the Coroner has made a disposal order (*Births and Deaths Registration Act, 1926, s. 1*).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib. s. 3*).

"Still-born" child. (See under Births (*Registration*), p. 1147.)

Death at Sea.—The master of a British ship must record any death on board and send particulars to the Registrar General of Shipping.

Death Abroad.—Consular Officers are authorized to register deaths of British subjects occurring abroad. Certificates are procurable at the Registrar General's Office, London. If the deceased was of Scottish domicile, particulars are sent to the Registrar General for Scotland.

With regard to the registration of deaths of members of the armed forces, and deaths occurring on H.M. ships and aircraft, see the Registration of Births, etc. Act, 1957.

In Scotland, the rules of registration are similar, but (1) the death must be registered within 8 days, failure to do so involving a penalty of from £1 to £2; (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births, &c. (Scotland) Act, 1854, within 7 days; (3) the informant of a death receives from the Registrar a certificate that the death has been registered. This is given to the undertaker, who delivers it to the keeper of the cemetery. Failure to comply is under penalty in all cases. The Registration of Births, etc., Act, 1957, applies without modification to Scotland.

BURIAL

The duty of burial is incumbent on the deceased person's Executors (if any appointed); it is also a recognized obligation of the husband of a woman, and the parent of a child, also of a householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will or in some memorandum placed with private papers, or may have been communicated verbally to a relative. Consequently steps should immediately be taken to ascertain the deceased's wishes from the above sources. If the wishes are considered objectionable, they are not necessarily enforceable; legal advice should be taken. A person may legally leave directions for the anatomical examination of his body. As to the place of burial—unless closed by Order in Council—the parish churchyard is the normal burying place for parishioners, or any person dying in the Parish, but nowadays this will apply only in villages and the smaller towns. In populous districts cemeteries and crematoria have been established either by the local council, or a private company, and burials will take place there in accordance with the regulations. For an exclusive right to a burial space in the churchyard a faculty is required from the Ecclesiastical Court.

Poor persons may be buried at the public expense by the local authority. As to the necessity for obtaining a registrar's certificate or authority from the Coroner for disposal, *see* above.

CREMATION

Under the Cremation Acts, 1902 and 1952, regulations are made by the Home Secretary dealing fully with the cremation of a body, disposal of ashes, etc., and containing numerous essential safeguards.

If Cremation is desired it is advisable for Instructions to be left in writing to that effect. Cremation may not take place if deceased has prohibited that form of disposal.

To arrange for Cremation the Executor or near relative should instruct the undertaker to that effect and obtain from him the Statutory Forms required as given in the Cremation Regulations issued in 1930 (Statutory Rules and Orders, 1930, No. 1016).

DIVORCE, ETC.

Preliminary.—Matrimonial Suits may be conveniently divided into three classes, viz. (1) those in which a declaration that there has never been a marriage is sought; (2) those in which the duties arising from marriage are sought to be upheld; and (3) those in which the marriage being admitted, it is sought to end the marriage or the duties arising from it.

(1) *Nullity of Marriage.*—Marriage is void *ab initio* if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no sufficient consent on the part of one or both of the parties, if one of the parties was insane, or if one of the parties was under the age of consent, *i.e.*, 16—Marriage Act, 1949. Where the *formalities* of the marriage were defective, the marriage is generally void if *both* parties knew of the defect (*e.g.*, where marriage took place otherwise than in an authorized building). But absence of the consent of parents or guardians (or of the Court or other authority, in lieu thereof) in the case of minors does not invalidate the marriage. Inability to consummate a marriage may also be a ground for a nullity decree; but in this case, the marriage is only voidable and remains valid until the decree is made.

Under the Matrimonial Causes Act, 1950, which does not apply to Scotland, a marriage is also voidable (*i.e.*, a decree of nullity may be obtained) on the following grounds—(a) respondent's wilful refusal to consummate the marriage; (b) that either party at the time of marriage was a mentally disordered person or subject to recurrent attacks of insanity or epilepsy; (c) that at the time of marriage the respondent was suffering from communicable venereal disease; (d) that at the time of the marriage the respondent was pregnant by another man. In cases, (b), (c) and (d), the petitioner must have been ignorant of the grounds at the date of the marriage and must not have agreed to intercourse taking place since discovering the grounds, and proceedings must be instituted within a year of the marriage.

By the Matrimonial Causes Act, 1950, and, as to Scotland, by the Law Reform (Miscellaneous Provisions) Act, 1949, it is provided that a decree of nullity in respect of a voidable marriage shall not operate so as to bastardize any child, who would have been the legitimate child of the parties to the marriage if the marriage had been dissolved instead of annulled. Further, even if a marriage is void, a child of such a union can sometimes be treated as legitimate if at the time of conception or of the marriage (if later) either or both of the parties reasonably believed that the marriage was valid (Legitimacy Act, 1959).

A spouse's insistence upon the use of contraceptives will not constitute wilful refusal to consummate within (a) above, even though there has been no normal intercourse, but it may in certain circumstances enable a petition for *Divorce* to be brought on the grounds of cruelty (as to which see below). Further it has been allowed as a *defence* to a charge of desertion against the aggrieved party.

In one High Court case the judge held that a husband's insistence on the practice of *coitus interruptus* amounted to wilful refusal to consummate the marriage, where there had been no other intercourse. In other High Court cases the judges have disagreed with this view, but held that, in the circumstances of the particular cases, a divorce could be granted on the ground of legal cruelty.

(2) *Restitution of Conjugal Rights.*—This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights is a ground for obtaining judicial separation.

(3) *Judicial Separation and Divorce.*—The third class of suit includes a suit for judicial separation (which does not dissolve a marriage) and a suit for divorce (which, if successful, dissolves the marriage altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the same grounds as those for divorce and also on the ground specified in (2) above.

Divorce.—Complete divorce is now obtainable by either husband or wife upon any one of the following grounds: adultery of respondent since marriage; desertion by respondent for 3 years immediately before petition; cruelty to petitioner; incurable insanity (under certain conditions); and by the wife, also on commission by the husband of certain criminal sexual offences. Matrimonial Causes Act, 1950, s. 1.

The foregoing is subject to a clause prohibiting any petition for divorce (but not for judicial separation) before the lapse of three years from the date of marriage, except in the case of exceptional hardship (upon petitioner) or of exceptional depravity of respondent.

Cruelty, in a legal sense, is conduct of such a character as to have caused injury or a reasonable apprehension of injury to life, limb, or health (bodily or mental). A course of conduct calculated to break the spirit of the sufferer, continued until health breaks down or is likely to break down under the strain, constitutes legal cruelty.

Desertion may be defined as a voluntary withdrawal from cohabitation by one spouse without just cause and against the wishes of the other. Where one spouse is guilty of conduct of a serious nature which forces the other to leave, the party at fault is said to be guilty of constructive desertion.

If, upon disputes arising, the parties agree to live apart, then in general neither can be said to have deserted the other.

When the decree will be refused.—A decree must be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. (There is no such thing in the Divorce Court as judgment against the respondent by default.) Other *absolute* bars to relief are (i) connivance at the adultery of the respondent; (ii) collusion, as where the initiation of the suit is procured by agreement or bargain (but this does not prevent a fresh suit being brought free from collusion); (iii) condonation of the respondent's adultery or cruelty, *i.e.*, complete forgiveness which restores the *status quo* (although the offence may be revived by later misconduct). There are also

certain *discretionary* bars, *e.g.*, where the petitioner has been guilty of adultery; of unreasonable delay; of cruelty; or of wilful neglect or misconduct conducing to the adultery, insanity, or desertion alleged. (1950 Act, s. 4.)

Intervention by Queen's Proctor.—At any time during the progress of a suit, and before the decree *nisi* is made absolute, the Queen's Proctor may intervene.

Decree Absolute.—Every decree of dissolution or nullity is in the first instance a decree *nisi*. The marriage subsists until the decree is made absolute, usually three months after decree *nisi*. After that date either spouse may marry again; but as to marriage within "Prohibited Degrees" see Marriage—Miscellaneous Notes, pp. 1151-2. By the Matrimonial Proceedings (Children) Act, 1958 a decree *nisi* cannot be made absolute until the Court is satisfied that arrangements have been made for the care and upbringing of every child of the family who has not attained the age of sixteen which are satisfactory or the best which can be devised in the circumstances or that it is impracticable for the parties before the Court to make any such arrangements.

Maintenance, etc.—The Court has wide powers to make orders as to maintenance or alimony (usually payable to an innocent wife), and as to costs. The husband can be ordered to pay his wife's costs, even if she is unsuccessful in her suit or defence. A guilty co-respondent may be ordered to pay costs and damages.

By the Matrimonial Causes Act, 1950, the High Court in England may, where the husband has wilfully neglected to provide reasonable maintenance for the wife or children, order the husband to make provision for them, *even though* no matrimonial suit is pending between the parties to the marriage, and while such an order is in force the Court may also deal with custody of and access to the children.

CUSTODY OF CHILDREN

In suits for nullity, divorce or judicial separation, whether the suit succeeds or is dismissed, the Court can make orders as to the custody of and access to the children and as to their upkeep and education, and these orders can be made not only in respect of children of the marriage but also in respect of a child of one party who has been accepted as one of the family by the other party. A guilty spouse will normally be entitled to reasonable access to the children and may even be awarded the custody if the Court thinks fit. The paramount consideration is always the welfare of the child.

A spouse who has been deprived of the custody of a child will not thereby be deprived of his other rights as the child's *guardian* unless the Court expressly so orders.

SEPARATION BY AGREEMENT

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. It is most desirable to consult a solicitor in every such case.

MAGISTRATE'S SEPARATION AND MAINTENANCE ORDERS

When a husband has been guilty of adultery or of certain assaults or has deserted his wife, or has been guilty of persistent cruelty to her or to an infant child of the family, or of wilful neglect to maintain her or such a child, or where he is an habitual drunkard or drug addict, or insists on having intercourse while suffering from a venereal disease, or compels her to submit herself to prostitution, the wife may obtain relief from the local magis-

trates' court. A husband may apply on similar grounds, so far as they are applicable to him. In particular a wife can sometimes be guilty of the offence of wilful neglect to provide reasonable maintenance for her husband or children and an order can be made against her (there is no such remedy in the High Court). The Court may declare that the complainant is no longer bound to cohabit with the defendant. It may order the husband to pay a weekly sum not exceeding £7 10s. to the wife and may order her to make a similar payment to him if his earning capacity is impaired by age or illness. Provision may be made for legal custody of and access to any child of the family who is under the age of 16 years and for payment by either or both of the spouses of up to 50s. weekly to the person entrusted with legal custody in respect of each child of the family up to the age of 16. If the court thinks the child would still be a dependant although over that age, similar payments may be ordered for support of the child up to the age of 21. The court cannot make an order that the parties need no longer cohabit or that either spouse shall support the other where the complainant has committed adultery during the marriage, unless the defendant has condoned or connived at, or by wilful neglect or misconduct conducing to, that act of adultery. The court has wide powers of revocation, revival and variation of orders already made. The order must be revoked if the parties have resumed cohabitation, and must be revoked, except so far as the order relates to the children, if the complainant is subsequently proved to have committed adultery since the marriage and the defendant has not condoned or connived at or by wilful neglect or misconduct conducing to that act of adultery. Complaints based on desertion or failure to maintain can be made whilst the offence continues. Complaints based on adultery must usually be made within 6 months of the complainant discovering it, all other complaints within 6 months of the offence itself. The Magistrates' Courts Act, 1952, separates the hearing of matrimonial disputes from ordinary Court business; specifies the persons allowed to be present; limits newspaper reports, etc. etc.

SCOTLAND DIVORCE

Proceedings are brought in the Court of Session and it is necessary that the husband be domiciled in Scotland, or, he not being domiciled in the United Kingdom or in the Channel Islands or the Isle of Man, that the wife is resident in Scotland and has been ordinarily resident there for a period of three years immediately preceding commencement of proceedings.

The following are the grounds for divorce:—

1. *Adultery.*—A mere confession by the defender is of itself insufficient; there must be proof of the facts. Direct evidence is not required, if facts can be established which give rise to an inevitable inference of adultery. There must be no collusion between the parties, and the pursuer is required to swear to this. It is not collusion, however, for a guilty spouse to give information of an act of adultery already committed. It is a defence to an action of divorce for adultery to plead that the innocent spouse has condoned the misconduct on which the action is founded.

2. *Desertion.*—The defender must have wilfully and without reasonable cause deserted the pursuer and persisted in such desertion for a period of not less than three years. It must be shown that the desertion was without reasonable cause, and that the pursuer has throughout the period been willing to adhere. Refusal by one spouse to have marital relations with the other for any period of three

years without any overt act of desertion does not constitute desertion. Here also, collusion is fatal to the success of the action.

3. *Incurable Insanity*.—The defender must, for five years preceding the raising of the action, have been under care and treatment as an insane person.

4. *Cruelty*.—The degree of cruelty to be established depends on the circumstances of each individual case, but the test, generally speaking, is that the conduct complained of must be such as to endanger the health of the pursuer. Cruelty may take the form of habitual drunkenness on the part of one of the spouses. The fraudulent activity of one spouse involving the other may amount to cruelty.

5. *Unnatural Sexual Offences*.—An extract of the criminal conviction is sufficient proof.

Effect of Divorce on Property.—A husband or wife obtaining decree of divorce against the other, except on the ground of incurable insanity, is entitled to claim his or her legal rights, *ius relictii*, however, being excluded, as if the offender was dead. Where there has been a successful cross-action the effect is the same as though both spouses had died at the date of decree.

Nullity of Marriage.—A declaration of nullity of marriage may be obtained on the ground of any impediment, viz., consanguinity and affinity, subsistence of a previous marriage, non-age of one of the parties, incapacity or insanity of one of the parties, or by the absence of genuine consent.

SEPARATION

A decree of judicial separation may be obtained by one spouse against the other on the grounds of (a) adultery, (b) cruelty. This entitles the parties to live apart, but does not dissolve the marriage. The husband, if the guilty party, is liable for alimony.

CUSTODY OF CHILDREN

In actions for divorce and separation, the Court has a discretion in awarding the custody of the children of the parties. The welfare of the children is the paramount consideration, and the mere fact that a spouse is the guilty party in the action does not of itself deprive him or her of the right to claim custody, though where the considerations of welfare are equally balanced the Court will have regard to the element of guilt.

HIRE-PURCHASE

ENGLAND AND WALES

Protection of the hirer against unscrupulous dealings and against delivery of shoddy goods is given by the Hire-Purchase Act, 1938 (as amended by the Hire-Purchase Act, 1954), which applies to a hire-purchase agreement under which the hire-purchase price *i.e.*, the total sum payable by the hirer to complete the purchase of the goods, does not exceed £1000 for livestock, or £300 in any other case.

Before any agreement is made, the owner of the goods must state in writing to the hirer the cash price at which the goods can be purchased, and there must be a memorandum of the agreement signed by the hirer himself and by or on behalf of the owner and any guarantor. The memorandum must contain (i) the cash price, (ii) the hire-purchase price, (iii) the amount of each instalment, (iv) when each instalment falls due, (v) a list of the goods, and (vi) a notice informing the hirer of his right to terminate the agreement (*below*), and of the restrictions on the owner's right to recover the goods (*below*), and a copy of the memorandum must be sent to the hirer within seven days of the agreement being made. In breach of any of these

conditions the owner can neither recover the goods nor enforce the agreement or any security given, although the Court can dispense with any of these requirements save that as to the signed memorandum. The same result ensues (while default continues) if the owner fails without reasonable cause within four days after written request (with a tender of 1s. for expenses) to supply to the hirer a copy of the agreement and a statement of amounts paid, in arrear, and not yet payable. Before the last instalment becomes due, the hirer may by writing determine the agreement, and, although he will not thereby escape liability for any instalments which have already become due he will be under no further obligation *under the agreement*. Under the Act, however, he must allow the owner to retake the goods and, if one-half of the hire-purchase price exceeds the total of the sums paid and due, he must pay the difference to the owner. These rights of the hirer cannot be taken away from him, but he can enforce more favourable rights (if any) under the agreement.

Any provision in the agreement giving the owner a right to enter any premises for the purpose of seizing the goods is invalidated by the Act. Further, even though the agreement may have been terminated because the hirer has broken it, or because the owner has exercised a right to terminate it, if one-third of the hire-purchase price has been paid or tendered, the owner cannot recover the goods otherwise than by action in a County Court, in which the Court can ensure that the hirer is fairly treated. If the owner disregards this provision, the hirer cannot recover the goods, but can recover all sums paid under the agreement.

SCOTLAND

The Hire Purchase and Small Debt (Scotland) Act, 1932, provides that no contract of hire purchase to which the Act applies is binding on the hirer unless (1) it is signed by him and (2) either a copy is acknowledged by him to have been delivered at the time of his signature or sent to him by registered post within fourteen days thereafter. Any contract which limits any right conferred by the Act on the hirer is void to that extent. The hirer may terminate the contract at any time by (1) re-delivery of the article in a good state of repair, fair wear and tear excepted, and (2) paying any instalment then due together with the amount, if any, by which one-third of the total payments stipulated for in the contract by way of instalment exceeds the *cumulo* amount of the instalments due. Even after the owner has obtained decree of delivery of an article, the hirer is entitled to retain it in his possession or to recover it if, within fourteen days of the decree, he pays the whole instalment which is due, with expenses.

The above Act was extended by the Hire Purchase Act, 1954, to apply to articles exceeding £300 in value. The Credit Sale Agreements (Scotland) Act, 1961 provides for the application in Scotland of the English Act of 1938 in so far as it relates to credit sale agreements.

ILLEGITIMACY AND LEGITIMATION

ENGLAND AND WALES

A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Public Assistance Authority where the child becomes chargeable to the local authority, and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 50s. a week. The evidence of the woman must be *corroborated* in a material particular. The mother has the custody of her bastard children.

Prima facie every child born of a married woman during a marriage is legitimate; and this presumption can only be rebutted by strong, distinct, satisfactory and conclusive evidence.

LEGITIMATION.—By the *Legitimacy Act, 1926*, which came into force on Jan. 1, 1927, where the parents of an illegitimate person marry, or have married, whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate as from Jan. 1, 1927, or from the date of the marriage, whichever last happens. Under the Act of 1959, marriage legitimates a person even though the father or mother was married to a third person at the time when the illegitimate person was born. It is the duty of the parents to supply to the Registrar General information for re-registration of the birth of a legitimated child.

Declarations of Legitimacy.—A person claiming that he, his parent, or any remoter ancestor has become legitimated, may petition the High Court or the County Court for the necessary declaration.

Rights and Duties of Legitimated Persons.—A legitimated person, his spouse or issue may take property under an intestacy occurring after the date of legitimation, or under any disposition (e.g., a will) coming into operation after such date, as if he had been legitimate.

He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

SCOTLAND

Illegitimate Children (Scotland) Act, 1930.—The mother of an illegitimate child may raise an action of affiliation and aliment against the father, either in the Court of Session or, more usually, in the Sheriff Court. Where in any such action the Court finds that the defender is the father of the child, the Court shall, in awarding livery expenses, or aliment, have regard to the means of the parties, and the whole circumstances of the case. The Court may, upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such order as it may think fit regarding the custody of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen years.

By Scots Law an illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the parents at the time of the conception of the child. Such legitimation is recognized by International Law so far as the laws of particular countries allow it and is valid to that extent in England. By the *Legitimacy Act, 1926*, an illegitimate child may, in certain circumstances, succeed on intestacy. By the Registration of Births, Deaths and Marriages (Scotland) Amendment Act, 1934, a child so legitimated, who has already been registered as illegitimate, may, in certain circumstances be re-registered as legitimate. The consent of the father of an illegitimate child to its adoption is not required.

INTESTACY

ENGLAND AND WALES

As regards deaths on or after January 1, 1953, the position is governed by the Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952. The latter Act considerably increased the benefits of a surviving spouse of an intestate, and also extended the provisions of the Inheritance (Family Provision) Act, 1938 (see under "Wills"), to intestacies. These notes deal with the position under the 1952 Act, so that if the death occurred before 1953 reference must be made elsewhere. If the intestate leaves a spouse and issue, the spouse takes (i) the "personal chattels"; (ii) £5,000 with interest at 4 per cent. from death until payment; and (iii) a life interest in half of the rest of the estate. This life interest can be capitalized at the option of the spouse. "Personal chattels" are articles of household use or ornament (including motor-cars), not used for business purposes. The rest of the estate goes to the issue. If the intestate leaves a spouse and no issue, but leaves a parent or brother or sister of the whole blood or issue of such brothers and sisters the spouse takes (i) the "personal chattels"; (ii) £20,000 with interest at 4 per cent. from death until payment, and (iii) half of the rest of the estate absolutely. The other half of the rest of the estate goes to the parents, equally if more than one, or, if none, to the brothers and sisters of the whole blood. If the intestate leaves a spouse, but no issue, no parents, and no brothers or sisters of the whole blood or their issue, the spouse takes the whole estate absolutely. If resident therein at the intestate's death, the surviving spouse may generally require the personal representatives to appropriate the interest of the intestate in the matrimonial home in or towards satisfaction of any absolute interest of the spouse, including the capitalized value of a life interest. In certain cases, leave of Court is required. On a partial intestacy any benefit (other than personal chattels specifically bequeathed) received by the surviving spouse under the will must be brought into account against the statutory legacy of £5,000 or £20,000 as the case may be. If there is no surviving spouse, the estate is distributed among those who survive the intestate in the following order (those entitled under earlier numbers taking to the exclusion of those entitled under later numbers):—(1) issue; (2) father or mother (equally, if both alive); (3) brothers and sisters of the whole blood; (4) brothers and sisters of the half blood; (5) grandparents (equally, if more than one alive); (6) uncles and aunts of the whole blood; (7) uncles and aunts of the half blood; (8) the Crown.

In cases (1), (3), (4), (6) and (7) the persons entitled lose their interests unless they or their issue not only survive the intestate, but also attain twenty-one or marry under that age, their shares going to the other persons (if any) within the same group who do attain twenty-one or marry. Moreover, in the same cases, succession is *not per capita*, but *per stirpes*, i.e., by stocks or families. Thus, if the intestate leaves one child and two grandchildren, being the children of a child of the intestate who pre-deceased the intestate, the two grandchildren represent their deceased parent and take between them one-half of the issue's share, the remaining half going to the surviving child. Similarly, nephews and nieces represent a deceased brother, and so on.

When the deceased died partially intestate (i.e., leaving a will which disposed of only part of his property), the above rules apply to the intestate part.

Children must bring into account (notchpot) any substantial advances received from the intestate during his lifetime before claiming any further

share under the intestacy. Special hotepot provisions apply to partial intestacy.

For further details, see Administration of Estates Act, 1925, as amended by the Intestates' Estates Act, 1952.

The Legitimacy Act, 1926, contains special provisions concerning the intestacy of an illegitimate child or the mother of an illegitimate child.

SCOTLAND

Heritage.—The lines of succession are: (1) descendants; (2) collaterals; (3) ascendants and their collaterals and so on in the ascending scale. Males have preference over females and the rule of primogeniture obtains. Regard is had, however, to the right of representation; thus, if the eldest son of the deceased, being his heir, has predeceased him leaving issue, the issue (whether male or female) are preferred to the younger sons of the deceased. Daughters only succeed if there are neither sons nor (the issue of predeceasing sons, and where there are more than one, they share equally. There being no descendants, brothers, etc., will succeed, those of the full blood excluding those of the half blood. Among collaterals it is noted that the deceased's immediate younger brother is preferred to an elder brother. Failing a younger brother and his issue the estate ascends to the next elder brother and so on. If there are no brothers and sisters, nor the issue of brothers and sisters, the estate goes to the father and failing him to his collaterals; failing these the estate ascends to the paternal grandfather and his collaterals. The succession never ascends to the mother and her relations; even the mother's own estate, after vesting in her son or daughter, never ascends to the maternal line again.

By the Intestate Husband's Estate (Scotland) Acts, 1911, 1919 and 1959, the widow of a man dying intestate and without lawful issue is entitled to the whole estate both heritable and moveable if under £5,000 in value; if over that amount, she takes £5,000 with interest at a per cent. from the date of death, out of the heritable and moveable estate rateably before any division is made, and without prejudice to her rights of tere and *ius relictae* (see *post*, p. 1165). Section 5 of the Law Reform (Miscellaneous Provisions) (Scotland) Act, 1940, gives like rights to a surviving husband. The same section covers the case of partial intestacy.

Moveable.—One-third of the moveable estate goes to the surviving spouse as *ius relicti (relictæ)*; one-third to surviving children as *legitimi* (see *post*, p. 1165); and one-third to surviving children and issue of predeceasing children *per stirpes, i.e.*, the share which would have fallen to a predeceased parent, if alive, is divided equally among the children. Where no children or issue of children survive, half of the estate goes to the surviving spouse and half to the heirs *in mobilibus, i.e.*, nearest heirs including representatives of predeceasing, subject to the spouse's right to £5,000 (*supra*). The lines of succession are the same as in heritable succession, but the right of representation (*supra*) only applies where there are next of kin or the issue of predeceasing next of kin, Intestate Moveable Succession (Scotland) Act, 1855 (amended 1919). Beyond that relationship heirs take *per capita*. Where an intestate leaves no issue and is predeceased by his father, his mother is entitled to the same rights as the father would have had on survivance (1919 Act).

JURY SERVICE

Liability of Jury Service depends upon inclusion in the local Jury Book. This is compiled from the Electors Lists for each year (see *post* under "Voters'

Qualifications"). The names of all persons who are on 10th October qualified and liable to serve as jurors are marked with the letter "J" on the Electors Lists. The marked Electors Lists are published, and anyone whose name is improperly marked may before the following 17th December claim that, although qualified to serve [see below] he is exempt from service [see below]; the marks will be removed from the names of exempted persons. The remaining marked names are thereafter included in the Jury Book. No one whose name actually appears in the Jury Book may claim exemption on any ground whatever except illness or, if a woman, for medical reasons.

QUALIFICATIONS

England and Wales.—Every man and woman between the ages of 21 and 60 years [persons over 60 are exempt but not disqualified] residing in England or Wales being the owner, legally or under a trust, of freehold land worth £10 a year or more, or of leasehold land worth £20 a year or more (if the lease is for at least 21 years) in the county in which they live; or being a householder rated in respect of premises of a net annual value of at least £20 (or in London or Middlesex £30); is qualified and liable to serve on juries in the superior courts (civil and criminal), and at Assizes in their own county, and on petty juries in the local County Court or Quarter Sessions. Also all burgesses of boroughs having separate quarter sessions or a borough civil court are qualified and liable to serve on juries therein. Special regulations govern the qualifications and method of listing common jurors in the City of London; and jurors for a coroner's inquest. By the Juries Act, 1949, a person attending for jury service is entitled to be paid travelling and subsistence allowances together with compensation for loss of earnings and other loss or expenses.

Disqualifications.—Any person who has been attainted of treason or felony, or convicted of any infamous crime (unless he has obtained a free pardon) is disqualified from service on all juries.

Exemptions.—The persons who are exempt from serving on juries (including coroner's juries) include: peers; M.P.'s; judges; ministers of religion (Christian and Jewish); practising lawyers; officers of the Courts; coroners; prison, etc., officers; keepers of public mental hospitals; practising M.R.C.S.'s, M.R.C.P.'s and L.R.C.P.'s; practising apothecaries, doctors and chemists, registered practising dentists, veterinary practitioners; midwives; members of the armed forces; members of the Territorial Army (in certain cases) or the Royal Auxiliary Air Force; members of the Mersey Docks and Harbour Board, and of the Port of London Authority; certain members of Trinity House, Deptford Strand; masters of buoy and light vessels under the Trinity Houses, and all licensed water pilots; household servants of the Crown; officers of the Post Office, customs and excise; sheriff's officers; police officers; special constables; metropolitan magistrates and their court clerks and servants; officers of the Houses of Parliament.

As to their own counties: members of the L.C.C., and commissioners of income tax.

As to their local counties: borough councillors and J.P.'s., town clerks and borough treasurers; burgesses of boroughs having separate Quarter Sessions are exempt from serving on the County Sessions.

As to their own area of jurisdiction: J.P.'s.

Moreover a juror can never be called upon to serve oftener than once in each year; this period of exemption is longer in certain counties.

JURY SERVICE IN SCOTLAND

It is the duty of the Sheriff in each county to make up a list of persons qualified and liable to serve as jurors. The list is compiled from information which every householder is required to provide. From this list the General Jury Book is made up. Part II of the Juries Act, 1949 (amended by the Juries Act, 1954 with Regulations following thereon), applies only to Scotland and provides, *inter alia*, for the payment of travelling expenses and subsistence allowances to jurors, and for compensation for loss of earnings, recently increased.

QUALIFICATIONS

Every man or woman between the ages of 21 and 60 is qualified, who is possessed of heritable property of the yearly value of at least £5, or of moveable property of the value of at least £200 sterling.

Exemptions.—The persons who are exempt from serving on juries include: peers, judges of the supreme courts, sheriffs, magistrates of Royal Burghs, ministers of religion, parochial schoolmasters, practising lawyers, clerks and officers of court, prison officers, university professors, physicians, surgeons and dentists, officers in the Navy or Army on full pay, customs officers, messengers-at-arms and other officers of the law, lighthouse keepers and their assistants, soldiers, members of the Territorial Army and the Auxiliary Air Force (in certain circumstances), Inland Revenue officials and officers of the Post Office.

Jurors failing to attend without good cause are liable to a penalty.

LANDLORD AND TENANT ENGLAND AND WALES

Although basically the relationship between the parties to the lease is governed by the lease itself, the law on this subject is complicated by the mass of legislation thereon, and no attempt is made here to deal in any detail with that legislation. Some of the statutes which govern specific aspects of the topic are set out at the end of this note with brief particulars. The few points dealt with may show the desirability of seeking professional assistance in these matters. Important statutes include:—

(1) As to agricultural holdings—*The Agricultural Holdings Act, 1948*. Among other things, this Act regulates the length of notice necessary to determine an agricultural tenancy, the tenant's right to remove fixtures on the land, his right to compensation for damage done by game, for improvements and for disturbance, and his right to require the consent of the Agricultural Land Tribunal to the operation of a notice to quit.

(2) As to business premises—*The Landlord and Tenant Acts, 1927 and 1954*, which do not extend to Scotland. Part II of the 1954 Act gives security of tenure to the tenant of most business premises, and in effect he can only be ousted on one or more of the seven grounds set out in the Act. In some cases, where the landlord can resume possession, the tenant is entitled to compensation.

(3) As to unfurnished dwelling houses—*the complicated mass of legislation generally known as the Rent Acts*. If a house is within these Acts, the tenant may have a personal right to reside in the house and can only be ousted on certain grounds. Further, each house within the Acts has a rent limit, and the rent recoverable by the landlord is limited to this rent. *The Landlord and Tenant (Furniture and Fittings) Act, 1959*, makes it an offence in connection with a grant, renewal or assignment of a tenancy of a house within the Rent Acts on terms which require the purchase of furniture to offer the furniture (which includes

fittings and other articles) at a price which the vendor knows or ought to know is unreasonably high. It is also an offence under the Act to fail to furnish to a person seeking to obtain or retain such accommodation and who is provided with particulars of the tenancy a written inventory of the furniture, specifying the price sought for each item.

Houses let at a rent which includes board or substantial attendance or furniture are governed by the *Furnished Houses (Rent Control) Act, 1946*, as amended by the *Landlord and Tenant (Rent Control) Act, 1949*, if within the limits of rent control imposed by the *Rent Act, 1957* (see below).

Since the *Rent Act, 1957*, the Rent Acts do not apply to a lease of a dwelling house granted for a term certain exceeding twenty-one years, but Part I of the *Landlord and Tenant Act, 1954*, gives protection in such cases, provided the rateable value does not exceed £100 in London and elsewhere in England and Wales, £75. Under this Act, the contractual tenancy is automatically extended until brought to an end in the manner prescribed by the Act, and in effect the landlord can only get possession on one of the grounds specified in the Act.

The *Rent Act, 1957*, has made considerable inroads into the importance of rent control by removing many houses from control altogether and fixing new maximum rent limits for all houses which remain subject to control. The principal changes effected by this Act are as follows:

1. Any house whose rateable value on November 7, 1956, exceeded £40 in London and elsewhere £30, is automatically decontrolled (and the operation of the *Furnished Houses (Rent Control) Act* is restricted to houses within the same limits of rateable value).

2. No tenancies beginning on or after July 6, 1957, are subject to control unless the person to whom the tenancy is granted is already a protected tenant of that house.

3. For all houses remaining subject to control the maximum rent is determined by reference to the gross value shown in the rating valuation list on November 7, 1956. The maximum rent is then computed as follows:—(a) where the tenant is not responsible for repairs other than internal decorative—twice the 1956 gross value; (b) where the landlord is responsible for all repairs including internal decorative— $\frac{2}{3}$ of the gross value; (c) where the tenant is responsible for all repairs— $\frac{4}{3}$ of the gross value. (There are varying proportions in certain other cases.) In all cases there may be added, (a) rates borne by the landlord; (b) a reasonable charge for services provided by the landlord.

4. A notice to quit any dwelling house must be given at least four weeks before it is to take effect.

(5) Under the *Housing Act, 1961* (which does not extend to Scotland), in a lease of a dwelling-house granted after 24 October, 1961, for a term of less than 7 years, there is implied a covenant by the landlord (a) to keep in repair the structure and exterior of the house and (b) to keep in repair and proper working order the installations in the house (i) for the supply of water, gas and electricity, and for sanitation, and (ii) for space heating or heating water.

SCOTLAND

A Lease is a Contract, the relationship of the parties being governed by the terms thereof. As is also the case in England (see the foregoing Section) legislation has played an important part in regulating that relationship. Thus, what at Common Law was an Agreement binding only the parties to the deed, becomes in virtue of Statute 1449 c. 17, a contract binding the land-

lord's successors, as purchasers or creditors, provided the following four conditions are observed; (1) the lease, if for more than one year, must be in writing, (2) there must be a rent, (3) there must be a term of expiry, and (4) the tenant must have entered into possession.

It would be impracticable in a brief section of these Notes to enter upon a general discussion of this branch of the law and, accordingly, the plan adopted in the preceding Section of quoting a few important Statutes is followed here.

The Agricultural Holdings (Scotland) Act, 1949 (amended by the Agriculture Act, 1958), which is a consolidating act applicable to Scotland, contains provisions similar to those in the English Act, alluded to in the preceding Section. It cannot here be analysed in detail.

It is of interest to note that the Small Landholders Act, 1911, provided for the setting up of the Land Court which has jurisdiction over a large proportion of agricultural and pastoral land in Scotland.

In Scotland business premises are not controlled by Statute to so great an extent as in England, but the Tenancy of Shops (Scotland) Act, 1949, gives a measure of security to tenants of shops. This Act enables the tenant of a shop who is threatened with eviction to apply to the Sheriff for a renewal of the tenancy. If the landlord has offered to sell the subjects to the tenant at an agreed price the application for a renewal of the tenancy may be dismissed. Reference should be made to Section 1 (3) of the Act for particulars of other circumstances under which the Sheriff has a discretion to dismiss an application. The Act applies to premises held by the Crown or Government Departments, either as landlord or tenant.

The series of complicated statutes known as The Rent and Mortgage Interest (Restrictions) Acts, 1920 to 1939, largely govern the relations between landlord and tenant in regard to certain unfurnished houses—including parts thereof if let as separate dwellings—and it is important to note that notwithstanding conditions in the lease of a controlled house providing for the removal of the tenant, it is not possible to contract out of the Acts. The Landlord and Tenant (Furniture and Fittings) Act, 1959 (*ante*, under England and Wales), applies to Scotland. Employees occupying premises by virtue of their employment are not tenants and so cannot claim protection. The Housing (Repairs and Rents) (Scotland) Act, 1954, provides for increase in rent of a controlled dwelling house on which repairs of a certain value have been carried out. The Rent of Furnished Houses Control (Scotland) Act, 1943 contains provisions applicable to houses or parts of houses let with furniture and with or without services, as also to unfurnished premises let with services. These Acts have however been substantially altered or modified by the Rent Act, 1957. The changes in the law are *inter alia* as follows:—(1) Dwelling houses, the rateable value of which was on November 7, 1956, over £40, are released from control. (2) All tenancies coming into operation on or after July 6, 1957, are free from control, except where a new tenancy is granted to a statutory tenant already in occupation. (3) Provision is made for the increase of rent by a maximum of one quarter of all controlled houses. (4) The repairs increase of two-fifths provided for in the 1954 Act is increased to one-half.

The Rent Act, 1957, further provides that a notice to quit a dwelling house (furnished or unfurnished) must be sent at least four weeks before the date on which it is to take effect.

The Landlord and Tenant Act, 1954, referred to in the preceding section, does not apply to Scotland.

LEGAL AID

LEGAL AID IN CIVIL PROCEEDINGS

The Legal Aid and Advice Act, 1949, is designed to make legal aid and advice more readily available for persons of small and moderate means. The main structure of the new service is contained in the Act itself and the Regulations made thereunder but the administrative details are embodied in a scheme made by the Law Society.

Legal aid is available for proceedings (including matrimonial causes) in the House of Lords, Court of Appeal, High Court, County Courts, certain local courts, and civil proceedings in Magistrates Courts. In any event, an application for legal aid will not be approved if it appears that the applicant would gain only a trivial advantage from the proceedings. Further, proceedings wholly or partly in respect of defamation, breach of promise of marriage, seduction, inducement of one spouse to leave or remain apart from the other are excepted from the scheme, as are also relator actions, election petitions and proceedings by way of judgment summons.

Eligibility for legal aid in civil proceedings depends upon an applicant's "disposable income" and "disposable capital." Legal aid cannot be granted if the former exceeds £700 per annum, and a person may be refused assistance if he has a disposable capital of more than £500 and it appears that he can afford to proceed without legal aid. Even so, the applicant may be required to contribute up to one third the excess of his disposable income above £250, together with the whole excess of his disposable capital above £125. Disposable income is calculated by making deductions from gross income in respect of certain matters such as dependants, interest on loans, income tax, rates, rent and other matters for which the applicant must or reasonably may provide. Disposable capital is calculated by excluding from gross capital the value of the house in which the applicant resides, of furniture and household possessions; a deduction of up to £75 may be made in respect of dependants. Except in matrimonial proceedings or cases where the spouses are living apart, any resources of a person's wife or husband are to be treated as that person's resources. These figures will be assessed by the National Assistance Board, and will be certified to a Local Committee, who will determine whether reasonable grounds exist for the grant of a civil aid certificate. Appeal from refusal of a certificate lies to an Area Committee. A person resident in England or Wales desiring legal aid may apply for a certificate to any Local Committee; if resident elsewhere, application should be made to the Local Committee for London. However, if the application is made in respect of proceedings in an *appellate* court and the applicant is resident in England or Wales, application should generally be made to any Area Committee—if resident elsewhere, to the Area Committee for London. If a certificate is granted, the applicant may select his solicitor, and, if necessary, counsel, from a panel. However, in matrimonial causes, where the applicant has disposable capital not exceeding £85, and disposable income not exceeding £130, his case will generally be conducted by a solicitor employed whole time by the Law Society to deal with such cases.

LEGAL ADVICE

Legal advice from a solicitor on the Legal Aid Panel is now available to anyone over the age of sixteen. Persons on National Assistance can get it free of charge, whilst those whose means are within the limits set out below can get it for 2s. 6d. An application form should be obtained from a Citizens'

Advice Bureau, Court Office or from one of the Law Society's Legal Aid Offices, or from a solicitor whose name is on the panel, and, after completing the form, it should be taken to a solicitor on the panel and an interview requested. A person is entitled to advice on any one legal question only from one solicitor; and for not more than one hour and thirty minutes; but application for further advice may be made to the Area Committee. Lists of solicitors concerned may be consulted at the places mentioned above.

Legal advice is available for 2s. 6d. to a person whose capital is £125 or less and whose income has not been more than £7 10s. during the seven days up to and including the day of application for legal advice. Capital and income of husband and wife must be added together for this purpose, unless they are living apart or the applicant seeks advice on a matter in which the spouse has a contrary interest. In working out capital, the value of the applicant's house, its contents and the value of clothing and goods can be ignored. In working out income, a deduction of £2 5s. may be made for a spouse living with or maintained by the applicant, of £1 7s. for each child maintained by the applicant, and of £2 5s. for any other adult person maintained by the applicant. There may also be deducted any income tax and any National Insurance, Industrial Injuries or National Health contributions paid by the applicant during the week immediately before the date of obtaining legal advice.

Quite apart from the above statutory scheme for legal advice, there exists a voluntary scheme under which any person may apply to a solicitor who is on the panel for advice for a fee of £1 for up to thirty minutes. If the matter cannot be disposed of in thirty minutes, the solicitor should give an estimate of the approximate cost of any further advice or steps which may be necessary.

It should be mentioned that under both schemes a solicitor, even though he is on the panel, is entitled to decline to give advice to the applicant without giving any reason to the applicant.

OTHER LEGAL AID

Neither of the advice schemes covers further action such as writing letters. If however a person wants something more than advice but something less than proceedings, he may obtain a certificate to take steps to assert or dispute a claim where the question of proceedings has not yet arisen, but if it did arise legal aid could be granted for those proceedings. This type of legal aid could cover writing letters, obtaining evidence, and negotiating settlements. The certificate limits the amount to be spent under it, and does not cover any step in proceedings, nor can counsel be instructed. It is available to a person whose disposable capital does not exceed £125 and who was either receiving National Assistance at the date of his application or has a disposable income not exceeding £325 per annum. In assessing disposable capital deductions are made in respect of dependants, and further deductions for them are made in assessing disposable income. Where the applicant's disposable income exceeds £253 he must pay a contribution of up to £1 for each £3 above £250.

LEGAL AID IN CRIMINAL CASES

The Poor Prisoners' Defence Act, 1930, provides for free legal aid in criminal proceedings in specified cases, and official lists are kept of solicitors and barristers willing to undertake the defence of poor prisoners. On trial for an indictable offence (i.e. before the higher courts, such as Assizes or Quarter Sessions) the person charged may have free legal aid, if Justices, on committal for trial,

or Judge of trial court grant a *Defence Certificate*. If the person's means are insufficient, such Certificate may be granted in cases where desirable, and must be given for a murder charge. In Magistrates' Courts, a Defence Certificate may be granted to a person of insufficient means if it is considered desirable to do so owing to gravity of charge or exceptional circumstances. The Legal Aid and Advice Act, 1949, provides that application for free legal aid under the Poor Prisoners' Defence Act, 1930, may be made by letter by any person arrested or summoned for an offence, as well as by a person charged with an offence. The letter should be addressed to the clerk to the Justices and must give particulars of the offence charged and set out the grounds of the application. Refusal of a legal aid certificate by a Justice after such application does not prevent the applicant being granted a legal aid certificate at the hearing. Legal aid is also available under the 1930 Act in proceedings on the question of the sentence to be passed, and after as well as before the defendant has pleaded or been found guilty.

Provision is also made for applications for legal aid in the event of an appeal under the Criminal Appeal Act, 1907, and the Summary Jurisdiction (Appeals) Act, 1933.

In any application for aid under the Poor Prisoners' Defence Act, 1930, the Summary Jurisdiction (Appeals) Act, 1933, or the Criminal Appeal Act, 1907, if any doubt exists as to whether the applicant can afford to provide his own legal aid, or whether it is desirable in the interests of justice that he should have free legal aid, such doubt is to be resolved in favour of the applicant. Further, the Justices have an almost absolute discretion in deciding applications.

SCOTLAND

Civil Proceedings

The Legal Aid and Solicitors (Scotland) Acts, 1949 and 1960 provide a scheme which is limited to civil actions in the Court of Session and in the Sheriff Courts except actions in respect of defamation or verbal injury, breach of promise of marriage, the inducement of one spouse to leave or remain apart from the other, election petitions (under the Parliamentary Elections Act, 1868, or the Elections (Scotland) (Corrupt and Illegal Practices) Act, 1890), and small debt proceedings (i.e. under £20) and proceedings for summary removing, in both of which liability for the debt and the amount thereof are admitted.

As to those to whom legal aid is available, the same considerations as to income and capital apply in Scotland as in England. (See the preceding paragraph.) A person believing himself to be eligible may instruct any solicitor of his own choice who is on the official lists, or he may apply for a solicitor to one of the various Legal Aid Committees which are set up to administer the scheme. Application for a certificate granting legal aid is thereafter made to the appropriate Committee by the applicant's solicitor, who is required to prepare, for the signature of the applicant, a memorandum setting forth the grounds of the proposed action. Investigation into the applicant's financial means is carried out by the National Assistance Board after the Committee has considered the memorandum and, on a suitable contribution, if any, by the applicant being approved, a Certificate is granted enabling the applicant to proceed with his action.

LEGAL ADVICE

Since March, 1959, legal advice, as distinct from legal aid in proceedings, is available to anyone in

Scotland on terms similar to those stated in a preceding paragraph dealing with legal advice in England. Application forms are available in the offices of all Legal Aid Committees and Citizens' Advice Bureaux.

Criminal Proceedings

In every sheriffdom there are Solicitors for the poor, and in the Court of Session there are Counsel and Solicitors for the poor, all of whom act gratuitously. No Court dues are payable in the first instance. The means that preclude a person from the benefit of the Poores' Roll are not fixed, and each application depends on its own circumstances.

MARRIAGE

A.—MARRIAGE ACCORDING TO RITES OF THE CHURCH OF ENGLAND

1. **MARRIAGE BY BANS.**—The Marriage Act, 1949, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony during morning service or, if there is no morning service on a Sunday on which the bans are to be published, during evening service. Where the parties reside in different parishes, the bans must be published in both. Under the Act, bans may be published and the marriage solemnized in the parish church, which is the usual place of worship of the persons to be married or either of them, although neither of such persons dwells in such parish; but this publication of bans is in addition to any other publication required by law and does not apply if the church or the residence of either party is in Wales. The Act provides specially for the case where one of the parties resides in Scotland and the other in England, the publication being then in the parish in England in which one party resides, and, according to the law and custom in Scotland, in the place where the other party resides. After the lapse of three months from the last time of publication, the bans become useless, and the parties must either obtain a licence (see below), or submit to the republication of bans.

2. **MARRIAGE BY LICENCE.**—Marriage licences are of two kinds:—

- (i) A *Common Licence*, dispensing with the necessity for bans, granted by the Archbishops and Bishops through their Surrogates, for marriages in any church or chapel duly licensed for marriages. A Common Licence can be obtained in London by application at the Faculty Office (1 The Sanctuary, Westminster, S.W.1) and (for marriages in London) at the Bishop of London's Diocesan Registry (1 The Sanctuary, S.W.1), by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings. [The cost of licences through a clerical Surrogate in the country (see below) is £2 15s.] No previous notice is required and the licence is available as soon as it is issued. Before a licence can be granted one of the parties must make an affidavit that there is no legal impediment to the

intended marriage; and also that one of such parties has had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the parish or ecclesiastical district of the church in which the marriage is to be solemnized, or the church in which the marriage is to be solemnized is the usual place of worship of the parties or one of them. In the country there may generally be found a parochial clergyman (Surrogate) before whom the affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some dioceses it is necessary for the Surrogate to procure the licence from the Bishop's Registry.) The licence continues in force for three months from its date.

- (ii) A *Special Licence* granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, etc.; but the reasons assigned must meet with his Grace's approval. Application must be made to the Faculty Office. Fees for licence, etc., £25.

3. **MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE.**—A marriage may be performed in church on the Superintendent Registrar's Certificate (as to which see below) without bans, provided that the incumbent's consent is obtained. One of the parties must be resident within the ecclesiastical parish of the church in which the marriage is to take place unless the church is the usual place of worship of the parties or one of them.

MARRIAGE FEES.—The Church Commissioners settle tables of fees for all parishes. The usual fees are paid although a stranger-clergyman be invited to perform the service.

B.—MARRIAGE UNDER SUPERINTENDENT REGISTRAR'S CERTIFICATE

The following marriages may be solemnized on the authority of a Superintendent Registrar's Certificate (either with or without a licence):—

- (a) A marriage in a registered building (e.g., a nonconformist church registered for the solemnization of marriages therein).
- (b) A marriage in a register office.
- (c) A marriage according to the usages of the Society of Friends (commonly called Quakers).
- (d) A marriage between two persons professing the Jewish religion according to the usages of the Jews.
- (e) A marriage according to the rites of the Church of England (see above—in this case the marriage can only be without licence).

NOTICE.—Notice of the intended marriage must be given as follows:—

- (i) Marriage by certificate (without licence)—If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party. If the parties reside in different registration districts, notice must be given by each to the Superintendent Registrar of the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before either notice can be given.

- (ii) *Marriage by certificate (with licence)*—One notice only is necessary, whether the parties live in the same or in different registration districts. Either party may give the notice, which must be given to the Superintendent Registrar of any registration district in which one of the parties has resided for the period of fifteen days immediately preceding the giving of notice, but both parties must be resident in England or Wales on the day notice is given.

The notice (in either case) must be in the prescribed form and must contain particulars as to names, marital status, occupation, residence, length of residence, and the building in which the marriage is to take place. The notice must also contain or have added at the foot thereof a solemn declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law (*see below*) has been duly given, and that the residential qualifications (mentioned above) have been complied with. A person making a false declaration renders himself or herself liable to prosecution for perjury. The notice is entered in the marriage notice book.

ISSUE OF CERTIFICATE:

- (i) *Without licence*.—The notice (or an exact copy thereof) is affixed in some conspicuous place in the Superintendent Registrar's office for 21 days next after the notice was entered in the marriage notice book. After the lapse of this period the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three months from the date of the entry of the notice.
- (ii) *With licence*.—The notice in this case is not affixed in the office of the Superintendent Registrar. After the lapse of one whole day (other than a Sunday, Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three months from the date of entry of the notice.

SOLEMNIZATION OF THE MARRIAGE:

- (i) *In a Registered Building*.—The marriage must generally take place at a building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship. Further, if there is not within the district of residence of one of the parties a registered building within which marriages are solemnized according to the rites and ceremonies which the parties desire to adopt in solemnizing their marriage, it may take place in an appropriate registered building in the nearest district.

The presence of a Registrar of Marriages is not necessary at marriages at registered buildings which have adopted the provisions of section 43 of the Marriage Act, 1949. This section provides for the appointment of an "authorized person" (a person, usually the minister or an official of the building, certified by the trustees or governing body as having been duly authorized for the purpose) who must be present and must register the marriage.

The marriage must be solemnized between the hours of 8 a.m. and 6 p.m. with open doors in the presence of two or more witnesses. The parties must at some time during the ceremony make the following declaration—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D." Also each of the parties must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]," or, if the marriage is solemnized in the presence of an authorized person without the presence of a Registrar, each party may say in lieu thereof: "I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

- (ii) *In a Register Office*.—The marriage may be solemnized in the office of the Superintendent Registrar to whom notice of the marriage has been given. The marriage must be solemnized between the hours of 8 a.m. and 6 p.m., with open doors in the presence of the Superintendent Registrar and a Registrar of the registration district of that Superintendent Registrar, and in the presence of two witnesses. The parties must make the following declaration: "I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.," and each party must say to the other: "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." No religious ceremony may take place in the Registry Office, though the parties may, on production of their marriage certificate, go through a subsequent religious ceremony in any church or persuasion of which they are members.
- (iii) *Other Cases*.—If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorized by the Society of Friends to solemnize their marriage in accordance with its usages, they may be married in a Friends' meeting-house. The marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting house is situated. The presence of a Registrar of Marriages is not necessary.

If both parties are Jews they may marry according to their usages in a synagogue, which has a certified marriage secretary, or private dwelling-house at any hour; the building may be situated within or without the district of residence. The marriage must be registered by the secretary of the synagogue of which the man is a member. The presence of a Registrar of Marriages is not necessary.

FEEES OF SUPERINTENDENT REGISTRARS.

For entering notice of a marriage by certificate (with or without licence) in the marriage notice book	s. d.
For a certificate for marriage (with or without licence)	1 6
For a licence for marriage	46 6
For a marriage by certificate (without licence) in the presence of a Registrar	7 6
For a marriage by certificate (with licence) in the presence of a Registrar	15 0

MISCELLANEOUS NOTES

Consanguinity and Affinity.—A marriage between persons within the prohibited degrees of consanguinity or affinity is void. Relaxations have, however, been made by various statutes which have now been replaced by the Marriage Act, 1949 (see the 1st Schedule to the Act) and the Marriage (Enabling) Act, 1960. It is now permitted to contract a marriage with:—

Sister, aunt or niece of a former wife (whether living or not). Former wife of brother, uncle or nephew (whether living or not).

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister.

Minors.—Persons under 21 years of age are generally required to obtain the consent of certain persons (see Marriage Act, 1949, section 3 and 2nd Schedule). Where both parents are living, both must consent; where one is dead, the survivor, or, if there is a guardian appointed by the deceased parent, the guardian and the survivor. No consent is required in the case of an infant's second marriage. In certain exceptional cases consent may be dispensed with, *e.g.*, the insanity of a parent. If consent is refused the Court may, on application being made, consent to the marriage; application can be made for this purpose to the High Court, the County Court, or a Court of Summary Jurisdiction. The Act *prohibits* any marriage where either party is under 16 years of age.

C.—MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR NORTHERN IRELAND

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should either apply to the session clerk to publish banns or give notice of marriage to the registrar; as regards Northern Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by Certificate with licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES IN SCOTLAND

According to the law of Scotland, marriage is a contract which is completed by the mutual consent of parties.

Impediments to marriage: These render the marriage null and void. (a) Age: If either party is under the age of 16. (b) Forbidden Degrees: If the parties are within certain degrees of relationship. (c) Subsisting previous marriage. (d) Impotency of either party. (e) Non-residence, *i.e.*, if the legal requirement of prior residence of one or other of the parties in Scotland have not been complied with. (f) Insanity of either party.

No consent of parents or guardians is necessary. Marriages may be regular or "irregular."

Regular Marriages.

A regular marriage is one which is celebrated by a Minister of religion or authorized Registrar after due notice by the proclamation of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating

at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must either have his or her usual residence in the Registration District, or have resided there for at least 15 days before the ceremony or have a parent so residing there. No form, place or hours are prescribed by law. There are no canonical hours as in England. Public proclamation is made by (a) banns or (b) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. It is ordered that the proclamation of banns should be made twice, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 3s. A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act, 1878, amended by the Marriage (Scotland) Act, 1956, a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns, but a minister of the Church of Scotland is not bound, although he is entitled, to celebrate a marriage not preceded by banns. The statute is limited to persons with qualifying residence in Scotland or having parents so residing. Exhibition is made for 7 consecutive days, during which time any person may appear personally and lodge an objection in writing subscribed by him. If no objections are lodged the Registrar issues a certificate: fees, 3s. Such certificate of publication is only valid for three months. The Naval Marriages Act, 1908, regulates the publication of banns or of notice on board H.M. ships and the granting of certificates by the Officer-Commanding.

Marriage before Registrar: After obtaining a certificate of due publication as above, it is competent for the parties to contract the marriage in the office of the authorized Registrar in his presence and in the presence of two witnesses. Such a marriage is regular and valid in all respects.

Marriage by Licence: In unforeseen and exceptional circumstances—see Section 2 of the Marriage (Scotland) Act, 1939—where normal methods of publication cannot be carried through, the Sheriff, on application by the parties may grant a licence which is deemed in all respects to be equivalent to a certificate of publication.

Irregular Marriages.

Since the passing of the Marriage (Scotland) Act, 1939, only one form of irregular marriage is recognized, *viz.* marriage by co-habitation and habit and repute. If parties live together constantly as husband and wife, and if they are held to be such by the general repute of the neighbourhood, then there may arise a presumption from which marriage can be inferred. Before such marriage can be registered, however, a decree of declarator of marriage must be obtained from the Court of Session.

MASTER AND SERVANT

WAGES AND HOLIDAYS

Under the Truck Acts, it is in general forbidden for an employer to pay wages other than in current coin of the realm, and it is illegal for an employer to deduct from the employee's wages sums alleged to be due to the employer. However, the application of these Acts is confined to workmen, and domestic servants are specifically excluded from their operation. Even in the case of payments to

workmen, certain deductions, including rent and the price of food to be consumed on the employers' premises, are not forbidden where the employee's written consent is obtained. Further, under the Payment of Wages Act, 1960, it is permissible for wages to be paid otherwise than in cash at the request of the employee, e.g., by money order, postal order or into a banking account. The Truck Acts did not relate to the amount of wage to be paid to the employee, but to-day minimum wage rates for particular trades are prescribed by numerous statutes. The Wages Councils Act, 1945, established Wages Councils, which are given power to fix minimum wages in respect of a number of trades and industries. The Councils may also direct as to the length of holidays for workers in such trades and industries, and for payment of wages during holidays, under the Holidays with Pay Act, 1938. Subject to this Act, a servant's right to a holiday is a matter of contract. The terms of the contract may be express or implied; but if there is a right to a holiday once in a year and the servant is rightfully dismissed before the end of that year, he cannot successfully claim pay in respect of the loss of the holiday.

RECEIPTS

Receipts should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, etc., received.

In Scotland, as in England, inability to produce receipts does not necessarily bar defence to an action for payment.

TOWN AND COUNTRY PLANNING

The Town and Country Planning Act, 1947, contains very far-reaching provisions affecting the liberty of an owner of land to develop and use it as he will. A person has generally to get planning permission before carrying out any development on his land from the Local Planning Authority. Development charge is not payable in respect of operations begun or uses of land instituted on or after the 18th November, 1952.

What is Development:—

(a) Carrying out of building, engineering, mining or other operations.

(b) Making a material change in use.

It is expressly provided that if one dwelling-house is converted into two or more dwelling-houses, this involves a material change in use.

Examples of what is not Deemed Development:—

(a) Maintaining, improving or altering the interior of a building (except works for making good war damage), provided there is no material change to the exterior.

(b) Change of use of property within the curtilage of a dwelling-house for a purpose incidental to the use of the dwelling-house as such. (It will, however, be development if building operations are carried out.)

Application can be made to the Local Planning Authority to determine whether or not an operation or change of use constitutes development.

Planning Permission.—Application for such permission is not always necessary, as the Minister may make Development Orders giving general permission for a specified type of development. Thus a General Development Order of 1950 specified a number of types of development for which no permission is required e.g., enlargement of a dwelling-house (including erection of a garage), so long as the cubic content of the original dwelling (external measurement) is not exceeded by more than 1,750 cubic feet or one-tenth whichever is

greater, subject to a maximum of 4,000 cubic feet.

Appeal against refusal or permission lies to the Minister, and from the Minister, in limited circumstances, to the High Court. If the result of the appeal is unsatisfactory, an applicant may in certain circumstances require the Council to purchase the land.

Enforcement Notice.—If development is carried out without permission, or in defiance of conditions attached to such permission, the Local Planning Authority may serve an enforcement notice on the owner of the land calling upon him to demolish or alter any building, or to discontinue the use of land, or to comply with the said conditions. If the notice is not complied with, the Local Planning Authority may take appropriate steps to enforce it, recovering their expenses from the owner for the time being of the land. Appeal against an enforcement order lies to the Minister.

For further details and other provisions of the planning law, the Act of 1947 and the Orders made under the Act, the Town and Country Planning (Amendment) Act, 1951, and the Town and Country Planning Acts, 1953, 1954 and 1959, and the Caravan Sites and Control of Development Act, 1960 (applicable to Scotland), should be consulted. Elaborate provisions as to payments for loss of development value by reference to established claims on the £300 million fund (established under the 1947 Act) are contained in the 1954 Act.

Scotland.

In Scotland special provisions, on similar lines, have been made by the Town and Country Planning (Scotland) Act, 1947, which incorporates certain provisions of the Town and Country Planning (Scotland) Act, 1945, all other earlier planning Acts being repealed. The financial provisions of the 1947 Act, have, however, been amended by the Town and Country Planning Act, 1953, which abolished development charges, and by the Town and Country Planning (Scotland) Act, 1954, which set up a new Scheme of compensation. See also the Town and Country Planning (Scotland) Act, 1959.

VOTERS' QUALIFICATIONS

The franchise is governed by the Representation of the People Acts, the latest of which, the Acts of 1948 and 1949, amended in some respects, have made important changes in the law. Those entitled to vote as electors at a parliamentary election in any constituency are those resident there on the qualifying date who, at that date and on the date of the poll, are British subjects of at least twenty-one years of age and not subject to any legal incapacity to vote; but registration as an elector in the register to be used at the election in question in that constituency is a prerequisite, and at a general election no person may vote in more than one constituency. Since the Electoral Registrars Act of 1949, the registers are prepared once in each year only. Under the Electoral Registers Act, 1953, the Register of parliamentary and local government electors or, in Northern Ireland, of parliamentary electors is published not later than February 15 in each year and is for use in the period of 12 months commencing on February 16. The qualifying date referred to is, in England, Wales and Scotland the preceding October 10, and in Northern Ireland the preceding September 15. It is, however, provided that any person who is not of full age on the relevant qualifying date, but is of full age on June 15, and is otherwise duly qualified, is entitled to vote at elections held in Great Britain between October 2 of that year and February 15 of the following year. Detailed provisions are laid down as to the meaning of "residence" in doubtful cases.

The Act of 1948 abolished the university constituencies and the business premises vote.

The Register is prepared by the Registration Officer in each constituency in Great Britain. It is the registration officer's duty to have a house to house or other official inquiry made as to the persons entitled to be registered and to publish preliminary electors lists showing the persons appearing to him to be entitled to be registered. Any person whose name is omitted may claim registration, and any person on the list may object to the inclusion therein of other persons' names; the registration officer determines the claims and objections. The procedure is slightly different for Northern Ireland.

Special provision is made for "Service voters," who include wives of Service voters resident with their husbands outside the United Kingdom. Such persons may make a Service declaration in a prescribed form and are then treated as resident at the address specified in the declaration. Service voters may vote by post or by proxy, on making the necessary application to the registration officer.

Certain other persons (e.g., those unable to go in person to the polling station owing to the general nature of their occupation, blindness or other physical incapacity, etc.) may vote by post or, in some cases, by proxy as "absent voters."

The local government franchise now depends upon either residence in the area or the possession of a non-resident qualification, i.e., occupation as owner or tenant of rateable lands or premises of the yearly value of not less than £10, excluding occupation of furnished dwelling-houses let for less than nine weeks and excluding occupation as a lodger. There are provisions, similar to those relating to the parliamentary franchise, for the preparation of registers, etc., and in fact the same register is used, as far as possible, with a mark indicating those persons entitled to vote for local government purposes only.

The Acts apply generally to Scotland where certain matters relating to local government and parliamentary elections are further regulated by Representation of the People (Scotland) Regulations, 1949.

WILLS

IMPORTANT NOTE.—*The following notes must be read subject to the provisions of the Inheritance (Family Provision) Act, 1938, which is liable to affect or modify the will of any person (domiciled in England) dying after July 13, 1939.* This Act empowers the High Court to order maintenance out of the testator's estate for the benefit of certain "dependants," i.e., a surviving wife or husband; an unmarried (or invalid) daughter; an infant (or invalid) son. Such order can be made if the will does not itself make "reasonable provision" for the maintenance of the dependant who seeks the order. An application must normally be made within six months of probate. A legally adopted child comes within the definition of a "son" or "daughter" under the Act. For further details as to the limits of an order, the Act itself should be consulted.

Since the object of the Act is to provide maintenance for dependants, an application is not likely to be successful where the estate is very small, e.g., two or three hundred pounds.

There are similar provisions under the Matrimonial Causes (Property and Maintenance Act), 1958, whereby the court may order provision out of a deceased's estate for the support of a former husband or wife where the marriage has been dissolved or annulled.

REASONS FOR MAKING A WILL.—Every person should make a will. However small the estate, it is safer in every case to protect the interests of the survivors by a will, and by the appointment of one or more trustworthy persons as executors to carry the testator's wishes into effect. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—e.g., the income being paid to his widow and the capital being ultimately divided among his children, for this requires the skill of a practised lawyer. When property is thus "settled," there may be a saving in death duties. Assuming a lawyer is not employed, a person having resolved to make a will must remember that it is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake he made, it is better to rewrite the whole. Before a will is executed (see below) an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is best to make a new will, revoking the old one. The use of *codicils* should be left to the lawyer. *A will should be written in ink and very legibly, on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following forms may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others.

Nothing more complicated should be attempted. The forms should be studied in conjunction with the notes following.

This is the last will and testament of me [Thomas Smith] of [Vine Cottage, Silver Street, Reading, Berks] which I make this [thirteenth] day of [February, 1963] and whereby I revoke all previous wills and testamentary dispositions.

1. I hereby appoint [John Green of — and Richard Brown of —] to be the executor(s) of this my will.

2. I give all my property real and personal to [my wife Mary or my sons Raymond and David equally or as the case may be].

Signed by the testator in the presence of us both present at the same time who, at his request, in his presence and in the presence of each other have hereunto set our names as witnesses.

Thomas Smith
Signature of
Testator;

William Jones (signed) of Green Gables, South Street, Reading, tailor.

Henry Morgan (signed) of 16, North Street, Reading, butcher.

Should it be desired to give legacies and or gifts of specific property, instead of giving the whole estate to one or more persons, the form above should be used with the substitution for clause 2 of the following clauses:—

2. I give to — of — the sum of £ — and to — of — the sum of £ — and to — of — all my books (or as the case may require).

3. All the residue of my property real and personal I give to — of —.

TERMS.—Real property includes freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like. The words "my money," apart from the context, will normally only include actual ready money. The expression "goods and chattels" should not be used. In giving *particular* property, ordinary language is sufficient, e.g., "my house, Vine Cottage, Silver Street, Reading, Berks." Such specific gifts fail if not owned by the testator at his death.

RESIDUARY LEGATEES.—It is well in all cases where legacies or specific gifts are made, to leave to some person or persons "the residue of my property," although it may be thought that the whole of the property has been disposed of in legacies, etc., already mentioned in the will. *It should be remembered that a will operates on property acquired after it has been made.*

EXECUTION OF A WILL, AND WITNESSES.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately afterwards sign their names in his and in each other's presence. A person who has been left any gift or share of residue in the will, or whose wife or husband has been left such a gift, should not be an attesting witness. Their attestation would be good, but they would forfeit the gift. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same."

A blind person may make a will in Braille. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. A blind person cannot witness a will.

If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," etc. Any omission in the observance of these details may invalidate the will. *The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.*

EXECUTORS.—It is usual to appoint two executors, although one is sufficient; any number up to and including four may be appointed. The name and address of each executor should be given in full. An executor may be a legatee. Thus a child of full age or wife to whom the whole or a portion of the estate is left may be appointed sole

executor, or one of two executors. The addresses of the executors are not essential; but it is desirable here as elsewhere, to avoid ambiguity or vagueness.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy generally lapses and falls into the residue. Where a residuary legatee pre-deceases the testator, his share of the residuary estate will not generally pass to the other residuary legatees, but will pass to the persons entitled on the deceased's intestacy. In all such cases it is desirable to make a new will.

TESTAMENTARY CAPACITY.—A minor cannot make a will except, in certain circumstances, if he be a soldier, sailor or airman. A married woman (married on or since January 1, 1883) may dispose by will of any real or personal property as if she were a man.

REVOCAION.—A will is revoked by a subsequent will (but, if it does not expressly revoke former wills, only so far as such subsequent will operates as an implied revocation as by making other provisions inconsistent with the previous will, for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing or otherwise *destroying* the same with the intention of revoking it. Such destruction must either be by the testator or by some other person in his presence and at his direction. *It is not sufficient to obliterate the will with a pen.* Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1926, it is expressed to have been made in contemplation of a particular marriage (Law of Property Act, 1925, s. 177); so that after marriage a new will should be made, except in this last case.

PERSONAL APPLICATION FOR PROBATE OR LETTERS OF ADMINISTRATION

Application for probate or for letters of administration may be made in person at the Principal Probate Registry, or at a district registry, by the executors or persons entitled to a grant of administration. Applicants should bring (1) the will, if any; (2) a certificate of death; (3) particulars of property liable to estate duty; and (4) generally, a list of debts and funeral expenses. In an application for administration, the applicant will be required to enter into a bond for due administration, generally with two sureties who must attend at the Registry, although they need not do so at the same time as the applicant.

WHERE TO FIND A PROVED WILL

A will proved since 1858 must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will read on payment of a search fee of one shilling. In the latter case, the original will proved in the District Registry, is there kept, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probates and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year.

SCOTS LAW OF WILLS

A domiciled Scotsman, unlike a domiciled Englishman, cannot in certain circumstances dispose of the entirety of his estate. If he leave a widow and children, the widow is entitled to a one-third share in the whole of the moveable estate (her *jus relictae*), and the children are entitled to another one-third share equally between them (their *legitim*). If he leave a widow but no children—or children but no widow—the *jus relictae* or *legitim* is increased to a one-half share in the estate. The remaining portion is known as the *dead's part*. The widow is also entitled to *terce*, i.e., a life rent in one-third of her husband's heritable property. A surviving husband and children have comparable rights in the wife's estate. The *dead's part* is the only portion of which the testator can freely dispose. All herdens falling upon the representatives in moveables are payable out of the whole of the moveables before any division. Burdens in the nature of legacies are payable out of the *dead's part*. Pupils cannot make wills. Minors may dispose of moveables without the consent of any other person; but minors (unless they be serving in H.M. forces) cannot dispose of heritage. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 100 Scots (£8 6s. 8d. sterling) and may be typewritten or even in pencil. A will may be either (1) *holograph*, i.e., written by the testator himself, in which case no witnesses are necessary; a printed form filled up by the testator is not necessarily *holograph* but may be made effectual when it has clearly been adopted as *holograph*. Words written on erasure or marginal additions or interlineations in *holograph* writings, if proved to be in the handwriting of the maker of the deed, are valid; (2) *tested*, i.e., signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one

another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, or is blind, his will may be authenticated by a notary and two witnesses. It is better that the will be not witnessed by a beneficiary thereunder, although this circumstance will not invalidate the attestation of the will or (as it would in England) the gift. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh. The original deed may be inspected on payment of a small fee and a certified official copy may be obtained. A Scottish will is not revoked by the subsequent marriage of the testator. The subsequent birth of a child, no testamentary provision having been made for him, may revoke a will in whole or in part. A will is revoked by a subsequent will, either expressly or by implication; but in so far as the two can be read together both wills have effect.

"Confirmation," the Scottish equivalent of Probate, is obtained in the Sheriff Court of County in which the deceased was domiciled at the date of his death or, where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must first be given up. In estates under £500 confirmation is obtained under a simplified procedure at reduced fees.

THE ROYAL SOCIETY

The Royal Society received a charter from Charles II. on April 22, 1662, when it was incorporated as a body politic and corporate under the appellation of The President, Council and Fellowship of the Royal Society of London, for improving Natural Knowledge.

Presidents of the Royal Society

PROFESSIONAL FEES

SOLICITORS' FEES

Solicitors and their clients may (subject to certain rules designed to prevent undercutting) make special agreements as to remuneration in non-contentious business (including conveyancing) under Section 57 of the Solicitors Act, 1957. In the absence of any such agreement the solicitor's remuneration is governed by Orders made under Section 56 of that Act. There are two methods of charging under the Orders. One is by a scale based upon the amount of money involved; the other is by a charge (usually known as a Schedule II charge) determined by reference to all the circumstances of the case, the amount of money involved being only one factor amongst many. Usually a scale charge is payable in conveyancing matters, provided the transaction has not been abortive, but a solicitor has an option to elect, before undertaking any business, to be paid a Schedule II charge instead. For negotiating sales or purchases the charges are always under Schedule II. *In addition to solicitors' charges, disbursements such as Government stamp duty, search fees and Land Registry fees may be payable.*

The Solicitors' Remuneration Order (1959) and The Solicitors' Remuneration (Registered Land) Order, 1959, increased the scales of permitted charges in the case of certain conveyancing transactions where the consideration does not exceed £1,000.

In sales by auction further charges may be payable, which will be computed under Schedule II below, e.g. for preparing or perusing Particulars of Sale and poster and attending the sale.

The following sections illustrate the scales of charges on sales, purchases and mortgages based upon the amount of money involved:—

I. For Unregistered Land

(Land, including houses, having a title which is not registered at the Land Registry).

For the following, charges are the same:—

Vendor's solicitor for deducing title to freehold or leasehold property, and perusing and completing conveyance (including preparation of contract or conditions of sale, if any);

Purchaser's solicitor for investigating title to freehold or leasehold property, and preparing and completing conveyance (including perusal and completion of contract, if any);

Mortgagor's solicitor for deducing title to freehold or leasehold property, perusing mortgage and completing;

Mortgagee's solicitor for investigating title to freehold or leasehold property, and preparing and completing mortgage.;

Value of Land or Amount of Charge	Scale of Remuneration
Under £100.....	£9 9s.
£100 or over, but not exceeding £150.....	£10 10s.
Over £150 but not exceeding £200.....	£11 11s.
Over £200 but not exceeding £300.....	£12 12s.
Over £300 but not exceeding £350.....	£12 15s.
For each additional £50 thereafter up to £1,000.....	15s. per £50
For the second and third £1,000.....	£1 10s. per £100
For the fourth and each subsequent £1,000 up to £10,000.....	15s. per £100
For the remainder without limit.....	10s. per £100

Vendor's solicitor for conducting a sale of property by public auction, including the conditions of sale:—

When the property is sold:—For the first £1,000, 30s. per £100; for the second and third £1,000, 15s. per £100; for the fourth and each subsequent £1,000 up to £10,000, 7s. 6d. per £100; for the remainder without limit, 3s. 9d. per £100. When the property is not sold, half the scale rates are charged on the reserved price.

NOTE:—A minimum charge of £7 10s. is to be made whether a sale is effected or not.

Mortgagor's solicitor for negotiating loan:—For the first, second and third £1,000, 16s. 10½d. per £100; for the fourth and each subsequent £1,000 up to £10,000, 5s. 7½d. per £100; for the remainder without limit 3s. 9d. per £100. These charges apply equally to land having a registered title.

Mortgagee's solicitor for negotiating loan:— For the first, second and third £1,000, 33s. 9d. per £100; for the fourth and each subsequent £1,000 up to £10,000, 11s. 3d. per £100; for the remainder without limit, 7s. 6d. per £100. These charges apply equally to land having a registered title.

Title registered after completion.—Where the title is registered under the Land Registration Act, 1925, after completion, charges under Schedule II are payable in addition in respect of the first registration.

II. For Registered Land

(Land including houses having a title registered at the Land Registry.)

Scale of solicitor's charges for Transfers on Sale, Charges, Sub-Charges, Mortgages, Sub-Mortgages and Transfers thereof.

Value of Land or Amount of Charge	Scale of Remuneration
(1) Up to and including £100	£5 15s. 6d.
Over £100 to £150.....	£6 6s.
Over £150 to £200.....	£7 7s.
Over £200 to £300.....	£8 8s.
Over £300 to £350.....	£8 10s.
For each additional £50 thereafter up to £1,000	10s. per £50
For the second and third £1,000.....	£1 per £100.
For the fourth £1,000....	10s. per £100.
For each subsequent £1,000 up to £13,000..	7s. 6d. per £100.
For each subsequent £1,000 up to £17,000..	5s. per £100.
For the remainder without limit.....	4s. per £100.
(2) Above £1,000, fractions of £100 under £50 are to be reckoned as £50, fractions of £100 above £50 are to be reckoned as £100.	

ACCOUNTANTS

The Councils of the three Institutes of Chartered Accountants and of the Association of Certified and Corporate Accountants have not laid down any scale of fees for their members. There are no statutory scales of fees except for certain special appointments such as Approved Auditors under the Industrial and Provident Societies Act.

Accountancy and auditing.—The Council of the Institute of Chartered Accountants in England and Wales has stated that chartered accountants' charges should generally be calculated by reference to the

skill and knowledge required for the type of work involved, the seniority of the persons necessarily engaged on the work, the time occupied by each person engaged and the nature of the responsibility. The normal practice is therefore to calculate charges at an appropriate rate per day for the principal and for each of the clerks engaged on the work.

Special Work.—Substantially higher charges are appropriate where the work requires special skill or has other special features, for example work calling for priority of attention. Prospectus reports, investigations, back duty and acting as financial adviser are in this category.

Receivers, Liquidators and Trustees in Bankruptcy.—By long-standing custom and sometimes by statutory requirement the remuneration is often calculated by a percentage on the amount realised and a percentage on the amount distributed in dividend.

Taxation.—The rates charged for taxation matters are generally higher than those for audits. The Councils of the recognized accountancy bodies have intimated that a member undertaking taxation work on the basis that he should be remunerated by a percentage on the amount recovered, or receive no remuneration if no recovery results would be liable to be regarded as acting discredibly.

Expenses.—Out-of-pocket expenses, in particular travelling expenses, attributable to the work done for the client are normally charged in addition to the professional fees.

ARCHITECTS

Conditions of Engagement

A. Members of the Royal Institute of British Architects are governed by the Charters, By-laws and Code of Professional Conduct of the Royal Institute.

B. The Architect shall give such periodical supervision and inspection as may be necessary to ensure that the works are being executed in general accordance with the contract; constant supervision does not form part of the duties undertaken by him.

C. In cases where constant superintendence is required a Clerk of Works shall be employed for this purpose. He shall be nominated or approved by the Architect, and appointed and paid by the Client. He shall be under the Architect's direction and control.

D. The Architect shall not make any material deviation, alteration, addition to or omission from the approved design without the knowledge and consent of the Client and shall inform the Client if the total authorized expenditure is likely to be exceeded and if the contract period is likely to be varied.

E. The Architect has authority to give orders on behalf of the Client if such are necessitated by constructional requirements provided that the Client shall be immediately notified thereof.

F. The Architect shall, if requested to do so, at the completion of the work, prepare small-scale drawings thereof showing the main lines of drainage and other essential services as executed.

G. The following Architects' charges do not include for Surveyors' work for which see Clauses 11-17 which are those of the Royal Institution of Chartered Surveyors adopted by the R.I.B.A.

H. The employment of Consultants shall be at the Architect's discretion in agreement with the Client and Consultants shall be nominated or approved by the Architect, and appointed and paid by the Client. Where it is agreed to retain the services of Consultants the Architect's fee may by prior written agreement be reduced, but in no case shall

the reduction exceed one-third on the cost of the work upon which the services of the Consultants are retained, provided always that the Architect's fee on the cost of the whole scheme shall not be reduced by more than one-sixth.

I. An engagement entered into between the Architect and the Client may be terminated at any time by either party upon reasonable notice being given.

J. Copyright in all drawings and in the work executed from them will remain the property of the Architect.

K. Under these Conditions of Engagement, the fees and charges payable to the Architect shall be in accordance with the following Scale of Charges, unless a higher charge is agreed between Architect and Client when the former is commissioned.

Scale of Charges

1. New Works

For taking the Client's instructions, preparing sketch designs, making approximate estimate of cost, submitting applications for licences, town planning, bye-law and/or Building Act approvals, preparing working drawings, specification or such particulars as may be necessary for the preparation of bills of quantities by an independent Quantity Surveyor, or for the purpose of obtaining tenders, advising on tenders and preparation of contract, nominating and instructing Consultants (if any), preparing for the use of the Contractor, two copies of all drawings, specification, or other particulars and of such further details as are necessary for the proper carrying out of the works, giving general supervision as defined in the Conditions of Engagement, issuing certificates for payment, certifying accounts and preparing such drawings as may be required under Condition F exclusive of the services enumerated in Clauses 5 and 11, the charge is to be a percentage on the total cost of all executed works as follows:

Total Cost of Executed Works	Percentage Fee	Minimum
(i) Up to £700	10	
£700-£1,600	9½	£70
£1,600-£2,500	9	£152
£2,500-£3,400	8½	£225
£3,400-£4,300	8	£289
£4,300-£5,200	7½	£344
£5,200-£6,100	7	£390
£6,100-£7,000	6½	£427
Over £7,000	6	£455

(ii) The fees set out in the Scale of Charges are in all cases exclusive of the cost of all prints and other reproductions of drawings and documents, travelling and hotel expenses and other reasonable disbursements.

(iii) When work is executed wholly or in part with old materials, or where material, labour or carriage is provided by the Client, the percentage shall be calculated as if the works had been executed wholly by the Contractor supplying all labour and materials.

(iv) In addition to a percentage on the total cost of executed works, the Architect is entitled to charge in respect of all works included in the tenders, but subsequently omitted, two-thirds of the charge which would have been payable had they been executed.

2. Variations of Charges

The above Scale of Charges is subject to variation by prior written agreement as to the percentage fee between Client and Architect in respect of the following:

(i) Repetitive Works: In the case of extensive works of a simple repetitive character, the charge may be reduced by one-sixth. This sub-clause shall not apply in the case of schemes of housing of a repetitive character, fees for which are governed by the provisions of the Application of the R.I.B.A. Scale of Professional Charges to Repetitive Housing Work: nor shall it apply to repetitive schemes for private house-builders, fees for which schemes are governed by the R.I.B.A. Scale of Fees for Private House Building (based on selling price).

(ii) Works to Existing Buildings: In the case of works to existing buildings a higher percentage is chargeable, not exceeding twice the amount payable under the Scale for new works of the same cost, and depending upon the intricacy of the work involved.

(iii) Special Works: In works involving special services in respect of fittings, furniture, decorations, exhibitions, garden or landscape design, special fees appropriate to the circumstances are chargeable.

3. Partial Services

In cases where the Architect performs partial services for any reason, including the abandonment, deferment, substitution or omission of any project and/or works, or part thereof, or if the services of the Architect are terminated, the charges in respect of the services performed are as follows:

(i) For taking Client's instructions and preparing preliminary sketch designs to illustrate possibilities of a site or cost of a scheme the charge is on *quantum meruit*.

(ii) For taking Client's instructions, preparing sketch designs sufficient to indicate the Architect's interpretation of the Client's instructions (but not in detail adequate to enable bills of quantities to be prepared), making approximate estimate of cost and making application for outline Town Planning approval, the charge is on *quantum meruit* and shall not exceed one-sixth of the percentage due under Clause 1 or 2 (as the case may be) on the Architect's estimated cost of such works.

(iii) For taking Client's instructions, preparing sketch designs sufficient to indicate the Architect's interpretation of the Client's instructions, and preparing drawings and particulars sufficient to enable applications to be made for Town Planning, Bye-law and/or Building Act approvals, the charge is one-third of the percentage due under Clause 1 or 2 (as the case may be) on the estimated cost of such works.

(iv) For taking Client's instructions, preparing sketch designs, making approximate estimate of cost and preparing working drawings, specification or such particulars as may be necessary for the preparation of bills of quantities by an independent Quantity Surveyor, or for the purpose of obtaining tenders, the charge is two-thirds of the percentage due under Clause 1 or 2 (as the case may be) on the Architect's estimated cost of such works.

(v) If the project or any part thereof is abandoned or deferred or any part omitted or submitted on the Client's instructions during the preparation of the working drawings, the charge is two-thirds of the appropriate percentage on the Architect's estimated cost of such works less a *quantum meruit* charge for bringing the working drawings and other particulars up to the stage defined in Clause 3 (iv).

(vi) In all cases where fees are assessed on the basis of *quantum meruit* regard must be had to all relevant factors.

4. The Layout of Housing Estates

(i) Where the Architect is employed to prepare a layout but not to design any dwellings and the

layout shows the siting only of dwellings and other works, the fee shall be $\frac{1}{4}$ per cent. on the estimated cost of such dwellings and other works.

(ii) Where the Architect is employed to prepare a layout only of the roads and public paths to a scale of 1/500th, the fee shall be 1 per cent. on the cost or estimated cost, as the case may be, of such roads and public paths.

(iii) Where the Architect is employed for the services specified in Clause 1 in connection with the construction of roads and sewers, the fee shall be based on the cost of the executed works in accordance with Clause 1.

5. Services not Included in the Scale

Charges assessed on the basis of *quantum meruit* in accordance with Clause 3 (vi) shall be payable in respect of any additional services involved:

(i) In advising as to the selection and suitability of sites. Negotiating as to sites or buildings. Surveying sites or buildings and taking levels, and making surveys, measurements, and plans of existing buildings.

(ii) In preparing for the use of the Client special drawings in addition to working drawings, and preparing drawings for negotiations with ground landlords, adjoining owners, public authorities, licensing authorities or others.

(iii) In amending working drawings or preparing new working drawings to give effect to alterations of the Client's instructions or changes in design due to causes outside the control of the Architect.

(iv) In negotiations arising from applications for licences, town planning, bye-law and/or Building Act approvals, and negotiations in connection with Party Walls, Rights of Light and other easements, reservations or restrictions.

(v) Arising out of delay in building operations due to causes outside the control of the Architect.

6. Mode and Time of Payment

The Architect is entitled to payment in stages as follows:

(i) On the completion of sketch designs one-sixth of the total fees payable.

(ii) On the completion of the drawings and particulars sufficient to enable applications to be made for Town Planning, Bye-law and/or Building Act approvals, one-third of the total fees payable less the amounts of any payments already received by the Architect pursuant to sub-clause 6 (i).

(iii) During the preparation of working drawings and other particulars instalments consistent with the amount of work completed by the Architect.

(iv) On completion of the said working drawings and other particulars, two-thirds of the total fees payable less the amount of any payments already received by the Architect pursuant to sub-Clauses 6 (i), 6 (ii) and 6 (iii).

(v) The remaining one-third of the total fees to be paid by instalments as the building work proceeds consistent with the value of the said building work as certified from time to time.

7. Inspections and Reports

For making inspections, preparing reports or giving advice on the condition of premises, the charge is on *quantum meruit* in accordance with Clause 3 (vi).

8. Litigation and Arbitration

For qualifying to give evidence, settling proofs, conferences with Solicitors and Counsel, attendance in Court or before Arbitrators or other tribunals, charge is based upon the time occupied at the minimum rate of £3 3s. per hour to which shall

be added charges for Assistant's time, out-of-pocket expenses and other disbursements.

Architects acting as Arbitrators are recommended to base their charges upon the total time occupied in dealing with a case at a minimum rate of £3 3s. an hour exclusive of out-of-pocket expenses and other disbursements (minimum fee £21).

9. Travelling Time

An additional charge may be made by prior written agreement if the work should be at such a distance as to lead to an exceptional expenditure of time in travelling.

10. Time Charges

In cases in which charges are based upon time occupied the minimum fee for Principal's time is 2 guineas per hour to which shall be added charges for Assistants' time and office overheads thereon.

NOTE.—*Clauses dealing with the following subjects are in accordance with the Scale of Professional Charges of the Royal Institution of Chartered Surveyors and are adopted by the Royal Institute of British Architects.*

11. Preparing hills of quantities and valuing work executed.

12. Valuation of freehold or leasehold properties.

13. Dilapidations (Lands, Buildings and Chattels).

14. Repairs to and maintenance of property.

15. For approving plans submitted by lessees and inspecting buildings during progress.

16. Work under the Lands Clauses Consolidation Act or other Acts for the compulsory acquisition of property.

17. For land surveying and the preparation of plans and maps.

STRUCTURAL ENGINEERS

The following charges are those usually in operation among Consulting Structural Engineers who are not connected with any firm of contractors and who receive remuneration for their services directly from their clients. Full details of the scales which it authorizes can be obtained from the Institution of Structural Engineers, 11 Upper Belgrave Street, S.W.1.

Reports, Advisory Work and Surveys

For inspections, professional advice, opinions and reports: a fee of Three Guineas per hour upwards, minimum three hours at rate agreed, plus any necessary expenses for travel and services of Engineer's staff.

Constructional Work

A fee of £25, plus (1) for Reinforced Concrete, $7\frac{1}{2}$ per cent. on total cost of work, with an additional 1 per cent. on the first £20,000; for preparation of Bending Lists, 5 per cent. on cost of steel bent and fixed in work; (2) for Structural Steelwork and other work except (1) above, 6 per cent. on total cost of work, with additional 1 per cent. on first £20,000; (3) an additional fee where the Engineer is required to give advice or accept responsibility for the strength or safety of brickwork or other items not covered by (1) and (2) above.

The above scale is governed by conditions regarding constructional emergencies, remuneration for work done to the Engineer's Specification and/or Drawings, remuneration for works varied or abandoned, travelling and out-of-pocket expenses, etc.

Bills of Quantities, etc.

A fee of from $1\frac{1}{2}$ per cent. to $3\frac{1}{2}$ per cent. (depending on the size and complexity of the work)

of the total actual cost or, in the case of abandoned work, the total estimated cost. Measuring and making-up accounts for variations upon contracts, including pricing and agreeing totals with contractors: $2\frac{1}{2}$ per cent. upon the amount of the additions and $1\frac{1}{2}$ per cent. upon the amount of the omissions, less the provisional sums or work omitted as a whole.

Technical Evidence

For "qualifying," considering documents, preparing proof of evidence, attending consultations, appearing before Parliamentary Committees, Courts of Law, Arbitration Tribunals and Official Enquiries: (1) a fee of Three Guineas per hour upwards, varying in accordance with the standing of the Engineer and the importance of the case, with a minimum of three hours at whatever rate is agreed; (2) a charge for the time spent by the Engineer's assistants; (3) a refresher for each day for which the Engineer is requested to hold himself in readiness to attend but is subsequently not required, at the rate agreed for one hour per day; (4) fees at the agreed hourly rate for time occupied in travel, together with travelling and out-of-pocket expenses.

Valuations and Negotiations for Purchase

For valuation of, and negotiations for the purchase of, engineering undertakings less than £10,000: a percentage charge dependent on the amount of work and responsibility involved; £10,000 or more: a fee in accordance with Ryde's Scale, i.e. Thirteen Guineas, plus one-half of one Guinea per cent. of the total.

CONSULTING ENGINEERS

The fees payable to Consulting Engineers for design and supervision are based on a percentage scale and for project reports, inspections, etc., on a lump sum or time scale. Full details can be obtained from the Association of Consulting Engineers Abbey House, 2 Victoria Street, S.W.1.

A booklet "Professional Rules and Practice and Scales of Fees" which gives full details of fees in addition to containing Model Forms of Agreement between a Client and a Consulting Engineer is issued at 5s. per copy.

STOCKBROKERS

The Rules and Regulations drawn up by the London Stock Exchange Council are voluminous and technical. On British Government stocks the scale of brokerage is $\frac{3}{8}$ per cent. on Stock up to £10,000 Stock and $\frac{1}{2}$ per cent. on Stock on any balance in excess of £10,000 Stock. On shares the commission is $1\frac{1}{4}$ per cent. on consideration. There are minimum charges of 5s. on less than £20; 10s. on less than £100; and £1 on £100 and over. In certain circumstances the above charges may be modified. Copies of the Rules and Scales of Commission may be obtained from the Secretary.

SHIPBROKERS

A scale of Minimum Agency Charges became operative for members of the Institute of Chartered Shipbrokers (Office, 25 Bury Street, E.C.3) from 1920, and has been revised from time to time. Copies (price 6d. post free) may be obtained from the Secretary.

AUCTIONEERS AND ESTATE AGENTS

(Summary based on the Scales of Charges of the Professional Societies. In all cases expenses are excluded)

Sales by Private Treaty or by Auction

Freehold Property and Leasehold Property, where the rent is less than $2\frac{1}{3}$ ds. of the rateable value, including in the case of auctions the preparation of

particulars and advising as to reserves:—On the first £500, 5 per cent.; on the next £4,500, 2½ per cent.; on the residue, 1½ per cent. Minimum Fee, £7 10s.

In addition to the above charges:—On payments for goodwill, 5 per cent. on the first £1,000 and 2½ per cent. on the residue; and on amounts paid by the purchaser for *Chattels, Fixtures, Fittings, Furniture, Trade Stocks, and other Movable Effects, Timber, and Tenant-right*, 5 per cent. to include inventory and valuation if required.

Where the division of an estate into a number of lots involves substantial additional work, an extra fee may be charged.

Sales before Auction

After acceptance of instructions, whether sale arranged by auctioneer or not, the same scale as for sale by auction.

Non-Sale

In the event of non-sale at the auction, a fee, the amount of which is a matter of arrangement, is payable.

Sales within 3 Months after Auction

Whether arranged by auctioneer or not, same commission as for sale by auction merging any fee for non-sale previously paid.

Disposal of Leasehold Property

On disposing of all leases (other than those to which the foregoing sale scale applies and building leases) either by private treaty or by auction (whether effected by assignment, surrender or otherwise):—On the rent, the same commission as for a letting (*see below*); and, on the premium and any consideration equivalent thereto, 5 per cent. on the first £1,000 and 2½ per cent. on the residue; and, where the necessary instructions are held, on payments for goodwill, 5 per cent. on the first £1,000 and 2½ per cent. on the residue; and on payments for *Chattels, Fixtures, etc.*:—As for Freehold Property (*see above*).

NOTE.—Where two Agents are co-operating at the request of the owner, the commission shall be at the rate of a scale and a half.

Other Sales

On sales of *Furniture, Trade Stocks, Book Debts and Chattels* on the vendor's premises, 7½ per cent. on the amount realized.

On sales of *Plant and Machinery*, 5 per cent. on the amount realized.

On sales of *Live and Dead Farming Stock*, except Horses, Pedigree Live Stock,* Recorded Cattle,* Bulls, Rams and Boars, and Poultry, 2½ per cent. on live stock and 5 per cent. dead stock, on the amount realized.

On sale of *Horses, Pedigree Live Stock,* Recorded Cattle,* Bulls, Rams and Boars, and Poultry*, 5 per cent. on amount realized.

On marking, valuing and selling, timber and timber-like trees and selling underwood, 7½ Guineas on the first £1,000; and 5 Guineas per cent. on the residue of the amount realized; the fee to cover a felling licence if required. Minimum Fee, 7½ Guineas. Alternatively by prior arrangement, a fee on a time basis.

Purchases

Freehold and Leasehold Property.—For seeking and negotiating the purchase of a property to suit a client's requirements:—2½ per cent. on the first

£5,000; 1½ per cent. on the next £10,000; and 1 per cent. on the residue. In the case of leaseholds, in addition to the foregoing a fee on the rent equal to that payable under the appropriate letting scale (*see below*). For abortive work a fee to be fixed by arrangement. For negotiating the purchase of a particular property named by the client:—1½ per cent. on the first £15,000; and 1 per cent. on the residue. In the case of leaseholds, in addition to the foregoing, a fee on the rent equal to three-quarters of that payable under the appropriate letting scale (*see below*). If no purchase is effected, the usual scale for valuation should be charged: one guinea per cent. on first £1,000; half a guinea on next £9,000; and a quarter of a guinea per cent. beyond on the residue. Minimum fee, £7 17s. 6d.

Lettings

NOTES.—(a) Should the rent be a progressive one, the commission is based on the average rent for the period up to the first possible break of the tenancy. (b) When a property, which an Agent has been instructed to let or sell, is let with an option to purchase, and the tenant afterwards exercises his option, or becomes the purchaser within the period of the option, the commission for selling, less the commission already paid on the letting, will then become payable. (c) "Letting" includes a letting to a sitting tenant (including negotiating and agreeing a new rent) or to a nominee of the landlord. (d) For the purposes of these scales "rent" means (except where otherwise stated) the rent reserved by the letting plus any regular payments made to the landlord for which the tenant is responsible.

(1) *Unfurnished Premises*.—(a) Where there is a premium or any equivalent consideration and the rent (exclusive of any payment in respect of rates, heat, light, water, service or other incidental charges) is less than two-thirds of the rateable value, the same commission as is payable for the sale of such property (*see above*); (b) in all other cases, where the letting is for a term certain of twelve months or more, 10 per cent. on one year's rent; where there is a periodic tenancy which subsists for twelve months or more, a fee to be fixed by arrangement subject to a maximum of 10 per cent. on one year's rent; where there is a periodic tenancy which subsists for less than twelve months, 10 per cent. on the amount of the rent payable under the letting; and in addition a commission on the premium or goodwill as for the disposal of leasehold property (*see above*).

(2) *Furnished Premises*, including collection of rent, if required, but excluding the making and checking of inventories: (a) for lettings of 12 months or less, 10 per cent. on the amount of rent payable under the letting; (b) for lettings of more than 12 months, 10 per cent. on one year's rent, and, in addition, 7½ per cent. on the amount of rent payable during any period for which the premises are let in excess of twelve months.

(3) *Sporting Rights*, including collection of rent if required—10 per cent. on one year's rent or, where letting is for less than one year, 10 per cent. on the amount of rent payable under the letting.

(4) *Farms and Agricultural Land*.—10 per cent. on the first £250 and 7½ per cent. on the residue, of 1 year's rent.

(5) *Land on Building Lease, or at a Fee Farm Rent*.—100 per cent. on the first £100; 50 per cent. on the next £900; and 25 per cent. on the residue, of one year's ground rent; and in addition where a premium is paid, a Commission of 5 per cent. on the first £1,000 and 2½ per cent. on the residue.

* Where a full catalogue with details of pedigree or milk records respectively is provided, the 5 per cent. scale applies.

TAXES, STAMP DUTIES AND LICENCES

INCOME TAX 1962-63

Income Tax is a tax on annual income, represented by money, or money's worth. In general, the charge to tax is on the full amount of income arising for the year of assessment, the fiscal year which runs from 6th April in one year to 5th April in the next, subject to the deductions authorised by the Income Tax Acts. Under Schedule D, however, the assessment is made on the profits or gains of a continuing trade or profession for the year preceding the year of assessment, which is called the "basis year." The profits are arrived at on ordinary accountancy principles and then adjusted for tax purposes. The profits for the accounting year of the trade or profession which ends in the year preceding the year of assessment, are the profits of the "basis year."

Broadly, the charge to tax is on income arising in the United Kingdom, or on income received from home or abroad, by residents in the United Kingdom. An individual is resident and ordinarily resident in the United Kingdom if he is living here in the ordinary course of his life, or for an extended period; also, though normally he lives here, if he is abroad for occasional residence only; or if he visits the United Kingdom year by year, even though his main home is abroad.

The income of a married woman living with her husband is aggregated with his income. Separate assessment may be claimed, but the tax due remains the same.

Income Tax is imposed at the rates specified by the annual Finance Acts. There are graduated rates of tax, the principal rate being called the "Standard Rate," which for 1962/63 is 7/9d. in the £. There is an additional income tax on higher incomes called "Sur-tax." The enactments relating to income tax were consolidated in the Income Tax Act, 1952, as amended by subsequent Finance Acts.

The Tables which follow show the tax payable on the amount of income specified, after deduction of the personal allowance, children's allowance (where appropriate) and, in the case of earned income, the earned income relief. The taxpayer, however, may be entitled to further reliefs which would reduce the tax payable below the amounts shown in the Tables.

STATUTORY INCOME is computed as follows:—

Under Schedule A.—On the annual value of Houses, Lands, Tenements, etc., including houses occupied by the owner. Net assessment is computed by deducting scale allowance for repairs,

insurance, etc., from the gross assessment based on the rack rental, i.e. rent payable when landlord undertakes all repairs and maintenance and tenant pays rates. Owner-occupied houses are usually assessed by reference to rating valuation.

Scale allowance for repairs by reference to gross assessment.

Lands.....	one-eighth
Houses: Where assessment does not exceed £40.....	one-quarter
Exceeds £40, but not £50	£10
Exceeds £50, but not £100	one-fifth
Exceeds £100.....	£20
	plus one sixth of excess over £100

Ministers of Religion are relieved from tax in respect of their residences.

Maintenance Relief.—Repayment or relief may be claimed for any year where average cost of previous five years' maintenance, etc., exceeds scale allowance for that year. The cost of insurance and agents' charges are allowable. In regard to recently acquired property there may be claimed the excess of the actual year's maintenance over scale allowance, provided this basis is used for first five years of ownership. Except in the case of agricultural property, relief cannot exceed the net annual value.

Under Schedule B.—Assessments are on one-third Schedule A annual value in respect of amenity lands—parks, gardens, etc., not used for husbandry. Also on woodlands, although these can be assessed on actual profits under Sch. D. Case I, if taxpayer so elects.

Under Schedule C.—Dividends, interest, annuities from public revenue on actual year basis. Income Tax is deducted at source.

Under Schedule D.—Profits of Trades, Businesses and Professions. All interest of money, but interest on Post Office Savings Bank and Trustee Savings Bank accounts up to £15 is exempt from income tax. Such amount of interest has to be included for Surtax purposes, grossed at the standard rate.

Income from Foreign or Commonwealth securities, rents and possessions: for persons domiciled and ordinarily resident in Great Britain this income is assessable whether remitted or not. Persons not domiciled or British subjects not ordinarily resident in Great Britain are assessable only on remittances to the United Kingdom of this income in any year in which they become resident. Income from Trades or Professions carried on abroad is assessable only to extent that it is remitted, and then only when person entitled thereto is resident in United Kingdom.

Profits from letting of Furnished Houses, etc., and Excess Rents arising when rent of unfurnished house, less attributable repairs allowance, exceeds net Schedule A assessment.

Short-term gains: Any person resident and ordinarily resident in the United Kingdom in the year of assessment is chargeable to income tax under Schedule D, Case VII (and to surtax), in respect of gains made as the result of the acquisition and disposal, both being after April 10th, 1962, of (a) land, where the disposal takes place not more than three years after the acquisition, and (b) in the case of other property; e.g., stocks and shares, where the disposal takes place not more than six months after acquisition. The principal exceptions are for owner-occupied dwelling houses, business premises and tangible moveable property. Losses are allowable against gains for the year, or subsequent years, until exhausted.

Under Schedule E.—Income from all Offices, Employments and Pensions, including Salaries, Wages, Emoluments, Directors Fees, etc. Taxed by deduction on payment under P.A.Y.E. (pay-as-you-earn) on actual year basis. Necessary expenses are allowable, including fees and subscriptions to certain professional bodies and learned societies.

Tax is charged on the emoluments of an office or employment if the holder is resident, and ordinarily resident within the United Kingdom, provided the duties are not performed wholly abroad. A person not resident (or if resident, then not ordinarily resident) in the United Kingdom is charged only on emoluments for duties performed in the United Kingdom.

Income from employments exercised abroad is assessable only to the extent that it is received in the United Kingdom, and then only when employee is resident in United Kingdom.

Expense allowances and payments in kind (less expenses incurred in performance of duties) to Directors and employees enjoying emoluments of £2,000 p.a. or more are assessable. Certain payments made on retirement or removal from a person's office or employment (in excess of £5,000) are assessable to tax on him.

Exemptions.—Unemployment, sickness and maternity benefit and grant; and death grant payable under the National Insurance Acts are not assessable to income tax.

TAXABLE INCOME is Statutory Income less Allowances and Deductions as under:

Personal Allowance.—To single person... £140
To married man living with or normally maintaining his wife..... £240

When either husband or wife is absent from United Kingdom throughout a complete fiscal year they are treated as separate entities for tax purposes, each entitled to Single Personal Allowance. A married woman permanently separated from her husband is treated as a single woman.

Children.—For each child under 16 (or over that age at the beginning of the fiscal year receiving full time instruction at a recognized educational establishment, or who is articulated or apprenticed) and who does not have income in that year exceeding £100 in his own right, the allowances are:—

- (a) Child over 16 at commencement of fiscal year..... £150
- (b) Child over 11 at commencement of fiscal year..... £125
- (c) Other children (each)..... £100

Scholarship or bursary does not count for this purpose. "Child" includes step-child and adopted child. Child allowance is due to the person who has the custody and who maintains the child. If more than one person could claim the allowance; e.g. if a husband and wife are divorced or separated, the allowance will be apportioned between them, as necessary.

The "Family Allowance" for children ranks as the father's income subject to Earned Income Allowance.

Dependent Relatives.—A maximum deduction for each dependent relative of £75. This allowance is reduced by £1 for every £1 by which the relative's own income (excluding voluntary

allowance) exceeds £155. Claimant must maintain relative who must be incapacitated by old age or infirmity from maintaining himself or herself, except in the case of his or his wife's widowed mother (which includes any woman living apart from her husband, or whose marriage has been dissolved or annulled). If more than one person gives support to the dependent relative then allowance is divided *pro rata*. The dependent person must not be in receipt of an income exceeding £230.

Daughter.—A person who by reason of his or her own age or infirmity, has to retain the services of a daughter resident with him or her is entitled to an allowance of £40.

Housekeeper or person looking after children.—An allowance of £75 is granted to:—

- (a) any male taxpayer entitled to single personal allowances, any female tax-payer who was either working full time in some employment or business or was totally incapacitated throughout the year, and a married man entitled to married personal allowance whose wife is totally incapacitated throughout the whole of the year, who has a female person resident with and maintained or employed by him or her for the purpose of having care of any child or children for whom the taxpayer is entitled to claim child relief.
- (b) a widow or widower who has a female relative (or, if no relative is available, a female person) resident with her or him in the capacity of Housekeeper.

A widow or widower (and certain single persons) entitled to the allowance for children but with no resident-housekeeper, is entitled to an allowance of £40.

Blind persons.—An allowance of £100 is made to a registered blind person who is not already receiving tax-free disability payments, etc., of a greater amount than £100, provided that the Daughter's allowance of £40 is not also claimed.

Earned Income.—Allowance of the following fractions of earned income (after deducting allowances for necessary expenses, superannuation, etc.):—

- Up to £4,005—Two-ninths.
- The next £5,940—One-ninth.
- Maximum allowance is thus £9,945.

Married woman earning income in her own right has deduction of two-ninths of such earnings and, in addition, an allowance equal to seven-ninths of her earnings subject to a maximum of £140 plus Reduced Rate Reliefs as shown below.

Small Income Relief.—All incomes up to £400 are treated as earned income; i.e. relief of two-ninths of income is allowed. Marginal relief is given where income slightly exceeds £400.

Age Relief.—Allowance of two-ninths of unearned income where taxpayer (or his wife) attains 65 years subject to total income not exceeding £800. Where the total income exceeds £800, marginal relief is given so that the full tax on the investment income scale is not payable until the marginal relief runs out.

Age exemption.—Persons over 65 years of age are exempt from tax if their total incomes do not exceed:—

- Single person..... £300
- Married couple (either being over 65)..... £480

Marginal relief is given where income slightly exceeds these amounts.

Pension Contributions.—Contributions by both employed and self-employed persons to officially approved superannuated funds, or premiums paid (within certain limits) to provide for retirement annuities are allowed as deductions.

National Insurance Contributions.—Certain deductions are allowable in respect of contributions payable under the graduated contribution scheme by employed, self-employed and non-employed persons respectively. The general allowance for employed adults is £18. Taxpayer paying "employer's" contribution in respect of personal or domestic servants may deduct whole of such contribution from his income.

Life Assurance Premiums.—Relief is given for premiums paid under assurance policies on life of taxpayer or his wife. A capital sum must be payable at death. Where the total premiums available for relief to taxpayer and his wife do not exceed £25 an amount of £10 or total premiums, whichever is less, may be deducted from assessable income. Where total premiums exceed £25 the deduction is two-fifths of the premiums. Where annual premium exceeds 7 per cent. of capital sum assured, relief is limited to sum equal to 7 per cent. The amount on which relief is given must not exceed one-sixth of net total income. Relief is also given on sums paid under Act of Parliament or under terms of employment for securing deferred annuity to widow or provision for children after death of the taxpayer.

Purchased Life Annuities.—The capital element of annuities for a term referable to a life, which are purchased for money or money's worth from a person whose business is to grant annuities (with certain exceptions) is not taxable as income.

Reduced Rate Relief.—Rates of tax on taxable income are:—

	in the £
On first £60	1s. 9d.
On next £150	4s. 3d.
On next £150	6s. 3d.
On balance	7s. 9d.

Repayment Claims.—Where relief or allowance due has not been given in the assessment of the taxpayer, or where tax has been deducted from income received in excess of the amount of tax due in respect of total income, repayment may be claimed in general, within six years after the end of the year of assessment.

Error or Mistake.—Relief may be claimed if an assessment is excessive because of some error or mistake in the return or statement made by the taxpayer. Application for relief must be made to the Inspector within six years after the end of the fiscal year in which the assessment was made.

Building Society Interest.—Majority of societies operate under special arrangement with Inland Revenue and Interest is paid to depositors and shareholders "free of income tax." But such interest must be included in taxpayer's total income for assessment to surtax, grossed at the standard rate.

Surtax is an additional duty of income tax, chargeable on total income of individuals in excess of £2,000. Total income is the amount of income chargeable to income tax by assessment or deduction, less yearly interest or other annual sums payable under deduction of tax. Loss relief, and interest payable to banks and building societies are deductible. Personal allowances, child allowances, housekeeper, dependent relative and similar reliefs (to the extent they exceed £140) are also deductible.

Earned income. There is deductible from total income, earned income relief, and also an earnings allowance of £2,000, or less so as to reduce the earned income (after deducting earned income relief) to £2,000. In effect, earned income is not charged to surtax if less than £5,000, or more if personal reliefs are due.

Surtax is payable on 1st January following year of assessment, so that surtax for 1962-63 is payable on 1st January 1964. Surtax is chargeable on a sliding scale as follows:—

On each £ of first	£500	2s.	in the £
" next	£500	2s. 6d.	"
"	£1,000	3s. 6d.	"
"	£1,000	4s. 6d.	"
"	£1,000	5s. 6d.	"
"	£2,000	6s. 6d.	"
"	£2,000	7s. 6d.	"
"	£2,000	8s. 6d.	"
"	£3,000	9s. 6d.	"
of remainder		10s.	in the £

Seven-year Covenants.—Where covenant to pay annual sums of money is made for other than valuable and sufficient consideration, the period of the covenant must be for a term which can exceed six years if the Covenantor wishes to divest himself of such income for income tax purposes. Any such covenant entered into after 10th April, 1946, must be in favour of an individual, not employed in any way by Covenantor (and not, for example, a charitable body) in order to divest the Covenantor of the income for Surtax purposes.

Settlements in favour of taxpayer's own infant children.—The Income of any such Settlement made since 22nd April, 1936, is treated as that of the Settlor for all income tax purposes if:—

- the Settlement can be revoked within a period of six years (unless the child becomes bankrupt).
- the income can be paid to or for the benefit of the child during the lifetime of the settlor. This ceases to apply at the end of the fiscal year in which the child attains 21 years or marries.

Double Taxation Relief.—Agreements for the Avoidance of Double Taxation have been made between the United Kingdom and Aden Colony, Antigua, Austria, Australia, Barbados, Basutoland, Bechuanaland, Belgium, British Guiana, British Honduras, British Solomon Islands Protectorate, Brunel, Burma, Canada, Ceylon, Cyprus, Denmark, Dominica, Falkland Islands, Faroe Islands, Federation of Rhodesia and Nyasaland, Fiji, Finland, France, Gambia, Germany (Rep.), Ghana, Gilbert and Ellice Islands, Greece, Grenada, Guernsey, Ireland (Rep.), Isle of Man, Israel, Jamaica, Jersey, Kenya, Malaya, Malta, Mauritius, Montserrat, Netherlands, Netherlands Antilles, New Zealand, Nigeria, North Borneo, Norway, Pakistan, St. Christopher and Nevis, St. Lucia, St. Vincent, Sarawak, Seychelles, Sierra Leone, Swaziland, Sweden, Switzerland, Tanganyika, Trinidad, Uganda, South Africa, United States of America, Virgin Islands, and Zanzibar.

Relief may further be obtained by residents of the United Kingdom in respect of any income tax payable in any other Country, Colony or Dominion, than the above-mentioned, when that income is also liable to British income tax.

Persons Resident Abroad.—Persons normally resident outside the United Kingdom are liable, in general, in respect of income from United Kingdom sources but not on the interest from:—

3½% War Stock 1952 or after; 4% Victory Bonds; 4% Funding Loan 1960-90; 3% Savings Bonds (all issues); 5½% Funding Loan 1982-84.

Such persons become resident in the United Kingdom if they visit for a period or periods exceeding six months in any fiscal year. Also if they visit for any period in a year in which they have retained a place of abode in the United Kingdom, except such persons as are engaged in full-time employment abroad. They would then be liable to United Kingdom Tax on all remittances of income arising abroad. If they visit the United Kingdom in four consecutive years for periods averaging three months or more per annum they would be regarded as ordinarily resident here.

A person who is not resident in the United Kingdom who has income which is liable to United Kingdom tax cannot claim any of the normal income tax allowances unless he is:

- (a) a British subject;
- (b) a present or former servant of the Crown; or widow of a former Crown servant;
- (c) employed by any missionary society controlled from the United Kingdom or a servant of a native State under British protection;
- (d) a resident of the Isle of Man or the Channel Islands or
- (e) was previously resident in the United Kingdom but resides abroad for the sake of his health or the health of a member of his family.

Post War Credits.—Those Credits arising out of the temporary reduction of certain income tax allowances during the years 1941-42 to 1945-46 inclusive are repayable to women over 58 and men over 63 years of age, and to widows entitled to Credits in their own right. Where a man or woman has died, repayment is made to personal representatives or beneficiaries, irrespective of age.

Holders of Credits are also entitled to repayment if certified as blind persons or in-patients of hospitals or nursing homes, or if in receipt of any of the following: National Assistance, Constant Attendance Allowance or Unemployability Supplement, Sickness or Injury Benefit, Disablement Pensions, Workmen's Compensation 1956 Supplement; or if registered as unemployed. There is a qualifying period of 26 weeks in certain categories (12 weeks for National Assistance). Interest from 1st October 1959 will be added to the sum repayable. Forms for claiming repayment may be obtained at any Post Office.

INCOME TAX ADMINISTRATION

Income Tax under Schedules A, B, D and E, is assessed by H.M. Inspector of Taxes. Schedules A and B assessments are made by H.M. Inspector for the district in which the land or property is situated. Assessments under Schedules D and E are made by H.M. Inspector of Taxes for the district in which Trade, Profession or Employment is carried on, or from which the Pension is paid, otherwise assessments are made in the District in which the taxpayer resides. Notices of Assessment are sent to taxpayer who should make a formal appeal against any assessment which he disputes

direct to H.M. Inspector by whom the Notice was issued within the time limit for such appeals, as stated on the notice. The grounds of appeal should be given. If the assessment cannot be agreed with H.M. Inspector, the appeal will be heard by the General Commissioners. Alternatively, certain appeals are made to the Special Commissioners. An appeal may be made by way of Case Stated from the appeal Commissioners' decision to the High Court on points of law.

Income Tax is payable to the Collector of Taxes.

Surtax is assessable by the Special Commissioners of Income Tax to whom returns of total income are made, except where a full return of income is made to H.M. Inspector of Taxes. Appeals are made to the Special Commissioners and thence to the Courts by way of Case Stated.

Surtax is payable to the Special Commissioners.

Penalties may be incurred for failure to make proper returns of income.

Every person chargeable to income tax must give notice of chargeability within one year (unless an income tax return has been already made).

PAYE

Income Tax payable under Schedule E is deducted by employer, who accounts for it to the Collector of Taxes. The amount of tax deduction from each payment of salary, wage, pension, etc., is determined by reference to Tax Tables issued by H.M. Inspector of Taxes to employer, in conjunction with the taxpayer's Code Number. This Code Number is an interpretation of the taxpayer's Allowances and Reliefs. Notices of Coding are issued by H.M. Inspector of Taxes and they may take into account income assessable under other Schedules. Notice of Coding should be checked on receipt and H.M. Inspector of Taxes informed of any necessary amendment in order that no considerable over or under-deduction of income tax may take place. The tax deductions are on a cumulative basis and can be carried on by successive employers should changes in employment take place during fiscal year. When leaving one employment a statement (Form P45) showing code number, remuneration, and tax deductions to date should be obtained from old employer and handed, in due course, to new employer. At the end of fiscal year employer should give employee a statement (Form P60) showing total remuneration and tax deductions for the year.

DEDUCTION OF TAX

Tax is deductible at the standard rate from annual interest, annuities and annual payments such as ground rents and mortgage interest. The tax deducted may be retained by the payer unless he has not borne tax himself at the standard rate on an equivalent amount of income, in which case he must account to the Revenue for the tax deducted in respect of the excess. The tax paid under Schedule A by an occupier is normally deductible from the next rent paid by him to the landlord.

STANDARD RATES OF INCOME TAX SINCE 1900

The standard rate of income tax, as imposed by the Income Tax Act, 1842, was 7d. in the £. Rates since 1900 are as follows:—

	s.	d.		s.	d.		s.	d.		s.	d.
1900-1	1	0	1915-16	3	0	1931-34	5	0	1943-46	10	0
1901-2	1	2	1916-18	5	0	1934-36	4	6	1946-51	9	0
1902-3	1	3	1918-22	6	0	1936-37	4	9	1951-53	9	6
1903-4	0	11	1922-23	5	0	1937-38	5	0	1953-55	9	0
1904-9	0	10	1923-25	4	6	1938-39	5	6	1955-59	8	6
1909-14	1	2	1925-30	4	0	1939-40	7	0	1959-60	7	9
1914-15	1	8	1930-31	4	6	1940-41	8	6	1960-63	7	9

OTHER TAXES AND STAMP DUTIES

NOTE.—(1) The instruments for which the use of adhesive postage stamps is "permitted" include:—
 Agreements liable to the duty of 6d.—s. 22. Bills of exchange (including cheques), for payment of money on demand—s. 34 (1). Policies of Insurance (not life)—s. 99. Receipts—s. 101 (2).

(2) The Commissioners as a general rule allow deeds, etc., to be stamped after execution:—

WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY:

Deeds and instruments not otherwise excepted, within 30 days of first execution.

NOTE.—Where wholly executed *abroad*, the period begins to reckon from the date of arrival here.

PENALTIES ENFORCEABLE ON STAMPING, IN ADDITION TO DUTY:—

Agreements under hand only. Attested copies or contracts: after 30 days from their first execution....	£	s.	d.
Receipts, within 14 days after they have been given.....	10	0	0
Receipts, after 14 days, but within one month.....	5	0	0
Other Instruments presented after the proper time (subject to special provisions in some cases).....	10	0	0

AGREEMENT for Lease, *see* LEASES.

AGREEMENT for SALE of PROPERTY—charged with *ad val.* duty as if an actual conveyance on sale (*see post*, pp. 1178-9) with certain exceptions, e.g. agreements for the sale of land, stocks and shares, goods, wares or merchandise, or a ship (*see* s. 59 (1), Stamp Act, 1891). If *ad val.* duty is paid on an agreement in accordance with this provision, the subsequent conveyance or transfer is not chargeable with any *ad val.* duty and the Commissioners will upon application either place a denoting stamp on such conveyance or transfer or will transfer the *ad val.* duty thereto. Further, if such an agreement is rescinded, not performed, etc., the Commissioners will return the *ad val.* duty paid.

AGREEMENT, not otherwise charged with duty, under hand only..... 0 0 6

N.B.—The following agreements are exempt:—

(a) Where the value of the subject-matter is less than £5.

(b) For the hire of any labourer, artificer, manufacturer, or menial servant.

(c) For the sale of any goods, wares, or merchandise (but hire purchase agreements, *post*, p. 1180, are not exempt).

Not otherwise charged with duty, under seal or with clause of registration..... 0 10 0

APPOINTMENT of a new trustee or in exercise of a power over property, not being by a will; also on retirement of trustee, although no new trustee be appointed..... 0 10 0

Where a transfer is made to a body of persons established for charitable purposes only, or to the trustees of a trust so established, the maximum rate of duty is £1 per cent.

CONVEYANCE OR TRANSFER of any other kind.....fixed duty

£ s. d.
0 10 0

Included under this head are Transfers for nominal consideration within any of the following categories:—

(a) Transfers vesting the property in trustees on the appointment of a new trustee of a pre-existing trust, or on the retirement of a trustee.

(b) Transfers, where no beneficial interest in the property passes, (i) to a mere nominee of the transferor, (ii) from a mere nominee of the transferee, (iii) from one nominee to another nominee of the same beneficial owner.

(c) Transfers by way of security for a loan or re-transfer to the original transferor on repayment of a loan.

(d) Transfer to a residuary legatee of stock, etc., forming part of the residue divisible under a will.

(e) Transfers to a beneficiary under a will of a specific legacy of stock, etc. (Note.—Transfers by executors in discharge, or partial discharge, of a pecuniary legacy (unless made under an express power of appropriation) are chargeable with *ad valorem* duty on the amount of the legacy so discharged.)

(f) Transfers of stock, etc., forming part of an intestate's estate to the person entitled to it.

(g) Transfers to a beneficiary under settlement on a distribution of the trust funds of stock, etc., forming the share or part of the share of those funds to which the beneficiary is entitled in accordance with the terms of the settlement.

(h) Transfers on the occasion of a marriage to trustees of stocks, etc., to be held on the terms of a settlement made in consideration of marriage.

(i) Transfers by the liquidator of a company of stocks, etc., forming part of the assets of the company to the persons who were shareholders, in satisfaction of their rights on a winding-up.

The evidence necessary to establish that a transfer is liable to the fixed duty of 10s. should take the form of a certificate setting forth the facts of the transaction. In cases falling within (b) or (c) such a certificate should be signed by (1) both transferor and transferee or (2) a member of a Stock Exchange or a solicitor acting for one or other of the parties or (3) an accredited representative of a bank; in the last case when the bank or its official nominee is a party to the transfer, the certificate, instead of setting out the facts, may be to the effect that "the transfer is exempted from Section 74 of the Finance (1909-10) Act, 1910." A certificate in other cases should be signed

by a solicitor or other person (e.g., a bank acting as trustee or executor) having a full knowledge of the facts.

£ s. d.

Registering Officers will in any case in which a Marking Officer's certificate has not been given require such evidence in order to satisfy themselves that a transfer stamped with the 10s. fixed duty is duly stamped.

COVENANT—For repayment of money, see MORTGAGE.

For original creation and sale of any annuity, see CONVEYANCE.

For an annuity (except on original creation and sale) or other periodical payments, see BOND.

1,000,000		80

Lower rates of duty are payable in certain circumstances on property passing on two deaths occurring within 5 years of one another. (Finance Act, 1958.)

A reduction of 45 per cent. of the above rates is applied to the "agricultural value" of agricultural property; and (as respects deaths on and after 30th July, 1954) to certain business assets, viz.: "industrial hereditaments" and "machinery or plant" (Finance Act, 1954, s. 28).

Gifts made by deceased during his life for public or charitable purposes are liable for duty, unless made more than twelve months before death; other gifts are liable for duty, unless made more than five years before death, (although if the donor dies at any time within the third year after making the gift the estate duty thereon is reduced by 15 per cent.; if he dies within the fourth year it is reduced by 30 per cent.; and if he dies within the fifth year it is reduced by 60 per cent.) gifts made in consideration of marriage, or as part of deceased's reasonable normal expenditure, excepted. Gifts not exceeding £100 in value or amount (or in certain circumstances £500) also excepted.

Payment of Estate Duty may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.

Interest at 2 per cent. per annum is also payable on the Estate Duty on personality from the date of the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and 2 per cent. interest is charged on all unpaid instalments from twelve months after death.

FEES are taken in all Public Departments by means of Stamps: such payments are accounted for to the Exchequer under the heading of Miscellaneous Revenue.

75	0 15 0	9 0 0	18 0 0
100	1 0 0	12 0 0	24 0 0
Exceeding £100, for every £50 or fraction of £50	1 0 0	6 0 0	12 0 0

* If the term is indefinite the same duty is payable as if the term did not exceed 35 years. However, if the term does not exceed 35 years and the annual rent does not exceed £100, but there is a consideration other than rent, the duty is double that shown in the first column.

Agreement for lease not exceeding 35 years, same as actual lease.

Where a consideration other than rent is payable and duty is charged on that consideration at conveyance rates, the same graduation applies where the consideration does not exceed £6,000 as under Conveyance or Transfer on Sale (except stock or marketable securities), provided that any rent payable does not exceed £50 a year.

MINERAL RIGHTS DUTY.—This is payable in respect of minerals which are the subject of a mining lease, or which are being worked by the proprietor of the minerals. Duty is payable annually on the rental value of all rights to work minerals and of all mineral wayleaves. Rate, per 20s. of the rental value..... 0 1 0

MORTGAGE under hand only, see EQUITABLE MORTGAGE.

MORTGAGE, BOND, ETC., not exceeding £10..... 0 0 6

occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorize any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits.

The rates of duty are as follows:—

	£	s.	d.
GAME LICENCES, if taken out after 31st July and before 1st Nov., to expire on 31st July following.....	3	0	0
After 31st July, to expire 31st Oct.	2	0	0
After 31st Oct., to expire 31st July.	2	0	0
For a continuous period of 14 days.	1	0	0
Gamekeeper's (Great Britain), to expire 31st July.	2	0	0
Game-Dealer's Licence, to expire 1st July, annually.	2	0	0
GUN LICENCES (gun, air gun or pistol).	0	10	0

A *Firearm Certificate* (5/- for the first, 2/6 subsequently—renewable every 3 years) is also necessary (with certain exceptions) for any person in possession of a firearm, other than a smooth

bore gun with a barrel not less than 20 inches in length, or an air weapon.

A person under 17 may not purchase or hire and (with certain exceptions) a person under 14 may not have in his possession a firearm.

Firearm regulations are strictly enforced.

OTHER LOCAL LICENCES

Power to levy the duties on the following licences was transferred to county and county borough councils by the Finance Act, 1949.

	£	s.	d.
HAWKERS, annual licence.	2	0	0
MONEYLENDERS, annual licence (to July 31).....	15	0	0
February to July.	10	0	0
PAWNBROKERS, annual licence.	7	10	0
REFRESHMENT HOUSES, annual licence.	1	1	0

An abatement of 17s. 10d. may be obtained by a person also taking out a wine retailer's on-licence in respect of a refreshment house not open after 10 p.m.

MECHANICALLY PROPELLED VEHICLES

Road licences and driving licences for mechanically propelled vehicles are issued in England and Wales by county councils and by county borough councils (Scotland, 4 cities and Greenock, Motherwell, Paisley and Wishaw), on behalf of the Ministry of Transport. Renewal licences are issued in certain circumstances by the Post Office. Details of the excise duties chargeable on motor vehicles are set out in the Vehicles (Excise) Act, 1962, which provides *inter alia* that any vehicle kept on a public road but not used on roads is chargeable to excise duty as if it were in use.

Bicycles (other than electrically propelled):

	£	s.	d.
(a) If the cylinder capacity of the engine does not exceed 150 cubic centimetres.	†1	0	0
(b) Exceeds 150 c.c., but does not exceed 250 c.c.	†2	5	0
(c) Exceeds 250 c.c.	*4	10	0

Bicycles which are electrically propelled.

†Additional if used for drawing trailer or side-car

* Additional if used for drawing trailer or side-car.

Reduced duty on certain bicycles.—Where the cylinder capacity of the engine of a bicycle exceeds 250 c.c. and the bicycle (a) is one in respect of which a licence was taken out before Jan. 1, 1933, and (b) does not exceed 224 lb. unladen weight, the bicycle shall be treated for the purpose of the above table as if the cylinder capacity of the engine exceeded 150 c.c. but not 250 c.c.

Tricycles (neither constructed nor adapted for use nor used for the carriage of a driver or passenger)

Other tricycles.

Vehicles other than mowing machines, being vehicles with more than three wheels neither constructed nor adapted for use nor used for the carriage of a driver or passenger.

Hackney Carriages.

	£	s.	d.
Tramcars.	0	15	0
Other hackney carriages.	12	0	0

Additional for each person above 20 (excluding the driver) for which the vehicle has seating capacity.

Licensing of Public Vehicles.

Public vehicles and also the persons concerned with driving and conducting them must be

licensed. Vehicles are licensed by the Traffic Commissioners; licensing of personnel is effected by the authority in the area in which they live—not the area where the vehicle is to operate. Addresses of the Licensing Authorities can be obtained from local Police Stations. See also *Driving Licence Rates*, p. 1183.

Tractors, Cranes, Excavators, Agricultural Vehicles, etc.

Locomotive ploughing engines, tractors, agricultural tractors and other agricultural engines, not used for hauling on roads any objects except their own necessary gear.

Vehicles designed, constructed and used for the purpose of trench digging or any kind of excavating or shovelling work which (1) are used on public roads only for that purpose or for the purpose of proceeding to and from the place where they are to be used for that purpose, and (2) when so proceeding neither carry nor haul any load other than such as is necessary for their propulsion or equipment.

Vehicles designed and constructed as mobile cranes which (1) are used on public roads only either as cranes in connection with work being carried on at a site in the immediate vicinity or for the purpose of proceeding to and from a place where they are to be used as cranes; and (2) when so proceeding neither carry nor haul any load other than such as is necessary for their propulsion or equipment.

Mowing machines.

Vehicles (other than vehicles in respect of which duty is chargeable under the foregoing provisions) which are constructed and used on public roads for haulage solely and not for the purpose of carrying or having superimposed upon them any load except such as is necessary for their propulsion or equipment:—

POSTAL REGULATIONS

For full conditions, exceptions, &c., see Post Office Guide, price 2s. 6d., Associated volumes are London Post Offices and Streets 2s., Post Offices in the United Kingdom 4s. and Postal Addresses 1s. 6d.

CHIEF POSTAL SERVICES
LETTERS

Inland (U.K. and Irish Republic):—

Not exceeding 1 oz.	3d.
Not exceeding 2 oz.	4½d.
For every further 2 oz., or less	1½d.

British Commonwealth and Foreign:—

(a) *British Commonwealth, Territories under British Trusteeship; British Postal Agencies in Bahrain, Muscat, Qatar and the Trucial States:*

Not exceeding 1 oz.	3d.
For each further oz., or less	1½d.

(b) *Elsewhere:*—

Not exceeding 1 oz.	6d.
For each further oz., or less	4d.

WEIGHT LIMITS:—*Inland*, none; *Elsewhere*, 4 lb.

SIZE LIMITS: (A) If in roll form:—*Inland* and elsewhere length, 32 in.; length+twice diameter, 39 in. (B) not in roll form:—(i) *United Kingdom, Irish Republic; British Postal Agencies in Bahrain, Muscat, Qatar and the Trucial States*; 24×18×18 in. (ii) *Elsewhere*, length, 24 in. length+width+depth, 36 in. Envelopes must be at least 4×2½ in. for inland destinations. To all overseas destinations the minimum limits for letters in the form of a roll are 6½ inches for the length and twice the diameter combined (at least 4 inches for the greatest dimension), unless provided with a strong address label at least 6½ inches in length and width combined and 1½ inches in width. For letters other than in the form of a roll the minimum limits are one surface 4 inches in length, 2½ inches in width, unless provided with a strong address label of the dimensions mentioned above.

POST CARDS (p. 1189).

Inland, British Commonwealth etc. in (a) above:—

Single	2½ l.
Reply paid (2½d. stamp on each part)	5d.

Elsewhere abroad:—

Single	4d.
Reply paid	8d.

Limit of size for all destinations, *Inland* or *abroad*: maximum, 5½ inches in length, 4½ inches in width; minimum, 4 inches in length, 2½ inches in width.

PRINTED PAPERS, BOOKS (p. 1189).

Inland:—

Not exceeding 2 oz.	2½d.
Not exceeding 4 oz.	4d.
For each further 2 oz., or less	1d.

British Commonwealth and Foreign:—

For first 2 oz.	2d.
For each further 2 oz., or less	1d.

Exceptionally, newspapers, periodicals, books, pamphlets, maps and sheets of music which comply with the conditions shown in the Post Office Guide under *Printed Papers at Reduced Rates* may be sent *abroad* at the prepaid rate of 1½d. for the first 2 ounces and 1d. for each additional 2 ounces or fraction thereof.

LIMITS: Size, as for Letters; Weight: *Inland*, 2 lb. All destinations *abroad*, 6½ lb.; but a packet of books or booklets, sewn, bound or stapled within covers, up to 11 lb. may be sent *abroad*.

Unless stamped at least 3d., printed papers posted after a prescribed hour are liable to be held over until next day.

MAGAZINE POST

Canada and by direct steamship only:—

Not exceeding 6 oz.	1d.
Over 6 oz. to 1½ lb.	1½d.
Each further ½ lb. (up to 5 lb.)	½d.
Size limit: 24×18×18 in.	

COMMERCIAL PAPERS

British Commonwealth and Foreign only:—

Not exceeding 10 oz.	6d. (minimum charge)
Every further 2 oz., or less	1d.

LIMITS: Size, as for Printed Papers; Weight, *Brit. Commonwealth, Territories under British Trusteeship; British Postal Agencies in Bahrain, Muscat, Qatar and the Trucial States* 5 lb.; *Elsewhere*, 4 lb.

NEWSPAPERS

(See also p. 1189).

Inland (Newspapers "Registered at G.P.O."):—

Not exceeding 6 oz.	per copy 3d.
Every further 6 oz., or less	per copy 1½d.

LIMITS: 2 lb. in weight; in size as Letters.

Inland: Newspapers registered at the G.P.O. may be sent at printed paper rate; newspapers not registered are sent at the printed paper rate.

British Commonwealth and Foreign: See printed papers.

SAMPLES (See also p. 1189).

Inland (not to Irish Republic):—

Not exceeding 2 oz.	2½ l.
Not exceeding 4 oz.	4d.
Every additional 2 oz. or less	1d.

British Commonwealth and Foreign:—

Not exceeding 2 oz.	2d.
For each further 2 oz. or less	1d.

LIMITS: *Inland*: As for letters, weight 8 oz.; *Abroad*: *British Commonwealth, territories under British Trusteeship and British Postal Agencies in Bahrain, Muscat, Qatar and the Trucial States*, 24×12×12 in., 5 lb. *Elsewhere*: as for Letters B ii, 1 lb. If in form of roll, everywhere as for letters, A. To all overseas destinations the minimum limits of size are as for letters.

SMALL PACKETS (See also p. 1189).

(*British Commonwealth and Foreign*—certain countries only)

Not exceeding 10 oz.	10d (minimum charge)
For each further 2 oz. or less	2d.

LIMITS: Maximum size, as for letters A and Bii. Minimum limits of size as for letters; Weight, 2 lb.

INSURED BOXES (See also p. 1188).

(*British Commonwealth and Foreign*—certain countries only)

Not over 10 oz.	1s. 8d. (minimum charge)
For each further 2 oz. or less	4d.

Plus appropriate fee for insurance.

LIMITS: Maximum size, 12×8×4 in. Minimum size limits as for letters other than in the form of a roll; weight, 2 lb.

PARCELS

Should be marked "Parcel Post," and must be handed across the counter; postage must be prepaid by stamps, affixed by the sender. On Sundays parcels are not accepted or (except during Christmas) delivered. The name and address of sender should be inside and (not too prominent) on the outside of every parcel, and preferably be to the left of and at right angles to the name and address of the addressee.

A rural postman will accept any packets he can conveniently carry, except overseas parcels or overseas letters intended for insurance; but if on foot or cycle not more, without notice, than 15 lb. from one person. He may weigh parcels on request. Mail-drivers need not accept between regular stopping points.

Parcels to or from Irish Republic, Channel Is. or I. of Man are liable to customs duty: except in last case, the sender must declare contents when posting. Addressee must pay clearance fees (1s. or 2s.) if any duty be payable. Senders can undertake to pay customs charges of Irish Republic

and some overseas countries (a deposit is required). The sender of a parcel from the Channel Islands may also pay the customs charges etc., at the time of posting.

Inland:—(Limit of size: length, 3 ft. 6 in.; length and girth combined, 6 ft.):—

U.K. and Irish Republic:—

Not over 2 lb.	2s. 0d.	Not over 6 lb.	3s. 0d.
" " 3 lb.	2s. 3d.	" " 7 lb.	3s. 3d.
" " 4 lb.	2s. 6d.	" " 8 lb.	3s. 6d.
" " 5 lb.	2s. 9d.	" " 11 lb.	3s. 9d.
Not over 15 lb. (limit)		4s. 0d.	

AIR MAIL SERVICES

For mode of packing, prohibitions, limits of size, &c., see Post Office Guide.

Normal regulations as to make-up and acceptance of various categories of postal packets and parcels apply equally to air mail items. A blue air-mail label, obtainable free from post offices, must be affixed to each air mail item except letters, letter packets and postcards for Europe. Air mail labels should not be fixed to these latter items or delay will result. Special air-mail rates apply to correspondence for members of H.M. Forces overseas (see leaflet PL89).

Air Letters, postage 6d., written on special Air Letter forms may be sent to all countries outside Europe. The special forms may be obtained at post offices.

SECOND CLASS MAIL. Printed papers, Commercial Papers, Samples, Small Packets may be sent by air to countries outside Europe at the rates shown in col. 4 below. Minimum charges: Commercial Papers, 6d.; Small Packets, 10d. NEWSPAPERS. Publications registered at the G.P.O. as newspapers may be sent at the reduced rates indicated in the footnote below. There is no Second Class air mail service to Europe.

COUNTRIES OUTSIDE EUROPE

For air mail services to Europe, see above; Air Parcel Rates, pp. 1193-95. For details of insurance and times of posting at London Chief Office and of transmission to principal cities, consult G.P.O. Air Mail Leaflet at any Post Office.

European Countries

Letters, letter packets and postcards for all European countries, prepaid at the ordinary international postage rates, are in general despatched daily by air or surface transport, whichever offers earlier delivery. The rates are:—

Letters, 6d. for the first ounce,
4d. for each additional ounce.

Postcards, 4d.

For *Gibraltar* and *Malta* the rates are:

Letters, 3d. for the first ounce,
1½d. for each additional ounce.

Postcards, 2½d.

Air mail labels should not be used.

Air Parcel Post to Europe. Rates are included in the Overseas Parcel Post tables, see pp. 1193-95.

Countries Outside Europe

Rates for letters, postcards and second class mail appear below; for air parcel rates, see pp. 1193-95.

GENERAL REGULATIONS

EXPORT RESTRICTIONS.—Under Board of Trade regulations many kinds of goods, including certain foodstuffs, may be sent abroad (including Irish Republic) only under the authority of an export licence. Enquiries in the matters should be addressed to the Controller, Export Licensing Branch, Board of Trade, Gavelle House, 14, Bunhill Row, London, E.C.1.

Under the Defence (Finance) Regulations, senders of trade letter packets or parcels exceeding £2,000 in value to most foreign countries, including the U.S.A., and also to Canada (including Newfoundland), must furnish with the parcel a currency declaration (form C.D.3) which, together with explanatory notices, may be obtained from banks.

Senders of private gift packets or parcels exceeding £100 in value must furnish with the packet or parcel a currency declaration C.D.3.

PROHIBITED AND DUTIABLE ARTICLES.—Among prohibitions are offensive or dangerous things, packets likely to impede the P.O. sorters, and certain kinds of advertisement. To Channel Islands, and I. of Man dutiable articles must be sent in Parcels. Abroad generally they may be sent in Parcels, in Insured Boxes and Small Packets (to those countries which accept them) or (where the "Green Label" system applies) in Letters and in some cases sample packets.

CERTIFICATE OF POSTING.—Given as a matter of course for registered and insured items. May also be obtained for ordinary parcels (no charge) and other unregistered packets (fee, 1d.).

RECORDED DELIVERY (inland, *not to Irish Republic*).—This service provides for a record of posting and delivery. Money and jewellery are not allowed, and contents must not exceed £2 in value. The service does not apply to parcels.

UNPAID PACKETS, except Business Reply packets and redirected parcels are charged *double postage on delivery*; **UNDERPAID PACKETS**, *double the deficiency*.

UNDELIVERABLE POSTAL PACKETS.—*Inland packets chargeable with a postage of 3d. or more*, undelivered, are returned to sender without charge, if his address is found either outside or inside. If the sender's address is not available, letters containing nothing of importance are destroyed; packet containing anything of importance, and parcels, if not applied for, are generally disposed of after 3 months, or if perishable are dealt with as requisite. *Packets chargeable with postage not exceeding 2½d.* are returned to sender only on payment of a second postage, and if name, address and request for return appear on outside; those without such request are disposed of. *British packets undelivered abroad* are returned to sender here on payment of charges due; printed papers of no value only if request for return appears outside in a language known in the country of destination. Magazine Post packets are charged with return postage, when return is requested. Parcels further incur other charges unless abandonment is requested *at the time of posting*.

REPLY COUPONS, for the purpose of prepaying replies to letters, are exchangeable abroad for stamps representing the minimum letter postage rate from the country concerned to the U.K. Price (valid in all countries of the Universal Postal Union), 1s.: (valid within the Commonwealth and Irish Republic only), 5d. Sold at Chief offices.

POSTE RESTANTE (solely for the accommodation of travellers, and for three months only in any one town).—A packet may be addressed as a rule to any Post Office except Town Sub-Offices, and should have the words "Poste Restante" or " " to be called for" in the address. If addressed to initials, fictitious names, or Christian name only, it is treated as undeliverable. Applicants must furnish sufficient particulars to ensure delivery to the proper owner. Redirection from a Poste Restante is not undertaken for more than 14 days unless longer (up to 3 months) is applied for. Letters at a seaport for an expected ship are kept 2 months; otherwise letters are kept for 2 weeks—or for 1 month if originating from abroad—at the end of which time they are treated as undeliverable, unless bearing a request for return at or before the end of the period.

REDIRECTION.—(1) By agent of addressee: *Packets other than parcels and business reply* may be re-posted free not later than the day after delivery (not counting Sundays and public holidays) if un-

opened and not tampered with, and if original addressee's name is unobscured. *Parcels* may be re-directed free of charge, within the same time limits, only if the original and the corrected addresses are both within the same Town Delivery Area (or within the London Postal Area). *Registered packets*, which must be taken to a Post Office, are *re-registered* free only up to day after delivery. (2) By the Post Office (not undertaken when other persons remain at the address). Requests for redirection of *letters, &c.*, should be on printed forms, obtainable from the postmaster, and must be signed by the persons to whom the letters are to be addressed. Redirection is free for 3 months (except for parcels re-directed to a different Town Delivery Area, see above); thereafter for each different surname and each new address costs 5s. for 12 months, and 10s. for each subsequent year. Separate forms must be filled in for the forwarding of *telegrams*.

REGISTRATION, INLAND.—All kinds of postal packets intended for registration should be marked "Registered" in bottom left-hand corner, and must be handed to an officer of the Post Office, and a receipt taken. The packets must be made up in a reasonably strong cover appropriate to their contents. Parcels (or the string with which they are tied) and letters must be fastened with adhesive (if tape is used it must be transparent and each piece must be signed or distinctively marked), or sealed with wax, lead, &c. Minimum fee 1s. 6d., exclusive of postage. Advice of delivery, a further 6d. The latest time for registering is usually half an hour before the latest time for posting ordinary packets. Compulsory registration is applied to (a) any packet apparently meant for registration and wrongly posted (1s. 6d. less any prepaid excess postage); (b) packets found open (or undeliverable) and containing any bank or currency note, coin, jewellery, stamps, uncrossed bearer cheques, uncrossed postal orders without payee's name, &c., in each case 10s. or more in value (1s. 6d.).

COMPENSATION, INLAND.—Subject to certain prescribed regulations which are fully set forth in the Post Office Guide, the Post Office pays compensation for (i) loss of or damage to registered letters and parcels, (ii) though not as a legal right, for loss of or damage to unregistered parcels and for unregistered packets conveyed by Express Messenger all the way. The onus of making up properly any packet sent by post and of packing adequately any article or articles enclosed therein lies on the sender, and the Post Office does not accept any responsibility for loss arising from faulty or inadequate packing. No compensation is paid for consequential injury or damage arising in respect of anything sent by post. *Registered letters and parcels (including items sent to the Irish Republic):* The fees for registration are 1s. 6d. covering compensation up to £20; 1s. 7d., £40; and 1d. for each additional £20 up to the maximum of 3s. 1d. for £400. (No legal right to compensation exists in respect of registered letters and parcels sent to and from Irish Republic.) *Unregistered parcels and unregistered packets conveyed by Express Messenger all the way:* Maximum compensation £5 (£4 for unregistered parcels sent to or received from Irish Republic).

Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, etc.) is only given if the money is sent by *registered letter* post in one of the special envelopes sold officially (see p. 1189) and, in the case of paper money, if particulars (for identification) are kept; the maximum compensation for coin, which must be packed so as not to move about, is £5.

Compensation cannot be paid for loss or damage in the case of any packet containing anything not legally transmissible by post; and for fragile articles only if they have been adequately packed and the cover is conspicuously marked "Fragile, with care." No compensation is paid for deterioration due to delay of perishable articles or for damage to exceptionally fragile articles, liquids or semi-liquids sent by letter or parcel post to or from Irish Republic whether registered or not.

REGISTRATION, BRITISH COMMONWEALTH AND FOREIGN (except for parcels and a magazine post packet for Canada, including Newfoundland), is in force to all countries with the exception of Chagos Islands, North Korea and North Viet-Nam. Valuable articles may not be sent in unregistered letters. Fee, 1s. 6d. If claimed within a year, compensation (in the U.K., £2 18s.) is paid to the sender for entire loss of registered packets while in the custody of a country in the Universal Postal Union, subject to certain conditions.

INSURANCE, BRITISH COMMONWEALTH AND FOREIGN, may be effected on packets to many countries at the following rates:—1s. 8d. for £24; 2d. each further £12 up to 6s. 10d. for £396 and 7s. for £400 (lower maxima in many countries). For H.M. Ships abroad and also members of H.M. Army and Air Force overseas using closed Forces addresses (e.g. British Forces Post Office followed by a number) only parcels are insurable, up to £50. Packets containing no articles (besides correspondence) but valuable papers (banknotes, &c.) or valuable documents (plans, &c.) can be insured as letters; other valuable articles should be sent as insured parcels, or as "insured boxes."

COMPENSATION up to a maximum of 93s. may be given for loss or damage in the U.K. to uninsured parcels to or from most Commonwealth and Foreign Countries, if certificate of posting is produced.

No compensation will be paid for any loss or damage due to the act of the Queen's Enemies.

INSURED BOX POST.—Jewellery and precious articles (not letters or paper valuables) may be sent in insured boxes to certain countries. Customs declarations must be filled in.

CASH ON DELIVERY SERVICE, INLAND (not to or from Irish Republic, nor to H.M. Ships).—A sum (Trade Charge) up to £40 can, under certain conditions, be collected from addressee and remitted to sender of a parcel or registered letter posted at a Money Order Office, or of goods consigned by railway. Fees (extra to usual postal or rail charges): For Trade Charge up to £1, 1s. 2d.; £2, 1s. 4d.; £5, 1s. 6d.; and for each further £5 or part thereof, 2d. An additional charge of 1s. is made on consignments sent by rail.

CASH ON DELIVERY, BRITISH COMMONWEALTH AND FOREIGN.—Applicable to parcels only, but not to all countries, nor to H.M. Naval and Military Forces and R.A.F. serving overseas. Fees for collection: 4½d. for Trade Charge (amount to be collected) not exceeding £1, with 2½d. extra for each additional £1 of Trade Charge up to the maximum, which is usually £40 (fee 8s. 6d.), but in some countries less. Addressee has also to pay on delivery, besides Customs, if any, a further fee (4d. in U.K.) not repayable. If Trade Charge cannot be collected, the rules for undeliverable parcels apply.

EXPRESS and SPECIAL SERVICES (INLAND).—In general the express services are limited to the hours of telegraph business, but the times vary according to the service used and local conditions. No. (4) (below) is available on Sundays only. Waiting fees: 10 minutes free, each further 10 minutes or less, 4d.:—(1) *All the way*, by P.O.

messenger, of packets, conspicuously marked "Express" above the address, handed over the counter. Inclusive charge, 1s. per mile, or part of a mile, with 3d. on each separate packet after the first. Live animals, liquids, and money may be delivered by this service. (2) *After transmission by post*, on addressee's application (1s. per mile, or part of a mile, and 2d. for every ten or less additional packets). (3) *After transmission by post*, at sender's request "Special Delivery" from the ordinary delivery office, if messengers are available (1s. + postage). Packets must be marked "Express," and letters bear a broad blue or black vertical line back and front. A similar line must be drawn completely round a packet or parcel. (4) *Special delivery on Sunday of postal packets (except parcels handed in on Saturdays)*. Limited inter-city services, for London, Belfast, and certain provincial cities (except that the service is not in operation from Southampton to Belfast) are available only: (1) Sundays: reciprocally between certain towns as shown in the Post Office Guide; (2) Good Friday: to London only from towns in (1). Delivery is made from offices only during periods when they are open for telegraphic business. The banding-in offices in London are:—The London Chief Office, King Edward St., E.C.1., W. and S.W. District Offices, and (Branch Offices) Camberwell Green, Clapham Common, Hammersmith Broadway, Holloway, Leicester Square, Stratford, and Swiss Cottage. Packets, marked "Express: Sunday Delivery," must be handed in in time to catch preceding night mails (in London 5.15 p.m.—6.30 p.m. for provincial towns). The latest time of posting to Belfast should be ascertained at selected office of posting. Fee is 3s. 0d. in addition to postage. Not available for parcels. (5) ("Rail-ex.") Postal packets not liable to registration are despatched by rail, met, and specially delivered in Great Britain, Douglas (I.O.M.), Northern Ireland, Jersey and Guernsey. Inclusive charges 2 oz., 6s.; 1 lb. (maximum) 7s. 0d.; but packets banded in in Northern Ireland or forwarded from Jersey and Guernsey to Great Britain, Douglas or N. Ireland may not exceed 2 oz. (6) *A Railway Parcel* is similarly accelerated at the cost of a telegram, of railway charges, and of Service (1) at both ends of its journey. It should be marked "Railway Parcel, to be handed to Post Office messenger at Station."

RAILWAY LETTERS, &c.—A letter, not liable to registration, may be handed in at the parcel or booking office of a railway station, at any time when the station is open to the public, for conveyance by the next available train. A railway letter may either be addressed to be called for at a station, or to the residence of the addressee in which case it is posted at the station named in the address. The service is available between any two stations in Great Britain and Northern Ireland, between Great Britain and Jersey, Guernsey and Douglas (I.O.M.), and from Great Britain and Northern Ireland to the Irish Republic. It is not available at or to stations of the London Transport Executive. Fees (besides postage): at stations in Great Britain, Jersey, Guernsey and Douglas (I.O.M.), 2 oz., 1s. 0d.; 4 oz., 1s. 8d.; 1 lb. (maximum), 2s. 7d.; at stations in Northern Ireland, 2 oz. (maximum), 7d. The maximum weight for letters to the Irish Republic is 2 oz. Except on Sundays, or in Irish Republic, the letter can be delivered Express under Service (3), or directly from the station (Service (1)) by wiring for messenger to meet it. For other combinations of rail and express, see preceding paragraph, Services (5) and (6).

AIRWAY LETTERS.—On certain internal air routes operated by the British European Airways Cor-

poration, letters may be handed in at the airport or town terminal for conveyance by the next available direct air service to be transferred to the post at the distant airport or town terminal or to be called for at the airport or town terminal. Fees (hesides postage): 2 oz., 1s.; 4 oz., 1s. 8d.; 1 lb. (maximum), 2s. 7d. The conditions on which this service operates are, in general, similar to those applying to the Railway Letter Service. The service is not available to the Irish Republic or to any country overseas. Full information can be obtained from any office of B.E.A.C.

INTERNATIONAL EXPRESS SERVICE.—Delivery by special messenger of correspondence (including parcels) to or from certain countries. In some cases the service is restricted to certain towns. 1s. is paid by the sender, the rest, if any, by addressee, according to the local regulations. (See P. O. Guide.)

POST CARDS.—Minimum size $4 \times 2\frac{1}{2}$ in., maximum $5\frac{1}{2} \times 4\frac{1}{4}$ in. The left-hand half of the address side may be used for correspondence, inland or abroad. Plain cards, if as stiff as official cards and not under $\frac{1}{16}$ th inch thick, may also be used both inland and abroad.

Reply Post Cards for abroad must have the heading *Carte Postale avec réponse payée* on first part, and on the second part (valid only to country of origin) *Carte Postale—Réponse*.

BUSINESS REPLY SERVICE (Inland, excluding Irish Republic). This service enables a person or firm to receive cards, letters, etc. from clients without prepayment of postage, the postage together with a fee of 1d. being paid by the addressee on each card or letter delivered.

A licence to use the service must be obtained from the Post Office.

POSTAGE FORWARD PARCEL SERVICE.—This service enables firms to receive parcels from clients without prepayment of postage, by means of a special label. A licence must be obtained from the local Head Postmaster.

PRINTED PAPER POST (including former BOOK POST).—For certain printed or written matter (p. 1184).

By this post may be sent books and other works of a literary character, with or without written dedications, and in the inland service any other written, typed or printed matter not being in the nature of a letter, drawings, paintings, photographic prints, engravings, maps, &c., together with normal non-fragile binding and anything necessary for safe transmission. Commercial printed forms, legal documents, printers' copy and proofs, examination papers, answers and corrections, the writing on which refers solely to the subject matter of the document, Christmas and picture cards with date, names and addresses of sender and addressee, and with conventional formulas not exceeding 5 words or initials, are also admitted, and circulars (if in characters resembling typewriting, only under special conditions). To overseas, only printed matter in general is admitted as Printed Papers; items written or drawn, such as receipts, invoices and statements of account, admissible in the inland printed post service, go only as Commercial Papers, and there are other differences. Written chess-moves and puzzle-solutions, also blank stationery, are inadmissible. Printed papers being subject to examination in the post, the cover, if any, must be capable of easy removal and replacement for purposes of examination, i.e., without breaking, tearing, ungluing, or cutting. (For full conditions see the Post Office Guide, or free leaflet P. 386.)

ARTICLES FOR THE BLIND (Inland, including Irish Republic). Books, papers, literature and specified articles specially adapted for the use of the blind are admissible subject to certain conditions. A packet should bear on the outside the indication "Articles for the Blind" and the name and address of the sender. Packets must be capable of easy examination in the post. Rate:—2 lb., $\frac{1}{2}$ d.; 5 lb., 1d.; 8 lb., 1 $\frac{1}{2}$ d.; 11 lb., 2d.; 15 lb., 2 $\frac{1}{2}$ d. Limits: weight, 15 lb.; size, as for letters.

BLIND LITERATURE, COMMONWEALTH AND FOREIGN (in other respects treated as Printed Papers):—Papers, periodicals and books, if printed in special type (also plates for embossing blind literature, and voice recordings and special paper intended solely for the use of the blind) subject to certain conditions of posting, marked outside "Literature for the Blind", with name and address of sender. Packets must be capable of easy examination in the post. They may be sent post free by surface route to all parts.

SAMPLE POST (not to Irish Republic).—Restricted to bona-fide Trade Samples, without saleable value; but keys sent unaccompanied, printers' blocks, fresh cut flowers, and certain scientific specimens can be sent abroad by Sample Post. Packets must be capable of easy examination in the post. (See p. 1184.)

SMALL PACKETS POST (Commonwealth & Foreign).—For small articles of merchandise by Printed Paper mails. Registration is allowed; not insurance. Available only to certain countries. A green Customs label must be affixed and, in certain cases, Customs declarations prepared. (See p. 1184.)

NEWSPAPER POST (INLAND).—For newspapers "registered at the G.P.O." (p. 1184).

The cover, if any, must be open at both ends and easily removable, and copies should be folded so that title is readily inspected. No writing or additional printing is permitted, other than the words "with compliments", name and address of sender, request for return if undelivered and a reference to a page.

Newspapers not "registered at G.P.O." or supplements to registered newspapers apart from their ordinary publications should be sent at printed paper rate.

STAMPS, ENVELOPES, POST CARDS, &c.

Stamps of reigns before that of King George V are no longer valid.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties) are sold for the respective values of $\frac{1}{2}$ d., 1d., 1 $\frac{1}{2}$ d., 2d., 2 $\frac{1}{2}$ d., 3d., 4d., 4 $\frac{1}{2}$ d., 5d., 6d., 7d., 8d., 9d., 10d., 11d., 1s., 1s. 3d., 1s. 6d., 2s. 6d., 5s., 10s., and £1. Books containing 4 each at 3d., 1 $\frac{1}{2}$ d., 1d., $\frac{3}{4}$ d. 2s.; 6 3d., 6 1 $\frac{1}{2}$ d., 6 2d. and 6 $\frac{3}{4}$ d. stamps, 3s.; 18 3d. stamps, 4s. 6d.; 12 3d. and 6 each of 2 $\frac{1}{2}$ d., 1d. and $\frac{1}{2}$ d. stamps, 5s.; and 30 3d., and 6 each of 2d., 1 $\frac{1}{2}$ d., 1d., and $\frac{1}{2}$ d., 10s. Rolls of $\frac{1}{2}$ d., 1d., 1 $\frac{1}{2}$ d., 2d., 2 $\frac{1}{2}$ d., 3d. or 4d. stamps are also sold, joined lengthwise or sideways and rolls of 6d. stamps joined lengthwise.

REGISTERED LETTER ENVELOPES with a 1s. 9d. embossed stamp (1s. 6d. for registration and 3d. for postage), are of four sizes: F. 5 $\frac{1}{2}$ in. \times 3 $\frac{1}{2}$ in. or G. 6 $\frac{1}{2}$ in. \times 3 $\frac{1}{2}$ in., 1s. 10 $\frac{1}{2}$ d. each; H. 8 in. \times 5 in., 1s. 11d. each; K. 11 $\frac{1}{2}$ in. \times 6 in., 1s. 23d.

FORCES AIR LETTER FORMS issued against purchase of 3d. stamp.

LETTER CARDS with 3d. stamp: 4d. each.

POST CARDS, with impressed 2 $\frac{1}{2}$ d. stamp: 3d. each.

EMBOSSÉD ENVELOPES with 3d. stamp: "A" ($4\frac{1}{2} \times 3\frac{1}{2}$ in.) or "B" (6.4 \times 4.5 in.), 4d. each. Air Letter Forms impressed with 6d. stamp, 6d. each.

Embossed or impressed postage stamps cut out of envelopes, post cards, letter cards, air letter forms, newspaper-wrappers, or telegram forms, may be used as adhesive stamps in payment of postage or telegrams provided they are not imperfect, mutilated, or defaced in any way.

MONEY ORDERS

Advice of Payment: 6d. inland (and to Irish Republic), 3d. overseas orders (to certain countries). Payment may be stopped (fee 9d.); or deferred up to 10 days in case of Ordinary Inland Money Orders. Inland orders (including those for Irish Republic) may be crossed for payment through a bank.

Inland Ordinary Money Orders (and to Irish Republic).

The poundage charged is, for sums not exceeding £10, 1s. 0d.; and for each additional £10, 2d., to £50 (maximum), 1s. 8d. No order may contain a fractional part of 1d. The rules and regulations are on the forms issued. No poundage is charged for M.O. in payment of many Revenues (e.g., Income Tax) if demand note is produced.

Inland Telegraph Money Orders (and to Irish Republic).

Money may be transmitted by this means from most Money Order offices which despatch telegrams, and paid at most of those which also deliver telegrams, and at some other offices. On Sundays, Christmas Day and Good Friday, Inland telegraph money orders for amounts not exceeding £5 are issued at all Money Order Offices which transact telegraph business at the times when these offices are open for telegraph counter business and sums up to £5 are payable at, or in the delivery areas of, London Chief Office, the District Offices, and some Branch Offices in London, and during the hours when telegraph business is transacted at those offices outside London which open on Sunday.

Poundage at the same rate as for Ordinary Inland Money Orders, plus supplementary fee of 6d., and cost of official Telegram of Advice, 3s. 0d. for Inland Orders and 3s. 6d. for Irish Republic Orders.

Ordinary Money Orders for Abroad.

Poundage, up to £2, 2s.; £5, 3s.; £10, 4s., and thereafter 2s. per £10 or part thereof. Limits of amount vary according to destination but in any case may not exceed £40; validity, normally 12 months.

Telegraph Money Orders for Abroad.

Poundage as in last paragraph, plus cost of official Telegram of Advice (at Letter Telegram rate, if desired, to certain countries) plus a supplementary fee.

Application to remit money orders to countries outside the Scheduled Territories (formerly known as the sterling area) must be made on a special declaration form upon which the purpose of the remittance must be stated. This form is obtainable at any money order office, where it may be ascertained whether any particular country with which a money order service is in operation is outside the Scheduled Territories.

POSTAL ORDERS

Postal Orders (British pattern) are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weekdays. They are also issued and paid in most countries within the Commonwealth. Transmission of postal orders to Canada or any other country outside the Scheduled Territories (formerly known as the Sterling Area) is prohibited except to members of H.M. Forces under special arrangements, particulars of which may be obtained at any Post Office transacting Postal Order business. They are paid (but not issued) in Irish Republic. They are printed with a counterfoil, for every multiple of 6d. up to 5s., for 6s., and by 1s. steps up to £1 1s. then for £2 and every multiple of £1 up to £5. Adhesive, unmarked current British Postage Stamps not exceeding two in number, if affixed in the 2 spaces provided, increase the value of an Order by not more than 5d. (orders up to 4s. 6d.) or 11d. (orders of 5s. and upwards). Poundage: 6d and 1s., 2d.; 1s. 6d. to £1 1s., 3d.; £2 to £5, 6d. The name of payee must be inserted. If not presented within six months of the last day of the

month of issue, Orders must be sent to the local Head Postmaster, or in London to the District Postmaster, for verification, and commission equal to the original poundage will be charged.

INLAND TELEGRAMS

Telegrams are accepted during counter business hours at any post office or railway station at which telegraph business is transacted. They may also be handed with the necessary payment to messengers delivering telegrams or express letters. Telegrams may be tendered by telephone at all times. Rate, 12 words or less 3s. 0d. (to Irish Republic 12 words or less 3s. 6d.), each further word 3d. Standard Greetings telegrams on appropriately designed forms in golden decorative envelopes cost 3s. 6d. for 12 words or less, each extra word 3d. Greetings telegrams for special occasions on a large de luxe folded card with matching envelope cost 5s. 0d. for 12 words or less, each extra word 3d. Greetings telegrams may be tendered by telephone or handed in any day prior to day of delivery. Priority rate (not available to or from Irish Republic) 1s. extra. A redirection charge of 3s. 0d. per telegram is made if the original and new addresses are in the same place, delivery area or London Postal District. In all other cases the redirection charge is at the ordinary inland rate. Telegrams, except Press telegrams, handed in on Sundays and (exc. Scotland) Good Friday or Christmas Day are charged 1s. 6d. extra. Replies may be prepaid up to 12s.; the reply vouchers may be used in payment or part payment of any Post Office telegram or any telegraph, telex or telephonic account rendered by the Post Office, or its value refunded to sender of original telegram. Receipt for charges free on request. Certified copy 1s. 6d. There is no charge for delivery in the United Kingdom. In the Irish Republic delivery is free to addresses within 1 mile of the delivery office; beyond that any necessary charge will be collected on delivery.

TELEGRAPH OFFICES ALWAYS OPEN IN LONDON.—Chief Office (King Edward Street, E.C.1), Leicester Sq., Charing Cross Road, W.C.2.

OVERSEAS TELEGRAMS

The charges for ordinary or FULL RATE telegrams from the United Kingdom to places abroad are shown below and on pp. 1193-95. The minimum charge for an ordinary telegram is as for 7 words. To any place in the British Commonwealth the full rate does not exceed 1s. 10d. per word. Urgent telegrams may be sent at double the ordinary rate.

For telegrams of a social character the GLT (Commonwealth Social Telegram) service is available to Commonwealth countries. The charge is 9s. 2d. for 11 words or less (including the indicator = GLT=), and 11d. for each word after 11 except to Canada, Cyprus, the British West Indies, Bermuda, British Guiana, and British Honduras to which lower charges apply.

Most countries admit Letter Telegrams at half the full rate but there is a minimum charge as for 22 words. Letter Telegrams, which must be written in plain language, are subject to delay in transmission in favour of ordinary telegrams.

Phototelegrams, i.e. pictures, photographs, drawings, plans, printed, typed or written documents may be telegraphed in facsimile to many places in the world. Full particulars of all telegraph charges and services available to any country will be given on enquiry at any Postal Telegraph or Post Office Cable & Wireless Office.

RADIOTELEGRAMS

Radiotelegrams for transmission to ships at sea in any part of the world may be handed in at any

Postal Telegraph Office or dictated over the telephone. The standard rate of charge for messages sent to ships through coast stations in the British Isles is *xs. 8d.* a word; there is a reduced rate of *rs.* a word for messages to ships regularly engaged on short voyages to or from ports in the British Isles. The address should contain (1) the name and/or rank of the addressee, (2) the name of the ship, and (3) (a) the name of a coast station in the British Isles if the sender knows that the ship is within range of that station; or (b) the name of a foreign coast station if the message is to be routed through such a station; or (c) if the sender does not know the name of the appropriate coast station, standard rate messages should be addressed to *Portishzad Radi* or *Wireless*, and reduced rate messages to *Wick Radio*.

Radiotelegrams may be sent to service personnel on board H.M. Ships in foreign waters at a charge of *rs. 1d.* a word and in the Home Fleet at a charge of *8½d.* a word. The address should contain (1) the name of the addressee and his rank or rating, (2) the word "Warship" (or "Submarine") (3) the name of the ship (or identifying letters and number) and (4) the word "Admiraltyradio" (or, in the case of the Home Fleet, the words "Homewaters Admiraltyradio").

Radiotelegrams may also be sent to R.A.F. vessels at a reduced rate of *8½d.* per word. Such radiotelegrams should be addressed in the same way as for commercial vessels and in addition should include the words R.A.F. Vessel before the name of the ship.

The minimum charge is as for seven words.

INLAND TELEPHONES

The quarterly rental for single exclusive lines for residential subscribers is *£3 10s.*, for business subscribers it is *£4.* Shared service, in which two subscribers use one line but enjoy nearly all the facilities of exclusive line service, is offered under certain conditions. For this service a rebate of *10s. 0d.* is allowed from the normal quarterly rental for a single exclusive line. Calls to exchanges within the local call area are charged *2½d.* from residence telephones and *3d.* from business telephones (*4d.* from a call office). Trunk call charges (*viz.*, to exchanges outside the local call area) vary with distance but do not exceed *3s. 6d.* by day (for 3 minutes) and *2s.* during the cheap rate period which is 6 p.m. to 6 a.m. every night and all day Sunday (*7s. 6d.* and *3s. 3d.* to Irish Republic). Call office charge *3d.* extra. Personal calls (to specified person) *1s. 6d.* extra (cheap rate period *9d.*); if the person cannot be found nothing further is charged. Where subscriber trunk dialling facilities are provided local and dialled trunk calls are charged in *2d.* units (*3d.* from a call office); the length of time per unit depends on the distance of the call, from 3 minutes for local calls to 12 seconds for distances over 50 miles (the time allowance is increased during the cheap rate period). For fuller information see Preface to Telephone Directory.

TELEX SERVICE

Annual rental of teleprinter, associated equipment and line to Telex exchange is *£160* per annum in most cases. Where nearest Telex exchange is more than 30 miles distant an additional rental based on the excess mileage applies. Charges for inland calls between exchanges 35 miles or more apart are about half equivalent charges for daytime telephone calls. International calls to European countries are about two-thirds of equivalent charges for telephone calls; to United States of America and to the Republic of South Africa charges are the same as for telephone calls, *i.e.* *£1* per minute (minimum

three minutes). Automatic equipment allowing messages to be sent at the maximum speed of 66 words per minute can be rented in addition. Descriptive booklet available from all Telephone Managers; for local address see telephone directory.

GENERAL SUNDAY AND HOLIDAY ARRANGEMENTS

(For Express services see p. 1188)

On SUNDAY THROUGHOUT THE U.K. *no Parcel Post, non-telegraphic Money Order, Postal Order* business is transacted, nor is there a delivery of letters, &c. There is a collection for night despatch in most places. IN LONDON, the Chief Office and Leicester Square Branch Office are open always, and some other offices are open from 9 a.m. to 1 p.m. for stamps, telegrams, and with some exceptions telegraph money orders up to *£5.*, savings bank withdrawals up to *£10.*, and National Savings Stamps encashment up to *£3.* OUTSIDE LONDON, most Head Offices and some country telegraph Sub-offices open 9-10.30 a.m. (Scotland 9-10 a.m.) for stamps, telegrams, registration and with some exceptions telegraph money orders up to *£5.*, Savings Bank withdrawals up to *£10.*, and National Savings Stamps encashment up to *£3.*; but all town Sub-offices, and most non-telegraph country offices, are closed.

Christmas Day, Boxing Day and Good Friday

London: One delivery of letters and parcels on Christmas Day; none on Boxing Day and Good Friday. Most offices are closed on Christmas Day. Selected offices open from 9 a.m. to 1 p.m. for all classes of business on Boxing Day and for "Sunday" business on Good Friday.

Outside London: In Scotland, normal weekday deliveries; offices open as usual on Boxing Day and Good Friday; on Christmas Day some town sub-offices are shut, and after 1 p.m. many chief offices are open only for telegraph business. In England, Wales and Northern Ireland one delivery of letters and parcels on Christmas Day and Good Friday; none on Boxing Day; offices are closed on Christmas Day; head offices and some country telegraph sub-offices are open from 9 a.m. to 10.30 a.m. for all classes of business on Boxing Day and for "Sunday" business on Good Friday.

Other Public Holidays

In Scotland on New Year's Day office hours and classes of business are as on Sundays; no delivery of letters and parcels and no collection. Post Office counter and postal services on other public holidays in the U.K. vary in accordance with local conditions—details may be obtained from the local Head Postmaster.

OVERSEAS TELEPHONES

The caller should ask for CONTINENTAL or INTERNATIONAL Service. Callers in London with Dial Telephones with letters should dial "104" or "108." The charges shown are minimum rates for a call of three minutes duration, each further minute or part thereof costing one-third of this charge. Transferred charge calls are possible with certain countries. Details of countries and rates will be advised by the Continental and International Exchange.

Continental Service.

The rates quoted are for calls from all places in Great Britain. Northern Ireland, the Isle of Man and the Channel Islands to the first zone of the country concerned. For *Personal Calls* an additional charge equivalent to one minute's conversation is made.

International Service.

Minimum rates, the same from all parts of Great Britain, Northern Ireland, the Isle of Man and the Channel Islands are shown below. Hours of Service to most countries are limited. A person to person call may be booked without extra charge; if it fails (or call is cancelled) a Report Charge is made (4s. to 8s. 6d.) but not if call matures. On Radio Services a time allowance is made for interruption by adverse conditions. A limited duration facility (minimum 3 mins.) is available

enabling connection to be terminated after a specified period of effective conversation. A reduced rate (to p.m. to 10 a.m. on weekdays and all day on Sundays) is available on services with Canada, U.S.A., the West Indies, some South American and other countries.

Ships Services

Long, Medium and Short Range Ships' Services are also available between telephone subscribers in the United Kingdom and suitably equipped ships (see Post Office Guide).

WEIGHTS AND MEASURES

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1873 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

New definitions for an *international yard* and *pound* were adopted on Jan. 1, 1959, by the standards laboratories of the United Kingdom, Canada, Australia, New Zealand, South Africa and the United States:

international yard = 0.914 4 metre.

international pound = 0.453 592 37 kilogramme.

All non-metric calibrations carried out by the laboratories in science or technology are now made in terms of the new definitions, which have, however, no statutory force in the United Kingdom and may not be used for trade purposes in this country.

Apothecaries' Weight

Measures of Weight.

20 grains = 1 scruple (℞).
3 scruples = 1 drachm (℥).
8 drachms = 1 ounce.

Measures of Capacity.

60 minims (*min.*) = 1 fluid drachm.
8 fluid drachms = 1 fluid ounce.
5 fluid ounces = 1 gill.
4 gills = 1 pint.
8 pints = 1 GALLON.

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' *drachm* is not the same as the Avoirdupois *drachm*, and is spelled differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437.5 grains). A fluid *drachm* (54.6875 grains) is equal in weight to TWO Avoirdupois *drams*.

Avoirdupois Weight

7000 grains (*gr.*) = 1 pound (*lb.*).
16 drams (*dr.*) = 1 ounce.
16 ounces = 1 POUND.
14 pounds = 1 stone.
28 pounds = 1 quarter (of a *cwt.*).
4 quarters (112 *lb.*) = 1 hundredweight (*cwt.*).
20 hundredweight (2,240 *lb.*) = 1 ton.

Troy Weight

24 grains = 1 pennyweight (*dwt.*).
20 *dwt.* = 1 Troy ounce.

For gold and silver the ounce, divided decimally, and *not* into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce = 480 Avoirdupois grains (31.1035 Grammes) in weight. A Troy POUND (= 5,760 grains) is legalized in the United States.

Jewellers' Weight

The metric *carat* of 200 milligrammes is the legal standard of weight for precious stones and pearls.

Measures of Capacity

4 gills = 1 pint.
2 pints = 1 quart.
4 quarts = 1 GALLON.
1 gallon = 160 fluid ounces
= 277.274 cubic inches.

2 gallons = 1 peck.
4 pecks = 1 bushel.
8 bushels = 1 quarter.
A chaldron is 36 bushels = 4½ quarters.

Measures of Length

1 mil = 1/1000 inch.
12 inches (*in.*) = 1 foot (*ft.*).
3 feet = 1 yard (*yd.*).
6 feet = 1 fathom.
5½ yards = 1 rod or pole or perch.
22 yards = 1 chain = 100 links.
10 chains = 1 furlong.
8 furlongs = 1 mile = 1,760 yards.

Square or Surface Measure

144 sq. inches = 1 sq. foot.
9 sq. feet = 1 sq. yard.
90½ sq. yards = 1 sq. rod, or pole or perch.
40 sq. rods = 1 rood.
4 roods = 1 acre.
10 square chains = 1 acre = 4,840 sq. yards.
640 acres = 1 square mile.

Cubic Measure

1,728 cubic inches = 1 cubic foot.
27 cubic feet = 1 cubic yard.

Angular or Circular Measure

60 seconds (") = 1 minute (').
60 minutes = 1 degree (°).
90 degrees = 1 right angle or quadrant.
Diameter of circle × 3.1416 = circumference.
Diameter squared × .7854 = area of circle.
Diameter squared × 3.1416 = surface of sphere.
Diameter cubed × .5236 = solidity of sphere.
One degree of circumference × 57.3 = radius.*
Diameter of cylinder × 3.1416; product by length or height, gives the surface.
Diameter squared × .7854; product by length or height, gives solid content.

* Or, one radian (the angle subtended at the centre of a circle by an arc of the circumference equal in length to the radius) = 57.3 degrees, nearly.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

Water Measures.

Cubic inch. = 252.458 grains.
Gallon (277.274 cu. in.) . . . = 10 lb. (distilled).
Cubic foot. = 62.321 lb.
35.943 cubic ft. (224 gals.) = 1 ton.
Water for Ships: Tun, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

An *Inch of Rain* on the surface of an acre (43,560 sq. feet) = 3,630 cubic feet = 100.992 tons.

Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186.963 gallons, weighing 16 cwt. 2 qrs. 21.6 lbs. in addition to its own weight.

Million, Billion, etc.

Value in the United Kingdom

Million. thousand × thousand (10⁶)
Billion. million × million (10¹²)
Trillion. million × billion (10¹⁸)
Quadrillion. million × trillion (10²⁴)

Value in U.S.A.

Million. thousand × thousand (10⁶)
Billion. thousand × million (10⁹)
Trillion. million × million (10¹²)
Quadrillion. million × billion U.S. (10¹⁵)

United Kingdom (and other European) usage above follows the decision of the 9th Gen. Conference on Weights and Measures, 1948.

THERMOMETER COMPARISONS

Comparison between Scales of Fahrenheit Réaumur, and Centigrade.

CONVERSION.
 Let F = Fahr.
 " C = Cent.
 " R = Réaum.

$$F = \frac{9}{5}C + 32$$

$$C = \frac{5}{9}(F - 32)$$

$$R = \frac{4}{9}F$$

$$F = \frac{9}{4}R + 32$$

26	78.8	20.8	49	56.2	39.2

NOTE.—The normal temperature of the human body is 98.4° F., or 37° (36.9°) C., or 29.5° R. Freezing point = 32° F. = 0° C. = 0° R.; Boiling point = 212° F. = 100° C. = 80° R. "Absolute" Temperature is Temperature reckoned from "Absolute Zero," which is at 273° C. below 0° F., and 218.4° below 0° R., and is denoted by the letter "K."
 * Below 32° F. subtract 32.

METRIC WEIGHTS AND MEASURES

See also "Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the Metric system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

1. Measures of Length

- 10 millimetres = 1 centimetre = 0.393 701 inch.
(mm.) (cm.)
- 10 centimetres = 1 decimetre = 3.937 011 inches.
(dm.)
- 10 decimetres = 1 METRE (m) = 1.093 614 yards.
- 10 metres = 1 dekametre = 10.936 143 yards.
(dam.)
- 10 dekametres = 1 hectometre = 109.361 43 yards.
(hm.)
- 10 hectometres = 1 kilometre = 0.621 371 mile.
(km.)

A kilometre is approximately five-eighths of a mile, so that 8 kilometres (4.970 82 miles) may be regarded as 5 miles.

2.—Measures of Surface

- 1 sq. centimetre = 0.155 sq. inch.
- 1 sq. METRE = 10.763 9 sq. feet = 1.195 99 sq. yds.
- 1 are (a) = 0.098 8 rood.
- 1 hectare (10,000 sq. metres) (ha) = 2.471 05 acres.
- 1 sq. kilometre = 0.386 102 sq. mile.

3.—Measures of Capacity and Volume

- 1 centilitre (cl.) = 0.070 4 gill.
- 1 decilitre (dl.) = 0.175 98 pint.
- 1 LITRE* (x 1,000 cubic metre) (lit.) = 1.759 8 pints = 0.88 Imp. quart = 0.22 Imp. gallon = 61.025 5 cu. inch = 0.035 315 7 cu. ft.
- 1 hectolitre (hl.) = 21.997 5 Imp. gallons = 26.117 1 U.S. gallons = 2.749 7 Imp. bushels = 2.837 7 U.S. bushels.
- 1 cubic metre = 35.314 7 cu. ft. = 1.307 95 cu. yds. (cbm. or m³.)
- (1 ster (= 1 cu. metre) is used as a unit of measurement of timber).
- 1 cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1.000 kilograms) = 1 metric ton.

A new standard metric measure of 25 millilitres was introduced in 1959 following approval by Order in Council.

* The volume occupied by the mass of 1 kilogramme of pure water at its temperature of maximum density and under a pressure of one standard atmosphere (14.696 lb. per sq. inch).

4.—Measures of Weight

- 1 centigram (cg.) = 0.154 32 grains.
- 1 decigram (dg.) = 1.543 2 grains.
- 1 gramme (gm.) = 15.432 4 grains.
- 1 dekagram (dag.) = 5.643 8 drams.
- 1 hectogram (hg.) = 3.527 4 oz.
- 1 KILOGRAM kg. = 32.1507 oz. Troy = 35.273 4 oz. Avoirdupois = 2.204 62 lb. Avoirdupois.
- 1 myriagram = 22.046 2 lb. Avoirdupois.
- 1 quintal (q.) = 100 kg. = 220.5 lb. Avoirdupois = 1.968 4 cwt.
- 1 tonne (t.) = 0.984 207 U.K. or long ton = 1.102 31 U.S. or short ton.

Metric Weights—continued

- 1 hectolitre = 2.749 69 bushels.
- 1 hectolitre per hectare = 1.12 bushels per acre.
- 1 quintal = 3.6743 bushels.
- 1 quintal per hectare . . . = 1.49 bushels per acre.

NAUTICAL MEASURES

Distance is measured in nautical (or sea) miles. The nautical mile is traditionally defined as the length of a minute of arc of a great circle of the earth; but as this length varies in different latitudes (owing to the fact that the earth is not a perfect sphere), 6,080 feet, a "rounded off value" of the mean length, has been adopted in British practice as the standard length of the nautical mile. On this basis 33 nautical miles exactly equal 38 statute miles; the statute (land) mile contains 5,280 feet. A cable, as a measure used by seamen, is 600 feet (100 fathoms) approximately one-tenth of a nautical mile. Soundings at sea are recorded in fathoms (6 feet).

- 6 feet = 1 fathom.
- 100 fathoms = 1 cable length.
- 10 cables = 1 nautical mile.

Note.—Some other countries, including the United States in 1954, have adopted the nautical mile of 1,852 metres as recommended by the International Hydrographic Bureau in 1929.

Speed is measured in nautical miles per hour, called knots. A knot is a measure of speed and is not used to express distance. A ship moving at the rate of 30 nautical miles per hour is said to be "doing 30 knots" and as the nautical mile is longer than the land or statute mile this represents a land speed of over 34½ miles per hour. In 1945 the Royal Air Force adopted the knot and the nautical mile as the standard measurements for speed and distance.

Knots	m.p.h.	Knots	m.p.h.	Knots	m.p.h.
1	1.1515	15	17.2727	29	33.3939
2	2.3030	16	18.4242	30	34.5454
3	3.4545	17	19.5757	31	35.6969
4	4.6060	18	20.7272	32	36.8481
5	5.7575	19	21.8787	33	38.0000
6	6.9090	20	23.0303	34	39.1515
7	8.0606	21	24.1818	35	40.3030
8	9.2121	22	25.3333	36	41.4545
9	10.3636	23	26.4848	37	42.6060
10	11.5151	24	27.6363	38	43.7575
11	12.6666	25	28.7878	39	44.9090
12	13.8181	26	29.9393	40	46.0606
13	14.9696	27	31.0908	41	47.2121
14	16.1212	28	32.2424	42	48.3636

Gross tonnage.—The total volume of all the enclosed spaces of a vessel, the unit of measurement being a ton of 100 cubic feet.

Net tonnage.—The gross tonnage less certain deductions for crew space, engine room, water ballast and other spaces not used for passengers or cargo.

FUEL AND POWER MEASURES

British Thermal Unit (B. Th. U.) = The amount of heat required to raise 1 lb of water through 1 degree Fahrenheit at or near 39.1 degrees F.

Unit of electricity (kilowatt-hour) = Output of 1,000 watts for one hour. 1 k.w.h. = 3.413 B.Th.U.

Therm = 100,000 B.Th.U. = 29.3 k.w.h.

Atmosphere = pressure of 14.223 lb. per sq. in. = 1 kilogram per sq. cm.

Petroleum

Barrel = 35 Imperial gallons = 42 U.S. gallons.

Petroleum products are commonly quoted in metric tonnes, the conversion to barrels varying slightly according to the specific gravity of the product, e.g. the metric tonne in the major oil producing states (U.S.A., Venezuela, Persian Gulf, Saudi-Arabia, Iraq, etc.) varies from 7.0 barrels per metric tonne to 7.7 barrels, and in the smaller oil producing states (e.g., Albania) is as low as 6.7 barrels per tonne. Crude petroleum in the United Kingdom, 7.355 barrels per metric tonne (2,205 lbs.); 7.472 barrels per long ton (2,240 lbs.).

LOST PROPERTY IN LONDON

PROPERTY LOST ON LONDON TRANSPORT

79,285 umbrellas were left in buses or underground trains in 1961. Some 40 per cent. were reclaimed. A total of 376,452 articles were received by the Lost Property Office—a rate of more than 1,000 per day—including 72,000 pairs of single gloves, 12,000 pairs of spectacles, 22,000 books, 33,000 cases and bags, 46,000 items of clothing and 11,000 keys.

Enquiries about property left in London Transport Trains, Buses, or Green Line Coaches, should be made at the Lost Property Office of London Transport, 200-202 Baker Street, N.W.1. Office hours are 10 a.m. to 6 p.m. from Monday to Friday, and 10 a.m. to 1 p.m. on Saturday. The office is not open on Sundays, Good Friday, Christmas Day and Bank Holidays. Enquiries may be made by letter. Articles left in London Transport vehicles in the country area can be claimed at the nearest London Transport Country Garage within 48 hours.

PROPERTY LOST IN CABS

Enquiries as to property lost in a taxicab should be made at the Lost Property Office of the Metropolitan Police District, 109 Lambeth Road, S.E.1. Office hours are 10 a.m. to 4 p.m. (Saturdays, 10 to 1.) The office is not open on Sundays, Good Friday, Christmas Day and Bank Holidays.

ROMAN NUMERALS

1 I	11 XI	30 XXX	400 CD
2 II	12 XII	40 XL	500 D
3 III	13 XIII	50 L	600 DC
4 IV	14 XIV	60 LX	700 DCC
5 V	15 XV	70 LXX	800 DCCC
6 VI	16 XVI	80 LXXX	900 CM
7 VII	17 XVII	90 XC	1000 M
8 VIII	18 XVIII	100 C	1500 MD
9 IX	19 XIX	200 CC	1900 MCM
10 X	20 XX	300 CCC	2000 MM

Other Examples: 43 = XLIII; 66 = LXVI; 98 = XCVIII.

339 = CCCXXXIX; 619 = DCXIX; 988 = CMLXXXVIII; 996 = CMXCVI.

1674 = MDCLXXIV; 1961 = MCMLXI.

A bar placed over a numeral has the effect of multiplying the number by 1,000, e.g.:

6,000 = $\overline{\text{VI}}$; 16,000 = $\overline{\text{XVI}}$; 160,000 = $\overline{\text{CLX}}$; 666,000 = $\overline{\text{DCLXVI}}$.

CONVERSION TABLES FOR WEIGHTS AND MEASURES

NOTE.—The central figures in heavy type represent either of the two columns beside them, as the case may be. Examples:—1 centimetre = 0.394 inch and 1 inch = 2.540 centimetres, 1 metre = 1.094 yards and 1 yard = 0.914 metre, 1 kilometre = 0.621 mile and 1 mile = 1.609 kilometres.

Length		Area		Volume		Weight (Mass.)								
Centi- metres.	Inches.	Square Centi- metres.	Square Inches.	Cubic Centi- metres.	Cubic Inches.	Long Tons.	Short Tons.	Metric Tonnes.	Short Tons.

Music.....	= 14 × 10½	"

NOTE.—*Folio* means a sheet folded in half, *quarto* folded into four, and so on; thus, a crown 8vo page is one-eighth the size of a crown sheet. Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, or 10 reams per 1,000 copies, the odd 16 sheets in each ream being allowed as waste. Newspapers (and some books in editions of 50,000 or over) are printed on rotary presses, for which the paper is supplied in continuous reels.

Sizes of Types

The type size chiefly used in "Whitaker" is 5½ point, or *Ruby*, set on a 6 point "body." The column contains 78 lines, and is 12 Pica cms wide; on an average every column contains about 3,100 letters, or 710 words.

Today type up to 14 point size is usually set by a keyboard machine, and mechanically cast in single letters or in complete lines of type (e.g. Monotype and Linotype). All type is cast to one uniform height ("type high"), which is ⅙ inch. Individual letters vary in *breadth*, but the "body" of each character is of uniform *depth* throughout the alphabet in each size. The unit of *breadth* is the Pica M (*Em*) 6 of which, side by side, occupy one inch of space. The unit of *depth* is the Point (72 Points=1 Inch), so that 6 lines of 12 Point occupy 1 inch in depth. The names of the various sizes are:—

Brilliant (3½ point). A column the size of this in "Whitaker," if set in Brillant would contain 132 lines, and about 1,450 words.

Diamond (4½ point) is the next size; the column would contain 102 lines, and about 1,020 words.

Printing is the art of producing impressions, from characters or figures

CORRECTING FOR THE PRESS

Copyright by WILLIAM CLOWES & SONS, LTD., Printers of "WHITAKER'S ALMANACK."

The following extract is set up incorrectly in order to explain the conventional methods of correcting for the Press:—

^{0/} The process of printing, when compared with that of writing, is unquestionably a ~~dear~~ process; provided a sufficient number of any particular book^{2 cheap} printed, so as to render the proportion of the first expense upon a single copy inconsiderable. If, for example, it were required, even at the present ~~moment~~ time, to print a single copy, or even three ^{4#} copies or four, only of any production, the cost of printing would be greater than the cost of transcribing. ^{6 =}

^{80 run on} It is when hundreds and especially thousands, of the same work are demanded that the great value of the printing press in making knowledge cheap is particularly shown. [It is probable that the first printers did not take off more than two or three hundred, if so many, of their works, and, therefore, the earliest printed books must have been still dear, on account of the ^{80/} limited number of their readers. CAXTON, as it appears by a passage in one of his books, was a ^{12 trs.} cautious printer; and required something like an assurance that he should sell enough of any particular book to repay the cost of producing it. In his 'Legends of Saints,' he says, "I have submysed (submitted) myself to translate into English the ^{14 ;/} Saints of Legend,' called 'Legenda aurea' in Latin; and William, Earl of Arundel, ^{13 N.P.} sent me a worshipful gentleman, promising that my said lord should, during my ^{15 ital.} life, give and grant to me a yearly fee, that is to note, a buck in summer and a doe in winter. ^{16 l.c.} ^{17 stet} ^{18 w.f.} ^{19 @} ^{20 s. caps.} ^{21 y/} ^{22 trs.} ²³ ²⁴

24. desired me - and promised to take a reasonable quantity of them - and

1. Is the mark for changing the wrong letter in the word process.
2. To substitute one word for another.
3. and 24. The first is the method of marking a short insertion, the second of marking a long one.
4. To have a space put between the two words.
5. To turn a letter which has been placed upside down.
6. To close the word in which a space has been improperly left.
7. and 8. To take away (*dele*, blot out) a superfluous letter or word.
- 9, 12, and 22. Different marks for transposing the arrangement of letters, words, or sentences.
10. To have no fresh paragraph.
11. To substitute a comma for a full-point or period.
13. To commence a new paragraph.
- 14, 19, 21, and 27. To insert points and marks of quotation.
15. To have any particular part printed in Italic.
16. To have words or letters printed in 'lower case,' or small letters; Roman is always understood, unless otherwise directed.
17. To have a word remain, which has been accidentally or erroneously marked. *stet* is the Latin for 'let it stand.'
18. Points out a letter which does not match with the others: a 'wrong fount.'
20. and 23. To have certain parts printed in small or full capitals.
25. To set straight whatever may stand crooked.
26. To remove the unnecessary black mark between the words, which arises from what should form the space not having been pushed down.

HALL-MARKS ON GOLD AND SILVER WARES

Hall-marks are the symbols stamped on gold or silver articles to indicate that they have been chemically tested and that they conform to one of the legal standards. With certain exceptions, all gold or silver articles are required by law to be hall-marked before they are offered for sale. Hall-marking was instituted in 1300 under a statute of Edward I.

Normally a complete modern hall-mark consists of four symbols—the maker's mark, assay office mark, standard mark and date letter. Additional marks have been authorized from time to time.

Maker's Mark.—Instituted in 1363, the maker's mark was originally a device such as a bird or *fleur-de-lys* and now consists invariably of the initials of the Christian and surnames of the maker or of the firm.

Assay Office Mark.—The existing assay offices and their distinguishing marks are:—

LONDON (Goldsmiths' Hall).

A leopard's head (uncrowned from 1300 to 1478-9, when it became crowned until 1821, since when it has been uncrowned). From 1697-1720 this mark was used in London for gold only and not for silver.

- BIRMINGHAM..... An anchor.
- SHEFFIELD..... A crown
- EDINBURGH..... A castle.
- GLASGOW..... Tree, salmon, bell, and bird and ring.

Offices formerly existed in other towns, e.g. Chester, Newcastle, Exeter, York and Norwich, each having its own distinguishing mark.

Standard Mark.—Instituted in 1544. The current legal standards and their marks are as follows:—

SILVER.—Sterling silver (92.5 per cent. silver) is marked by English assay offices with a *lion passant*; by the Edinburgh Assay Office with a *thistle*; and by the Glasgow Assay Office with a *thistle* followed by a *lion rampant*. A full-length figure

of Britannia was impressed on fine silver plate (95.84 per cent. silver) between 1697 and 1720 and this mark is still used occasionally by all British assay offices.

GOLD.—22 carat articles (91.6 per cent. gold) are marked by English offices with a crown followed

by the figure 22; by the Edinburgh and Glasgow offices with the figure 22 following their respective standard marks as for sterling silver (see above).

18 carat articles (75 per cent. gold) are marked by English assay offices with a crown followed by the figure 18 and by Scottish offices as for 22 carat articles.

All British assay offices mark 14 carat gold (58.5 per cent. gold) with the figures 14-585 and 9 carat gold (37.5 per cent. gold) with the figures 9-375.

Date Letter.—Instituted in 15th Century. The date letter denotes the year in which an article was assayed or hall-marked. Each alphabetical cycle has a distinctive style of lettering or shape of shield. The date letters are different at the various assay offices and the particular office must be established from the assay office mark before reference is made to tables of date letters. The date letter is changed at the London Office in May each year and at Birmingham and Sheffield in July. Specimen shields and letters used by the London Office in each period from 1438 to date are shown below.

OTHER MARKS

Duty Mark.—In 1784 an additional mark of the reigning sovereign's head was introduced to signify that the excise duty had been paid. The mark became obsolete on the abolition of the duty in 1890.

Silver Jubilee and Coronation Marks.—Voluntary marks were authorized to be used at manufacturers' request to commemorate the silver jubilee of King George V and Queen Mary and the

Coronation of Her Majesty Queen Elizabeth II. The Jubilee Mark was used on silver made in 1933, 1934 and 1935 and the Coronation Mark on gold and

silver with date letter 1952/3 or 1953/4.

Foreign Wares.—Since 1842 foreign wares imported into Great Britain have been required to be hall-marked before sale. The marks consist of the importer's mark, a special assay office mark (together with the carat figure in the case of gold) and the annual date letter. The current assay office marks for foreign wares are as follows:—

- LONDON.—The sign of the Constellation Leo.
- BIRMINGHAM.—Equilateral triangle.
- SHEFFIELD.—The sign of the Constellation Libra.
- EDINBURGH.—St. Andrew's Cross.
- GLASGOW.—Double block letter F inverted.

Sir Winston Churchill urges you to help

30,000 LIMBLESS EX-SERVICEMEN

Many of the 30,000 British Limbless ex-servicemen are completely unable to help themselves. All are gravely handicapped but none need lose hope, provided they are given help in conquering their

disability. More money is urgently needed to acquire, maintain and equip homes in which they can be given a period of convalescence or care and comfort in their old age.

Donations or legacies should be made to :—

Major the Earl of Ancaster, T.D., Chairman of Appeal (W.A.3)

MIDLAND BANK LIMITED,

(Registered in accordance with the National Assistance Act 1948)

BLESMA IS NOT AIDED BY THE STATE

PRINCIPAL CHARITABLE BEQUESTS OF THE YEAR

The principal charitable bequests noted since our last issue are shown in the appended list. Apart from single bequests to societies the amount payable under the term residue is subject to deductions of duty, legacies and charges and, in some cases, to life interests. The amounts falling to charitable bodies are not necessarily payable during the year as they may be subject to instructions by testators as to business interests, investment instructions, etc.

Statements by some leading charitable organizations during the year show that nearly one-half of their revenue is by way of legacies and concern is being expressed that heavy Estate Duties will in time considerably reduce their income as taxation whittles away the larger estates. The endowment of their centres has been suggested by one society and this would in some way offer protection against reduced income from legacies. The fears of the societies seem to be upheld in declarations in Wills that "owing to heavy death duties" it is not possible to make charitable bequests, but this is offset to some extent by a number of cases showing that charitable gifts have been made in their lifetime by way of covenant, trusts and outright pecuniary gifts. The latter would appear to be the simplest, and indeed the most "profitable" method as by gifts "inter vivos"—any gift made five years before death—complete exemption of tax is enjoyed.

Among the principal bequests in the list is the gift of his residuary estate by Mr. Arthur Jeffress, the art collector, to the Institute of Cancer Research and King George's Fund for Sailors. It has been estimated that including funds from his estate in the U.S.A. the two societies will each receive £50,000 or more. Mr. Jeffress requested in his Will that the bequest to King George's Fund be applied for "the benefit of male Royal Naval ratings and Merchant Seamen." Mr. Kenneth Bladworth, of St. Leonards-on-Sea, left £16,000 to the Council of Justice to Animals, £15,000 to the Church of England Children's Society, and £10,000 to Dr. Barnardo's Homes, in addition to other charitable bequests, and the gift of his residuary estate for charitable purposes. A London woman Miss Millicent Miles left over £50,000 for charitable purposes in England as the Public Trustee decides, and Miss Annie Sanderson, of Eckington, Worcs., left the residue of her £59,415 estate to Societies "for the relief of pain and suffering." Benefits under the £865,359 estate of Mr. Henry Dobson Jacobson, head of a well-known confectionery firm, are left for purposes in connection with the cure of Arthritis and kindred diseases.

A former Wimbledon tennis champion Mrs. Phyllis Satterthwaite left over £60,000 to various societies for the benefit of animals and Mr. Thomas Boynton, of Bath, who befriended stray cats in his lifetime, left the residue of his £38,406 estate to the P.D.S.A. to build its first cats' home. Sir Alfred Harmsworth, the newspaper chief, left benefits in his Will to Dr. Barnardo's Homes, and the residue of the estate of millionaire Mr. Charles Cockroft, of Tunbridge Wells, is left for the benefit of sailors, servicemen, cripples and the Clergy. Mrs. Ivy Tait, widow of a former Archdeacon and Vice Dean of Rochester, left the balance of her £558,539 estate for the education of children of the Clergy of the Church of England. Mr. Godfrey Davis, founder and chairman of the car hire group, left £25,000 each, after a life interest, to the Motor and Cycle Trades Benevolent Fund and the Equine Research Station, Newmarket, and the remainder of his £564,494 estate for charitable purposes. Admiral Thomas Gilbert, who commanded a cruiser at Jutland in World War I, left over £50,000 to the National Institute for the Blind. The residue of the £76,300 estate of Mr. Horace Bates, of Bexhill, Sussex, is to benefit the Royal Masonic Benevolent Institution, and over £40,000 under the Will of Mr. John Bowden, of Malvern Wells, a former Cardiff businessman, is left for Masonic charities. Miss Elizabeth Edwards, a Brighton centenarian, left £10,000 War Loan to the R.A.F. Benevolent Fund and £8,000 under the Will of Mrs. Erna Hausmann, of Bolton, Lancs., goes to the Glyndebourne Arts Trust. Several bequests to the Distressed Gentlefolk's Aid Association include the residue of the £186,148 estate of Miss Jessie Huggett, of Twickenham. Miss Gwendolen Watkins, of Reigate, Surrey, left £23,500 for church and charitable purposes and the residue to the British Red Cross Society.

It was announced during the year that The Edwina Mountbatten Trust, a fund started in 1960, to the memory of Countess Mountbatten, to expand the work of the St. John Ambulance Brigade, the Save the Children Fund, and to promote nursing had reached the total of £111,195, and a similar fund in India raised £100,772.

The exiled Queen Mother of Yugoslavia, H.M. Queen Marie, left one-tenth of her residuary estate, or £3,000, whichever be the smaller, for charitable purposes, expressing the wish that it be used to help Yugoslavs settled in England.

Miss Amelia Miller, of Radipole, Dorset, left £1,000 upon trust for the upkeep of her donkeys and ponies, and in an estate not listed here, the Baroness Burton left her eleven house dogs and £6 a week for their upkeep to her personal maid.

Name	Gross Value	
Mr. Horace Samuel Bates, of Bexhill, Sussex.	£76,300	The residue to the Royal Masonic Benevolent Institution.
Mr. Kenneth Thomas Bladworth, of St. Leonards-on-Sea, Sus- sex.	£240,371	£16,000 to The Council of Justice to Animals, £15,000 to the Church of England Children's Society, £10,000 to Dr. Barnardo's Homes, £5,000 to the Y.M.C.A., and the residue equally between The Council of Justice to Animals and Humane Slaughter Association, and the Church of England Children's Society.

PLEASE HELP THE ARMY BENEVOLENT FUND

Many ex-soldiers and bereaved families are in urgent need of help. Your gift to the Army Benevolent Fund will go to relieve

cases of outstanding hardship. Please remember the fighting men who gave so much—by giving generously now.

Donations and legacies should be sent to:

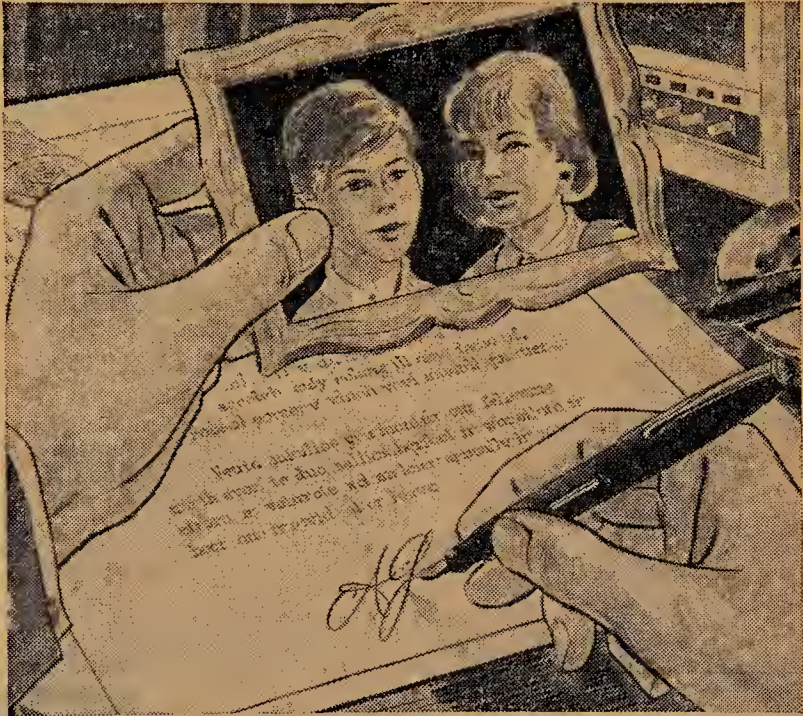

THE ARMY BENEVOLENT FUND

Patron: Her Majesty the Queen

20 GROSVENOR PLACE, S.W.1.

Tel: BELgravia 5639

Registered under the War Charities Act, 1940

Their future is secure...

... but what of the thousands of children whose future is entirely dependent on public support? As you make provision for your own family, please think also of the vast family in the care of Dr. Barnardo's Homes. A will that includes a bequest to Barnardo's is more than an act of charity. It is a direct contribution to the welfare and future of more than 7,000 boys and girls.

CENTRAL COUNCIL FOR THE CARE OF CRIPPLES

34 ECCLESTON SQUARE, S.W.1

*(Registered in accordance with the
National Assistance Act, 1948)*

The Central Council for the Care of Cripples, which was founded in 1919, is the doyen of the voluntary organisations serving the disabled. It makes no distinction in its work between different kinds of handicap and is recognised as the co-ordinating body of the movement by over 180 affiliated societies. The Council has developed voluntary services throughout the country by pioneering projects to show the need for orthopaedic and rehabilitation services, special education for handicapped children, and promotion of research into crippling diseases.

The vital work of the Council includes:

- Development
- Research
- Training
- News Service
- Working Parties
- Exhibitions
- Conferences
- Handcrafts

Dependent Upon Voluntary Contributions

Name	Gross Value	
Mr. Godfrey Davis, of Hampstead Lane, N.6.	£564,494	Subject to a life interest £25,000 to the Motor and Cycle Trades Benevolent Fund, £25,000 to the Equine Research Station, Newmarket, and the remainder for charitable institutions in Great Britain as Trustees select.

These are people who desperately need your help

The long-term sick and infirm—middle-aged as well as aged who unfortunately are not blessed with loving relatives or friends who can care for them.

The frail and aged—who with financial help can still be cared for in their own homes.

The middle-aged—who through illness or misfortune are in grave financial distress, many of whom are women with young families deprived of their husbands' financial support through sudden illness or death.

LEGACIES AND DONATIONS URGENTLY NEEDED

Distressed Gentlefolk's Aid Association

Patron: Her Majesty Queen Elizabeth the Queen Mother.

Vicarage Gate House, London, W.8

When members of the Church of England consult their legal advisers about their wills, it is suggested that sympathetic consideration be invited concerning the need for legacies and bequests to

THE CENTRAL CHURCH FUND

(Established in 1915)

This fund is administered by the Central Board of Finance and it is the only capital fund which is available to meet any urgent and unexpected needs of the Church of England of whatever kind, and whether at home or abroad, which are outside the scope of the Church Commissioners, the diocesan boards of finance and the church societies, and for which provision has not been made through the Church Assembly Fund.

All money received by the Central Board of Finance for its general purposes is placed in The Central Church Fund, and also monies earmarked and appropriated for special purposes. While the Board welcomes gifts for specified objects it calls attention to the great advantage of unfettered gifts to this fund, which can be applied at the Board's discretion to whatever object may command the highest degree of priority.

Suggested form of bequest for use in a will or codicil

"I give and bequeath to the Central Board of Finance of the Church of England, whose registered office is at Church House, Dean's Yard, Westminster, London, S.W.1, . . . *per cent of the residue of my estate* to be credited to the Central Church Fund and to be applied both as to capital and income to such ecclesiastical charitable purposes in the Church of England as the said Board shall in its absolute discretion decide, and I declare that the receipt of the Secretary for the time being of the said Board shall be sufficient discharge to my executors for the same."

All contributions will be gratefully acknowledged by the Secretary:—

Captain D. H. DOIG, C.B.E., R.N. (Retd.),

**THE CENTRAL BOARD OF FINANCE
OF THE CHURCH OF ENGLAND**

Church House, Dean's Yard, Westminster, London, S.W.1

COMMONWEALTH AND CONTINENTAL CHURCH SOCIETY

Patron: HER MAJESTY THE QUEEN

President: The Rt. Hon. The Lord Luke, T.D., D.L.

Treasurer: Kenneth Lewis, Esq., M.P.

This old-established Church society ministers to British families overseas, particularly in remote areas, or where local resources are insufficient to maintain a Church and Chaplain.

The Society works in each of the five Continents. In addition to the usual ministries of the Church, its activities include Christian education in Boarding Schools, and by Post and Radio; Children's Hostels; and a Flying Medical Service.

Secretary: The Rev. J. R. HASSETT,

7 YORK BUILDINGS, LONDON, W.C.2.

Bankers: Barclays Bank Ltd., 54 Lombard St., E.C.4.

Statue or Hospital ?

Both commemorate, only one serves. This year calls for special thought of Miss Nightingale and her Hospital, which is neither controlled nor supported by the State. Here as Lady Superintendent, she proved herself and her genius.

Send in gratitude, a Gift to the Appeal Secretary,
Florence Nightingale Hospital, 19 Lisson Grove, London, N.W.1

Telephone : PADdington 6412.

It would be hard to find a Society with such a fine legacy

of progressive achievement in almost every field
of Evangelistic and Social Welfare work as

THE CHURCH ARMY

There are: Homes for old people.
Holiday Homes for poor mothers and their children.
Rehabilitation and Training Centre for the Disabled.
Girls' Training Homes.
Hostels for Men and Youths.
Youth and Social Centres.
Mother and Baby Homes.
Clubs and Centres at Home and in Germany for H.M. Forces.

There are also: Winter Relief (Fuel, clothes, extra foods, etc).
Help . . . for the needy; for Prisoners' Families.
Moral Welfare Work, etc.
Evangelistic work includes:—
News Teams. Prison Missions. Summer Seaside Crusades.
Mission Vans. Christian Advance Training Courses.
Children's Missions, and work in Parishes, etc., and Overseas Missions.

This great **CHRISTIAN WORK** has touched for
the better the lives of **COUNTLESS THOUSANDS**

They count on us . . . can we count on you?

Owing to continued increase in teenage crime, we plan to establish further branches to help combat the cause. Adolescents must be provided with adventurous and constructive energy outlets to overcome the boredom of dull areas. Boredom invites mischief leading to delinquency. The first branch in this expansion scheme became operational in September 1962 at Hainault, Essex. The youth must develop to the Nation's credit—they are its future! Help us to put prevention before correction.

Your timely advice can help the
EMPIRE RHEUMATISM COUNCIL

In its fight to discover the cause of Rheumatism—disease of the millions!

RHEUMATIC FEVER AND STILL'S DISEASE (arthritis in children)
can cripple the young.

RHEUMATOID ARTHRITIS
afflicts more than 1½ million people of all'ages.

OSTEO-ARTHRITIS
2 out of 3 people over the age of 65 suffer seriously from osteo-arthritis.

The Empire Rheumatism Council relies entirely on voluntary gifts and legacies to finance its intensive research programme. An all-out effort is now under way to discover the causes of the rheumatic diseases, which include rheumatoid and osteo-arthritis. 40 projects are being financed and others planned. **BUT MORE MONEY IS NEEDED** if this vital work is to continue to expand.

YOU CAN HELP by advising clients when making their wills to remember

EMPIRE RHEUMATISM COUNCIL

8 Charing Cross Road, London, W.C.2

THE FAMILY PLANNING ASSOCIATION

231 Tottenham Court Road, London, W.1.

President: The Lord Brain, D.M., F.R.C.P.

THE FAMILY PLANNING ASSOCIATION has over 380 clinics throughout Britain where patients can be referred for contraceptive advice. At many of these, medical help is also available to childless couples and those with marital difficulties.

All clinics are staffed by specially trained doctors and nurses holding the F.P.A. Certificate.

The FAMILY PLANNING ASSOCIATION in addition,

- ★ has a Centre at Headquarters in London for the investigation and treatment of male-subfertility and laboratories for seminal analysis.
- ★ has a Pregnancy Diagnosis Centre at Headquarters in London. The Hogben test is used and results are obtained within 24 hours.
- ★ has standardised methods of teaching contraception. It arranges training sessions at clinics and also lectures for medical practitioners, students and nurses.
- ★ has devised standard tests for manufacturers' products and has set up an approved list of those which have passed the test. This list is available on application to Headquarters in London. Contraceptive products are not listed in the British Pharmacopoeia.
- ★ has a quarterly journal, FAMILY PLANNING, price 1/6.
- ★ has a MAIL ORDER and ADVICE DEPARTMENT.

Desperately poor CANCER SUFFERERS need your help

The National Society for Cancer Relief is helping thousands of poor persons who have been overtaken by the cancer scourge, and has brought a measure of cheer and comfort into countless homes. Grants, pensions, etc., now total approximately £180,000 a year.

The N.S.C.R. also endeavours to spread established knowledge as to the nature and incidence of cancer, its symptoms and diagnosis, and the measures that can be taken to prevent it, or curtail its activities.

YOU can share the privilege of giving at least a measure of cheer to our huge family of patients. They are all ages, and are in all parts of the British Isles. A donation of £10 would qualify you for Life Membership in this work of mercy, but every shilling is welcome.

Founder and Chairman: DOUGLAS MACMILLAN, M.B.E., M.R.I.P.H.H.

ANOTHER STEP FORWARD

in making much needed provision for elderly blind persons was the opening in 1962, at Sanderstead, Surrey, of another Home. Below is the Architect's impression of Croham Hurst Place, where the residents enjoy the high standard of comfort maintained in each of the Association's Homes. The Association which is helping blind persons throughout the country, also provides Workshops and Flats and has a Seaside Holiday Home. Its Benevolent and Pensions Fund is one of the largest. Founded in 1857, this charity remains an independent body relying on legacies and voluntary contributions for the furtherance of its work and is grateful for every gift, large or small.

DEAFNESS

THE ROYAL NATIONAL Institute for the Deaf strives to alleviate this grievous handicap by every possible means. Its welfare activities have expanded considerably in the last year and funds are urgently needed to meet the heavy liabilities incurred.

In addition to its old established Homes, four new properties have now been acquired for additional Homes, a school for doubly handicapped children and a training centre for maladjusted deaf youths. Our Library, Technical Department and Welfare Department become busier year by year. All our experience and resources are freely at the service of anyone

concerned with the problem of deafness, their own or others.

Gifts and legacies are urgently needed to help maintain and extend our work.

By Will or Codicil or Covenant...

May we suggest to Legal or Financial Advisers that when questions of their clients' benefactions arise the worthiness of the Royal Air Force Benevolent Fund may be wholeheartedly and deservedly commended.

Briefly, The Royal Air Force Benevolent Fund provides help to R.A.F. personnel disabled while flying or during other service. It assists the widows and dependants of those who lose their lives and helps with the children's education. It gives practical assistance to those suffering on account of sickness and general distress.

The need for help in nowise lessens in peace or war. Our immeasurable gratitude to that "Immortal Few" can hardly cease while memory itself endures.

THE ROYAL AIR FORCE BENEVOLENT FUND

More detailed information will be gladly sent by the Hon. Treasurer

“*Why should this
concern me?*”

“What’s the Royal Hospital and Home for Incurables?
Just another Charity?”

Confronted with innumerable flag days, bazaars, dances, coffee parties and so on, it is all too easy for us to forget the real purpose of a particular ‘charity,’ and consequently to dismiss it. Yet every charitable organization exists to answer the desperate needs of those to whom the state can offer little or no assistance. The Royal Hospital answers such a need.

Founded over one hundred years ago, it has in its care 255 crippled men and women, many of them still in their prime, who have been struck down by incurable diseases and can no longer lead normal lives.

Their welfare and happiness is the concern of the Hospital. *Can it be yours too?*

DEPENDENT ON VOLUNTARY CONTRIBUTIONS

SOLDIERS' SAILORS' AND AIRMEN'S FAMILIES ASSOCIATION

Patrons:

Her Majesty The Queen. Her Majesty Queen Elizabeth the Queen Mother

FOR OVER SEVENTY-FIVE YEARS SSAFA has been giving help and advice to thousands of service and ex-service families in distress. Broken homes, sudden bereavement, separated families and resettlement in civilian life are a few of the problems with which SSAFA deals. SSAFA has an active Overseas organisation which is available to all service families abroad who may be in need of help or advice. SSAFA assists the widows and dependants of ex-servicemen in time of need.

SSAFA is maintained almost entirely by voluntary subscriptions.

Donations and legacies gratefully received by
